25TH CONG.....1ST SESS.

MONDAY, SEPTEMBER 11, 1837.

VOLUME 5.....No. 1.

BY BLAIR & RIVES.

—WEEKLY—

PRICE \$2. FIRST TWO SESSIONS.

## TWENTY-FIFTH CONGRESS, FIRST SESSION.

### IN SENATE.

MONDAY, September 4, 1837.

This being the day designated in the PRESIDENT'S Proclamation of the 15th of May, for the meeting of the First Session of the Twenty-fifth Congress,

The VICE PRESIDENT called the Senate to order at 12 o'clock, when forty-two Senators appeared in their seats.

Mr. GRUNDY offered the usual resolution respecting newspapers.

Mr. KING of Alabama presented the credentials of C. C. CLAY, a Senator elect from Alabama for six years from the 4th of March last. The credentials having been read, Mr. C. took the oath and his seat.

Mr. RIVES presented the credentials of W. H. ROANE, elected a Senator from Virginia for six years from the 4th of March last. The credentials having been read, he was qualified and took his seat.

Mr. KING of Alabama presented the credentials of R. S. STRANGE of North Carolina, elected a Senator from that State for six years. The credentials having been read, Mr. S. was qualified and took his seat.

Mr. KING of Alabama offered the following order:

*Ordered*, That a message be transmitted to the House of Representatives, to inform that House that a quorum of this body has assembled, and is ready to proceed to business.

The resolution was adopted.

Mr. WRIGHT moved the appointment of a committee to join such committee as the House may appoint, to wait on the President of the United States, and inform him that the two Houses are organized, and are ready to receive such communication as he may be pleased to make to them.

The resolution was adopted.

Mr. GRUNDY moved that the Senate proceed to the election of Sergeant-at-arms.

Mr. CLAY moved to amend so as to include the office of Doorkeeper; which was agreed to, and the motion as amended was then agreed to.

The Senate then proceeded to ballot for Sergeant-at-arms, when Mr. STEPHEN HAIGHT received the whole of the 40 votes, and was consequently unanimously elected.

The Senate then proceeded to ballot for a Doorkeeper, and on the third ballot Mr. EDWARD WEYER was declared duly elected, having received 21 votes, being a majority of the whole number.

On motion of Mr. BUCHANAN,

The Senate adjourned.

## HOUSE OF REPRESENTATIVES,

MONDAY, September 4, 1837.

This being the day designated in the PRESIDENT'S Proclamation of the 15th of May, for the meeting of an Extra Session of the Twenty-fifth Congress, the House was called to order at 12 o'clock, by WALTER S. FRANKLIN, Clerk of the House of Representatives of the last Congress, who, having read the Proclamation, proceeded to call over the roll by States, when the following members answered to their names:

### MAINE.

Hugh J. Anderson, George Evans,  
Timothy J. Carter, John Fairfield,  
Jonathan Cilley, Joseph C. Noyes,  
Thomas Davee, Francis O. J. Smith.

### NEW HAMPSHIRE.

Charles G. Atherton, Joseph Weeks,  
Samuel Cushman, Jared W. Williams,  
James Farrington,

### MASSACHUSETTS.

John Quincy Adams, George Grennell, jr.  
Nathaniel B. Borden, William S. Hastings,  
George N. Briggs, Levi Lincoln,

William B. Calhoun,  
Caleb Cushing,  
Richard Fletcher,

William Parmenter,  
Stephen C. Phillips,  
John Reed.

When the name of Mr. CUSHING was called, that gentleman rose in his place, and remarked, that before he answered officially, he wished to say a few words in explanation. He saw before him many members who were said to be elected to that House, but that was all they knew, having, at present, no authentic knowledge on the subject. He insisted that they were not members of the House till after the election of Speaker, and they had all duly qualified. He was aware that the usage of the House had been, that the Clerk should prepare a roll, as he had done; should call the members individually; and that he should also officiate in the organization of the House. It was perfectly proper that he should do this, so far as regarded the preparation of the roll and the call of members; and the standing rule of the House provided that he should be Clerk till a successor was appointed; but it was not proper that that officer should be compelled to resort to newspapers, as to who were or were not members. It was not proper, Mr. C. must say, that they, the members elect, should be organized under the presidency of an individual not a member of their own body. He did not say this out of any want of confidence in that officer, who, he was assured, would act in strict honor and good faith, but he desired to avail himself of that occasion to protest against the usage, and to state that, but for the delicate circumstances in relation to the parties now dividing that House and the country, he should have felt it his duty to move that the gentlemen there present be organized, as they ought to be organized, under the presidency of one of their own number. Mr. C. added that he had merely made these explanations in order that, in due time, the evil might be remedied, and he put several cases that might arise, as of one gentleman calling another to order, who who could decide that question? or suppose a question should arise in regard to the mode of electing the Speaker, how could it be arranged? or suppose, what actually took place in the 23d Congress, that a question should arise as to whether a gentleman there present be or be not a member, how could it be decided by the present usage? Mr. C. held these to be evils; and at the proper time, when no party question could be brought to bear upon it, he hoped to see it adjusted. Having made this explanation, he expressed himself ready to answer the call; which he did, and the Clerk proceeding with the roll, the following gentlemen answered to their names:

### RHODE ISLAND.

Robert B. Cranston, Joseph L. Tillinghast.

### CONNECTICUT.

Elisha Haley, Lancelot Phelps,  
Orin Holt, Isaac Toucey,  
Samuel Ingham, Thomas T. Whittlesey.

### VERMONT.

Heman Allen, Hillard Hall,  
Horace Everett, William Slade.

### NEW YORK.

John T. Andrews, Gouverneur Kemble,  
Bennet Bicknell, Arphaxed Loomis,  
Samuel Birdsall, Richard P. Marvin,  
John C. Brodhead, Robert McClellan,  
Isaac H. Bronson, Charles F. Mitchell,  
Andrew D. W. Bruyn, Ely Moore,  
Churchill C. Cambreleng, William H. Noble,  
Timothy Childs, John Palmer,  
John C. Clark, Amasa J. Parker,  
Edward Curtis, William Patterson,  
John I. DeGraff, Luther C. Peck,  
John Edwards, Zadock Pratt,  
Millard Filmore, John H. Frentiss,  
Henry A. Foster, David Russell,  
Albert Gallup, Mark H. Sibley,  
Abraham P. Grant, James B. Spencer,  
Hiram Gray, William Taylor,

Ogden Hoffman,  
Thomas B. Jackson,  
Nathaniel Jones,

Obadiah Titus,  
Abraham Vanderveer,  
Henry Vail.

### NEW JERSEY.

John B. Ayckrigg, Joseph F. Randolph,  
William Halstead, Charles C. Stratton,  
John P. B. Maxwell, Thomas Jones Yorke.

### PENNSYLVANIA.

William Beatty, Samuel W. Morris,  
Richard Biddle, Henry A. Muhlenberg,  
Andrew Buchanan, Charles Naylor,  
Edward Darlington, Charles Ogle,  
Edward Davies, Lemuel Paynter,  
Jacob Fry, jr. David Petriken,  
Robert H. Hammond, Arnold Plumer,  
Thomas Henry, David Potts, jr.,  
Edward B. Hubley, William W. Potter,  
John Klingensmith, jr. Luther Reily,  
Henry Logan, John Sergeant,  
Charles McClure, Daniel Sheffer,  
Thos. M. T. McKennan, George W. To'land,  
Matthias Morris, David D. Wagener.

### DELAWARE.

John J. Milligan.

### MARYLAND.

John Dennis, Isaac McKim,  
Benjamin C. Howard, James A. Pearce,  
Daniel Jenifer, Francis Thomas,  
William Cost Johnson, John T. H. Worthington.

### VIRGINIA.

Andrew Beirne, James M. Mason,  
James W. Bouldin, Charles F. Mercer,  
Walter Coles, William S. Morgan,  
Robert Craig, John M. Patton,  
George C. Dromgoole, Isaac S. Pennybacker,  
James Garland, Francis E. Rives,  
George W. Hopkins, John Robertson,  
Robert T. H. Hunter, Archibald Stewart,  
Joseph Johnson, John Taliaferro,  
John W. Jones, Henry A. Wise,  
Francis Mallory.

### NORTH CAROLINA.

Jesse A. Bynum, Abraham Rencher,  
Henry W. Connor, Samuel T. Sawyer,  
Edmund Deberry, Augustine H. Shepperd,  
James Graham, Charles Shepard,  
Micajah T. Hawkins, Edward Stanley,  
James J. McKay, Lewis Williams,  
William Montgomery.

### SOUTH CAROLINA.

John Campbell, Francis W. Pickens,  
William K. Clowney, Robert Barnwell Rhett,  
Franklin H. Elmore, Waddy Thompson,  
Hugh S. Legare.

### GEORGIA.

William C. Dawson, Jabez Jackson,  
Seaton Grantland, George W. Owens,  
Charles E. Haynes, George W. B. Towns,  
Hopkins Holsey.

### KENTUCKY.

John Calhoun, John Pope,  
John Chambers, Edward Rumsey,  
William J. Graves, William W. Southgate,  
James Harlan, Joseph R. Underwood,  
Richard Hawes, John White,  
Richard A. Menifee, Sherrod Williams,  
John L. Murray.

### TENNESSEE.

John Bell, Abraham McClellan,  
William B. Campbell, James K. Polk,  
William B. Carter, Ebenezer J. Shields,  
Richard Cheatham, Hopkins L. Turney,  
John W. Crockett, Christopher H. Williams,  
Abraham P. Maury.

### OHIO.

James Alexander, jr. Daniel Kilgour,  
John W. Allen, Daniel P. Leadbetter,  
William Key Bond, Andrew W. Loomis,  
John Chaney, Samson Mason,  
Thomas Corwin, Calvary Morris,  
Alexander Duncan, Joseph Ridgeway, sen.  
Patrick G. Goode, Matthias Shipley,  
Thomas L. Hamer, Taylor Webster,

Alexander Harper, Elisha Whittlesley.  
 William H. Hunter,  
 LOUISIANA.  
 Henry Johnson.  
 INDIANA.

Ratliff Boon, William Graham,  
 George H. Dunn, William Herod,  
 John Ewing, James Rariden.

When the State of MISSISSIPPI was called—

Mr. MERCER rose and remarked that he should not have asked the attention of the House till it was so far organized as to act; but that he perceived they had arrived at that point which required of him to propound an inquiry to the two highly honorable and respectable gentlemen from Mississippi, an inquiry he knew they would respond to with candor, and he hoped, satisfactorily to the House. Mr. M. then made a statement of what he understood to be the facts in regard to the late election in Mississippi, and asked if those facts, or any part of them, were true or not.

Mr. GHOLSON had no disposition to make any reply on this subject till the House was organized, when he should be prepared to answer any and every interrogatory any gentleman might feel disposed to propound. The facts were briefly these: that the Governor of Mississippi had issued his proclamation for an election, as the law authorized him to do; an election was held under it, and he and his honorable colleague were there present; their right to their seats having been questioned by very few individuals of either party of their State. Indeed it was not until after the election was over, and the result ascertained, that any question was made of it; and from the best information he had, the question itself had originated not in the State of Mississippi, but elsewhere. He (Mr. G.) insisted, however, that this question could not be entertained till the House was organized; but whenever it was, and the House was prepared to act upon the case, he should be prepared to meet it; for he had no wish to take his seat in a body of which he was not constitutionally a member. He added that under the Governor's proclamation, fifty-five out of the fifty-six counties had voted.

Mr. MERCER made a brief explanation, and adverted, as another reason for his having propounded the question, to the failure of his effort in the last Congress to procure an amendment of that branch of the rules relating to the subject of contested elections; and that, if they proceeded one stage further, and elected a Speaker, he would be unable to renew that motion with any probability of success. He also gave notice of another motion he designed to make, when it was in his power to do so, viz: to take the power of appointing committees from the Speaker and vest it in the House, in pursuance of the long established usage of that body from which they obtained nearly all their precedents, and the greater part of their rules, the British Parliament.

After some further remarks on this subject, Mr. M. expressed himself not satisfied by the statement of the gentleman from Mississippi, and he moved a resolution to the effect that sufficient evidence had not been offered to show that Messrs. CLAIBORNE and GHOLSON were entitled to their seats.

Mr. CLAIBORNE rose, he said, debilitated as he was, not to reply to the gentleman from Virginia, for he would not, at that time, suffer himself to be drawn into any argument upon that subject, but he rose to protest, in the name of the people of Mississippi, against a step which he denounced as high-handed, arbitrary, and unprecedented; for he deliberately asserted, that the gentleman from Virginia had no more right to question his title to a seat upon that floor, than he had to question the right of that gentleman or any other. He insisted that that was not an organized body until a Speaker had been elected. Until then, they had no existence whatever as a body, but were a mere association of individuals, claiming to represent the people of the respective States. His colleague and himself appeared there, and their appearance was *prima facie* evidence of their right to represent the people of the State whence they came. He repeated, that he would not reply to the gentleman from Virginia, or to any other gentleman who would endeavor, at the threshold, to exclude him from his

rights. He came there to represent the people of his State, and had been sent there by the overwhelming voice of that people, expressed under the authority of the Constitution and laws of the State, and under the authority of the Federal Constitution also. Although Mr. C. would not undertake to pronounce an eulogy upon the Governor of Mississippi, who was the leader of the party to which he was opposed, yet he would say that that gentleman was a man of high character, and was incapable of doing what had been ascribed to him. Mr. C. looked upon it as an insult, not alone to the party that elected him and his colleague, but to all parties of the State, to the whole people of Mississippi, to venture thus to dispose of their rights before they had the power to do so. If, however, it was persisted in, he should feel himself compelled to challenge every member from Maine to Mississippi to produce their credentials, and he should object to any man's taking his seat there till he and his colleague obtained their rights. Mr. C. would throw out no imputations, but, if assailed, he would say he was prepared to carry the war into Africa. He was also prepared to say where this opposition originates, though it now came from a different quarter. He would say that no man had been more disposed to a conciliatory course than himself; but he would not be singled out as the victim there by a sort of political ostracism. If they wished to drive him from his seat, they should do it in the only way they had the power; by first organizing themselves, appointing their officers and committees, and, after sending the subject to the Committee of Elections, the verdict must be pronounced by the representatives of the people. In conclusion, he declared he should, when the proper time arrived, go forward, and claim to be sworn as a representative entitled to a seat on that floor.

Mr. BYNUM said that, believing the resolution to be unprecedented, he moved to lay it on the table.

Mr. MERCER made a few remarks in explanation, which were not distinctly audible at the Reporter's desk.

Mr. BYNUM contended that the two gentlemen from Mississippi were entitled to take their seats and qualify; and that the motion submitted by the gentleman from Virginia was entirely unprecedented. In cases of contested elections, the member exhibiting to the House *prima facie* evidence of his election was permitted to take his seat and qualify. Then he considered that the present case was much stronger than that of a contested election; because in the present case, the right of the gentlemen to their seats was not contested in the usual manner. He hoped the House would proceed in its organization, in the manner heretofore pursued, and according to parliamentary usage. Gentlemen had referred to the case of Moore and Letcher in support of their arguments. That case might, perhaps, be a case remotely in point; but he contended that the House ought then to have allowed Mr. Moore to take his seat when he presented his certificate of election. If the motion of the gentleman from Virginia (Mr. Mercer) was in order, his motion was also in order, and he hoped the question might now be put.

Mr. BOON considered that all which could be said on this question would be an unnecessary waste of time; and if the question was gone into, it might lead to an interminable debate. He therefore hoped that the question might be speedily taken.

The question on laying the resolution of Mr. Mercer on the table was then taken by tellers, and decided in the affirmative—ayes 131, nays 5.

Mr. RHETT, of South Carolina, then submitted a resolution that LEWIS WILLIAMS, of North Carolina, the oldest member of the House of Representatives, be appointed to serve as Chairman until the House is organized.

Mr. HAMER believed that this was the first time that ever a motion had been made to appoint a Chairman to organize the House; and unless some special reason could be assigned why this resolution should be adopted, he must vote against it.

Mr. TOUCEY moved to lay the resolution on the table.

Mr. WISE considered that the gentleman from

South Carolina was right in the opinion that the Clerk, who was the Clerk of the last House of Representatives, and not the Clerk of the present body, was not the proper person to preside over this House at present. It seemed to him that the proper course would be, to elect some member of our own body to preside until the House was duly organized.

Mr. WILLIAMS, of North Carolina, said it had been usual, ever since the organization of the Government, for the Clerk of the House to proceed to call over the list of members, as had been done to-day; and he could see no reason why we should now pursue a different course. He thought we could as well proceed under the mode we had heretofore pursued, as by appointing a chairman for the purpose of organizing the body, because we can vest all power in the Clerk, which can be vested in a chairman selected from that body. He hoped, therefore, that the resolution would be laid on the table.

Mr. WISE said that the gentleman from North Carolina had alluded to the Clerk of the House in his remarks. Now, he contended that there was no Clerk of the House of Representatives—the person now presiding being the Clerk of the last House, and that he had no authority to preside over this body. The rules, too, which had been alluded to, were the rules of the last House, and did not govern this body. He considered, then, taking this view of the question, that the only proper course to pursue, would be to call a member of our own body to the Chair, for the purpose of organizing the House.

Mr. PATTON considered that the whole difficulty arose from the utter impossibility of an unorganized body exercising the functions of an organized body. When a gentleman moves to appoint a chairman, who is to vote or who is to judge of the right of gentlemen to vote? If, when the first gentleman's name is called, his right to vote is challenged, who is qualified to decide the question? He considered, from the necessity of the case, that we must proceed to an election of officers, and an organization of the body, before we could do any thing in the matter in relation to the right of the gentlemen from Mississippi to qualify and take their seats. He trusted, therefore, that the body would proceed to an election of Speaker, and then let the question of the legality or constitutionality of the Mississippi election be brought up in the proper manner.

Mr. ROBERTSON could not take the same view of this matter which had been taken by his colleague, (Mr. Patton.) He considered the House competent to decide the question now, whether the gentlemen from Mississippi were entitled to their seats. He admitted that we were not governed here by any rules, but common sense must lead every man to a correct conclusion in relation to the matter. Suppose a gentleman by the name of John Smith was elected a representative to this House from one of the States, and another individual by that name, in his absence, should appear on this floor, and claim the right of taking his seat and qualifying, would any gentleman say that this body had not the power of preventing him from taking the oath? Would any gentleman say that it was powerless, and could not decide the case? Although it was not the usual course, he preferred electing a chairman from our own body, for the purpose of organizing the House. In the case of Moore and Letcher, when the Clerk arrived at the name of Thos. P. Moore, it was agreed that it should not be called until a Speaker was elected, and the House organized; and he would pursue this same course in relation to the gentleman from Mississippi. He contended that the Governor of Mississippi had no power to order an election of representatives; and that, consequently, the election was illegal.

Mr. RHETT said that he had not made the motion for the purpose of excluding the gentlemen from Mississippi from any privilege which they might claim on this floor, but because he considered the proposition proper in itself, and strictly in order. The gentleman from Virginia (Mr. Patton) had asked how the question in relation to the right of

any gentleman to take his seat was to be determined. In reply to this, he would say that they would be determined by gentlemen presenting to the presiding officer their certificates of election, and if there was any thing irregular in relation to any of these certificates, it would be for the House to decide whether the gentlemen presenting these irregular certificates should be entitled to their seats.

Mr. PATTON said that the honorable gentleman from Mississippi (Mr. Claiborne) had avowed his determination, if a question was made to deprive him of any right on this floor, to challenge the right of the first gentleman who might be called upon to vote for a presiding officer. If the gentleman carried this determination into execution, he would again ask gentlemen who were to decide the case? This question was to be answered; and who could answer it except those presenting themselves here, claiming seats on this floor? He did not consider that the election of a chairman would remedy the difficulty, and he hoped it would not be resorted to.

Mr. REED, of Massachusetts, said it had been suggested by some gentlemen, that if we did elect a Speaker, and it was afterwards ascertained that he had been elected by individuals not entitled to vote, that the election could be set aside. Now, as the election was by ballot, he imagined that it would be impossible to ascertain whether or not the Speaker was elected by illegal votes. He made this suggestion at present for the consideration of gentlemen.

Mr. WILLIAMS, of North Carolina, repeated that he saw no reason for departing from the usual course of proceeding in the organization of the House. In reply to the gentleman from Virginia, (Mr. Wise), he referred to the rule declaring that the Clerk of the House shall hold his office until a successor shall be elected, and contended that they were then proceeding in the usual and proper course.

Mr. WISE said that the Clerk was the Clerk of the last Congress, and that it was no part of his duty to preside over the present body.

Mr. THOMAS said that he coincided with the gentleman from Virginia (Mr. Wise) in one opinion he had expressed. He believed that the vote of the House to lay on the table the proposition of the gentleman over the way (Mr. Mercer) had decided nothing. He can renew his motion again. But why should not he extend this principle, and apply it to all other questions which may be mooted? Suppose this body had decided otherwise in the case just disposed of? Suppose a majority had refused to lay that motion on the table, and had proceeded to adopt the motion of the gentleman from Virginia (Mr. Mercer)? Such a decision would not have been respected. When the Clerk had reached the names of the members elect from Mississippi, one of them has already told you he will repair to the table to be sworn. And in this he is right. Who shall infringe the principles for which he contends? He is one of the chosen representatives of the people of Mississippi. He has with him a certificate of election signed by the Governor of that State. He appears here with his colleague, with the same power to take his seat that we each have. And they have as much authority to question our right to be sworn as we have to dispute theirs. Convinced of this, I have not divided, and will not divide, on these preliminary questions. It is obvious that we are not governed by the rules which were adopted for the guidance of the last Congress. We are in a disorganized state, and it is in the power of a very few members to keep us in this condition for days, weeks, yea, months. The members of this body may discuss any and every question that the mind of man can conceive; and who shall call to order? who shall stay the tide? who shall say to the man of debate, thus far shalt thou go and no farther? The public interests may suffer, the public business may be neglected, while we, the chosen representatives of the people, stand here idly chasing abstractions, which ought to be sent to that place described by Hudibras:

Where entity and quiddity,  
And ghosts of defunct bodies lie.

There is but one set of rules by which we can be governed. They must have their origin in the good

sense and forbearance of this body, and thus validity and binding force must be found, where alone they can be found, in the universal consent of the members present. In this way, every preceding Congress has been organized. The Clerk has called the roll, the members have elected their Speaker, and then each member elect, on presenting himself, has been qualified to take his seat. If this unvaried custom is now departed from, our difficulties will be interminable. If the certificates of election are called for, may it not be said they are forged? and who is prepared, in conformity with rigid rules of evidence, to prove the contrary? We have no committees to examine into the truth of any allegation; we have no officers to serve process, and compel the attendance of witnesses. Even the gentleman from North Carolina, if he should attempt to take the chair, may have, and doubtless will have, his right to do so contested. Is he prepared to meet every objection that may be urged? If he is, there are few members of this body as well provided.

Mr. T. insisted that no practical inconvenience could be produced by an adherence to former time-honored practice. Let us proceed to elect the officers of the House; let the usual Committee of Elections be appointed, and if, upon examination, it shall appear that members not duly authorized to participate in the election of our officers have voted, that will be good cause for annulling their elections; and notwithstanding we vote by ballot, a majority of the House can and will correct all irregularities, after we shall have winnowed the chaff from the wheat, by vacating such seats, if any ought to be vacated.

Mr. T. contended that the Kentucky contested election was not disposed of by the House in a manner to justify gentlemen in claiming that to be a precedent for the present movement. In that case each of the parties (Mr. Moore and Mr. Letcher) presented papers purporting to be certificates of election. As to the character of those certificates the House did not then decide. Every member of that Congress must remember that the parties contending for the vacant seats in the presence of the House, waived their respective rights, and the House ratified this arrangement. We have, then, unbroken custom for our guide, and no injustice can be done to any portion of the American people by a strict adherence to this wholesome and convenient usage.

Mr. CUSHING said that, in the case of Moore and Letcher, both gentlemen claimed seats upon the floor. Mr. Moore having obtained the certificate of several of the sheriffs of his district, one having refused to make a return, based his claim to a seat on these certificates. Mr. Letcher claimed the seat, and based his claim upon the fact which showed that he had a majority of the votes of the district. In consequence of this state of the case, an agreement was made between Mr. Moore and Mr. Letcher, that they withdraw until the House was organized, and then lay the matter before the House. This was the true statement of the case, as every gentleman who was then present must recollect.

Mr. ROBERTSON then read an extract from the journal of that year, to show that the House, by general consent, agreed to pass by the name of Mr. Moore.

Mr. CUSHING replied that it might so appear on the journal, but notwithstanding that, the agreement between the two gentlemen, which he had before alluded to, had been made on the floor of the House, and they voluntarily withdrew.

Mr. McKAY addressed the House at some length, showing that the Clerk was now pursuing the course which had been pursued in the organization of the House ever since the foundation of the Government, and he hoped the House would not now deviate from the long established practice.

After a few remarks from Messrs. EVERETT, HOLSEY, BRIGGS, and MERCER, the motion to lay on the table was agreed to without a division.

The Clerk then proceeded with the call, when the following gentlemen answered to their names.

MISSISSIPPI.

John J. H. Claiborne, Samuel J. Gholson.

ILLINOIS.

Zadok Casey, Adam W. Snyder.  
William L. May,

ALABAMA.

Reuben Chapman, Joshua L. Martin.

MISSOURI.

Albert G. Harrison, John Miller.

The Clerk then announced that there were 224 members present.

Mr. PETRIKEN of Pennsylvania submitted a resolution that the House now proceed to organize, by choosing a Speaker; which was agreed to without a division.

The House accordingly proceeded to ballot for the choice of Speaker; and Mr. HAMER, of Ohio, Mr. MCKENNAN, of Pennsylvania, and Mr. JONES, of Virginia, having been appointed tellers, the result of the first and only ballot was announced as follows:

Whole number of votes 224: necessary to a coice 113; of which

The Hon. JAMES K. POLK received	-	116
Hon. JOHN BELL	-	103
Scattering	-	5

224

The Hon. JAMES K. POLK, of Tennessee, was therefore declared duly elected Speaker of the 25th Congress; and, having been conducted to the Chair by Mr. LEWIS WILLIAMS, of North Carolina, and Mr. OWENS of Georgia, returned thanks to the House.

The members present were then qualified, by taking the oath prescribed in the Constitution of the United States.

On motion of Mr. CUSHMAN, it was

Resolved, That the House proceed to the choice of a Clerk.

Mr. SERGEANT nominated SAMUEL SHOCH, of Pennsylvania.

Mr. CUSHMAN nominated WALTER S. FRANKLIN.

The Tellers reported the result of the ballot as follows:

Whole number of votes	-	209
Necessary to a choice	-	105
Of which Walter S. Franklin received	-	146
Samuel Shoch	-	48
Matthew St. Clair Clarke	-	7
Blanks	-	8

Whereupon WALTER S. FRANKLIN of Pennsylvania, was declared duly elected, and took the oath of office.

On motion of Mr. WILLIAMS of North Carolina, Messrs. CARR and HUNTER were appointed Doorkeepers to the House.

On motion of Mr. CONNOR, RODERICK DORSEY was appointed Sergeant-at-Arms.

On motion of Mr. GARLAND of Virginia, a committee of three was appointed on the part of the House to join the committee on the part of the Senate to wait on the President of the United States, and inform him that a quorum of the two Houses was assembled, and that Congress was ready to receive any communication he may be pleased to make.

The following gentlemen were appointed the committee on the part of the House:

Mr. GARLAND, of Virginia;

Mr. REED, of Massachusetts;

Mr. HOWARD, of Maryland.

Mr. MERCER moved that the standing rules and orders of the last Congress be now adopted, with some exceptions.

Mr. BRIGGS suggested that it would be better to limit the operation of the former rules, with the exceptions referred to, for the space of ten days.

Mr. ADAMS moved that the whole subject, together with the report of the select committee of the last Congress thereon, be referred to a select committee.

Mr. BELL suggested a limitation of the existence of the rules they now wished adopted to the first Monday in December next, in order, he said, to avoid the discussion that would inevitably arise upon them at this very important period.

Mr. HAMER expressed a wish that the gentleman from Virginia would consent to allow the subject to lie over till to-morrow; whereupon,

Mr. MERCER made that motion; which, after a few words from Mr. E. WHITTLESEY, was agreed to.

On motion of Mr. EVANS, it was  
*Ordered*, That the daily hour of meeting should be 12 o'clock, m. until the House otherwise ordered.  
 On motion of Mr. REED,  
 The House adjourned.

IN SENATE,  
 TUESDAY, September 5.

A message was received from the House of Representatives, by WALTER S. FRANKLIN, their Clerk, communicating that they had elected JAMES K. POLK Speaker of that body, and were ready to proceed to business; also, that they had appointed a committee on their part to join that of the Senate, to wait on the President, and inform him of the organization of both Houses, and of their readiness to receive any communication which he might wish to make to them.

Mr. WRIGHT, from the joint committee appointed to wait on the President, and to apprise him of the organization of both branches of Congress, reported that the committee had discharged its duty, and that the President would this day, at twelve o'clock, communicate his message to Congress.

A message was received from the President of the United States, by the hands of Major VAN BUREN, his private secretary, communicating the following Message, with accompanying documents.

The Message was then read by the Secretary of the Senate:

*Fellow-Citizens of the Senate  
 and House of Representatives:*

The act of the 23d of June, 1836, regulating the deposits of the public money, and directing the employment of State, District, and Territorial banks for that purpose, made it the duty of the Secretary of the Treasury to discontinue the use of such of them as should at any time refuse to redeem their notes in specie, and to substitute other banks, provided a sufficient number could be obtained to receive the public deposits upon the terms and conditions therein prescribed. The general and almost simultaneous suspension of specie payments by the banks in May last, rendered the performance of his duty imperative, in respect to those which had been selected under the act; and made it, at the same time, impracticable to employ the requisite number of others, upon the prescribed conditions. The specific regulations established by Congress for the deposit and safe keeping of the public moneys, having thus unexpectedly become inoperative, I felt it to be my duty to afford you an early opportunity for the exercise of your supervisory powers over the subject.

I was also led to apprehend that the suspension of specie payments, increasing the embarrassments before existing in the pecuniary affairs of the country, would so far diminish the public revenue, that the accruing receipts into the Treasury, would not, with the reserved five millions, be sufficient to defray the unavoidable expenses of the Government, until the usual period for the meeting of Congress; whilst the authority to call upon the States, for a portion of the sums deposited with them, was too restricted to enable the Department to realize a sufficient amount from that source. These apprehensions have been justified by subsequent results, which render it certain that this deficiency will occur, if additional means be not provided by Congress.

The difficulties experienced by the mercantile interest, in meeting their engagements, induced them to apply to me, previously to the actual suspension of specie payments, for indulgence upon their bonds for duties; and all the relief authorized by law was promptly and cheerfully granted. The dependence of the Treasury upon the avails of these bonds, to enable it to make the deposits with the States required by law, led me in the outset to limit this indulgence to the first of September, but it has since been extended to the first of October, that the matter might be submitted to your further direction.

Questions were also expected to arise in the re-

cess in respect to the October instalment of those deposits, requiring the interposition of Congress.

A provision of another act, passed about the same time, and intended to secure a faithful compliance with the obligation of the United States, to satisfy all demands upon them in specie or its equivalent, prohibited the offer of any bank note, not convertible on the spot into gold or silver at the will of the holder; and the ability of the Government, with millions on deposit, to meet its engagements in the manner thus required by law, was rendered very doubtful by the event to which I have referred.

Sensible that adequate provisions for these unexpected exigencies could only be made by Congress; convinced that some of them would be indispensably necessary to the public service, before the regular period of your meeting; and desirous also to enable you to exercise, at the earliest moment, your full constitutional powers for the relief of the country, I could not, with propriety, avoid subjecting you to the inconvenience of assembling at as early a day as the state of the popular representation would permit. I am sure that I have done but justice to your feelings, in believing that this inconvenience will be cheerfully encountered, in the hope of rendering your meeting conducive to the good of the country.

During the earlier stages of the revulsion through which we have just passed, much acrimonious discussion arose, and great diversity of opinion existed, as to its real causes. This was not surprising. The operations of credit are so diversified, and the influences which affect them so numerous, and often so subtle, that even impartial and well-informed persons are seldom found to agree in respect to them. To inherent difficulties were also added other tendencies, which were by no means favorable to the discovery of truth. It was hardly to be expected, that those who disapproved the policy of the Government in relation to the currency, would, in the excited state of public feeling produced by the occasion, fail to attribute to that policy any extensive embarrassment in the monetary affairs of the country. The matter thus became connected with the passions and conflicts of party; opinions were more or less affected by political considerations; and differences were prolonged which might otherwise have been determined by an appeal to facts, by the exercise of reason, or by mutual concession. It is, however, a cheering reflection, that circumstances of this nature cannot prevent a community so intelligent as ours from ultimately arriving at correct conclusions. Encouraged by the firm belief of this truth, I proceed to state my views, so far as may be necessary to a clear understanding of the remedies I feel it my duty to propose, and of the reasons by which I have been led to recommend them.

The history of trade in the United States for the last three or four years, affords the most convincing evidence that our present condition is chiefly to be attributed to over-action in all the departments of business; an over-action deriving, perhaps, its first impulses from antecedent causes, but stimulated to its destructive consequences by excessive issues of bank paper, and by other facilities for the acquisition and enlargement of credit. At the commencement of the year 1834, the banking capital of the United States, including that of the national bank then existing, amounted to about two hundred millions of dollars; the bank notes then in circulation to about ninety-five millions; and the loans and discounts of the banks to three hundred and twenty-four millions. Between that time and the first of January, 1836, being the latest period to which accurate accounts have been received, our banking capital was increased to more than two hundred and fifty-one millions; our paper circulation to more than one hundred and forty millions, and the loans and discounts to more than four hundred and fifty-seven millions. To this vast increase are to be added the many millions of credit, acquired by means of foreign loans, contracted by the States and State institutions, and, above all, by the lavish accommodations extended by foreign dealers to our merchants.

The consequences of this redundancy of credit, and of the spirit of reckless speculation engen-

dered by it, were a foreign debt contracted by our citizens, estimated in March last at more than thirty millions of dollars; the extension to traders in the interior of our country of credits for supplies, greatly beyond the wants of the people; the investment of thirty-nine and a half millions of dollars in unproductive public lands, in the years 1835 and 1836, whilst in the preceding year the sales amounted to only four and a half millions; the creation of debts, to an almost countless amount, for real estate in existing or anticipated cities and villages, equally unproductive, and at prices now seen to have been greatly disproportionate to their real value; the expenditure of immense sums in improvements which, in many cases, have been found to be ruinously improvident; the diversion to other pursuits of much of the labor that should have been applied to agriculture, thereby contributing to the expenditure of large sums in the importation of grain from Europe—an expenditure which, amounting in 1834 to about two hundred and fifty thousand dollars, was, in the first two quarters of the present year, increased to more than two millions of dollars; and, finally, without enumerating other injurious results, the rapid growth among all classes, and especially in our great commercial towns, of luxurious habits, founded too often on merely fancied wealth, and detrimental alike to the industry, the resources, and the morals of our people.

It was so impossible that such a state of things could long continue, that the prospect of revulsion was present to the minds of considerate men before it actually came. None, however, had correctly anticipated its severity. A concurrence of circumstances inadequate of themselves to produce such wide-spread and calamitous embarrassments, tended so greatly to aggravate them, that they cannot be overlooked in considering their history. Among these may be mentioned, as most prominent, the great loss of capital sustained by our commercial emporium in the fire of December, 1835—a loss, the effects of which were underrated at the time, because postponed for a season by the great facilities of credit then existing; the disturbing effects, in our commercial cities, of the transfers of the public moneys required by the deposit law of June, 1836; and the measures adopted by the foreign creditors of our merchants to reduce their debts, and to withdraw from the United States a large portion of our specie.

However unwilling any of our citizens may heretofore have been to assign to these causes the chief instrumentality in producing the present state of things, the developments subsequently made, and the actual condition of other commercial countries, must, as it seems to me, dispel all remaining doubts upon the subject. It has since appeared that evils, similar to those suffered by ourselves, have been experienced in Great Britain, on the continent, and, indeed, throughout the commercial world; and that in other countries, as well as in our own, they have been uniformly preceded by an undue enlargement of the boundaries of trade, prompted, as with us, by unprecedented expansions of the systems of credit. A reference to the amount of banking capital, and the issues of paper credits put in circulation in Great Britain, by banks, and in other ways, during the years 1834, 1835, and 1836, will show an augmentation of the paper currency there, as much disproportioned to the real wants of trade as in the United States. With this redundancy of the paper currency, there arose in that country also a spirit of adventurous speculation, embracing the whole range of human enterprise. Aid was profusely given to projected improvements; large investments were made in foreign stocks and loans; credits for goods were granted with unbounded liberality to merchants in foreign countries; and all the means of acquiring and employing credit were put in active operation, and extended in their effects to every department of business, and to every quarter of the globe. The reaction was proportioned in its violence to the extraordinary character of the events which preceded it. The commercial community of Great Britain were subjected to the greatest difficulties, and their debtors in this country were not only suddenly deprived of accustomed and expected credits, but call-

ed upon for payments, which, in the actual posture of things here, could only be made through a general pressure, and at the most ruinous sacrifices.

In view of these facts, it would seem impossible for sincere inquirers after truth to resist the conviction, that the causes of the revulsion in both countries have been substantially the same. Two nations, the most commercial in the world, enjoying but recently the highest degree of apparent prosperity, and maintaining with each other the closest relations, are suddenly, in a time of profound peace, and without any great national disaster, arrested in their career, and plunged into a state of embarrassment and distress. In both countries we have witnessed the same redundancy of paper money, and other facilities of credit; the same spirit of speculation; the same partial successes; the same difficulties and reverses; and, at length, nearly the same overwhelming catastrophe. The most material difference between the results in the two countries has only been, that with us there has also occurred an extensive derangement in the fiscal affairs of the Federal and State Governments, occasioned by the suspension of specie payments by the banks.

The history of these causes and effects, in Great Britain and the United States, is substantially the history of the revulsion in all other commercial countries.

The present and visible effects of these circumstances on the operations of the Government, and on the industry of the people, point out the objects which call for your immediate attention.

They are—to regulate by law the safe keeping, transfer, and disbursement, of the public moneys; to designate the funds to be received and paid by the Government; to enable the Treasury to meet promptly every demand upon it; to prescribe the terms of indulgence, and the mode of settlement to be adopted, as well in collecting from individuals the revenue that has accrued, as in withdrawing it from former depositories, and to devise and adopt such further measures, within the constitutional competency of Congress, as will be best calculated to revive the enterprise and to promote the prosperity of the country.

For the deposit, transfer, and disbursement, of the revenue, National and State banks have always, with temporary and limited exceptions, been heretofore employed; but, although advocates of each system are still to be found, it is apparent that the events of the last few months have greatly augmented the desire, long existing among the people of the United States, to separate the fiscal operations of the Government from those of individuals or corporations.

Again to create a national bank, as a fiscal agent, would be to disregard the popular will, twice solemnly and unequivocally expressed. On no question of domestic policy is there stronger evidence that the sentiments of a large majority are deliberately fixed; and I cannot concur with those who think they see, in recent events, a proof that these sentiments are, or a reason that they should be, changed.

Events, similar in their origin and character, have heretofore frequently occurred, without producing any such change; and the lessons of experience must be forgotten, if we suppose that the present overthrow of credit would have been prevented by the existence of a national bank. Prone to excessive issues has ever been the vice of the banking system; a vice as prominent in National as in State institutions. This propensity is as subservient to the advancement of private interests in the one as in the other; and those who direct them both, being principally guided by the same views, and influenced by the same motives, will be equally ready to stimulate extravagance of enterprise by improvidence of credit. How strikingly is this conclusion sustained by experience. The Bank of the United States, with the vast powers conferred on it by Congress, did not or could not prevent former and similar embarrassments; nor has the still greater strength it has been said to possess, under its present charter, enabled it, in the existing emergency, to check other institutions, or even to save itself. In Great Britain, where, it has been seen, the same causes have been attended with the same effects, a national bank, possessing pow-

ers far greater than are asked for by the warmest advocates of such an institution here, has also proved unable to prevent an undue expansion of credit, and the evils that flow from it. Nor can I find any tenable ground for the re-establishment of a national bank, in the derangement alleged at present to exist in the domestic exchanges of the country, or in the facilities it may be capable of affording them. Although advantages of this sort were anticipated when the first Bank of the United States was created, they were regarded as an incidental accommodation; not one which the Federal Government was bound, or could be called upon, to furnish. This accommodation is now, indeed, after the lapse of not many years, demanded from it as among its first duties; and an omission to aid and regulate commercial exchange, is treated as a ground of loud and serious complaint. Such results only serve to exemplify the constant desire, among some of our citizens, to enlarge the powers of the Government, and extend its control to subjects with which it should not interfere. They can never justify the creation of an institution to promote such objects. On the contrary, they justly excite among the community a more diligent inquiry into the character of those operations of trade, towards which it is desired to extend such peculiar favors.

The various transactions which bear the name of domestic exchanges, differ essentially in their nature, operation, and utility. One class of them consists of bills of exchange, drawn for the purpose of transferring actual capital from one part of the country to another, or to anticipate the proceeds of property actually transmitted. Bills of this description are highly useful in the movements of trade, and well deserve all the encouragement which can rightfully be given to them. Another class is made up of bills of exchange, not drawn to transfer actual capital, nor on the credit of property transmitted, but to create fictitious capital, partaking at once of the character of notes discounted in bank, and of bank notes in circulation, and swelling the mass of paper credits to a vast extent in the most objectionable manner. These bills have formed, for the last few years, a large proportion of what are termed the domestic exchanges of the country, serving as the means of usurious profit, and constituting the most unsafe and precarious paper in circulation. This species of traffic, instead of being upheld, ought to be discontinued by the Government and the people.

In transferring its funds from place to place, the Government is on the same footing with the private citizen, and may resort to the same legal means. It may do so through the medium of bills drawn by itself, or purchased from others; and in these operations it may, in a manner undoubtedly constitutional and legitimate, facilitate and assist exchanges of individuals founded on real transactions of trade. The extent to which this may be done, and the best means of effecting it, are entitled to the fullest consideration. This has been bestowed by the Secretary of the Treasury, and his views will be submitted to you in his report.

But it was not designed by the Constitution that the Government should assume the management of domestic or foreign exchange. It is indeed authorized to regulate by law the commerce between the States, and to provide a general standard of value, or medium of exchange, in gold and silver; but it is not its province to aid individuals in the transfer of their funds, otherwise than through the facilities afforded by the Post Office Department. As justly might it be called on to provide for the transportation of their merchandise. These are operations of trade. They ought to be conducted by those who are interested in them, in the same manner that the incidental difficulties of other pursuits are encountered by other classes of citizens. Such aid has not been deemed necessary in other countries. Throughout Europe, the domestic as well as the foreign exchanges are carried on by private houses, often, if not generally, without the assistance of banks. Yet they extend throughout distinct sovereignties, and far exceed in amount the real exchanges of the United States. There is no reason why our own may not be conducted in the same manner, with equal cheapness and safety. Cer-

tainly this might be accomplished, if it were favored by those most deeply interested; and few can doubt that their own interest, as well as the general welfare of the country, would be promoted by leaving such a subject in the hands of those to whom it properly belongs. A system founded on private interest, enterprise and competition, without the aid of legislative grants or regulations by law, would rapidly prosper; it would be free from the influence of political agitation, and extend the same exemption to trade itself; and it would put an end to those complaints of neglect, partiality, injustice, and oppression, which are the unavoidable results of interference by the Government, in the proper concerns of individuals. All former attempts on the part of the Government to carry its legislation, in this respect, further than was designed by the Constitution, have in the end proved injurious, and have served only to convince the great body of the people, more and more, of the certain dangers of blending private interests with the operations of public business; and there is no reason to suppose that a repetition of them now would be more successful.

It cannot be concealed that there exists, in our community, opinions and feelings on this subject in direct opposition to each other. A large portion of them, combining great intelligence, activity, and influence, are no doubt sincere in their belief that the operations of trade ought to be assisted by such a connection; they regard a national bank as necessary for this purpose, and they are disinclined to every measure that does not tend, sooner or later, to the establishment of such an institution. On the other hand, a majority of the people are believed to be irreconcilably opposed to that measure: they consider such a concentration of power dangerous to their liberties; and many of them regard it as a violation of the Constitution. This collision of opinion has, doubtless, caused much of the embarrassment to which the commercial transactions of the country have lately been exposed. Banking has become a political topic of the highest interest, and trade has suffered in the conflict of parties. A speedy termination of this state of things, however desirable, is scarcely to be expected. We have seen for nearly half a century, that those who advocate a national bank, by whatever motive they may be influenced, constitute a portion of our community too numerous to allow us to hope for an early abandonment of their favorite plan. On the other hand, they must indeed form an erroneous estimate of the intelligence and temper of the American people, who suppose that they have continued, on slight or insufficient grounds, their persevering opposition to such an institution; or that they can be induced by pecuniary pressure or by any other combination of circumstances, to surrender principles they have so long and so inflexibly maintained.

My own views of the subject are unchanged. They have been repeatedly and unreservedly announced to my fellow citizens; who, with full knowledge of them, conferred upon me the two highest offices of the Government. On the last of these occasions, I felt it due to the people to apprise them distinctly, that, in the event of my election, I would not be able to co-operate in the re-establishment of a national bank. To these sentiments, I have now only to add the expression of an increased conviction, that the re-establishment of such a bank, in any form, whilst it would not accomplish the beneficial purpose promised by its advocates, would impair the rightful supremacy of the popular will; injure the character and diminish the influence of our political system; and bring once more into existence a concentrated moneyed power, hostile to the spirit, and threatening the permanency, of our republican institutions.

Local banks have been employed for the deposit and distribution of the revenue, at all times partially, and, on three different occasions, exclusively; first, anterior to the establishment of the first Bank of the United States; secondly, in the interval between the termination of that institution and the charter of its successor; and, thirdly, during the limited period which has now so abruptly closed. The connection thus repeatedly attempted, proved unsatisfactory on each successive occasion,

notwithstanding the various measures which were adopted to facilitate or insure its success. On the last occasion, in the year 1833, the employment of the State banks was guarded especially in every way which experience and caution could suggest. Personal security was required for the safe-keeping and prompt payment of the moneys to be received, and full returns of their condition were, from time to time, to be made by the depositories. In the first stages the measure was eminently successful, notwithstanding the violent opposition of the Bank of the United States, and the unceasing efforts made to overthrow it. The selected banks performed with fidelity, and without any embarrassment to themselves or to the community, their engagements to the Government, and the system promised to be permanently useful. But when it became necessary, under the act of June, 1836, to withdraw from them the public money, for the purpose of placing it in additional institutions, or of transferring it to the States, they found it, in many cases, inconvenient to comply with the demands of the Treasury, and numerous and pressing applications were made for indulgence or relief. As the instalments under the deposit law became payable, their own embarrassments, and the necessity under which they lay of curtailing their discounts and calling in their debts, increased the general distress, and contributed, with other causes, to hasten the revulsion in which, at length, they, in common with the other banks, were fatally involved.

Under these circumstances, it becomes our solemn duty to inquire whether there are not, in any connection between the Government and banks of issue, evils of great magnitude, inherent in its very nature, and against which no precautions can effectually guard.

Unforeseen in the organization of the Government, and forced on the Treasury by early necessities, the practice of employing banks, was, in truth, from the beginning, more a measure of emergency than of sound policy. When we started into existence as a nation, in addition to the burdens of the new Government, we assumed all the large but honorable load of debt which was the price of our liberty; but we hesitated to weigh down the infant industry of the country by resorting to adequate taxation for the necessary revenue. The facilities of banks, in return for the privileges they acquired, were promptly offered, and perhaps too readily received, by an embarrassed Treasury. During the long continuance of a national debt, and the intervening difficulties of a foreign war, the connection was continued from motives of convenience; but these causes have long since passed away. We have no emergencies that make banks necessary to aid the wants of the Treasury; we have no load of national debt to provide for, and we have on actual deposit a large surplus. No public interest, therefore, now requires the renewal of a connection that circumstances have dissolved. The complete organization of our Government, the abundance of our resources, the general harmony which prevails between the different States, and with foreign Powers, all enable us now to select the system most consistent with the Constitution, and most conducive to the public welfare. Should we, then, connect the Treasury for a fourth time with the local banks, it can only be under a conviction that past failures have arisen from accidental, not inherent, defects.

A danger, difficult, if not impossible, to be avoided in such an arrangement, is made strikingly evident in the very event by which it has now been defeated. A sudden act of the banks intrusted with the funds of the people, deprives the Treasury, without fault or agency of the Government, of the ability to pay its creditors in the currency they have by law a right to demand. This circumstance no fluctuation of commerce could have produced, if the public revenue had been collected in the legal currency, and kept in that form by the officers of the Treasury. The citizen whose money was in bank receives it back, since the suspension, at a sacrifice in its amount; whilst he who kept it in the legal currency of the country, and in his own possession, pursues, without loss, the current of his business. The Government, placed in the situation of the former, is involved in embarrassments

it could not have suffered had it pursued the course of the latter. These embarrassments are, moreover, augmented by those salutary and just laws which forbid it to use a depreciated currency, and, by so doing, take from the Government the ability which individuals have of accommodating their transactions to such a catastrophe.

A system which can, in a time of profound peace, when there is a large revenue laid by, thus suddenly prevent the application and the use of the money of the people, in the manner and for the objects they have directed, cannot be wise; but who can think, without painful reflection, that, under it, the same unforeseen events might have befallen us in the midst of a war, and taken from us, at the moment when most wanted, the use of those very means which were treasured up to promote the national welfare and guard our national rights? To such embarrassments and to such dangers will this Government be always exposed, whilst it takes the moneys raised for, and necessary to, the public service, out of the hands of its own officers, and converts them into a mere right of action against corporations entrusted with the possession of them. Nor can such results be effectually guarded against in such a system, without investing the Executive with a control over the banks themselves, whether State or National, that might with reason be objected to. Ours is, probably, the only Government in the world that is liable, in the management of its fiscal concerns, to occurrences like these. But this imminent risk is not the only danger attendant on the surrender of the public money to the custody and control of local corporations. Though the object is aid to the Treasury, its effect may be to introduce into the operations of the Government, influences the most subtle, founded on interests the most selfish.

The use by the banks, for their own benefit, of the money deposited with them, has received the sanction of the Government from the commencement of this connection. The money received from the people, instead of being kept till it is needed for their use, is, in consequence of this authority, a fund, on which discounts are made for the profit of those who happen to be owners of stock in the banks selected as depositories. The supposed and often exaggerated advantages of such a boon will always cause it to be sought for with avidity. I will not stop to consider on whom the patronage incident to it is to be conferred; whether the selection and control be trusted to Congress or to the Executive, either will be subjected to appeals made in every form which the sagacity of interest can suggest. The banks, under such a system, are stimulated to make the most of their fortunate acquisition; the deposits are treated as an increase of capital; loans and circulation are rashly augmented, and, when the public exigencies require a return, it is attended with embarrassments not provided for, nor foreseen. Thus banks that thought themselves most fortunate when the public funds were received, find themselves most embarrassed when the season of payment suddenly arrives.

Unfortunately, too, the evils of the system are not limited to the banks. It stimulates a general rashness of enterprise, and aggravates the fluctuations of commerce and the currency. This result was strikingly exhibited during the operations of the late deposit system, and especially in the purchases of public lands. The order which ultimately directed the payment of gold and silver in such purchases, greatly checked, but could not altogether prevent, the evil. Specie was indeed more difficult to be procured than the notes which the banks could themselves create at pleasure; but still, being obtained from them as a loan, and returned as a deposit, which they were again at liberty to use, it only passed round the circle with diminished speed. This operation could not have been performed, had the funds of the Government gone into the Treasury, to be regularly disbursed, and not into banks, to be loaned out for their own profit, while they were permitted to substitute for it a credit in account.

In expressing these sentiments, I desire not to undervalue the benefits of a salutary credit to any branch of enterprise. The credit bestowed on

probity and industry is the just reward of merit, and an honorable incentive to further acquisition. None oppose it who love their country and understand its welfare. But when it is unduly encouraged—when it is made to inflame the public mind with the temptations of sudden and unsubstantial wealth—when it turns industry into paths that lead sooner or later to disappointment and distress—it becomes liable to censure, and needs correction. Far from helping probity and industry, the ruin to which it leads falls most severely on the great laboring classes, who are thrown suddenly out of employment, and by the failure of magnificent schemes never intended to enrich them, are deprived in a moment of their only resource. Abuses of credit and excesses in speculation will happen in despite of the most salutary laws; no Government perhaps can altogether prevent them; but surely every Government can refrain from contributing the stimulus that calls them into life.

Since, therefore, experience has shown, that to lend the public money to the local banks, is hazardous to the operations of the Government, at least of doubtful benefit to the institutions themselves; and productive of disastrous derangement in the business and currency of the country, is it the part of wisdom again to renew the connection?

It is true that such an agency is in many respects convenient to the Treasury, but it is not indispensable. A limitation of the expenses of the Government to its actual wants, and of the revenue to those expenses, with convenient means for its prompt application to the purposes for which it was raised, are the objects which we should seek to accomplish. The collection, safe-keeping, transfer and disbursement of the public money, can, it is believed, be well managed by officers of the Government. Its collection, and, to a great extent, its disbursement also, have indeed been hitherto conducted solely by them; neither National nor State banks when employed, being required to do more than keep it safely while in their custody, and transfer and pay it in such portions and at such times as the Treasury shall direct.

Surely banks are not more able than the Government to secure the money in their possession against accident, violence, or fraud. The assertion that they are so, must assume that a vault in a bank is stronger than a vault in the Treasury; and that directors, cashiers, and clerks, not selected by the Government, nor under its control, are more worthy of confidence than officers selected from the people and responsible to the Government; officers bound by official oaths and bonds for a faithful performance of their duties, and constantly subject to the supervision of Congress.

The difficulties of transfer, and the aid heretofore rendered by banks, have been less than is usually supposed. The actual accounts show that by far the larger portion of payments is made within short or convenient distances from the places of collection; and the whole number of warrants issued at the Treasury in the year 1834—a year, the results of which will it is believed afford a safe test for the future—fell short of five thousand, or an average of less than one daily for each State; in the city of New York they did not average more than two a day, and at the city of Washington only four.

The difficulties heretofore existing are, moreover, daily lessened by an increase in the cheapness and facility of communication; and it may be asserted with confidence, that the necessary transfers, as well as the safe-keeping and disbursements of the public moneys, can be with safety and convenience accomplished through the agencies of Treasury officers. This opinion has been, in some degree, confirmed by actual experience since the discontinuance of the banks as fiscal agents, in May last; a period which, from the embarrassments in commercial intercourse, presented obstacles as great as any that may be hereafter apprehended.

The manner of keeping the public money since that period, is fully stated in the report of the Secretary of the Treasury. That officer also suggests the propriety of assigning, by law, certain additional duties to existing establishments and officers, which, with the modifications and safeguards referred to by him, will, he thinks, enable

the Department to continue to perform this branch of the public service, without any material addition either to their number or to the present expense. The extent of the business to be transacted has already been stated; and in respect to the amount of money with which the officers employed would be entrusted at any one time, it appears that, assuming a balance of five millions to be at all times kept in the Treasury, and the whole of it left in the hands of the collectors and receivers, the proportion of each would not exceed an average of thirty thousand dollars; but that, deducting one million for the use of the mint, and assuming the remaining four millions to be in the hands of one-half of the present number of officers—a supposition deemed more likely to correspond with the fact—the sum in the hands of each would still be less than the amount of most of the bonds now taken from the receivers of public money. Every apprehension, however, on the subject, either in respect to the safety of the money, or the faithful discharge of these fiscal transactions, may, it appears to me, be effectually removed by adding to the present means of the Treasury the establishment by law, at a few important points, of offices for the deposit and disbursement of such portions of the public revenue as cannot, with obvious safety and convenience, be left in the possession of the collecting officers until paid over by them to the public creditors. Neither the amounts retained in their hands, nor those deposited in the offices, would, in an ordinary condition of the revenue, be larger in most cases than those often under the control of disbursing officers of the Army and Navy, and might be made entirely safe, by requiring such securities, and exercising such controlling supervision, as Congress may by law prescribe. The principal officers whose appointments would become necessary under this plan, taking the largest number suggested by the Secretary of the Treasury, would not exceed ten; nor the additional expenses, at the same estimate, sixty thousand dollars a year.

There can be no doubt of the obligation of those who are entrusted with the affairs of Government, to conduct them with as little cost to the nation as is consistent with the public interest; and it is for Congress, and ultimately for the people, to decide whether the benefits to be derived from keeping our fiscal concerns apart, and severing the connection which has hitherto existed between the Government and banks, offer sufficient advantages to justify the necessary expenses. If the object to be accomplished is deemed important to the future welfare of the country, I cannot allow myself to believe that the addition to the public expenditure of comparatively so small an amount as will be necessary to effect it, will be objected to by the people.

It will be seen by the report of the Postmaster General, herewith communicated, that the fiscal affairs of that Department have been successfully conducted since May last upon the principle of dealing only in the legal currency of the United States, and that it needs no legislation to maintain its credit, and facilitate the management of its concerns; the existing laws being, in the opinion of that officer, ample for those objects.

Difficulties will doubtless be encountered for a season, and increased services required from the public functionaries; such are usually incident to the commencement of every system, but they will be greatly lessened in the progress of its operations.

The power and influence supposed to be connected with the custody and disbursement of the public money, are topics on which the public mind is naturally and, with great propriety, peculiarly sensitive. Much has been said on them, in reference to the proposed separation of the Government from the banking institutions; and surely no one can object to any appeals or animadversions on the subject, which are consistent with facts, and evince a proper respect for the intelligence of the people. If a Chief Magistrate may be allowed to speak for himself, on such a point, I can truly say, that to me nothing would be more acceptable, than the withdrawal from the Executive, to the greatest practicable extent, of all concern in the custody and disbursement of the public revenue; not that I would shrink from any

responsibility cast upon me by the duties of my office, but because it is my firm belief, that its capacity for usefulness is in no degree promoted by the possession of any patronage not actually necessary to the performance of those duties. But under our present form of Government, the intervention of the Executive officers in the custody and disbursement of the public money seems to be unavoidable; and before it can be admitted that the influence and power of the Executive would be increased by dispensing with the agency of banks, the nature of that intervention in such an agency must be carefully regarded, and a comparison must be instituted between its extent in the two cases.

The revenue can only be collected by officers appointed by the President, with the advice and consent of the Senate. The public moneys, in the first instance, must, therefore, in all cases, pass through hands selected by the Executive. Other offices appointed in the same way, or, as in some cases, by the President alone, must also be entrusted with them when drawn for the purpose of disbursement. It is thus seen that, even when banks are employed, the public funds must twice pass through the hands of Executive officers. Besides this, the head of the Treasury Department, who also holds his office at the pleasure of the President, and some other officers of the same department, must necessarily be invested with more or less power in the selection, continuance, and supervision, of the banks that may be employed. The question is then narrowed to the single point, whether, in the intermediate stage between the collection and disbursement of the public money, the agency of banks is necessary to avoid a dangerous extension of the patronage and influence of the Executive? But is it clear that the connection of the Executive with powerful moneyed institutions, capable of ministering to the interests of men in points where they are most accessible to corruption, is less liable to abuse, than his constitutional agency in the appointment and control of the few public officers required by the proposed plan? Will the public money, when in their hands, be necessarily exposed to any improper interference on the part of the Executive? May it not be hoped that a prudent fear of public jealousy and disapprobation, in a matter so peculiarly exposed to them, will deter him from any such interference, even if higher motives be found inoperative? May not Congress so regulate, by law, the duty of those officers, and subject it to such supervision and publicity, as to prevent the possibility of any serious abuse on the part of the Executive? and is there equal room for such supervision and publicity in a connection with banks, acting under the shield of corporate immunities, and conducted by persons irresponsible to the Government and the people? It is believed that a considerate and candid investigation of these questions will result in the conviction, that the proposed plan is far less liable to objection, on the score of Executive patronage and control, than any bank agency that has been, or can be, devised.

With these views, I leave to Congress the measures necessary to regulate, in the present emergency, the safe-keeping and transfer of the public moneys. In the performance of constitutional duty, I have stated to them, without reserve, the result of my own reflections. The subject is of great importance; and one on which we can scarcely expect to be as united in sentiment as we are in interest. It deserves a full and free discussion, and cannot fail to be benefitted by a dispassionate comparison of opinions. Well aware myself of the duty of reciprocal concession among the co-ordinate branches of the Government, I can promise a reasonable spirit of co-operation, so far as it can be indulged in without the surrender of constitutional objections, which I believe to be well founded. Any system that may be adopted should be subjected to the fullest legal provision, so as to leave nothing to the Executive but what is necessary to the discharge of the duties imposed on him; and whatever plan may be ultimately established, my own part shall be so discharged as to give to it a fair trial, and the best prospect of success.

The character of the funds to be received and disbursed in the transactions of the Government, likewise demands your most careful consideration.

There can be no doubt that those who framed and adopted the Constitution, having in immediate view the depreciated paper of the Confederacy—of which five hundred dollars in paper were, at times, only equal to one dollar in coin—intended to prevent the recurrence of similar evils, so far at least as related to the transactions of the new Government. They gave to Congress express powers to coin money, and to regulate the value thereof, and of foreign coin; they refused to give it power to establish corporations—the agents, then as now, chiefly employed to create a paper currency; they prohibited the States from making any thing but gold and silver a legal tender in payment of debts; and the first Congress directed, by positive law, that the revenue should be received in nothing but gold and silver.

Public exigency at the outset of the Government, without direct legislative authority, led to the use of banks as fiscal aids to the Treasury. In admitted deviation from the law, at the same period, and under the same exigency, the Secretary of the Treasury received their notes in payment of duties. The sole ground on which the practice, thus commenced, was then, or has since, been justified, is the certain, immediate, and convenient exchange of such notes for specie. The Government did indeed receive the inconvertible notes of State banks during the difficulties of war; and the community submitted without a murmur to the unequal taxation and multiplied evils of which such a course was productive. With the war, this indulgence ceased, and the banks were obliged again to redeem their notes in gold and silver. The Treasury, in accordance with previous practice, continued to dispense with the currency required by the act of 1789, and took the notes of banks in full confidence of their being paid in specie on demand; and Congress, to guard against the slightest violation of this principle, have declared, by law, that if notes are paid in the transactions of the Government, it must be under such circumstances as to enable the holder to convert them into specie without depreciation or delay.

Of my own duties under the existing laws, when the banks suspended specie payments, I could not doubt. Directions were immediately given to prevent the reception into the Treasury of any thing but gold and silver or its equivalent; and every practicable arrangement was made to preserve the public faith, by similar or equivalent payments to the public creditors. The revenue from lands had been for some time substantially so collected, under the order issued by the directions of my predecessor. The effects of that order had been so salutary, and its forecast in regard to the increasing insecurity of bank paper had become so apparent, that, even before the catastrophe, I had resolved not to interfere with its operation. Congress is now to decide whether the revenue shall continue to be so collected or not.

The receipts into the Treasury, of bank notes, not redeemed in specie on demand, will not, I presume, be sanctioned. It would destroy, without the excuse of war or public distress, that equality of imports, and identity of commercial regulation, which lie at the foundation of our Confederacy, and would offer to each State a direct temptation to increase its foreign trade, by depreciating the currency received for duties in its ports. Such a proceeding would also, in a great degree, frustrate the policy, so highly cherished, of infusing into our circulation a larger proportion of the precious metals; a policy, the wisdom of which none can doubt, though there may be different opinions as to the extent to which it should be carried. Its results have been already too auspicious, and its success is too closely interwoven with the future prosperity of the country, to permit us for a moment to contemplate its abandonment. We have seen, under its influence, our specie augmented beyond eighty millions; our coinage increased so as to make that of gold amount, between August, 1834, and December, 1836, to ten millions of dollars; exceeding the whole coinage at the mint during the thirty-one previous years. The prospect of further improvement continued without abatement, until the moment of the suspension of specie payments. This policy has now indeed been suddenly checked, but is still far from being overthrown,

Amidst all conflicting theories, one position is undeniable: the precious metals will invariably disappear when there ceases to be a necessity for their use, as a circulating medium. It was in strict accordance with this truth, that whilst, in the month of May last, they were every where seen, and were current for all ordinary purposes, they disappeared from circulation the moment the payment of specie was refused by the banks, and the community tacitly agreed to dispense with its employment. Their place was supplied by a currency exclusively of paper, and, in many cases, of the worst description. Already are the bank notes now in circulation greatly depreciated, and they fluctuate in value between one place and another; thus diminishing and making uncertain the worth of property and the price of labor, and failing to subserv, except at a heavy loss, the purposes of business. With each succeeding day the metallic currency decreases; by some it is hoarded in the natural fear, that, once parted with, it cannot be replaced; while by others it is diverted from its more legitimate uses, for the sake of gain. Should Congress sanction this condition of things, by making irredeemable paper money receivable in payment of public dues, a temporary check to a wise and salutary policy will, in all probability, be converted into its absolute destruction.

It is true that bank notes actually convertible into specie may be received in payment of the revenue, without being liable to all these objections, and that such a course may, to some extent, promote individual convenience; an object always to be considered where it does not conflict with the principles of our Government or the general welfare of the country. If such notes only were received, and always under circumstances allowing their early presentation for payment, and if, at short and fixed periods, they were converted into specie, to be kept by the officers of the Treasury, some of the most serious obstacles to their reception would perhaps be removed. To retain the notes in the Treasury would be to renew, under another form, the loans of public money to the banks, and the evils consequent thereon.

It is, however, a mistaken impression, that any large amount of specie is required for public payments. Of the seventy or eighty millions now estimated to be in the country, ten millions would be abundantly sufficient for that purpose, provided an accumulation of a large amount of revenue, beyond the necessary wants of the Government, be hereafter prevented. If to these considerations be added the facilities which will arise from enabling the Treasury to satisfy the public creditors, by its drafts or notes received in payment of the public dues, it may be safely assumed that no motive of convenience to the citizen requires the reception of bank paper.

To say that the refusal of paper money by the Government, introduces an unjust discrimination between the currency received by it, and that used by individuals in their ordinary affairs, is, in my judgment, to view it in a very erroneous light. The Constitution prohibits the States from making any thing but gold and silver a tender in the payment of debts, and thus secures to every citizen a right to demand payment in the legal currency. To provide by law that the Government will only receive its dues in gold and silver, is not to confer on it any peculiar privilege; but merely to place it on an equality with the citizen, by reserving to it a right secured to him by the Constitution. It is doubtless for this reason that the principle has been sanctioned by successive laws, from the time of the first Congress under the Constitution down to the last. Such precedents, never objected to and proceeding from such sources, afford a decisive answer to the imputation of inequality or injustice.

But, in fact, the measure is one of restriction, not of favor. To forbid the public agent to receive in payment any other than a certain kind of money, is to refuse him a discretion possessed by every citizen. It may be left to those who have the management of their own transactions, to make their own terms; but no such discretion should be given to him who acts merely as an agent of the people, who is to collect what the law requires, and to pay the appropriations it makes. When bank notes

are redeemed on demand, there is then no discrimination in reality, for the individual who receives them may, at his option, substitute the specie for them; he takes them from convenience or choice. When they are not so redeemed, it will scarcely be contended that their receipt and payment, by a public officer, should be permitted, though none deny that right to an individual; if it were, the effect would be most injurious to the public, since their officer could make none of those arrangements to meet or guard against the depreciation, which an individual is at liberty to do. Nor can inconvenience to the community be alleged as an objection to such a regulation. Its object and motive are their convenience and welfare.

If, at a moment of simultaneous and unexpected suspension by the banks, it adds something to the many embarrassments of that proceeding, yet these are far overbalanced by its direct tendency to produce a wider circulation of gold and silver, to increase the safety of bank paper, to improve the general currency, and thus to prevent altogether such occurrences, and the other and far greater evils that attend them.

It may, indeed, be questioned, whether it is not for the interest of the banks themselves that the Government should not receive their paper. They would be conducted with more caution, and on sounder principles. By using specie only in its transactions, the Government would create a demand for it, which would, to a great extent, prevent its exportation, and by keeping it in circulation, maintain a broader and safer basis for the paper currency. That the banks would thus be rendered more sound, and the community more safe, cannot admit of a doubt.

The foregoing views, it seems to me, do but fairly carry out the provisions of the Federal Constitution in relation to the currency, as far as relates to the public revenue. At the time that instrument was framed, there were but three or four banks in the United States; and had the extension of the banking system, and the evils growing out of it, been foreseen, they would probably have been specially guarded against. The same policy which led to the prohibition of bills of credit by the States, would, doubtless, in that event, have also interdicted their issue as a currency in any other form. The Constitution, however, contains no such prohibition; and, since the States have exercised, for nearly half a century the power to regulate the business of banking, it is not to be expected that it will be abandoned. The whole matter is now under discussion before the proper tribunal—the people of the States. Never before has the public mind been so thoroughly awakened to a proper sense of its importance; never has the subject, in all its bearings, been submitted to so searching an inquiry. It would be distrustful the intelligence and virtue of the people to doubt the speedy and efficient adoption of such measures of reform as the public good demands. All that can rightfully be done by the Federal Government, to promote the accomplishment of that important object, will, without doubt, be performed.

In the mean time, it is our duty to provide all the remedies against a depreciated paper currency which the Constitution enables us to afford. The Treasury Department, on several former occasions, has suggested the propriety and importance of a uniform law concerning bankruptcies of corporations, and other bankers. Through the instrumentality of such a law, a salutary check may doubtless be imposed on the issues of paper money, and an effectual remedy given to the citizen in a way at once equal in all parts of the Union, and fully authorized by the Constitution.

The indulgence granted by Executive authority in the payment of bonds for duties, has been already mentioned. Seeing that the immediate enforcement of these obligations would subject a large and highly respectable portion of our citizens to great sacrifices, and believing that a temporary postponement could be made without detriment to other interests, and with increased certainty of ultimate payment, I did not hesitate to comply with the request that was made of me. The terms allowed are, to the full extent, as liberal as any that are to be found in the practice of the Executive Department. It remains

for Congress to decide whether a further postponement may not with propriety be allowed, and, if so, their legislation upon the subject is respectfully invited.

The report of the Secretary of the Treasury will exhibit the condition of these debts; the extent and effect of the present indulgence; the probable result of its further extension on the state of the Treasury, and every other fact necessary to a full consideration of the subject. Similar information is communicated in regard to such depositories of the public moneys as are indebted to the Government, in order that Congress may also adopt the proper measures in regard to them.

The receipts and expenditures for the first half of the year, and an estimate of those for the residue, will be laid before you by the Secretary of the Treasury. In his report of December last, it was estimated that the current receipts would fall short of the expenditures by about three millions of dollars. It will be seen that the difference will be much greater. This is attributed not only to the occurrence of greater pecuniary embarrassments in the business of the country than those which were then predicted, and, consequently, a greater diminution in the revenue, but also to the fact that the appropriations exceeded, by nearly six millions, the amount which was asked for in the estimates then submitted. The sum necessary for the service of the year beyond the probable receipts, and the amount which it was intended should be reserved in the Treasury at the commencement of the year, will be about six millions. If the whole of the reserved balance be not at once applied to the current expenditures, but four millions be still kept in the Treasury, as seems most expedient, for the uses of the mint, and to meet contingencies, the sum needed will be ten millions.

In making this estimate, the receipts are calculated on the supposition of some further extension of the indulgence granted in the payment of bonds for duties, which will affect the amount of the revenue for the present year to the extent of two and a half millions.

It is not proposed to procure the required amount by loans or increased taxation. There are now in the Treasury nine millions three hundred and sixty-seven thousand two hundred and fourteen dollars, directed by the act of the 23d of June, 1836, to be deposited with the States in October next. This sum, if so deposited, will be subject, under the law, to be recalled, if needed, to defray existing appropriations; and as it is now evident that the whole, or the principal part of it, will be wanted for that purpose, it appears most proper that the deposit should be withheld. Until the amount can be collected from the banks, Treasury notes may be temporarily issued, to be gradually redeemed as it is received.

I am aware that this course may be productive of inconvenience to many of the States. Relying upon the acts of Congress which held out to them the strong probability, if not the certainty, of receiving this instalment, they have in some instances adopted measures with which its retention may seriously interfere. That such a condition of things should have occurred is much to be regretted. It is not the least among the unfortunate results of the disasters of the times; and it is for Congress to devise a fit remedy, if there be one. The money being indispensable to the wants of the Treasury, it is difficult to conceive upon what principle of justice or expediency its application to that object can be avoided. To recall any portions of the sums already deposited with the States, would be more inconvenient and less efficient. To burden the country with increased taxation, when there is in fact a large surplus revenue, would be unjust and unwise; to raise moneys by loans under such circumstances, and thus to commence a new national debt, would scarcely be sanctioned by the American people.

The plan proposed will be adequate to all our fiscal operations, during the remainder of the year. Should it be adopted, the Treasury, aided by the ample resources of the country, will be able to discharge, punctually, every pecuniary obligation. For the future, all that is needed will be that caution and forbearance in appropriations which the dimi-

tion of the revenue requires, and which the complete accomplishment or great forwardness of many expensive national undertakings renders equally consistent with prudence and patriotic liberality.

The preceding suggestions and recommendations are submitted, in the belief that their adoption by Congress will enable the Executive Department to conduct our fiscal concerns with success, so far as their management has been committed to it. Whilst the objects and the means proposed to attain them are within its constitutional powers and appropriate duties, they will at the same time, it is hoped, by their necessary operation, afford essential aid in the transaction of individual concerns, and thus yield relief to the people at large in a form adapted to the nature of our Government. Those who look to the action of this Government for specific aid to the citizen to relieve embarrassments arising from losses by revulsions in commerce and credit, lose sight of the ends for which it was created, and the powers with which it is clothed. It was established to give security to us all, in our lawful and honorable pursuits, under the lasting safeguard of republican institutions. It was not intended to confer special favors on individuals, or on any classes of them; to create systems of agriculture, manufactures, or trade; or to engage in them, either separately or in connection with individual citizens or organized associations. If its operations were to be directed for the benefit of any one class, equivalent favors must, in justice, be extended to the rest; and the attempt to bestow such favors with an equal hand, or even to select those who should most deserve them, would never be successful. All communities are apt to look to Government for too much. Even in our own country, where its powers and duties are so strictly limited, we are prone to do so, especially at periods of sudden embarrassment and distress. But this ought not to be. The framers of our excellent Constitution, and the people who approved it with calm and sagacious deliberation, acted at the time on a sounder principle. They wisely judged that the less Government interferes with private pursuits, the better for the general prosperity. It is not its legitimate object to make men rich, or to repair, by direct grants of money or legislation in favor of particular pursuits, losses not incurred in the public service. This would be substantially to use the property of some for the benefit of others. But its real duty—that duty, the performance of which makes a good Government the most precious of human blessings, is to enact and enforce a system of general laws commensurate with, but not exceeding, the objects of its establishment; and to leave every citizen and every interest to reap, under its benign protection, the rewards of virtue, industry, and prudence.

I cannot doubt that on this, as on all similar occasions, the Federal Government will find its agency most conducive to the security and happiness of the people, when limited to the exercise of its conceded powers. In never assuming, even for a well meant object, such powers as were not designed to be conferred upon it, we shall in reality do most for the general welfare. To avoid every unnecessary interference with the pursuits of the citizen, will result in more benefit than to adopt measures which could only assist limited interests, and are eagerly, but perhaps naturally, sought for, under the pressure of temporary circumstances. If, therefore, I refrain from suggesting to Congress any specific plan for regulating the exchanges of the country; relieving mercantile embarrassments; or interfering with the ordinary operations of foreign or domestic commerce; it is from a conviction that such measures are not within the constitutional province of the General Government; and that their adoption would not promote the real and permanent welfare of those they might be designed to aid.

The difficulties and distresses of the times, though unquestionably great, are limited in their extent, and cannot be regarded as affecting the permanent prosperity of the nation. Arising, in a great degree, from the transactions of foreign and domestic commerce, it is upon them that they have chiefly fallen. The great agricultural interest has, in many parts of the country, suffered comparatively

little; and, as if Providence intended to display the munificence of its goodness at the moment of our greatest need, and in direct contrast to the evils occasioned by the waywardness of man, we have been blessed throughout our extended territory with a season of general health and of uncommon fruitfulness. The proceeds of our great staples will soon furnish the means of liquidating debts at home and abroad; and contribute equally to the revival of commercial activity, and the restoration of commercial credit. The banks, established avowedly for its support, deriving their profits from it, and resting under obligations to it which cannot be overlooked, will feel at once the necessity and justice of uniting their energies with those of the mercantile interest. The suspension of specie payments, at such a time and under such circumstances as we have lately witnessed, could not be other than a temporary measure; and we can scarcely err in believing that the period must soon arrive when all that are solvent will redeem their issues in gold and silver. Dealings abroad naturally depend on resources and prosperity at home. If the debt of our merchants has accumulated, or their credit is impaired, these are fluctuations always incident to extensive or extravagant mercantile transactions. But the ultimate security of such obligations does not admit of question. They are guaranteed by the resources of a country, the fruits of whose industry afford abundant means of ample liquidation, and by the evident interest of every merchant to sustain a credit, hitherto high, by promptly applying these means for its preservation.

I deeply regret that events have occurred which require me to ask your consideration of such serious topics. I could have wished that, in making my first communication to the assembled representatives of my country, I had nothing to dwell upon but the history of her unalloyed prosperity. Since it is otherwise, we can only feel more deeply the responsibility of the respective trusts that have been confided to us, and under the pressure of difficulties, unite in invoking the guidance and aid of the Supreme Ruler of nations, and in laboring with zealous resolution to overcome the difficulties by which we are environed.

It is, under such circumstances, a high gratification to know, by long experience, that we act for a people to whom the truth, however unpromising, can always be spoken with safety; for the trial of whose patriotism no emergency is too severe, and who are sure never to desert a public functionary honestly laboring for the public good. It seems just that they should receive, without delay, any aid in their embarrassments which your deliberations can afford. Coming directly from the midst of them, and knowing the course of events in every section of our country, from you may best be learnt as well the extent and nature of these embarrassments, as the most desirable measures of relief.

I am aware, however, that it is not proper to detain you, at present, longer than may be demanded by the special objects for which you are convened. To them, therefore, I have confined my communication, and believing it will not be your own wish to extend your deliberations beyond them, I reserve till the usual period of your annual meeting, that general information on the state of the Union, which the Constitution requires me to give.

M. VAN BUREN.

WASHINGTON, September 4th, 1837.

#### REPORT OF THE POSTMASTER GENERAL.

POST OFFICE DEPARTMENT,  
September 4, 1837.

SIR: Immediately after the suspension of specie payments by the banks in New York, in May last a circular was sent out, directing all postmasters who had been instructed to deposit the proceeds of their offices in banks, to retain them in specie to meet the drafts of the department.

To those who had been instructed to pay directly to contractors, another circular was sent, reminding them of their duties and liabilities in reference to the moneys to be received and paid by them under existing laws.

Instructions have recently been prepared, directing the manner in which returns of cash on hand are hereafter to be made to the department, and forbidding the loaning or use of the moneys belonging to the public for any purpose whatsoever. Copies of these papers are annexed, marked A, B, and C.

In relation to upwards of ten thousand of the post offices, these regulations make no change. The only change effected by them is, that about eleven hundred postmasters who formerly deposited their income in banks, weekly, monthly, or quarterly, according to its amount, now retain the money in their own hands till drawn for by the department. To about nine-tenths of these, the new system is more convenient than the old, as it saves them the trouble of going or sending to the banks and procuring certificates of deposit; it is equally safe, as their entire balances will be drawn for as often as they are deposited; and it is more efficient, because some postmasters who might neglect to deposit will not venture to dishonor a draft.

The postmasters who will not close their accounts quarterly, will not, probably, exceed one hundred; and the balances in their hands, from quarter to quarter, are not likely, under a proper administration of the department, to exceed, in ordinary times, one or two hundred thousand dollars. As they are required to have their balances always ready in gold and silver, the department will always have the means of meeting its engagements; and if a default in an individual case should occasionally happen, nothing like a general refusal to pay, as in the case of the late deposit banks, is ever to be apprehended.

It will ever be the true policy of the department not to have a large surplus, and, consequently, there will be little to entrust to the custody of postmasters or others. Moreover, the number of post offices now instructed to retain their funds, will be largely reduced upon an adjustment of the collection system to the mail service, as arranged within the last twelve months.

Though in some places convenient, banks are not necessary to the collection and disbursement of the funds of this department. In reference to more than ten thousand post offices, the collections and disbursements are effected more expeditiously and more conveniently without the interposition of banks, than they could be with it. The contractors who are creditors of the department, are its collectors from postmasters, and the collection and disbursement are but one operation. It is generally effected in a few days after the close of each quarter. The operation is the same where the postmasters pay to contractors upon the drafts of the department, though it is more tardy. The few offices, in reference to which banks are a convenience, are those whose receipts are large, and are not likely to be absorbed from quarter to quarter by the drafts of the department. They have generally iron chests or safes where the specie is kept; and, with a strict supervision and careful attention to their bonds, they will seldom, if ever, be found in default.

The necessary transfers of funds are effected by the department without inconvenience or loss. On the interior mail routes, the expenditure is generally greater than the income; so that, after the contractors have received the entire revenue of the offices supplied by them, balances are still due. These balances are as readily paid off by drafts on the postmasters in the cities where the surplus arises, as they could be by checks on banks in the same places. The process is rendered the more easy from the fact, that the heaviest surplus accrues at those points where funds are the most valuable, particularly at New York, so that the drafts of the Department to pay balances in the most distant parts of the Union are generally better than cash, being available for mercantile remittances. Thus, the necessary transfers of the Department are readily effected; and as this state of things is not likely to change, it would seldom, if ever, become necessary for the Department to transport specie from one point to another, if there was not a bank in existence.

Upon the suspension of the banks, efforts were

made in some quarters to compel the Department to receive irredeemable and depreciated paper for postages. Law, justice, and public policy, required an inflexible resistance of these efforts. Gold and silver are the only constitutional and legal currency of the United States, and nothing but that currency, or its equivalent, can be legally offered to the public creditors in payment. All taxes and postages are imposed in this currency, and all contracts are made upon its basis. The public faith could be kept, and the public business successfully carried on, only by a strict adherence to the plain letter, as well as obvious spirit, of the law.

The undersigned is happy to state, that all attempts to force the department to receive depreciated paper were soon abandoned; that little difficulty has been experienced in collecting postages in specie, and none where the circulation of change tickets has been successfully resisted; and that the credit of the department has been preserved unimpaired. Nor is any difficulty apprehended, so long as postages are collected in the constitutional currency of the United States. But, should the department be compelled to receive, and offer to its creditors, the depreciated notes issued by hundreds of embarrassed, faithless, or bankrupt corporations or individuals, no sure calculation can be made as to the future; and there is reason to apprehend general discontent, extensive failures, and deplorable disorganization throughout the mail service. With what face could the department insist on, and compel a strict performance of contract obligations by contractors, when stripped of the power to perform the most vital part of the contracts (so far as the interest of the contractor is concerned) on its own part. Justice and sound policy alike demand a firm adherence, in the mail service, to the standard of value, and the basis of contracts, prescribed by the Constitution, and hitherto strictly maintained, (except for a short period,) amidst the calamities of war.

On the whole, no legislation is necessary to maintain the credit of this department; or enable it to manage its fiscal concerns; the existing laws being deemed ample for those purposes.

I have the honor to be,

Your obedient servant,

AMOS KENDALL.

To the PRESIDENT OF THE UNITED STATES.

A.

POST OFFICE DEPARTMENT,  
— 1837.

Sir: You will, until further orders, retain the proceeds of your office in your hands, *in specie*, to meet the drafts of this Department.

I am, respectfully,

Your obedient servant.

Postmaster at

B.

POST OFFICE DEPARTMENT,  
Appointment Office, Washington, May 16, 1837.

Sir: I am instructed by the Postmaster General to call your particular attention to the fact, that the rates of postage, as established by law, are based upon the legal currency of the United States. The following extracts from the printed regulations and the law, will clearly show what are your duties and responsibilities in relation to the kind of currency to be received for postage, viz:

"You will receive nothing but specie, or its equivalent, for postage."—*Instructions to Postmasters*, chapter 5, section 62.

"All payments to the department, whether upon its drafts, or by deposits in bank, must be in specie, or its equivalent. No allowance can be made to postmasters for the depreciation of money received for postage, nor for losses by fire, robbery, or theft."—Chapter 23, section 245.

Extract from an act of Congress, approved on the 14th of April, 1836.

"SECTION 2. And be it further enacted, That, hereafter, no bank notes of less denomination than ten dollars, and that from and after the 31 day of March, anno Domini 1837, no bank note of less

denomination than twenty dollars, shall be offered in payment, in any case whatsoever in which money is to be paid by the United States, or by the Post Office Department; nor shall any bank note, of any denomination, be so offered, unless the same shall be payable, and paid on demand, in gold or silver coin at the place where issued, and which shall not be equivalent to specie at the place where offered, and convertible into gold or silver upon the spot, at the will of the holder, and without delay or loss to him: *Provided*, That nothing herein contained shall be construed to make any thing but gold or silver a legal tender by any individual, or by the United States."

Hence, you will perceive that, whatever you may receive for postage, you are responsible for gold or silver; and that it is *unlawful* for you to offer in payment to contractors, or others, any note of any bank which does not pay its notes in specie. As the Postmaster General has no power to release you from your responsibilities under the laws, and as, on the contrary, it is his duty to see them faithfully executed, he has deemed it expedient to give you this notice, that you may guard yourself against loss in the collection of your postages.

Very respectfully,

Your obedient servant,

ROBERT JOHNSTON,

Second Assistant Postmaster General.

C.

Postmasters, who may be under instructions to retain the proceeds of their offices until drawn for by the department, will observe the following regulations, viz:

Those whose nett proceeds are five hundred dollars or more per week, will report the amount weekly to the Department. Fractions of weeks at the beginning and end of quarters need not be reported separately.

Those whose nett proceeds are not five hundred dollars per week, but amount to that sum or more per month, will report them monthly. The last month of each quarter need not be reported separately.

At the end of each quarter, all postmasters at draft offices will immediately ascertain the amount of nett revenue accruing at their respective offices during the quarter, and report it forthwith to the department, setting down the sums, if any, which may have been reported weekly or monthly, and deducting them, thus exhibiting the balance not reported.

All these reports must be by letter, addressed to the Postmaster General, which must be sent separately, and not enclosed with the quarterly accounts, or tied to them, or to any other letter or packet on other business. Nor must it be delayed until the accounts are forwarded, if it can be sent sooner.

Postmasters will not be permitted to use or loan out any of the moneys belonging to the department, but will keep them always on hand to meet its drafts. A violation of this regulation will be considered good cause for instant removal and prosecution. Every draft must be paid on presentation.

The travelling agents of the Department will be instructed to call occasionally on the draft offices, without notice, for the purpose of counting and reporting the cash on hand, and reporting also the manner in which it is kept.

Mr. WRIGHT moved that 5,000 copies of the Message, and 1,500 of the documents, be printed.

Mr. CLAY rose, he said, to second the motion; and he did so with great pleasure. Indeed, if there were any practical mode of disposing of the copies without inconvenience to Senators, he would be willing to vote for double or treble the number proposed to be printed. He had risen merely to second the motion of the honorable Senator; but while up, he could not help expressing the deepest regret at the President's entertaining such views, and having made such a proposition as was contained in this paper, to meet the existing crisis in the affairs of our country, and which had called us together at this inconvenient period of the year from our occupations and our families.

Mr. BUCHANAN said that he did not rise to express any opinion, or to enter into a discussion

on the recommendation of this message. "Sufficient for the day was the evil thereof." But, he rose to move for an increased number of copies. We were assembled together for specific purposes, and the eyes of the American people were now intently fixed upon us. Their eyes would be exclusively directed for some time to come to our deliberations. He did not think that 5,000 copies would be a sufficient number to circulate among our constituents, in order to give them that information which they ought to have.

He had generally been adverse to printing documents, because he knew that on many occasions they were considered as useless lumber in the post office; but for this document, which was of the highest importance, he was willing to vote that 8,500 copies should be printed, and 1,500 of the accompanying documents. He would, therefore, make that motion.

The question being taken on printing 10,000 copies, it was agreed to.

The Senate then, on motion of Mr. GRUNDY, adjourned.

#### HOUSE OF REPRESENTATIVES,

TUESDAY, September 5, 1837.

The following members appeared and were qualified:

The Hon. JOHN P. RICHARDSON of South Carolina.

The Hon. WILLIAM C. DAWSON of Georgia.

The Hon. THOMAS GLASCOCK of "

The Hon. JESSE F. CLEVELAND of "

The Hon. RICE GARLAND of Louisiana.

The Hon. JOHN W. JONES of Wisconsin.

The Hon. CHARLES DOWNING of Florida.

Mr. GARLAND of Virginia, from the select joint committee appointed to wait on the President of the United States, and inform him that the two Houses of Congress were organized, reported that they had performed that duty, and that the President would transmit a Message to them in writing that day at 12 o'clock.

A Message in writing was received from the President of the United States by the hands of his private secretary, ABRAHAM VAN BUREN, Esq.

[Given in the proceedings of the Senate.]

The message having been read by the Clerk:

Mr. HAMER moved that the message and accompanying documents be laid on the table, and that ten thousand extra copies be printed.

Mr. OWENS moved to increase the number to twenty thousand.

Mr. ROBERTSON begged to inquire of the gentleman by whom the original motion was made, whether any individual was authorized to print for the use of the House.

Mr. HAMER was not prepared to say whether there was or not. He said he had no objection to accept the amendment of the gentleman from Georgia as a modification of his own.

Mr. WHITTLESLEY, of Ohio, then moved that 10,000 copies be printed for the use of the House.

Mr. WHITTLESLEY was much gratified when his colleague had, in the first place, moved for the printing of 10,000 copies of the message, because he thought we ought to commence this session of the House with a view to the embarrassed condition of the country, and expend no more money than was actually necessary to carry on the operations of the Government. It was a fact well known to many present, that previous to the year 1829, no more than 5,000 copies of the message and documents had ever been printed. The number that year had been doubled, and for the last few years it had increased to 20,000 copies. Now, he would appeal to gentlemen on this floor, whether it was not a fact that this document was printed in the newspapers of the country for months before we receive them from the public printer. Attempts had heretofore been made to prevent so large a number from being ordered, but it had then been looked upon by some as being introduced out of hostility to the Executive or public printer. Now we have no public printer, and he considered it an appropriate time to attempt to retrench the expenses of the House in this particular. He was willing to vote money to the fullest

extent, where it was necessary to carry on the operations of the Government; but he could not see any benefit to be derived from the printing so large a number, while it was well known that all the papers in the country published the document before it could be laid on our tables, and sent by us through the mails to our constituents. So far as his vote would go, he should endeavor to retrench the expenses of the House, and he hoped he would be seconded in this effort. Mr. W. then called for a division of the question.

The motion to lay on the table was then agreed to without a division.

The question was then put on printing 20,000 copies of the message.

Mr. BOND called for the yeas and nays, which were ordered, and the motion was agreed to—yeas 115, nays 109.

The SPEAKER laid before the House a communication with a report from the Secretary of the Treasury on the state of the finances; which, on motion of Mr. CONNOR, was ordered to lie on the table.

Mr. CONNOR, moved to print 20,000 extra copies: lost—yeas 101, nays 106.

Mr. OWENS moved that 10,000 extra copies be printed; which was agreed to without a division. On motion of Mr. McKENNAN, the usual resolution for supplying the members with five daily papers was agreed to.

On motion of Mr. PATTON, it was

Resolved, That the House do now proceed to the election of Printer for the House for the 25th Congress; whereupon,

Mr. LEWIS WILLIAMS nominated GALES and SEATON.

Mr. HAMER nominated BLAIR and RIVES.

Mr. CLARK of New York nominated THOMAS ALLEN.

The same gentlemen having been appointed tellers, the result was announced as follows:

	1st ballot.	2d.	3d.	4th.	5th.
Whole number of votes, 230	230	230	228	227	228
Necessary to a choice . . .	116	116	115	114	115
BLAIR and RIVES . . .	103	103	103	100	104
GALES and SEATON . . .	100	102	101	103	100
THOMAS ALLEN . . .	22	22	23	22	23
Scattering . . .	1	1	1	2	0
Blanks . . .	4	2	0	0	1

Mr. OWENS remarked; that as there appeared to be little probability of the House making a choice to-night, he moved an adjournment; which was agreed to—yeas 108, noes 102; and so

The House adjourned.

## IN SENATE,

WEDNESDAY, September 6.

Mr. HUBBARD offered a resolution proposing an alteration in the standing rules of the Senate, and asked its consideration at this time.

Mr. CLAY objecting, the resolution lies over till to-morrow.

Mr. HUBBARD moved that the Senate proceed to-morrow to the appointment of the standing committees.

Mr. CLAY said he should be very glad to learn from that part of the Senate which was capable of affording the information, whether it was intended to appoint all the standing committees, and for what purpose? It had been intimated in the message that those communications which were annually made, and which formed the basis and action of the standing committees generally, were at this time to be withheld until the usual period of the meeting of Congress. Indeed we were told, and he thought without a sufficient regard to the rights, and he would add, what was of much importance in the present crisis of the country, the duties which Congress had now to perform, that he (the President) had called them together for a certain purpose; that he meant to limit his communications to that purpose, and dismiss us when we should have done.

Assembled as we are, (continued Mr. C.) we have a right to look to the interests of the whole country—to the interests of all—and, for one, I must say that, although no man has come here with more reluctance than I have done, and no man here will return to his private pursuits with more pleasure and satisfaction than I shall do, yet

when I regard the present general, unhappy, distressed, and embarrassed condition of the country, I should be more reluctant, whatever may have been the purposes of the President, or any body else, to return home, until I see some broad, comprehensive, effectual plan proposed for the relief of the country.

But, sir, I have risen to inquire what is the design, what is the purpose, of appointing all the standing committees, if we are limited to one single object, and which, according to the language of the message, we are called here to deliberate upon? We know nothing of our foreign affairs; we know nothing concerning the question of the northeastern boundary; we know nothing in regard to Texas. Then what are the purposes to be answered by appointing the Committee on Foreign Relations? All that I desire is to have light on the subject—to learn, if it be possible, the views and purposes of those into whose hands are confided the intentions of the administration, why all these committees should be appointed.

Mr. HUBBARD remarked that he regretted as deeply as the Senator from Kentucky could, the existence of any cause which had made it necessary for the President to assemble Congress at this time; and he was quite sure that he had left his home with as much reluctance to perform his duty here, as that Senator, or as any other Senator. But Congress were now assembled; both Houses had been organized in the usual manner, and communications had been interchanged that the two Houses were now ready to proceed in the transaction of the public business; and, after such a meeting, what was it proper for the Senate to do? By the 33d rule, it was made their duty at the commencement of each session to appoint their standing committees. This was the law, and it had been the invariable practice of the Senate. And was there any less obligation, any less propriety, or any less importance, for the Senate to appoint its usual standing committees at an extra session, than there was at an ordinary session of Congress? He did not so consider the matter. The rule itself was imperative. The course of proceeding was, to his mind, plain, and he had offered the resolution in accordance with his sense of duty. He was well aware, with the Senator from Kentucky, that the President had, in his public message, which had been communicated to Congress, alluded mainly to but one subject, and what seemed to him to be necessarily connected therewith; and he was free to admit that that was a subject of deep and abiding importance to the interests of our whole country. But does the Senator know that the President may not, by special message during the present session, communicate to Congress other and different subjects? Certain the fact is, that the people themselves are not precluded by the Message from coming here with their memorials. They have a right to present here their petitions; and would it be wise or proper for the Senate to refuse to hear, consider, and dispose of these matters in the usual manner, because this happened to be an extra session of Congress, called by the President for a particular and avowed purpose? He thought not. This session of Congress having commenced, he had offered to the Senate the resolution for the appointment of the usual committees, as the best and most legitimate mode for the disposal of the public and private business which may be presented for its consideration. He could not doubt that the great and absorbing subject referred to in the President's Message, would engage the unremitting attention, and would command the most faithful service of the Senate; but the all-importance of that subject, and the fact of its being exclusively considered in the Message, was, to his mind, no sufficient reason against the appointment of the standing committees. The consideration of that subject would be, and should be, the main business of the present session. He could not believe that the appointment of the committees would necessarily protract the session. After the completion of the business which had summoned Congress together, Congress would adjourn. He was as anxious as any man could be, to bring this session to a speedy close, to finish the work proper to be done; and he felt assured, that by exerting their best efforts, Congress would be

able at this session to accomplish some measure which would, in effect, restore confidence, and give relief to the community. He was as desirous as the Senator from Kentucky, or as any other Senator, could be, to have this done, and done speedily. He had, therefore, thus early introduced the resolution for the appointment of the committees. He hoped to see this a short but a business session. It seemed to him that every consideration of policy and of duty should induce the Senate at this time to make the appointment of their committees. He hoped, therefore, that his motion would be adopted.

The motion was agreed to.

On motion of Mr. WALKER, The Senate adjourned.

## HOUSE OF REPRESENTATIVES.

WEDNESDAY, Sept. 6, 1837

On motion of Mr. ALLEN of Vermont, by general consent, a resolution was adopted ordering copies of a diagram of the hall, with the names of the members appended to their seats therein, to be furnished to the members.

Mr. BRONSON, by consent, submitted the following resolution:

Resolved, That the further balloting under the resolution of yesterday, providing for the election of a printer for this House, be suspended until the third Monday of September instant, and that temporarily and until the due election of a printer, the Clerk of this House be authorized and directed to employ some person or persons to do the necessary printing of the House, upon the same terms that it was done at the last session.

Mr. CUSHING expressed a hope that this resolution would not be adopted, since it proposed to do that by resolution which the House had refused to do directly, by a vote of 126 to 100, on yesterday.

Mr. GRENELL moved to lay the resolution on the table.

Mr. HAYNES asked for the yeas and nays on that motion, which were ordered, and were—yeas 109, nays 114, as follows:

YEAS.—Messrs. Adams, Heman Allen, John W. Allen, Ayckrigg, Bell, Biddle, Bond, Borden, Briggs, William B. Calhoun, John Calhoun, William B. Carter, Chambers, Childs, Clowney, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, Evans, Everett, Ewing, Richard Fletcher, Isaac Fletcher, Filmore, Rice Garland, Goode, James Graham, William Graham, Graves, Grennell, Griffin, Hall, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Hierod, Hoffman, Robert M. T. Hunter, Jenifer, Henry Johnson, William Cost Johnson, Legare, Lincoln, Andrew Loomis, Mallory, Marvin, Sampson, Mason, Maury, May, Maxwell, McKennan, Menifee, Mercer, Milligan, Matthias Morris, Calvary Morris, Naylor, Noyes, Oels, Patterson, Patton, Pearce, Peck, Phillips, Pope, Potts, Randon, Randolph, Reed, Rhett, Ridgway, Rives, Rumsey, Russell, Sawyer, Sergeant, Augustine H. Shepperd, Charles Siegard, Sibley, Slade, Snyder, Southgate, Stanley, Stratton, Tallaferra, Thompson, Tillinghast, Toland, Underwood, John White, Eliza Whitteley, Lewis Williams, Sherrod Williams, Christopher H. Williams, Wice, and York—109.

NAYS.—Messrs. Anderson, Andrews, Atherton, Beatty, Belknap, Bicknell, Birdsell, Boon, Bouldin, Brochard, Bronson, E. C. Buchanan, Cambridge, Timothy Carter, Casey, Cheney, Chapman, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Cushman, Davee, DeGroot, Drumcoble, Duncan, Edwards, Farrington, Fairfield, Foster, Fry, Gallup, J. M. Garland, Gholson, Glascock, Graustad, Grant, Gray, Haley, Hammond, Hamer, Harrison, Hawkins, Haynes, Holsby, Holt, Hopkins, Howard, Hubley, William H. Hunter, Ingham, Jones, B. Jackson, Jacob Jackson, Joseph Johnson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, K. L. Kitchens, Ler Butler, Logan, Appahed Loomis, James M. Mas, n. Martin, McKay, Robert McClellan, Abraham McClellan, McCune, McKim, Miller, Montgomery, Morgan, Samuel W. Morris, Mullenberg, Murray, Noble, Owens, Palmer, Parker, Parmelee, Pratt, Prentiss, Reiley, Rencher, Robertson, Sheffer, Shiple, Smith, Spencers, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Tuomey, Vail, Vandever, Wagener, Webster, Weeks, Thomas T. Whitteley, Jared W. Williams, and Worthington—114.

So the House refused to lay the resolution on the table.

The question recurring on agreeing to the resolution—

Mr. PICKENS submitted an amendment to come in as an additional clause to the resolution, to the effect that "the contracts for printing be given out by the Clerk to the lowest bidder, subject to the regulations now imposed by law."

Mr. PICKENS said he had voted against laying this resolution on the table, so that the question involved in the matter might be brought to the notice of the House. Every gentleman who had occupied a seat in this House for any length of time, must have witnessed the great evils arising from connecting editors of political newspapers with the print

ing of Congress. He called upon the House now to sustain him in his effort to separate the printing of the House from editors of newspapers, whose business alone was to defame and slander high minded and honorable men. He had no idea of continuing patronage to a set of men who had raised one of the most odious despotisms ever held over a free people. A gentleman from Virginia had a few years ago submitted a scheme for separating the printing of Congress from the newspaper press, and he hoped gentlemen would now see the necessity of adopting this project. He had no idea of patronizing editors, who were aided by Executive bounty, and grew rich from the plunder of the people. It was time for the House to take this matter into consideration, and separate itself as much as possible from the partisan press of the day. It was proposed to limit the operation of this resolution to the third Monday in September; but he desired himself to free the House entirely from the excitement, consequent upon the election of a public printer. He had no idea that this House should be engaged for days in a miserable scramble for the election of a man or set of men to do the printing of the House, merely because they were editors of political papers. The matter of election of printer had grown to be a matter of as much importance as the election of a Speaker of the House, and would continue to create an improper excitement, so long as the printing was connected with the political press of the country. He desired a free and ample discussion of the matter, and he hoped the amendment he had submitted might be adopted.

Mr. BRONSON said that the same reasons which induced him to offer the original resolution, would induce him to vote against the amendment of the gentleman from South Carolina; and he briefly gave his reasons. He said it had appeared perfectly evident to him, from the result of the ballots of yesterday, that no choice of a public printer would be made by subsequent ballots; and it appeared equally evident to him that the people of this country would not look with favor or approbation upon the House spending day after day in balloting for a printer. They had been called together for much more momentous and important considerations. They were called together on an occasion, the like of which was never before seen, and the eyes of the whole nation were directed to their deliberations. Under these circumstances, it struck him that it did not become them to spend two or three days, or perhaps a much longer space, in choosing A, B, C, or any other person, to do the public printing; and with a view, therefore, that the House might at once proceed to deliberate and dispose of the great considerations for which they had been called together, he had offered that resolution. The same reasons, therefore, that induced him to offer it, would induce him to vote against the amendment, for he plainly perceived that if the latter should be entertained, they would spend probably much more time in discussing it than even under the balloting of yesterday.

Mr. WILLIAMS of Kentucky moved to amend the amendment, by adding the words "and to a printer who is not the editor of a newspaper."

Mr. McKAY called the attention of the gentleman from South Carolina to the terms of the joint resolution of 1819, regulating the manner in which the printing for Congress shall be done. In regard to the question of separating the public printing from the newspaper press, Mr. McK. was ready and willing to concur that it should be done, either by the establishment of a private press belonging to the Government, by contracts, or by any other plan that would be practicable. He, however, was not disposed to enter into a discussion of that subject at present, and had only risen for the purpose first stated. He would, therefore, suggest to the gentleman from South Carolina, that while that joint resolution was in force, it would not be in order to adopt the provision embraced in that amendment. That law prescribed the manner in which the printing should be done, and the price to be paid for it, and he held it was not competent in them, during its existence, to let out the work by contract; that law limited the price, and it might turn out

that the lowest bid would exceed it, which the Clerk being bound to accept, would be a violation of the law, and the House be paying higher prices for its printing than it was authorized to do by joint resolution and the law of the land now in force.

Mr. PICKENS inquired if there was not a proviso in the joint resolution, "until otherwise ordered?"

Mr. McKAY read from it the words "when otherwise specially ordered."

Mr. PICKENS. Then under that provision my amendment is clearly in order.

Mr. TAYLOR hoped the original resolution would be adopted; for it was of the first importance that the House should be progressing with the business that had called them together, which was its obvious design. With reference to changing the mode of employing a printer, he believed that no other printers were at present prepared to execute the work, than the editors of the papers in the city; and, moreover, if let to the lowest bidder, some irresponsible man might get the job, who would put in too low a bid, and either disappoint them altogether, by not executing the work at all, or by doing it in a manner that would be disapproved of; in either case the public interest would suffer. He also held the existing law to be binding, and in full force, until it was repealed by the concurrence of a joint vote of the two Houses.

Mr. WILLIAMS of Kentucky said, at the request of several of his friends, he would withdraw his amendment.

Mr. PICKENS then modified his amendment so as to provide "that the contracts should not exceed the prices now stipulated by the joint resolution of 1819, and that this arrangement be extended to the first Monday in December next."

Mr. COLES proposed to amend the amendment by striking out all after the word "and," and insert a provision for the appointment of a select committee to inquire into the expediency of separating the emoluments of public printer from the newspaper press of the country: lost.

After some remarks from Messrs. McKEN-NAN, WISE, and UNDERWOOD,

Mr. ROBERTSON moved to insert, in lieu of the definite period assigned in the amendment, the following: "continued until the further order of the House of Representatives." Mr. R. explained why he voted against laying the original resolution on the table. His reasons were two-fold: first, because he found they were engaged in a struggle for an election, not of a printer, but of a politician, or partisan editor; an election which might consume a great deal of the time of the House, without the slightest benefit to the country; and second, because he hoped the effect of that resolution, if adopted, would be for ever to put an end to this biennial struggle for the election of a partisan printer.

Mr. BRIGGS was opposed both to the resolution and the amendment, because it appeared to him to be an evasion, if not a direct violation, of a statute now existing. He then read the statute directing the manner in which a printer was to be elected, and contended that it was not competent for the House, without the concurrence of the Senate, to give out the printing in any other manner than that laid down in the statute referred to. The joint resolution of 1819 provides that each House shall proceed to elect, by ballot, within thirty days of the adjournment of Congress, a printer for the next Congress. He appealed to gentlemen to say whether this statute was not binding upon them until it was rescinded by the joint action of the two Houses? Taking this view of the question, he could see no other mode of proceeding than to reject the resolution and amendment, and proceed to the election of a printer by ballot.

Mr. GLASCOCK was not disposed, at this stage of the question, to excite the passions of the House by a reference to any political or partisan question which might hereafter arise. We had come here for the purpose of proceeding with the business which we were called together to act upon, as speedily as possible, and he was not disposed now to continue any course which would procrastinate our action on this important business. As to the

cause of the existing evils he was not disposed to make a question. It was sufficient for him to know that the country was involved in difficulty; and he was in favor of the speedy action of Congress on the subject, in order to provide a remedy for the evil. The object of the gentleman from New York in submitting the resolution, he had no doubt, was to dispose of the question of the election of printer as speedily as possible, with a view to facilitate the business of the House; and it appeared to him that this ought to be the desire of every gentleman here. It seemed to him that the resolution, as modified by the gentleman from South Carolina, (Mr. Pickens) ought to meet the concurrence of every gentleman on the floor of the House. This resolution held out an inducement to every editor or printer in the community to submit proposals; and the contract must be made with the person who is the lowest bidder. He did not look upon this resolution as introduced to effect any political object; and he hoped it would receive the sanction of the House. He looked forward to difficulties which may arise in our deliberations, but he hoped that we might go on and organize speedily, so that we might, if possible, unite in accomplishing the great objects for which we were assembled. He cared not who was elected printer. He, to be sure, had his friends, as he doubted not every man in that House had; but when we saw so many conflicting interests, we ought to compromise. The plan proposed by the resolution, as modified by the gentleman from South Carolina, he considered the best compromise which could be made, and he hoped it would be adopted, so that we might proceed with the other important business for which we were assembled to consider.

Mr. PICKENS called for the reading of the statute alluded to by the gentleman from Massachusetts, (Mr. Briggs,) which being read by the Clerk, Mr. P. stated that his object was merely to show, that because the House had not complied with the terms of the statute, it was null, and of no effect. The House had neglected to perform its duty in not electing a printer at the last session, thereby considering the statute a mere dead letter. The resolution of the gentleman from New York, now proposed to authorize the Clerk to appoint a printer to fill the office left vacant by the negligence of the House. That being the case, and the resolution being before the House, he considered his amendment as being strictly in order. The argument of the gentleman from Massachusetts he considered as applying equally to the resolution of the gentleman from New York, with the amendment submitted by himself. He contended, however, that both the resolution and amendment were strictly in order, and he hoped they would be adopted.

Mr. HOFFMAN of New York alluded to the distress which had existed, and was now existing, in the city of New York, and asserted that the press which had received special favor from the Executive had used its efforts to increase that distress; and when they had petitioned the Executive for relief, in the midst of their distresses, their petitions had been spurned by the official organ of the Government. The power which they received from the Executive was made use of as an engine to strike down the interests of a large class of our citizens. He deprecated the course pursued by the party press of the country, but he could not see that we could adopt the resolution now before the House, because in his opinion it went to abrogate an existing statute of the land. He contended that it was not competent for the House to set aside a joint resolution of the two Houses; and that the only means of effecting the object desired by the gentleman who introduced the resolution, would be the passage of a law changing the mode of appointing a public printer.

The question was then taken on the amendment submitted by Mr. Robertson, and decided in the negative without a division.

The question then recurred on the amendment of Mr. Pickens.

Mr. RENCHER called for the yeas and nays on this amendment, which were ordered.

Mr. REED, of Massachusetts, contended that he laws in relation to the prices for printing were

wholly defective. The law was specific in relation to the setting of types to be sure, but it was entirely defective in relation to the paper to be made use of, in consequence of which the public printer might use paper which would not be fit for the work. He then moved to amend the amendment, by inserting therein the words "that the quality of the paper be also prescribed in the contract."

The question was then taken on the amendment of Mr. PICKENS, and decided in the affirmative—yeas 112, nays 109.

Mr. CAMBRELENG called for the reading of the resolution as amended, which being read, he said there appeared to be some inconsistency about it. It appeared to him to be important that the public documents already ordered to be printed, should be printed and laid upon our tables, and he did not perceive that the resolution was calculated to effect that object speedily. It seemed to him if the resolution was adopted, that it would be a week or ten days before a single document could be printed, and he therefore hoped it might not be agreed to.

Mr. WISE moved the following amendment: Strike out all after the word "resolved" and insert the following: "That the Clerk of the House be, and he is hereby, authorized to employ the Editors of the Intelligencer and the Madisonian to execute the printing of this House, upon the terms of the joint resolution of 1819, until the first Monday in December next."

Mr. CAMBRELENG asked for the yeas and nays; which were ordered.

Mr. McKENNAN moved to lay the whole of the propositions on the table.

Mr. MONTGOMERY asked for the yeas and nays on this motion, but they were not ordered, and the vote was taken by tellers—yeas 117, nays not counted.

So the whole subject was laid on the table.

#### ELECTION OF PRINTER.

The House then resumed the ballot for the choice of a printer to the House for the 25th Congress, commencing with the 6th ballot, (five having been given in yesterday,) and the result was as follows:

Whole number of votes	-	-	230
Necessary to a choice	-	-	116
For Blair and Rives	-	-	107
Gales and Seaton	-	-	93
Thomas Allen	-	-	27
Blanks	-	-	3

There being no choice, the House balloted again, when the result was announced as follows:

Whole number of votes	-	-	228
Necessary to a choice	-	-	115
For Blair and Rives	-	-	101
Gales and Seaton	-	-	81
Thomas Allen	-	-	42
Blanks	-	-	4

There being still no choice, another ballot was gone into, the result of which was as follows:

Whole number of votes	-	-	227
Necessary to a choice	-	-	114
For Blair and Rives	-	-	101
Gales and Seaton	-	-	68
Thomas Allen	-	-	53
Blanks	-	-	5

The result of this ballot showing that no choice was yet made, the House was proceeding to a ninth ballot, when—

Mr. SLADE moved that the House adjourn.

Mr. CUSHMAN asked for the yeas and nays, but they were not ordered, and the motion was disagreed to without a count.

Mr. TAYLOR submitted the following resolution:

*Resolved*, That the printer of the House of Representatives for the last Congress, be authorized to print for this House till a public printer shall be duly elected.

Mr. PATTON moved to lay the resolution on the table; upon which

Mr. TAYLOR asked for the yeas and nays, which were ordered, and were—yeas 123, nays 100.

So the resolution was laid on the table.

Mr. BOON sent to the table a resolution to be submitted to the House; when

Mr. TALIAFERRO raised the point whether it was in order to move a resolution while the House was engaged on another subject.

The CHAIR ruled otherwise, on the ground that the House being in the execution of its order of yesterday, viz: the election of a printer, *ergo* all resolutions or motions on that subject were in order. The one about to be submitted, was on the mode of electing the printer, and the House not having prescribed any particular mode, it was in order to make a motion to that effect at any stage of the proceedings. The Chair was decisive on the point, though he would, if it was desired, take the sense of the House upon it.

Mr. TALIAFERRO said he would not press the point.

Mr. BOON'S resolution was then read as follows:

*Resolved*, That in the election of a printer to the House of Representatives for the first session of the 25th Congress the vote of the members shall be given *viva voce*.

Mr. B. asked for the yeas and nays on the adoption of the resolution, which were ordered.

Mr. PATTON wished the principle of voting for officers of the House to be in all cases *viva voce*, and was understood to be preparing an amendment to that effect, when,

Mr. EVERETT moved to lay the resolution on the table.

Mr. BOON asked for the yeas and nays, which were ordered, and were—yeas 88, nays 132, as follows:

**YEAS**—Messrs. Adams, Ayckrigg, Alexander, Homan Allen, John W. Allen, Bell, Biddle, Boyd, Borden, Briggs, Bronson, William B. Calhoun, John Calhoun, William B. Campbell, John Campbell, Childs, Clowney, Co-win, Cravston, Crockett, Curtis, Cushing, Darling, Davies, Deberry, Dennis, Elmore, Evans, Everett, Ewing, R. Fletcher, Filmore, Rice Garland, Goode, Grinnell, Hall, Haskett, Harlan, Harper, Hastings, Henry, Hoffman, Robert M. T. Hunter, Henry Johnson, W. C. Johnson, Legare, Lincoln, Andrew Loomis, Mallory, Marvin, Samuel Mason, Maxwell, McKenney, Menzies, Mercer, Milligan, Morgan, Nathaniel Morris, Calvary Morris, Naylor, Noyes, Patterson, P. Parco, Phillips, Peje, Potts, Randolph, Reed, Rencher, Rhett, Ridgeway, Runney, Russell, Sergeant, Augustine H. Shepperd, Charles Shepard, Sibley, Slade, Smith, Southgate, Stanley, Stratton, Thompson, Tillinghast, Toland, Underwood, Eliza Whitlesley, Lewis Williams, Christopher H. Williams, Wise, and Yorke—88.

**NAYS**—Messrs. Anderson, Andrews, Atherton, Beatty, Belme, Bicknell, Birdsall, Boon, Bouldin, Brodhead, Bruyn, Buchanan, Bynum, Cambreleng, Timothy Carter, Wm. B. Carter, Casey, Chaney, Chapman, Cille, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Cushman, Dawson, Dayce, DeGraff, Dringoloco, Duncan, Dunn, Edwards, Farrington, Fairfield, Foster, Fry, Gallup, James Garland, Gholson, Glascock, James Graham, William Graham, Grandand, Graves, Gray, Haley, Hammond, Hamer, Harrison, Hawes, Hawkins, Haynes, Herod, Holsey, Holt, Hopkins, Howard, Hubley, William H. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Jennifer, Joseph Johnson, Nathaniel Jones, John W. Jones, Kenble, Kilgore, Klingensmith, Leadbetter, Logan, Arphaxed Loomis, James Mason, Martin, Maury, May, McKay, Miller, McClellan, Abraham McClellan, McClure, McKim, Millar, Montgomery, Moore, Morris, Muhlenberg, Murray, Noble, Ogle, Owens, Palmer, Parker, Pughenter, Patton, Paynter, Pennybacker, Pettrikin, Phelps, Plumer, Potter, Prentiss, Rariden, Reily, Richardson, Rives, Robertson, Sawyer, Sheffield, Shipley, Snyder, Spencer, Stewart, Taliaferro, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vandever, Wagener, Webster, Weeks, John White, Thomas T. Whitlesley, Sherrod Williams, Jared W. Williams, and Worthington—132.

Mr. PATTON then sent the amendments he proposed to submit to the Chair, providing that the election of all other officers, as well as the public printer, should be *viva voce*.

The CHAIR remarked that the amendment was not strictly in order, because it related to a subject not embraced in the order of the House of yesterday; which read—

*Resolved*, That this House do now proceed to the choice of a printer to the House for the 25th Congress, and had no reference to any other appointment than that of printer.

Mr. PATTON called the attention of the Chair to the fact, that the resolution of the gentleman from Indiana was itself inconsistent with the terms of the order of yesterday, for the latter provided for the choice of a printer to the whole "25th Congress," but the former for only the "first session" of that Congress.

Mr. GHOLSON was in the act of moving to strike out the words "for the first session;" when

Mr. BOON himself modified his resolution by striking out the words referred to.

The CHAIR then entertained the amendment of Mr. PATTON, which, after some remarks from the honorable mover, and Messrs. BOULDIN, DAWSON, and BOON, was agreed to.

The question recurring on the resolution as amended—

Mr. BRIGGS considered the resolution entirely unnecessary, and expressed his unfeigned astonishment at the introduction of such a measure, after they had been going on with the ballot for two days. In adverting to the discussion on the same subject, two years ago, he said he had opposed it then, and should do so, be it introduced when or by whom it might.

Mr. BOULDIN replied at some length, in favor of the *viva voce* mode of voting, and dwelt on its consistency with the mode and practice of the Old Dominion.

Mr. WISE said, he should vote for the proposition, as he had heretofore done on all occasions, when it had been introduced. He, however, cautioned gentlemen voting for Thomas Allen, to be on their guard, for that they would be marked and doomed to executive vengeance, the partisan press taking the lead, and giving the cue. For this reason he condemned the introduction of the resolution, though, being in favor of its object, he should vote for it.

Mr. GHOLSON said that he himself, like the gentleman from Virginia, (Mr. Wise,) who last addressed the Chair, was in favor of the *viva voce* mode of voting, not only in that body, but in all others—not only for public printer, but for every other appointment by the agents of the people. Being in favor of it, also, like the gentleman, he was indisposed to screen himself from this resolution, or to skulk from the responsibility of the open vote proposed by it, for he had never given a vote which he feared to have exposed to his constituents and to the world.

Sir, continued Mr. G. we are here told—we the representative citizens of a free people, we the American Congress of the United States, are gravely told—that this House is not free, and that we dare not carry out our own principles! That we, the representatives of a free people, are not independent, and dare not express our own will! It may be that gentlemen have come here with such feelings, but for myself, sir, I unhesitatingly and unqualifiedly deny the charge. I came here, sir, the representative of the freemen of Mississippi, and stand prepared to carry out their will fearlessly, boldly, and independently; and such I honestly believe to be the situation and the determination of every democrat in this House. There may be individuals here, there may be politicians here, acting on principles at variance with those they entertained when they first entered this hall, and who no longer possess that spirit of independence, and that adherence to principle, which should characterize the representatives of a free people. We are told that this resolution is to affect that party voting for the individual as public printer who has the smallest number of votes, (Thomas Allen,) and the gentleman from Virginia inquires of my friend from Indiana (Mr. Boon) whether any illegal combination, any extraordinary combining of the two political parties has been discovered, rendering it necessary to be exposed to the American people. Let me ask, sir, does that gentleman, for himself and his friends, dread exposure to his constituents by the votes they have here given? If not, why the inquiry? I will tell the gentleman that, from what I know of some of those who have voted for that candidate, they do not dread the responsibility of voting *viva voce*. Why then this attempt to terrify them? Why tell them their doom is sealed? Whence the necessity of all this? Sir, I have regretted to see the spirit of the speeches we have heard delivered to-day by the two gentlemen from Virginia and South Carolina, (Mr. Wise and Mr. Pickens,) for they were too much characterised by the party spirit of the day. I had hoped that, on such an occasion as this, we should have met in a spirit of harmony and compromise, especially after the declaration of the gentleman from Virginia himself, that this was to be termed "the distress session." Sir, I have the honor to be sent here by a people whose patriotism extends further than their pockets; and though we have suffered embarrassments as severe and as heavy as those that have afflicted any other portion of this Union, they are still prepared to suffer much more for the good of the country.

We, sir, of Mississippi, do not rely alone upon—nay, we do not expect—the aid of this nor any other legislative body. Though the message of the President has been already denounced, and characterized as a *loco foco* document, I will say that if that doctrine prevailed more generally than it does, the influence of bank rags would be lessened, the community less afflicted, and more political honesty found among us than I fear is now the case.

The gentleman from Virginia tells us, that it was his province to investigate into the abuses of this Government, and that one of the great evils was, that we had a partisan press engaged in executing the public printing, and that hence that press was brought up by the Government. A strange conclusion this, sir! Let me ask the gentleman if, in the course of his inquiries about the corruption of the press, he discovered any thing about the payment of a certain \$52,000, by a great moneyed corporation, to buy up a certain press? That corporation had been put down, I hope effectually and for ever, mainly through the exertions of the partisan press alluded to by the gentleman, (the Globe.) I wonder, sir, if the gentleman's labors discovered any trace of \$52,000, or any other sum, paid by the late Executive and his administration, or by the present. If the American press has become corrupted, the cause of it may be found in the transaction I have referred to.

Mr. Speaker, why then is it necessary for us to strunge, or to crouch, or to pretend to do either, before Executive influence? Do we dread that influence? Have we any cause to do so? Are we not responsible to our constituents, and to them alone? and if we fear to show our votes, is it not because we rather dread the responsibility we should be under to them, and the account they might call us to? Why, sir, the gentleman from Virginia is the very last man who would be brought to say he dreaded Executive influence, and yet he cautions those who are called conservatives to be on their guard, for that they will be marked! Why, sir, does the gentleman suppose that there are any here possessed of so little independence as to dread the influence of the Executive? Does he pretend to say that it has come to this, that the members of this body, who do not go in accordance with the will of the President, are to be hunted down? Does he think the President is not otherwise employed, than in hunting down, or striving to hunt down, those who may differ with him? Have we come here to legislate for the President, or to make a successor to him? That war I thought, sir, had been over, the people having performed that duty, fortunately, without our intervention. It really does appear to me, therefore, Mr. Speaker, that, if we commence this way, the sooner we leave here, and return to our constituents the authority by which we came here, the more credit we shall be entitled to, and the more honor we shall merit.

I reiterate the hope, sir, that this resolution will be adopted, so that we may be enabled to give an assurance to the American people, that we are willing to take the responsibility of voting for whom we please, and especially that we have no dread of being hunted down by executive influence. I wish also to show the American people upon whom this delay is accountable. I wish my constituents to be satisfied that upon me rests not the responsibility of this delay of the public time. What a picture does this proceeding present! We were convened upon an extraordinary emergency, and here have we been for two days engaged in what is called the pitiful election of a public printer. First we have been told that a partisan editor, or the printers of a political paper, ought not to be voted for; and yet the very gentlemen who say so are themselves engaged in voting for one of that character, though of their own political sentiments. Then gentlemen are cautioned not to show how they vote for fear of being hunted down by Executive influence, and every thing is urged calculated to keep up this delay. I do think, however, that the circumstances under which we now are, the number of ineffectual ballottings we have already had, and the consequent delay that has been already produced, render it incumbent upon us, and we owe it to our constituents, to our honor, and our sense of justice, that we should assume the responsibility of show-

ing to the world who are the causes of keeping up this delay. To do this requires the passage of this resolution; and again, sir, do I entreat the House to adopt it.

After some further remarks from Messrs. FOSTER, UNDERWOOD, and POPE—

The question recurring on the resolution as amended, the House was further addressed on the subject by Messrs. BRIGGS, BOULDIN, WISE, GHOLSON, FOSTER, UNDERWOOD, and POPE; when, after some remarks,

Mr. ROBERTSON moved to postpone the further consideration of the resolution until to-morrow, giving notice of his intention to submit a resolution which should have the effect of putting an end to this continual struggle. Mr. R. read to the House the resolution, which was to sever the connection of the public printing with the political press.

On motion of Mr. GLASCOCK,

The House adjourned at 6 o'clock, p. m.

#### IN SENATE,

THURSDAY, September 7.

The resolution offered yesterday by Mr. HUBBARD, proposing to amend the thirty-third rule of the Senate, by the insertion of the words "Committee on Patents and the Patent Office," was, on his motion, taken up.

Mr. GRUNDY stated that the reasons which had influenced the mover of the amendment were to provide for the appointment of a committee to have especial charge of every thing relating to patents and the patent office; for neither branch of Congress had ever appointed a committee solely for that purpose. In the Senate, every thing connected with the subject had heretofore been referred to the Committee on the Judiciary. That committee, however, being almost always engaged with subjects of its own importance, had frequently found it impossible to pay that attention to others which they deserved, and hence the necessity of creating a committee to take especial charge of all matters in relation to patents and the patent office. He hoped that the amendment would be adopted.

The question was then taken on the adoption of the resolution, and it was agreed to.

A message was received from the President of the United States through Major Van Buren, his private Secretary; which was laid on the table.

Mr. BUCHANAN presented a memorial from certain delegates of a meeting held at Erie, praying for an appropriation to construct a Macadamized turnpike road from the Cumberland road to Lake Erie.

Mr. B. observed that he did not believe that it was the intention of Congress, at this time, to go into the general transaction of business. Should it be their disposition to do so, which he trusted might not be the case, he would ask to have the memorial referred to an appropriate committee. However, as he had received the memorial, it was his duty to present it. He then moved that it be laid on the table and printed, which was agreed to.

Mr. BUCHANAN also presented a petition from Joseph Morrison, President of the Alleghany College, Meadville, praying for a township of land for that institution; which was laid on the table and ordered to be printed.

Mr. WALKER presented a memorial from the Legislature of Mississippi, requesting their Senators and instructing their Representatives in Congress to advocate the construction of an additional mail route from certain points designated in the said memorial. Also, a communication from the Governor of Mississippi, enclosing certain resolutions of the Legislature in relation to those passed by the Legislature of Maryland, in reference to the franking privilege: laid on the table and ordered to be printed.

Mr. HUBBARD, in pursuance of his motion of yesterday, moved that the Senate proceed to appoint their standing committees; which was agreed to.

At the suggestion of Mr. GRUNDY, the Senate first proceeded to elect the chairman, when four had been elected.

The Senate, on motion of Mr. CLAY, unanimously agreed that the committees should be appointed by the Vice President.

On motion of Mr. Wright, 3,000 extra copies of the report of the Secretary of the Treasury were ordered to be printed.

On motion of Mr. KING of Alabama, the Senate went into the consideration of Executive business; and after a short time spent therein, Adjourned.

#### HOUSE OF REPRESENTATIVES.

THURSDAY, September 7, 1837.

The House resumed the consideration of the resolution, submitted yesterday by Mr. BOON, which was, as modified by himself, in these words:

*R solved*, That in the election of a printer to the House of Representatives for the 25th Congress, the vote of the members shall be given *viva voce*, the amendment of Mr. PATTON extending the principle of voting *viva voce*, to all other officers appointed by the House, having been adopted:

Mr. ROBERTSON moved to strike out all after he word "resolved," and insert the following:

1. *Resolved*, That the public printing ought to be separated, as far as practicable, from the political press.

2. *Resolved*, That to afford time to digest a plan, having that object in view, the Clerk, until further order, contract for all printing ordered by this House, upon the terms and in the manner prescribed by the joint resolution of the 3d March, 1819, distributing the same among the proprietors of the several printing offices, not exceeding four, in the city of Washington, who will execute it on those terms, providing they will undertake to execute it equally, or in such proportions as they will contract to execute it.

Mr. ROBERTSON said the question involved in the resolution, was one of deep interest, but he did not consider this the time to go into a discussion of the matter; we have other and important matters to take into consideration, and he hoped the time of the House would not now be consumed in a discussion of a matter of this kind. He had introduced the proposition to get rid of the difficulty in which we have found ourselves involved. This contest for printing appeared to be a contest for political power, and from the manner in which political parties were now divided, it must be evident that unless one party or the other yields, there can be no union and no election can take place. The object of his proposition was to avoid the difficulty, for it was not to be expected that either party would yield the ground they had taken. He could not see that any gentleman could object to this proposition, and he submitted it to the House, hoping it might be adopted; because he apprehended that if the House did not adopt some such proposition as the one submitted by himself, a great portion of our session would be spent in determining the question as to who was to be elected public printer. We have other and higher duties to perform here, than to contend for the choice of a printer of the House, and he therefore hoped that his amendment might be speedily adopted.

Mr. GARLAND of Virginia, asked the indulgence of the House for a moment or two upon the subject of this resolution, growing out of the peculiar position he then occupied.

With regard to the abstract proposition of his honorable colleague, (Mr. Robertson,) he regarded it as a sound one, yet he believed it, at present at least, impracticable in execution. He thought the public printing should be, if practicable, separated from the public press, but yet the public press were the political engines of the country, and the Government itself was a Government of politics; and it would be as impossible to make the separation as it would be to separate any thing else of the most obdurate and difficult character. He should therefore vote against it.

In relation to the proposition to distribute the printing, he was utterly opposed to it. The House had one of two duties to perform. It must either designate the public printer, or select an agent for the performance of that duty. If it selected an agent, it must select one who could have the printing done with neatness, care, and despatch, and in whom they could confide.

In relation to another point, growing out of the resolutions of yesterday, he wished to say a few

words. He was one of that humble few, of that single twenty-two, who had voted for a particular individual (Thomas Allen) for printer. His determination to support that individual had been formed, not on account of private hostility to the late public printer, nor on account of any arrangement, management, or intrigue, with the friends of either of the other competitors for the office, for he had had none; but it had grown out of the fact that he stood pledged to his constituents to support a set of opinions which the editors of the Globe stand pledged to war against. Hence it was that, while the friends of Gales and Seaton, and the friends of the editors of the Globe, were all advocating their claims, it was but an humble privilege which he had exercised in supporting the claims of Thomas Allen, with whom he agreed in opinion. When Mr. G. had been approached on this subject, he had been distinct in the announcement to all who approached him, that he should not vote for Gales and Seaton, because he differed from them materially, and more materially than he did from Blair and Rives. If, however, he was voting for a wolf in sheep's clothing, he should deeply regret it; but till he found it out, neither wrath nor indignation should ever drive him from his position.

Mr. G. said that one of his honorable colleagues (Mr. Wise) had made a remark yesterday which had drawn him out on this occasion. The party to which Mr. G. belonged had been called conservatives, and he admitted he belonged to that party. He agreed also in the general tenor of the remarks of his colleague; but he understood him to say that they (the conservatives) were marked, and were put aside, as the "fatted calf," for execution. Mr. G. hoped the information of his colleague was incorrect, but yet he had no terror pressing upon him that any kind of proscription would follow him, so long as he merited the approbation of his constituents in the position he had taken, having in his own breast a sense of rectitude.

Mr. WISE made a brief explanation.

Mr. GARLAND said he understood his colleague then as now. Mr. G. continued: He had sought no controversy with any one; but if it came, it came from others, and not from himself. Mr. G. then referred to the history of one of the Roman consuls, who had put his son to death for disobedience of orders, as applicable to the case in point, and added that if he was to be executed, even the knowledge of such a determination should not drive him from any opinions he had entertained heretofore. *Them* he would never desert, for he had honestly and conscientiously entertained them; and nothing under the heavens should ever induce him to desert them. His motto should be "My country first, and then with the party with which I can honestly and conscientiously go." Upon this principle he had stood and voted for Speaker, and was then standing in voting for public printer; and come what would, he should ever stand upon that position.

Mr. CLARKE said he had no hesitation in voting for the proposition to take the vote *visa voce*, for he had no desire to disguise from the House, or from his constituents, that he had all along voted for Thomas Allen in preference to Blair and Rives. But as this discussion would probably be prolonged, he thought it better to take some other opportunity of considering it; and he therefore moved to lay the whole subject on the table.

Mr. ROBERTSON asked for the yeas and nays, but the House refused to order them, and the motion to lay on the table was agreed to without a division.

Mr. GRAVES then offered the following resolution:

*Resolved*, That the Clerk of this House be directed to contract with Thomas Allen to do the printing of this House until a printer is elected, provided that the contract can be made upon terms as favorable to the Government as those upon which similar services were performed during the last Congress.

Mr. GRAVES said he proposed to submit but a remark or two as to the reason which had induced him to submit this resolution.

We have employed the greater portion of two days in a fruitless attempt to elect a printer. We

have balloted eight times unsuccessfully, and without any certain prospect of procuring a majority of all the members present to unite on any one of the three candidates for whom we have been thus far balloting, as long as all continue to be voted for. Now, inasmuch as the sense of the House has been taken upon the resolution of a gentleman from New York, (Mr. Taylor,) that the editors of the Globe should be employed by the House to do the printing until an election could be made, and as a majority could not be procured in favor of that resolution, although Mr. Allen is not my first choice, as I think a majority can be more likely united on him, I have offered this resolution. If it should fail, one can then be offered in favor of the editors of the *Intelligencer*, so as to have expressed the sense of the House as to each of the three prominent candidates.

Mr. PATTON moved to lay the resolution on the table; whereupon,

Mr. GHOLSON asked for the yeas and nays.

Mr. LEGARE hoped the gentleman would withdraw the proposition, and was proceeding in his remarks; when,

Mr. PATTON rose to a question of order, that the motion to lay on the table was not a debatable one.

Mr. WILLIAMS of Kentucky, submitted to the Chair, whether the resolution itself was in order, since it interposed between the ballot for public printer.

The CHAIR ruled that it was in accordance with the decisions of yesterday.

The House then, by tellers, refused to order the yeas and nays.

Mr. GRAVES said that, perceiving that the resolution which he had submitted is not acceptable to the House, he had arisen with a view of withdrawing it. But before he did so, he begged leave to say a word in reply to the remark of the gentleman from South Carolina, (Mr. Legare,) who said that he disclaimed any desire on the part of the friends of Mr. Allen, that this resolution should be adopted. Which is, that he did not act in reference to the wishes of the friends of Mr. Allen, or of any other editor, in submitting his resolution, but solely with a view of subserving the public good. [Here the Speaker called Mr. Graves to order, and remarked it was out of order to submit any remarks pending a motion to lay upon the table.] Mr. Graves then said he was fully apprized that his remarks, like those of the gentleman from South Carolina, were not strictly in order. But as the Chair did not interpose until a question was regularly made by a member, in the case of that gentleman, he was somewhat surprised at its remarkable pertinacity in the case of himself, when but a remark had been made. Mr. G. then withdrew the resolution.

The House then proceeded to a ninth ballot for printer, and the result being announced, was as follows:

Whole number of votes	-	-	223
Necessary to a choice	-	-	115
For Blair and Rives	-	-	104
Gales and Seaton	-	-	48
Thomas Allen	-	-	70
Blanks	-	-	3
Scattering	-	-	3

Mr. HOWARD then submitted the following resolution:

*Resolved*, That the further balloting for a printer, under the resolution of Tuesday last, be suspended until the third Monday of September inst. and that temporarily, and until said third Monday in September, the printer to the last House of Representatives be employed to execute the printing of the House upon the same terms and conditions that were agreed upon at the last Congress.

Mr. RENCHER inquired if this resolution was in order. It appeared to him, that it was of a character similar to one offered on a former occasion.

Mr. HOWARD remarked that his resolution was a mere temporary expedient, whereas the resolution of yesterday might have run through the whole session. Mr. H. said that the reason why he offered the resolution was, that he considered that we had spent time enough in this preparatory

stage of our proceedings in a fruitless effort to elect a public printer.

Mr. BRIGGS rose to a point of order. He had understood the Chair on yesterday to decide a resolution similar to the one now before the House out of order; because it was on a different subject from the one immediately before the House. If so, the resolution of the gentleman could not be in order.

The CHAIR stated that the resolution decided to be out of order on yesterday, did not propose to suspend the balloting which was then progressing, whereas the present resolution did propose a suspension of further balloting.

Mr. HOWARD proceeded. We had spent time enough in this fruitless effort in his opinion, and the pressure of the public business would not permit us further to progress in this matter to the waste of the time of the House. We have already ordered 20,000 copies of the message to be printed for the purpose of being disseminated among the people, so that we might learn some expression of opinion from them on the subject. The people expect us to send out this message to them, and it is but proper that we should gratify the public expectation. He knew gentlemen would say that the message would be published in the newspapers of the country; but that was no reason why we should not send out speedily the messages we had ordered to be printed; besides there were many places where newspapers were not printed which required our attention. We are told in the message of the President that, by the first day of October, there will be many matters of importance to claim our attention. The instalments due the States come due by that time, and, if they are to be paid, it will be necessary to provide means of paying the instalments. The merchants' bonds also become due at that time, and it will be necessary to have some action on the subject. If they are to be extended further, it is time that the subject was taken into consideration. The law in relation to the funds to be distributed to the States must either be repealed, or the means provided of making the payments, as it is out of the power of the Treasury Department to meet the payments. We have now but three weeks to organize the House, appoint committees, digest a plan for meeting the emergency in which we have been placed, and adopt it. As this duty was to be performed, it was time we were proceeding with it. If the deposit law is enforced, we are told that the Treasury will be short some six millions of dollars. It, therefore, behooves us to go to work instantly, with a view of meeting the case. He considered that they had no more time to lose in ballotings, and he considered that his resolution proposed a plan by which we could proceed with our business, appoint our committees, and have something done by the first of October. From the position in which they had been placed, he felt it incumbent upon himself to submit the resolution before the House, and he hoped it would be adopted.

Mr. PATTON said that the majority of the House, not the party majority, had determined to proceed to the execution of the order of yesterday, in relation to the election of a printer by ballot. They had manifested this determination in a great variety of forms; and it was useless to endeavor to prevent them from carrying out this determination. It had been asserted on yesterday, in a tone of menace, that it was desired to let the country see who it was that was wasting the time of the House in this scuffle for public printer. The country will now see it. This motion comes from the friends of that candidate which the majority of the House have determined not to elect. Why was it that these motions are pressed upon us, when it is known that they can have no other effect than to delay the business of the House? It struck him as very curious, that the more near we come to effecting an election, the more ready certain gentlemen are to assert that the effort will be fruitless. He thought he saw in the last two or three ballotings that the matter was likely to be brought to a speedy termination; and he hoped gentlemen would forbear in their efforts to keep off an election. He concluded by moving to lay the resolution on the table.

Mr. HARRISON called for the yeas and nays,

which were ordered, and were—yeas 116, nays 107, as follows:

**YEAS**—Messrs. Adams, Ayckrigg, Alexander, Heman Allen, John W. Allen, Bell, Biddle, Bond, Borden, Bouldin, Briggs, William B. Calhoun, John Calhoun, William B. Campbell, John Campbell, William B. Carter, Casey, Chambers, Clowney, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, Evans, Everett, Ewing, R. Fletcher, Flinnore, Rice Garland, Goode, James Graham, William Graham, Grantland, Graves, Grennell, Griffin, Hall, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Herod, Hoffman, Hopkins, Robert T. H. Hunter, Jennifer, Henry Johnson, William Cost Johnson, Legare, Lincoln, Andrew Loomis, Mallory, Marvin, Samson Mason, Maury, May, Maxwell, McKennan, Menifee, Mercer, Milligan, C. Morris, Naylor, Noyes, Ogle, Patterson, Patton, Pearce, Peck, Phillips, Pickens, Plumer, Pope, Potts, Rariden, Randolph, Reed, Rencher, Rhett, Ridgeway, Rives, Robertson, Ramsey, Russell, Sawyer, Sergeant, Augustine H. Shepperd, Charles Shepard, Sibley, Slade, Snyder, Southgate, Stanley, Stewart, Stratton, Tallaferro, Thompson, Tillinghast, Toland, Underwood, John White, Elisha Whittlesey, Lewis Williams, Sherard Williams, Christopher H. Williams, Wise, and Yorks—116.

**NAYS**—Messrs. Anderson, Andrews, Atherton, Beatty, Beltrio, Bicknell, Birdsall, Boon, Brothhead, Branson, Bruyn, Buchanan, Bynum, Cambreleng, Timothy Carter, Chapman, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Cushman, Daves, DeGraff, Dromgoole, Duncan, Edwards, Farrington, Fairfield, Isaac Fletcher, Foster, Fry, Gallup, Gholson, Glascock, Grant, Gray, Haley, Hammond, Hamor, Harrison, Hawkins, Haynes, Holsey, Holt, Howard, Hubley, William H. Hunter, Ingham, T. B. Jackson, J. Jackson, J. Johnson, N. Jones, John W. Jones, Kemble, Kingsmith, Leadbetter, Logan, Applehead, Loomis, James M. Mason, Martin, McKay, Robert McClellan, Abraham McClellan, McCulloch, McKim, Miller, Montgomery, Moore, Moran, Samuel W. Morris, Muhlenberg, Murray, Noble, Owens, Palmer, Parker, Parmeter, Paynter, Pennyacker, Petrakis, Phelps, Potter, Pratt, Prentiss, Reilly, Shaffer, Shipley, Smith, Spencer, Taylor, Thomas, Titus, Toucey, Towens, Turney, Vail, Vandever, Wagener, Webster, Weeks, Thomas T. Whittlesey, Jared W. Williams, and Worthington—107.

So the resolution was laid on the table.

Mr. HARRISON of Missouri then submitted the following resolution:

*Resolved*, That for the purpose of putting an end to further ineffectual ballotings for printer to the House, in future ballotings, the persons receiving the fewest number of votes upon a count shall be dropped, and the balloting shall be continued between the two receiving the highest number of votes.

Mr. McKAY called the attention of the House to the fact, that they had not proceeded in accordance with the resolution of 1819; and even if we had, that resolution was believed by a good number of gentlemen to be unconstitutional, and not binding upon them. If, then, it was not binding upon them, the inquiry might arise whether Blair and Rives, having received a plurality of votes, were not elected. In proof of this, he alluded to the case in the Senate in 1829, in which a resolution was adopted declaring Duff Green printer of the Senate when he had received but a plurality of votes. Taking this as a precedent, he would inquire whether it was not in the power of the House to declare Blair and Rives printers to the House. He would not go into this subject, but merely threw out these suggestions for the consideration of gentlemen.

Mr. PATTON would be glad to have a vote by yeas and nays on the proposition, whether Blair and Rives were elected printers, as he should like to know how the democratic republicans would stand on this question; but as the question could not now be made, he would move to lay the resolution of the gentleman from Missouri on the table.

Mr. HARRISON called for the yeas and nays, which were not ordered, and the motion to lay on the table was agreed to.

The House then proceeded with a tenth ballot, the result of which was declared to be as follows:

Whole number of votes	-	-	229
Necessary to a choice	-	-	115
For Blair and Rives	-	-	105
Gales and Seaton	-	-	21
Thomas Allen	-	-	99
Scattering	-	-	2
Blanks	-	-	2

There still being no choice, the House proceeded to ballot for the eleventh time, the result of which was announced as follows:

Whole number of votes	-	-	225
Necessary to a choice	-	-	113
For Blair and Rives	-	-	102
Gales and Seaton	-	-	8
Thomas Allen	-	-	111
Scattering	-	-	2

Blanks - - - - - 2  
No choice having been yet made, the House balloted for the twelfth time, of which the issue was as follows:

Whole number of votes	-	-	225
Necessary to a choice	-	-	113
For Blair and Rives	-	-	101
Gales and Seaton	-	-	9
Thomas Allen	-	-	113
Scattering	-	-	1
Blanks	-	-	1

Whereupon Thomas Allen was declared duly elected printer to the House for the 25th Congress.

On motion of Mr. WHITTLESEY of Ohio the House took up the resolution submitted on Monday last by Mr. MERCER, proposing to adopt the rules and orders of the last House of Representatives, with the exception of those relating to the appointment and duties of the Committee on Elections, the reference of which he moved to a select committee.

The question pending, was the amendment of Mr. ADAMS to refer the whole subject, together with the report of the select committee of the last Congress thereon, to a select committee.

Mr. ADAMS having withdrawn his amendment, Mr. BELL suggested the propriety of referring the whole subject generally to a committee, to report at some future day, either on the first Monday in October, or the first Monday of December next, the House acting in the mean time, under the old rules.

After some remarks from Messrs. MERCER and PATTON, Mr. ADAMS withdrew his proposition.

Mr. GRAHAM then submitted an amendment proposing to adopt the rules of the last House of Representatives for ten days, and submitting said rules to a special committee to revise and report thereon in ten days.

After some remarks from Messrs. SMITH of Maine, WHITTLESEY of Ohio, CAMBRELENG, BELL, and UNDERWOOD,

Mr. MERCER modified his resolution, by referring the subject of the rules to a special committee, to be reported upon in ten days, and that the rules of the last House of Representatives, with the exception of that in relation to the Committee of Elections, be adopted for the government of the House for the ensuing ten days.

Mr. HAMER then moved to strike out all after the word resolved, and insert an amendment that the rules and orders of the last House of Representatives, excepting the 10th rule, be adopted for the government of the House until Friday, the 15th instant; and that a special committee be appointed to prepare and report rules for the government of the House.

After some remarks from Messrs. HAMER and MERCER, the amendment was disagreed to—ayes 86, noes 89.

Mr. HAMER then moved to amend, by striking out that part in relation to the Committee of Elections, and insert "except the one hundred and seventh rule."

Mr. H. subsequently, at the request of Mr. CAMBRELENG, modified his motion by moving to strike out the exception in relation to the Committee of Elections; which motion was agreed to—ayes 100, noes not counted.

After some remarks by Messrs. POPE and MERCER, the resolution was adopted.

On motion of Mr. WHITTLESEY of Ohio,  
*Ordered*, That the several standing committees be now appointed, according to the rules and orders of the House.

Mr. BIDDLE then submitted the following resolution, which by the rule lies over one day.

*Resolved*, That the Secretary of the Treasury report to this House, whether a letter purporting to be addressed by him to the Clerk of the House, offering payment in specie to members of Congress, is authentic; if so, to what other claimants on the Treasury, a similar offer has been made, and what principle of discrimination, if any, has been adopted in the medium of payment to the public creditors.

On motion,

The House then adjourned.

## IN SENATE.

FRIDAY, September 8, 1837.

The CHAIR announced the appointment of the following standing committees:

*On Foreign Relations*—Messrs. Buchanan, Tallmadge, King of Georgia, Clay of Kentucky, and Rives.

*On Finance*—Messrs. Wright, Webster, Nicholas, Benton, and Hubbard.

*On Commerce*—Messrs. King of Ala. Davis, Brown, Ruggles, and Norvell.

*On Manufactures*—Messrs. Niles, Buchanan, Preston, Strange, and Pierce.

*On Agriculture*—Messrs. Smith of Conn. Spence, Linn, McKean, and Black.

*On Military Affairs*—Messrs. Benton, Preston, Tipton, Wall, and Allen.

*On Militia*—Messrs. Wall, Swift, Clay of Ala. Mouton, and Smith of Indiana.

*On Naval Affairs*—Messrs. Rives, Southard, Tallmadge, Cuthbert, and Williams.

*On Public Lands*—Messrs. Walker, Fulton, Clay of Alabama, Roane, and Prentiss.

*On Private Land Claims*—Messrs. Linn, Sevier, Bayard, Mouton, and Lyon.

*On Indian Affairs*—Messrs. White, Sevier, Tipton, Lian, and Swift.

*On Claims*—Messrs. Hubbard, Tipton, Crittenden, Strange, and Young.

*On the Judiciary*—Messrs. Grundy, Morris, King of Georgia, Wall, and Clayton.

*On Post Offices and Post Roads*—Messrs. Robinson, Grundy, Knight, Brown, and Niles.

*On Roads and Canals*—Messrs. Tipton, McKean, Nicholas, Young and Williams.

*On Pensions*—Messrs. Morris, Sevier, Prentiss, Pierce and Roane.

*On Revolutionary Claims*—Messrs. Brown, White, Crittenden, Norvell and Smith of Con.

*On the District of Columbia*—Messrs. Kent, King of Alabama, Nicholas, Roane and Allen.

*On Patents and Patent Office*—Messrs. Ruggles, Strange, Bayard, Prentiss and Robinson.

*On Contingent Expenses of the Senate*—Messrs. McKean, Tallmadge, and Black.

*On Engrossed Bills*—Messrs. Clay of Alabama, Smith of Indiana, and Norvell.

*On Enrolled Bills*—Messrs. Smith of Connecticut, Lyon, and Allen.

On motion of Mr. WRIGHT, so much of the President's message as relates to the subject of Finance, as also of the report of the Secretary of the Treasury, was referred to the Committee on Finance.

On motion of Mr. GRUNDY, so much of the message as relates to the Judiciary, was referred to the Committee on the Judiciary, as was also so much of the report of the Secretary of the Treasury as relates to that subject.

Mr. GRUNDY moved that when the Senate adjourn it adjourn till Monday next; which was agreed to.

Mr. NICHOLAS presented a memorial from the Chamber of Commerce, New Orleans, praying the establishment of a national bank; which was referred to the Committee on Commerce, and ordered to be printed.

Mr. GRUNDY presented a memorial from Mr. Teakle, a Senator in the Legislature of Maryland, giving his views generally, on the subject of finance; which was referred to the Committee on Finance, and ordered to be printed.

On motion of Mr. HUBBARD, the Senate went into the consideration of Executive business; and when the doors were opened,

Mr. WHITE announced the death of the Hon. J. STANDEFER, a member elect of the House of Representatives. Mr. W. then offered the following resolutions:

*Resolved, unanimously*, That as a testimony of respect for the memory of the Hon. JAS. STANDEFER, late a member elect of the House of Representatives from the State of Tennessee, the Senate will go into mourning, by wearing crape on the left arm for thirty days.

*Resolved unanimously*, That as an additional mark of respect to the memory of the deceased, the Senate do now adjourn.

The resolutions having been unanimously adopted, The Senate adjourned.

# CONGRESSIONAL GLOBE.

25TH CONG.....1ST SESS.

MONDAY, SEPTEMBER 18, 1837.

VOLUME 5.....No. 2.

BY BLAIR & RIVES.

—WEEKLY—

PRICE \$2, FIRST TWO SESSIONS.

## HOUSE OF REPRESENTATIVES.

FRIDAY, September 8, 1837.

After the reading of the journal—

On motion of Mr. HAYNES, it was resolved that when this House adjourns it will adjourn to meet on Monday next.

Mr. ROBERTSON of Virginia laid upon the table the following amendment to be proposed to the resolution submitted on yesterday by Mr. BIDDLE, which was ordered to be printed:

"Also, that he report, so far as ascertained, the amount of specie received by the Government since the first day of May last; the source from whence derived, and the amount from each; the regulations under which the same, or any part thereof, has been disbursed; the persons to whom paid, and the sums paid to each; the amount now on hand, and where deposited. Also, whether since the date above, the public dues, or any portion thereof, have been received in protested drafts, or any funds other than those prescribed by the joint resolution of 30th April, 1816."

Mr. BELL in announcing to the House the death of his colleague, the Hon. JAMES STANDEFER, said:

Mr. SPEAKER: The melancholy duty has been assigned me, by my colleagues, of announcing to the House the death of one of our number.

JAMES STANDEFER, while on his journey to this place, in order to enter upon his duties as a member of this House, was, on the 20th of last month, suddenly arrested by the hand of the great destroyer of human existence. By this unexpected event, the country is deprived, at a period of more than common interest and difficulty, of the services of a most devoted and patriotic public servant, and this House of an honest and worthy member. My late colleague was remarkable for an equanimity of temper, and a kindness of feeling, combined with a justness of perception in all the concerns of life, at least of ordinary occurrence, which, without the advantages of early culture, or of books, at any time, procured for him throughout a life, which was not short, the respect and esteem of numerous friends, and raised him to the rank of a useful and meritorious citizen. The same qualities of heart and of mind, aided by a reputation for honesty which he nobly earned, and continued to maintain by the most scrupulous regard for truth and justice in all his transactions, public and private, caused him to be repeatedly chosen to the Legislature of his own State—of which body he was a useful and respected member. He was, for many years, a member of this, and I am sure that his quiet and unobtrusive manners—his punctual discharge of all the duties assigned him, in the organization of the House, must have secured the respect of his associates. To these evidences of his worth, I might add, that in the late war with Great Britain, he approved himself an intrepid soldier. He was, above most men I have known, who have risen in any degree into public view, under similar circumstances, free from the pride and vanity of mere station; never anxious to appear what he was not; content to be classed with the useful and faithful, he made no pretensions, had no aspirations, beyond his real deserts. If, therefore, my lamented colleague cannot be said to have possessed any of those shining endowments which are required to make a figure in this House, which strike our fancy, or command our admiration, he might still justly lay claim to other and humbler attributes, which, upon the whole, constitute a character of solid merit, and often one of more enduring fame; and that the due and used tribute of respect be paid to his memory, by this House, I move you, sir, the resolution which I hold in my hand.

*Resolved*, That as a testimony of respect for the memory of the deceased, the members of this House will go into mourning by wearing crape on the left arm for thirty days.

*Resolved*, That as a testimony of respect for the

memory of the deceased, the members of this House will go into mourning by wearing crape on the left arm for thirty days.

On motion of Mr. BELL,  
The House then adjourned.

## IN SENATE,

MONDAY, September 11, 1837.

In pursuance of the forty-ninth rule, the Senate proceeded to ballot for Secretary, when ASBURY DICKINS, Esq. received thirty-nine votes out of the forty Senators present, and was declared duly elected, and was sworn in.

The Senate next proceeded to ballot for Chaplain, when there appeared for

	1st	2d	3d	4th
The Rev. Mr. Slicer,	9	12	17	23
Bolls,	8	7	7	4
Tuston,	8	11	13	16
Goodman,	5	2		
McCallam,	5	2	1	
Pinckney,	3	5	3	1
Noble,	1			
Ebaugh,	1	2	3	
Dempster,	1			
Fowler,	1	1		
Blank,	1	1		

The Rev. Mr. SLICER was declared duly elected.

Mr. WRIGHT, from the Committee on Finance, arose and stated that the committee not being able, for want of time, to report at large, had reported only a bill. The following is the bill:

A BILL to postpone the fourth instalment of deposits with the States.

*Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled*, That the transfer of the fourth instalment of deposits directed to be made with the States under the thirteenth section of the act of June 23d, 1836, be, and the same is hereby, postponed until further provision by law.

Mr. WRIGHT expressed his hope that the committee would be able to-morrow to report further.

Mr. CALHOUN hoped that the bill would not be pressed upon the Senate immediately. He thought it due to the body and to the occasion to say that whatever views the committee might entertain, that they should all be laid before us before we acted on this important subject. However disconnected in their nature they might be, still they had all grown out of a common calamity, and were all so intimately connected, that we could not act well on one part of the subject, without having the other before us. He therefore hoped that the bill would not be acted upon until the committee should have reported all their views.

Mr. WEBSTER said that there might be some weight in the suggestion of the honorable Senator from South Carolina. As to how far he might find it necessary to make that request of the Senate, after the lapse of a day or two, he might be able to judge. He, (Mr. W.) supposed it very probable that the Senate would have all the information before them by that time. He had risen to express his sincere hope, that whether the subjects should be acted upon successively, as they might be reported, or whether they should be considered together, they might be considered, disposed of, and decided upon with all the promptness which was consistent with considerate legislation. He had not given his concurrence with the committee in this report, for he did not esteem this measure as one suited to the exigency of the Government or the condition of the country. He feared that he should find himself equally unable to concur in most of the other measures which the President had recommended to Congress, and which are sanctioned in the report of the Secretary of the Treasury. But measures, introduced here upon the recommendation of the President, or otherwise, for the purpose of meeting the exigency of the Government and the wide-spread distress of the

country, would receive no hindrance, obstruction, or delay from him, (Mr. W.) He would content himself with a short statement of his judgment upon them, as they should come before us, and he would leave them in the hands of those majorities in both Houses, known to be favorable to the existing administration. He beseeched those majorities, that as soon as they could make up their own judgment as to these measures, they would pronounce it in the form of law. They had the power; they had the responsibility. For one, he should do nothing to obstruct the prompt exercise of that power—nothing to diminish the just exercise of that responsibility. Connected with the commercial interest, and as a resident of a commercial place—connected with the manufacturing interest, with a State deeply interested in manufactures—with some knowledge, certainly not beyond that ordinarily possessed by others, he thought he saw a pressure upon the labor, the industry, and the business of the country, which called loudly for immediate relief; and he saw a condition of things connected with this, no matter what had given rise to it, which demanded from the Government the efficient and prompt interposition of Congress. He hoped that the earliest consideration would be given to the measure, and that if it should not pass the Senate, another might be proposed, and if it should go to the other branch, would receive their sanction and support. If it should be deemed necessary that the other measures, with this, should be presented to the consideration of the Senate together, and which were calculated to relieve the community, he trusted that the chairman of the Committee of Finance would present them at a very early day, so that they might be acted upon immediately.

Mr. CALHOUN fully concurred with the Senator from Massachusetts, that it was due to the country that there should be a full and early consideration of the measures of relief to be proposed. But it was highly important that the whole ground should be presented, so that each measure might be discussed not only upon its particular merits, but upon the general merits of the plan.

The bill was then read a first time, and ordered to a second reading.

Mr. LINN offered the following resolution:

*Resolved*, That the Joint Library Committee be instructed to inquire into the expediency of causing the manuscripts of the late James Madison, deposited in the Department of State, to be published.

Mr. BENTON presented three petitions and memorials from the Chamber of Commerce, St. Louis, praying the incorporation of a national bank; which was referred to the Committee on Finance, and ordered to be printed.

Mr. BLACK presented a memorial from Carroll county, Mississippi, praying the establishment of a national bank; which was referred to the Committee on Finance, and ordered to be printed.

Mr. ALLEN presented three petitions from the citizens of Columbiana county, Ohio, against the charter of any national bank, and advising a disconnection of the Government from the banks, and praying the adoption of measures so as to enable the Government to receive its revenues exclusively in metal; which were referred to the Committee on Finance, and ordered to be printed.

Mr. RUGGLES presented the petition of John H. Hall, of Harper's Ferry, praying to be remunerated for labor done, and expenses incurred by him in making sundry improvements in certain fire-arms; which was referred, with the accompanying documents, to the Committee on Military Affairs.

Mr. HUBBARD presented a petition from John Collins Long; also, from E. Ridgeway, and Nathaniel Harrison; which he moved to have referred to the Committee on Naval Affairs.

Mr. CALHOUN hoped that all the ordinary business would be laid on the table. He trusted that

the course would be pursued in regard to these petitions.

Mr. HUBBARD was of opinion that the petitions might as well take the usual course, and be referred to the appropriate committees. He did not think that any delay would grow out of such proceedings.

Mr. BUCHANAN entirely concurred in the sentiments expressed by the Senator from Massachusetts and the Senator from South Carolina, in regard to the course the business should take during the present session. He believed it was not expected by the country; and he thought it would be very inconvenient for the members of this and the other House to continue in session until the regular period for the meeting of Congress. If Senators presented petitions on ordinary subjects, and moved to have them referred to a committee, it would be taken as conclusive evidence that we intended to proceed with the dispatch of the ordinary business. And, should we commence at all, we probably would be kept here until next May or June. His (Mr. B's) opinion was that the Senate should confine its present labors to the relief of the country, and postpone the ordinary business until the next session. In order to try what was the sense of the Senate, he would move to lay the petitions on the table, if the Senator from South Carolina did not insist on his motion.

Mr. HUBBARD said that he was certainly aware of the importance of the business we were met to transact; and he was sorry to interpose any thing that should have the effect of preventing the immediate consideration of the measures for the relief of the country. And, if it was understood that private memorials should be laid on the table, he would interpose no objection whatever.

The memorials were then laid on the table.

Mr. CLAY of Alabama submitted the following:  
*Resolved*, That the Committee on the Judiciary be instructed to inquire into the expediency of restoring to the District Court of the United States for the northern district of Alabama, its former jurisdiction.

Mr. KING of Alabama submitted the following:  
*Resolved*, That the Committee on the Judiciary be instructed to inquire into the expediency of altering the time of holding the courts of the United States in the ninth judicial district.

On motion of Mr. PRESTON,  
The Senate adjourned.

## HOUSE OF REPRESENTATIVES.

MONDAY, September 11th, 1837.

The following members appeared, and were qualified:

The Hon. Mr. CRARY, of Michigan.

The Hon. Mr. YELL, of Arkansas.

The Hon. Mr. LEWIS, of Alabama.

The Hon. Mr. CHEATHAM, of Tennessee.

The following Standing Committees were announced as having been appointed by the Chair, under the resolution to that effect on Friday last.

*Elections*.—Messrs. Buchanan, Griffin, Hawkins, Kilgore, Maury, Townes, Bronson, Pennybacker, and Hastings.

*Ways and Means*.—Messrs. Cambreleng, McKim, Owens, Sergeant, Hamer, Jones of Virginia, Fletcher of Massachusetts, Atherton, and Rhett.

*Claims*.—Messrs. Whittelsey of Ohio, Grennell, Chambers, Darlington, Graham of N. C. Russell, Campbell of Tennessee, Clarke, and Carter of Maine.

*Commerce*.—Messrs. Smith, Phillips, Johnston of Louisiana, Cushman, De Graff, Legare, Toland, Curtis, and Mason of Virginia.

*Public Lands*.—Messrs. Boon, Williams of N. C. Lincoln, Casey, Chapman, Harrison, Anderson, Duncan, and Turney.

*Post Offices and Post Roads*.—Messrs. Connor, Briggs, Hall, Cleveland, Hopkins, Hubley, Calhoun of Kentucky, Palmer, and Worthington.

*District of Columbia*.—Messrs. Bouldin, A. H. Sheppard, Jenifer, Dawson, Cilley, Prentiss, Biene, C. H. Williams of Tennessee, and Hunter of Ohio.

*Judiciary*.—Messrs. Thomas, Robertson, Toucey,

Martin, Corwin, Bynum, Garland of Virginia, Hoffman, and Potter.

*Revolutionary Claims*.—Messrs. Muhlenberg, Craig, Underwood, Taliaferro, Ellmore, Foster, Parmenter, Harper of Ohio, and Birdsall.

*Public Expenditures*.—Messrs. Haley, Ogle, Alexander, Titus, Stratton, Rumsey, Fletcher of Vermont, Crockett and Patterson.

*Private Land Claims*.—Messrs. May, Garland of Louisiana, Calhoun of Massachusetts, Harlan, Bruyn, Mallory, Beatty, Rariden and Leadbetter.

*Manufactures*.—Messrs. Adams, Webster, Whittelsey of Connecticut, Holsey, Slade, Biddle, Tillinghast, Vail, Naylor.

*Agriculture*.—Messrs. Deberry, Logan, Phelps, Weeks, Spencer, Noyes, Davies, Randolph, and Mitchell.

*Indian Affairs*.—Messrs. Bell, Everett, Haynes, Chaney, Montgomery, Parker, Campbell, of South Carolina, Murray, and S. W. Morris.

*Military Affairs*.—Messrs. McKay, Coles, Glascock, Thompson, Gholson, Miller, Rives, Kemble, and McClellan, of Tennessee.

*Militia*.—Messrs. Glascock, Wagener, Carter of Tennessee, Holt, Hammond, Pratt, Hunter of Virginia, Halstead, and Allen of Ohio.

*Naval Affairs*.—Messrs. Ingham, Milligan, Read, Wise, Grantland, Moore, Richardson, Paynter, and Williams of New Hampshire.

*Foreign Affairs*.—Messrs. Howard, Hamer, Cushing, Jackson of Georgia, Dromgoole, Rencher, Pope, Claiborne, and Fairfield.

*Territories*.—Messrs. Patton, Potts, Pickens, Pearce, Borden, Graves, Davee, Jones of New York, and Farrington.

*Revolutionary Pensions*.—Messrs. Morgan, Klingsmith, Bond, Fry, Johnson of Virginia, Sibley, Ewing, Gray, and Loomis of Ohio.

*Invalid Pensions*.—Messrs. Taylor, Williams of Kentucky, Allen of Vermont, McClellan of New York, Petriten, Stuart, Herod, Reily, and Stanley.

*Roads and Canals*.—Messrs. Mercer, Evans, McKennan, Snyder, White of Kentucky, Filmore, Johnson of Maryland, Bicknell, and White of Indiana.

*Revisal of Unfinished Business*.—Messrs. Mason of Ohio, Noble, Southgate, Henry, and Peck.

*Accounts*.—Messrs. Johnson of Virginia, Grant, McClure, C. Shepard of North Carolina, and Johnston of Maryland.

*Expenditures of the Department of State*.—Messrs. M. Morris of Pennsylvania, Jackson of New York, Shepler, York, and Andrews.

*Expenditures of the Department of the Treasury*.—Messrs. Allen of Vermont, Sheffer, Ayer, Gray, and Holsey.

*Expenditures of the War Department*.—Messrs. Clowney, Vandever, Holt, Morris of Ohio, and Marvin.

*Expenditures of the Navy Department*.—Messrs. Brodhead, Maxwell, Goode, Edwards, and Graham of Indiana.

*Expenditures of the Post Office Department*.—Messrs. Childs, Dennis, Hawes, Gallup, and Plummer.

*Expenditures of the Public Buildings*.—Messrs. Sawyer, Crauston, Menifee, Dunn, and Ridgeway. The House then took up for consideration the following resolution, submitted by Mr. BIDDLE on Thursday last:

*Resolved*, That the Secretary of the Treasury report to this House, whether a letter purporting to be addressed by him to the Clerk of the House, offering payment in specie to members of Congress, is authentic; if so, to what other claimants on the Treasury, a similar offer has been made, and what principle of discrimination, if any, has been adopted in the medium of payment to the public creditors.

Mr. BIDDLE said that the letter of the Secretary of the Treasury to the Clerk of this House, on the subject alluded to in his resolution, had struck him as objectionable, and he had, therefore, taken the opportunity of calling the attention of the House to it at the earliest moment. If the offer contained in that letter was a mere matter of grace on the part of the Secretary, and rested in his discretion to be given and withheld at pleasure, it may be given to a portion of the members of the House, and withheld from another portion of the members of the House; or it may be withdrawn entirely

from members of Congress, and given to some other officers of the Government, or public creditors. It may be withdrawn from us, and given to some other person whom it might be proper to reward. It may be given to judges of courts, thereby increasing their salary by his mere fiat. It might have been given to the judges of the court in the District of Columbia while the mandamus case was pending, and thus will it be in the power of the Secretary of the Treasury to raise or diminish the salary of any public officer at will. He did not consider it proper, and consistent with the safety of the country, that the position of officers of the Government should be thus precarious. He was, however, disposed to look on this matter in another light. We have been called upon to inquire into the state of the currency of the country, and are supposed to come fresh from the people, having a knowledge of all the evils and distresses which they are suffering. At home, and on our way here, we have seen and felt the evils under which the people have labored. At every step of our journey we have seen the difficulty arising from the exchanging the miserable scrolls and tickets which are in circulation as a currency. Why was it then that this boon is held out to us immediately on our arrival here? Is it not calculated to efface from our minds the impressions which had been made upon them before we arrived in this city? Does it not at once convert us into a favored class, and remove us from all the evils which are oppressing our constituents, and bowing them down to the earth. He would ask whether those members of Congress who closed with the Secretary of the Treasury in this matter, had not a direct pecuniary interest in perpetuating a depreciated currency? The specie which we may receive may be sold for a large premium for paper which will meet all our engagements here, as we are not under the necessity of keeping specie to pay our postage. The premium, in some instances, on the specie which members receive for a week's salary will be sufficient to defray their expenses for the week. This is, to be sure, an exclusive specie currency. It is given to us, and we sell it to the brokers, and the people have to buy it to pay their postages and custom-house bonds. The members of Congress and the brokers receive all the benefits to be derived from it, and the people are taxed, and have the mere handling of it in carrying it from the brokers' office to the post-office or custom-house. But this state of things will cease the moment that specie payments are resumed, and therefore it will be the interest of members of Congress to support every scheme which would have a tendency to retard the resumption of specie payments by the banks. He believed this to be a matter of great importance. It was not connected with any party movement. He appealed to higher interests and higher feelings. At the time the law passed commonly called the compensation law, those who gave warning as to the effects it was to produce throughout the country, were looked upon as over-scrupulous; but no one has forgotten the storm which that law raised throughout the country. If a member of Congress was to introduce a proposition similar to the measure adopted by the Secretary of the Treasury, he would not dare to stand up before his constituents in vindication of his conduct. He would at once be declared as unworthy of the confidence of the people, and would be hurled from his situation. Why then should we receive secretly, through the agency of the Secretary of the Treasury, that which we dare not demand openly? The laborers on the public works, who toil and sweat through the whole day, and receive but about one-sixteenth part of our per diem, is paid in paper of some ten per cent. less value than the funds we receive, the public contractor is paid in paper, and the widow and the orphan of those who fell in battle are paid in the same depreciated currency. It was but the other day that an officer from Florida found himself in this city with paper so worthless, that he could scarcely sell all he had for enough of specie to pay the postage on letters which he received through the post office. How then can the Secretary offer us, who have no postage to pay, specie when it is withheld from the officers of your army? On what principle of honesty

or common decency can the Secretary make this discrimination? He had submitted the resolution for the purpose of obtaining information for his own guidance. If the offer made by the Secretary of the Treasury is a mere matter of grace, or a boon which he might give or withhold, he would now say that he would not receive it, as he had no idea of carrying home bags of gold derived in this way. He knew too well what his constituents suffered, and were suffering, and while they were thus oppressed, he could not consent to be reaping a golden harvest through the cunning and device of any executive officer. He would entreat the House to look at the position they occupied before the country. Let us so conduct ourselves as to rally around us the confidence of the people of the country, and pursue that course which is calculated to lead to a speedy termination of the difficulties under which the country is laboring. Although he could not oppose the amendment of the gentleman from Virginia, (Mr. Robertson) still he desired to have a vote taken on the simple proposition he had submitted, as it was nothing more than a plain question which he desired to have answered, for the purpose of determining his own course in relation to the matter.

Mr. ROBERTSON submitted the amendment he had before given notice of as follows:

"Also, that he report, so far as ascertained, the amount of specie received by the Government since the first day of May last; the source from whence derived, and the amount from each; the regulations under which the same, or any part thereof, has been disbursed; the persons to whom paid, and the sums paid to each; the amount now on hand, and where deposited. Also, whether since the date above, the public dues, or any portion thereof, have been received in protested drafts, or any funds other than those prescribed by the joint resolution of 30th April, 1816."

Mr. R. expressed a hope that the honorable mover of the resolution would accept the amendment.

Mr. BIDDLE assented, and the resolution was modified accordingly.

Mr. HAMER said he believed it was unusual to debate a resolution of this character, which was merely proposing an inquiry from one of the heads of the department, but some of the remarks submitted by the gentleman from Pennsylvania seemed to require some slight notice. The resolution asked, in the first place, whether a certain letter said to be written to the Clerk of this House be or be not genuine; and, secondly, whether the Secretary of the Treasury had made other offers to other claimants of the Government similar to those said to be made to members of Congress in that communication. Now, Mr. H. only meant then to say, that if the House should adopt this resolution, he had no doubt the Secretary would very promptly reply to the inquiry, and inform them whether that letter be genuine or not, and also what were his reasons for making the offer. If the letter be genuine, he would also respond to the other inquiry embraced in the resolution. But it did seem to Mr. H. that it would be but candid and fair, not only on the part of the gentleman from Pennsylvania, but of every other gentleman there, to wait for the response ere they undertook to condemn the Secretary. The gentleman seemed to take it for granted, in the remarks submitted by him, that this offer was a boon held out to members of Congress, an inducement held out to them, to perpetuate the present state of things. Now, so far as he (Mr. H.) was concerned, he had only to say, that he had a much better opinion, a much higher opinion, of the gentlemen who constituted that body, than to believe, for a moment, that the poor, paltry per centage that might be made through a broker upon the compensation they received there, would influence the course of any gentleman upon that floor; and he would add, that if he believed his constituents entertained such an opinion of him, he would resign before the going down of the sun. As to the resolution, and the amendment now engrafted upon it, he had no objection to the adoption of both, and should vote for them.

Mr. McKAY intended to vote for the adoption

of the resolution, but the gentleman from Pennsylvania had thrown out some remarks that required a brief explanation. The gentleman had stated that this offer was a mere matter of bounty, a mere matter of grace, on the part of the Secretary of the Treasury; and had even gone so far as to say that its effect would be, if its design was not, to perpetuate the present state of things in the financial affairs of the country. Now, if the gentleman had taken the trouble to look into the laws of Congress, he would have seen that what the Secretary had done was nothing more than a mere matter of official duty, and did not partake, in the slightest degree, of either a grace or a bounty. The law passed in 1836—which was the rule of the Government and all the Secretaries, the Secretary of the Treasury in particular—expressly provided that the public creditors should be paid either in gold or silver, or in that which was its equivalent and convertible into gold or silver on the spot, etc. This law applied as well to members of Congress as to any other public creditors, for they were only a class of public creditors. If the gentleman had also taken the trouble to look into the report of the Secretary of the Treasury, he would likewise have seen that in all the instructions given to the disbursing officers, they had been directed to pay out no funds except such as were equivalent to specie, or which the public creditor was willing to receive. The gentleman had told the House that the States had been paid in depreciated money. The gentleman was also mistaken in that: for the Secretary of the Treasury, in his instructions, had expressly stated what he would read. Mr. McKAY then read from the report the following passage from the Secretary's letter to the Executives of the States.

"P. S. It may be useful, in the present embarrassed condition of the pecuniary concerns of the country and of the banks, to suggest that, for reasons growing out of the deposit act, as well as the existing liabilities of the banks, and the obligations required from the States to the Treasury, no one of the latter is required to accept, on the within transfers, any kind of money which is not available and at par, and which it is not ready to account for in the same way when required."

"Should any of the banks, therefore, on which the transfers are drawn, fail to deposit with you such money, they may be returned to this Department, with a statement of the fact, in order that the case may be submitted to Congress at its approaching session."

The same had been done with regard to all other cases, of revolutionary soldiers, the widows and orphans, and all other claimants of the Government. They were not bound, unless they were willing to do so, to receive any thing but gold or silver, or its equivalent. That, he repeated, was the law of 1836; and if the debtors of the Government would do their duty, it would have been carried out in all cases. That these individuals had not done so was well known. Among other things, he had understood that some of these very merchants who had been instrumental in bringing about the suspension of specie payments, after having received indulgencies from the Government, by an extension of their bonds, had, in many instances, gone forward with their debentures, drawn out the specie upon them, and then gone and reviled that very Government, to which they were so much indebted. At New Orleans, he had understood, many of them had drawn the specie from the custom-house on their debentures, re-exported their goods, intending to reimpart them, and then get a credit on their bonds. However, he would not go further into this matter at present.

Those of them who had been there some time, would recollect that, some years ago, when the Bank of the United States was struggling for a charter, one of the charges preferred by a then gentleman from Georgia, (Mr. Clayton,) was, that it afforded extraordinary accommodations to members, by furnishing them with drafts or bills of exchange on terms different from those they extended to other creditors of the Government. What was the defence then made by the party to which the gentleman belonged? Why, that it was all right then;

but now, when the Bank of the United States was not the Treasury, and Levi Woodbury, in his imprudent letter, proposes nothing more than is warranted and enjoyed by the plain and obvious spirit and letter of the law, it is all wrong. In the former case, it was all right; now it was a matter meriting the severest censure and reprobation.

Mr. BIDDLE thought that the severest censure which could be cast upon the Secretary of the Treasury had been cast upon him by the gentleman from North Carolina himself. The gentleman had told the House that the publication of that offer was an "imprudent" thing, and therefore that the members of the House should have been apprised of the offer only as they went to receive their money. Now Mr. B. had cast no such censure upon the Secretary. On the contrary, he insisted that the act of publication was a right and proper one.

The gentleman had referred to the act of 1836. That act, however, was passed for the benefit of all the public creditors, but no similar offer had been made to any other class than members of Congress; on the contrary, the Secretary had stated his inability to pay them in specie. What Mr. B. wanted to know was, by what authority that officer took upon himself the exercise of such tremendous power as he had done in that offer.

Mr. McKAY was not disposed to prolong this discussion, though he could readily answer every thing the gentleman had said. He would, however, advert to one matter. The gentleman had said that no similar offer had been made to the States. Now, one answer to that was, that there was no debt due to the States; for, by the terms of the deposit law, it was nothing more than a transfer of the public money from one part of the Treasury, or from one depository to another; in other words, from the Federal Treasury to the Treasuries of the several States, which, for the time being, were converted into a part or branch of the Federal Treasury. It was not necessary then to go further into that part of the argument, but he would again refer the gentleman to the letter before quoted by him, in which it would be seen that the offer had been made even to the States. [See the "P. S." quoted in Mr. McKAY's foregoing remarks.]

With regard to the remark that Mr. McKAY considered the letter "imprudent," he only meant to say that it was so, so far as regarded the Secretary's reputation, from its affording an opportunity to some gentlemen to misinterpret his motives. The letter itself was not imprudent in any other sense than its being liable to misconstruction; for, he again repeated, it was in strict accordance with the law of 1836.

Mr. BIDDLE again insisted that the letter referred to in his resolution was at variance with that quoted by the gentleman from North Carolina, and also that it gave an undue preference to the members over other claimants of the Government.

The resolution, as modified, was then agreed to.

Mr. BELL, on leave, then submitted the following resolution:

*Resolved*, That the Secretary of the Treasury be directed, with as little delay as possible, to communicate to this House the amount of the appropriations of the past and present years remaining unexpended; the amount required to fulfil all existing engagements contracted prior to the first day of June last, and all existing engagements contracted since that time; also, the amount of money drawn from the Treasury and placed in the hands of disbursing officers or agents on the first day of May last and at the present time; and that he also report what objects of public expenditure can with the least injury to the public service be either wholly dispensed with during the present year, or bear any material reduction.

The resolution having been read, and the Chair remarking that, under the rule, it would have to lie over one day,

Mr. CAMBRELENG suggested to the honorable mover, that as the information called for was of a very important character, and ought to be in possession of the House with as little delay as possible, to move a suspension of the rule, so as to insure the immediate consideration of the resolution.

Mr. BELL said he was about to ask that indul-

gence of the House, and he made the motion which was assented to; when the resolution was considered and agreed to.

#### PRESIDENT'S MESSAGE.

On motion of Mr. CAMBRELENG, the message of the President to Congress was then taken up, and referred to a Committee of the Whole on the state of the Union; and on motion of the same gentleman, the House went thereon into committee, Mr. J. Q. ADAMS in the Chair.

The Message being taken up in committee—

Mr. CAMBRELENG introduced two resolutions, as follows:

1. *Resolved*, That so much of the President's Message as relates to the finances of the country, be referred to the Committee of Ways and Means.

2. *Resolved*, That so much of the President's Message as relates to a bankrupt law, be referred to the Committee on the Judiciary.

The two resolutions were severally agreed to *nem dis.*; when, on motion of Mr. CAMBRELENG, the committee rose and reported them to the House, and they were both severally concurred in.

Mr. CAMBRELENG then submitted the following resolution:

*Resolved*, That so much of the report of the Secretary of the Treasury on the state of the finances, as relates to the finances of the country, be referred to the Committee of Ways and Means; and that so much of said report as relates to a bankrupt law be referred to the Committee on the Judiciary.

Mr. EWING made an inquiry of the chairman of the Committee of Ways and Means, whether his motion had any reference to, or was intended to embrace, any proposition for the relief of the merchants, and the extension of their bonds.

Mr. CAMBRELENG replied by stating that the terms he had used in his motion embraced every topic relating to the public finances, and, of course, necessarily and directly involved the question of extending the time of payment of the merchants' bonds. It embraced all the various topics connected with the subject of relief, and it was certainly not Mr. C's intention to suffer so important a proposition as that to escape his attention. He thought it not improbable that the gentleman's views and his own would concur; but he would confine himself then by replying to the gentleman, that it was the design of his motion to embrace that as well as every other topic adverted to on the subject.

Mr. EWING then moved to strike out the words "the Committee of Ways and Means," and insert in lieu thereof the following: "A select committee, with power to inquire into existing laws, in connection with orders and regulations adopted by the Treasury, War, and Post Office Departments, which now tends to prolong the embarrassments of the people, and extend injurious influences through the political, as well as the agricultural, commercial, and manufacturing interests of the Union; and to provide such judicious restraints upon the abuses of Executive power, conferred by legislation, in relation to the currency, revenue, and patronage hereafter, as may be deemed proper to afford permanent and general relief: said committee to consist of one member of each State, appointed by a vote of the House."

After a few remarks in support of the amendment by Mr. E. it was rejected, and the original resolution was agreed to.

On motion of Mr. WHITTLESEY of Ohio, and by general consent, a resolution was agreed to, directing the Clerk of the House not to have any maps printed in books ordered for the use of the House, unless the maps be specially ordered to be printed.

Mr. SMITH, on leave, then submitted the following resolution:

*Resolved*, That the action of the several standing committees of this House on all matters not embraced by the Message of the President of the United States to the two Houses of Congress, communicated on the second day of the current session, be suspended until the commencement of the annual session of Congress, in December next; and that the consideration of all petitions on such suspended matters be also postponed to the period above specified.

Mr. SMITH said he did not conceive how it was to be expected by those who had claims upon the Government, that the general business of Congress should be taken up. He was aware that while the Committee of Ways and Means and the Committee on the Judiciary had under consideration the subjects which were referred to them, there might be an interval in which it might be possible to consider some other subjects; but it is not to be expected that this session can be continued sufficiently long to mature any other business than that which we have been specially called to act upon. It would not in the first place, be proper to take up general subjects, because we are not in possession of the means of carrying out that business. The President has refrained entirely from entering into matters of general legislation. Then if we are to go into other matters, it will be absolutely indispensable that an immediate call be made upon the Executive for the necessary information. This, however, he apprehended was not the course which the majority of the House would desire to see taken. It was not to be expected by those having claims against the Government that this course of proceeding should be adopted. But he presumed the gentleman from Ohio (Mr. Whittlesey) would say that there were numerous claims which have been presented to the House and examined by a committee, which might be acted upon at this session. In answer to this he would say, that it would hardly be just to other claimants who have not had their claims brought before the House, to give precedence to the claims the gentleman had on a former day alluded to. He considered that it would be better to suspend all those claims for the present, and that the business we were called to deliberate upon should be proceeded with. He, for one, wished that the special business might be the sole business of the session; and it appeared to him that a responsibility rested upon every gentleman, in conducting the business of the present session with an eye single to the great matter which we are here assembled to deliberate upon. If it shall be discovered that we can do nothing, let it be known as soon as possible, so that the country shall not be kept in suspense.

Mr. WHITTLESEY of Ohio understood the gentleman from Maine (Mr. Smith) to make two exceptions to the course he wished to see pursued by the House. In the first place, the gentleman opposed going into business generally, because the President of the United States had not communicated the subjects to Congress. In relation to the recommendation of the President, the gentleman may search in vain, from the organization of the Government to the present time, to find the subject of the claims alluded to brought to the notice of the House. They are not presented in the message as subjects for our deliberation, because it is a part of our duty to examine and decide upon them without any recommendation of the President. It is a part of the legislative business of Congress to take up and consider this matter, and there is no necessity for a recommendation from the Executive. As to the information which may be desired from the Executive officers of the Government, we can get at any time all the information which may be necessary. Even if Congress only sits six weeks, he considered that it would be proper to call for the estimates of the departments, and proceed to act upon them; because it is a fact that the officers of the Government are frequently in anticipation of their salaries for months before the appropriations are made to pay them, and they are frequently at the mercy of the merchants for a subsistence. As to the objection of the gentleman in relation to the preference which would be given to one class of claims over another, he had only to say, he considered that those claims which had been before the House for years, ought to be discharged before those which only originated or were presented on yesterday. He was not for prolonging the session, but he wished all the time we had to spare devoted to business of this description.

Mr. WILLIAMS of North Carolina, did not consider that the House was now prepared to act on this subject, and with a view to give time to con-

sider the matter, he moved to postpone the resolution until Wednesday next.

Mr. BELL would cheerfully support this motion, if it were possible to get such information from the Committee of Ways and Means as could determine what projects would probably be brought before the House at the present session. No person would deny that the subject brought to our notice in the message of the President was broad enough for the occupation of our whole time, provided the committees reported conformably to the recommendations there laid down. If he could be informed as to the intention of the Committee of Ways and Means, or of those who were in the majority in the House, in relation to bringing forward a project for the regulation of the fiscal concerns of the Government, he could then determine what course to pursue. In relation to some parts of that very extraordinary document, the message of the President, he presumed there were some sentiments contained in it, which would meet the support of members from all sides of the House; and he should now be pleased to learn from the chairman of the Committee of Ways and Means, or some other individual who could give the information, what was to be the course of action of that committee on the subject. If it was to be expected that no other propositions than these should be brought forward, he apprehended that we might, in the course of a short time, conclude our labors, and return to our constituents; and if no other propositions were brought forward than these, then he would have no hesitation in voting for the resolution of the gentleman from Maine. But if it was the determination of the committee to bring forward nothing but the very extraordinary proposition in relation to the finances of the country, he apprehended that the majority of the House would not be long in rejecting it. He considered it a project which the majority of the committee would hardly take upon themselves to bring before the House; and, if brought there, he took it that no majority of that House or administration would venture to urge it upon the country. It appeared to him to be a project which was utterly impracticable, and could not be adopted. It may, to be sure, be in the power of the Committee of Ways and Means to bring forward a project of this kind; but if it did, he had little doubt that it would be rejected. If, however, the Committee of Ways and Means should introduce a modified project, with a view of arresting the distresses of the country, he would vote against taking up any thing which would interfere with this great and important matter. He would render every aid in his power to carry out some practicable project, to avert the evils which were impending over us; but he could not give countenance to any such project as that recommended in the Message. When he received information from the Committee of Ways and Means as to the course intended to be adopted by that committee, he would be better prepared to give his vote than at present, and should wait till he received the information desired.

Mr. CAMBRELENG said that the gentleman from Tennessee having called upon him for information, though it was not strictly in order, under the resolution they were discussing, yet he would make a brief response. The gentleman must be perfectly sensible that, in the present position of the Committee of Ways and Means, for it had only been just announced, he (Mr. C.) could do no more than answer for himself. Thus far, however, he would take upon himself to answer for the committee, that he was very certain every member of it would give an immediate attention to the subjects embraced in the President's message, and referred to it, and that they would bring forward their bills at the very earliest day, and with the greatest possible dispatch. He also expressed the hope that the House would confine itself, as far as practicable, to the propositions embraced in the message. On some these, he believed there would be a general concurrence, not only in that committee, but in the House itself.

Upon the other great question adverted to in the Message, he should not, at that time, prematurely engage in any debate. The gentleman, however,

must permit him to say, in reply, that he, for one, was perfectly willing, and held himself prepared, to decide that question, either in the committee or in the House; and, for one, he was perfectly willing to submit the question to the nation. Since we, sir, continued Mr. C. have been drawn out on this question, I hope gentlemen on the other side will be as bold and as frank as the President of the United States has been. Let them take their ground. The glove is thrown. Let them come forward with their propositions. They have been talking so long about non-committalism, let them come forward now, imitate the example of the President, and not lay dark. From the organs abroad, it may be inferred that we are not now to have the question of the Bank of the United States. That question may be postponed beyond the fall elections; but, sir, that that issue we shall come to at last, is as certain as the noonday sun. The great issue will be between the Bank of the United States, and the proposition whether the finances of the country can be, and shall be, managed without any bank or banks at all. That is the great question; and I hope the Committee of Ways and Means will concur with me in framing some bill to dispense with all banks. That is the real question for the House to determine. Whether that question would be settled now, or deferred till the fall elections, was for the consideration of the House, and not for the committee; and I trust the House will not be kept here beyond three or four weeks.

The subject was further discussed by Messrs. BELL, WISE, CUSHING, JENIFER, and LEWIS WILLIAMS in opposition, and by Messrs. SMITH, DUNCAN, BOON, and HAYNES in favor of the resolution; when the motion to postpone its consideration was rejected without a division.

Mr. GARLAND, of Virginia, thought that, while the Committee of Ways and Means were engaged, on the President's Message, the other committees might take up the subject of private claims. Mr. G. then moved an additional clause to the resolution in the following words—"with the exception of private business."

Mr. WHITTLESEY of Ohio asked for the yeas and nays on the amendment, but they were not ordered, and the amendment was rejected.

The question recurring on the original resolution—

Mr. LEWIS WILLIAMS asked for the yeas and nays thereon, but the House refused to order them.

Mr. WHITTLESEY, of Ohio, suggested that, at least, the Committee of Elections should be excepted, but cries of "No! No!" proceeded from various parts of the hall.

The resolution was then agreed to without a division.

On motion, the House adjourned.

#### IN SENATE,

TUESDAY, September 12, 1837.

Mr. McKEAN presented a memorial from sundry citizens of Philadelphia county, remonstrating against the annexation of Texas to the United States; which was laid on the table.

Mr. BUCHANAN also presented a memorial from the citizens of the city and county of Philadelphia, remonstrating against the annexation of the same province; which was laid on the table.

Mr. LINN offered a resolution, which was adopted, appointing a committee of three on the part of the Senate, to meet a like number on the part of the House, to direct the expenditure of the Library fund appropriated by Congress.

The following resolution, offered yesterday by Mr. CLAY of Alabama, was taken up for consideration:

*Resolved*, That the Committee on the Judiciary be instructed to inquire into the expediency of restoring to the District Court of the United States for the northern district of Alabama, its former jurisdiction.

Mr. CLAY explained the reasons in brief for offering the resolution at the present time. It was a matter, it was true, of mere local consideration; yet he presumed it would not encounter objection

on any quarter. The object of the change was to expedite the public business, much inconvenience and delay having resulted from the present time of holding the Court.

Mr. GRUNDY asked, if the change were made as proposed by the gentleman from Alabama, whether the desired object would be effected. He recollected, that some fifteen years since an attempt was made to introduce something like a uniform system in relation to these matters. He would say, if the subject were referred, the committee would endeavor to do what was right.

Mr. BUCHANAN submitted to the gentleman whether any inconvenience would be sustained, if the subject were deferred until the next session.

Mr. CLAY explained that the business would be delayed for that length of time.

Mr. SEVIER begged to offer an amendment, so as to embrace the State of Arkansas, and to insert after the word Alabama, "and to the district court of the State of Arkansas." Mr. S. explained the necessity of the adoption of this amendment, on the ground of the delay that was occasioned. In that country there were frequent murders of the whites by the Indians and of the Indians by the whites, and in all cases they had to remain twelve months in prison before trial.

The amendment was adopted, and the resolution as amended, agreed to.

The other resolutions offered yesterday were severally taken up, considered and agreed to.

The bill to postpone the fourth instalment of deposit with the States being taken up:

Mr. WRIGHT said, that before the bill was read a second time, he would ask the indulgence of the Senate to make a short explanation in regard to the Committee on Finance. Yesterday morning when the bill was reported from that committee, he took the opportunity of stating that, in all probability, they would report further this morning. They, however, found themselves unable to do so, partly in consequence of being unable to prepare the labored details before them, and having found at their meeting, this morning, two members of the committee, unexpectedly absent. The one, as he was informed since he came into the Senate, was called away by business, over which he had no control; and the other was so indisposed as to be unable to attend either the Senate or the committee. He mentioned these facts as an apology for not fulfilling his promise. He felt a confident hope from the best judgment he could form, that the committee would be able to report in full on Thursday next.

The bill was then read a second time, and,

On motion of Mr. HUBBARD, the further consideration of it was postponed till to-morrow.

A message was received from the President of the United States by Major Van Buren, his private secretary; which was laid on the table.

On motion of Mr. BUCHANAN, the Senate proceeded to the consideration of Executive business; and after a short time spent therein, the doors were re-opened, when

The CHAR appointed the following gentlemen a Committee on the Library on the part of the Senate: Messrs. ROBBINS, PRESTON, and WALL.

On motion of Mr. HUBBARD,

The Senate adjourned.

#### HOUSE OF REPRESENTATIVES,

TUESDAY, September 12, 1837.

Mr. CAMBRELENG, on leave, from the Committee of Ways and Means, reported the following bill:

A BILL to postpone the fourth instalment of deposit with the States.

*Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled*, That the transfer of the fourth instalment of deposits directed to be made with the States under the thirteenth section of the act of June 23d, 1836, be, and the same is hereby, postponed until further provision by law.

Mr. CAMBRELENG would merely mention, he said, for the information of the House, that that was the only bill the committee could agree upon at this morning's session. There would, probably, be two other bills requiring the most urgent action of the House to-morrow morning.

The above bill was then, on motion of Mr. C. read twice and referred to a Committee of the Whole on the state of the Union.

On leave, Mr. JOHNSON of Maryland and Mr. HEROD presented memorials on the subject of the currency; which were referred to the Committee of Ways and Means, and ordered to be printed.

On motion of Mr. GARLAND of Virginia, it was

*Resolved*, That the House do now proceed to the election of a Chaplain to the House.

Whereupon, the following nominations were made:

Mr. GARLAND nominated	Rev. Mr. TUSTON.
Mr. McKIM	Rev. Mr. REES.
Mr. HOLT	Rev. Mr. FISKE.
Mr. BRONSON	Rev. Mr. McCALLUM.
Mr. TAYLOR	Rev. Mr. COMSTOCK.
Mr. WAGENER	Rev. Mr. EBAUGH.
Mr. EVERETT	Rev. Mr. ADAMS.

Messrs. GARLAND of Virginia, McKIM, and EVERETT having been appointed tellers, the result of the first ballot was announced as follows:

Whole number of votes	-	205
Necessary to a choice	-	103
Rev. Mr. Tuston received	-	94
Mr. Rees	-	25
Mr. Fiske	-	29
Mr. McCallum	-	12
Mr. Comstock	-	10
Mr. Ebaugh	-	16
Mr. Adams	-	10
Blanks	-	9

So there being no choice, the House balloted a second time, the result of which was as follows:

Whole number of votes	-	203
Necessary to a choice	-	102
Rev. Mr. Tuston	-	135
Mr. Rees	-	7
Mr. Fiske	-	31
Mr. McCallum	-	5
Mr. Comstock	-	3
Mr. Ebaugh	-	11
Mr. Adams	-	7
Blanks	-	4

So that the Rev. Mr. Tuston having received a majority of all the votes given, he was therefore declared duly elected Chaplain to the House for the 25th Congress.

Mr. JOHNSTON of Louisiana, on leave, presented a memorial from the Chamber of Commerce of New Orleans, praying for the establishment of a national bank; which was referred to the Committee of Ways and Means.

Mr. ADAMS submitted the following resolutions, which, by the rule, lie over one day:

*Resolved*, That the President of the United States be requested to communicate to this House, so far as the public interest will permit, the correspondence between the Government of the United States and that of Great Britain, relating to the North Eastern Boundary of the United States, since the Message of the late President to the Senate of the United States, of the 15th of June, 1836.

*Resolved*, That the President of the United States be requested to communicate to this House, so far as may be consistent with the public interest, all the correspondence between the Government of the United States and that of Mexico, concerning the boundary between them; and particularly concerning any proposition for a cession of Territory belonging to the Mexican confederation to the United States; and also all correspondence relating thereto between the Department of State and the diplomatic representatives of the United States in Mexico, and of the said department with those of the Mexican Republic accredited to the Government of the United States.

*Resolved*, That the President of the United States be requested to communicate to this House whether any proposition has been made on the part of the Republic of Texas to the Government of the United States, for the annexation of the said Republic of Texas to this Union; and if such proposition has been made, what answer has been returned, and all correspondence which has taken place relating thereto.

On motion of Mr. HAYNES,  
The House adjourned.

## SELECT COMMITTEE ON THE RULES.

The following is the select committee of the House, on the subject of the rules and orders, appointed on the second day of the session:

Mr. MERCER of Virginia.  
Mr. HAMER of Ohio.  
Mr. BRIGGS of Massachusetts.  
Mr. SMITH of Maine.  
Mr. MUHLENBERG of Pennsylvania.

## IN SENATE,

WEDNESDAY, September 13, 1837.

Mr. SMITH of Indiana presented a petition protesting against receiving Texas into the Union.

Mr. HUBBARD also presented a memorial from sundry citizens remonstrating in the strongest manner against the annexation of that province to the United States. Both of the above were laid on the table.

Mr. NORVELL presented a petition from the officers of the revenue cutter Dexter, stating their duties were equally arduous with those of the officers of the Navy, and praying that they might be allowed the same compensation: laid on the table.

Mr. BENTON presented a petition from Mr. Feuchtwanger, accompanying which was a specimen exhibiting a new cent made of German silver, which the petitioner represents to be as cheap as copper, and more portable.

Mr. MORRIS presented seven memorials from different counties in Ohio, remonstrating against the admission of Texas into the Union; which were laid on the table.

Mr. WRIGHT, from the Committee on Finance, reported the following bills:

A BILL to authorize the issuing of Treasury notes.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President of the United States be, and he is hereby, authorized to cause Treasury notes, for such sum or sums as he may think expedient, but not exceeding, in the whole amount of notes issued, the sum of millions of dollars, and of denominations not less than one hundred dollars for any one note, to be prepared, signed, and issued in the manner hereinafter provided.

SEC. 2. *And be it further enacted,* That the said Treasury notes, authorized to be issued by the first section of this act, shall be reimbursed and redeemed by the United States, at the Treasury thereof, after the expiration of one year from the dates of the said notes, respectively; from which said dates, for the term of one year, and no longer, they shall bear such interest as shall be expressed upon the face of the said notes; which rate of interest, upon each several issue of the said notes, shall be fixed by the Secretary of the Treasury, by and with the advice and approbation of the President; but shall in no case exceed the rate of interest of six per centum per annum. The reimbursement herein provided for shall be made at the Treasury of the United States, to the holders of the said notes, respectively, upon presentment, and shall include the principal of each note, and the interest due thereon at the time of payment. For this reimbursement, at the time and times herein specified, the faith of the United States is hereby solemnly pledged.

SEC. 3. *And be it further enacted,* That the said Treasury notes shall be prepared under the direction of the Secretary of the Treasury, and shall be respectively signed, on behalf of the United States, by the Treasurer thereof, and countersigned by the Register of the Treasury. And that those officers respectively shall, as checks upon each other, and to secure the public safety, keep separate, full, and accurate accounts of the number, date, denomination, and amount of all the notes signed and countersigned by them, respectively; which said accounts shall be carefully preserved and placed on file in the Treasury Department; and also similar accounts, kept and preserved in the same manner, of all the said notes redeemed, as the same shall be returned and cancelled; and the Treasurer shall further account, quarterly, for all such notes delivered to him for signature, or issue, by the Register. The Treasurer and Register of the Treasury are hereby authorized, by and with the consent

and approbation of the Secretary of the Treasury, to employ such additional temporary clerks as the duties enjoined upon them by this section may render necessary; the compensation of each clerk so employed to be fixed by the Secretary.

SEC. 4. *And be it further enacted,* That the Secretary of the Treasury be, and he is hereby authorized, with the approbation of the President of the United States, to cause to be issued such portion of the said Treasury notes as the President may think expedient, in payment of debts due by the United States to such public creditors or other persons as may choose to receive such notes in payment, as aforesaid, at par. And the Secretary of the Treasury is further authorized, with the approbation of the President of the United States, to borrow, from time to time, not under par, such sums as the President may think expedient, on the credit of such notes.

SEC. 5. *And be it further enacted,* That the said Treasury notes shall be transferrable, by delivery and assignment endorsed thereon, by the person to whose order the same shall, on the face thereof, have been made payable.

SEC. 6. *And be it further enacted,* That the said Treasury notes shall be everywhere received in payment of all duties and taxes laid by the authority of the United States, of all public lands sold by the said authority, and of all debts due to the United States, of any character whatsoever. And, on every such payment, credit shall be given for the amount of the principal and interest which, on the day of such payment, may be due on the note or notes thus given in payment.

SEC. 7. *And be it further enacted,* That the Secretary of the Treasury be, and he is hereby, authorized and directed to cause to be reimbursed and paid the principal and interest of the Treasury notes which may be issued by virtue of this act, at the several time and times when the same, according to the provisions of this act, should be thus reimbursed and paid. And the said Secretary is further authorized to make purchases of the said notes, at a price not exceeding par, for the amount of the principal and interest due at the time of purchase on such notes. And so much of any moneys in the Treasury, not otherwise appropriated, as may be necessary for that purpose, is hereby appropriated, for paying the principal and interest of said notes.

SEC. 8. *And be it further enacted,* That a sum of thousand dollars, to be paid out of any moneys in the Treasury not otherwise appropriated, be, and the same is hereby, appropriated, for defraying the expense of preparing, printing, engraving, signing, and otherwise incident to the issuing of the Treasury notes authorized by this act.

SEC. 9. *And be it further enacted,* That if any person shall falsely make, forge, or counterfeit, or cause or procure to be falsely made, forged, or counterfeited, or willingly aid or assist in falsely making, forging, or counterfeiting, any note, in imitation of, or purporting to be a Treasury note aforesaid; or shall falsely alter, or cause or procure to be falsely altered, or willingly aid or assist in falsely altering, any Treasury note issued as aforesaid; or shall pass, utter, or publish, or attempt to pass, utter, or publish, as true, any false, forged, or counterfeited note, purporting to be a Treasury note as aforesaid, knowing the same to be falsely forged or counterfeited; or shall pass, utter, or publish, or attempt to pass, utter, or publish, as true, any falsely altered Treasury note, issued as aforesaid, knowing the same to be falsely altered, every such person shall be deemed and adjudged guilty of felony, and being therefore convicted by due course of law, shall be sentenced to be imprisoned and kept to hard labor for a period not less than three years, nor more than ten years, and be fined in a sum not exceeding five thousand dollars.

SEC. 10. *And be it further enacted,* That the Secretary of the Treasury be, and he is hereby, authorized to make and issue, from time to time, such instructions, rules, and regulations to the several collectors, receivers of public money, depositories, and all others who may be authorized to receive the said Treasury notes on behalf of, and as agents in any capacity for, the United States, as to the safe-keeping, disposition, return, and cancelling of the

said notes so paid to and received by them respectively, and as to their accounts and returns to the department of all such receipts as may seem to him best calculated to promote the public interests and convenience, and secure the United States and the holders of the said notes against frauds and losses.

SEC. 11. *And be it further enacted,* That it shall be, and hereby is, made the duty of the Secretary of the Treasury to cause a statement to be published, monthly, of the amount of all Treasury notes issued or redeemed in pursuance of the provisions of this act.

A BILL authorizing a further postponement of payment upon duty bonds.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Secretary of the Treasury be, and he hereby is, authorized to grant such further extension of credit upon all bonds for duties now outstanding, as shall make the whole extension of credit upon each bond six months from the time when the original bond became due and payable, making the extension in each case to depend upon the same conditions as to additional security, the payment of interest, and other terms, which have been prescribed by the Treasury Department to the extension of revenue bonds since May last: *Provided,* That nothing herein contained shall be construed to include any existing bonds, where the parties to the same have not, since the bonds became payable, given additional security, or made part payment, and are, by the proper officers of the Government, considered insolvent, or unsafe securities for the payment of their bonds.

SEC. 2. *And be it further enacted,* That the additional credit of six months, granted by the first section of this act, upon outstanding duty bonds, shall be upon the same terms and conditions granted upon all bonds for duties which may be given during the period of one year from and after the first day of October, in the year one thousand eight hundred and thirty-seven.

SEC. 3. *And be it further enacted,* That where the security in any bond which has been, or may hereafter be postponed, is entirely satisfactory, the principal or sureties in the same shall not be disabled from being in the mean time, till the period of postponement provided for by this act expires, received as principal or sureties in other bonds for duties, notwithstanding the bond first given may not have been actually paid, discharged, or extended before or on the day it fell due: *Provided,* That such principal and sureties shall be found, in all other respects, safe and satisfactory security for the bonds to which they may be proposed as parties.

SEC. 4. *And be it further enacted,* That the operation of all prior laws, and parts of laws, so far as inconsistent with this act, be suspended in the particulars in which they may conflict with, or differ from, its provisions, until this act shall cease by its own limitation.

A BILL for adjusting the remaining claims upon the deposit banks.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Secretary of the Treasury be, and he is hereby, authorized to continue to withdraw the public moneys now remaining in any of the former deposit banks, in a manner as gradual and convenient to the institutions as shall be consistent with the pecuniary wants of the Government, and the safety of the funds thus to be drawn; and that no further interest than that required by the deposit act of the twenty-third of June, one thousand eight hundred and thirty-six, under which those deposits were made, shall be demanded of any bank which has met, or shall hereafter meet, the requisitions of the department. This provision shall also extend to such public moneys as may remain in any of the said banks, whether standing to the credit of the Treasurer of the United States, or of any disbursing or other public officer of the Government.

SEC. 2. *And be it further enacted,* That in case of neglect or refusal by any of the said banks to comply with the requisitions of the Secretary of the Treasury, as he shall make them, in conformity with the first section of this act, suits shall be instituted, where that has not already been done, to

recover the amounts due to the United States, unless the defaulting bank shall forthwith cause to be executed and delivered to the Secretary of the Treasury a bond, with security to be approved by the Solicitor of the Treasury, to pay to the United States the whole moneys due from it, in three instalments; the first to be paid at the expiration of two months from the passage of this act, the second at the expiration of five months, and the remaining instalment at the expiration of eight months from the same period; and interest thereupon at the rate of six per centum per annum, from the time of default, together with any damages which may have accrued to the United States from protests of drafts drawn upon it, or from any other consequence of its failure to fulfil its obligations to the public Treasury.

These bills were read a first time and ordered to a second reading.

The bill for the postponement of the fourth instalment of deposits with the States being taken up,

Mr. CALHOUN said he hoped that the Senate would not now act on the bill, but that it would be postponed till to-morrow.

Mr. WRIGHT remarked that he entertained no other feeling than a desire to expedite the business before Congress as much as possible. He was not aware that there was any thing yet to be reported from the Committee on Finance which would at all affect the present bill. Those measures which he had just reported certainly had an intimate connection with it. He had no desire to press the bill at this time, feeling a confident hope that the committee would complete the business before them by to-morrow morning, and be enabled to report.

On motion of Mr. CALHOUN, the further consideration of the bill was postponed till to-morrow.

On motion of Mr. MORRIS,

The Senate adjourned.

#### HOUSE OF REPRESENTATIVES,

WEDNESDAY, September 13, 1837.

The CHAIR stated, that in pursuance of the notice he had given on yesterday, he would now call the States in their order for petitions and memorials. He also stated that he should be governed by the order of the House on Monday, and he presumed that all memorials would be disposed of in the manner set forth in that resolution.

Mr. CAMBRELENG suggested for the consideration of the Chair and the House, that the mere presentation of petitions to go on the files of the House, and be taken back at the next session, would be a very unnecessary ceremony.

The CHAIR replied that it would be at the discretion of the members who held petitions, whether they would present them and have them postponed until December, or hold them in their own possession.

Petitions and memorials were presented by,  
Mr. ADAMS of Massachusetts.  
Mr. SLADE of Vermont.  
Mr. BRONSON of New York.  
Mr. PETRIKIN of Pennsylvania.  
Mr. UNDERWOOD of Kentucky.  
Mr. JOHNSTON of Louisiana.  
Messrs. RARIDEN and GRAHAM of Indiana.  
Mr. CASEY of Illinois.

Mr. CAMBRELENG, from the Committee of Ways and Means, reported a bill to authorize the issuing of Treasury notes; which was read twice and committed to a Committee of the Whole on the state of the Union.

The bill is in the following words:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President of the United States be, and he is hereby, authorized to cause Treasury notes, not bearing interest, for such sum or sums as he may think expedient, but not exceeding, in the whole amount of notes issued, the sum of twelve millions of dollars, and of denominations not less than one hundred dollars for any one note, to be prepared, signed, and issued in the manner herein-after provided.

*SEC. And be it further enacted,* That the said Treasury notes authorized to be issued by the first section of this act, shall be reimbursed and redeemed by the United States, at the Treasury

thereof, after the expiration of one year from the dates of the said notes respectively. The reimbursement herein provided for shall be made at the Treasury of the United States, to the holders of the said notes respectively, upon presentment; and in case of presentment and non-payment of said notes after they become due, the holder or holders shall be entitled to receive interest at the rate of five per cent. per annum from the date of demand of payment; and for this reimbursement, according to the provisions of this act, the faith of the United States is hereby solemnly pledged.

*SEC. And be it further enacted,* That the said Treasury notes shall be prepared under the direction of the Secretary of the Treasury, and shall be respectively signed, on behalf of the United States by the Treasurer thereof, and countersigned by the Register of the Treasury; and that those officers respectively shall, as checks upon each other, and to secure the public safety, keep separate, full, and accurate accounts of the number, date, denomination and amount of all the notes signed and countersigned by them respectively, which said accounts shall be carefully preserved and placed on file in the Treasury Department; and also similar accounts, kept and preserved in the same manner, of all the said notes redeemed, as the same shall be returned and cancelled; and the Treasurer shall further account, quarterly, for all such notes delivered to him for signature or issue by the Register. The Treasurer and Register of the Treasury are hereby authorized, by and with the consent and approbation of the Secretary of the Treasury, to employ such additional temporary clerks as the duties enjoined upon them by this section may render necessary, the compensation of each clerk so employed to be fixed by the Secretary.

*SEC. And be it further enacted,* That the Secretary of the Treasury be, and he hereby is, authorized, with the approbation of the President of the United States, to cause to be issued such portion of the said Treasury notes as the President may think expedient, in payment of debts due by the United States to such public creditors, or other persons, as may choose to receive such notes in payment as aforesaid, at par.

*SEC. And be it further enacted,* That the said Treasury notes shall be issued payable to order or bearer, as the said Secretary, with the approbation of the President, shall direct; and shall be transferable by delivery, if made payable to bearer, and by the endorsement of the original payee if made payable to order, without other or further assignment or evidence of a transfer of property.

*SEC. And be it further enacted,* That the said Treasury notes shall be every where received in payment of all dues and taxes laid by the authority of the United States; of all public lands sold by the said authority; and of all debts due to the United States, of any character whatsoever. And on every such payment credit shall be given for the amount of the principal and interest, if any should accrue under the provisions of this act, which, on the day of such payment, may be due on the note or notes thus given in payment.

*SEC. And be it further enacted,* That the Secretary of the Treasury be, and he is hereby, authorized and directed to cause to be reimbursed and paid the principal and interest of the Treasury notes which may be issued by virtue of this act, at the several time and times when the same, according to the provisions of this act, should be thus reimbursed and paid. And the said Secretary is further authorized to make purchases of the said notes at a price not exceeding par, for the amount of the principal and interest due at the time of purchase on such notes; and so much of any moneys in the Treasury, not otherwise appropriated, as may be necessary for that purpose, is hereby appropriated, for paying the principal and interest of said notes.

*SEC. And be it further enacted,* That a sum of thousand dollars, to be paid out of any moneys in the Treasury not otherwise appropriated, be, and the same is hereby, appropriated, for defraying the expense of preparing, engraving, signing, and all other expenses incident to the issuing of the Treasury notes authorized by this act.

*SEC. And be it further enacted,* That if any person shall falsely make, forge, or counterfeit, or

cause, or procure to be, falsely made, forged, or counterfeited, or willingly aid or assist in falsely making, forging, or counterfeiting, any note, in imitation of, or purporting to be, a Treasury note aforesaid; or shall falsely alter, or cause or procure to be falsely altered, or willingly aid or assist in falsely altering, any Treasury note issued as aforesaid; or shall pass, utter, or publish, or attempt to pass, utter, or publish, as true, any false, forged, or counterfeited note, purporting to be a Treasury note as aforesaid, knowing the same to be falsely forged or counterfeited; or shall pass, utter, or publish, or attempt to pass, utter, or publish, as true, any falsely altered Treasury note, issued as aforesaid, knowing the same to be falsely altered, every such person shall be deemed and adjudged guilty of felony, and, being thereof convicted by due course of law, shall be sentenced to be imprisoned and kept to hard labor for a period not less than three years, nor more than ten years, and be fined in a sum not exceeding five thousand dollars.

*SEC. If any person shall make or engrave, or cause, or procure to be made or engraved, or shall have in his custody or possession any metallic plate, engraved after the similitude of any plate from which any notes issued as aforesaid, shall have been printed, with intent to use such plate, or to cause, or suffer the same to be used in forging or counterfeiting any of the notes issued as aforesaid; or shall have in his custody or possession any bank note or notes, engraved and printed after the similitude of any notes issued as aforesaid, with intent to use such blanks, or cause, or suffer the same to be used in forging or counterfeiting any of the notes issued as aforesaid; or shall have in his custody or possession any paper adapted to the making of notes, and similar to the paper upon which any such notes shall have been issued, with intent to use such paper, or cause, or suffer the same to be used in forging or counterfeiting any of the notes issued as aforesaid, every such person, being thereof convicted, by due course of law, shall be sentenced to be imprisoned, and kept to hard labor, for a term not less than three nor more than ten years, and fined in a sum not exceeding five thousand dollars.*

*SEC. And be it further enacted,* That the Secretary of the Treasury be, and he is hereby, authorized to make and issue, from time to time, such instructions, rules, and regulations, to the several collectors, receivers of public money, depositories, and all others who may be authorized to receive the said Treasury notes on behalf of, and as agents in any capacity for the United States, as to the safe-keeping, disposition, return, and cancelling of the said notes so paid to, and received by them respectively, and as to their accounts and returns to the Department of all such receipts as may seem to him best calculated to promote the public interests and convenience, and to secure the United States and the holders of the said notes against frauds and losses.

*SEC. And be it further enacted,* That it shall be, and is hereby made, the duty of the Secretary of the Treasury to cause a statement to be published monthly of the amount of all Treasury notes issued or returned in pursuance of the provisions of this act.

Mr. MERCER, from the select committee appointed on the subject of the rules for the government of the House, made a report in part; which was made the order of the day for to-morrow, and ordered to be printed.

The following resolution, submitted by Mr. ADAMS on yesterday, came up in course:

*Resolved,* That the President of the United States be requested to communicate to this House, so far as may be consistent with the public interest, all the correspondence between the Government of the United States and that of Mexico, concerning the boundary between them; and particularly concerning any proposition for a cession of Territory belonging to the Mexican confederation to the United States; and also all correspondence relating thereto between the Department of State and the diplomatic representatives of the United States in Mexico, and of the said department with those of the Mexican Republic accredited to the Government of the United States.

Mr. ADAMS said he had submitted the resolution for the purpose of obtaining the information called for in it, and he should wait until he saw whether any objections were made to the resolution before he made any remarks thereon.

Mr. HOWARD said, if the gentleman from Massachusetts meant merely when the documents came in to have them printed, and not refer them to any committee of the House, he should make no opposition to it. If, however, it was the intention of the gentleman to move to refer them to committees for the purpose of taking up the time of the House, which should be devoted to other business, he should oppose it. He hoped the House would not, by a silent vote, place itself in a situation from which it would be difficult to extricate itself. He could not now see the necessity of printing the correspondence called for, as another motion had interfered in the matter; but he presumed the gentleman had some good reason for calling for it.

Mr. ADAMS said it was not his intention to bring the subject before the House for discussion at the present time. His intention was simply to have the information, and to have it printed for the information of the House, and the information of the nation. He was willing that the question should be taken at this time, and he should, when the second resolution came up, take occasion to make some remarks thereon, and give the reasons which induced him to call for the correspondence.

The resolution was then adopted.

Mr. ADAMS'S second resolution, in the following words, was then taken up:

*Resolved*, That the President of the United States be requested to communicate to this House whether any proposition has been made on the part of the Republic of Texas to the Government of the United States, for the annexation of the said Republic of Texas to this Union; and if such proposition has been made, what answer has been returned, and all correspondence which has taken place relating thereto.

Mr. WISE should vote against this resolution, for the reason that the correspondence was not understood to be in that condition at this time that it should be made public; and in reference to the interests of the Republic of Texas, its publication at this time might be derogatory to them.

Mr. HAYNES drew the attention of the gentleman from Massachusetts to the fact that the resolution did not contain the qualification or restriction usual in calling for information from the Executive. If the gentleman would so modify it, he would vote for it; otherwise, not.

Mr. ADAMS replied, that the reason why he had not inserted the usual restrictions was, that the call embraced in the resolution was a simple question as to a matter of fact; and he did not, for that reason, deem them necessary. It was a simple question whether a proposition had been made to this Government, which it was of public notoriety, the legislative body of the Republic of Texas instructed their Executive should be made. That, he repeated, was a matter of public notoriety, and the object of this inquiry was to know whether that proposition had been made.

Another reason was, that he considered the proposition itself as utterly unconstitutional, as one which neither the President of the United States, nor that House, nor that Congress, had any right to receive, entertain or consider. It was a new thing in the history of this nation—it was a new thing in the history of the world, and was totally different from what had taken place heretofore, in cessions of territory to the United States.

On the first occasion the cession of a territory took place under this Government, that of Louisiana, it was objected to at the time, that it was unconstitutional. So far as that was a cession of a territory, it was Mr. Adams's opinion at the time, and that opinion stood recorded upon the journals of the Senate, that so far as the mere cession of a territory was involved, it was within the power of the Government of the United States; but in that cession certain provisions were introduced, relating to the inhabitants of that territory, and securing to them what, in his opinion, the Constitution of the United States did not authorize

the Congress of the United States nor the Government of the United States to confer. That was not only his own opinion at the time, but it was the opinion also of the then President of the United States, an opinion well known to the world. It was the opinion also of his successor, the then Secretary of State, an opinion avowed by him personally to Mr. A. It was in consequence of that opinion that he had introduced into the Senate of the United States, a resolution by which the stipulations in the treaty in favor of the inhabitants of the province of Louisiana should be fulfilled; that the rights of citizens of the United States, which it was stipulated they should enjoy, should be secured to them by that power which alone, in his opinion, could secure them to them, viz: the people of the United States. He had proposed amendments to the Constitution for that purpose to the Senate, but he was overruled; and, notwithstanding the opinion of the President of the United States, notwithstanding the opinion of the then Secretary of State, the Congress of that day did proceed, and did undertake to carry into effect that treaty, and to perform the functions embraced in it.

Now, if, under the first resolution just adopted by the House, it should appear that a proposition had been actually made to the Republic of Mexico to cede a portion of her territory to the United States; and if it happened that that proposition had been accepted, and that a treaty had been made, by virtue of which the inhabitants of that portion of the Mexican Republic thus ceded by that Government to the United States were to enjoy certain privileges, among them that of being admitted, in due time, into the Union, and it had been ratified by two-thirds of the Senate, the precedents of Louisiana and Florida might have been adduced in its support. But here was a totally different thing. This was not the case of a foreign Government ceding a territory to the United States, and stipulating for certain advantages, but it was a whole nation, a whole people which were proposed to be added into this Union, and enjoy all the rights and privileges of citizens of the United States. Now that was an operation differing in toto from that of merely receiving the cession of a Territory, and an operation, he there declared it to be his opinion, in the face of God, that no power on earth was capable of performing, but the people of Texas on one side, and the people of the United States on the other. The Republic of Texas had never conferred upon its Executive the power to make this proposition, nor had we any information that it was intended by the people of that Republic. He had read their Constitution; and certainly no such power was given in that instrument. No such power existed in the President of the United States, or in the Congress of the United States, to receive any such proposition. It was a proposition of which the people of the United States alone were competent judges. Now if the proposition had been made, in his humble opinion, the only answer that could be given by the President of the United States, was that he had no power to receive the proposition. If the proposition be made to that Congress, the only answer that could be given to it, in his opinion, was that that Congress had no power to receive it. The Constitution conferred no such power. That was the reason why he did not insert, in the resolution, the usual form of restriction, "if he should not judge it incompatible with the public interest." Mr. A. did not think it possible for the President to consider it incompatible to answer the simple question embraced in the call. It was a question in which the whole people of the United States had a deep, deep, deep interest—an interest involving not only the happiness and prosperity, but the very existence of the Union: for it was his firm opinion that a very large portion of the people of this country, dearly as they loved the Union, would prefer its total dissolution to the act of annexation of Texas.

The reason given by the gentleman from Virginia, that though there was a correspondence, yet that it was not at present in a condition to lay before the public, so far from being a reason why the call should not be made, was an additional reason for the call. Since the existence of the

correspondence had been admitted, Mr. A. demanded in the name, and as one of the representatives, of the people of the United States, that they should know what that correspondence was that was to take away a part of their rights and bestow them upon another whole nation. Still, however, it it be the opinion of the majority that the restriction should be introduced, it was competent for any gentleman to move it, and the House might do its pleasure, by adopting or rejecting such a proviso. He himself was willing to take the resolution, even with that restriction upon it, because, of all things, he desired, not only that that House, but that the whole people of the country, should know what disposition was proposed to be made of their rights.

Mr. HAYNES then moved the usual proviso, "provided he (the President) deems it not incompatible with the public interest."

Mr. THOMPSON of South Carolina expressed his intention of voting for the amendment, but against the whole proposition, on the ground of its having been prematurely brought before the consideration of the House. He had no intention, at that time, of going over the topics adverted to by the gentleman from Massachusetts, for he felt convinced that no good would result by discussing the subject of Texas in its present very inchoate state. He would, however, when the proper time arrived, be prepared to reply to the gentleman, and would confine himself then by saying in advance, that he differed with him on every ground.

Mr. T. thought it proper to add a single word or two. It would be remembered that, on a former occasion, the gentleman from Massachusetts had made some very important and honorable explanations, in reply to some remarks made by Mr. T. as to what occurred in relation to the Texan boundary, while the distinguished gentleman was Secretary of State. It was then declared by the gentleman that he had been himself opposed to the limitation, and in favor of the treaty to extend the boundary. But now, forsooth, they were told it was not in the power of this Government to get back by treaty that which the gentleman says they could retain by treaty. Why it was a most monstrous doctrine, that a Government can cede away, and not recover back.

Another argument of the gentleman was not less strange. It seemed they were not bound to take the acts of the Executive of Texas, in relation to foreign matters, as authentic. Why, were they not bound to take the acts of the Executives of all foreign Governments charged with the treaty-making power, without going into an examination of the internal structure of those Governments? In this case, if the proposition had been made, it was made by the authorized branch of the Government deputed with the treaty-making power; though, even if they were to look behind that, they would find it to have been done in strict accordance with the will of the people.

The CHAIR reminded the gentleman from South Carolina, that it must be manifest the resolution did not open so wide a range of debate as the gentleman appeared to be indulging in.

Mr. THOMPSON did not design to go farther into it than had been indulged in by the gentleman from Massachusetts.

Mr. PICKENS merely arose to correct the impression his colleague and others of his friends seemed to be laboring under as to the condition of the correspondence. There was no objection whatever, at that time, to its being presented to the American people and to the world. As a friend to the cause of Texas, he was himself willing that it should be presented, in order that, by the regular session of Congress, the people generally, as well as the members there, might make up their minds and be prepared to discuss it.

While up, Mr. P. would return his thanks to the gentleman from Massachusetts for the position he had assumed, and for the candor he had displayed. He had taken his ground in advance. Mr. P. was not, however, to be drawn into the issue yet, for he would wait for events, but he wished the attention of the House and the country to be called to the very remarkable language of the gentleman, and Mr. P. wished them to understand from what quarter of this country the issue was to be pre-

sented. If he was not mistaken, he understood the gentleman to say that the people of this country would prefer disunion to the annexation of Texas.

Mr. ADAMS. I said a very large portion.

Mr. PICKENS. Ah, well, it amounted nearly to the same thing, for Mr. P. presumed the gentleman spoke out of his intimate knowledge of the people in his own section of the country. Well, then, if this be the public feeling there, and if this be a declaration in advance, let it be distinctly understood that this declaration first came from that quarter that has heretofore sung hallelujahs to this Union. Yes: the gentleman now presents the alternative, and says it is disunion.

What Mr. P. rose principally for, was to call the attention of the House to that remarkable issue, and also the public and the country to the quarter from whence it came! Yes: there are great questions involved, great interests involved; and it was, he confessed, a novel spectacle to see constitutional limitations advocated in that quarter. He rejoiced at it. It was the first time since he had the honor of a seat on that floor, that he had heard constitutional restrictions advocated from that quarter. There might be other questions arising of deep and vital interest, in which he hoped and trusted the gentleman would also consider constitutional restrictions. He hoped, however, the gentleman would not construe the Constitution to shield his own peculiar interests, while those of others were to be trampled down. At all events, the doctrine of construction from that quarter was a new one, and he rejoiced to see it.

Mr. P. had gone a little beyond what he had intended. He had risen principally to say, that from what he had been informed, and it came from the very highest quarter, the correspondence was in a situation to be presented to the world, and it was his desire that it should be presented at once, so that the American people might judge upon the great question involved. Though he rejoiced to hear the gentleman from Massachusetts come out, and he hoped he would be prepared to meet the issue he had himself made, Mr. P. was not at present to be drawn into the discussion.

Mr. PETRIKEN moved to lay the resolution and proposed amendment on the table.

Mr. REED asked for the yeas and nays, which were ordered, and were—yeas 74, nays 149.

So the House refused to lay the subject on the table.

Mr. HOWARD did not consider the amendment of any great consequence, and had himself rather the resolution passed without it, inasmuch as the gentleman had made the call an absolute one, and on account of the remarks made by him upon it. He knew the reluctance of the House to entertain debate then; and would only say, that if the gentleman from Virginia was in possession of any information to satisfy him that the correspondence, if there was any, was not in a condition to see the light, it was more than Mr. H. knew, for he had no such information. The gentleman must permit him to say that he (Mr. H.) did not believe there was any thing in it, if such correspondence existed, which the Government was either afraid or ashamed to exhibit to that House, or to the American nation.

With great respect to the gentleman from Massachusetts, Mr. H. must say that he would have thought it as well to have postponed the whole subject till a more fitting opportunity, till the President of the United States had had an opportunity of sending a message on the subject of our foreign relations generally.

Mr. GRENNELL considered this call for the correspondence which had taken place between the United States Government and the Government of Texas, a matter of very great importance to the people of the United States. The people of the country are anxious to know the whole length and breadth of the correspondence without any reserve, and therefore it was that he should go for the resolution, and against the amendment proposed by the gentleman from Georgia, (Mr. Haynes.) He opposed the proposition to amend, because he could not see how, in any possible manner, it could be incompatible with the public interest to make public the correspondence called for, if there was any such correspondence in existence. He wished to

see every thing which had passed between the Executive of the United States and the authorities of Texas, in relation to the annexation of that Territory to the United States, if there was any thing of the kind in existence. He was not aware that any such matter had been in agitation between the two Governments, and he was astonished at the announcement that a correspondence had been going on tending to that monstrous result.

The CHAIR reminded the gentleman that the merits of the question, in relation to the annexation of Texas to the United States, were not open for discussion on the resolution before the House.

Mr. GRENNELL had no desire to overstep the rules of order, as he paid very great respect to the rules and the suggestions of the Chair. He would say, however, that he would not leave it to the discretion of the President of the United States to determine whether or not it would be proper to withhold the correspondence called for. He would not leave it to the President's discretion to determine whether it was, or was not to be divulged. He should demand the publication of the document without reference to the views of the President, and he should do so because of the most novel and extraordinary position in which we were placed. The matter affects not only our internal interests and concerns, but it has a further reach and bearing, touching our relations with Mexico, and perchance with some of the Governments of Europe. He did not look upon this question of the annexation of Texas to the United States, in the same light which he presumed some other gentlemen looked upon it. It was not the mere matter of connecting it with the United States, without imposing upon the United States any obligations thereby, but it must be recollected that by that act we are casting our lot with theirs in every difficulty which may arise between that country and Mexico, or any other Government.

The CHAIR again reminded the gentleman that the question as to the expediency of annexing Texas to the United States was not before the House, and could not now be discussed.

Mr. GRENNELL would then only say, that he regarded this question as a matter of such vital interest to the whole people of the country that he would leave nothing to the discretion of the President of the United States. He would make a plain demand of the Executive to communicate the correspondence to the House, and to the country; but he would not leave it with him to say whether or not the public interest required that it should not be published.

Mr. BYNUM regretted that this question should be agitated at this time, because he could not see what benefit could ultimately arise from it. He believed, for various reasons, that the discussion and agitation of the subject at this time was entirely inexpedient, and he therefore most sincerely regretted that it had been brought to our notice by the gentleman from Massachusetts at this period of a session of Congress which was convened for a special object, having nothing to do with the one referred to in the resolution now before the House. He was not disposed, as some gentlemen appeared to be, to enter into the consideration and discussion of the various subjects suggested by the gentleman from Massachusetts, (Mr. Adams,) because those subjects were not now properly before the House, and could not, in strict accordance with the rules of order, be entered into; but he would take this occasion to say that, whenever they did come before the House in a proper manner, he would express his sentiments in relation to them freely and fully, and without the least reserve. In relation to the resolution which had been introduced by the gentleman from Massachusetts, and was now before the House, he would say that he was prepared to vote for it, if it was accompanied by the amendment submitted by the gentleman from Georgia, (Mr. Haynes,) but without that amendment he could not sustain it, and if the amendment was not adopted, he hoped the House would reject the resolution. The gentleman from Massachusetts, in his humble judgment, was the last gentleman in the House that should have introduced such a resolution into this body without being accompanied by the quali-

fications and restrictions moved by the gentleman from Georgia. What was the question involved in the original resolution? Why, it assumes that this House possesses that power which the Constitution vests alone in the Executive department. It sets aside entirely Executive discretion in relation to these all-important matters, and calls upon him to lay before the world all the correspondence in relation to this particular subject, no matter how detrimental it might be to the public interest. He believed that the resolution, without the proposed amendment, was wholly improper and unwarranted. What department of the Government had the exclusive control of all matters in relation to treaties? and what department had the sole treaty-making power? Why it was the Executive department, subject only to the ratification by the Senate of all such treaties. But the gentleman from Massachusetts says, that this is a matter which concerns the whole nation, and therefore it is necessary that we should demand of the Executive to surrender up his power into our hands. This appeared to him (Mr. B.) to be a most extraordinary doctrine, and one which he could never yield his assent to. The gentleman says that he is prepared to vote against the amendment, and that it is not to be left to the discretion of the Executive to say whether it would be proper or improper to make public the correspondence. He took it that the two honorable gentlemen from Massachusetts had presumed too much; they have presumed upon conclusions that they have not given evidence sufficient to justify. It appeared to him that there might be a propriety or an impropriety in the communication of this matter to the House. Although the honorable gentlemen may take it for granted that the Executive had no control over the matter, and that it should be immediately communicated to the House, there are other gentlemen who have not come so precipitately and rapidly to that conclusion. Mr. B. was not prepared to assent to the proposition of the gentleman from Massachusetts, that it is entirely improper to consider this question in any other way than that the people demanded the correspondence to be made public, and that, therefore, it should be spread before the world; nor would he consent that there was no propriety in advocating the annexation. He had as good a right to his own opinion in relation to this matter as the gentleman from Massachusetts had to his, and therefore the gentleman should not now attempt to force upon them any thing for the public opinion of the country which their own convictions would warrant them in believing. If the Executive believed that it was improper to disclose the correspondence at this time, the House would surely not endeavor to compel him to lay it before the public, and thereby, perhaps, prevent the Government from making an advantageous arrangement with that Government, if any such arrangement was on foot. If the Executive was in the act of making a treaty with the Government of Texas, the premature disclosure of the correspondence in relation thereto would break it off, which might be detrimental to the interests of the United States. It might be, for aught he knew, that two-thirds of the people of the United States were in favor of the annexation of Texas, or it might be that two-thirds were opposed to it, when the question should be put to them; but if we are to take the conclusions of the two gentlemen from Massachusetts, the country has already decided against the annexation of Texas to the United States. Now he was not willing to come to any such conclusion, nor would he adopt any measure which would have a tendency to prevent that measure being adopted. He would vote for the resolution, provided it was in the form of all other resolutions of this character, and publish the correspondence, if it was in a proper condition to be published; if, however, it was not in such a condition, he would oppose its publication. He saw no cause for alarm and excitement in relation to this matter, and when the subject came up fairly he hoped we would consider and discuss it coolly and calmly, and in a statesman-like manner. He hoped that the amendment might be adopted; and if it was, he should vote for the resolution. He considered that the discretion should be left with

he Executive Department of communicating or withholding the correspondence, and that it was entirely improper to attempt to take this discretion from the department.

Mr. WISE understood by the decision of the Chair, that it was not proper to enter into a discussion of the merits of the question on the resolution pending.

The CHAIR said he had so decided the resolution, being merely a call for information.

Mr. WISE remarked that he considered the decision correct, but he wished to inquire whether he could be permitted to reply to the remarks made by the gentleman from Massachusetts in relation to the annexation of Texas to the Union.

The CHAIR stated that he had endeavored to confine gentlemen to the question before the House, and said that, at the moment the gentleman from Massachusetts had made the remark, he had stated that the gentleman could not be permitted to enter into a discussion of the merits of the question in relation to the annexation of Texas to the United States.

Mr. WISE considered this decision as perfectly correct, and only regretted that the gentleman from Massachusetts had not been called to order sooner, as that gentleman had taken several occasions to discuss the question in relation to the independence of Texas, and the annexation of Texas to the United States, and he has always managed to discuss these questions single-handed, without other gentlemen having the opportunity of replying to his arguments, thus giving those opposed to Texas all the benefit of his *ex parte* arguments.

Mr. W. had only to say that he was now ready to discuss the question upon the issue presented by the gentleman from Massachusetts to the country, and he was also prepared to show that this was not a new question. Whenever the question came up, he would meet the gentleman on the ground he had taken, and discuss the question with him fully and fairly; but as the rules did not now permit him, he must withhold going into the subject at present. From the information he had received, he considered himself at the time justified in saying that the correspondence was not in a condition to be presented to the country; but as many of the friends of Texas believe that it was in a proper state to go forth to the world, he was willing that it should be published. As to the question of disunion being raised here by gentlemen on this question, he would not countenance it.

The CHAIR stated that the question of union or disunion could not be discussed on the pending resolution, neither could the question in relation to the annexation of Texas be discussed. He hoped, therefore, that gentlemen might confine themselves to the question before the House.

Mr. BELL, after some remarks on the prematurity of this discussion, important as was the subject it involved, by putting aside the all-absorbing question upon which Congress had been convened, moved that the House proceed to the orders of the day.

Mr. CAMBRELENG suggested that the House finish what other business was before it, and proceed to the orders of the day to-morrow, on the first bill reported from the Committee of Ways and Means, (to postpone the fourth instalment of deposit of the public money.)

The motion to proceed to the orders was rejected.

Mr. HAYNES expressed his great astonishment at the opposition to his amendment, coming from the quarter it did, that of the gentleman from Massachusetts. Mr. H. said he had never known a peremptory message sent to the President of the United States.

Mr. HOLSEY addressed the House at some length on the amendment of his colleague, and the question of assumption of power on the part of the House in making an absolute call upon the Executive. He contended that an unqualified call upon him was at variance with the form, and in conflict with the genius and spirit, of the Constitution. He believed that such an imperative call was unprecedented in the history of the Government.

Mr. CUSHING propounded a question to Mr. WISE. That gentleman had admitted or declared

that there existed a secret correspondence between the Government of the United States and that of Texas, through their Ministers, and he wished to ask the gentleman from Virginia, (though Mr. C. admitted it was a question he had no right to ask, and the gentleman was under no obligation to answer,) from or through what channel he came to the knowledge of the existence of that confidential correspondence, and of its character.

Mr. WISE replied, that the gentleman from Massachusetts having admitted that he had no right to put the question, nor that Mr. W. was bound to answer it, he should stand upon his right, and not answer it. Mr. W. said he would exculpate the Secretary of State, or any one representing Texas, or its friends there; but he came by it fairly, and in a manner that any other gentleman would. No one had been guilty of any breach of confidence. He submitted to the gentleman from Massachusetts, whose motives he respected, whether he had not penetrated a little too far in asking the question.

Mr. BIDDLE was prepared to meet the question of Texas at any time, and he wished every vote given by him there to be accompanied with the distinct understanding, that he was a warm opponent to the annexation of Texas.

Mr. CALHOON said that he would vote for the resolution, with or without the amendment, because he thought that the representatives from the South and West ought to prove at all times that they were ready to meet any and every question connected with the affairs of Texas, which looked to its annexation to this Union. For his own part, he was at all times ready to take his ground.

He was induced to vote against the resolutions of the gentleman from Massachusetts, when he announced that he had no intention of calling the attention of Congress to the subject in any short time. If we were not to act upon the information, he did not see the necessity at this time of calling for it, unless it was intended to operate elsewhere. He thought he had seen, in a speech which the gentleman delivered at the last session, as well as in a publication lately put forth by a distinguished individual at the north, a desire to invoke foreign interference in the final conflict which was to take place upon this subject.

Mr. DAWSON appealed to the gentleman from Massachusetts to accept the amendment of his (Mr. D's) colleague. He was in favor of the resolution, because this was the best time to lay the information before the people, who could discuss the subject with calmness and deliberation. He was opposed to making an absolute call upon the Executive. He expressed a hope, that whenever the question came up, it would be discussed by them without reference to party feelings, but as statesmen and as patriots.

The proviso of Mr. HAYNES was then agreed to without a division.

Mr. ADAMS asked for the yeas and nays on the adoption of the resolution, but they were refused, and it was adopted without a count.

The House then took up the following resolution, submitted by Mr. ADAMS on yesterday:

*Resolved*, That the President of the United States be requested to communicate to this House, so far as the public interest will permit, the correspondence between the Government of the United States and that of Great Britain, relating to the North Eastern Boundary of the United States, since the message of the late President to the Senate of the United States, of the 15th of June, 1836.

Mr. HOWARD moved to amend it by inserting an additional clause, as follows: "And all correspondence taken place since that period between the Government of the United States and the Governor of the State of Maine, on the subject of the alleged violation of the rights of the citizens of Maine."

Mr. HOWARD explained the object of his amendment to be to obtain a knowledge of all the facts in relation to the subject, as well the attitude the Federal Government towards the State of Maine as that towards Great Britain. The resolution of the gentleman from Massachusetts did not go far enough.

Mr. ADAMS accepted the amendment as a mo-

dification of his resolution; and so modified, it was agreed to.

Mr. ADAMS, on leave, submitted the following resolution:

*Resolved*, That the Clerk of this House do procure and cause to be printed for the use of the members of this House, copies of all the acts of the several State Legislatures of this Union, enacted since the 10th day of May last, authorizing or relating to the suspension of specie payments by the banks, or any of them chartered by the said State Legislatures respectively.

Mr. SNYDER, on leave, submitted the following resolution, which, under the rule, lies over one day for consideration:

*Resolved*, That the Secretary of the Treasury inform this House at what time the Bank of the State of Missouri was made a deposit bank, and what amount of its own notes said bank had in circulation, and what amount of specie it had in its vaults when it was selected. Also, what amount of money is now in the hands of the receivers of public moneys in Illinois, and where the same is now ordered to be deposited.

Mr. LOOMIS, on leave, submitted the following resolution, which also lies over one day:

*Resolved*, That the Secretary of the Treasury prepare and report to this House as soon as may be convenient, a statement showing what method have been adopted for the safe keeping of the public funds, since the first organization of the Government under the Constitution; the length of time that each method has been in use, designating the several changes, and when made, and what losses under each method have been sustained by the Treasury, in consequence of defalcation of agents or officers so entrusted with the funds for safe keeping.

Mr. GHOLSON, on leave, submitted the following resolution, which was agreed to:

*Resolved*, That the resolution of this House, adopted on the 9th September instant, for the Government of the standing committees of this House, be rescinded, so far as the same relates to the Committee of Elections.

A joint resolution from the Senate for the appointment of Chaplains to the two Houses was laid on the table, inasmuch as the House had performed their part of that duty yesterday.

Two joint resolutions, 1st. For the appointment of a joint Committee on Enrolled Bills; and 2 For a joint committee on the Library, were severally concurred in, and the committees ordered to be appointed by the Chair on the part of the House.

On motion of Mr. TAYLOR,  
The House adjourned.

#### IN SENATE,

THURSDAY, Sept. 14, 1837.

Mr. BUCHANAN presented two remonstrances from the city and county of Philadelphia, against the admission of Texas into the Union; which were laid on the table.

Mr. WEBSTER here observed that he had in his possession several memorials on the same subject to present, but that he should defer doing so until he ascertained what was to be the action of the other body in reference to it; and he took the present opportunity of stating why he had not presented them.

Mr. WRIGHT, from the Committee on Finance, reported the following bills:

A BILL to authorize merchandise to be deposited in the public stores, and for other purposes.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That from and after the passage of this act, all goods, wares, and merchandise, imported into the United States, (except fruits and other perishable articles, which shall pay duties in cash at the time of entry,) may, at the option of the importer, be entered, and the duties thereon then paid, or be deposited, at the expense and risk of the importer, in such public or other stores as may be agreed upon between the importer and the collector, or officer of inspection of the revenue for the port where said goods, wares, and merchandise may be landed; and it shall be the duty of the collector

or officer, in all cases where goods, wares, or merchandise are so deposited, to see that they be kept securely, and under the joint locks of the inspector and the importer; and no delivery shall be made of such goods, wares, or merchandise, without a permit in writing, under the hand of the collector and naval officer of the port.

SEC. 2. *And be it further enacted*, That it shall be lawful for the importer, or his assignee, to withdraw, at any time, any portion of goods, wares, or merchandise, deposited as aforesaid, upon payment of the duties thereupon in cash, together with such storage and other expenses as may have accrued thereon.

SEC. 3. *And be it further enacted*, That if the duties on any goods, wares, or merchandise, deposited under the provisions of this act, or which shall remain unclaimed in the public stores, shall not have been paid in the manner aforesaid, at the expiration of three years from the date of importation, it shall be the duty of the collector to cause so much of goods, wares, or merchandise, as may be necessary, to be sold at public auction; and, retaining the sum required for the payment of the duties which have not been paid, together with the expenses of safe-keeping and sale of such goods, wares, or merchandise, shall return the overplus, if any, to the owner, or to his agent or lawful representative.

SEC. 4. *And be it further enacted*, That if any goods, wares, or merchandise, deposited under the provisions of this act, shall be embezzled, or fraudulently hid, or removed from any store or place wherein the same shall have been deposited, they shall be forfeited, and the person or persons so embezzling, hiding, or removing the same, or aiding or assisting therein, shall be liable to the same pains and penalties as if such goods, wares, or merchandise had been fraudulently landed without payment of duty.

SEC. 5. *And be it further enacted*, That all goods, wares, and merchandise deposited under the provisions of this act, may be transported from the public warehouses, or such stores as may be occupied for public use in one district to those in another district, under such safe regulations as the Secretary of the Treasury may prescribe.

SEC. 6. *And be it further enacted*, That no goods, wares, or merchandise deposited under this act, shall be taken or delivered from the public stores for consumption or for exportation, except upon due entry at the custom-house, and under care of some proper officer of the customs, and upon payment of the full amount of duties, when not immediately exported: *Provided, however*, That goods may be taken out or delivered for the purpose of transportation, from the public warehouses, in one district to those of any other district, as allowed in the fifth section of this act, without the payment of the duty thereon at the time of removal: *Provided, also*, that, in all such cases, twenty-four hours' previous notice shall be given in writing to the collector, with a specific description of the goods intended to be so transported, with the name of the vessel or vessels in which they were imported.

SEC. 7. *And be it further enacted*, That no drawback of the duties shall be allowed on the exportation of any goods, wares, or merchandise, which may have been deposited under the provisions of this act, in the public stores, and subsequently withdrawn therefrom, and the duties then paid; but the owner, if desiring to be relieved from the payment of duties, must export the goods at the time of their withdrawal from the public stores, in the manner before provided.

SEC. 8. *And be it further enacted*, That the Secretary of the Treasury be, and he is hereby, authorized to make such rules and regulations as may be necessary to carry this act into effect; and that all acts, or parts of acts, contrary to the provisions of this act, be, and the same are hereby, repealed. A BILL imposing additional duties as depositories, in certain cases, on public officers.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That the Treasurer of the United States, the treasurers of the Mint and its branches, all collectors of the customs, and surveyors acting in that capacity, all receivers of public money, and post-

masters, be, and they are hereby, required to keep safely, without loaning or using, all the public money collected by them, or otherwise at any time placed in their possession, till the same is ordered by the proper department to be transferred or paid out; in which cases, the transfers and payments shall be faithfully made by them as directed, and all other duties performed as fiscal agents, which may be imposed by this or former acts of Congress, or by any regulation of the Treasury Department made in conformity thereto.

SEC. 2. *And be it further enacted*, That all marshals, district attorneys, and others having public money to pay over, and all patentees wishing to make payment to the United States, may make the same to the Treasurer in this city, or to the Mint and its branches, when near or convenient; and, when not, may deposit the same with such collector, receiver, or other depository, as may be more conveniently situated, and may be selected for that purpose by the Secretary of the Treasury.

SEC. 3. *And be it further enacted*, That whenever the public money in the possession of any depository, by collection, transfer, or payment, shall be inconveniently situated for public use, or shall accumulate so as to exceed the amount of the existing bond of any such officer, any part of it, or the excess (as the case may be) shall either be drawn out for payments, or be transferred elsewhere to some other depository; or the Secretary of the Treasury shall require such additional security as may be considered proper and safe; and in the mean time, bonds, new and suitable in their terms, shall in all cases, at as early a day as possible after the passage of this act, be required of all depositories, in such sums and form as may be deemed reasonable and secure by the Solicitor of the Treasury, for the performance of all the duties required under the same or any previous laws.

SEC. 4. *And be it further enacted*, That the said officers, respectively may be allowed any necessary additional expenses for clerks, fire-proof chests, or vaults, or other necessary expenses of safe-keeping, transferring, and disbursing said moneys; all such expenses, of every character, to be first expressly authorized by the Secretary of the Treasury, whose directions upon all the above subjects, by way of regulation and otherwise, are to be strictly followed by all the said officers.

SEC. 5. *And be it further enacted*, That the Secretary of the Treasury shall be, and he is hereby, authorized to cause examinations to be made of the books, accounts, and money on hand, of the several officers charged by this act with the safe-keeping, transfer, and disbursement of the public moneys; and for that purpose to appoint special agents, as occasion may require, with such reasonable compensation as he may allow, to be fixed and declared at the time of each appointment; which said examinations, in all cases where the sum on hand usually exceeds three-fourths of the amount of the officer's bond, shall not be made less frequently than once in each year, and as much more frequently, in those and all other cases, as the Secretary, in his discretion, shall direct. The agents selected to make these examinations shall be instructed to examine as well the books, accounts, and returns of the officer, as the money on hand, and the manner of its being kept, to the end that uniformity and accuracy in the accounts, as well as safety to the public moneys, may be secured thereby.

SEC. 6. *And be it further enacted*, That, in addition to the examinations provided for in the last preceding section, as a further guard over the public moneys, it shall be the duty of each naval officer and surveyor, as a check upon the collector of the customs of their respective districts; of each register of a land office, as a check upon the receiver of his land office; and of the director and superintendent of each mint and branch mint, as a check upon the treasurers, respectively, of the said mints, at the close of each quarter of the year, and as much more frequently as they shall be directed to do so by the Secretary of the Treasury, to examine the books, accounts, returns, and money on hand, of the collectors, receivers, and treasurers, and to make a full, accurate, and faithful return to the Treasury Department of their condition.

SEC. 7. *And be it further enacted*, That the Sec-

retary of the Treasury shall, with as much expedition as the convenience of the public business and the safety of the public funds will permit, withdraw the balances remaining with the late and present depositories of the public moneys, and confine the safe-keeping, transfer, and disbursement of those moneys to the depositories established by this act.

SEC. 8. *And be it further enacted*, That, for the payment of the expenses authorized by this act, a sufficient sum be, and the same is hereby, appropriated, to be paid out of any money in the Treasury not otherwise appropriated.

SEC. 9. *And be it further enacted*, That all officers charged by this act with the safe-keeping, transfer, and disbursement of the public money, are hereby required to keep an accurate entry of each sum received, and of the kind of money in which it is received, and of each payment or transfer, and of the kind of currency in which they are made; and that if any one of the said officers shall convert to his own use, in any way whatsoever, or shall use by way of investment in any kind of property or merchandise, or shall loan with or without interest, any portion of the public moneys entrusted to him for safe-keeping, disbursement, transfer, or for any other purpose, every such act shall be deemed and adjudged to be an embezzlement of so much of the said moneys as shall be thus taken, converted, invested, used, or loaned, which is hereby declared to be a high misdemeanor; and any officer or person convicted thereof before any court of the United States of competent jurisdiction, shall be sentenced to imprisonment for a term of not less than two, nor more than five, years, and to a fine equal to the amount of the money embezzled.

A BILL to revoke the charters of such banks, in the District of Columbia, as shall not resume specie payments within a limited time, and to suppress the circulation of small notes therein.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That all penalties imposed on the banks in the District of Columbia, by their charters, or otherwise, for a suspension of specie payments, be remitted: *Provided*, They resume specie payments for all their bills under ten dollars within sixty days, and of all others within six months from the passing of this act: *And provided, also*, That the said banks, within thirty days from the passing of this act, shall cease to pay out the notes, bills, or obligations of any corporation, company, or individual, which shall not redeem the same, on demand, in specie: *And provided, further*, That the said banks shall forthwith cease to receive in payment, or on deposit, or to pay out, any note, bill, or obligation, issued by any other bank, or by any corporation, company, or individual, of a less denomination than five dollars.

SEC. 2. *And be it further enacted*, That if any of said banks shall fail to comply with the conditions specified in the foregoing section of this act, the charters thereof shall be revoked; and it shall be the duty of the Secretary of the Treasury to appoint three commissioners for liquidating and settling the accounts and affairs thereof, and such prosecutions shall be instituted by the District-Attorney of this District, for any violation of their obligations to the Government and the community, as the facts and the law applicable to the case may render proper, beyond what is contained in the provisions of their charters and in this act: *Provided, nevertheless*, That the remedies against said banks, for their liabilities and debts, given in their charters, shall remain in full force and effect against the property, money, credits, and effects thereof, in the hands of the commissioners appointed to liquidate their affairs.

SEC. 3. *And be it further enacted*, That after the expiration of thirty days from the passage of this act, it shall be unlawful for any individual, company, or corporation, to issue, pass, or to offer to pass, within the District of Columbia, any note, check, draft, bank bill, or any other paper currency, of a less denomination than five dollars; and if any person or corporation shall violate the provisions of this section, the person so offending, or, in case of any corporation so offending, the officers of any such corporation for the time being, shall be liable to indictment by the grand jury of the county within the District where the

offence shall have been committed; and the person so offending, or the officers of the corporation so offending, shall, on conviction thereof, be fined in a sum not exceeding fifty dollars, at the discretion of the court, for every offence: one-half of said fine shall be paid to the prosecutor, the other half shall be for the use of the county where the offence shall have been committed; and the person so offending, and the officers of any corporation, shall also be liable to pay the amount of any note, bill, check, draft, or other paper, constituting part of such currency, to any holder thereof, with all costs incident to the protest and legal collection thereof, with fifty per cent. damages for non-payment on demand, to be recovered by action summarily and without delay, and with a right of immediate discovery on oath, in all cases where the defendant shall deny the issuing, or passing, or attempting to pass, the note, bill, check, draft, or other paper in question; and in case of judgment for the plaintiff, execution thereon shall be had forthwith; and it shall be the duty of the District Attorney of the District of Columbia to commence prosecutions against all persons and every corporation offending against this section, of which he shall have knowledge or probable information; and, in case of corporations, the prosecution shall be against the president, or any director or cashier thereof, for the time being; and it shall be the duty of the grand jurors to present all such offences of which they shall have knowledge or probable information; and that no member of a grand jury shall be ignorant of his duty in this particular, it shall be the duty of the court having cognizance of all offences against this section to give the same in charge to the grand juries, at the commencement of the first term after the passage of this act.

Mr. HUBBARD offered a resolution that the time of meeting hereafter shall be 10 o'clock, until otherwise ordered; which lies on the table.

#### STATE DEPOSITES.

The Senate proceeded to the consideration of the special order, the bill to postpone the payment of the fourth instalment of the deposits with the States.

Mr. RIVES said he understood that this day the Committee on Finance expected to make a full report on the subjects which had been referred to them. But there was one subject most interesting to the country, on which they had not reported at all; they had reported no bill to designate the kinds of funds in which the public dues are to be received. As Mr. R. had understood it to be the general sense of the Senate, that no action should be had on any measure till all should be reported, he would now move that the Senate adjourn.

Mr. WRIGHT said the Committee on Finance had taken up the Message of the President, and the Report of the Secretary of the Treasury, had given them a full consideration, and had now reported all the measures which they proposed to report, or which they deemed it their duty to report. They had considered the subject mentioned by the Senator from Virginia, and had concluded to let the law on that subject remain as it is.

Mr. RIVES said, that not having an opportunity to know the views of the committee, he had taken it for granted that they would report on every subject embraced in the Message and Treasury report, both of which, he believed, had suggested that it ought to be determined in what kind of funds the revenue should be collected. It was now announced by the chairman that no communication from the committee would be made on the subject. Mr. R. would, therefore, proceed on the assumption that the committee intended to leave the laws on that subject as they now are; and, that being the case, and Mr. R. believing that all the measures proposed and to be proposed, would have a mutual bearing and dependence on each other; and believing it to be infinitely more important to the country that what Congress should do should be well done, rather than done quickly, Mr. R. moved that when the Senate adjourned it should adjourn to meet on Monday next, that all the bills reported on the subject might be examined, compared, and carefully considered by members before the Senate came to act on them. Mr. R. said it was as inconvenient for him to remain here as it would be for any one;

but whatever the inconvenience, he preferred that all measures should be duly and amply considered.

Mr. NILES adverted to the fact that they were now on the second week of the session, which was expected to continue but a few weeks in all, and they had yet made no progress. He commended highly the diligence and expedition of the Committee on Finance, and he had heard with much surprise a proposition of delay in the Senate. He thought it would serve still more to unsettle the public mind; and he could not answer it to his constituents to agree to any delay.

Mr. WRIGHT said it was but justice to himself and the committee to say, that it was not their purpose to press any measure unkindly, unnecessarily, or prematurely upon the Senate. And even if such had been their disposition, it was not in their power. But Mr. W. had been requested by the members of the committee to say that the committee had already reported all that they expected to report on the subject. The committee had had free and full consultations with the Secretary of the Treasury on the subjects referred to in the Message and the report, and had now submitted to the Senate all the measures which it appeared to them proper to propose. The facts before them showed a high necessity of speedy action, on the two first bills at least, with which the latter bills had no intimate connection. Mr. W. would, therefore, ask that the first (the postponement of the deposits) bill might be considered this morning, and to this effect several Senators had expressed to him their wishes. Under these evidences of such a disposition in the body, no one could suppose that he (Mr. W.) had any desire unkindly to press the action of the Senate on any subject.

Mr. RIVES said he did not attribute any unkindness to the Senator. He knew too well his accustomed parliamentary courtesy to suspect him of such a disposition. But that honorable member, as well as the honorable member from Connecticut, must perceive, that there were other members whose situation was materially different from theirs. They from the first had free access to all the documents on the subject, and the advantage of free communication with the head of the Treasury Department. But such was not the case with all the members, and it was not so with himself. He and others had not been aware of the character of the President's Message, till it was communicated; and they had not prepared themselves to act on an assumption of what it might be. Mr. R. therefore now asked the privilege of time to consider the subject for himself; and not for the purpose, as had been intimated by the Senator from Connecticut, of private consultation. Mr. R. was determined to act on his own responsibility, without private consultation, and if there had been, or was to be, any such consultation, it was not by him. The expectations of the constituents of the Senator from Connecticut were different from those of Mr. R.'s constituents, that they should merely set the machine of Government in operation, and then go home. Mr. R. was not sent here for the relief of the Government merely, but for the relief of the people first; and especially Mr. R. did not wish to cast the slightest reproach on the Committee on Finance, but they would permit him to say, that he did not perceive in the measures which the committee had proposed, any thing to relieve the sufferings of the community. They were merely convenient for the Government, and were so far important. But Mr. R. felt bound to his constituents to provide some remedy, if any could be found, for their distresses, and those of the community at large; and there was one which Mr. R. thought very obvious. Restore but confidence through the country, and it would again at once be erect and prosperous. But where was any thing from the committee that could have any such tendency?

Such a measure Mr. R. was desirous to see; and if it should appear from no other quarter, he would take it upon himself, humble as he was, to offer some measure having a tendency to produce that result, and relieve the distresses of his bleeding country. Gentlemen had compared the economy of a short session with the great interests of the country. But Mr. R. thought if economy alone were to be con-

sidered, it would be more economical and save the mileage of a double session, to hold but one session instead of two, and to go at once upon the general business of the nation.

Mr. R. had no disposition to remain here; his private interests demanded that he should be at home. But he would sacrifice every such interest, and every personal convenience, on the altar of his country. Now, if ever, was the time to restore confidence; and now, while the elements of national relief and prosperity were lying dormant before them, and only requiring the breath of Congress to put them in action, he called upon gentlemen not merely to think of providing facility for the operations of Government, but to look to the great interests of the people.

Mr. R. believed that something might be done for the good of the community. If the Government could do harm, it could also do good. He meant no reproaches—all Governments were capable of doing harm, as well as good; and it was peculiarly incumbent on ours, at the present crisis, to do what it could for the good of the country, and to the full extent of its power. But they ought not to act on trust. However others might act, Mr. R. could not act, to his satisfaction, without examination by himself. He repeated, that he deemed it infinitely more important for them to act well than hastily. He might not be so happy as to comprehend these subjects as readily as others; but he deeply felt their importance, both to the present welfare, and to all the future destinies of the country.

Whether the session should be long or short, whether continued to the next or not, depended on the wisdom and responsibility of Congress. But if these great and important subjects could not be well and deliberately disposed of before the first of December, Mr. R. would, by all means, remain; and he felt now ready to take the oath of the members of the French convention, not to disperse till the country should be relieved. As yet, Mr. R. had not seen one measure proposed for this purpose.

Mr. CALHOUN was understood to say that no one was more deeply impressed than he, with the difficulty and danger of the present emergency. Of the many difficult scenes through which the country had passed in the last twenty-five years, this was by far the most difficult. Seeing and believing this, Mr. C. was here to do his duty, regardless of all other considerations. He made a few more remarks as to the remedies proposed and those which it is best to adopt; the most significant and important parts of which were uttered too low to be distinctly heard by the reporter. He urged with much earnestness the importance of acting with promptitude and boldness.

Mr. WEBSTER said he felt himself bound, in pursuance of his pledge, to give as early an opportunity of considering the measures proposed by the Committee on Finance as was consistent with considerable legislative deliberation. That which governed him in this case, to a great degree, was the apprehension which he felt, (perhaps it might be erroneous and unfounded,) that no measures were likely to be offered to Congress, under the recommendation of the Message or Treasury report, which would meet with his approbation.

In the mean time, Mr. WEBSTER was as ready as the Senator from Virginia (Mr. RIVES) to stay here till May next, if necessary; but whatever procrastination was indulged in here, was a protraction of the evil oppressing the country. He hoped, therefore, the Senator from Virginia would agree to consent that the measure first proposed by the committee be now brought before the Senate, and be now examined, because there are other measures dependent upon it. The first step, as it seemed to him (Mr. W.) the most proper to be decided upon was, whether the payment of the fourth instalment should be postponed, because the period was now near at hand when that instalment was to have been paid. This question ought to be settled one way or the other. They were bound, in consideration of the great suffering and distress now oppressing the country, to make trial of some measures.

Mr. RIVES said, that as it appeared to him there was a disposition in the Senate to take up this bill,

and as he understood the Senator from Massachusetts (Mr. Webster) felt a personal interest in its immediate consideration—intending to deliver his sentiments on it to-day—he (Mr. R.) would withdraw his motion. It was, however, his decided opinion, that the action demanded of them on all these measures was not simply and merely to put the Government in motion again, but to provide effectual and immediate relief for the people in preference to affording aid, in the first place, to Government. This object he (Mr. R.) thought not very likely to be promoted by taking up this bill; but, in compliance with the general opinion of the Senate, he should withdraw his motion.

Mr. WEBSTER then arose, and delivered his sentiments at large against the Postponement bill.

Mr. WRIGHT said it might become him to say a few words in relation to the bill before the Senate. His position in reference to this and other bills, perhaps, required him to do so. He would, however, confine himself strictly to the present subject, and to the most brief justification of his own course, and that of a majority of the Committee on Finance, who had concurred with him in reporting the bill.

Immediately upon the appointment of the committee, and the reference to it of the important subjects treated of in the Message of the President, and the Report of the Secretary of the Treasury, the committee found that the Treasury of the United States was, very soon, to be in want of means to meet the current demands upon it, without regard to any further transfer to the States. They also found that this fourth instalment of the deposits with the States was to become payable on the first day of October, and amounted to about nine and one-third millions of dollars.

The state of the Treasury, as developed by the Report of the Secretary of the Treasury, was, as he now recollected, and he thought he could not be materially mistaken, that, at the time when the statement appended to that report was made up, about the first day of the present month, (he believed the exact date was the 28th of August,) there was in the Treasury, subject to draft, available and unavailable, but eight millions one hundred and some odd thousand dollars. The report was printed, and upon the table of every Senator, and would verify his correctness in this particular. This amount was exclusive of the sums already deposited with the States, being some twenty-eight millions.

To arrive at what would be the condition of the Treasury on the first of October, the expenses of the present month, which, from drafts already made and anticipated, were estimated at about two and a half millions, must be deducted from the eight millions, one hundred and odd thousands; thus leaving in the Treasury, subject to draft, on the first day of October, less than six millions, without the transfer of a dollar to the States towards the October instalment. This, too, included all the funds in the Treasury subject to draft for payments, or transfers to the States, whether available or not, upon the drafts of the Treasurer; the funds on deposit with the States not being taken into the computation.

If, then, the October instalment was to be transferred to the States, all the means in the Treasury of all descriptions, on the day when that instalment was, by the deposit law, made transferrable, would not be equal to two-thirds of the amount, and money must be borrowed upon the credit of the United States, to supply the deficiency.

Another and stronger view, however, was presented to the committee by the head of the Treasury Department. The largest portion of the funds in the Treasury at present, and which would remain there on the first of October, were wholly unavailable upon the drafts of the Treasurer. They were in the western and southwestern banks; and experience had already shown that the drafts of the Treasurer upon these banks would not be received in payment by the public creditors. It was equally proved that the States, other than those in which the banks were located, would not take those drafts and give their obligations for a repayment of the amount in money, in pursuance of the provisions of the deposit law.

The transfer to the States, therefore, could not be made even to the amount of the funds in the Treasury subject to draft, by reason of the character of the funds to be drawn upon; and, if to be made, a loan, to a much greater amount than the deficiency of those funds upon paper, would be rendered indispensable, from the unavailable condition of these funds.

Still, it would be seen by the Senate, that this disposition of the funds in the Treasury, and of the public credit, would leave the Treasury without a dollar to answer the current demands upon it. The appropriations for the year were large, almost beyond example, and the current calls upon the public Treasury must be measured by them. Hence it had been an object of primary interest with the Secretary to devise the means for carrying on the Government, and fulfilling its obligations to the public creditors, and in reaching that object he had, as he Mr. W. considered, wisely and properly, suspended his efforts to make this last transfer to the States. In pursuance of this necessity, he had told Congress, in his printed report, that he should make no movements towards the accomplishment of that object, until the action of Congress should signify its will that that transfer should still be made, and should provide the means for making it. These facts and conclusions were fully before the committee.

It then became necessary for them to see what would be the state of the public Treasury, upon the supposition that the October instalment of the deposit with the States should be withheld. In prosecuting that inquiry, they found that the funds in the Treasury, subject to draft, were, to so great an extent, unavailable, that it would be indispensably necessary to resort to the use of the credit of the Government, in some form, to anticipate the practical use of the unavailable portions of those funds for the purpose of current payments.

At this stage of the inquiry, two other important interests, both public and private in their character, pressed themselves upon the attention of the committee. In any settlement with the late deposit banks, which should have proper regard to the present deranged and depressed state of the business of the country, and to the security of the public moneys yet remaining in their possession, the committee were forced to the conclusion that indulgence to these institutions, beyond their legal liabilities, was indispensable. The conclusions of the committee upon this point had been embodied in the shape of a bill, and was now before the Senate in a printed form. The other great interest to which he referred was a similar indulgence upon the revenue bonds. There, also, the committee had reported a bill which was before the body. In both cases, the least indulgence had been proposed, which the committee believed to be consistent with the great private interests of the community, or the security of the public property involved. They had been induced to believe, that the time granted to the banks was the least which would enable them to meet the payments in the manner required by law, and that any dependence upon a more speedy collection of the merchants' bonds would result in disappointment to the public Treasury, and a consequent failure to pay the public creditors.

It being assumed that Congress would agree with the committee in these conclusions, and that these bills would meet with approbation, what then would be the state of the Treasury with reference to a transfer of the October instalment to the States?

Mr. W. said he understood the estimates of the Department to be, that without these indulgences to the banks and the merchants, and with the postponement of the October instalment of the transfer to the States, the whole means in the Treasury might be adequate to its wants, in case Congress should be willing to grant the use of the public credit temporarily, that that portion of the funds which were at present unavailable might be brought into practical use, until time should render them available for the redemption of that credit. If those indulgences should be granted, then the use of the public credit would be required beyond the current year, because material portions of the existing means, and of the otherwise accruing revenue,

would be placed without the reach or control of Treasury for more than that period.

Upon these calculations and hypotheses, the bills of the committee had been framed, and it was now his duty to give these facts and conclusions practical application to the measure under discussion.

This was a bill to postpone the October instalment of the transfer to the States. If he had been correct in his statements, and had made himself intelligible to the Senate, it would be seen that nothing existed in the Treasury out of which this transfer could be made, and that nothing within its power could enable it to make it without the aid of Congress. It would also be seen that the whole means of the Treasury were inadequate to meet the current calls upon it without the temporary aid of the credit of the nation; and that, if a reasonable indulgence were granted to public debtors, (such as the condition of the country and the security of eventual collections seemed to demand,) the use of that credit must extend beyond the current year, and could, at best, be only eventually met and redeemed by the means of the Treasury, existing, or in prospect, without a further transfer to the States.

In view of these facts, Mr. W. said his own mind had been brought to this simple and plain conclusion: that the United States had no longer any moneys to be safely kept by the States; that if the October instalment of the transfer provided for by the deposit law of 1836 was made, the means to make it must be borrowed upon the credit of the United States; and that Congress must place itself in the singular position of using the public credit to borrow money, merely that it might be safely kept by the States when it was obtained. He understood these provisions of the deposit law, upon their face, to be mere provisions for the safe-keeping of the public money. He understood this to be the object of those who advocated and supported that law at the time of its passage. In that sense he was disposed to regard it now; and he did not, therefore, view it as creating any claim in favor of the States, or as imposing any debt upon the United States. If, therefore, we were called upon to borrow money to fulfil the provisions of that law, he could only view it in the light of a call upon us to borrow money, merely that it might be safely kept when so borrowed. He had not felt, and could not feel, himself authorized to recommend a loan upon the credit of the nation for such a purpose. He believed he spoke the sentiments of those of his colleagues upon the committee, when he said that these were the views which had actuated him and them in consenting to report this bill.

Mr. W. said he owed it to himself to say that he had felt most sensibly the remarks of the honorable Senator from Massachusetts (Mr. Webster) as to the inconveniences and disappointments which must grow out of withholding the transfer of this instalment to the States. With a much less knowledge of the varied business and pecuniary affairs of our extended country than that distinguished Senator, he had not been insensible to these considerations. The course pursued by his own State, in the disposition of this money, had compelled him to be awake to them. The law of his State for the investment of its portion of this money had placed the matter even beyond its control, and had compelled its chief fiscal officer, long since, to announce to its citizens that this instalment would be paid from the treasury of the State, whatever might be the action of Congress upon the subject. This would, beyond doubt, be done, and those who sent him here, and whom it was his duty and desire faithfully to represent, should this bill pass, would be compelled to indemnify, from their own public funds, the individuals interested as borrowers, or these moneys, against disappointment, damage, or loss, from the action of Congress. Yet, under these delicate and difficult circumstances, he had not been able to convince himself that he could properly do otherwise than to support the bill. He owed a high duty to those constituents, but he owed, in his estimation, a higher to the nation and to the Constitution of his country. He could not think that the power granted to Congress to borrow money upon the credit of the United States could

be properly exercised, for the mere purpose of raising money to be safely kept; and this he must consider the simple question presented. He might be mistaken in this view of the matter, but such was the deliberate conclusion of his mind, upon the most mature reflection, and that conclusion must govern his action upon the bill, as it had done his action as a member of the committee which reported it.

Having said thus much, Mr. W. said, he would only correct two or three errors of fact into which the honorable Senator who had just resumed his seat (Mr. Webster) seemed to him to have fallen, and he would detain the Senate no longer.

The honorable Senator seemed to suppose that the means to make this transfer to the States were in the Treasury, and that the only difficulty, separate from the other demands upon it, grew out of the present unavailable character of those means. The statements he had already made, had shown the error of this hypothesis. He had already shown that the whole means in the Treasury, even when the Secretary of the Treasury made his report, at the commencement of our present session, of whatever character, whether available or not, were less, by more than a million of dollars, than the instalment required to be transferred to the States under the deposit law. He had further shown that those means, such as they were, were, before the first of October, when that transfer was required to be made, to be still further diminished by the whole expenses of the Government for the present month, ascertained and estimated to amount to two and a half millions of dollars. Hence it would follow, that the whole means in the Treasury on the first day of October next, must be from three and a half to four millions less than the transfer required. It was in vain, therefore, Mr. W. said, to escape from the conclusion, that if Congress should insist upon this transfer, it must authorize a loan of money upon the public credit, to enable the Treasury to make it; in other words, that it must authorize a loan of money upon the credit of the United States, that that money, when loaned, may be deposited with the States for safe keeping.

Another error of the honorable senator (Mr. Webster) which he felt bound to correct, was in his strictures upon the recommendations of the Secretary of the Treasury, as to the manner of issuing treasury notes. The honorable senator had criticised this part of the report of the Secretary of the Treasury with some severity, and had held him up to the Senate and the country as striking out a new path for the supply of the Treasury; as recommending the issue of paper money; of a description of paper similar to that which we know by the denomination of "continental money;" and of doing this for the first time since the organization of the Government under the Constitution. The fault complained of consisted in a recommendation, merely discretionary and alternative, to issue Treasury notes bearing no interest, and payable to the bearer, in case the public creditors should be found willing to receive such notes in payment of their demands against the Government, at par; otherwise, to give the notes such an interest as would bring them to par.

Mr. W. said as the committee, in the bill they had reported, had not followed this recommendation of the Secretary, it would be seen that no question was depending before the Senate, either in the bill now under discussion, or in any other, which rendered this point material; but he was sure his object would be fully understood and appreciated in making this correction. It was simply to defend this public officer against a mistaken accusation. It was not necessary for him to defend, at this time, the soundness of the recommendation, but to protect the Secretary against the charge of being the author of a principle now supposed to be so new and so dangerous. To do this, it was only necessary for him to read the third section of the act of the 24th of February, 1815, authorizing an emission of Treasury notes, in which all these dangers would be found to be embraced, adopted, and made imperative, as a part of the laws of the land.

[Mr. W. here read the section of the act, as follows:

"Sec. 3. And be it further enacted, That the said

Treasury notes shall be prepared of such denominations as the Secretary of the Treasury, with the approbation of the President of the United States, shall, from time to time, direct; and such of the said notes as shall be of a denomination less than one hundred dollars shall be payable to bearer, and be transferrable by delivery alone, and shall bear no interest; and such of the said notes as shall be of the denomination of one hundred dollars, or upwards, may be made payable to order, and transferrable by delivery and assignment, endorsed on the same, and bearing an interest from the day on which they shall be issued, at the rate of five and two-fifths per centum per annum; or they may be made payable to bearer, and transferrable by delivery alone, and bearing no interest, as the Secretary of the Treasury, with the approbation of the President of the United States, shall direct."

What now, Mr. W. asked, was the condition and the fault of the Secretary? He had found the public treasury in want of means to pay the public creditors. The exigency had grown out of a reverse in trade and business, sudden and universal, and the use of the credit of the Government, in some form, seemed to him indispensable. It became his duty to suggest to Congress the means and the mode of supplying the Treasury. He examined the legislative history of the Government in former cases of embarrassment at the Treasury, and found, among other expedients, that emissions of Treasury notes paying no interest, payable to bearer, transferrable by delivery alone, and without any restriction as to the denomination of the notes to be so issued, had been authorized. Among a variety of plans to meet the present wants, he suggested this, recommending that no note should be issued for a less amount than \$20. Had he attempted to introduce any new principle? Certainly not. Was his conduct, in making this suggestion in conformity with the previous practice of Congress itself, deserving of the high censure which had been bestowed upon it? He, Mr. W. thought not.

A single other reply to the honorable Senator. That gentleman had supposed the President most inconsistent and contradictory with himself, in remarking, generally, in his message, that he did not recommend to Congress measures for the regulation of the general currency of the country, or of the foreign and domestic exchanges, because he could not find in the Constitution any power conferred upon Congress to regulate these matters; and then, in the same message, recommending a bankrupt law, as applicable to banks and bankers. Where was the inconsistency, or contradiction? The President had said he omitted to make further recommendations upon these subjects than those found in the Message, because he could not find, and did not believe, that Congress possessed further power over them; but he did recommend a bankrupt law, because the power to pass bankrupt laws is conferred upon Congress by the Constitution, in express terms. He did, therefore recommend a bankrupt law, which the Constitution authorizes, and he did not recommend anything else, upon these points, because the Constitution authorizes Congress to do nothing else. Is this inconsistent?

The debate was further continued by Messrs. BUCHANAN, WEBSTER, and CALHOUN.

Mr. BUCHANAN then offered the following amendment, to be inserted at the end of the bill:

"Provided, that the three first instalments under the said act shall remain on deposit with the States until otherwise directed by Congress."

Mr. NILES asked for the yeas and nays, and they were ordered; and the amendment was adopted by the following vote:

YEAS—Messrs. Allen, Bayard, Black, Brown, Buchanan, Calhoun, Clayton, Crittenden, Fulton, Grundy, Kent, King of Alabama, King of Georgia, Knight, Linn, Lyon, Morris, Nicholas, Norvell, Preston, Robbins, Robinson, Sevier, Smith of Indiana, Southard, Strane, Swift, Tallmadge, Wall, Webster, White, Williams, and Young—33.

NAYS—Messrs. Benton, Clay of Alabama, Hubbard, Niles, Pierce, Rives, Roane, Ruggles, Smith of Connecticut, Tipton, Walker, and Wright—12.

Mr. TALLMADGE moved to strike out all after the enacting clause, and insert the following:

"That the money deposited and to be deposited with the States under the 13th section of the act of June, 1836, shall remain on deposit with the States until otherwise directed by Congress."

Mr. NILES asked for the yeas and nays, which were ordered, and the amendment was rejected—aye 18, nays 27, as follows:

YEAS—Messrs. Bayard, Clayton, Crittenden, Fulton, Kent, Knight, Lyon, Nicholas, Norvell, Preston, Robbins, Smith of Indiana, Southard, Swift, Tallmadge, Tipton, Webster, and White—18.

NAYS—Messrs. Allen, Benton, Black, Brown, Buchanan, Calhoun, Clay of Alabama, Grundy, Hubbard, King of Alabama, King of Georgia, Linn, Morris, Niles, Pierce, Rives, Roane, Robinson, Ruggles, Sevier, Smith of Connecticut, Strane, Walker, Wall, Williams, Wright, and Young—27.

The question was then taken on the engrossment of the bill.

Mr. WALKER asked for the yeas and nays, and they were ordered, and were as follows:

YEAS—Messrs. Allen, Benton, Black, Brown, Buchanan, Calhoun, Clay of Alabama, Fulton, Grundy, Hubbard, King of Alabama, King of Geo., Linn, McKean, Morris, Niles, Pierce, Rives, Roane, Robinson, Ruggles, Sevier, Smith of Conn., Strane, Walker, Wall, Williams, and Wright—27.

NAYS—Messrs. Bayard, Clay, of Ken., Clayton, Kent, Knight, Nicholas, Norvell, Preston, Crittenden, Robbins, Smith of Indiana, Southard, Swift, Tallmadge, Webster, White, and Young—17.

The bill was then ordered to be engrossed for a third reading.

The Senate then adjourned.

## HOUSE OF REPRESENTATIVES.

THURSDAY, September 14, 1837.

Petitions and memorials were presented by

Mr. ADAMS of Massachusetts.

Mr. SIBLEY of New York.

Messrs. BIDDLE, PAYNTER, and SHEFFER of Pennsylvania.

Mr. JENIFER of Maryland.

Messrs. HUNTER, ALLEN, and GOODE of Ohio.

Mr. MAY of Illinois.

[Mr. MAY presented the petition of sundry inhabitants of Lasalle county, praying the establishment of a post route from Peru, in Lasalle county, to Princeton, in Putnam county, via Bureau, in Bureau county.]

Mr. LEWIS of Alabama.

Messrs. HARRISON and MILLER of Missouri.

[Mr. HARRISON presented a memorial of the Chamber of Commerce, city of St. Louis, on the subject of the currency, &c.; referred to Committee of Ways and Means, and ordered to be printed.]

Mr. CAMBRELENG, from the Committee of Ways and Means, reported the following bill; which was read twice, and referred to a Committee of the Whole on the state of the Union.

A BILL authorizing a further postponement of the payment of duty bonds and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury be, and he hereby is, authorized to grant such further extension of credit upon all bonds for duties now outstanding, as shall make the whole extension of credit upon each bond six months from the time when the original bond became due and payable, making the extension in each case to depend upon the same conditions as to additional security, the payment of interest, and other terms, which have been prescribed by the Treasury Department to the extension of revenue bonds since May last: *Provided*, That nothing herein contained shall be construed to include any existing bonds where the parties to the same have not, since the bonds became payable, given additional security, or made part payment, and are, by the proper officers of the Government, considered insolvent, or unsafe securities for the payment of their bonds.

Sec. 2. *And be it further enacted*, That the additional credit of six months, granted by the first section of this act upon outstanding duty bonds, shall be upon the same terms and conditions granted upon all bonds for duties which may be given during the period of one year from and after the 1st day of October, in the year one thousand eight hundred and thirty-seven.

Sec. 3. *And be it further enacted*, That where the security in any bond which has been, or may hereafter be postponed, is entirely satisfactory, the principal or sureties in the same shall not be disabled from being, in the mean time, till the period of postponement provided for by this act expires, received as principal or sureties in other bonds for duties, notwithstanding the bond first given may not have been actually paid, discharged, or extended, before, or on the day it fell due: *Provided*, That such principal and sureties shall be found, in all other respects, safe and satisfactory security for the bonds to which they may be proposed as parties.

Sec. 4. *And be it further enacted*, That a credit of one, two, and three months shall be allowed on the duty on all merchandise now remaining in the custody of the customs upon which the duties are payable in cash, and that the bonds received for such duties shall be in equal instalments bearing interest at the rate of six per cent. per annum, and in the form and upon the conditions prescribed by existing laws, and by this act: *Provided*, That the said merchandise shall be entered on or before the fifteenth day of October next.

Sec. 5. *And be it further enacted*, That the operation of all prior laws, and parts of laws, so far as inconsistent with this act, be suspended in those particulars in which they may conflict with, or differ from, its provisions, until this act shall cease by its own limitation.

Mr. CAMBRELENG presented to the House an abstract which had been prepared at the Treasury Department, giving certain information in relation to the collection of the revenues in Great Britain and France; which was laid on the table, and ordered to be printed.

Mr. CUSHMAN submitted the following resolution:

*Resolved*, That the operation of the 16th rule of the House, in relation to the call of the States for the presentation of petitions, be suspended during the present session of Congress.

After a few remarks from Mr. CUSHMAN, in support of the resolution, and by Messrs. ADAMS, TILLINGHAST and MERCER, in opposition thereto, Mr. C. withdrew the resolution.

Mr. GARLAND, of Virginia, submitted, on leave, the following resolution, which was considered and adopted:

*Resolved*, That the Secretary of the Treasury communicate to this House, all the orders issued, and correspondence with the several deposite banks, in reference to the transfers and payments of the several instalments due to the State Governments under the deposite act of the day of July, 1836.

*Resolved*, That he communicate to this House the monthly statements of the condition of the deposite banks, from the 1st day of January last to the present time.

*Resolved*, That he communicate a statement of each draft, and in whose favor drawn, upon which specie was demanded and protested for non-payment by any deposite bank; also, each State Government which has made a demand of specie and not paid, and the time when.

#### RULES AND ORDERS OF THE HOUSE.

The House then took up the report of the Select Committee on the Rules, and the report being read, the following amendments were severally considered and adopted:

1st. Strike out of the 17th rule all after the word "Speaker," in the last clause, and insert—

"Shall dispose of the business on his table in the following order, viz:

"First. Messages and other Executive communications.

"Second. Messages from the Senate, and amendments proposed by the Senate to bills of the House.

"Third. Bills and resolutions from the Senate on their first and second reading, that they be referred to committees and put under way; but if, on being

read a second time, no motion be made to commit, they are to be ordered to their third reading, unless objection be made; in which case, if not otherwise ordered by a majority of the House, they are to be laid on the table in the general file of bills on the Speaker's table, to be taken up in their turn.

"Fourth. Engrossed bills, and bills from the Senate on their third reading.

"Fifth. Bills of the House and from the Senate, on the Speaker's table, on their engrossment, or on being ordered to a third reading, to be taken up and considered in the order of time in which they passed to a second reading.

"The messages, communications, and bills on his table having been disposed of, the Speaker shall then proceed to call the orders of the day."

Amend the 90th rule, by inserting after the words "on what day," "if no motion be made to commit, the question shall be stated on its engrossment; and if it be not ordered to be engrossed on the day of its being reported, it shall be placed in the general file on the Speaker's table, to be taken up in its turn."

2d. Insert in the 21st rule, after the word "proceed," in the ninth and tenth lines, the words "in case any member object."

3d. To insert a new rule after the 21st, to read as follows: "If a member be called to order for words spoken in debate, the person calling him to order shall repeat the words excepted to, and they shall be taken down in writing at the Clerk's table; and no member shall be held to answer, or be subject to the censure of the House, for words spoken in debate, if any other member has spoken, or other business has intervened, after the words spoken; and before exception to them shall have been taken."

4th. Add to the 25th rule the following clauses: "Every member shall remain uncovered during the sessions of the House;" and "No member or other person shall visit or remain by the Clerk's table while the ayes and noes are calling, or ballots are counting."

5th. From the 26th rule, strike out from the fourth line the word "present," and insert in lieu thereof the following words: "within the bar of the House;" and,

6th. Add to the rule the following clause: "And when any member shall ask leave to vote, the Speaker shall propound to him the question—'Were you within the bar when your name was called?'"

7th. Add to the 28th rule the following clause: "All motions to excuse a member from voting, shall be made before the House divides, or before the call of the yeas and nays is commenced; and any member requesting to be excused from voting may make a brief verbal statement of the reasons for making such request, and the question shall then be taken without further debate."

8th. In lieu of the 45th rule insert the following:

"Petitions, memorials, and other papers addressed to the House, shall be presented by the Speaker, or by a member in his place; a brief statement of the contents thereof shall be made verbally, by the introducer; they shall not be debated on the day of their being presented, nor on any day assigned by the House for the receipt of petitions after the first thirty days of the session, unless where the House shall direct otherwise, but shall lie on the table, to be taken up in the order in which they were presented."

9th. To insert after the 57th rule the following rules as the 58th and 59th rules:

"RULE 58. At every session of Congress, commencing on the first Monday of December, it shall be the duty of the Committee of Ways and Means, within thirty days after their appointment, to report the general appropriation bills—for the civil and diplomatic expenses of Government; for the army, the navy, and for the Indian department and Indian annuities; or in failure thereof, the reasons of such failure; and general appropriation bills shall be in order in preference to any other bills of a public nature, unless otherwise ordered by a majority of the House.

"RULE 59. No appropriation shall be reported in such general appropriation bills, or be in order as an amendment thereto, for any expenditure not previously authorized by law."

The following amendment was then taken up for consideration:

10th. Add to the thirty-fifth rule the following clause:

"On a motion for the previous question, and prior to the seconding of the same, a call of the House shall be in order; but after a majority shall have seconded such motion, no call shall be in order prior to a decision of the main question."

Mr. ADAMS moved to amend the amendment, by adding thereto the following:

"And the previous question shall be in this form: 'Shall the main question be now put?' It shall only be admitted when demanded by a majority of the members present; and until it is decided, shall preclude all amendment and further debate of the main question, as well as of the pending amendments; and the question shall be taken on the amendments, in order, if amendments be pending, and then on the main question."

After some remarks from Messrs. RICE GARLAND, BRIGGS, MERCER, ADAMS, UNDERWOOD, SMITH, and BELL, when—

Mr. ADAMS modified his amendment so as in substance to embrace, as its first clause, his former amendment; (which was the amendment reported by Mr. MANN of New York, from the Select Committee on the same, January 5, 1836,) and then bring in, as a second clause, the amendment of the present committee. [The object of the proposition, as it will be seen, was to take a vote on all pending amendments notwithstanding the call for the previous question.]

The subject was further discussed by Messrs. MERCER, MASON, REED, ADAMS, and UNDERWOOD, in favor of the amendment, and by Messrs. HAMER and SMITH in opposition, when

Mr. UNDERWOOD called for the yeas and nays, which were ordered, and were—yeas 102, nays 106, as follows:

YEAS—Messrs. Adams, Ayckrigg, Alexander, Heman Allen, John W. Allen, Bell, Biddle, Bond, Borden, Briggs, William B. Calhoun, William B. Campbell, John Campbell, William B. Carter, Chambers, Cheatham, Childs, Corwin, Craig, Cranston, Crockett, Curtis, Cushing, Darlington, Davies, Deberry, Dugan, Evans, Everett, Ewing, Richard Fletcher, Filmore, Rice Garland, Goode, James Graham, William Graham, Graves, Grennell, Griffin, Hall, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Herod, Hoffman, Robert T. H. Hunter, Jenifer, William Cost Johnson, Lewis, Lincoln, Andrew Loomis, Mallory, Marvin, Samson Mason, Maury, Maxwell, McKay, McKennan, Menifee, Mercer, Milligan, Matthias Morris, Naylor, Noyes, Ogil Patterson, Peck, Phillips, Pickens, Pope, Putis, Rariden, Reed, Rencher, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, Charles Shepard, Sibley, Slade, Soulegrave, Stanley, Stratton, Taliaferro, Thompson, Tillinghast, Toland, Underwood, Webster, Albert S. White, John White, Elisha White, Lewis Williams, Christopher H. Williams, Wise, and Yoak—102.

NAYS—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Brodhead, Bronson, Bruyn, Buchanan, Cambreleng, Timothy Carter, Casey, Chaney, Chipman, Cliley, Clalborne, Clark, Cleveland, Coles, Connor, Cray, Cushman, Dawson, Davee, DeGraff, Drongone, Duncan, Edwards, Farrington, Fairfield, Isaac Fletcher, Foster, Fry, Gallup, James Garland, Glascock, Grandland, Grant, Gray, Haley, Hammond, Hamer, Harrison, Haynes, Holsey, Hopkins, Howard, Hubley, W. H. Hunter, Ingham, T. B. Jackson, J. Jackson, J. Johnson, N. Jones, J. W. Jones, Kemble, Kilgore, Klingensmith, Leadbetter, Logan, Arphaxed Loomis, James M. Mason, Martin, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, Muhlenberg, Murray, Noble, Owens, Palmer, Parker, Parmenter, Patten, Pennybacker, Perkins, Phelps, Plumer, Pratt, Prentiss, Rely, Rives, Sheller, Shipley, Smith, Snyder, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Turney, Vail, Vanderveer, Wagoner, Weeks, Jared W. Williams, Worthington, and Yell—106.

So the amendment to the amendment was disagreed to, and the original amendment of the committee was agreed to—yeas 111, noes not counted.

The following amendment was then taken up:

11th. Add to the 36th rule the following clause:

"All incidental questions of order arising after a motion is made for the previous question, and pending such motion, shall be decided, whether on appeal or otherwise, without debate."

Mr. MERCER said he could not give his assent to this amendment, on the ground that there was no reason why the previous question, moved on a particular subject, should preclude debate on a question of order growing out of it, for it would compel members to vote in the dark.

Mr. PATTON took the same side, and insisted that a question of order growing out of the previous question was entirely independent of it, besides it would be giving the Chair too despotic a power. Moreover, by the rules already in force, the pre-

vious question might be moved on the question of order itself, which was sufficient to arrest unreasonable debate.

Mr. GARLAND of Louisiana asked for the yeas and nays, which were ordered.

Mr. CALHOUN of Massachusetts wished some member of the select committee to give some reasons for the introduction of such a rule.

Mr. HAMER was one of those who voted in the committee in favor of the amendment, though he did not feel very solicitous about it one way or the other. He was inclined in favor of it for this reason principally, that after the demand for the previous question, it sometimes occurred that questions of order incidentally arose, and were debated at great length, which debate might go on, take up the whole day, and thus the intention of the House, in ordering the main question to be put "now," might be defeated.

Mr. THOMAS adverted to a decision of the present Speaker, made during the last Congress, that after the previous question had been ordered, debate could not be allowed. The negating this amendment would be a virtual repeal of that rule.

Mr. PATTON said that that decision was in utter contradiction to, and a notorious violation of, the practice of the House, from the origin of the Government down to that day, and was understood to be made under a misapprehension of the question of order then raised. He did not believe questions of order would ever be raised for the purpose of interrupting the business of the House, after the main question had been ordered, though, if a minority were disposed to do so, they could do it, unless some of the most valuable rules of the House were entirely obliterated.

Mr. CRAIG pointed out the necessity of the rule, and drew the attention of his colleague to instances that had occurred where questions of order had been raised, which produced a wide and extended range of debate having little connection with the question itself, by which the will of the majority, in progressing the business of the House, had been for a length of time frustrated. The previous question was necessary, nay, at times indispensable, to insure action upon the public business of the nation, by arresting unnecessary discussion, and there was but one standard in regard to its application, viz: the judgment of the majority. If, then, the previous question be a rule properly applicable, and all had agreed that it was, unless abused, equally necessary was the rule now proposed by the select committee; for otherwise, a small minority might set aside the will of the House, or a very large majority of it.

Without taking the question,  
On motion of Mr. FILLMORE,  
The House adjourned.

#### IN SENATE,

FRIDAY, September 15, 1837.

Mr. McKEAN presented a remonstrance from the county and city of Philadelphia, remonstrating against the annexation of Texas; which was laid on the table.

Mr. YOUNG presented a petition from Illinois, praying the establishment of a national bank; which was laid on the table.

The resolution offered by Mr. HUBBARD yesterday, proposing that the daily hour of the meeting of the Senate shall be 10 o'clock, was taken up for consideration, and modified by Mr. H. so as to provide that after this week the daily hour of meeting shall be at 11 o'clock. The resolution as modified was adopted.

The bill to postpone the payment of the fourth instalment of the deposits to the States being taken up—

Mr. PRESTON rose and addressed the Senate at some length, and was followed by Messrs. CALHOUN, CRITTENDEN, and BROWN.

Mr. WALKER said, without discussing at this time the great question debated by the Senator from Massachusetts, (Mr. Webster,) in regard to the paper currency of the country, and the supreme control which he claims on this subject, and all that relates to it, for the Government of the United

States, he would proceed at once to the inquiry now before us, whether it would be proper to postpone paying over to the States the last instalment under the deposit act. This instalment amounted to a sum exceeding nine millions of dollars. The report of the Secretary of the Treasury informs us that the money is not in the Treasury to pay the instalment. Even in the event of the postponement of this deposit with the States, there is still a deficiency in the revenue, which the Secretary asks to be supplied by the emission of Treasury notes. It is, then, obvious, that if this instalment is to be paid to the States on the first of October next, it can only be effected by an emission of an additional amount of Treasury notes, bearing interest, or in other words, by the creation of a new national debt, arising from a new loan, in order to deposit the amount for safe keeping with the States of this Union. Disguise it then as we may, the refusal to pass this bill is a determination on our part to borrow more than nine millions of dollars on the credit of the United States, to be deposited for safe keeping with the States of this Union. The Constitution authorized us to borrow money on the credit of the United States—but for what object? Clearly for no other than to carry into effect the powers delegated by the Constitution. But that this Government could borrow millions, without limitation as to the amount, for the purpose of depositing it with, or distributing it among the States, was to clothe this Government with the most alarming and despotic powers. If this Government can make such a loan for such a purpose, the taxing power is unlimited, for by taxes only can it raise the money to refund what it has borrowed. Mr. W. said he was one of a small minority of six in the Senate who had voted against this deposit bill. He had then predicted the disastrous consequences that he thought would follow from the passage of this bill, and his worst fears would be realized, if now, when there was a deficit in the Treasury, when many of the public creditors had to be paid in protested drafts on broken banks, a surplus was created by loans for the purpose of depositing among the States of the Union.

Mr. W. said he well knew the voracious character of the surplus spirit; that it was ready to keep up the tariff, to keep up the price of the public lands, and to refuse all relief to the settlers of the West, for the purpose of creating a surplus for distribution; but he could scarcely have believed that now, when we must in any event replenish, by loans, an exhausted Treasury, that new loans are asked for to the amount of nine millions for distribution,—loans to be refunded, if not from the lands of the West, from the tariff, by which Mississippi, now nearly the greatest exporting State of this Union, will receive but about one fourth as much as she will be compelled to refund by the operation of the tariff—reducing the price of her great staple to enrich the incorporated monopolists of other sections of the Union. Mr. W. said he must be blind indeed, who did not perceive, that to raise, by loans, nine millions for deposit with the States, is, to the extent of nine millions, to render it necessary to augment the tariff. It is true, we talk of getting back this money from the States, whilst a majority of the Senate, as he (Mr. W.) thought, most unwisely, have just taken from the Secretary of the Treasury the authority which he possessed, under the deposit act, to call upon the States to refund any portion of the money already deposited. And now, (Mr. W. predicted,) that Congress never would make any requisition upon the States for this money, but that when it was wanted, the South would be compelled to raise it through the operation of the tariff. Could any man doubt this result, when so bold an effort was now made to induce the Government to borrow money to pay the last instalment to the States.

But the Senator from South Carolina (Mr. Preston) tells us that we can obtain this money for deposit among the States by repealing some of the appropriation bills. Sir, the Senator from South Carolina (Mr. Calhoun) has most clearly shown the impossibility of obtaining a repeal of laws partly executed, passed by large majorities in both houses of Congress. But if the appropriation bills

were repealed to-morrow to the extent proposed, it would not put one dollar in the Treasury, now exhausted, nor enable the Government on the first of October next, now at hand, to deposit these nine millions with the States of the Union; for, in the calculation of the Secretary of the Treasury, the expenditure of fifteen millions of these appropriations is postponed till next year. But we have been told by the Senator from Massachusetts, (Mr. Webster,) that this amount may be paid to the States by the money in the deposit banks, whose paper would be gladly received by the States in which they are located. It has been already shown by the Senator from New York, (Mr. Wright,) that the entire money now in the deposit banks subject to new drafts, is not enough, by more than a million, to meet the required amount of the last deposit instalment; but if it were enough, let us examine the effect of this proposition. It is to pay the States in the paper of the deposit banks, by new issues of paper by those banks to an amount exceeding nine millions of dollars—to put out, in other words, more than nine millions of depreciated bank paper, issued by banks that have suspended specie payments. And is this the relief the Senator from Massachusetts would extend to the community? Sir, (said Mr. W.) nearly all the embarrassments of the community have been occasioned by the vast over-issues of paper by the banks, paper which they cannot now redeem in specie, and which has depreciated from ten to thirty per cent. in various sections of the Union. Is it not clearly perceived that this would greatly increase the embarrassments of the community? that it would add greatly to the present enormous mass of depreciated paper? that it would still further depreciate all the paper of all the banks making the new emissions; postpone for a long time, if not indefinitely, the resumption of specie payments by the banks, by augmenting nearly one-third the amount of their depreciated paper, and thus, also, disable them from extending the least indulgence to their debtors by this vast increase of their circulation, imposing the correspondent obligation of calling in their debts as rapidly as possible to the same amount? If (said Mr. W.) this proposition of the Senator from Massachusetts be a part and portion of the plan of the opposition for relieving the embarrassments of the country, he had no curiosity to hear the remainder of their proposition.

The question recurring on the passage of the bill  
Mr. WEBSTER asked for the yeas and nays, and they were ordered on the passage of the bill.

YEAS—Messrs. Allen, Benton, Black, Brown, Buchanan, Calhoun, Clay of Alabama, Fulton, Grundy, Hubbard, King of Alabama, King of Georgia, Linn, McKean, Morris, Niles, Pierce, Rives, Roane, Robinson, Ruggles, Sevier, Smith of Connecticut, Strange, Walker, Wall, Williams, and Wright—28.

NAYS—Messrs. Bayard, Clay of Kentucky, Clayton, Crittenden, Kent, Knight, Nicholas, Norvell, Preston, Robbins, Smith of Indiana, Southard, Swift, Tallmadge, Webster, White, and Young—17.

#### ISSUE OF TREASURY NOTES.

The bill to authorize the Secretary of the Treasury to issue Treasury notes, being on its second reading, a debate ensued, in which Messrs. WRIGHT, CLAY, and KING of Georgia took part; when,

On motion of Mr. WRIGHT, the bill was amended by the insertion of the word "ten" in the first line.

Mr. W. said that it had not been possible for the committee to know the amount of the notes necessary until action had been had on the bill to postpone the fourth instalment to the States, which bill having now passed the Senate, he was able to fill up the blank. He had had an interview on the subject with the Secretary of the Treasury, and he had learnt from that officer that, on the supposition no more extension would be granted than was proposed by the bill for extending the duty bonds, he had thought that the sum of eight millions would be sufficient. This was, however, on the supposition that the Bank of the United States

# CONGRESSIONAL GLOBE.

BY BLAIR & RIVES.

—WEEKLY—

PRICE \$2, FIRST TWO SESSIONS.

[Continued from No. 2.]

would pay in October the instalment then due to the Government by that institution. But it was not understood by the Secretary and the committee that this would not be done, that bank having bought up Treasury drafts issued in July for the payment of the third instalment to the States, and intending to give in those drafts in payment of the instalment then due from the bank. This being the case, the Secretary would require that the blank be filled up with nine millions five hundred thousand dollars; and therefore, on this calculation, the committee had instructed him (Mr. W.) to move for ten millions.

Mr. WRIGHT moved to strike out the word "of" in the first line, and insert the words "not exceeding \$20,000, to defray the expenses under the act;" which amendment was agreed to.

Mr. CLAY, of Alabama, moved to amend the 7th section, by inserting the words "price not exceeding," so as to prohibit the Secretary of the Treasury from purchasing Treasury notes below their par value, which was agreed to.

Mr. CLAY, of Kentucky, was very desirous of obtaining more full information relating to one point, and that was, that as a bill had now passed the Senate for arresting the payment of the fourth instalment to the States, and since the fund intended for the use of the States was now to be applied to the use of Government, if it was intended to employ the funds in the banks before being reduced in some way or other to a specie basis, whether Government intended by laws passed, or to be passed—such, for example, as a bankrupt law—to force the conversion of the funds now in the banks into metal, and then throw the sum thus obtained from the banks into the Treasury, there to lie without being used? His inquiry was not, he thought, useless, since it must be evident that the amount of the blank must depend upon the availability of the funds in the banks.

Mr. WRIGHT said it had been ascertained, and so stated in the Secretary's report, that all the money in the banks subject to draft on the 28th of August last amounted only to eight million one hundred and sixty-six thousand dollars. Out of that sum the expenses for the month of September were to be taken, which would leave the sum reduced to about two millions and a half by the 1st of October. But, if the outstanding drafts should come in on the Treasury, (many of them being protested,) in that case the available amount would still be diminished, and the Treasury would be in want of means. There were therefore no ready means without the assistance of Congress. In all the Atlantic coast, the money in the banks had for the most part been withdrawn, only a small sum subject to draft being with them, say less than a million, and creditors were not willing to receive drafts upon the southwestern banks, where now almost all the funds in deposit with banks were placed.

Such being the case, and such the amount of unavailable money, the object of issuing Treasury notes was to anticipate the funds in deposit with the banks until Congress should say how those funds were to be made available. The Committee on Finance had reported a bill giving to those banks intervals of two, five, and eight months in which to pay the sums due, dividing the balance in their hands into three instalments. Again, the extension granted already, and proposed still to be granted, on bonds, would diminish the means of the Treasury; from all which considerations, the issue of these notes was rendered necessary to meet the current expenses.

Mr. CLAY of Kentucky professed himself greatly obliged by the valuable information communicated by the honorable Senator, (Mr. Wright,) but he still felt that the inquiry which he had wished to make was not yet answered. He meant to inquire if the money in the banks was to be used as bank

notes, or if the banks were to be compelled to pay them in specie, and then if these funds were to be left idle?

Mr. WRIGHT, in reply, said they would not be used as bank notes unless the law should authorize them so to be used.

Mr. CLAY. Then it comes to this: we have passed a bill to take funds out of the hands of those who would have been glad to use them, to put them into the hands of others who refuse to acknowledge and make use of them. The States would have been glad to receive this money in the shape of bank notes, and we have taken it from them. Again: Government refuses to call them funds in that shape, and to Government we have now made them over by the bill just passed! And as Government, though it receives those funds, and prevents their being paid to the States, will not acknowledge them as funds, there is a deficiency existing, and this deficiency is to be supplied by issuing Treasury notes, in order that Government may be able to get along. That is to say: Government will not receive the paper of the country, and is about to create a paper of its own which the country is expected to receive! And thus, all the promises which have been made to us of the flowing of gold and silver all over the country—these promises of a better currency—result in the issue of ten millions of paper money!

Mr. KING of Georgia, read to the Senate a statement and estimate of some length, which was inaudible in the reporter's gallery.

On motion of Mr. KING, of Alabama,  
The Senate adjourned.

## HOUSE OF REPRESENTATIVES,

FRIDAY, September 15, 1837.

Mr. LINCOLN stated that he held in his hand a number of memorials signed by upwards of 3,000 citizens of Massachusetts, remonstrating against the annexation of Texas to the United States. In pursuance of the rule adopted the other day in relation to petitions and memorials, he should feel himself constrained to move to lay the memorials on the table; but he would now give notice that he should move to take them up, and have them referred to appropriate committees at the earliest period possible. Mr. L. then presented sundry petitions, remonstrating against the annexation of Texas to the United States, which were laid on the table.

Mr. ADAMS presented a petition of Eleazer Smith, and one hundred and sixty-three other citizens of the State of Vermont, praying for *retrenchment and reform*, [laughter.] Mr. A. said, that when he presented the petition, he was aware that the words *retrenchment and reform* would produce nothing but a universal shout of laughter; but he presented it, because among the *retrenchment and reforms* asked for, was a prayer that the members of Congress may reduce their own salaries fifty per cent.; that is to say from eight to four dollars per day. This being the case, he could not bear to keep it in his possession any longer. The memorial was laid on the table.

Petitions and memorials were further presented by

Messrs. BRIGGS and PARMENTER of Massachusetts.

Mr. EVERETT of Vermont.

Mr. DAVIES of Pennsylvania.

Messrs. BOND, ALLEN, and LOOMIS of Ohio.

Mr. HEROD of Indiana.

Mr. CASEY of Illinois.

Mr. LEWIS of Alabama.

The SPEAKER presented a memorial, accompanied by a printed argument, from John H. Sergeant, of Charleston, South Carolina, praying for the establishment of a general bankrupt law; which, on motion of Mr. THOMAS, was referred to the Committee on the Judiciary.

Mr. CAMBRELENG, from the Committee of Ways and Means, reported a bill imposing additional duties, as depositories in certain cases, upon

public officers, and for other purposes; read twice, and referred to a Committee of the Whole on the state of the Union.

[The contents of this bill were the same as that reported under the same title, in the Senate, yesterday, (to be found in yesterday's Senate proceedings,) with the exception of the following additional clause:

"And be it further enacted, That no law or joint resolution now in force, shall be so construed as to authorize any officer of the United States, before mentioned in the first section of this act, to receive any thing but gold or silver, Treasury warrants, Treasury drafts, or Treasury notes, in payment of public dues;" and the addition of the following proviso at line 5, page 4, after the word "moneys:" "except such deposits as may have been made in the Treasuries of the respective States."]

Mr. CAMBRELENG, from the same committee, reported a bill for adjusting the remaining claims upon the late deposit banks; read twice, and committed to a Committee of the Whole on the state of the Union.

[This bill is also identical with that now before the Senate, and already in print in the Globe.]

Mr. CAMBRELENG said, with permission, he would state, for the information of the House, that the Committee of Ways and Means had now only two bills remaining for consideration. They could not, however, get through with them that morning, but they would certainly be reported on Monday; after which he hoped the attention of the House would thenceforward be directed entirely to the important business which had called them together. He presumed it would be the desire of the House to proceed with and conclude the unfinished business of yesterday, (the subject of the Rules and Orders;) and he then gave notice, that on Monday he should make a motion to take up the other business.

Mr. GARLAND of Virginia wished to suggest to the gentleman from New York to vary his motion, so as to make these two bills the special order of the day for some day next week; and Mr. G. then gave notice of his design to submit a counter project.

Mr. BELL inquired if it was the intention of the gentleman from New York to take up the bills reported by the committee of that House, or the bills from the Senate, as rapidly as they might be transmitted therefrom. He put the question to the gentleman, supposing the business of the House to be pretty much under his control; and there was, in the one case, no necessity for delay.

Mr. CAMBRELENG replied that there was no bill from the Senate then in the House, and, therefore, they could not be ready at present to proceed with the business.

Mr. BELL. They will be sent soon.

Mr. CAMBRELENG. Those bills would probably not be sent there till Monday, and it would be for the House to determine, whether they should be committed to the Committee of Ways and Means, or, at once, to a Committee of the Whole on the state of the Union. There were variations between the bills of the House and the Senate, and it would be for the Committee of the Whole, to which they would all be referred, to determine which should be taken up. It was a matter not within the determination of the Committee of Ways and Means.

Mr. BELL had only wished to call the attention of the House to the subject, for if it was designed to take up the House bills, there was no good reason for waiting; but if it was intended to act upon the Senate's bills, those of the House might as well be over.

The conversation here dropped.

The SPEAKER laid before the House a communication from the Secretary of the Treasury, in compliance with a resolution of the House of the 11th inst. calling upon him to report the amount of appropriations of the past and present years remaining unexpended; the amount required to fulfil existing engagements, contracted prior to the first

day of June last; the existing engagements since that time; the amount of money drawn from the Treasury, and placed in the hands of disbursing officers on the first day of May last; and what objects of public expenditure can, with the least injury to the public service, be dispensed with.

The communication was as follows:

TREASURY DEPARTMENT,  
14th September, 1837.

SIR: This report is submitted in compliance with the following resolution, passed on the 11th instant:

*Resolved*, That the Secretary of the Treasury be directed, with as little delay as possible, to communicate to this House the amount of the appropriations of the past and present years remaining unexpended; the amount required to fulfil all existing engagements contracted prior to the first day of June last, and all existing engagements contracted since that time; also, the amount of money drawn from the Treasury and placed in the hands of disbursing officers or agents on the first day of May last and at the present time; and that he also report what objects of public expenditure can with the least injury to the public service be either wholly dispensed with during the present year, or bear any material reduction."

The tabular statement annexed shows, as desired, "the amount of the appropriations of the past and present years remaining unexpended" to be \$24,075,239 37. (A)

In reply to the inquiry as to "the amount of money drawn from the Treasury, and placed in the hands of disbursing officers, or agents, on the first day of May last, and at the present time," I would state, that at the former period it appears to have been \$5,264,052 95, and at the latter \$5,049,540 76. It may be useful to add that both sums are much larger than they would otherwise be, in consequence of the unusual amount of deposits by officers of the mint.

In relation to "what objects of public expenditure can, with the least injury to the public service, be either wholly dispensed with during the present year, or bear any material reduction," I would observe, that a minute and critical examination on this point, was instituted in May last by this Department.

The result of it was, that enough of it could and would be postponed till next year, to amount to about \$15,000,000.

Consequently, the expenditures during the present year were estimated in my recent report upon that basis. After every delay of them which the public interest may permit, it is therefore expected, that, of the outstanding appropriations now exceeding \$24,000,000, not much over nine millions will necessarily be required to be expended during the residue of the year.

Since the resolution passed, further inquiries on this point were instituted in connection with the other departments of the Government; but the result has not been essentially varied, from that to which the department arrived last spring. The particular heads of appropriations, that it is supposed need not, and will not, be expended in full during the year, and the amounts under each are very numerous and difficult to be prepared, but if desired will be submitted hereafter with as little delay as practicable.

The only remaining inquiry is "the amount required to fulfil all existing engagements contracted prior to the first day of June last, and all existing engagements contracted since that time."

Each department has been requested to furnish a statement on this subject as early as it can be completed. But some delay being unavoidable, it has in the mean time, been deemed advisable to submit immediately the answer to the other portions of the resolution.

Those statements will be made as comprehensive as possible, but can, of course, relate to only a small part of the whole appropriations of Congress, which it has been, and will be, necessary to expend during the year. All salaries of Judicial, Executive, or other officers; the expenses of foreign intercourse; the pay and subsistence in both the army and navy; all pensions; all Indian annuities; all private bills which have passed; many miscellaneous appropriations, with several other items, stand independent

of any special engagements or contracts made by any public officer, and cannot, therefore, enter into this computation.

Respectfully, yours,

LEVI WOODBURY,  
Secretary of the Treasury.

Hon. J. K. POLK,  
Speaker of the House of Representatives.

A.

Statement of the amount of appropriations of the past and present years, remaining unexpended on the 11th September, 1837, inclusive, agreeably to a resolution of the House of Representatives of the 11th inst. viz:

Balance of appropriations on the 31st Dec. 1836	\$16,752,283 09
Appropriations made at the second session of the 24th Congress, exclusive of the Post Office Department	\$28,575,837 10
Specific and indefinite appropriations made by former acts of Congress	2,824,250 10
	31,400,087 50
	48,152,370 59

Expenditures of the United States from the 1st January to the 11th September, 1837	24,077,031 22
--	---------------

Leaves balances of appropriations 11th September, 1837	24,075,239 37
T. L. SMITH, Register.	

TREASURY DEPARTMENT,  
Register's Office, Sept. 12, 1837.

Mr. BELL moved that the communication be laid on the table and printed.

Mr. HAYNES moved its reference to the Committee of Ways and Means.

The former motion was first put and prevailed. RULES AND ORDERS OF THE HOUSE.

Mr. MERCER, on leave, from the select committee on the rules, made an additional report on the subject; which was laid aside, to be taken up when the consideration of the first part of the report was resumed.

The CHAIR then announced the unfinished business of yesterday (the subject of the rules.)

Mr. BELL inquired if it was a special order?

The CHAIR replied that it came up as the unfinished business of the morning hour, at the expiration of which the House might, if it pleased, proceed to the orders of the day, or continue the subject under consideration.

The House then resumed the consideration of the report of the Select Committee on the subject of the rules.

The question pending at the adjournment of the House yesterday was the following amendment of the committee to the original rules:

"11th. Add to the 36th rule the following clause: "All incidental questions of order arising after a motion is made for the previous question, and pending such motion, shall be decided, whether on appeal or otherwise, without debate."

Mr. WILLIAMS of North Carolina made a few remarks in opposition to the amendment, on the ground that incidental questions of order ought to be debated as well as any thing else.

Mr. MERCER also briefly opposed the amendment, when the question was taken by yeas and nays, and decided in the affirmative—yeas 100, nays 96, as follows:

YEAS—Messrs. Atherton, Beatty, Beirne, Bicknell, Birdeall, Borden, Brodhead, Bronson, Bruyn, Buchanan, Brum, Cambreleng, T. J. Carter, Casey, Chaney, Chapman, Claiborne, Clark, Coles, Edwards, Craig, Cushman, DeGraff, Dennis, Dromgoole, Duncan, Edmonds, Farrington, Fletcher, Foster, Fry, Gallup, Gholson, Glascock, Grandland, Haley, Hammond, Hamer, Harrison, Micajah T. Hawkins, Charles E. Haynes, Orin Holt, Benjamin C. Howard, Hubley, Wm. H. Hunter, Samuel Ingham, Thos. B. Jackson, J. Jackson, J. Johnson, N. Jones, J. W. Jones, Kemble, Kilgore, Klingensmith, Jr., D. P. Leadbetter, Logan, Arphaxed Loomis, James M. Mason, Martin, May, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, Samuel W. Morris, Muhlenberg, Murray, Noble, Owens, Palmer, Parker, Paynter, Pennybacker, Petriken, Phelps, Plumer, Pratt, Prentiss, Reilly, Sheffer, Shipley, Smith, Snyder, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Yall, Vanerveer, Wagener, Web-

ster, Weeks, Thomas T. Whittlesey, Jared W. Williams, Worthington, and Yell—100.

NAYS—Messrs. Adams, Alexander, John W. Allen, Aycrigg, John Bell, Bond, Briggs, William B. Calhoun, John Calhoun, William B. Campbell, John Campbell, Wm. B. Carter, Chambers, Cheatham, Childs, Cranston, Curtis, Cushing, Darlington, Dawson, Deberry, Dunn, Everett, Ewing, Filmore, Jas. Garland, Rice Garland, Goode, James Graham, Wm. Graham, Grennell, Griffin, Hall, Halstead, Harlan, Harper, Hastings, Henry, Herod, Hoffman, R. M. T. Hunter, Jennifer, Wm. C. Johnson, Lewis, Lincoln, A. W. Loomis, Marvin, S. Mason, Maury, Maxwell, McKennan, Menefee, Mercer, Milligan, Calvary Morris, Naylor, Noyes, Ogle, Parmenter, Patterson, Patton, Peck, Phillips, Pickens, Pope, Potts, Jr. Bariden, Reed, Rencher, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, Augustine H. Shepperd, Charles Shepard, Sibley, Slade, Southgate, Stanley, Stratton, Taliaferro, Thompson, Tillinghast, Toland, Underwood, Albert S. White, John White, Lewis Williams, Sherrod Williams, Christopher H. Williams, Wise, and Yorke—96.

So this amendment was agreed to, and the following was then taken up:

12th. Add to the 40th rule the following clause:

"No bill or resolution shall, at any time, be amended by annexing thereto, or incorporating therewith, any other bill or resolution pending before the House, nor by any proposition containing the substance, in whole or in part, of any other bill or resolution pending before the House."

Mr. BELL briefly opposed this amendment on the ground that, though it might correct an occasional abuse, yet its adoption would too much cripple the House, for it would be unable to engraft a bill of the Senate, which all might deem expedient.

Mr. MERCER then moved to strike out all after the word "house" in the third line; agreed to; and the original amendment, as amended, was agreed to.

The following amendments were agreed to without a division:

13th. Amend the 55th rule by adding two standing committees, each to consist of five members, to precede, in the enumeration of committees, that of Revisal and Unfinished Business—a Committee on Patents, and a Committee on Public Buildings and Grounds.

Insert after 74th rule the following rules:

"It shall be the duty of the Committee on Patents to consider all subjects relating to patents which may be referred to them, and report their opinion thereon, together with such propositions relative thereto as may seem to them expedient."

"It shall be the duty of the Committee on Public Buildings and Grounds to consider all subjects relating to the public edifices and grounds within the city of Washington which may be referred to them, and report their opinion thereon, together with such propositions relating thereto as may seem to them expedient."

Amend the 55th rule, by striking out "two," and inserting the word six, after the word twenty.

14th. Amend the 38th rule, by substituting for the first clause thereof the following words, to precede the words "a motion to strike out and insert."

"Any member may call for the division of a question, which shall be divided if it comprehend propositions in substance so distinct, that one being taken away, a substantive proposition shall remain for the decision of the House."

15th. In lieu of the 83th rule insert the following:

"Every bill shall be introduced on the report of a committee, or by motion for leave. In the latter case, at least one day's notice shall be given of the motion; and the motion shall be made, and the bill introduced, if leave is given, when resolutions are called for; such motion, or the bill when introduced, may be committed."

Amend the 91st rule, by inserting after the words "on what day," "if no motion be made to commit, the question shall be stated on its engrossment; and if it be not ordered to be engrossed on the day of its being reported, it shall be placed in the general file on the Speaker's table, to be taken up in its order."

The following amendment was then taken up:

17th. From the 107th rule strike out the words "at least two-thirds," wherever they occur, and insert the words "a majority."

[The effect of this rule is well known: that of requiring a majority of two-thirds of the members present to take up any business out of its order, to make special orders, to suspend the rules, &c.]

Considerable discussion arose on the propriety of this amendment, in which it was opposed by

Messrs. MERCER, LEWIS WILLIAMS, EVERETT, BELL, DRIGGS, CUSHING, FILLMORE, WISE, CALHOUN of Massachusetts, and REED, and sustained by Messrs. HAMER, CRAIG, and SMITH; when

Mr. EVERETT asked for the yeas and nays, which were ordered.

The discussion was further continued by Mr. POPE, against the resolution, and in a few words by Mr. HAMER, in favor of it; when the question was taken, and decided in the negative—yeas 90, nays 121, as follows:

**YEAS**—Messrs. Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Brodhead, Bronson, Buchanan, Cambreleng, T. Carter, Chace, Chapman, Cilley, Claiborne, Clark, Connor, Craig, Cushman, Day, De Graff, Edwards, Farrington, Fairfield, F. Fletcher, Fry, Gallup, Gray, Haley, Hammond, Hamer, Harrison, Hawkins, Hayes, Holsey, Holt, Hopkins, Howard, Hubley, Ingham, J. B. Jackson, J. Jackson, J. Johnson, N. Jones, John W. Jones, Klingensmith, Leadbetter, Logan, Arhaxed Loomis, James M. Mason, Martin, Robt. McClellan, A. McClellan, McClure, Miller, Montgomery, Moore, Morgan, Samuel W. Morris, Muhlenberg, Noble, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petriken, Phelps, Plumer, Pratt, Prentiss, Reilly, Sheffer, Shipley, Smith, Spencer, Taylor, Toucy, Towns, Turrey, Vail, Wagener, Webster, Weeks, Thomas T. Whittlesby, Jared W. Williams, and Worthington—90.

**NAYS**—Messrs. Adams, Alexander, John W. Allen, Ayer, Bell, Biddle, Bond, Borden, Briggs, Bynum, William B. Calhoun, John Calhoun, W. B. Campbell, John Campbell, W. B. Carter, Casey, Chambers, Cheatham, Childs, Cleveland, Col. S. Corwin, Cranston, Crocker, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dunn, Dromgoole, Dunn, Elmore, Everett, Ewing, Richard Fletcher, Filmore, James Garland, Rice Garland, Glascock, Good, James Graham, W. Graham, Gruntland, Graves, Grinnell, Griffin, Hall, Halstead, Harlan, Harper, Hastings, Henry, William Herod, Hoffman, William H. Hunter, R. M. T. Hunter, Jenifer, W. C. Johnson, Kemble, Legare, Lewis, Lincoln, Andrew W. Loomis, Marvin, Samsen Mason, Matur, May, Maxwell, McKay, McKenna, McNeef, Mercer, Milligan, Matthias Morris, Alvary Morris, Murray, Naylor, Noves, Ogle, Patterson, Patton, Peck, Phillips, Pickens, Pope, Fortis Rariden, Keel, Rencher, Richardson, Ridgway, Rives, Robertson, Rumsey, Russell, Sawyer, Sergeant, Augustine H. Shepperd, Charles Shepard, Sibley, S. S. Snyder, Southgate, Stanley, Stewart, Stratton, Tallafiero, Thompson, Tillinghast, Toland, Underwood, Albert S. White, John White, Lewis Williams, Sherrod Williams, Christopher H. Williams, Wise, Yell, and Yorke—121.

So the amendment was disagreed to.

The following additional rule, reported by the select committee this morning, was agreed to:

"The rules of parliamentary practice comprise Jefferson's Manual, and shall govern the proceedings of the House in all cases in which they are not inconsistent with the rules of the House, and the joint rules of the Senate and House of Representatives."

The following joint rule was also agreed to on the part of the House, and a message ordered to be sent to the Senate to acquaint that body therewith:

"No spirituous liquors shall be offered for sale or exhibited within the Capitol, or in the public grounds adjacent thereto."

Mr. UNDERWOOD submitted an amendment to change the proceedings under a call of the House, by depriving the absent members of the day's compensation, etc. unless they excused themselves. **Lost.**

Mr. BELL moved an additional rule, that no division or count of the House should be taken by tellers, but upon a motion seconded by at least one-fifth of a quorum. Agreed to.

Mr. UNDERWOOD submitted an amendment to the 17th rule, providing that the Chair should call for reports from standing committees in the order they are named in the 55th and 74th rules, which, after a few remarks from Messrs. RENCHER and HAMER in opposition to it, and by Messrs. UNDERWOOD, WISE, LEWIS WILLIAMS and HOWARD in its support, was agreed to.

Mr. PATTON proposed a substitute for the ninth rule of the House, viz: that in all cases the Speaker should vote, and when the vote was equal the question should be lost.

Mr. ROBERTSON moved an amendment that the Speaker be required to vote last.

Mr. PATTON preferred that his name should be called in the order of names; but he was indifferent about it. In some of the State Legislatures he was called first, in others—as in Virginia—last; but he preferred the plan he first intimated best. Mr. P. considered the rule, as it at present stood, as unconstitutional, and violative of the rights of the Speaker as a Representative, and of his constituents also, both of whom were, in his opinion, improperly deprived of his vote by the old rule.

Mr. THOMAS replied that, by the standing

rules already in force, the Speaker could vote in two cases. First, when his vote being given would make the division of the House equal, when the question would be lost. Second, when it was equal, he had the casting vote. The Speaker, therefore, would not receive any new right under the proposed alteration of the rule than he now had. Mr. T. was not disposed to make any change; for, in times of high party excitement, the annunciation of his vote, especially if first given, might have a too powerful influence.

Mr. ADAMS remarked, that if they gave the Speaker the right to vote, they could not deprive him of the right to speak, of giving reasons for his vote, as in Committee of the Whole, where the Speaker could both vote and speak. Hence Mr. A. was opposed to the adoption of this new rule.

Mr. PATTON was not aware that there was any rule of the House prohibiting the Speaker from participating in the discussions of the House; certainly not in terms. He would, however, offer an amendment expressly giving him that right, in the following words: "And that the Speaker, whenever he desires to debate any question under consideration, shall be at liberty to call any member to the Chair."

Mr. HAMER thought they were proceeding in a not very commendable haste, by adopting a number of important amendments without their being first printed, or laid before them, or even any time given for reflection; so that their effect, if adopted, might be ascertained.

In regard to the proposition under consideration, he would ask, why should it be adopted? The gentleman from Virginia informed them that he thought the rule exempting the Speaker from voting, or prohibiting him from voting, was against the provisions of the Constitution. Why, what provision of the Constitution prohibited a member from voting on a question in which he was interested? None. Yet that was one of the rules of the House of which no one complained. Could any one doubt their power to go further? Who had complained of the operation of this rule? When they made new laws, they should be to remedy some existing defect, or some existing evil, which had been complained of. Was there any evil resulting from the operation of this rule. Not one; and so far as he knew, even the House had suffered no inconvenience from it, whatever. Had the constituents of any gentleman heretofore elected as the presiding officer of the House complained that their privileges were violated from his not giving his vote there? Mr. H. had heard no such complaint. Had the people of the country at large? None. None that had reached his ear at least. Then if no complaints came, if no evil was felt or complained of, why change a rule that had prevailed from the organization of the Government to the present time?

Mr. LEWIS WILLIAMS moved to lay the amendment on the table.

The CHAIR remarked that the whole subject, if the motion should prevail, would cohere to the amendment, and thereby the whole subject would be laid upon the table; whereupon

Mr. WILLIAMS withdrew his motion, and the amendment of Mr. PATTON was rejected.

Mr. PETRIKEN submitted an amendment proposing that all elections of appointments by the House should be *viva voce*, instead of by ballot, and asked for the yeas and nays; but they were not ordered, and the amendment was lost.

Mr. LINCOLN submitted an amendment, providing that in cases of balloting by the House, blanks should be ejected, and not taken in the count in the enumeration of votes. Agreed to.

Mr. DAWSON submitted an additional rule, that there be a standing committee on the mileage of members; which was agreed to—67 to 82.

Mr. THOMAS submitted an amendment to the 19th rule, "that a precedence shall be given to those bills which shall not cause debate."

After some remarks by Messrs. THOMAS, UNDERWOOD, and WILLIAMS of North Carolina, the amendment was disagreed to.

Mr. HARRISON moved to amend the rule in relation to calling the States in order for petitions, by

commencing at Maine and Wisconsin alternately; agreed to.

On motion of Mr. MERCER, The rules, as amended, were then adopted, and ordered to be printed.

On motion of Mr. HARLAN, it was ordered that when this House adjourn, it adjourn to meet on Monday next.

The SPEAKER laid before the House a communication from the Secretary of the Treasury, in answer to a resolution of the House of the 11th instant, upon the subject of the pay of members of the House; which was laid on the table, and ordered to be printed.

On motion of Mr. CAMBRELENG, the bill from the Senate to postpone the fourth instalment of the deposits with the States, was read a first and second time, and committed to the Committee of Ways and Means.

On motion of Mr. BRIGGS, The House then adjourned to Monday next.

## IN SENATE,

SATURDAY, September 16, 1837.

A message was received from the House of Representatives, stating that it had passed a joint resolution prohibiting the sale of spirituous liquors in the Capitol and the public grounds—laid on the table.

Mr. CLAY of Alabama presented a petition from William Jackson, a soldier of the Revolution; which was laid on the table.

Mr. PRESTON presented a petition from John Gardner, praying the examination of a life preserver.

Mr. LINN presented a petition from sundry citizens of St. Louis, praying the establishment of a national bank; which was laid on the table.

## ISSUE OF TREASURY NOTES.

The Senate then took up the bill authorizing the Secretary of the Treasury to issue Treasury notes, when

Mr. CALHOUN said, that with regard to one point in the bill—the payment of interest on the Treasury notes—which the Senator from Massachusetts so much approved, was to his (Mr. C's) mind just as objectionable. Nor was he satisfied with the bill, for he really could not make up his mind as to any one scheme for raising the necessary means, until it should be perfectly understood as to what was to be done in reference to the great point of separating the Government from the banks. It appeared to him that all the measures to be passed upon ought to converge to that point, if there was any intention to make it, and this among the rest. As the law now stood, the Secretary of the Treasury would be compelled to receive the notes of all specie-paying banks; and if there should be a resumption of specie payments, all the notes of all the banks would be received. If Congress should adjourn without coming to the conclusion of separating the Government from the banks, the result of passing this and the other measures would be to collect the money in Sub-Treasury bills and bank notes. If it was intended to restore the connection with the banks, or even if it was not the intention, this bill ought to be different from what it was. In fact, in neither alternative could he well agree with the provisions of the bill. Being in this dilemma, he should feel himself compelled to move an amendment to it, for the sooner a decision was had on that important point the better. To prove whether it was the design of the Senate to make a separation or not, would depend upon the course adopted here. If a separation was to be made, now was the acceptable time. And, if the opportunity was not now embraced, perhaps it never would be. Under this impression, it was his wish, (for this was a subject which required some little reflection,) that the further consideration of the bill should be postponed till Monday, by which time he would be enabled to prepare his proposition. Upon the great point of separation between the banks and the Government, his opinion had long been made up. He firmly believed that the real alternative was a separation, or a Bank of the United States. He had so declared himself in 1834. He had never seen any reason to change that opinion. On the contrary, the realizing of all the ad-

terceptions he had then mentioned, had happened. The catastrophe had come upon the Union, and now was the time to act. In his own view of the subject, this project of separation was one of the greatest measures that ever was or ever could be presented to the country. It was due to the country, due to ourselves, due to posterity, that gentlemen on all sides should meet this crisis openly, boldly, directly—state their plans, and come out with their views. He thought there appeared to be a backwardness on this subject. Although painful as the task was, he would himself be prepared to go into the subject on Monday, and would then ask some questions in regard to it. He then moved to postpone the further consideration of the bill till Monday.

Mr. WRIGHT said that he was not disposed to deny to the honorable Senator any opportunity of presenting his propositions, nor was he at all unwilling to act upon any proposition consistent with the business before the Senate. His (Mr. W's) own opinion, however, was—for it was a matter of deep deliberation in the committee—that that proposition ought not certainly to be connected with this bill. Whatever should be determined, whatever should govern the action of Congress on that subject, the Treasury must have the means to go on. He knew that the question proposed by the Senator from South Carolina was one upon which a great diversity of opinion existed in this body and the ether; and it was the purpose of the Committee on Finance so to disconnect the measures that one should not retard the other. He (Mr. W.) knew that there existed the most pressing necessity for this bill, because the Treasury found it almost impossible to meet the demands of the public creditors. He therefore hoped that Congress would come to a speedy determination as to the measures before them. With every disposition to receive the propositions of the honorable Senator, he felt himself bound to hope that the Senate would not consent to postpone the bill, or to connect it with any other measure.

Mr. CALHOUN said it was impossible to say how the Treasury could be relieved until he knew what were the means to be adopted. If the measure were now forced upon him, he would be compelled to vote against it. He felt a due and proper sensibility for the Treasury, but at the same time there was something due to the sympathy of the people, when the country was in so much distress. Mr. C. then asked for the yeas and nays.

Mr. BENTON said that as one connected as he had been with the deposit bill, he could not agree to vote for any postponement of the bill which might have the effect of connecting any other proposition with it.

Mr. WALKER hoped the motion for postponement would prevail; it was but reasonable he thought to allow the gentleman from South Carolina that short period of time to prepare his amendment, and give his views on the provision of the bill. He confessed, he, for one, was anxious to hear these views, and he believed the country generally partook of that feeling.

Mr. KING of Alabama said that no gentleman could be more willing to extend to the Senator an opportunity of presenting his views, than he was; but the importance of immediate action on this bill was apparent from what had fallen from the Senator of New York. If the gentleman conceived it was necessary so to amend the bill as to change its present features, he hoped he would see the necessity of doing so at once. He regretted that he was reluctantly compelled to vote against the postponement.

Mr. CALHOUN said, that if it were the intention of the Senate, or rather of the administration, to restore gradually the connection between the Government and the banks, then, in his opinion, instead of issuing Treasury notes, Congress ought to make a provisional loan. We had ample means, but not available at once, for they were locked up, and could not be had. Instead of issuing Treasury notes, and creating a new debt, and funding these notes, you ought to make notes payable on the State banks, and, as the means come in, pay off these notes. And if it were intended to carry out the views contained in the message, there

never could be a more favorable time than the present. Let him tell gentlemen who sustain the administration, that they must come out boldly, fearlessly, and show their hands at once; though he had not proposed this measure with that view, but merely to put the bill in such a shape as would carry out his proposition; and he therefore hoped he might be indulged in his reasonable request of postponement until Monday—the pressing demands on the Treasury were trifling, compared to this great and momentous subject.

Mr. NILES remarked that as the gentleman from South Carolina wished to bring before the Senate his proposition, and as it must come before us and before the country sooner or later, the sooner it came the better; and he would vote in accordance with the wishes of the gentleman.

After two or three words from Mr. WRIGHT in explanation,

The question was taken on postponing the further consideration of the bill, and it was decided in the affirmative—yeas 28, nays 18, as follows:

YEAS—Messrs. Bayard, Black, Brown, Calhoun, Clay of Kentucky, Clayton, Crittenden, Grundy, Kent, King of Georgia, Knight, Linn, McKean, Nicholas, Niles, Preston, Roane, Robbins, Robinson, Ruggles, Sevier, Smith of Connecticut, Southard, Strange, Walker, Wall, White, and Young—28.

NAYS—Messrs. Allen, Benton, Buchanan, Clay of Alabama, Fulton, Hubbard, King of Alabama, Lyon, Morris, Norvell, Pierce, Smith of Indiana, Swift, Tallmadge, Tipton, Webster, Williams, and Wright—18.

#### IN SENATE,

MONDAY, September 18, 1837.

Mr. RIVES gave notice of his intention to bring in a bill to designate the funds in which the public revenue should be received.

Mr. WRIGHT presented a petition from sundry merchants of New York, praying an extension of the time in payment of the custom-house bonds; which was laid on the table.

Mr. WRIGHT also presented a memorial from certain merchants of New York, praying remission of duties on such goods as had been burned at the late fire in that city. This memorial was referred to the Committee on Finance, and ordered to be printed.

Mr. MCKEAN presented a memorial remonstrating against the annexation of Texas; which was laid on the table.

Mr. TALLMADGE presented a memorial praying the establishment of a national bank; which was laid on the table.

Mr. RUGGLES presented a memorial remonstrating against the admission of Texas; which was laid on the table.

Mr. WALKER introduced the following resolution:

*Resolved*, That the Committee on Commerce be instructed to inquire into the expediency of establishing ports of entry at Vicksburg and Grand Gulf, in the State of Mississippi.

The joint resolution from the House of Representatives, excluding the sale of spirituous liquors within the Capitol and the sale of the public grounds, was then taken up, and unanimously adopted.

#### ISSUE OF TREASURY NOTES.

The bill to authorize the Secretary of the Treasury to issue Treasury notes being taken up for a third reading—

Mr. CALHOUN rose and addressed the Senate at considerable length. He commenced by observing that the question which they had to decide was what relation the Government and the banks shall bear to each other hereafter? Shall the Government again use the banks as fiscal agents? Shall they make them the depositories of the public funds? and, above all, shall they receive their notes as specie, and treat them as such in their disbursements? This was the great, the leading question; one of the first magnitude—one full of consequences. He had given it his most deliberate and anxious investigation. He had come to this conclusion—that the interests, both of the banks and the Government, forbid a reunion. He would now offer his views in support of the

measure. He would present them in that manner which became the occasion—which became the country, and which was due to himself. All that he asked was, that credit for sincerity might be given him for the opinions he would give, and that he might be judged with that candor which he would give others credit for.

Those who were in favor of a reunion would find a preliminary difficulty. The banks and the Government were already separated by the operation of laws; and so long as those laws remained in force, they could not be reunited. There were none in this body in favor of their union; none who would be willing to use the banks as the fiscal agents of the Government, as long as the present state of things remain which had produced the separation; none would be willing to make them the depositories of the public funds; none would be willing to receive their notes. This difficulty must be overcome. He did not believe that either the friends of the administration, or those of the opposition party would be found the advocates of a reunion. He thought that reason and experience were most decidedly in favor of disconnecting the banks from the Government. If the Government was to be connected with the banking system, a United States Bank was indispensable. He would go further, and say that if we had a right to receive and treat bank notes cash in the receipts and expenditures of the Government, we not only had a right to create a national bank, but were bound to create one. Whatever the Government treated as money, they had a right to receive as money; and under the provision of the Constitution which requires all taxes to be uniform throughout the United States, we were bound to make the money as uniform as possible. These were no recent opinions of his, for he had so expressed himself on the deposit question in 1834. He then said: "Gentlemen, you have not gone far enough. If you intend to war against the bank, you must go a step further—you must separate *in toto* from all banks, or have a Bank of the United States. However, not having separated from the banks, we now felt ourselves involved in the present distress. Now the alternative had arisen between a disconnection with the banks, or a Bank of the United States. This was the issue. One of two courses must be pursued. Then, again, the question recurred: how were we to get a bank? for we had reason to believe that the public voice was opposed to such an institution; at least one great, old, consistent, uniform party, so numerous and so respectable that their opinion on this question ought to be respected, until there should be an amendment of the Constitution. Again: one branch of the Government stood openly pledged before the world, upon constitutional grounds, not to give its sanction to the re-establishment of a bank. He contended that there must be a political revolution first, and we should have to wait four years before the struggle took place. And what, he would ask, was to be the condition of the Treasury in the mean time? Were we to remain disconnected, or are we to unite ourselves with the State banks?"

He would say, that if the disconnection remained so long, the fate of a Bank of the United States would be sealed for ever. He would tell gentlemen on the other side, that if they succeeded in reuniting the Government with the State banks, there would not be a chance of getting a Bank of the United States on God's earth, until another catastrophe like the present should have again occurred. He knew little of the human heart who believed there was any possibility of getting a bank while eight hundred banks were in successful operation, for they would never permit the introduction of a great and overshadowing institution, which would have the effect of destroying them. Yes, they would have to wait until another catastrophe comes.

He entertained the opinion, that if a Bank of the United States should be established, the pressure which would follow that event, would be even greater than the present. A bank competent to its purposes, calculated to meet the great increase in the trade and commerce of the country, should have a capital of one hundred millions, with a specie basis of fifteen or twenty millions. But

where, he asked, was it to come from? The consequence of the creation of a new bank, and the accompanying resumption of specie payments, would be destructive to the State banks. But where was the money to be had? from abroad—from England? We had heavy debts to pay that country, and if we attempted in the midst of the present state of things to draw back the specie, the revolution would be at least equal to the one we have just witnessed. Gentlemen were inclined to think that the present crisis is like that of 1816. Now he was certain that there was no analogy between the two cases. On the contrary, it was directly opposite. The crisis of 1816 was a small affair compared with this. Mr. C. explained the difference between the circumstances of that day and those of the present. Among the measures proposed then, as now, was a bankrupt law. He was opposed to a bankrupt law, because he considered it too harsh a measure. Besides, it was utterly unconstitutional. He maintained that should we try a Bank of the United States, under the existing circumstances, the recoil would be overwhelming. He, for one, would not be willing to make the attempt. He knew it would compel specie payments, not as a reformer, but as a destroyer. The greater portion of the State banks would be swept from the board. And, even if there were no other objections to the measure, this was a sufficient one for himself.

Mr. C. went into a brief history of facts connected with the passage of the bill of 1816, rechartering the Bank of the United States, and the part which he took on that occasion.

There was but one mode in which the Government could re-unite itself with the bank without producing distress; but that mode was infinitely objectionable to the South. He meant, by the Government adopting the United States Bank of Pennsylvania as a fiscal agent. The adoption of that course would compel a resumption of specie payments, with much less force than a new Bank of the United States would. But he never could bring his mind to give such a preference to one State over another. Nor could he consent to make an institution the fiscal agent of the Government which owes its existence to a law of a State. In the attack made upon the bank by the late President of the United States, over which Mr. Biddle presided, he (Mr. C.) had sustained it as far as he could upon constitutional and legal grounds. The bank, however, owing to the great talents of Mr. Biddle survived the shock. To adopt that bank, under all the circumstances of the case, would be a triumph to it over the country. It would go far to make the bank the Government itself. He repeated that he never could give his consent to make that bank the fiscal agent of the Government. He could not agree to a re-union of the bank with the Government, because he regarded a union as the great cause which incapacitates bank notes from performing the office of a sound currency. It was one of the greatest causes of contraction and expansion by the bank, and which could produce such a catastrophe as now had happened. Bank notes, under the best circumstances, were ill suited to perform the functions of a currency for the country. Contractions and expansions of the currency, as had been evidenced, could be resorted to, and the practice of which converted the whole country into gamblers and speculators. The great source of their expansions resulted from a union between the banks and the Government. One great and powerful reason which contributed to the circulation of a bank note was, that it not only represented the credit of the bank, but the credit of the Government itself.

The consequence of a connection between the Government and the bank was, that just as the fiscal action of the Government increased from time to time, the banking transactions must also increase, or contract in the same proportion. The great and leading cause of the present overthrow of the banks was the connection between them and the Government.

Mr. C. next adverted to the passage of the different tariff acts from the year 1824, and proceeded to state that the consequence of the last act that

was passed was to turn the exchanges of the United States in favor of England, and that the bank had, just prior to General Jackson's attack on it, expanded its issues in a remarkable degree, which was made, in his (Mr. C's) opinion, the pretext for a war against that institution. In his estimation, General Jackson did wrong in pursuing that course. The charter was about to expire, and an admirable opportunity would have offered for renewing the charter for a limited time, so as to outlive the charter of the Bank of England.

With regard to the removal of the deposits, he had, at the period of that event, but one opinion, and that was that the catastrophe which had occurred would come; and it had come at last. The tariff acts of 1824, '28, combined with the measures adopted in the British Parliament after that period, had produced a change in respect to the currency of the country. The two acts in question, particularly, gave a westward course to the metallic currency, and which was increased by the movements of the General Government. It was a remarkable fact, that the three great suspensions which had taken place in England and the United States, the present one, one in 1813, and the one in Great Britain in 1797, (he believed) all resulted from the connection of the banks with the Government; and, to this cause, in his opinion, the fluctuating of the bank currency was attributable.

He went on to argue that the granting of a charter for a national bank in Pennsylvania, or to any other State, would have the effect of concentrating the commerce and business of the country there, to the prejudice of other portions of the Union. He, in fact, regarded the giving of a charter as making a preference in favor of one State over another, which was contrary to the spirit and genius of our Government. He maintained that, prior to 1834, there was little or no connection between the Government and the bank. It stood upon a solid basis, and there was little or no accommodation on either side. The blow against the bank had commingled the Government and the bank, and that blow would remain until the Government became the bank, or the bank the Government. There was, then, no other alternative, in his opinion, but a separation. He proceeded to observe that he entertained no hostility whatever to the bank, and he had dear friends who would be affected by the decision of the present question. He blamed not the banks, nor the stockholders and directors, for the many evils which had arisen. They had grown up without any man seeing the cause. Nothing but time and experience could develop it.

What remained to be done was to re-organize the Treasury—to reform the agents of the Government. Nothing but their adoption of this course would suit the new condition of things. How that was to be brought about he could not at present say. It must not be a Treasury bank. No bill should have his vote which was in any way connected with the patronage of the Government. He declared that he entertained the most implacable and deadly hatred to any extension of Government patronage.

[Here Mr. C. stated the objects of the amendment he intended to offer, which would be found below.]

He remarked that he desired the aid of the supporters of the administration to carry his measure, for without it nothing could be carried. If he could see his way as clear as the light of Heaven, he would not trust the execution of a measure to unwilling hands.

With respect to relief for the country: We owed money, and it must be paid, and relief only would come in time, and by frugality and industry. He regarded the growing crops of cotton in Alabama, Louisiana, and Mississippi, and the rice and tobacco crops, as principally calculated to bring about relief to the country.

After a few other remarks, Mr. C. offered the following proposition:

SEC. And be it further enacted, That from and after the first day of January, eighteen hundred and thirty-eight, three-fourths of the amount due to the Government, for duties, taxes, sales of public lands, or other debts, may be paid in the notes of specie-paying banks; and that from and after the

first day of January, eighteen hundred and thirty-nine, one half may be so paid; and from and after the first day of January, eighteen hundred and forty, one-fourth; and from and after the first day of January, eighteen hundred and forty-one, all sums due, for duties, sales of public lands, or other debts to the Government, shall be paid only in the legal currency of the United States, or in such notes, bills, or paper issued under the authority of the same, as may be directed to be received by law.

Mr. BENTON said he fully concurred in the object of the amendment. He then offered the following amendment, and moved that it be printed, together with the proposition offered by Mr. CALHOUN, and laid on the table; which was agreed to:

SEC. And be it further enacted, That the collection and disbursement of the revenues shall continue to be made in the kinds of money directed by existing laws, until the day of next; from and after which time all the revenues of the United States, and of the General Post Office, and all payments to them, shall be received in gold and silver coin only, except in cases in which Treasury notes, or land scrip, may be receivable by law; and on all payments so made in gold coin, a discount of one per cent. shall be allowed in favor of the payer. And, from and after the same day, every officer or agent engaged in making disbursements on account of the United States, or of the General Post Office, shall make all payments in gold and silver coin only, or in Treasury notes when authorized by law; and any receiving or disbursing officer, or agent, who shall neglect, evade, or violate, the provisions of this section, shall be dismissed the service, and shall forfeit all compensation which may then be due him.

SEC. And be it further enacted, That it shall be the duty of the Secretary of the Treasury to prescribe regulations to enforce the speedy presentation of all Government drafts for payment at the place where payable; and, in case of unreasonable delay in such presentation, payment of the draft so delayed may be made at any other place within the limits of the United States.

Mr. BENTON also offered the following bill, which was laid on the table and ordered to be printed:

A BILL to re-establish the currency of the Constitution for the Federal Government.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That bank notes and paper currency of every description shall cease to be received, or offered in payment, on account of the United States, or of the Post Office, or in fees in the courts of the United States, as follows: of less denomination than twenty dollars, none after the third day of March, eighteen hundred and thirty-seven; of less denomination than fifty dollars, none after the third day of March, eighteen hundred and thirty-eight; of less denomination than one hundred dollars, none after the third day of March, eighteen hundred and thirty-nine; of less denomination than five hundred dollars, none after the third day of March, eighteen hundred and forty; of less denomination than one thousand dollars, none after the third day of March, eighteen hundred and forty-one; and none of any denomination from and after the third day of March, eighteen hundred and forty-two.

SEC. 2. And be it further enacted, That any person holding an appointment under the laws of the United States, and any bank employed to keep public moneys, which person or bank shall neglect, evade, violate, contravene, or in any way elude, or attempt to elude, the provisions of this act, shall be guilty of an offence against the laws; and the person so offending shall be liable to be dismissed from the service, and the bank so offending shall, on satisfactory information, be discontinued as a depository of public moneys.

Mr. BENTON then spoke at length in favor of the bill authorizing the issue of Treasury notes.

Mr. WALKER moved to strike out the words in the eleventh line of the second section, giving six per cent. interest on the Treasury notes. Mr. W. was averse to these notes bearing interest, because they would at once find their way to Great Britain, where they would be held by capitalists, and thus

create a debt to foreigners, which he was unwilling to do. What, he asked, was the cause of the rise of cotton in the South at the present time? Why, that that great staple was used as the means of making remittances to Europe; and if those Treasury notes, bearing an interest of six per cent. were issued, the notes would usurp the place of the cotton, and be retained by foreign capitalists, while the great staple would be depreciated in price. His own State (Mississippi) and Alabama, he would affirm, grew one-fourth of the cotton crop raised in the southwest, and he could not think of lessening the value of these crops, which would be the inevitable tendency, if this rate of interest on these bills were to be established.

Mr. WRIGHT went into an explanation of the causes why the Committee on Finance had fixed the rate of interest. It was in order, he said, to make the notes equal in all respects to gold and silver, which the public creditors might otherwise refuse. It should be observed, however, that these notes were made redeemable in one year, for which period they bear that rate of interest, and for that only. Mr. W. expressed his sincere desire that the bill might be permitted to pass in its present shape.

Mr. KING of Georgia stated that the high respect he entertained for the opinions of his friends from Carolina and Mississippi, induced him to make a remark or two against the amendment they proposed. In answer to the Senator from Carolina, he stated it to be a law of currency, admitting few or no exceptions, that where two mediums of circulation were in circulation, the one answering all the purposes of the other, and one valuable purpose besides, the currency answering an additional purpose would bear a premium over the other. This principle was practically illustrated in the transactions of the Government. Treasury drafts, he said, answered now the purposes of internal exchange, and also were equal to specie in the receipt of Government dues. Yet specie answered this purpose, and one purpose beyond; that is, it is in great demand to pay a heavy foreign debt. The drafts were transfers less valuable than specie. If, then, we proposed to pay our creditors at par, and to offer them Treasury notes, or specie, at their option, we should be able to get but a small amount in circulation, unless they bore an interest sufficient to make them equal to specie. The Secretary would, of course, only use the discretion of adding interest so far as to make them acceptable at par by the creditors of Government. Without this, until exchanges were more favorable to us, we might not be able to get any of them into circulation. A few might be accepted from convenience, but he feared, to no great extent.

In answer to his friend from Mississippi, he thought his position extraordinary. The argument went in favor of a permanent depreciation of our foreign exchanges. The causes mentioned by the Senator might give at the present moment an activity to the demand for cotton; but did not his friend see that the operation of these causes were merely temporary, and actually grew out of the distresses of the country. A depreciated paper money would be given for cotton for the purposes of remittance, because nothing else could be procured, without heavy sacrifices, that would answer that purpose; but until the foreign exchanges be favorably changed by reducing our foreign debt, what would the cotton be worth after it gets to Europe? The value of the raw material there depends much on our consumption of the manufactured article here; and what would we or could we consume of European manufactures with this heavy foreign debt, and an exchange of twenty per cent. bearing against us? He would venture to say until we could produce some favorable alteration in the exchanges, that the consumption of the United States of European manufactures would not produce a revenue of eight millions of dollars. If, then, these notes should go abroad in reduction of our foreign debt, they would perform a very valuable purpose. But he said he had no apprehension of this to any or much extent. There was too much of our paper credits in Europe already, and gold was much more valuable there than here; and he referred to the price of the bonds of the

United States Bank in Europe, to prove that specie was still a much better remittance. There was little danger, then, that those notes which were payable here, and in so short a period as one year, would take the flight which his friend anticipated. So limited an amount, and payable in the United States, and not in Europe, would be more valuable for our own purposes here than for remittance. He therefore hoped the discretion would be retained. If the anticipations of the Senator from Carolina were correct, that they would circulate without interest at par, the interest would be made merely nominal; but without the discretion, the bill might fail to answer any valuable purpose to the Government.

Mr. WALKER said his views remained unchanged. If the present system continued, it might be disastrous; but he must look to things as they are at present, and be governed accordingly. He maintained, from his own knowledge of what was going on, that these "paper kites," as the gentleman termed them, would take their flight to Europe, and that, in so doing, they would materially injure the prices of the present crop. He would agree, however, to modify his motion so as to meet the objections of gentlemen, and would, therefore, move to strike out the word "six," and insert "three;" for which motion he would ask the yeas and nays.

Mr. WEBSTER made some remark, not distinctly heard, but believed to the effect that, as the interest was for one year only, the period at which the notes were redeemable, it could not be a matter of any great consequence.

The question having been taken on Mr. WALKER's amendment by yeas and nays, there appeared for the amendment six, against it forty.

The question was then taken on the engrossment of the bill by yeas and nays, and decided as follows:

YEAS—Messrs. Allen, Bayard, Benton, Black, Brown, Buchanan, Calhoun, Clay of Alabama, Clayton, Fulton, Grundy, Hubbard, Kent, King of Alabama, King of Georgia, Knight, Lyon, McKean, Morris, Nicholas, Niles, Norvell, Pierce, Rives, Roane, Robbins, Robinson, Ruggles, Sevier, Smith of Connecticut, Smith of Indiana, Strange, Swift, Tallmadge, Tipton, Walker, Wall, Webster, White, Williams, Wright, and Young—43.

NAYS—Messrs. Clay of Kentucky, Crittenden, Preston, Southard, and Spence—5.

#### EXTENSION OF REVENUE BONDS.

The bill to postpone the payment of the duties on revenue bonds having been read a second time,

Mr. WEBSTER moved a further extension of time than that contemplated in the bill, which was for six months. Mr. W. entered into some reasons to show why this extension should be granted as a matter of indulgence.

Mr. WRIGHT said that a memorial had been received from the merchants of New York, praying an extension of twelve months, showing the causes why this additional extension was asked; the committee, Mr. W. believed, were generally favorable to some additional indulgence, and he would adopt the nine months, as proposed by the gentleman from Massachusetts. The blank was accordingly filled with *nine*, and the bill ordered to be engrossed for a third reading.

On the question for engrossing, Mr. SEVIER asked for the yeas and nays.

The bill for adjusting the claims on the deposit banks having been read a second time,

Mr. WALKER moved to insert in the room of "two, five and eight," the words "*four, six, and nine months*," which was adopted, and the bill ordered to be engrossed for a third reading.

The bill authorizing merchandise to be deposited in the public stores having had its second reading,

Mr. CALHOUN moved to postpone the bill until the regular session, not deeming its passage of material import at the present juncture.

Mr. BUCHANAN opposed the postponement, and said that when the question was taken on the passage of this bill, he should move it be taken by yeas and nays, as he wished to record his *unhappy* support.

Mr. KING of Alabama would oppose the postponement of the bill for so long a period as the

next session. He was willing, however, to give the Senator from South Carolina time to look into its provisions, and would therefore move that it be postponed until Monday next; which was agreed to.

And on motion of Mr. WRIGHT, the Senate adjourned.

#### HOUSE OF REPRESENTATIVES,

Monday, September 18, 1837.

The Hon. Mr. LYON from Alabama appeared and was qualified.

Mr. J. Q. ADAMS, on leave, submitted a motion to print two thousand extra copies of the amended rules and orders of the House, together with Jefferson's Manual; modified, at the suggestion of Mr. BRIGGS, that the same be suitably bound; which was agreed to.

Petitions and memorials were presented by Mr. EVANS of Maine.

Messrs. BRIGGS, LINCOLN, FLETCHER, ADAMS, HASTINGS, CUSHING, and PARMENTER, of Massachusetts.

[Mr. Adams asked leave to submit a resolution, as it was understood, in relation to Texas; but the Chair ruled it out of order, under the order adopted by the House some days since, not to take up any business not embraced in the President's Message.]

Mr. WHITTLESEY of Connecticut.

Messrs. KEMBLE and BRONSON of New York.

Messrs. POTTS, HENRY, M'KENNAN, and POTTER, of Pennsylvania.

Messrs. CRAIG, STEWART, and MERCER, of Virginia.

Mr. DAWSON presented memorials from Columbus and Milledgeville, Georgia, praying for the establishment of a national bank; which were severally referred to the Committee of Ways and Means.

Messrs. HARPER, LOOMIS, ALEXANDER, MORRIS, MASON, HUNTER, and WHITTLESEY, of Ohio.

Mr. LYON of Alabama.

Mr. JONES of Wisconsin.

Mr. CAMBRELENG, from the Committee of Ways and Means, reported Senate bill, without amendment, to postpone the fourth instalment of the deposit with the States; committed to a Committee of the Whole on the state of the Union.

Mr. CAMBRELENG, from the same committee, also reported a bill to authorize merchandise to be deposited in the public stores, and for other purposes; read twice, and committed to the same Committee of the Whole as the foregoing.

Mr. CAMBRELENG, from the same committee, also reported a bill to revoke the charters of such banks within the District of Columbia as shall not resume specie payments within a limited time, and to suppress the circulation of small notes therein; read twice, and committed to the same Committee of the Whole as the foregoing.

Mr. CAMBRELENG said the Committee of Ways and Means had received information from the War Department, that the former appropriations for the war in Florida were nearly exhausted, and he therefore asked for a suspension of the order of business, so that he might report a bill in pursuance of that information.

Leave being granted, Mr. C. thereupon reported a bill making an additional appropriation for the suppression of Indian hostilities for the year 1837; which was read twice, and committed as above.

Mr. CAMBRELENG also reported, from the same committee, a resolution to change the daily hour of meeting to 10 o'clock, a. m.

Mr. HARLAN moved to insert 11 o'clock, which was agreed to, and so amended the resolution was adopted.

The following resolution heretofore submitted by Mr. SNYDER, was considered and adopted:

*Resolved*, That the Secretary of the Treasury inform this House at what time the Bank of the State of Missouri was made a deposit bank, and what amount of its own notes said bank had in circulation, and what amount of specie it had in its vaults, when it was selected. Also, what amount of money is now in the hands of the receivers of public moneys in Illinois, and where the same is now ordered to be deposited.

The following resolution submitted on a former day by Mr. LOOMIS, of New York, was taken up:

*Resolved*, That the Secretary of the Treasury prepare and report to this House as soon as may be convenient, a statement showing what methods have been adopted for the safe keeping of the public funds, since the first organization of the Government under the Constitution; the length of time that each method has been in use; designating the several changes, and when made, and what losses under each method have been sustained by the Treasury, in consequence of defalcation of agents or officers so entrusted with the funds for safe keeping.

Mr. GARLAND moved to add to the resolution the following amendment:

"And that the Secretary of the Treasury be directed to communicate to this House all the correspondence between the Department and Collectors and Receivers of the public money relating to any neglect or omission on the part of any of those officers to furnish returns or accounts, or to pay over moneys in their hands, according to the prescribed regulations and the laws of the United States."

Mr. MERCER said that it would occupy ten folio volumes to submit the correspondence called for by his colleague.

Mr. GARLAND stated that his object was to ascertain the amount of defalcation on the part of the collectors and receivers; and if it occupied twenty folio volumes, he wished to have it laid before the House; and the people of the country desired it to be made public; but he apprehended that it would not occupy two quires of paper to submit the correspondence he desired to have.

Mr. LOOMIS of New York said that the information called for in his resolution could be prepared in a few days, and submitted to the House; but if the amendment of the gentleman from Virginia should prevail, he took it that it would take a much longer time to prepare the statement, and would occasion a delay which he desired to avoid. Therefore, he hoped the amendment would not prevail.

Mr. McKAY said that the public money had been generally kept in banks, and the principal part of the information required could be obtained from the report of the Secretary of the Treasury on this subject, in 1835. He however desired to know the amount of losses sustained by the Government, by receiving and disbursing agents. He therefore moved that the Secretary also report the amount of losses sustained through receiving and disbursing officers.

Mr. LOOMIS of New York said that the amount losses sustained through these officers during the last war was very considerable, and it would require a long time to prepare the information called for by the gentleman from North Carolina. He understood that the revenue had been kept in different ways—sometimes in the United States Bank, sometimes in State banks, and sometimes in the hands of individuals, and his sole and only object was to ascertain the amount of losses sustained by the different agents employed. He wished to go this far and no farther; therefore he hoped the amendments might not prevail.

Mr. MERCER remarked that his colleague had stated that all the information he had called for could be furnished on two quires of paper. Now, a few years ago, a report had been made giving the names of the different defaulters to the Government, and it appeared that they then amounted to about nine thousand, and the document made about three hundred pages.

Mr. GARLAND then modified his amendment by merely calling for the information in the years 1834, '35, and '36.

Mr. REED suggested that the better course would be to submit the different propositions separately.

Mr. McKAY said he did not wish to embarrass the resolution of the gentleman from New York, but he felt desirous of having the information called for in his amendment, and he hoped the gentleman would accept it as a modification of his proposition. If, however, the gentleman could not accept it he would withdraw his amendment.

Mr. LOOMIS remarked that the information desired by his resolution was of vast importance to the House, and interest to the country. We were now considering the subject, and this information was of the utmost importance in our deliberations, and he hoped gentlemen would not embarrass his proposition with amendments in relation to matters which would require much time to answer. He had no objection to calling for the information desired by the gentleman from North Carolina; but he hoped the proposition would be introduced separately.

Mr. WHITTLESEY of Ohio was of opinion, that the information called for by the two gentlemen in their amendments, would require months to answer, as the reports on the subject were very voluminous. He should, however, not object to the inquiries, provided that the propositions were submitted separately; but he hoped gentlemen would not now press them as amendments to the proposition before the House.

Mr. McKAY then withdrew his amendment.

Mr. GARLAND then remarked that, as he was not desirous of embarrassing the proposition of the gentleman from New York, he would withdraw his amendment, and submit it when resolutions were called for, as a separate proposition.

Mr. CAMPBELL, of South Carolina, then moved to strike out all after the word resolved, and insert the following:

"That the Secretary of the Treasury be requested to communicate to this House the aggregate amount of public money received by, and loss sustained through, the fiscal agents of the Government, from the adoption of the Constitution to the present time, discriminating between banks, Treasury officers, collectors of internal taxes, or other personal agents of the Treasury; and excepting from his statement the collectors of duties upon importations, and the receivers of the sales of the public lands."

Mr. C. explained the object of his proposition, and after some remarks by Messrs. LOOMIS and PATTON, Mr. CAMPBELL withdrew his amendment.

The original resolution was then adopted.

Mr. EVERETT, on leave, submitted the following resolution, which was considered and adopted:

*Resolved*, That the Secretary of War be directed to lay before this House a statement of the number of Indians employed in the military service of the United States since the commencement of the present Seminole war; and copies of all orders and instructions under which Indians have been employed, or have been directed to be employed, in the military service of the United States, since the commencement of said war.

Mr. GHOLSON, on leave, submitted the following resolution, which was considered and adopted:

*Resolved*, That the Committee of Elections be instructed to report upon the certificate of election of Messrs. Claiborne and Gholson, the members elect from Mississippi, whether they are members of the Twenty-fifth Congress or not; and that said committee take into their consideration the proclamation of his Excellency, Charles Lynch, Governor of said State, and the writ of election issued in accordance with said proclamation on the 13th day of June, 1837; and also the act of the Legislature of the State of Mississippi, entitled an act to regulate elections, approved March 2d, 1833.

Mr. GARLAND of Virginia, on leave, submitted the following as a counter project to the one submitted by the Committee of Ways and Means, which was laid on the table and ordered to be printed:

*Be it enacted*, &c. That the Secretary of the Treasury be, and hereby is, required to adopt such measures as he may deem necessary, to effect the collection of the public revenue of the United States, whether arising from duties, taxes, debts, or sales of land, in the manner and on the principles herein provided; that is, that no such duties, taxes, debts, or sums of money payable for lands, shall be collected or received otherwise than in the legal currency of the United States, or in notes of banks which are payable and paid on demand in the said legal currency of the United States, under the following restrictions and conditions in regard to such

notes, to wit: from and after the passage of this act, the notes of no bank which shall issue or circulate bills or notes of a less denomination than five dollars shall be received on account of the public dues; and from and after the — day of — the notes of no bank which shall issue or circulate bills or notes of a less denomination than ten dollars, shall be so receivable; and from and after the — day of — the like prohibition shall be extended to the notes of all banks issuing or circulating bills or notes of a less denomination than twenty dollars.

SEC. 2. *And be it further enacted*, That no notes shall be received by the collectors or receivers of the public money, which the banks in which they are to be deposited, under the supervision and control of the Treasury Department, shall not agree to pass to the credit of the United States as cash: *Provided*, That if any deposit bank shall refuse to receive and pass to the credit of the United States, as cash, any notes receivable under the provisions of this act, which said bank in the ordinary course of business receives on general deposit, the Secretary of the Treasury is hereby authorized to withdraw the public deposits from said bank; nor shall the notes of any bank be received, which shall not be received by the State Governments in which it is issued in payment of its revenue.

SEC. 3. *And be it further enacted*, That it shall be the duty of the Secretary of the Treasury to select such State banks, as depositories of the public money, as, from their location, shall be most convenient for the fiscal operations of the Government, and the commercial intercourse of the country, not exceeding — in number.

SEC. 4. *And be it further enacted*, That it shall be the duty of the Secretary of the Treasury, in all cases, to require of the banks to be retained, or hereafter selected as depositories of the public money, ample and approved collateral security, for the safe-keeping and faithful repayment of all such sums of the public money as are or shall be deposited with them, which security shall be annually renewed.

SEC. 5. *And be it further enacted*, That the Secretary may in his discretion, whenever the circulation of any deposit bank shall exceed three times the amount of its actual specie capital, discontinue such bank as a depository of the public money, and the receipt of its notes in payment of the public revenue.

SEC. 6. *And be it further enacted*, That if any of the banks which have suspended specie payments, the notes of which, previous to said suspension, were received in payment of the public revenue, shall *bona fide* resume specie payments one month previous to the — day of —, then and in that case it shall be the duty of the collectors and receivers of the public money to receive the notes of such bank or banks in payment of the public revenue, under the restrictions and limitations herein before prescribed. But the bills or notes of any bank failing to redeem its notes in specie as aforesaid, within the time limited, shall not be thereafter received in payment of the public dues as aforesaid.

SEC. 7. *And be it further enacted*, That it shall be lawful for the Secretary of the Treasury, if he shall deem it expedient, to continue as depositories of the public money any bank which has suspended specie payments as aforesaid, under such limitations and conditions as he may prescribe.

On motion of Mr. CAMBRELENG the House proceeded to the orders of the day, and, on motion of the same gentleman, resolved itself into a Committee of the Whole on the state of the Union, Mr. HAYNES in the chair, and took up the following bill from the Senate:

A BILL to postpone the fourth instalment of deposits with the States.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That the transfer of the fourth instalment of deposits directed to be made with the States, under the thirteenth section of the act of June twenty-third, eighteen hundred and thirty-six, be, and the same is hereby, postponed till further provision by law.

Mr. DAWSON proposed the following substitute, which was read:

[This substitute will be given at length in tomorrow's Globe. It proposed to withhold a certain amount of the unexpended balance of the appropriations, and by that means carrying out the provisions of the deposite law.]

The substitute having been read,

Mr. D. then moved that the committee rise, report progress, and ask leave to sit again, assigning his reasons for the motion, being grounded on the report of the Secretary of the Treasury, and that the House wanted further information, and was not prepared to go into it at that time.

At the request of Mr. CAMBRELENG, Mr. DAWSON, withdrew his motion.

Mr. CAMBRELENG thought, when the committee came to examine the proposition of the gentleman, they would not consent to postpone the bill under consideration. The gentleman had been led into error, the common error, that this twenty-four millions of unexpended appropriations were in actual money, when the fact was there was not a dollar of them in money. If the gentleman's bill were passed, Mr. C. knew no other effect it would have than this: that it would cut off all the money appropriated for carrying on the war in Florida, all the money to carry into effect the stipulations of Indian treaties, and all the funds set apart to remove the Indians west of the Mississippi. It was these very appropriations that had lately swelled the amount of our unexpended balances from seven or eight millions to fourteen or fifteen millions. Last year a single Indian treaty alone involved an appropriation of no less than six millions of dollars. Now, let him ask, would the gentleman from Georgia cut off all these appropriations? And even if he did, what would then be the condition of the Treasury? Why, it would not be advanced one single step. Their army, navy, and those expenditures now under contract, would all still have to be supplied, and must be supplied.

Mr. C. said he had desired, before the gentleman made his motion, and he had risen for that purpose, to submit a very brief statement, for he should not, at this short session, detain the House one moment more than necessary. With the gentleman's permission, he would go into a very brief statement of the reasons which had induced the committee to report this bill. He premised that he was aware that there were a number of gentlemen anxious that the bill should not pass; yet he could not persuade himself to believe but that, when they saw the reasons for it, it would pass by a very large majority. Mr. C. then recited the following statement:

*Estimated state of the Treasury on the first of October, 1837.*

Specie fund in land offices and banks	-	\$700,000
Specie in the Mint	-	800,000
		<u>\$1,500,000</u>
Balances due from banks, which will remain undrawn on the first of October	-	5,000,000
Instalment due from the United States Bank on the first of October, deducting the amount paid through an arrangement with the Navy Department, about	-	1,500,000

Available and unavailable funds	-	8,000,000
---------------------------------	---	-----------

Deduct the sums which will not be available, either for deposite or for current expenses of Government, for some time to come, viz:

Employed in the Mint for the purchase of bullion, which cannot be applied to any immediate use	-	\$500,000
--	---	-----------

Of the five millions due from banks, only \$750,000 are due from banks east and north of Virginia; and but \$250,000 from other banks, which can be considered available, leaving wholly unavailable in remote banks	4,000,000
--	-----------

It is understood that the Bank

of the United States has become the purchaser of Treasury transfer drafts to the States, (presuming that they were, like other drafts, receivable in payment of public dues,) to meet the instalment due on the 1st of October. Whether they are received or not, the fund will be unavailable—in the one case the claim continues on the United States Bank, and in the other the balance due from the State banks is increased to the amount of

	1,500,000
	<u>6,000,000</u>
Leaving in the Treasury to meet current expenses	- 2,000,000

Of which there is in specie	- 1,000,000
Balance due from non-specie paying banks	- 1,000,000

Such then, continued Mr. C. will be the actual condition of the finances of this country on the first of October next, when they were called upon, by the deposite act, to deposite \$9,400,000 with the States. But that was not the only view to be taken. It was not alone the condition of the Treasury on the first of October which demonstrated the impracticability of making the above deposite. The law itself provided that \$5,000,000 should remain in the Treasury, viz: one for the mint, and four for a surplus, and they had only two millions in all, viz: one million in the Treasury, in specie, and one million of available funds in banks. They had only two millions any where to meet the current expenses of the Government, a demand which that House ought surely to provide for before they provided for dividing a surplus. But he had made another statement, which he would read to the House, for such statements were much more easily understood than long speeches. Mr. C. then recited the following:

Probable state of the Treasury in the last quarter of the year, excluding unavailable funds, or all funds which cannot be applied to the current expenses of the Government:

Balance in the Treasury on the 1st of October:	
In specie	\$1,000,000
In bonds	1,000,000
	<u>\$2,000,000</u>

Receivable from banks, probably less, but may be	1,000,000
Current receipts from customs, bonds, cash duties, &c. if the payment of the bonds be postponed, and not including suspended bonds	1,000,000
Suspended bonds, payable from the middle of November to the 1st of January	1,900,000
Receipts from miscellaneous sources	100,000
	<u>4,000,000</u>
	<u>\$6,000,000</u>

The expenditures during the last quarter, estimated at the monthly rates for the first eight months in the year, will be

Extraordinary appropriations which will be immediately required for the Florida war	1,600,000
---	-----------

Allowance for drafts on bonds (44 millions outstanding) which have been issued, and which may be returned in the last quarter in payment of public dues, instead of money, besides the million and a half purchased by the United States Bank	500,000
---	---------

Balance required to be in the Treasury to meet contingent demands, (particularly necessary when the outstanding appropriations amount to 24 millions,) and excluding the additional

half million allowed by law for the use of the Mint	-	4,000,000
---	---	-----------

\$15,100,000

Deduct the available means in the 4th quarter	-	6,000,000
---	---	-----------

Amount to be provided	-	\$9,100,000
-----------------------	---	-------------

Mr. C. added, that it would, from the above, be seen, not only that they had no money in the Treasury to deposite, in accordance with the provisions of the deposite act, but that they must actually issue on their credits, or rather anticipate their receipts.

Mr. DAWSON would reply to the gentleman, by asking him a single question. The gentleman said that Mr. D. had fallen into a very common error, by saying that there was so much money in the Treasury; now he would ask the gentleman what the Secretary of the Treasury meant by saying that there were \$24,075,239 balances of unexpended appropriations remaining in the Treasury on the 11th of this month?

Mr. CAMBRELENG replied that the Secretary meant by \$24,000,000 of unexpended balances, all the appropriations for the army, for the navy, for fortifications, for Indian treaties, for Indian hostilities, and for the whole class of public expenditures, the amount of which had not yet gone out of the Treasury, but the contracts and treaty stipulations for which had been made.

Mr. DAWSON again referred to the report of the Secretary of the Treasury, setting forth that there were \$24,000,000, and odd of unexpended balances, and said it was money, money that existed, and belonged to the Government. It was not a mere ideal nothing, but something tangible, and so considered, it seemed at one time at least, by the Secretary himself. Now the Chairman of the Committee of Ways and Means admitted, the Secretary's statement, and Mr. D. begged leave to state one additional fact to the House, that on the first of October there would be \$8,000,000 more to be added to the other amount, which would make rising of \$32,000,000 or, with the \$5,000,000, over \$37,000,000 in the Treasury, and the question to be asked was, why it should remain there? Why should all that money be permitted to remain in the Treasury?

Mr. D. again adverted to the Secretary's report, which put forth or demonstrated that there were upwards of thirty-seven millions of surplus in the Treasury on the 1st of January, 1837. Again: in a report of the same officer, sent to the House a day or two ago, he says:

"The tabular statement annexed, shows, as desired, 'the amount of the appropriations of the past and present years, remaining unexpended,' to be \$24,075,239 37."

This statement was in the following words:

Statement of the amount of appropriations of the past and present years remaining unexpended on the 11th September, 1837, inclusive, agreeably to a resolution of the House of Representatives of the 11th instant, viz:

Balances of appropriations on the 31st December, 1836	-	\$16,752,283 09
Appropriations made at the second session of the Twenty-fourth Congress, exclusive of the Post Office Dep't	-	\$28,575,837 10
Specific and indefinite appropriations made by former acts of Congress	-	2,824,250 10
		<u>31,400,087 50</u>

Expenditures of the United States from the 1st January to the 11th September, 1837	-	24,077,031 22
--	---	---------------

Leaving balances of appropriations 11th September, 1837	-	\$24,075,239 37
---	---	-----------------

In the call made on the Secretary, he was desired to state "what objects of public expenditure can, with least injury to the public service, be either wholly dispensed with during the present year, or

bear any material reduction." He replied that a minute and critical examination on this point had been instituted in May last, the result of which was that "enough could and would be postponed till next year, to amount to about \$15,000,000." Therefore, Mr. D. contended it would be better to dispense with this expenditure, and make the distribution of the fourth instalment, for all the States would willingly receive the notes of the deposit banks within their limits. He knew the fact to be so in his own State, and he believed it so of others also. Mr. D. further contended, at some length, in favor of his proposed plan.

Mr. CAMBRELENG said however opposed he was originally to the distribution, or rather the deposit act, as it was called, and he did every thing in his power to prevent its passage, yet he should be the last man there to take any measure to prevent its execution, if it could be avoided; nay, if it were possible, he would adopt any and every measure to carry it into execution, short of one, and of one only, which the gentleman himself could possibly devise; that was, the creating a public debt, for the purpose of making an artificial surplus for deposit for safe-keeping with the States. If the gentleman could devise any proposition that Mr. C. could at all sustain, besides the one to which he had adverted, he would go with him. Mr. C. however, could himself think of no other mode, and that he should ever oppose.

He would repeat that there were no funds, either available or unavailable, within the reach of the Treasury, for distribution, and only \$2,000,000 of the amount (five millions) required by the deposit act to remain in the Treasury. Now, if gentlemen could, by one sweep, sweep away utterly this twenty-four millions of dollars, they would not add one dollar to the Treasury.

Mr. BELL hoped his friend from Georgia would not press his proposition at the present time, for they were not prepared for it, and it was hardly safe to press so important an amendment upon what might or might not be the future recommendations of the Secretary.

Mr. B. would propound a question to the chairman of the Committee of Ways and Means, and it was this: whether his minute statements, just read to the House were founded upon any material error in the estimates of the Secretary of the Treasury? For, if not, Mr. B. would perhaps be able to go on with the discussion; or, at least, attempt to elucidate what the real state of the finances at this time was; and he felt assured that he should be able to demonstrate to all, except those obstinately and determinedly hostile to the policy of that measure, and had done every thing in their power to thwart its operations. He repeated that he should be able to convince every candid and reflecting mind that the Government could pay this fourth instalment, and that with perfect convenience; and he would give one reason. He understood that the debt actually due to the Government from the deposit banks exceeded in amount, at this moment, that due to the States under the deposit act by upwards of \$9,500,000.

Mr. CAMBRELENG, in answer to Mr. BELL's inquiry, stated that there was, in detail, a difference only in the mode by which the Secretary of the Treasury and himself arrived at the same, or nearly the same result. There was a slight difference in the amount, arising from some subsequent estimates from the War Department, but there was no substantial variation in the result of the two.

Mr. C. adverted to his statement again, to show that the gentleman from Tennessee was in error, as to the surplus of nine millions and a half remaining in the banks over and above what the fourth instalment would call for, since four and a half of that amount had actually been drawn out in payment of the third instalment of deposit; and he showed, from a paper he read, what had become of the balance.

Mr. BELL was glad to hear there was no difference between the two statements; but believing the House would be better prepared to go on with the subject to-morrow, though he, for one, was perfectly prepared, he suggested whether it would not be best for the committee to rise.

Mr. CALHOON of Kentucky hoped the gentleman from New York would not object to the printing of the statements he had read.

Mr. CAMBRELENG had intended to hand them to the reporters, by which they would probably appear in the morning papers.

The CHAIR remarked that that was a matter for the House alone to consider.

Mr. BELL did not make the motion for the committee to rise so much on his own account, for he was prepared to go on, but he thought it seemed to be the general sense of the committee. He again appealed to the gentleman from Georgia to withdraw his amendment at that time.

Mr. DAWSON preferred that the committee rise.

Mr. RHETT confessed that, from the reports of the Secretary of the Treasury and the statements of the chairman of the Committee of Ways and Means, he was in a mist, and wanted more light. At present, he was disposed to vote for the bill. Mr. R. then entered into a review of the report of the Secretary of the Treasury, and pointed out what he regarded as a number of obscurities and variations in that document.

Mr. SERGEANT felt the question to be somewhat embarrassed by the proposition of the gentleman from Georgia, the second part of which was entirely unnecessary, since it was a requirement upon the Secretary of the Treasury to do what he was already enjoined to do by law. Mr. S. was satisfied there would be a deficit to pay all the claims upon the Treasury, whatever its amount might be, but it devolved upon those who proposed to withhold the fourth instalment of deposit from the States, to show that that was the very appropriation that should be dispensed with or withheld.

This was a fair and independent question, being one of deposit rather than of payment, that it might be treated by itself; and he would submit it to the gentleman from Georgia, whether he had not better withdraw his amendment. At present, unless some better reasons were offered than he had been furnished with, he was opposed to the bill, and should give his reasons hereafter.

Mr. BELL thought there would be no deficiency, that is, if all the funds in the banks should be available; but he asked the gentleman from Pennsylvania on what his impression of a deficit was founded?

Mr. SERGEANT founded his impression of a deficit on the statements of the Secretary of the Treasury, and the summary of the chairman of the Committee of Ways and Means.

Mr. THOMPSON said all he had heard only served the more to convince him of the necessity of the information called for by the gentlemen from Georgia, and he had heard nothing yet to convince him of the necessity, for nothing but the most urgent necessity would justify it, for the passage of this bill. He would just as soon vote for a high tariff at once as for an indirect loan, as proposed by the measures before the country. Mr. T. was understood to say that he would, however, vote for this bill if the funds in the State banks were found altogether unavailable, but against it if they were found available either to the States or to the General Government.

Mr. HAMER supported the bill at some length, and took the ground, that by the provisions of the deposit law, and the conditions on which the deposit was received, viz: subject to be recalled at a future time, the States had no vested right in the fourth instalment.

Mr. CAMBRELENG said, in reply to the gentleman from South Carolina, (Mr. Rhett,) that he had confined his observations to the actual condition of the Treasury on the first of October and the following quarter, in order to show that committee what its present resources were. He did not certainly go into the question of the whole resources of the country, though it was due to that honorable gentleman to say that he (Mr. C.) was perfectly prepared to give him all he wanted thereon, and had prepared a statement to present to the House when they reached the other bills. The question as to our unavailable resources, and their sufficiency to meet the present expenditures, would properly come up when the Treasury bill was before the House.

They were now on a distinct subject—on the subject of depositing, and not of paying money, as was well argued by the gentleman from Pennsylvania. When the other bill came up, Mr. C. would be prepared for the last question. He himself believed there would be a deficiency, and one to such an extent, that the amount of Treasury notes authorized to be issued would be required to serve for the next year, or even two years to come.

Mr. WISE inquired if the statements referred to and read by the gentleman from New York, had been furnished by the Secretary of the Treasury to the Committee of Ways and Means, and not to the House.

Mr. CAMBRELENG replied that they were statements that had been made out by himself at the Department, according to his own mode of making out accounts. They were not submitted by the Secretary to the committee; nor had the Secretary submitted any documents to the committee, who had before them only what passed through the House.

On motion of Mr. BELL, the committee then rose, reported, and had leave to sit again.

At the request of several members,

Mr. CAMBRELENG submitted a motion print the foregoing statements on the condition of the Treasury, which was agreed to, and then,

On motion of Mr. CUSHING,  
The House adjourned.

IN SENATE,  
TUESDAY, September 19, 1837.

Mr. CLAY of Alabama introduced the following resolution:

*Resolved*, That the Secretary of the Treasury be directed to report to the Senate, on or before the first Monday in December next—

1st. The average quantity of public land offered at public sale per annum, since the commencement of the cash system, and the average price per annum in each year.

2d. The quantity of public lands which have remained subject to private entry, and not sold, for a period of twenty years, or upwards.

3d. The quantity subject to private entry, and unsold, for fifteen years and under twenty.

4th. The quantity subject to private entry, and unsold, for ten years and under fifteen.

5th. The quantity subject to private entry five years, and under ten, designating the State or Territory in which the lands of each class are situated; and

6th. The aggregate quantity of public lands in each State and Territory; what portion has been surveyed, and what portion has been sold; and the aggregate received therefor in each.

#### ISSUE OF TREASURY NOTES.

The bill authorizing the issuing of Treasury notes was taken up; and after having been read a third time, was finally passed.

A message was received from the President of the United States, through his private secretary, Mr. Van Buren.

#### EXTENSION OF REVENUE BONDS.

The bill postponing the payment of the public bonds was taken up; and after having been read a third time, was finally passed.

#### SETTLEMENT OF CLAIMS ON THE DEPOSIT BANKS.

The bill for the settlement of claims by the Government on the deposit banks, was taken up, read a third time, and passed.

Mr. RIVES, pursuant to notice, rose to ask leave to introduce a bill to designate the funds receivable in payment of the revenues of the Government.

The bill was then introduced, read a first time, and ordered to a second reading.

Mr. RIVES rose and addressed the Senate for upwards of two hours.

Mr. BENTON presented two statements which he had received from the Treasury Department, of the amount of specie imported and exported during the present year, and of some other Treasury matters, (not heard.) Laid on the table, and ordered to be printed.

The CHAIR presented a communication from

the War Department, with a report of the Board of officers appointed at the last session, on the subject of experiments to test certain new inventions in firearms.

Also, a report from the Colonel of the Ordnance Department, in obedience to a resolution of the Senate in February, 1837. Both these documents were laid on the table, and ordered to be printed.

On motion of Mr. HUBBARD, the Senate went into the consideration of Executive business; and after some time spent thereon, the doors were opened, and

The Senate adjourned.

## HOUSE OF REPRESENTATIVES,

TUESDAY, September 19, 1837.

The Hon. EBENEZER J. SHIELDS, a member elect from the State of Tennessee, appeared, was qualified, and took his seat.

Petitions and memorials were presented by

Mr. MARTIN of Alabama.

Messrs. WHITTLESEY, GOODE, and MORRIS, of Ohio.

Mr. OWENS of Georgia.

Mr. OWENS presented the memorial of James King, keeper of the light-house on Tybee island, State of Georgia, praying additional compensation, and moved that the usual disposition be made of it under the rule of the House.]

Messrs. POTTS, SERGEANT, HENRY, POTTER, HUBLEY, and MUHLBERG, of Pennsylvania.

Mr. RANDOLPH of New Jersey.

Messrs. RUSSELL, PRENTISS, GRANT, and CHILDS of New York.

[Mr. RUSSELL presented the remonstrance of James Richardson and others, inhabitants of the town of Cambridge, in the county of Washington, in the State of New York, against the annexation of Texas to the United States. Also, a like remonstrance of William Stevenson and others, of the said county of Washington. Also, a like remonstrance of Leonard Church and others, of the said county of Washington. Also, a like remonstrance of Thomas Stevens and others, of said county of Washington. Also, a like remonstrance of Archibald Kenyon and others, inhabitants of the town of Salem, in said county of Washington.]

Mr. ALLEN of Vermont.

[Mr. ALLEN of Vermont presented memorials of 154 inhabitants of Johnson, county of Lamoille, Vermont. 90 inhabitants of Coventry, county of Orleans, Vermont. 101 inhabitants of Cambridge, county of Lamoille, Vermont. 226 inhabitants of Milton, county of Chittenden, Vermont. 64 inhabitants of Hydepark, county of Lamoille, Vermont. 53 inhabitants of Huntington, county of Chittenden, Vermont. 34 inhabitants and legal voters of Waterville, Vermont. 154 inhabitants of Morris-town, Lamoille county, Vermont. 136 inhabitants of Wayne county, State of Michigan. And 119 inhabitants of Florence, Oneida county, State of New York, remonstrating against the admission of Texas into the Union.]

Mr. HOLT, of Connecticut.

Messrs. CRANSTON and TILLINGHAST, of Rhode Island.

Messrs. ADAMS, BORDEN, LINCOLN, PHILIPS, and GRENNELL, of Massachusetts.

Mr. JONES, of Wisconsin.

[Mr. JONES presented a petition from the city of New York, praying for the construction of a harbor at Racine, Wisconsin Territory.]

[Mr. Adams asked the leave of the House to offer the following resolution:

"Resolved, That the power of annexing the People of any independent foreign State to this Union is a power not delegated by the Constitution of the United States to their Congress, or to any Department of their Government, but reserved to the People."

Mr. HAYNE objecting,

Mr. ADAMS moved a suspension of the rules, for the purpose of permitting him to offer the resolution, and called for the yeas and nays, but the House refused to order them, and the motion to suspend was negatived without a division.]

Messrs. EVANS, NOYES, and FAIRFIELD, of Maine.

The States having been called for resolutions,

Mr. ADAMS submitted the following resolution, which, on his motion, was laid on the table and ordered to be printed.

Resolved, That the power of annexing the people of any independent foreign State to this Union, is a power not delegated by the Constitution of the United States to their Congress, or to any department of their Government, but reserved to the people.

Mr. MARTIN submitted the following resolution, which was read, and the rule which requires the same to lie over one day being dispensed with, it was considered and agreed to:

Resolved, That the Secretary of the Treasury be directed to report to this House on or before the first Monday in December next—

1st. The average quantity of public land offered at public sale per annum, since the 1st of January, 1823.

2d. The quantity of public lands which have remained subject to private entry, and not sold, for a period of 20 years and more.

3d. The quantity of public lands which have been subject to private entry for fifteen years, and under twenty.

4th. The quantity of public lands which have been subject to private entry for ten years, and under fifteen, designating the State or Territory in which the lands of each class are situated.

5. The aggregate quantity of public land in each State and Territory, what portion has been sold, and the amount received therefor.

6. The quantity of public land which has been subject to private entry for five years, and under ten.

Mr. JENIFER submitted the following resolution, which was considered and agreed to by the House:

Resolved, That the President of the United States be requested to communicate to this House what measures have been adopted since the adjournment of the last Congress in relation to the tobacco trade between the United States and foreign countries; also, such information as he may have received from our Ministers or other foreign agents abroad, in relation to the same, provided, in his opinion, such communication may not be detrimental to the interests of the United States.

Mr. PATTON submitted the following resolution; which was read, and laid on the table one day, under the rule, viz:

Resolved, That the President of the United States be requested to transmit to this House.

1st. A copy of all the documents and correspondence in his department, relative to the call of Major Gen. Scott from the command against the Seminole and Creek Indians.

2d. A copy of the record of the proceedings of the Court of Inquiry convened at Fredericktown, in relation to the operations against the Seminole and Creek Indians, together with the decisions thereon of the late and present Executive.

3d. A copy of the orders to Major Gen. Scott, relative to the conduct of his command, and the terms he might offer to the enemy.

4th. A copy of the orders of Major Gen. Jesup on assigning to him the same command; and all other orders and correspondence with Gen. Jesup subsequent thereto, which he may deem not injurious to the public service to communicate.

Mr. TALIAFERRO offered the following resolution, viz:

Resolved, That the Secretary of the Treasury be required as far as is now practicable, to furnish this House with a statement, to show how many bushels of corn, wheat, rye, barley, oats, and other bread stuffs, have been, during the last ten years, imported from foreign countries into the ports of the United States, distinguishing the several ports.

The above resolution was submitted in a somewhat different form, and modified several times by the mover at the suggestion of different gentlemen; after which,

Mr. HAYNES moved to strike out the words "during the last ten years, and insert since January, 1825;" lost.

Mr. EWING of Ohio, moved to insert a clause, calling on the Secretary for his views in relation

to the causes which had increased the importations of bread stuffs; which amendment was disagreed to.

Mr. HAYNES then moved to strike out the words "during the last ten years," and insert the last twelve years; which was agreed to.

The resolution was then agreed to.

Mr. WISE submitted the following resolution:

Resolved, That a select committee be appointed by ballot to inquire into the causes of the Florida war, and into the causes of the extraordinary delays and failures, and the enormous expenditures which have attended the prosecution of that war, and into the manner of its conduct, and the facts of its history generally; that the said committee have power to send for persons and papers; and that it have power to sit in the recess; and that it make report to the next session of Congress.

Mr. CAMBRELENG moved to strike out the words, "that they have power to sit during the recess." He made this motion because he believed there never had been a committee of the House which had sat during the recess of Congress. He hoped his motion to strike out might prevail, unless the gentlemen from Virginia could give some good reason why it should sit during the recess.

Mr. WISE presumed the reason must suggest itself to the mind of every gentleman, why he asked that the committee should sit during the recess. The committee could scarcely commence its labors during the session of the present Congress; and there would be no use in proposing the resolution if the committee could not sit longer than the continuance of the present extra session. He considered it as something extraordinary that two Major Generals of the standing army of the United States, who had taken part in that campaign, had been recalled by the Executive, and tried by a court martial of the country; and that the only successful commander in the Florida campaign, General Clinch, had testified to the country that no officer, general or subordinate, was to be blamed for the failure of the Florida campaign, but that the blame lay at the door of the War Department. In reply to that testimony, we have seen a labored defence published by the then Secretary of War, Lewis Cass, and the country were left to judge between these two officers. We see that this war is still raging; and but yesterday, in the midst of the general commercial distress and the bankruptcy of the Treasury, we were called upon by the Chairman of the Committee of Ways and Means for an appropriation of \$1,600,000 to carry on this war, and this, too, without an effort being made by any to inquire into the manner in which former appropriations had been expended. He never would hesitate, when a war was raging, to make the necessary appropriations to carry it on, no matter how we had got into it; but he did consider it his duty to call for this information at the present time, inasmuch as a call had been made for an appropriation of upward of a million and a half of dollars without any statements or estimates in relation thereto being laid before the House, and he considered it a duty to inquire how the public money had been expended or wasted. It had been admitted on all hands, that there had been mismanagement: then he wished to know how much money has been expended, if not wasted, and whether some steps could not be taken to put an end to a war which is ravaging our western frontier, and distressing the whole country. Who could object to this inquiry?

It appeared to him that this resolution ought to be assented to by every gentleman on the floor of the House. It was a universal opinion that the conduct of the Major General now in command in Florida, was as reprehensible as either of the other commanders. A court-martial had sat on the case of one of the Generals who had commanded in that campaign, and had honorably acquitted him of all the charges which had been brought against him; yet by an order of the Executive, their verdict had been expunged. Can this, then, be submitted to further, without this House making any inquiry on the subject? He considered that it was time, and high time, that an investigation of the kind proposed should be had, and had by a committee which would devote itself to the subject, do it justice, and have time to do it justice. He wished to

have this committee appointed by ballot, because it should not be a party committee. The administration have as much interest in the matter as the opposition; and the country was looking to an investigation of this matter with a great deal of anxiety. The division of parties in the House were nearly equal; and he hoped that a committee might be raised from the different parties, of men who will prosecute the inquiry with the greatest industry and fidelity.

Mr. EVERETT regretted extremely that any observations should be made by any gentleman on the floor of the House which would derogate from the character of the Hon. Mr. Cass, at a time when he was not in the country, or in a position to defend himself from the imputations which were cast upon him. Mr. E. stated that he had an early opportunity of examining into the matter in relation to the Florida campaign, and he believed then, as he still believed, if there was any thing wrong in relation to that campaign, that it did not rest with the Secretary of War. This was his opinion then, and it was still his opinion, and he should be sorry to see the reputation of that gentleman brought in question during his absence from his country. He had noticed the expressions made use of in the testimony of General Clinch, which had been alluded to by the gentleman from Virginia, and he thought at the time they were undeserved.

Mr. GLASCOCK could not but admire the motive which induced the gentleman from Virginia to offer this resolution, but as to the manner in which the committee was to be appointed he differed with him entirely, because, in his opinion, the results would be the same, let the committee be appointed either way. He thought the uniform course should be adopted in the appointment of the committee, and that we should not now, after all the committees for years had been appointed in a particular way, change our mode of appointment in a solitary case. He was aware that the war had occupied much more time, and expended much more money, than was anticipated, and that the whole country felt a deep interest in relation thereto; and inasmuch as this was the case, he thought it but right and proper that a committee should be appointed, in order that the country may be placed in possession of all the facts in relation to all the difficulties which now exist or have heretofore existed. It was far from his intention to express an opinion as to who was in fault that this campaign was not brought to a close; but, in reply to the insinuation that the late Secretary of War was in fault in this matter, he should say that he had looked into the case somewhat, and, from the facts in his possession, he was firmly convinced that the Department of War would never have cause to fear the investigation. It was his wish that a resolution of this character should be moved; and it was his firm conviction, whenever the American people had all the facts of the case laid before them, that the character of the late Secretary of War would remain as heretofore, without spot or blemish. His impression was, that, when the charges were fully investigated, all suspicion which might now by any means attach to that gentleman would be removed; and that even the impression which the gentleman from Virginia himself entertained would be removed. He was as anxious as any gentleman that the resolution should be adopted; but he would ask honorable gentlemen whether this committee should not be appointed by the Chair. If the committee was elected by ballot, the result would be the same as if it was appointed by the Chair. There will be members of both parties on the committee in either event; and that being the case, he was unwilling to deviate from the usual course of appointing committees in this House. There will be friends of all the commanding generals on the committee, and ample justice will be done to each; and even if the majority of the committee are on a particular side, the minority will have it in their power to investigate the matter fully, and lay the result of their investigation before the country, so that the people may have the opportunity of judging for themselves. In relation to the committee sitting during the recess, he could see no necessity for it.

It is not expected, to be sure, that this extra session will be of long continuance, but we are all looking forward to the long session, which will be here in the course of a couple of months, when the committee will have ample time to prosecute their investigation, unconnected with any other business of the session, and make a report which will be satisfactory to themselves, to the House, and to the country. He again repeated that he was not prepared to say where the blame of this matter may fall, but so far as he had been able to judge from the facts presented to him, he hesitated not to believe that none would attach to the late Secretary of War.

Mr. CUSHING returned his acknowledgments to the gentleman from Virginia, (Mr. Wise), for the introduction of the resolution now before the House. If there was any transactions of the Government which were rotten, and which was a blot on our national escutcheon, it was the proceeding in relation to the war in Florida; and he hoped the gentleman from Virginia would press the matter, and have it thoroughly investigated.

There was no one proceeding of the Government, which the people of the country were more desirous of seeing laid bare than that. From year to year the people of the country have seen army after army sent to Florida, and general after general recalled, he would not say in disgrace, but recalled to be given up to the tender mercies of a court-martial, and all without the least good resulting from it. We have seen the blood of our citizens moistening the desert sands of Florida, and our army and country brought into disgrace by the war carried on there. We have not been content with a standing army of our own in Florida, but we have enlisted the Indians into our army, and done that which, during the Revolution, had been charged by the Earl of Chatham as a disgrace upon the English arms. Upon whose head the responsibility of this matter might fall, he did not know. It might be, as suggested by the gentleman from Virginia, that it would fall on the shoulders of the late Secretary of War.

Mr. WISE explained. He had made no imputation upon the late Secretary of War. He had merely said that the blame was laid at the door of the Department of War by Gen. Clinch, the only successful commander in Florida. In reply to the gentleman from Vermont, (Mr. Everett,) he would say that he believed with that gentleman, that when the matter was investigated, that the Secretary would not be found to be the author of the evils of which he had complained, but that he had permitted himself to be made the instrument in the hands of others, was contrary to his own judgment; and and yielded to that which an American officer ought never to have yielded to, and he only blamed the Secretary so far as that he was not the man to stand up and resist encroachments of those superior to him.

Mr. CUSHING said that the gentleman from Virginia had brought him to the point at which he was about to arrive in his argument. He had read the testimony of General Clinch, whom he believed to be a brave and good officer, and he had read the reply to it by Secretary Cass; and the conclusion he had arrived at was, that the responsibility of the outbreaking of the Seminole war rested upon the head of General Jackson. He wished the matter probed to the bottom, so that the country might see the whole of the rottenness which was at the bottom of this matter.

Mr. RICE GARLAND, of Louisiana, wished merely to state a couple of facts in relation to this subject, which had come to his notice on his way to this city, to show that corruption existed somewhere. He was told by a respectable individual of an operation by which forty cords of wood cost the Government \$7,000. The other case was that of the owner of a steamboat making enough on a single trip of his boat from some point along the coast, up one of the rivers of Florida, to pay for the whole boat. These things were told him on the public highway, and they showed the manner in which the public money was squandered and thrown away.

Mr. BOND of Ohio made a statement, of which he had been informed, of some abuse in relation

to the expenditure of public money for the suppression of Indian hostilities. The first appropriation which they had made in the House for this object, he believed, was one of \$800,000, and that was made at a time when there was an immense surplus in the Treasury, without attracting any notice. In a short time there was another appropriation called for, of a million of dollars; and so appropriations continued to be made from month to month, as though they were made with a view of getting rid of the large surplus of public money on hand; and whenever an attempt was made to have this surplus distributed, the ghost of this Florida war was brought to our view by the Committee of Ways and Means, in the shape of a bill appropriating some millions of dollars or more for the suppression of Indian hostilities; and these were always brought forward, without any communication being made to the House from the proper Department; and it was always stated that the statements would be submitted at some future time. We have another appropriation for this object, called for by the Committee of Ways and Means of upwards of a million and a half, which has the appearance now of being introduced, for the purpose of hastening the passage of the bill for the postponement of the third instalment of deposits with the States, as the former appropriations had the appearance of being introduced to prevent a distribution of the public moneys.

Mr. CAMBRELENG did not rise to detain the House, but merely to reply to the gentlemen from Ohio, who had thrown out an intimation, if not an imputation, that the bill asking an appropriation for the suppression of Indian hostilities was now introduced for the purpose of facilitating the passage of the bill to postpone the payment of the fourth instalment to the States.

Mr. BOND did not make the imputation. He had only said that the bill was brought forward in the same manner, and it seemed somewhat strange to him that these two measures should be introduced into the House *pari passu*.

Mr. CAMBRELENG said that this appropriation was called for in the same manner that all other appropriations of this character were called for. The letter of the Secretary of War sufficiently explained the necessity of the appropriation; and he was sorry that gentlemen did not apply in the proper quarter to see how former appropriations were expended, as every item could be found which gentlemen might desire to see.

Mr. WISE then slightly modified his resolution, and proceeded to make some strictures in relation to the conduct of the present Commander in Florida towards one of the Indian Chiefs, who was employed as an ally of the United States against the Seminole and Creek Indians, on the express condition that if he captured certain Chiefs of the Creek tribe, he was to remain on the land of his fathers until certain titles thereto could be settled; but after the service was performed, the treaty was held up to him, and he was driven away. He contended that the most condign punishment should be visited upon a Major-General guilty of such conduct as this towards the Indians within our territory.

On motion of Mr. CAMBRELENG, the House then proceeded to the orders of the day.

The following bills from the Senate were taken up, read twice, and, on motion of Mr. CAMBRELENG, referred to the Committee of Ways and Means:

A bill to authorize the issuing of Treasury notes.

A bill authorizing a further postponement of payment upon duty bonds.

A bill for adjusting the remaining claims upon the late deposit banks.

On motion of the same gentleman the House then went into Committee of the Whole on the state of the Union, Mr. HAYNES in the chair, and resumed the consideration of the

Bill to postpone the fourth instalment of deposit with the States.

The question pending was on the following substitute submitted yesterday by Mr. DAWSON:

A BILL to be entitled an act to authorize the Secretary of the Treasury to suspend the expendi-

ture of fifteen millions of dollars from unexpended balances of appropriations, and to require the execution of the deposit law of June, 1836.

Inasmuch as the report of the Secretary of the Treasury, made to the House of Representatives on the 14th day of September, 1837, states the fact, that on that day there remained of unexpended balances of appropriations of the past and present years, the sum of *twenty-four millions seventy-five thousand two hundred and thirty-nine dollars thirty-seven cents*, and that *fifteen millions of dollars* would not be required during the present year of said sum for public uses:

1. *Be it therefore enacted*, That the Secretary of the Treasury be, and he is hereby, required to suspend the expenditure of fifteen millions of dollars of the unexpended balances of appropriations of the past and present years, and that said sum be placed in the Treasury for the purpose and use of the Government.

Sec. 2. *And be it further enacted*, That the Secretary of the Treasury be, and he is hereby authorized to suspend the said sum of fifteen millions from such of said unexpended appropriations which in his judgment shall least affect the public interest.

Sec. 3. *And be it further enacted*, That the Secretary of the Treasury be, and he is hereby, required to carry fully into execution the deposit act of June, 1836; and that all laws contravening the provisions of this act be repealed so far, and no farther.

Mr. DAWSON withdrew his amendment.

Mr. BELL, who was entitled to the floor, addressed the committee at length in opposition to the bill under consideration; and, in the course of his remarks, alluded to the Sub-Treasury scheme, which he pronounced to be, disguised as it might be, nothing more nor less than a plan for a Treasury bank. After another year, the plan would assume a more definite and palpable shape; but he refrained from going at length into that subject till the bill proposing to carry out that scheme came up.

Mr. B. then took a review of the different appropriations made at the last session, and from them deduced an argument that there was money enough remaining to pay the fourth instalment, by showing that there might be, without any detriment to the public interest, from five to eight millions suspended from the public expenditures.

Mr. McKIM said he had prepared a statement of the condition of the Treasury from the official report of the Secretary of the Treasury; and though the mode he had adopted was somewhat different from that adopted by the honorable chairman of the Committee of Ways and Means, still they both arrived at the same result; from which statement it would be seen that there would be a deficit of upwards of five millions of dollars.

Whole amount of available money in the Treasury on the 1st January, 1837, applicable to public purposes, was	\$42,468,859 97
Deduct the sum reserved by law	5,000,000 00
	37,468,859 97

Which amount of 37,468,859 97 was under the provision of the act of June 23, 1836, to be placed in deposit with the States, and it is ascertained that \$27,063,430 80 has been paid,	27,063,430 80
	10,405,429 17

The amount of that portion of the three instalments, the payment of which has not been acknowledged, is	1,165,675 18
---	--------------

Amount of fourth instalment, payable the 10th October	9,239,853 99
The amount reserved in the Treasury on the 1st January past, has been increased from 5,000,000 to	6,670,137 52

The receipts in the first half year are as follows:	
From customs	\$7,234,451
From lands	5,303,731

From miscellaneous sources	512,263
	13,050,445 00
To which add 600,000 in the hands of the receivers, and 50,000 in the hands of collectors, subject to draft	650,000 00
If no further postponement be granted on duty bonds, it is estimated that the whole amount of receipts for the last half of the year will be about	9,500,000 00
	29,870,582 52
Deduct postponement on bonds, 15th November,	2,500,000 00
	27,370,582 52
<i>Expenditures for the first six months of the year 1837.</i>	
Civil, miscellaneous, and foreign intercourse	\$2,812,540 40
Military, including pensions	10,603,361 49
Naval	3,297,149 69
Public debt	20,832 75
	\$16,733,884 33
The expenditures required to meet existing appropriations during the last half year, will, as computed, equal the sum of	16,000,000 00
	\$32,733,884 33
Amount of receipts ascertained and computed for the year 1837, including the balance on hand 1st January	27,370,562 00
	\$5,363,322 33
Leaving no money in the Mint or Treasury to meet contingencies, on the 31st December, 1837.	
Whatever expenditures shall arise within the year, upon new appropriations which Congress may think proper to make, will require a corresponding addition to this amount; but without them, it will constitute an excess of \$5,363,322 33 of expenditures over both the receipts and the balance at the commencement of the year; besides not leaving, at the close of it, any thing in the Mint or the Treasury, for future uses or to meet contingencies.	
<i>Statement showing the balance in the Treasury on the first of October.</i>	
By the Treasurer's Report on the 30th August past, it appears that the balance in the Treasury, including what was in the custody of banks, the Mint, and collecting officers, was then	\$14,596,311
That the amount of this sum, subject to immediate draft, was only	8,928,072
	5,668,239
Amount of all drafts of all kinds outstanding	5,668,239
Viz: Drafts on banks and Mint for debts	\$3,877,468
Drafts on banks for transfers to States	1,165,575
Drafts on receiving collectors, 23th August	625,000
	5,668,043
Leaving subject to draft near September 1st, as above	8,928,072
Expenses in September, besides receipts, about	2,500,000
	6,428,072
Leaving 1st October, in banks, Mint, receivers' and collectors' hands	6,428,072
Of the amount in banks not over one or two millions are available, leaving unavailable	4,000,000
	2,428,072
For the Mint, which cannot be used immediately	500,000
	\$1,928,072
Amount of cash funds in the Treasury 1st October next	\$1,928,072

Mr. PICKENS addressed the House at length in support of the bill, as sent down from the Senate.

After some conversation between Messrs. McKAY, BELL, WISE, ROBERTSON, and CAMBRELENG,

Mr. TIFUS moved that the committee rise, which was agreed to; and

The House adjourned.

#### IN SENATE.

WEDNESDAY, September 20, 1837.

Mr. SWIFT presented several memorials from citizens of sundry counties in Vermont, (one from 141 women,) against the annexation of Texas to the United States; which were laid on the table.

Mr. NILES presented a petition also praying that Texas may not be admitted into the United States; which was laid on the table.

Mr. FULTON presented a petition from citizens of Arkansas in relation to an additional term of the Circuit Court; which was laid on the table.

Mr. WALL presented several memorials against the admission of Texas, and praying that slavery may be abolished in the District of Columbia; which were laid on the table.

The resolution offered by Mr. WALKER, proposing to make Vicksburg and Grand Gulf ports of entry, in the State of Mississippi, was taken up, and, on motion of Mr. HUBBARD, was laid on the table.

The resolution offered yesterday by Mr. CLAY of Alabama, in relation to the public lands, was taken up and adopted.

Mr. WRIGHT, from the Committee on Finance, reported a bill to remit the duties upon certain goods destroyed by the late conflagration in New York; which was read the first time, and ordered to a second reading.

The bill imposing additional duties as depositories in certain cases, was taken up in Committee of the Whole, and read a second time; when

Mr. CALHOUN offered an amendment as an additional section, on which he asked the yeas and nays.

Mr. WRIGHT suggested some modifications of the amendment, which were accepted; so that it now reads as follows:

Sec. *And be it further enacted*, That from and after the first day of January, eighteen hundred and thirty-eight, three-fourths of the amount due to the Government, for duties, taxes, sales of public lands, or other debts, may be received in the notes of specie-paying banks; and that from and after the first day of January, eighteen hundred and thirty-nine, one-half may be so received; and from and after the first day of January, eighteen hundred and forty, one-fourth; and from and after the first day of January, eighteen hundred and forty-one, all sums due for duties, sales of public lands, or other debts to the Government, and all payments to the General Post Office, shall be paid only in gold and silver, or in such notes, bills, or paper, issued under the authority of the same, as may be directed to be received by law; and from and after the said first day of January, in the year eighteen hundred and forty, every officer or agent engaged in making disbursements on account of the United States, or of the General Post Office, shall make all payments in gold and silver coin only, or in such notes, bills, or paper, issued as aforesaid, when authorized by law. And any receiving or disbursing officer or agent who shall neglect, evade, or violate, the provisions of this section, shall be dismissed the service, and shall forfeit all compensation which may then be due.

Mr. NILES rose and spoke at great length; his speech embracing answers to the views of Mr. Rives and others in relation to the causes of distress, the means of relief, &c. One party, he said, and that a very respectable one, were of opinion that a national bank was the only panacea, the "sovereignest thing" on the earth for the wound, while others supposed that by extending confidence to the State institutions, we should derive the like result; but in his humble opinion, neither were to be trusted. Both had been weighed in the balance and found wanting; they had abused their trusts, and proved false to the Government and the people. Mr. N. acknowledged himself a *hard money*

man, and avowed his preference of the sub-agency system over all others. It was a wise, a safe, and politic system, though it had been represented as dangerous and alarming, from the immense patronage that was supposed would flow from it; but this patronage was nominal, and not such as to require the people to be cautioned against. It was always within their control; and whenever it passed its legitimate bounds, the corrective would soon be applied. To his mind, there was not half the danger to be apprehended from this system that there was to be from a national bank. Look to the control that institution had over the actions of men, political and moral; the sway it exercised over all the State banks, and then tell him if it were not more to be feared than any sub-agency system that could be devised? Mr. N. contended that the fiscal affairs of this Government could be better carried on through the agency of federal officers, than by any banking institutions whatever. The Federal Government could exercise no control over those institutions, and hence it was not safe to make them the depositories of the revenue; and the idea of the Government depending on them, was preposterous in the extreme. What were the facts in regard to the banks? When the storm came, did we find them breasting it? No. When the panic first commenced in New York, and after one of these rotten institutions had stopped, a small run was made by people, *loco focos* probably, with no more than a dollar a piece. What do they do? The directors look out—"here is a vast mass of people come against us; can we make a stand?" Oh, no, we will shut our doors! Mr. N. said he lately had occasion to cast his eye toward the bank of France; at a time of great commercial distress, and general prostration of business, that institution throws open its doors wider than it had ever before done, and issued a hundred millions of francs to sustain commercial security.

This was a fearful contrast between that bank and our institutions. He believed if the banks had even paid out one-third of their specie, they might have allayed the panic, would have saved their credit, and made good their engagements to the Government. Under ordinary circumstances, the banks he supposed might be safe depositories of the public money, when we had a clear sky, a smooth sea; but that was not the kind of security required by the National Government; it wanted its funds where they could always be commanded, whether in peace or war—plenty or distress; and unless we adopted the Sub-Treasury, the hard money system, we could never expect that safety.

It had been admitted by the gentleman from South Carolina (Mr. Calhoun) that the Bank of the United States of Pennsylvania might restore specie payments. He did not know how such a measure could be effected now. He recollected in 1816 it was then effected; but then it was done pretty much as a physician saves the life of a patient, by amputating the limb. It was ruinous in its consequences upon thousands, and affected more than half the property of the country. Every thing was languid and prostrate save agriculture. Even there it was merely partial in its operation—the merchants and moneyed men, who had an interest in sustaining these institutions, did not press them for specie.

With regard to the relief of the country, he would ask gentlemen what relief they expected? Did they suppose that we came here to provide some measures by which to pay off the debts of the merchants? What, he would inquire, were the evils under which the community were now suffering? They were two. The first was the existence of debt; and the second, a derangement of the currency. These difficulties, co-operating together, had aggravated each other, and produced the present distress throughout the country. Now, as to the idea of the Government paying off the debts of the merchants, that was entirely out of the question, for the Government could do no such thing. He did not attribute, principally, the paralyzed state of the Union to the evils growing out of an unsound currency. That, he apprehended, was not the essential cause of it, for there was not that want of confidence in the banks, as the gentleman from Virginia (Mr. Rives) had yesterday intimated, for the bank cur-

rency still answered all the purposes it had ever done. He (Mr. N.) would repeat, that the great and essential difficulty existing was debt. The question now was, Can we do any thing for the relief of the community? Ought we to do it? He thought we ought. He, for one, was disposed to do all that could rightfully and properly be done. He thought that, so far as the Government had a direct connection with the business of the country—for we had large demands against the deposit banks and against the merchants—it became us to do something. We were about to effect that object, and the measure under consideration was to be one of the mediums of producing relief. Did any gentleman present deny that these measures were not calculated to carry out our wishes? He thought not. Notwithstanding the resources of the Government, it felt itself compelled to resort to the issue of Treasury notes. That course was absolutely necessary to afford temporary relief. And these notes would be considered as equivalent to specie for all purposes. Some gentlemen were for going further than this, and say that we ought to pass some direct measure of relief. The gentleman from Virginia (Mr. Rives) had argued that we should adopt some measure that would restore confidence to the banks. He (Mr. N.) knew not what we could do to accomplish that object, unless gentlemen would have us receive the notes of the State banks. Was that the measure the gentleman alluded to? He, however, did not say so. There had been no want of confidence in those institutions. Indeed, he was astonished that so much confidence was felt in them now. And, if he might be permitted to say so, it was owing to the existence of too much confidence in the banks that had brought about the present difficulties.

But the gentleman seemed to think that it was the duty of Congress to afford some relief to the banks. Now, how could we do that? He saw no other mode of doing it, except by giving them time; by extending to them every reasonable indulgence. The evils of the banking system were not to be reached by any measure that could come from Congress; and the sooner the public mind was disabused of that impression the better. A false direction had been given to public sentiment; for the impression had been spread abroad that Congress was called together to relieve the people—to pay off their debts, he (Mr. N.) supposed. He repeated that it was high time that the public mind should be set right on the subject of the Government possessing the power to regulate the currency. He entertained no doubt that as one branch, at least, of the Government had done its duty, that the other would also do theirs on the great question pending before Congress. It was time that such a delusion was swept away. The people should be told that the evils of the State humbug banking system must be corrected by themselves, and that Congress possessed no power to act on the subject.

On motion of Mr. SMITH of Indiana,  
The Senate adjourned.

#### HOUSE OF REPRESENTATIVES,

WEDNESDAY, September 20, 1837.

Petitions and memorials were presented by

Messrs. REED, GRENNELL, ADAMS, BORBEN, and CALHOUN of Massachusetts.

Mr. TILLINGHAST of Rhode Island.

Messrs. CAMBRELENG, CHILDS, and LOOMIS of New York.

[Mr. CAMBRELENG presented a memorial of the Chamber of Commerce of the city of New York, praying for an extension of the time of the payment of duty bonds; which was committed to the same Committee of the Whole on the state of the Union having charge of the bill on that subject.]

Messrs. NAYLOR and OGLE of Pennsylvania.  
Mr. CRAIG of Virginia.

Mr. POLK (Speaker) of Tennessee.

[Mr. Speaker POLK laid before the House a letter from the Hon. Henry A. Wise, covering a communication from Richard Randolph, esq. of Virginia, offering to present to the Government, to be placed in the Capitol, a portrait of Peyton Randolph, the first President of the first Congress held at Philadelphia; which communication, on motion

of Mr. PATTON, was referred to the Committee on the Library.]

Messrs. KILGORE, ALLEN, GOODE, HUNTER, and HAMER, of Ohio.

[Mr. KILGORE presented the petition of 551 male inhabitants of Harrison county, Ohio, and also another signed by 493 females of the same State, remonstrating against the annexation of Texas to the United States.]

Mr. OWENS of Georgia.

[Mr. OWENS presented the memorial of citizens of Darien, Georgia, praying that Darien be made a separate district and port of entry, and moved that it take the usual course; which was agreed to.]

Mr. EVERETT, on leave, submitted the following resolution; which, by general consent, was considered and agreed to:

*Resolved*, That the Secretary of the Treasury be directed to lay before this House, statements of the amount of duties unpaid which accrued before the end of the first half of the present year, and when payable; of the amount then due from the Bank of the United States, and when payable; of the data on which the accruing revenues for the last half of the present year were founded.

Mr. CAMBRELENG, from the Committee of Ways and Means, reported the bill from the Senate authorizing the issuing of Treasury notes, with two amendments.

Mr. C. stated that the principles of the bill were not varied. There was a penal clause introduced by the Committee of Ways and Means; and to meet certain expenditures, which would be incurred on the passage of the bill it had been considered proper by the committee to introduce an appropriation of \$500,000. The bill was then referred to a Committee of the Whole on the state of the Union.

Mr. CAMBRELENG, from the same committee, reported the bill from the Senate for the postponement of duty bonds without amendment; which was referred to the Committee of the Whole on the state of the Union.

Mr. CAMBRELENG, from the same committee, also reported without amendment the bill from the Senate, entitled an act for the adjustment of the claims upon the late deposit banks; which was referred to the Committee of the Whole on the state of the Union.

Mr. BIDDLE inquired of the chairman of the Committee of the Judiciary, or any other gentleman on that committee who could give him the information, whether it was the intention of that committee to report on the subject of bankruptcy, which had been referred to them in the Message of the President of the United States. As it was a subject of very deep interest to the whole community, he would further ask whether it was the intention of that committee to report any bill which might come in conflict with the constitutional opinions of the President of the United States, as expressed in the Senate of the United States some years since. It will be recollected that the present President expressed it as his opinion, in his place in the Senate on a former occasion, that a bankrupt law, extending to others than merchants and bankers, would be an unconstitutional act; and he wished to know whether it was the intention of the committee to introduce a proposition of this kind.

Mr. THOMAS (chairman of the Judiciary committee) said he felt that the response which he should make to the gentleman would be unsatisfactory. The Committee on the Judiciary had held two meetings on the subjects which had been generally referred to them. At the first meeting, it appeared to meet the approbation of all the members of the committee that the final decision as to the propriety of reporting a bankrupt law should be postponed until it was distinctly ascertained whether the measures which were expected to come from the Committee of Ways and Means would so long occupy the attention of Congress as to extend the present session to the meeting of the regular session of Congress. In this state of the case, power was given to the chairman of the Judiciary Committee to re-assemble the committee as soon as the proper information could be obtained. A few days since, when he (Mr. Thomas) was absent, a gentleman from Virginia propounded an inquiry to

the committee somewhat similar to the one now propounded; and in consequence of this a member thereof re-assembled the committee for the purpose of considering whether they should report now, or wait until the regular session of Congress. This meeting was held without coming to any conclusion, and an adjourned meeting of the committee was to be held to-morrow morning. The gentleman would therefore perceive that he could not pretend to say what would be the course of the committee on this subject. The House had referred to them the Message of the President and the report of the Secretary of the Treasury on this subject, and he was not prepared to say what would be the decision of the committee; whether they would be disposed to pass a general bankrupt law to affect that class of citizens alluded to by the gentleman from Pennsylvania, (Mr. Biddle,) or not. On to-morrow morning, however, the subject would be taken up, and he presumed he would be instructed by the committee to make a report to the House in some shape or other.

#### INQUIRY IN RELATION TO THE FLORIDA WAR.

The House then proceeded to the unfinished business of the morning hour, which was the consideration of the following resolution, submitted yesterday by Mr. WISE:

*Resolved*, That a select committee be appointed by ballot to inquire into the causes of the Florida war, and into the causes of the extraordinary delays and failures, and the enormous expenditures which have attended the prosecution of that war, and into the manner of its conduct, and the facts of its history generally; that the said committee have power to send for persons and papers; and that it have power to sit in the recess; and that it make report to the next session of Congress.

Mr. HOLSEY of Georgia addressed the House at some length in reply to the remarks of the gentleman from Massachusetts (Mr. Cushing) and the gentleman from Virginia (Mr. Wise.) The gentleman from Virginia, he contended, was mistaken in the statement he had made in relation to the treatment of General Jesup towards the Chief Opothleyohola. The form of the treaty with that chief, as he was authentically informed, was very different from the statement given of it by the gentleman from Virginia on yesterday. The treaty was not that he was to have a fee simple to any land, or to have the privilege of remaining on the land, but that he was to receive a compensation in money for such services as he should perform; and he understood further, that this chief was fully rewarded by the commanding officer of the army in Florida, for all the services he performed. This he understood to be the true state of the case. The gentleman from Massachusetts, (Mr. Cushing,) had said that the war in Florida had been disgraceful to our arms, and disgraceful to the American army. Would the gentleman say that those who were engaged on Dade's battle ground or on the Withlacoochee were disgraced? As well might he say that the heroes of Thermopylae were disgraced. The war in Florida he contended was carried on under peculiarly unfavorable circumstances. The sands of Egypt and the snows of Russia conquered the armies of Napoleon, and the climate of Florida, equally unfavorable to military operations, conquered the forces of the United States. The Indians too secured themselves in their hiding places and fastnesses, and the flashes of their fire-arms could only be seen when those who held them were secure from harm. Ocoila, who was admitted on all hands to be a brave and skilful warrior, well knew the peculiar position and advantages of the country for the prosecution of Indian warfare, when he made the assertion, that the war could be sustained for five years. During the summer season, it is impossible to keep an army in the Indian country in Florida; and when our troops withdraw the Indians plant their corn, and by this means raise a supply of provisions for the next year. This chief well knew the advantages of the country in his favor, and hence his boast, which had almost become a prophecy. They had natural barriers thrown around them, which prevented the war from being brought to a speedy termination; and it was useless for any gentleman to assert that our arms were brought

into disgrace by the war in Florida. The gentleman from Massachusetts (Mr. Cushing) had expressed a great deal of sympathetic feeling for the Indians, in consequence of the violation of the faith of treaties on the part of the United States towards the Indians; but he took it that the gentleman had looked on the wrong side of the picture. It was the Indians of Florida who had violated their treaty stipulations. The very arms were put in their hands by the United States, on the faith of a solemn treaty, which were turned against us. Then why this sympathy towards these savages? He feared not this investigation; for he ventured to say, that whenever it should be had, that no department of the Government would be found in fault in not sooner having suppressed these Indian hostilities. The gentleman from Massachusetts had called the attention of the House to the subject of the introduction of savages into our army to carry on this war, and pronounced it a disgraceful proceeding. This, however, Mr. H. contended, was the course of policy pursued by all Governments, and by all armies. In Europe, allies were enlisted into all their armies; and in this country, the Indians had been introduced into the armies as allies both of England and the United States. This mode of warfare was adopted by all nations and by all armies, and had been sanctioned by all Governments. From the moment that the white men in this country commenced the war against the savages, to the present day, Indian allies had been introduced into the army; therefore he took it that the gentleman had overshot the mark in denouncing this measure. It was perhaps natural enough that those who were far removed from scenes of Indian warfare and cruelty might have a great sympathy for the suffering of those savages, but when they came to bear the same relation to them, which the people of the frontier bore, they would have different feelings. He wished, most sincerely, to prevent the unnecessary slaughter of this unfortunate race of people; but the means must be used to prevent their depredations, which is best calculated to effect that object.

Mr. CUSHING rose to propose an amendment, which he hoped the gentleman from Virginia would accept; but while up, he would take occasion to reply to some of the remarks of the gentleman from Georgia, (Mr. Holsey.) Mr. C. said his position was a peculiar one. He was condemned at home in no unmeasured terms, because he refused in this House and at home to take the part of the Indian tribes against the United States; and here he was charged with entertaining a sympathy for these Seminole Indians adverse to the interest of the United States. He had no sympathy for the Indians as Indians, but he desired to see the unchangeable principles of justice and right observed. He contended that these Indians stood in the relation of wards or pupils to the United States, and that the Florida war was a black and damning blot upon the Government of the United States. He would say nothing of the army as an army, of the officers as officers, or of the soldiers as soldiers. He, with the gentleman from Georgia, sympathized for the brave men who perished in the pestilential swamps of Florida. It was not those who had served in the army, nor those who were commanders in that army, who had been disgraced, but it was the nation; it was the people of the United States; it was the Government of the United States which had been disgraced; and he repeated, that it had been disgraced. We have marched men by the thousands, and the tens of thousands, against a handful of Indians; and are they subdued? Have they attained the object for which we sent them there? We well know that the Indians have remained triumphant on the soil in spite of our soldiery. Our army has been thrown against this rock, this handful of Seminoles, as the ocean against the shore, and been beaten back again and again; and he here in his place repeated, that it was a disgrace to our arms. He agreed, however, with the gentleman from Georgia, that the situation of those Indians was peculiar, and that the campaign might have been more reputable to American arms if they could have found their enemy, and met him face to face. He contended that the gentleman from Georgia had not shown that it was proper to enlist the Indians as our allies, by reference to the allies en-

listed by the armies of Europe. There was no analogy between the two cases, in his opinion; because, in the case of the European nations, their allies were independent; the foreign allies were all independent nations; but our Indians were mere wards or pupils, under the guardianship of the United States, and therefore they should not be enlisted to carry on a war against their brethren. He had no sympathy with these Indians, other than that which he had before alluded to. He knew what must be the feelings of those who resided on the Indian frontier, as his own countrymen in former years had been accustomed to the nightly surprise of the Indians, and his own State was dotted with block-houses, erected in the days of Indian warfare; but it is to be said that because the savages violate treaties, that the Government of the United States is to be faithless, and violate treaties too? Are we to learn whether treaties are to be observed from the Indians? and if they are faithless, is it to be set up as a plea for us to break treaties? Was this a principle for an American legislator to adopt. He repudiated the doctrine, and hoped it one which would never be advanced here. He was ready to give every appropriation which might be necessary. He was willing to give the people of Florida all the relief which could be afforded them, and to go as far in the removal of the Indians as he could do with honor and justice, but he was not willing to go against all honorable warfare, merely because they were a savage, and we a civilized people. He would suggest respectfully to the gentleman from Virginia, whether it would not be judicious and wise to remove the only feature in the resolution, which appeared to be a subject of debate. He referred to that part in relation to the appointment of the committee by ballot; and if the gentleman would not accept it as a modification, he would move to strike out that part of the resolution.

Mr. WISE hoped that the gentleman from Massachusetts would not make the motion which he had suggested, to strike out that part in relation to the election of the committee. He preferred the resolution going to the House in its present form, and he hoped the gentleman would permit the question to be taken in this shape. He would merely remark that, by the rules of the House, it was not considered disrespectful to the Speaker to move to have a committee elected; as this mode of election was provided for by the rules. The seventh rule of the House provided that "all committees shall be appointed by the Speaker, unless otherwise specially directed by the House, in which case they shall be elected by ballot." It was therefore contemplated by your rules that, without disrespect to the Speaker, the House could take this power of appointment into its own hands. He hoped this mode of appointment would be adopted for another reason, and that was, that he did not wish himself to be on this committee; and from the universal custom of the House, if the appointment was made by the Speaker, he would have to be the chairman of the committee. He knew the difficulty and labor attending an investigation of this kind, and therefore he did not wish to be placed upon this committee. But, to be bold and candid, his main reason for wishing this mode of appointment was the fact, that let the disposition of the Speaker of the House be ever so fair and upright, ever so just to truth and the public interests, it was expected and required of him, in these times, to give us a *packed committee*; and God knows he (Mr. W.) had had bitter, bitter experience on these stocked committees of investigation. Sir, said Mr. W. let me tell you a fact that this country is not informed of, which will serve as a specimen of what one of these stocked committees will do. During the last winter a committee was appointed to investigate the Executive Departments. A report was made by the majority of that committee, and will it be believed in Gath, that not one particle of that report was written by a member of that majority of the committee. Some of the majority are here who were on that committee, and let any member of that majority here, rise in his place and say who wrote it. I tell you that it was written by a scavenger—an antimasonic editor from Boston, who was brought here and placed on that committee as a clerk by a member

from Rhode Island, who, thank God, is now out of this House, and ought to be out of the country. This individual feigned sickness, and remained at home, while he was under pay of eight dollars a day, and whilst the facts upon which he reported were transpiring in his absence, for the purpose of writing this report, and was furnished with notes by two members of the committee, Dutée J. Pearce and Abijah Mann; and when this report was brought into the committee, and read, so audacious were the falsehoods that it contained, that the majority were compelled to expunge a considerable portion of it, and adopted what remained as their own. Dutée J. Pearce had stated to his friend, Col. Campbell, the gentleman from Massachusetts (Gov. Lincoln) and himself, by way of apology for himself, that the report was written by the individual before referred to, and that Abijah Mann of New York furnished the offensive notes. This report however was set up as a standard of truth, and as an offset to the report of the minority; and the best of it was that Hallett (the clerk) had the insolence to complain that the majority had spoiled the report he had drawn up for them, by striking out the only passages which gave it point.

At this period of the discussion, on motion of Mr. CAMBRELENG, the House proceeded to the orders of the day.

The SPEAKER laid before the House the following from the Secretary of the Treasury, in answer to a resolution of the House calling for information in relation to the condition of the Bank of Missouri; which was laid on the table, and ordered to be printed.

TREASURY DEPARTMENT, }  
September 20, 1837. }

SIR: This report is made in compliance with the following resolution, passed on the 18th instant:

"Resolved, That the Secretary of the Treasury inform this House at what time the Bank of the State of Missouri was made a deposite bank; and what amount of its own notes said bank had in circulation, and what amount of specie it had in its vaults, when it was selected. Also, what amount of money is now in the hands of the receivers of public moneys in Illinois, and where the same is now ordered to be deposited."

In reply to the first inquiry, I have the honor to state that the agreement and bond executed in behalf of the Bank of the State of Missouri bear date the fifth day of July, 1837. Some time elapsed before these papers reached the Department, and explanations were requested, which occasioned a further delay of several weeks. The selection was decided upon the 16th August, 1837; on which day the notice of it, together with the forms of the returns required, etc. were transmitted to the bank. The selection, as is usual in such cases, is considered to take effect for some purposes from the date of the bond and agreement.

In reply to the second inquiry, it appears by the last returns of the bank received here, that it had in its vaults in specie \$293,308 72, and had issued no bills of its own.

This last circumstance existed with regard to the Louisville Savings Institution at the time of its selection, and since, and was deemed, as it has proved, a great security to the Treasury. Recently the Bank of Missouri has issued a small amount of bills; the precise amount of which has not yet been communicated. None of them are under \$20, according to the representation made on that subject.

In answer to the last inquiry—the gross amount of cash held by the Receivers of Public Money in the State of Illinois, by the last returns received at this office, was \$336,639. From this should be deducted \$127,000, being the amount of the drafts outstanding upon them, and leaving a balance of about \$209,639. Of this balance, about \$190,000 has been directed to be deposited in the Bank of the State of Missouri, being the nearest and most convenient general depository for that purpose.

Respectfully submitted.

LEVI WOODBURY,  
Secretary of the Treasury.

Hon. J. K. POLK, Speaker of the House of Reps.

The letter was ordered to lie on the table.

On motion of Mr. CAMBRELENG, the House then went into Committee of the Whole on the state of the Union, Mr. HAYNES in the chair, and resumed the consideration of the bill to postpone the fourth instalment of deposit with the States.

Mr. CAMBRELENG said he would detain the committee only to make a short reply to the gentleman from Tennessee (Mr. Bell.) The gentleman had referred to the project of establishing a Treasury bank of deposit and issue. On that question he would not now detain the committee further than to say that the Treasury bank was already established, not only of deposit, but of circulation. We have always had one to some extent, and have generally had two millions of warrants in circulation. He had also referred to the expenditures of Government—they had increased two or three fold; but that increase had been made almost exclusively for extraordinary purposes. We appropriated in 1836 thirty-eight millions; of which, as may be seen by a report of the Committee of Ways and Means, seventeen millions and a half were appropriated to ordinary purposes, and twenty millions and a half to extraordinary objects. Of the latter, thirteen millions and a half were required for Indian treaties and Indian wars in the neighborhood of the gentleman from Tennessee. The appropriations for the present year amounted to thirty two millions, of which fourteen were for extraordinary purposes. He concurred with the gentleman as to the necessity of reducing the public expenditures. It is obvious they will, as they have done uniformly, increase with an increasing revenue, and be suddenly curtailed when the revenue falls short. Such would be the case now, and our expenditures must be reduced to seventeen or eighteen millions.

The gentleman from Tennessee appeared to complain that the Executive had not, when the crisis came upon the country, in May last, directed the different departments to stop the expenditures. This was singular doctrine, after all we had heard for some years past on the subject of Executive usurpation, to expect the Executive to direct the execution of the laws to be suspended, while there were means in the Treasury. But, sir, the views, of the President and of the departments were, from necessity, similar to those stated by the gentleman. It was evident that the revenue would fail, and that some of the expenditures could not be met—a minute inquiry was instituted in every branch of public expenditure, to ascertain what could be conveniently postponed till next year. It was ascertained that some fifteen or sixteen millions might be suspended till the next year, to wait the future action of Congress.

It would, however, be wholly impracticable to curtail the expenditures in the last quarter of the present year. The very branches of expenditure referred to by the gentleman from Tennessee are not now within our reach. One-half of the amount is already expended, and most of the remainder is under contract. Whatever we may do in curtailing the expenditures for the next year, any attempt to interfere with the expenditures of the last quarter would be wholly unavailable; and, if attempted, must be attended with much loss and embarrassment to Government.

But the principal purpose for which he had isen was to notice the financial statements of the gentleman from Tennessee. He had stated that we might have a surplus of twenty-three millions and a half. He hoped the gentleman would pardon him for saying that his resources for creating this surplus were as unsubstantial as the unexpended appropriations which the gentleman from Georgia (Mr. Dawson) proposed to convert into money. What are they? The first item is five millions, being the amount of money in the hands of the disbursing officers. Why, sir, one half of this amount is already expended, and the remainder is employed in paying the expenses of your army and navy—of the Florida war. Indeed, some are for our naval expenditures in the Mediterranean, the Pacific, and in almost every quarter of the globe. The warrants are issued only as the money is actually required for the public service; and except in some extraordinary case,

as the Florida war, the money is paid over almost as soon as it is received.

The next item to create this surplus is five millions five hundred thousand dollars to be curtailed from the expenditures of the present year. That is wholly impracticable, without stopping the pay of our army and navy, our expenses in the Florida war, and our public works of every character.

The third source of revenue is four millions and a half of drafts, drawn on the banks, and paid out for claims upon Government, but not paid by the banks according to the last returns. Why, sir, to make this a source of revenue, we must draw twice for the same amount. Two millions of this will probably be returned to the Treasury, and not paid by the banks, but the only effect is to diminish the receipts of the Treasury, and to increase the amount due from the suspended banks.

The gentleman also relies upon an increase of the receipts over the estimate submitted of three millions. We have now before us a bill postponing the payment of the custom-house bonds for nine months, which I presume will pass, after all we have heard about granting relief. This will throw into the next year two millions of revenue, which was estimated for the present year, making a difference of five millions in the estimate of the gentleman.

The last resource embraced in the estimate of the gentleman from Tennessee is the balance due from the State banks. Why, sir, we have now in this committee a bill extending indulgence to the banks for four, six, and nine months. If we pass that bill, as we probably shall, we shall place it out of the power of the Treasury to draw for any portion of these balances for any purpose, and these will probably amount to seven millions, when the two millions of drafts are returned to the Treasury.

Thus, sir, we have on one side of the account resources relied upon to make the surplus means, estimated by the gentleman twenty-seven millions, and deducting his estimated surplus of twenty-three and a half millions, we have an actual deficiency, according to the gentleman's own statement, of three millions and a half.

§ Gentlemen might take what view they pleased of the state of our finances, but it is impossible to make any estimate which will not exhibit a deficiency in our means to meet the current expenses of Government. This deposite cannot be made unless we create a public debt for the sole purpose of placing a surplus in the Treasury, to be transferred and deposited in the Treasuries of the several States. Such a measure, he felt persuaded, would never be sanctioned by Congress.

Mr. BELL made a few remarks in rejoinder to Mr. Cambreleng, and insisted that the statement of the gentleman did not contravert Mr. B's of yesterday, that there was a dead fund of five millions of dollars on hand; and that, assuming that fact, which he said was incontrovertible, according to the gentleman's own estimate there would be a deficit of only one million some odd hundred thousand, but, according to Mr. B's estimate, an excess of rising three millions.

Mr. UNDERWOOD addressed the committee at some length, and went into a variety of financial statements, showing that the Government had means enough on hand, including the stock of the Bank of the United States, which might be sold, to answer its present expenditures, without creating a stock or borrowing money. He also went at large into the subject of the Treasury scheme, which he opposed as a delusive one, for its tendency would be directly contrary to what was asserted by its advocates. It would be making a discrimination in favor of the Government officers against the people, increase the patronage of the Executive, by giving him the control of all the constitutional currency of the country, and the appointments to be made in carrying out the scheme, and lead, eventually, to the establishment of a Treasury bank of discount. Mr. U. came to the conclusion that the only remedy for the existing embarrassments, and to prevent their recurrence, was in a national bank, though he should not propose such a measure, and he believed that more than two to one of the people were in favor of it.

Mr. PICKENS said he would submit a proposi-

tion which he thought would meet the views of a large majority of both sides of the House, and that was to postpone the payment of the instalment to the "first day of January, 1839," by which time it would be seen, if the postponement should be made indefinite or not. Mr. P. then moved to strike out the words till "further provision by law," and insert "the first day of January, 1839."

Mr. DUNCAN was opposed to this amendment, and expressed his astonishment at the number of propositions brought forward, the effect of the discussion on which was only to delay the action of Congress upon this bill.

The question resolved itself into this, whether the Government should contract a loan for the purpose of creating a surplus to be distributed in deposit with the States. Mr. D. then cited a statement he had prepared of the actual condition of the finances of the country, and for the information in which he was largely indebted to the highly respected gentleman from Maryland (Mr. Mc Kim) which showed satisfactorily a deficit of somewhere about ten millions, including unavailable funds; which would be, on the first of October, when the fourth instalment was payable, considerably increased. Mr. D. then went on to show that the creation of a loan for the purpose of paying the fourth instalment would be a direct violation of the Constitution. He also defended the Secretary of the Treasury from the strictures of gentlemen who had preceded him, and the views and recommendations of the Executive. In reference to the present bill, Mr. D. denied that it would violate any contract with the States, but he objected to that provision of it which took the responsibility from the Secretary of the Treasury, and put it upon Congress, and hoped a motion would be made to strike it out.

The following are the statements above alluded to by Mr. D.

*Whole amount of money in the Treasury, 1st January, 1837.*

Whole amount of available money in the Treasury 1st January, 1837, applicable to public purposes -	\$42,468,859 97
Deduct the sum reserved by law -	5,000,000 00
	<hr/> 37,468,859 97

Which amount of \$37,468,859 97 was, under the provisions of the act of June 23, 1836, to be placed in deposit with the States, and it is ascertained that there has been deposited -	27,063,430 80
	<hr/> 10,405,429 17

The amount of the third instalment, the deposit of which has not been acknowledged, is -	1,165,575 18
--	--------------

Amount of fourth instalment, not deposited -	9,239,853 99
--	--------------

The amount reserved in the Treasury on the 1st January, 1837, has been increased from \$5,000,000 to -	6,670,137 52
--	--------------

The receipts in the first half year are as follows:

From customs -	\$7,234,451
From lands -	5,307,731
From miscellaneous sources -	512,263
	<hr/> 13,050,445 00

To which add \$600,000 in hand, and \$50,000 in the hands of collectors, subject to draft -	650,000 00
---	------------

If no further postponement be granted on duty bonds, it is estimated that the whole amount of receipts of the last half year will be about -	9,500,000 00
	<hr/> 29,870,562 52

Deduct postponement on bonds to the 15th November -	2,500,000 00
---	--------------

Total amount of moneys estimated to be received in 1837 -	\$27,370,562 52
---	-----------------

#### *Expenditures for the first six months of the year 1837.*

Civil, miscellaneous, and foreign intercourse -	\$2,812,540 40
Military, including pensions -	10,603,361 49
Naval -	3,297,149 69
Public debt -	20,832 75
	<hr/> 16,733,884 33

Expenditures required to meet existing appropriations during the last half year, will, as computed, equal the sum of -	*16,000,000 00
	<hr/> 32,733,884 33

Amount of receipts ascertained and computed for the year 1837 -	27,370,562 00
	<hr/> \$5,363,322 33

This is an actual deficit, notwithstanding there ought to be a sum equal to this always in the Treasury, which really shows a deficit of above \$10,000,000.

Whatever expenditures shall arise within the year upon new appropriations which Congress may think proper to make, will require a corresponding addition to this amount; but without them, it will constitute an excess of \$5,363,322 33 of expenditures over both the receipts and the balance at the end of the year, besides not leaving at the close of the year any thing in the Treasury or mint for future uses or to meet contingencies.

*State of the Treasury up to the 1st of October.*  
By the Treasurer's report on the 30th of August past, it appears that the balance in the Treasury, including what was in the custody of banks, the mint, and collecting officers, was then - \$14,596,311  
That the amount of this sum subject to immediate draft, was only - 8,928,072

This is the amount of all drafts of all kind outstanding, viz: -	5,668,239
Drafts on banks and mint for debts -	3,877,468

Drafts on banks for transfers to States, -	1,165,575
Drafts on receivers and collectors, 28th Aug. -	625,000
	<hr/> 5,668,043

Leaving subject to draft near Sept. 1st as above -	8,928,072
Expenses in Sept. about 2,500,000, with receipts -	2,500,000

Leaving 1st Oct. in banks, mint, and receivers, and collectors, hands -	6,428,072
---	-----------

Of the amount in banks not over one or two millions are available, leaving four millions unavailable -	4,000,000
	<hr/> 2,428,072

For the mint, which cannot be used immediately -	500,000
--	---------

Amount of cash funds in the Treasury, 1st of October next -	1,928,072
---	-----------

Mr. GARLAND had a very few remarks to make, for he did not intend to reply to the gentleman from Kentucky on the subject of the Treasury scheme, though he held himself prepared to meet that question before the House and the nation, whenever that bill came up, for he had insuperable objections to it. Nor did he intend to follow that gentleman in discussing the principles or merits of a national bank. If he should have the honor of a seat in Congress when that question should come before the country, if it ever did, he was prepared equally to resist it, as both unconstitutional and inexpedient.

In relation to the question before the committee, he made a few remarks. This question had arisen

\* Of this \$16,000,000, \$7,000,000 has been paid.

under the deposit act of June 1836, and before he went into the question, he premised a single remark. That deposit act had been charged as the cause of all the difficulties which had overtaken the country, and the prostration of its prosperity. Upon a proper occasion he should deny the imputation. He had voted for that deposit act; and, under like circumstances, he would vote for it again. It was a wise law; and without intending to reflect upon the author of its execution—without intending to ascribe to the Secretary of the Treasury any other than that error of judgment common to human frailty, Mr. G. would say that if its execution had been as wise as the law, so far from having done an injury to the country, it would have exerted a powerful, if not a salutary and effectual, influence, in preventing the catastrophe that had happened. He believed the law to be wise at the time, and still believed it so, under the circumstances, and his vote for it would be an act of his public life he should never regret.

In relation to the law itself, he would put a single question. What was the act? Many there thought that it was an act for distribution; that is, for a gift to the States. Mr. G. denied that construction of it. If he had believed, when he had voted for it, that it was to be considered as a gift, he should have voted against it; because he did not believe that this Government had the constitutional power to collect revenue from the pockets of the people in large masses of surplus, and then give it out again.

In regard to the bill now under consideration, he asked, was it money belonging to the Federal Government or to the States? If it was the money of the States, it ought not to be withdrawn. If it was the money of the Federal Government, the question which presented itself to every statesman, was this: was the money of the Government to be deposited, and to lie in deposit, while the Government itself was in need of its use? Then arose the further question, had the Government any need of it? Perhaps that question might be somewhat doubtful; for he had travelled through the report of the Secretary of the Treasury, and through the statement of the chairman of the Committee of Ways and Means, and all the other statements that had been given, as well as he could, and the confusion between them was almost as bad as the confusion of tongues at the tower of Babel. Yet in that confusion he had ascertained one fact that would direct his vote, and that was that if this money was given away to the States, and the deposit law executed, there would certainly be a deficiency of some ten or eleven millions of dollars. Now, then, how was this deficiency to be met? Was it to be met by a future surplus of the revenue? He would ask the representatives coming from the consuming part of the community, where that surplus was to be raised from, but by a taxation upon foreign goods? It was a matter of interest to them, surely that the money should rather come back from the States, than from their pockets by taxation.

If Congress, in passing the deposit law, had over estimated the accruing revenue, so as not to have available means of meeting the instalment due on the first of October, then he saw no good reason why the instalment should be met, and the deficit supplied by taxation on the people.

But it was said that it would be acting deceptively towards the States. Why so? The deposit act itself contained a provision for calling back the money when there was a defect in the Treasury. Besides, he would put another question. How much more would the States be deceived and deluded by letting the money go into their treasuries, and then immediately calling it back under the process of the original act? Although, to be sure, it might come back in small amounts and instalments, yet where would be the use of investing it to-day, and calling it back instantly? But it was not prudent in the States to dispose of the money till they had it; for their obligation over it did not commence till it had been delivered to them, and they had no obligations to perform over the money they had not received. It was not in the hands of the States, but in the Treasury of the General Government.

But, again, if this bill be not passed, how were

25TH CONG.....1ST SESS.

THURSDAY, SEPTEMBER 28, 1837.

VOLUME 5.....No. 4.

BY BLAIR & RIVES.

—WEEKLY—

PRICE \$2, FIRST TWO SESSIONS.

[Continued from No. 3.]

they to pay the money? Were they to effect a loan on the accruing revenue laws, or to rely upon the southwestern banks to pay up the money deposited with them? Was this a proper state to place the finances of the country in? If it should turn out that the Secretary of the Treasury had given them wrong information on the state of the finances, and if it should turn out that the Treasury was in a sounder condition than he represented, the responsibility would rest upon him, and not upon that House in passing this bill.

Mr. CAMBRELENG explained, in reference to the disbursing officers, that though there might appear on the books to be a balance due from one of them of a million, yet that, in fact, there might not be in his possession at the time five thousand dollars; for the reason, as was understood, that they were debited with the whole amount of the drafts or warrants as soon as they were drawn.

Mr. BELL insisted that there were four millions and a half in August in the deposit banks not paid away by these same gentlemen.

Mr. GARLAND concluded, by saying that, before he acted on that subject, it would be his duty to ascertain precisely, as nearly as he could, the exact state of things; at present, he had nothing else to guide him but the authority of the Secretary of the Treasury, and on that he should vote for the bill under consideration. Mr. G. however, did not admit all the grounds to be true. He did not admit that there was such an amount of unavailable funds as had been represented and contended for there. This he should be able to prove, from the report itself. But, though not unavailable, yet the Secretary says it cannot be come at in time, and for that reason Mr. G. should vote for this bill. It was the Government's money, and the Government wanting it, he should vote for its being withheld from the States.

Mr. BIDDLE opposed the bill at some length, on the ground that the report of the Secretary of the Treasury had not furnished sufficient data to warrant its passage. Moreover, if the exigency was of so pressing a character that the money could not be paid, the Secretary could give the States the same answer he did in July, viz: either keep back the payment, for a time, on that ground, or tender them in payment the notes of the deposit banks. Again, Mr. B. objected to the bill, because it changed the nature or character of the claim; and became, instead of a claim upon the surplus fund now in existence, a claim at large upon the Federal Government, or the people, which would have to be paid in specie.

On motion of Mr. LOOMIS of Ohio the committee then rose and reported; and then,

On motion of Mr. GLASCOCK,  
The House adjourned.

The following additional standing committees were appointed by the Chair under the new rules and orders of the House:

#### On Public Buildings.

Messrs. TOWNS,  
YELL,  
EVERETT,  
MCCLURE.

#### On Patents.

Messrs. LOOMIS,  
CHEATHAM,  
CRARY,  
HAWES,  
HALSTEAD.

#### IN SENATE.

THURSDAY, Sept. 21, 1837.

Mr. McKEAN presented a memorial from sundry citizens of the city and county of Philadelphia, remonstrating against the admission of Texas; which was laid on the table.

Mr. MORRIS presented a memorial from sun-

dry citizens of Ohio, praying that Texas may not be received into the United States; which was ordered to be laid on the table.

Mr. LYON also presented a memorial to the same effect; which was laid on the table.

Mr. HUBBARD presented two petitions; one from Amasa Brown, the other from Abigail Sprague, praying pensions; which were laid on the table.

Mr. WRIGHT, from the Committee on Finance, reported a bill making appropriations for the suppression of Indian hostilities for the year 1837; which was read a first time, and ordered to a second reading.

[This bill makes a provision of one million six hundred thousand dollars. In connection with this bill, Mr. WRIGHT submitted a letter from the Secretary of War.]

Mr. WRIGHT, from the Committee on Finance, reported on the several petitions preferred from the Chamber of Commerce of New Orleans; from the city of St. Louis, in Missouri; from the citizens of Carroll county, in Mississippi; and the citizens of Schuyler county, in Illinois. The report concluded with the following resolution:

Resolved, That the prayer of the petitioners ought not to be granted.

Mr. HUBBARD presented a resolution from the House of Representatives and General Court of New Hampshire, instructing the Senators, and requesting their Representatives, to oppose any and every proposition to charter a Bank of the United States.

The bill imposing additional duties on certain officers as depositories in certain cases being taken up in the Committee of the Whole, the question being on Mr. Calhoun's amendment—

Mr. SMITH of Indiana rose and addressed the Senate in a speech occupying two hours. On this question Mr. S. gave his reasons for voting against the postponement of the fourth instalment to the States. The States, he said, had in several cases entered into contracts on the faith of the receipt of this money, and had in some instances actually made advances on those contracts, which would be forfeited to the great injury and loss of these States. Although the understanding between the General Government and the States could not be considered exactly in the light of a contract, yet it was very like one in its nature, and he so viewed it.

The affairs of the country, he was aware, were brought to an alarming crisis, and required caution and the utmost deliberation. The attempt now made to strike the banks with a ruthless and iron hand, could not fail to re-act upon the people, and beget consequences still more fatal than those we were now laboring under. Why was it proposed to separate the Government from the people, by having separate and distinct currencies? The moment such a measure was effected, the minds of the people would be alienated—there would no longer be an affinity between them. One common interest should pervade both; they are embarked on board the same vessel; and every individual, be he poor or rich, was more or less interested in her prosperous voyage.

This idea of divorcing the Government from the banks, he contended, was an *afterthought*. He was prepared to show it was not the opinion of Ex-President Jackson, nor of Mr. Van Buren when he was canvassing for the high office that he now fills. [Here Mr. S. read extracts from the Message and documents.] We were then told that these banks were entirely adequate to all the purposes of the General Government; that they could regulate the exchanges of the country, and perform all the offices the Bank of the United States had done, safer and better, and now we are asked to divorce them. He had been told it was a contest between the aristocracy of wealth on one side, and the democracy of numbers on the other; for his part he did not know where this aristocracy was—there might be such a thing; but he thanked heaven he had never seen

it. They knew no distinction in the West, where he was from, no difference, save in virtuous or vicious actions. He protested against that spirit of uncharitableness which would array one class against another. We could never advance the interests of the nation by inducing one portion of the people to envy another—all should stand on the broad platform of equality.

Various indeed were the opinions of gentlemen as to the causes of the distress in which we are involved. Some tell us it is owing to our having become speculators, consumers, not producers—others again blame the excessive issues of the banks; while others trace it to the tariff—all he knew was that a fearful anxiety pervaded the mind in relation to it. He could not, like the gentleman from South Carolina. (Mr. Calhoun) enter into a metaphysical discussion of the subject, but having mixed much with the people for the last eight years, he could take a common sense view of the matter, such as he derived from the persons in the West, with whom he had commingled, and he would add, that although these causes might have operated in part, yet he felt constrained to say, that the great primary cause was the destruction of the national bank, and the removal of the public deposits. Previous to those acts by the Executive, we had none of the ills to which we have since been subject—public confidence was every where unimpaired until that evil hour when the public funds were removed from the vaults of the national bank. Then it was that banks sprung up over the whole country. We had placed the public deposits in their keeping, thus enabling them to expand their issues to loan the money to those citizens who wanted it for commercial and other purposes, and now we called for a separation from all banks. Sir (said Mr. S.) you are not entitled to a divorce upon principles of common law and justice.

Added to all this was the Specie circular: the moment people saw that you received nothing for the public land but gold and silver, that very moment distrust seized upon the public mind; it was like the fire in the great western prairies, nothing could stop it; every man became suspicious, and he who had a dollar in paper, drew out the specie and hoarded it up.

This circular was the means of drawing the specie from the East to the West, where it was not wanted, and where it performed no other office than being hoarded. Such a measure of itself could not fail to destroy every bank in the country. Confidence, that could alone sustain moneyed institutions, was annihilated, and distrust universally created. He would not charge improper motives upon the authors of these evils; he believed they might have acted from patriotic motives; but he felt himself bound to state the consequences that had arisen from them.

The measures now contemplated by the administration, would draw all the specie from the West, and place it at the disposal of the Executive, where, with the army and navy, and whole hosts of visitors and examiners, he would soon have the means of becoming irresponsible to the people. Are we, could we, be prepared for the dreadful consequences that would ensue from following out this phantom? Suppose the specie made the only currency; what would be the effect on those persons in debt? Their property would be sacrificed for nothing, and one wide scene of desolation and ruin pervade the whole country.

Mr. STRANGE addressed the Senate in a long and able speech. He remarked that it had been the custom to ascribe the present difficulties of the country to the Government having tampered with the currency. He would answer that charge before he should conclude what he had to say on the subject under consideration. With regard to the existing commercial distress, and the other inconveniences which were complained of, they were not confined to this country alone. Any man who should cast his eye across the Atlantic, could not

fail to perceive that distress was as great, or nearly so, in many countries of a commercial character. The present condition of the Union, some had ascribed to measures of the Government, and they had done so with a proper sense of propriety and dignity due to themselves as well as the Government. They had endeavored to show their injurious effect on the affairs of the country. Now, that was a perfectly fair and legitimate mode of proceeding. It was right that the measures of the Government should be fairly and dispassionately examined, and if they had been injurious, they should be so pronounced. But, so far from concurring in opinion that they had been productive of the present catastrophe, if it could be so called, he believed that the measures had tended rather to relieve the force and weight of the blow which might have been expected by those who watched the commercial proceedings of the country. He believed that the operation of the Specie circular was more limited than was generally supposed, and that its effect had been beneficial; for it had prepared us for what was a most unexpected catastrophe to some, though every thinking man must have seen that it would occur. While he said that the measures of the Government had not been injurious, he did not mean to claim for it perfection. He was free to admit, that some of them, co-operating with other causes, had somewhat affected the welfare of the country. They had done a great deal of good, and probably had done some harm. One of the measures which had been denounced, was that for regulating the standard of gold and silver coin. At the period it was passed, it was considered to be salutary and beneficial. It was not particularly an administration measure; it was supported by many opposed to the administration. The result of it, however, had been somewhat different from what was expected. He believed it had disturbed the commercial equilibrium of the world. It had he thought alarmed the Bank of England, and induced that institution to adopt a course of measures which had seriously affected the commercial interests of this country.

With regard to the distribution act, he believed that that act had had an injurious effect. Now, that was not an administration measure, nor of any particular party. It passed almost by the acclamation of both parties. His opinion was, that this had greatly contributed to derange the currency. He did not think that gentlemen had probed the matter to the bottom—had not looked at the real causes of the present distress. A departure from the Constitution had produced it. Supposing that there had been no tariff adopted, and no national bank established, we knew not what might have been our situation. Perhaps none of the difficulties now complained of would have existed. They might all be traced to these causes, directly or indirectly. He believed them to have thus originated.

Mr. S. after enumerating the various causes which have been said by gentlemen on the other side to have produced the distress; observed that he was very happy to see some very cheering points in the present crisis, as to the course which the Executive had marked out. He trusted that both Houses of Congress would be ready to co-operate with him.

With respect to the relief of the country, we had been told by some gentlemen, that no relief was proposed in the Message. Relief was proposed for an exhausted Treasury, which was one of the evils complained of; and incidentally some relief was also proposed for the commercial distress of the country. He presumed that it would not be denied by any gentleman on that floor, that the emission of ten millions of Treasury notes would afford to the circulating medium of the country additional vigor. Was it not proposed to give indulgence to the merchants, by extending the time for the payment of duty bonds? And so, because relief was not to be afforded to an unlawful extent, it was said that no relief was to be afforded. He contended that great relief would be given by the measures adopted. It had been strongly intimated that a Bank of the United States would afford relief to the country; but no direct proposition had been introduced here in response to it. He expressed his opinion that it

was unconstitutional to establish a Bank of the United States. He believed, too, that it had contributed to produce the present distress. Mr. S. paid a high compliment to the Senator from South Carolina, (Mr. Calhoun) for the high stand he had taken in opposition to the United States Bank, in the speech he delivered a few days ago. He adverted to Mr. Rives's scheme, and condemned it. He maintained that the State banks had completely failed in answering the purposes expected from them. They had virtually failed, not being able to pay specie, and had placed the Government in its present awkward predicament. The merchants would not be placed in the humiliating condition they were, if the banks had met their engagements as they ought to have done. He was astonished that any gentleman should say that the experiment had not failed. The gentleman from Virginia (Mr. Rives) had said all that was wanted was a restoration of confidence in the banks. He (Mr. Strange) had certainly no confidence in them. Would it not be a falsehood on record to say that the people ought to have confidence in the banks, when we ourselves had not confidence in them?

Mr. S. spoke of a bankrupt law, and maintained that such a law must be general in its operation, and could not be made applicable only to banks. The General Government would not have the power to enforce the law in the States. It would, then, be perfect madness to put the funds of the Government where they could not be had when wanted by it.

In regard to the Sub-Treasury scheme, public opinion had not yet been tried on the question, and he was willing to abide by the verdict of the people, whatever it might be.

But as far as he was able to judge, *a priori*, what that opinion would be, he thought it would be in favor of it. Was it unconstitutional? No man pretended that it was. Was it expedient? That was the question. None of the objections which applied to a Bank of the United States, would apply to it. But we were told that it was a new experiment, and doubtless the word experiment would be rung in our ears until we had the earache. Were we to be frightened from our propriety by the word? It was an experiment so far as this Government was concerned, but not as regarded the world. Every body would admit that it was not liable to be a total failure like banks. Nor was it liable to the numerous objections against the deposit banks.

Mr. S. next answered the arguments urged against the scheme on the ground of the Executive patronage which would necessarily be attached to it. He insisted that it would not be either great or dangerous—that no apprehension need be entertained on that score. He referred to the question of the currency, and expressed his sentiments to be like those set forth in the Message. He observed that so far from the banks being against the Sub-Treasury scheme, they ought to favor it, because it would be the means of making specie more plentiful than heretofore. After some further remarks on various subjects bearing upon the scheme, he concluded by declaring himself the decided advocate and supporter of it.

On motion of Mr. TALLMADGE, the Senate adjourned.

#### HOUSE OF REPRESENTATIVES,

THURSDAY, September 21, 1837.

Petitions and memorials were presented by Mr. EWING of Indiana.

[Mr. EWING presented the memorial of sundry persons praying for the establishment of a specie-paying Bank of the United States, and asked the leave of the House to address that body on the subject of the memorial; but objection being made, the memorial was referred to the Committee of Ways and Means, and ordered to be printed.]

Mr. GLASCOCK of Georgia.

[Mr. GLASCOCK presented the petition of Joshua Pharaoh, of Richmond county, Georgia, praying an increase of his pension.]

Mr. HOWARD of Maryland.

[Mr. HOWARD said that he presented the petitions of the executors of Joseph Mussi deceased, and of the legal representatives of Joseph Borden deceased, together with those of 956 petitioners now

on file in the House, praying that compensation may be awarded to them for property taken for the service of the United States in the year 1800. The mere mention of the far distant date at which these claims originated, would, in a great measure, explain to the House his reasons for presenting these petitions at this time, when, under the rule of the House, no reference of them could be made to a committee. He understood that it was the intention of these claimants to press the examination of their claims upon the committee, who might be charged with their investigation; and if such investigation should result in the report of a bill, then to press upon the House the consideration of that bill at some period of the approaching winter. They had desired their petitions therefore to be brought thus early before the notice of House, in the hope that some portion of the leisure which the members now had, might be bestowed upon an inquiry into claims which were closely connected with an interesting portion of the history of the country. At the last session of Congress, it would be remembered that he had reported a list of the claimants, which had been printed by order of the House, that it might be seen who these numerous claimants were, and in what States they lived.

The petitioners state, that prior to the year 1800 their property had been seized upon the high seas by French cruisers, and their vessels and cargoes condemned, in violation both of national law and express treaty. After much negotiation between the United States and France upon the subject of these repeated and intolerable outrages, the Government of France expressed a willingness to make compensation, and would have done so, but for a measure of public policy on the part of the United States, arising from this circumstance. In 1778, a treaty of alliance, offensive and defensive, was formed between France and the United States, in which they had reciprocally guaranteed to each other the integrity of their possessions, and a treaty of commerce was subsequently made, by which great privileges were secured to France. These stipulations, which were merely nominal when the treaties were formed, proved very onerous when the commerce of the United States became extensive, and when a demand was made that the guaranty should be fulfilled by preserving to France her West India islands. The United States insisted upon being exonerated from these very troublesome stipulations, and France, with equal pertinacity, insisted upon their immediate fulfilment. To escape from these embarrassing articles in the treaties, the United States released France from the obligation of making compensation to the petitioners, and France, on her part, consented to abandon the important rights which she held under the old treaties, and which were otherwise indestructible. The result was, that the petitioners lost their property which France had expressed her willingness to pay for, and the Government of the United States made this property the equivalent for obtaining great national advantages. Against this use of their property the petitioners never remonstrated; but against its being taken for the public use without compensation, they have complained from that day to this.]

Messrs. RUSSELL and PRENTISS of New York.

Mr. POTTS of Pennsylvania.

Mr. HALSTEAD of New Jersey.

Mr. HALL of Vermont.

Mr. TILLINGHAST of Rhode Island.

Messrs. ADAMS, LINCOLN, and BORDEN of Massachusetts.

Mr. WILLIAMS of New Hampshire.

Mr. SMITH of Maine.

Mr. THOMAS, chairman of the Committee on the Judiciary, stated for the information of the House, that the Committee on the Judiciary had adopted a resolution, that it is inexpedient to report a bankrupt law at the special session of Congress.

INQUIRY IN RELATION TO THE FLORIDA WAR.

The House then proceeded to the unfinished business of the morning hour, which was the consideration of the following resolution, submitted by Mr. WISE on the 19th instant:

*Resolved*, That a select committee be appointed

by ballot to inquire into the cause of the Florida war, and into the causes of the extraordinary delays and failures, and the enormous expenditures which have attended the prosecution of that war, and into the manner of its conduct, and the facts of its history generally; that the said committee have power to send for persons and papers; and that it have power to sit in the recess; and that it make report to the next session of Congress.

The CHAIR stated the question pending to be the motion submitted on yesterday by the gentleman from Massachusetts, (Mr. Cushing,) to strike out the words "by ballot."

Mr. CUSHING, however, rose, and stated that he had on yesterday suggested this amendment to the gentleman from Virginia, but that he had not made the motion to strike out. The journal was corrected accordingly.

Mr. GLASCOCK then rose and stated that he did not desire to take up the time of the House at the present session, which was called for another purpose, in discussing this resolution, as there would be a time hereafter more appropriate for doing so. Mr. G. then moved to amend the resolution by striking out all after the word "Resolved," and inserting the following:

"That a select committee be appointed to inquire into the causes of the Florida war, and the causes of the extraordinary delays and failures, and the expenditures which have attended the prosecution of the same, and all the facts connected with its history generally; and that said committee have power to send for persons and papers."

Mr. HOWARD of Maryland moved to amend the amendment, by striking out "a select committee," and insert "the Committee on Military Affairs be instructed;" the effect of which would merely be to transfer the duty of investigation from a select to a standing committee of the House. Mr. H. said that his opinion had been more than once expressed; that, as a general rule, it was proper to refer all matters which might come before them to some standing committee, whenever the subject was within the range of the duty which the rules of the House enjoined upon that committee to perform. During the last Congress he had moved to reconsider a vote by which a select committee had been ordered, for the purpose of referring the subject to one of the standing committees, and the House had concurred with him in opinion. Whenever no appropriate standing committee could be found, he admitted that it was correct to raise a special one, and if this were such a case, he would not now object to the adoption of this course of proceeding. But so far was this from being true, that if the House were to direct a special committee to be appointed, its duties would actually conflict with those of the Committee on Military Affairs, as he would presently show. What reason could be given, he asked, why there should be a select committee? Would the effect of such a measure be to impose duties upon members of this House who were not charged already with the execution of others? By no means. The members of a select committee were generally, if not necessarily, taken from other committees, and thus they were compelled either to discharge a double and burthensome duty, or to abstract a portion of their attention from subjects which were important enough to occupy their whole time. During the last winter, the committee of which he had the honor of being a member, had been compelled twice to send for one of their associates, who was attending to the duties of one of the select committees, and, if his memory did not deceive him, one of the subjects upon which they were equally divided, was thus prevented from being brought before the House at all. Other committees, he presumed, had experienced similar inconvenience from the same cause.

But, in addition to this, one of the rules of the House would show the propriety of confiding this investigation to the Committee on Military Affairs, as must be manifest upon reading it.

The 72d rule was as follows:

"It shall be the duty of the Committee on Military Affairs to take into consideration all subjects relating to the military establishment and public defence, which may be referred to them by the House, and to report their opinion thereupon; and also to

report, from time to time, such measures as may contribute to economy and accountability in the said establishment."

It is made their duty, by this rule, to report such measures as may contribute to economy and accountability, without waiting to have the consideration of these topics especially referred to them by the House. Did gentlemen then wish to discharge that committee entirely, or to permit them to look into the best mode of promoting economy except as to that part of the army in Florida, and thus have two committees employed upon the same subjects, except that one would be occupied with a part of the army, and the other committee with the residue? What confusion must arise from such a proceeding! The resolution before the House proposed to inquire into the causes of the delay and expenditure of the Florida war, and both these duties were specifically provided for by the rule which he had read.

But there was another point in the case. If the proposed investigation should be made by a select committee, how could the House act upon the report, so as to remedy whatever evils there might be, except by referring the report to the Committee on Military Affairs, to frame the necessary bills? The resolution proposed merely a barren inquiry, unproductive of any practical results. If it should be contended that this special committee might report bills also, then the proposition amounted to superseding the standing committee entirely, by vesting another one with all their duties; because such bills could only be prepared after an intimate knowledge of the condition of the whole army.

Mr. H. said that he had read the proceedings of the Court which sat at Frederick, and the correspondence between the late Secretary of War and General Clinch, as well as all other papers within his reach, calculated to throw light upon the conduct of the Florida war. He dissented entirely from the opinion expressed by the gentleman from Massachusetts, (Mr. Cushing) that it was a disgrace to the country, nor could he understand the metaphysical distinction, that the arms of the country were disgraced, and the officers not. He thought that the causes of failure would be found to resolve themselves into two, viz: the extraordinary physical condition of Florida, as it had been correctly described by the gentleman from Georgia, (Mr. Holey) and the great distance of the directing power from the theatre of war. In all campaigns, of all nations, failure was almost inevitable, where the head that planned was hundreds of miles distant from the arm that executed those plans. The army in Florida had performed their arduous duty in a manner which was highly creditable to them, and he thought no disgrace had attached to any quarter. But he was entirely willing that the fullest and freest investigation should be made, and nothing was further from his purpose than to screen any officer, civil or military, if he should be found deserving of censure. He trusted that any committee to which it might be the pleasure of the House to send the investigation, would pursue it rigorously and impartially, with no other view than to do justice, whomsoever it might affect.

Mr. MUHLENBERG said: when this resolution was under discussion yesterday, some remarks were made by the gentleman from Virginia on my left, (Mr. Wise,) which he regretted to hear, because he thought they were in bad taste, and reflected but little credit either upon the head or the heart of that gentleman.

The attack made upon an absent gentleman, unable to defend himself, was certainly, to say the least of it, neither just nor generous. It reflects no credit upon any man to insult a fallen foe, or to strike and kick him when unable to resist. In this light I must view the attack made upon the absent gentleman from Rhode Island. If that gentleman had been present, there would be no cause for complaint, for he is amply competent to defend and take care of himself. He would have given the gentleman from Virginia a Rowland for his Oliver; measure for measure, in every species of attack.

But, sir, I have not risen to reproach the gentleman from Virginia. The goodness of heart with which I know that gentleman to be largely endowed,

has, no doubt before now, induced him to regret the hasty and uncalled-for remarks made yesterday. I have risen to correct some misapprehension into which he has fallen. He stated that the clerk of the Committee of Investigation alluded to, had feigned sickness, in order to gain time for drawing up a report. Sir, the clerk was taken ill shortly after the committee had been organized, and before it had made much progress in its labors; long before a report was thought of, as no one could then say what would be the result of the investigations going on. The testimony of the attending physician, and the evident marks of disease remaining after that person's return to the committee, might have satisfied the gentleman from Virginia that the disease was real, and not feigned. At all events, it could not have been feigned for the purpose stated, because there were at that time no materials for a report.

When the proper time for making a report had arrived, the majority of the committee directed Mr. PEARCE, being the first named of the majority on that committee, to draw up a report for their consideration; and I believe each member of that majority furnished him with his own peculiar views on the subject. I know positively that this was done by myself and some others. The gentleman from Virginia pressed so much and so incessantly for a report from the majority, that it was submitted to the whole committee before the majority had had an opportunity of hearing it read, and passing an opinion thereon. When read in committee, I am free to confess I heard it with no little surprise and regret. I immediately, with a majority of the friends of the administration on the committee, protested against its adoption, and insisted upon its being amended. It was accordingly returned to Mr. PEARCE, to be so changed as to meet the views then expressed. When again presented to the committee, it met with the approbation of the majority, and no complaints were heard from the minority.

Does the gentleman from Virginia recollect that his own report met with a fate similar to that of the majority; that all his colleagues of the minority refused to sign it?

As to the bitter experience of which the gentleman from Virginia complains of having had on the stocked committees of investigation, as he is pleased to call them, I have but little to say. This I will, however, say: that I never before heard him complain of the conduct of that committee, of which he was the chairman; certainly such complaints were never uttered during its sittings. When the committee was about to close its labors, a vote of thanks to the chairman was unanimously passed; and the tear which stood in his eye when he made his acknowledgments, and the apparent good feelings with which the committee finally separated, would seem to tell a different tale.

I regret, that before the gentleman of Virginia had yesterday concluded his remarks, the orders of the day were called, and that I was thus prevented from making this statement immediately. It would not have been made, if, as a member of the committee spoken of, I had not been called upon for it.

Mr. WISE said he was happy, extremely happy, that the gentleman from Pennsylvania had had time to sleep after the remarks he had heard on yesterday, and prepare himself with proper words for the occasion. He was glad that the gentleman was not called upon on yesterday, when he was unprepared to meet the statement which he (Mr. W.) had made. But did the gentleman contradict the statement he had made on yesterday, in the important particular in relation to the clerk of that committee writing the report? He inquired of the gentleman from Pennsylvania whether he put pen on paper in writing that report? The gentleman may have furnished Dutee J. Pearce with notes, but Pearce turned them over to Hallett, and Hallett wrote the report.

Mr. MUHLENBERG said that this was a matter between the gentleman from Virginia and Mr. Pearce. He (Mr. M.) presumed that Mr. Pearce wrote the report.

Mr. WISE. The gentleman presumed that Pearce wrote the report. Now, he repeated what

he said on yesterday, and called upon the gentleman from Massachusetts (Governor Lincoln) to say whether Dutée J. Pearce had not admitted in presence of Colonel Campbell and himself that Hallett had drawn up the report, and that the notes were furnished him by Abijah Mann and Mr. Pearce himself?

Mr. LINCOLN stated that Mr. Pearce had admitted, in a personal conversation, that he was not the author of the report; and more than this, that, upon reflection, he disapproved of its language. He would state further, that he believed whatever had occurred of an unpleasant character in that committee, was in consequence of the action of that agent, in connection with some persons not on the committee. He was bound, however, in candor, to say that when the majority of the committee ascertained the language in which that report was drawn up, it was as severely reprobated by them as by the members of the minority.

Mr. WISE hoped that the statement which he had made was so fully corroborated, as to make it perfectly satisfactory to every gentleman who heard him. He would leave it to the House, to every gentleman in the House, and to every person in the country, whether he was to be reproved for telling a truth; for stating that which must be looked upon by every person as true, and which was not denied by the gentleman from Pennsylvania himself; and he had stated this truth upon the authority of Dutée J. Pearce himself. If it was offensive to the character of Dutée J. Pearce, he himself was the author of it. He (Pearce) was the authority he had for stating that Hallett, the clerk of the committee, wrote the report of the majority. He begged leave to say to the gentleman from Pennsylvania, that he entertained the highest respect for his heart. He had the greatest respect for the gentleman's good heart; but he must say to him that if ever he was put upon another committee of investigation, and did not discharge his duties on that committee somewhat differently, and a little better, than he did last winter, and take particular care that the report he is called upon to sign is his own, or that it contains his sentiments, he could not entertain any very great respect for his head.

[Mr. MUEHLBACH presented his respects to the gentleman for his good opinion.]

Mr. W. knew that the clerk of the committee had a spell of sickness, and that Doctor Sewall attended him. He knew it from his pallid countenance, when he returned to the committee room, and from the fever blisters on his lips; but this was at a time when the committee were not prepared to make any report, and when he could not be engaged in writing it, as there was no materials furnished for proceeding in that business. But some time afterwards he was again absent for several days—a week, perhaps, when he was not confined by actual sickness, as he believed. A portion of the time members of the committee performed the duties; and at length a member of the majority introduced a resolution to employ an assistant clerk; and an assistant was employed, who did all the duties, and received but four dollars a day, while the other, who was absent, received eight dollars a day. Mr. W. then went into a detailed account of the occurrence in the committee room at the time the report of the majority was brought in. Near the close of the session of Congress he gave notice to the committee that he should expect a report to be prepared in the course of some few days, and a day was appointed for the labors of the committee to cease. On the Monday previous to the adjournment of Congress, he inquired if the report of the majority was ready. He was answered no. On Tuesday he again made the inquiry, and received the same answer; but on Wednesday the report came in. A member of the majority (Mr. Mann of New York) commenced reading it, when Col. Campbell inquired if it could be amended. He (Mr. W.) considered that it was subject to amendment. A discussion arose upon the question whether any portion could be stricken out, and after some time spent in discussion, the majority determined that they would read it through, and mark the objectionable passages, and then take up the question whether it was in order to strike any portion of it out. Col. Campbell then took pen in

hand, while Abijah Mann read the report, and took notes of the offensive party until he filled nearly half a page when they came to a whole paragraph, which was of the most offensive character. Mr. Campbell said "draw a line round that, mark it, expunge it," and he immediately rose from his seat, and slapped his hand on the table, and uttered an oath which occasioned him (Mr. W.) to call him to order. The Colonel then said to Mr. Mann: "Sir, I warn you that the man who dares to present that report to the House, filled as it is with falsehoods and lies, I will hold responsible to me personally; and if he don't hold himself responsible, I will chastise him." He then locked the door of the committee room, put the key in his pocket, and swore that not an individual should leave that room until those infamous falsehoods were expunged.

He would do the gentleman from Pennsylvania the justice to say, that when the report was read he rose and said to Mr. Pearce that he did not believe the report to be the truth, but that it was filled with falsehood. The minority of the committee then retired—the majority having determined to strike out the offensive parts—leaving them to pursue their labor of expunging those portions, and then Hallett had the insolence to complain that they had struck out the only parts which gave it point. He would, however, do the justice to the gentleman from Pennsylvania to say, that he did not believe that the gentleman knew that Hallett wrote the report. It will be recollected it was on Wednesday that the report was presented, and on the next Friday Congress adjourned. No discussion arose in the House on the subject, or he would have made the statement which he now made; for, Rowland or Oliver, no human being, though he were but a worm in spirit and in strength, could fear Dutée J. Pearce. You could only fear him when your character might be attained with his company. You could only fear him as you would a midnight assassin or a thief. In relation to another part of the statement of the gentleman from Pennsylvania, in relation to the report of the minority. The three members of the minority had no opportunity of consulting in relation to the report, as their time was entirely taken up, and it was not to be expected that they would blindly sign his report, without any opportunity to compare their statements and papers, and he considered that the two gentlemen of the minority were perfectly justified in not signing it. But a general report was drawn up, and that report they all did sign. He would take this occasion to state to the gentleman from Pennsylvania, that there never was any difficulty in relation to his (Mr. W.'s) report, as it never was read in committee. He did to be sure take Mr. Mann aside at his own request, and read to him that part which related to that gentleman personally. There was language in that report which, perhaps, a person of a different temperament would condemn; but there was not a letter in it which he was not the author of. There was not a cross on a z, or a dot over an i, which was not his own; whether worthy or unworthy, proper or improper. Governor Lincoln and General Campbell had not the opportunity to aid in drawing it up, and it could not be expected of them blindly to sign it. He hoped he had disposed of this subject now and for ever. Mr. W. then replied to the remarks of the gentleman from Maryland, (Mr. Howard) in relation to the reference of the subject to the Committee on Military Affairs. There were nine members on that committee, among whom was to be found but one single opposition man; the other eight being friends and supporters of the administration. His friend from South Carolina (Mr. Thompson) was the only one of the nine who was not a supporter of the administration. On the two select committees last winter they had six to three, which was bad enough; but he would ask gentlemen if it was not rather too bad that an important matter of this kind should be referred to a committee of eight to one. He hoped the resolution would be agreed to, in some form or other, that a proper investigation might be had. If gentlemen were not able to form an opinion in relation to this matter, let them have a committee which would do it justice, and they would have data, and the whole country would have data, to make up an opinion

in relation to it. He desired to have light on the subject, and the whole American people desired light. Mr. W. then modified his resolution by omitting the words "enormous" and "extravagant."

Mr. GLASCOCK regretted exceedingly the unpleasant feeling which seemed to exist on this subject, and that a discussion should be got up which was entirely irrelevant to the subject before the House. The House had nothing to do with the controversy which had been going on, and he hoped we would hear no more of it. So far as he was concerned, he was disposed to go heart and hand for this investigation, and he believed there was no friend of the administration who had expressed a disposition to evade the inquiry. All were desirous that it should be had. The whole country was looking anxiously forward to the time when the matter would be inquired into. If there was any individual in this House, or out of it, who had raised his voice against the raising of this committee, he had not heard it. There had, to be sure, been objection made to the mode of appointment, and this he himself objected to. His object was that the committee should be so constituted that all the officers, and all the parties interested in the issue, should have full and complete justice done them; and to effect this, he had come to the conclusion that the committee ought to be appointed, as all other committees are appointed in this House, by the Chair. This would be throwing the responsibility where it belongs, because in a matter of so much importance to the country, the Speaker would appoint such a committee as would do the subject ample and complete justice. The gentleman had proposed to appoint the committee by ballot. His objection to this was, that the interests of all those concerned in the campaign could not be so well guarded. The committee might be prejudiced against one, and in favor of another; but if the Speaker appointed the committee, he would take this into consideration, and see that each would have his friends on the committee, so that all might have justice done them. If they were elected, there would be a majority of one party or the other on the committee, and the objection on political grounds would be the same. He would go for the appointment of the committee by the Chair; and if he appointed such committee as would do injustice to the investigation, he confessed that he should entertain a different feeling towards the Speaker from that which he now entertained. That the committee should be so made up as to have a majority of the party in power on it, was according to all parliamentary usage; but that was no evidence that they would not do justice to the subject referred to them. If the committee were to be elected, how should the election take place? Were they to be elected by a majority or a plurality? And when they were elected, the same objection might be raised to them on political grounds, as one party or the other must be in the majority. It appeared to him that it ought to be the desire and the wish of all, that every gentleman concerned in the campaign should have his interests represented on the committee, and this could only be effected by appointing it in the usual way. He had no political views to gratify, and only desired that the people of the country might be placed in possession of all the facts in relation to this matter.

Without taking the question, the House, on motion of Mr. CAMBRELENG, proceeded to the orders of the day; and on motion of the same gentleman, went into Committee of the Whole on the state of the Union, Mr. HAYNES in the chair, and resumed the consideration of the bill to

#### POSTPONE THE FOURTH INSTALMENT WITH THE STATES.

The question pending was on the amendment of Mr. PICKENS to strike from the bill the indefinite clause "till further provision by law," and insert "the first day of January, 1839."

Mr. LOOMIS, of Ohio, who was entitled to the floor, addressed the committee at length in opposition to the bill, insisting that it was proposing to infringe a vested right, acquired under the deposite act by the States, who had pledged their faith to repay the money. He then reviewed the acts and policy of the late and present administrations in re-

ference to the currency, in all of which the Executive had acted independently of the other branches of the Government, as in the case of the Bank of the United States, the removal of the deposits, the Treasury circular, &c. and had now only called Congress together, not to devise the best means for relieving the country, but to share with him in the responsibility of his present schemes. Mr. L. denied the existence of any exigency requiring the withholding of the fourth instalment from the States, since there was no proof there was a deficit; and even if there was, the resources of the country, from the cotton staple of the South, the grain of the West, the manufactures of the North, and the commerce of the ocean, would be ample to meet the payment, even if it was necessary to effect a temporary loan till those resources came in.

Mr. JONES followed in support of the bill, and went at large into an examination of the condition of the Treasury at the passage of the deposit act, and since that time up to the present period. He denied that there was any obscurity in the report of the Secretary of the Treasury, and he had prepared a statement from it showing most conclusively that the means now at the control of the Treasury were not only insufficient to meet the existing demands upon it, but that there would be a deficiency of several millions of dollars, viz: that the means amounted to something over sixty-six millions, the liabilities to upwards of eighty-eight millions, and the balance, or deficiency, to above twenty-one millions and a half. [Mr. J. entered into a variety of statistical and arithmetical statements, which render a synopsis of his remarks impracticable in the short time allowed to prepare the paper for the press, but they will be published in full as soon as they are written out.] In the first place he argued from the foregoing statements, that the bill was indispensable, and next that it was a proper, legal, and equitable one, and not inconsistent with the intention, spirit, or letter of the deposit act of 1836, a measure which he also reviewed. In conclusion he said, that after long and patient investigation, he had become satisfied that the amount required to be set apart by this bill, was absolutely necessary, and he should therefore give it his cordial support.

The following is the substance of statements cited by Mr. J. as to the condition of the Treasury on the first of January next:

In the Treasury 1st January, 1838,	\$42,468,859 97
Increased this sum by subsequent returns	1,670,137 52
Receipts for first half year as per Secretary's report	13,187,182 00
Estimated receipts for last half year, including merchants' bonds	9,500,000 00
	66,826,079 49
<i>Expenditures made, and chargeable on the Treasury.</i>	
Three first instalments of deposits	\$27,063,430 80
Balance of third instalment outstanding	1,165,575 18
Expended in first half year	16,733,884 33
Estimated expenditures for last half year	16,000,000 00
For Florida war	1,600,000 00
Expenses of present session of Congress, say	500,000 00
Outstanding balance of appropriations chargeable on the Treasury	16,000,000 00
Fourth instalment of surplus revenue	9,367,214 00
	88,430,104 31
	66,829,079 49
Deficit on 1st January, 1838	21,603,924 82
Unexpended appropriations postponed to next year, but still a charge on Treasury	15,000,000 00
	6,603,924 82
Error in addition in Secretary's report	512,263 00

Deficit in Treasury on the 1st day of January, 1838, after postponing \$15,000,000 of unexpended appropriations, as above 6,091,661 82

Mr. ATHERTON followed on the same side, and contended that a sufficient case had been clearly made out in the report of the Secretary of the Treasury, requiring the passage of this bill. Mr. A. also replied to the remarks of several gentlemen who had preceded him. He insisted that the condition of the Treasury was such that the fourth instalment could not be paid without creating a loan for the purpose. He denied that it partook of the character of a debt to the States, or that it was so intended by the original framers of the deposit act. It was designed only as a provision for depositing a surplus, and that surplus an available one. No such surplus now remaining, the necessity of this act was rendered absolutely indispensable. He said that from what had fallen from gentlemen, who ascribed all the present embarrassments to the destruction of that institution, the issue had been proclaimed of the Bank of the United States or no bank; an issue that when once made before the people would be attended with the same result as on the former occasion.

Mr. FOSTER supported the amendment of Mr. PICKENS merely to postpone the payment of the fourth instalment till January, 1839, which offered a ground on which both the advocates and the opponents of the bill ought to meet. He was opposed to pass the bill postponing the payment indefinitely, because he held that it ought to be paid, though he granted and believed that the present means of the Treasury were exhausted, and that this payment could not be made without incurring a loan, or making a farther issue of Treasury notes than was contemplated by the bill reported from the Committee of Ways and Means. To withhold the payment altogether would be a breach of good faith; for the States regarded it as a donation, had treated it as such, and made a disposition for the forthcoming instalment. He repeated that he preferred the bill with the amendment; but even should the amendment be rejected, he could not, in the present embarrassed state of the Treasury, bring himself to vote against the bill without it. Mr. F. addressed the committee at length on the various topics embraced.

Mr. BRIGGS opposed the bill, on the ground that the non-payment would be a breach of contract between the Government of the United States and the States, independent of the inconvenience the latter would be put to from having made provisions for the investment of the money. Mr. B. argued this point for some time, when

Mr. MERCER obtained the floor, on whose motion the committee rose and reported.

The SPEAKER laid before the House a report from the Secretary of the Treasury, furnishing statements of the amount of unpaid duties accrued before the first half of the present year.

Also, a communication from the War Department, covering a return of the number of Indians employed in the military service of the United States since the commencement of the present Seminole war.

The above communications were appropriately referred; and then, on motion, The House adjourned.

#### IN SENATE,

Friday, September 22, 1837.

Mr. ALLEN presented a memorial from certain citizens of Ohio, praying that the national bank may not be rechartered; which was laid on the table.

Mr. WALKER presented a memorial from certain citizens of Clement county, in the State of Mississippi, against the recharter of the United States; which was ordered to lie on the table and

Mr. DAVIS presented a bundle of petitions, thirty in number, from women in Massachusetts, and two (also from women) from the State of Connecticut; which were ordered to lie on the table.

#### ORDER OF THE DAY.

The Senate then took up, in Committee of the Whole, the bill imposing additional duties on cer-

tain officers, as depositories in certain cases. Mr. CALHOUN'S amendment being under consideration—

Mr. TALLMADGE addressed the Senate in a speech of great length. He commenced by advertising to the relationship in which he stood to the President, who came from the same county with himself, and was the friend of his early political life, and the considerations, personal and political, that induced him to weigh well and to give serious and deliberate attention to all subjects coming from such high authority. He felt constrained to declare that the Message of the President had not convinced him of the efficiency of the plans proposed, and until his judgment was satisfied, he would never yield his assent. Mr. T. then went into a long argument to prove the Sub-Treasury scheme was fraught with incalculable mischief to the country. It was no new measure as was supposed. This scheme had been before the House of Representatives, where it had been amply discussed and was fully considered. The scheme was brought forward by an opposition member, and was treated as an opposition measure, though he must do the opposition the justice to say, that it did not meet with their united support, most of the gentlemen of that party believing it still more detrimental in its consequences than the plan submitted by the administration in relation to the deposit banks; and after all the efforts made to sustain it, there were but thirty-three votes brought to its support, as the journal of the House of Representatives would show. In what light were we to consider it now? So odious did it then appear, that it was denounced as an opposition measure, revolutionary in its character, wild in all its features, and calculated to bring the whole power of the Government to the footstool of the Executive, besides subjecting the Treasury to be plundered by faithless agents. These were the reasons then given for not adopting it; and he conceived them to be no less weighty now than they were then. It was said here and elsewhere, that the only practicable substitute for the Bank of the United States was the State institutions. He never believed that the State banks could do as well as the United States Bank; but they were the only substitute. According to the Message of President Jackson, they did the business better, and domestic exchanges were lower than they ever were before. After this measure had received the sanction of the whole party, and was lauded to the skies as a safe and salutary one, we are told the experiment has failed, and we must try another. How has it failed? This was the most extraordinary state of the times that had ever existed before, and might not exist in a century again. He would not go into the general causes; but he would say one great reason was, that confidence had been destroyed, and how had that been done? He would answer by the continue and incessant assaults kept up against the banks. No sooner had the warfare against the United States Bank ceased, than it was commenced against the State institutions, and carried on in the most barbarous and unrelenting manner. Confidence was the foundation, the sole prop of moneyed institutions, and when that was withdrawn, they could not but fail. The Treasury circular had been mainly instrumental in withdrawing that confidence. The moment the people had reason to believe that Government distrusted these institutions, and would not receive their notes in payment of public lands, that moment was their doom sealed! the consequence was inevitable; no banks could have outlived that order.

If the will of the legislative branch of the Government had been suffered to prevail in reference to a measure which had its origin in this body, (he meant the bill designating the funds to be received by the Government,) the present distress would not have come upon us. It had passed both branches of the Legislature, but the President had seen fit to withhold his sanction; and it was not until after that hope was lost—he would not say altogether lost, for it was still expected that when the present Executive came into power, that he would have rescinded the Specie circular. When he (Mr. T.) returned to New York, he went with the full belief that it would be done. The citizens said that, as the Pre-

sident is a native of our State, he will rescind that circular, and do all in his power to sustain its credit; they exclaimed, when he was sworn into office, "Now is the winter of our discontent made glorious summer by the son of York;" but they were disappointed. He would not attach any blame to the President; he might have had reasons, satisfactory to himself, for the part he acted, and he would not condemn him.

Mr. T. adverted to the panic in 1834, which he thought imaginary; but whether the dangers were imaginary or real, the same evils would have resulted, had not the Legislature of his State loaned her credit to sustain confidence, and prevent a suspension of specie payments. Such was the effect of this loan, that it restored immediate confidence, and it was never found necessary to use a single dollar of the six million proffered.

It was his firm belief, that if confidence had been preserved, the suspension would never have taken place. The banks had been charged with stopping for sinister purposes; but he spoke from his own knowledge, when he affirmed that they held out as long as they could. It was the alarm of the depositors that had caused the suspension, and not the run of bill holders. He was far from supposing that they had acted treacherously. If confidence were restored, he believed them as capable as ever of performing their duties to the Government and the people.

He would say, in reference to this divorce between the Banks and the State, that the phrase had been gotten up by designing and wary politicians. He knew that it was a phrase calculated to find favor with the mass of the people; but they had adopted it without looking at its consequences; without sufficient reflection and consideration. It behooved wise and discreet statesmen, however, to take care and look thoroughly into the scheme before they adopted it. He contended that this Sub-Treasury scheme struck at the very foundation of our whole credit system, and the prosperity of the country. A separation of the concerns of the Government from those of the people would be fraught with more mischief than could be brought about by the adoption of any other measure having reference to the finances of the country and all its most vital interests. It was in vain to tell him that if the bill under consideration should become a law of the land, it would not create two currencies. He would insist that the effect of it would be to establish one currency for the Government and another for the people; the better one, however, for the servants of the people, and the worst for the people. There was no escape from this position. The effect of the measure would be to prevent the people from having a better currency than they now had, and to isolate them from the Government. Instead of making the public officers a portion of the people, they were made their masters. He considered that there was great force in the argument of the gentleman from Virginia, (Mr. Rives,) that the consequence of a creation of a better currency for the officers would be to increase their salaries to the amount of ten or twelve per cent.; so that, in fact, they would be receiving that much more money than they were by law entitled to.

Mr. T. went on to argue that the amendment offered by the gentleman from South Carolina would be productive of a great many evils, and which he thought no man could well overlook. To say that the notes of specie paying banks shall be received in the payment of the public dues, was the same thing as saying that nothing but gold and silver shall be so received. Why? Because the very moment those notes are thus received, they are presented at the banks by the people, who may live in the neighborhood, for the specie, and the consequence of which was, that it would be withdrawn from the vaults of the banks and put into the Sub-Treasury. He insisted, then, that it would be better at once to say that nothing but gold and silver should be received, for that was really the practical effect of the measure. Let there be no delusion on the subject; let it be understood by every gentleman, and let it be understood by the community, that it was better for the banks, better for every one, that all the dues of the Government should be paid in gold and silver. There was no

half way about the matter; it was better to go on than to turn back.

He argued that one of the consequences of the measure would be to cripple the banks, to prevent them from furnishing that currency which they otherwise would do. "Preserve and regulate, but not destroy" was his motto. The moment the scheme should go into effect, that moment you crippled the banks in such a manner as to prevent them from affording those facilities to the business portion of the community, which they had been in the habit of receiving.

Mr. T. noticed many of the remarks of the Senator from North Carolina, (Mr. Strange,) and replied to them. He said he could not agree with that Senator that no warfare had been carried on against the banks. He believed that the effect of this measure was making war upon those institutions. He, however, knew that it was far from the President's intention, and that of many distinguished gentlemen, to break down the banking interest of the country, though such was the effect of the present bill. He argued that it was impossible to establish an entire specie currency in the country, and even if it were not, commercially connected as we now were with Great Britain, the adoption of such a currency would be greatly disadvantageous, inasmuch as we ought to have an eye to the kind of currency in England, and so act as not to give her an opportunity of profiting by our financial arrangements.

He contended that the banks in New York and elsewhere could not resume specie payments if the bill should be passed, without bringing about the most disastrous results. The moment the banks resumed payments their vaults would be drained, and they would be compelled to stop again. With regard to the exercise of Executive patronage in reference to this bill, he could apprehend no abuse of it, he confessed, on the part of the present Chief Magistrate, whom he had known from his earliest manhood to have walked within the bounds of strict constitutional limits. But, as we were now legislating for the future, it became us to be careful that we did not trust too much power to the presiding officer, who might happen to be a man of great ambition, and who would not hesitate to use the power vested in him in a manner prejudicial to the best interests of the country, and which might result in the complete overthrow of the Government.

Mr. T. having touched upon a great variety of other topics, concluded by saying: I look forward to the adoption of this measure with the most painful forebodings; and should it become a law, I shall be happy if the country and its institutions are not involved in one general calamity.

Mr. STRANGE offered a few explanatory remarks in reference to what he had said yesterday, for the purpose of correcting some unintentional misrepresentations which the Senator from New York (Mr. Tallmadge) had made.

Mr. TALLMADGE replied, that nothing was farther from his intention than to misrepresent the gentleman, and if he had misapprehended him, he regretted it, and stood corrected.

[At this point of the discussion a message was received from the President of the United States, by Major Van Buren, his private secretary; which was laid on the table.]

Mr. CALHOUN rose and made some observations in relation to the two measures now before the Senate. He contended that it would have to choose between them. If he understood the plan of the Senator from Virginia, (Mr. Rives) he said, there appeared to him to be an insuperable objection to its adoption. He proposed to receive the notes of all banks in discharge of the public dues, provided they shall resume specie payments by a given day in the year 1838; and all those banks which shall not resume by that period, shall be excluded. Now, a most serious question was presented for the decision of this body. We were, by this proposition, about to make a compact with the banks. It was an offer, an inducement held out, to them to comply with a certain requisition; and, if they should accept it, it would constitute an unlimited compact between them and the Government. The effect of the proposition was, to endorse the credit of the Government for ever upon

the notes of such banks as resumed specie payments by a certain time. He would ask the gentleman from Virginia, himself, whether he was willing to enter into such a compact. It could not be misconstrued. We were dealing with corporations, some of which were great and powerful, and we must be on our guard. What was the argument advanced here only the other day? Why, that the deposit act constituted a compact between us and the banks. He however, did not think so. But, even if it were, then how irresistible was the conclusion that the bill involved a perpetual compact with the banks. A consideration must be given in order to make a compact; and in this instance, a great sacrifice would have to be made. The Government was now holding it out; and when once made, honor, justice, every thing, demanded that it should be faithfully and religiously complied with on our part. Mr. C. proceeded to argue that the benefit of this compact would be enjoyed only by the large banks, which would combine together to obtain the prize held out to them, and to put down the little banks. In fact, the bill of the honorable Senator was, in effect, nothing more nor less than an offer to the Pennsylvania Bank of the United States to come forward and fulfil the condition. Now, that bank had the means of doing it, and this would be an inducement to it. In order to comply with the offer, it would be worth while for that institution to make a great sacrifice; ay, a sacrifice of millions! It has strong and powerful connections, not only in this country, but in Europe also, who would rally to its aid, and enable it to accomplish its objects; to resume specie payments, and to put down feeble institutions. Supposing that the bank should comply with the offer made by this bill, what would be our condition? Why, in my opinion, it would be the worst that could possibly be imagined. We should then have a bank of the United States, in the most objectionable form—in a local form, and combined with other banks. He would regard such a consequence as going far to destroy the liberties of the country, and it would create great discontent and heart-burnings among the people. It seemed to him impossible that gentlemen would prefer the Senator's proposition to his.

He was averse to using coercion towards the banks, to compel them to resume specie payments; for the consequence would be, to produce difficulties as great as those which had already taken place. The resumption of specie payments must be the work of time, and after the payment of our debts.

Mr. C. replied to the objections urged by Mr. RIVES to his proposition, in reference to its having the effect of creating two currencies; one of paper and the other of specie. He then asked what sort of a currency we had now? Was not the whole country flooded with currencies of all kinds; with shin-plasters of all sorts, sizes, and shapes? Nothing could possibly be worse. He said that the proposition of the Senator from Virginia involved a departure from the principles that gentleman contended for, and argued as being lost sight of in his (Mr. C's) own proposition. The principle of equality was not observed in it; and the consequence would follow that the people would be compelled to receive one description of notes, and the Government another. The large notes were for the rich, and the small notes for the poor. Mr. C. adverted to his own scheme, and added that he entertained very great doubt whether the Government could receive in the payment of its dues any thing but gold and silver, and notes issued on its own credit. He remarked that he had no confidence in the scheme of the Senator from Virginia, because he regarded it as inefficient. He concluded by answering some of the objections urged against the Sub-Treasury scheme. He maintained that the notes which would be issued would not produce any thing like the evils arising from the existence of so much paper as was now afloat, issued by an immense number of banks.

Mr. RIVES said: was it not extraordinary that the honorable Senator should have made the observations he had in regard to the character of the proposition which he (Mr. R.) had brought forward, when he himself had introduced a plan which was in direct opposition to, and in the very

face of, the resolution of 1816? His (Mr. R.'s) proposition, on the contrary, was based precisely on that resolution; and if it amounted, as the Senator had said, to the making of a compact with the banks, then, consequently, that was the character of the resolution. He contended that the proposition of the honorable Senator was a direct violation of the solemn compact (if it was one) entered into in 1816 between the Government and the banks; and which that gentleman played a conspicuous part in obtaining. He (Mr. R.) would say that if his own proposition was a compact, so was the resolution of 1816. He would have the Senator compare the terms of that resolution with those of the plan. He insisted that they were exactly of the same character. Precisely the same state of things existed then as now. The resolution of 1816 was passed to compel the banks to resume specie payments by a given day, and it had the desired effect, although a disposition had been evinced by some of those institutions, not to comply with the terms of the resolution. Mr. R. expressed his desire to establish by his bill a model of legislation for the States, and after repeating, that precisely the same state of things existed in 1816, as at present, he concluded by asking whether it would be in order to strike out the whole bill under consideration, and substitute his own for it.

The CHAIR said it would not be in order, until the question should have been taken on the proposition then under consideration.

[Here Mr. CALHOUN sent to the Chair the resolution of 1816, and directed the Secretary to read it and the proposition of Mr. Rives.]

Mr. C. said he wished this done, in order that the Senate might judge for itself, whether or not the proposition was in its terms like the resolution. Having been read—

Mr. RIVES said that, practically, he could not see any distinction between the resolution of 1816 and his own proposition. He was sure that the gentleman (Mr. Calhoun) would not accuse him of any design to favor the Pennsylvania Bank of the United States. He certainly had no such intention; and it was his opinion that that institution was not likely to be benefited by the adoption of his proposition. As he stated the other day, so he would repeat now, that the bank was not desirous to resume specie payments; that it would not and could not, on account of the commercial operations in which it had been engaged for the purpose of paying its debts. In his opinion, the bank was not in a condition to resume specie payments. He declared it to be his clear conviction, that the resolution of 1816 involved no compact; that the whole subject of it was left to Congress to act as they might deem proper.

Mr. CALHOUN explained what was the state of things existing when the Bank of the United States was chartered in 1816, and contended that Congress was perfectly independent of the State banks, and that there was no reason for holding out any inducement to them to resume specie payments. His colleague had stated the other day that he considered there was a compact between the States and the General Government, and that it was imperative on us to pay the fourth instalment of deposit to the States. Now, he (Mr. Calhoun) differed in opinion from his friend. Notwithstanding that the gentleman from Virginia, (Mr. Rives,) did not intend to favor the bank by his proposition, he (Mr. C.) thought that such was its tendency. Whatever might be the impression of the Senator as to this being a compact, he (Mr. C.) felt assured that the legal advisers of the bank would consider it a compact, and would establish that fact in the Supreme Court of the United States.

Mr. RIVES here made some remark (not heard by the reporter) which Mr. CALHOUN answered by saying that the immediate object of the resolution of 1816 was not to compel the banks to resume specie payments.

Mr. RIVES said that he recollected that the Secretary of the Treasury in 1816, stated in his report that it was an object of the highest importance that the State banks, which had suspended specie payments, should be induced to resume them. Mr. R. contended that the Senator from South Ca-

rolina had assigned no reason why the Bank of the United States would avail itself of the provisions in his (Mr. R.'s) bill. In the circular of the New York bankers, it was stated, that, from the information they had gathered, they entertained the opinion that the Bank of the United States must resume specie payments between the months of January and March. Now, where was the evidence that it would? Mr. R. went on to say that it was his firm belief, that if Congress would name a day when the banks ought, in justice, to resume, there would be no difficulty as to the sound banks resuming specie payments. Nothing had been said to convince him that the Bank of the United States would resume before the other banks. The probability, however, was, that they would resume about the same time.

Mr. CALHOUN said that the Bank of the United States held, at this time, a most remarkable attitude. He spoke of Mr. Biddle as being a very able financier; as distinguished for talent and ability, in that respect, as any other in this country, or in Europe. Mr. C. concurred with the Senator from Virginia, that the bank was not at present disposed to resume specie payments; and the reason was on account of its strength, having more credit than any other, and being capable of turning these times to advantage. Mr. Biddle knew what he was about. Pass the bill of the gentleman from Virginia, and we would very soon see Mr. Biddle change his policy. He would be glad to see that bill become a law, for it would go to increase his power immensely. Mr. Biddle's solicitude was lest a separation should be made of the Government from the banks. He knew full well that a Bank of the United States was now out of the question. Until a separation of the Government from the banks took place, the whole game would be in his hands. But while Mr. Biddle [concluded Mr. C.] struggles with great determination and fidelity for the stockholders of the bank, I am determined to struggle with no less zeal against that institution; for I believe the interests of the people are antagonistical to its existence; and I will resist the introduction of his bank in any form, as much so as I would resist the creation of a bank by the Government itself. I will do my duty, unguided by party attachment. I shall act as a Senator of South Carolina upon this important occasion, looking to the welfare and interests of my own State, and to the whole Union.

Mr. BENTON addressed the Senate, and, after concluding,

Mr. KING of Georgia obtained the floor, and moved an adjournment.

The Senate then adjourned.

FRIDAY, Sept. 22, 1837.

Petitions and memorials were presented by—  
Messrs. ADAMS, BRIGGS, PARMENTER, and LINCOLN, of Massachusetts.

Mr. SIBLEY of New York.

Mr. REILLY of Pennsylvania.

Mr. BEIRNE of Virginia.

Mr. Speaker POLK of Tennessee.

Mr. RARIDEN of Indiana.

INQUIRY IN RELATION TO THE FLORIDA WAR.

The House then proceeded to the unfinished business of the morning hour, which was the consideration of the following resolution, submitted by Mr. WISE on the 19th inst:

*Resolved*, That a select committee be appointed by ballot to inquire into the cause of the Florida war, and into the causes of the delays and failures, and the expenditures which have attended the prosecution of that war, and into the manner of its conduct, and the facts of its history generally; that the said committee have power to send for persons and papers; and that it have power to sit in the recess; and that it make report to the next session of Congress.

Mr. GLASCOCK had moved to amend the foregoing resolution by striking out all after the word "resolved," and inserting the following:

"That a select committee be appointed to inquire into the cause of the Florida war, and the causes of the extraordinary delays and failures, and the expenditures which have attended the prosecution

of the same, and all the facts connected with its history generally; and that said committee have power to send for persons and papers."

The question immediately pending, was the motion of Mr. Howard to strike out the words "That a select committee be appointed," and insert "That the Committee on Military Affairs be instructed."

Mr. BELL felt that when the opportunity occurred, he should not let it pass in addressing a few remarks to the House connected with the subject under consideration. He thought it apparent to every member of the House, and every individual in the country, that this subject required some attention and investigation. Some inquiry was demanded by the extraordinary circumstances connected with it. He cared not so much how the inquiry was instituted, provided it was instituted in such way as to bring to light the secrets connected with it, which had been withheld from the American people; he might say, the secrets connected with the weakness of the Government in carrying on this war. He had heard no gentleman object to this, or say that the investigation should not be had. Some gentlemen had said that the committee should be appointed in the ordinary way; that is, by the Speaker of the House. Here a question of some delicacy was presented. It was a difficulty which every gentleman was not willing to encounter; and the Chair was entitled to the forbearance of both parties in the House in reference to the appointment of the committee; because it was a matter of great responsibility, and one which every gentleman who filled the Chair, he believed, would be willing to evade if it could be done consistent with duty. He thought, however, that this question might be discussed without any delicacy. For several years past it had been the practice, and for a few years it had been more rigidly adhered to than formerly, to constitute the committees of the House in such manner as to give a preponderance in favor of the administration, or the party in power; but he did not know that it would be proper to charge this as a dereliction of duty on the part of the Chair, as it was only following out the democratic usage for some years back. He took it, however, that a more full and fair investigation might be had by raising the committee in the way proposed by the gentleman from Virginia, namely, by ballot. It was expected by the country that a proper and thorough investigation of this matter should be had without reference to party. But if the Chair is to make the appointment of the committee in compliance with usage, he would ask whether more was to be expected than had heretofore been received from investigating committees of this kind. We could not expect greater disclosures than we have received from former investigating committees, which have turned out generally to be complete failures. Now, under these circumstances, he would ask whether it would not be proper to relieve the Chair from the responsibility of making this appointment, because, in case of its failure, the odium would rest upon him of not having appointed a proper committee? The gentleman from Georgia, (Mr. Glascock) on a former day, had thrown out the suggestion, and again repeated it on yesterday, that it was proper that the Chair should appoint the committee, so that all the commanding generals engaged in the campaign might have a representative upon it. Now, he would take the appointment from the Chair for the very purpose of preventing these officers from having their friends on the committee, who might improperly favor some and censure others. He would give the appointment to the impartial sentiment of the House, to be exercised either by secret ballot, or *viva voce*, if gentlemen desired. He did not desire to have packed committees in favor of any particular generals, or of the administration. So far as he himself was concerned, he would not put a partisan of either of the commanding generals on the committee. He would have it constituted of men of business habits, but men who were not the personal friends of either of the officers who might sustain one and diminish the fame of other. He did not go for the inquiry, for the purpose of raising the character of any individual, but for the purpose of raising the character of the army itself and the na-

tion. He would vote for a committee without reference to party as a matter of policy, and he would not pack it either with administration or opposition men; but he would have it made up of men of character and standing before the country, so that the investigation might be impartial, and he looked upon by the country as impartial. He went for this mode of appointment of the committee, experiment as might be, and he would try the experiment to see if it would not lead to a good result. He again repeated that the investigation was demanded from the extraordinary circumstances of the case, and he would state the reasons why, in his opinion, it was demanded. It was an anomaly in the history of Governments of modern times, and much more so that it should occur in the nineteenth century of the Christian era, that this Florida war should cost nearly as much as the whole war of the revolution, when there have not been engaged in it, according to the estimate of the most discreet persons, over two thousand Indians and negroes, and according to the estimate of others not over 1,000. We have already expended nine millions or upwards, and are now asked for a million and a half more; and it is estimated, that from the number of claims which will be brought against the Government, in consequence of it, and the number of the forces now concentrating in that quarter, that it will cost before it is all settled twenty millions of dollars. Yet notwithstanding this extraordinary expenditure, we have never had the first message from the Executive on the subject; and the special attention of the House has never been called to the subject of this war. He looked upon it as extraordinary, that a subject connected with such tragical incidents and vast expenditures, should not have been worth the notice of a special Message from the President of the United States. Mr. B. then referred to the fact, that the Government was now concentrating a force of the regular troops of the United States, to the number of about four thousand men in Florida, for the purpose of commencing another campaign, and calling on the States of Kentucky, Tennessee, South Carolina, and Alabama, for volunteers; in addition to this number, which, in all he expected would amount to between seven, and eight thousand men. These troops, he presumed, were to march and countermarch after provisions more frequently than after an enemy. He contended that this was too great an army for the occasion, and stated that formerly that country had been marched through in pursuit of a superior enemy, by Tennessee troops, not exceeding two thousand in number. He contended that fault must lie somewhere, and he strongly suspected that it would be found in a great measure to lie with the imbecile condition of the national army, and the want of a sufficient number of officers, and in support of this opinion he referred to the condition of the troops at the battle of the Withlacoochee and Tampa Bay, about the time of the unfortunate affair of Dade's command. He went for the investigation, so that the country might know where the blame rested, and that the officers engaged in that campaign might have justice done them.

Mr. WISE begged leave to make a correction as to a matter of fact in the reports of the statement he made to the House on yesterday in relation to the occurrence in the committee room last winter which he had spoken of. It is stated in the report in the Globe, and it is substantially the same in the *Intelligencer*, that in speaking of his friend, Col. Campbell, of South Carolina, he had said that that gentleman had rose from his seat, locked the door of the committee room, put the key in his pocket, and swore that until the infamous falsehoods in that report were expunged, no one should leave the room. This (Mr. W. said) was a mistake in the reporter. He did not say that the gentleman actually locked the door, and put the key in his pocket. He stated that the gentleman turned to the door, and said that he would lock it, and would put the key in his pocket, if the offensive parts were not stricken out. Sir, said Mr. W. it was not necessary for the gentleman to lock the door; the threat was enough; it answered every purpose.

Mr. GHOLSON said that he, like the gentleman from Tennessee, (Mr. Bell,) and every other gentleman who had addressed the House, was in favor

of the investigation. He was in favor of the inquiry into every thing connected with the Florida war, but he wished it instituted in accordance with the usages and customs which had always governed this House. What was the object to be effected by the resolution of the gentleman from Virginia? It first proposed to have an investigation, and then proposed to have the committee composed of what he must here term the minority of the House, representing as they do the minority of the people of the United States; irresponsible, as all minorities were. Yet that gentleman wanted to have a committee composed of those irresponsible persons, to investigate that very important matter which had excited the interest of the country so much. He hoped the subject would be referred to the regular standing committee of the House, constituted for the purpose of taking charge of those subjects, and he trusted they would have no more such select committees as the two appointed at the last session of Congress. He had heard a rumor last spring in relation to the occurrence which the gentleman had on yesterday made public; but he had hoped, for the honor of the House of Representatives and of the American people, that it was untrue. But the gentleman from Virginia (Mr. Wise) had seen proper in debate to expose the secrets of the prison house, and lay before the world the details of a scene which he pronounced to be a disgrace to the Congress of the United States. Has it come to this, that a mere threat from a gallant South Carolinian shall have such an effect upon a majority of a committee of the House of Representatives of the United States, that they dare not present a paper which they had prepared as their report? If this was the rule by which committees were to be governed, he thought the gentleman might not have such scruples about sending the subject to the Committee on Military Affairs; for if the one member of the opposition should use a threat with the same effect which the gentleman has asserted the one in his committee was used, he would bring over the other eight to agree with him, or at least not to report in opposition to his views of right and wrong. He was much obliged to the gentleman from Virginia for this further evidence of the manner in which business was conducted before those select committees of the last session. Who ever heard in a deliberative body of a majority being told that the one who would dare to present a paper containing their views, would be held personally responsible; and that if he did not hold himself responsible, he should be chastised. Yet the gentleman who makes these disclosures wants another committee; and it was to be supposed, from the part he seemed to take, that he desired a committee this time who would not be required to be locked up in a room, and threatened with chastisement, to make them make a report in a particular manner. The gentleman from Virginia was not willing to trust to this committee being composed of a majority of the members in favor of the administration. If the gentleman cannot trust the majority of the House, who are responsible to the country, how can the majority trust the minority, who are irresponsible? Why not have a majority of the friends of the administration on this committee? He had heard no one oppose this investigation; not a single friend of the administration had raised his voice against it; yet the moment it was introduced, it called forth the most violent denunciations and philippics from the gentleman from Virginia, and all for the purpose of getting a majority of persons on his committee opposed to the administration; for he could see no other object which the gentleman could have in view than to get a majority of opposition men on it, who will report precisely in accordance with his declarations. In relation to the scene in the committee room, the gentleman from Pennsylvania, (Mr. Muhlenberg,) had told us that the paper never was read before the majority of the committee, until it was read in the room, and that the moment it was read, they stated they would not agree to it; yet not satisfied with this, the minority had to resort to threats to make them expunge their report in the shortest time possible. He considered that those scenes in these black holes of the Capitol would diminish the respect which the people entertained

for the Congress of the United States; and it was a lesson for them not to raise committees of this kind. It was the legitimate business of standing committees to investigate matters of this kind, and provide the proper remedy. We have heard a great deal about the clerk of the committee writing the report, and the insinuation that the majority were not able to write it. Now he looked upon it as an immaterial matter, as to who the scribe was that drew up the report, when the materials were furnished by the majority of the committee, and they adopted it as their own, and were responsible for the facts. It only showed, however, that there was a party in the House who laid claim to all the talent and all the decency. As to what would have been the fate of the report of the minority, that is the report of the gentleman from Virginia himself, if it had been read in committee, and the members of the majority had been as courageous as the gallant South Carolinian, we know not. It is possible that the power of a threat might have operated somewhat on that report.

Mr. LINCOLN stated that the report of the minority of the committee was read in the committee room in presence of all the members, and signed by the three members of the minority.

Mr. GHOLSON only spoke on authority of the gentleman from Virginia. He had stated that his report was not read in the committee room, and it was of his report that he had spoken. Mr. G. would support the motion of the gentleman from Maryland to send the subject to the Committee of Military Affairs. Although he was a member of that committee, he did not know what were the sentiments of its members, as they had had no matter referred to them at the present session, and had held no meetings. He then replied to the remarks of the gentleman from Massachusetts (Mr. Cushing) in relation to the sympathy which that gentleman had expressed for the savages of Florida, and the denunciations he had made of the course of policy pursued by the Government, and pointed out the extraordinary difficulties and disadvantages under which our troops had labored in that country, and concluded by saying that all he asked was a fair and impartial investigation of the matter.

Mr. CAMPBELL said he should not have arisen to address the House, had not allusion been made in the debate upon this subject to a gentleman to whom he bore a near relation. [He alluded to Gen. Campbell of South Carolina.] He did not rise to defend that gentleman, because he required no defence; but he would now state to the House that he believed that gentleman entertained the most kind feelings towards all the members of the majority of the select committee of the last session, and he imputed no dishonorable motives to the majority in consequence of the report referred to. He had heard that gentleman speak of the members of the majority of that committee in the highest terms. Mr. C. sincerely regretted that this unpleasant subject should be introduced before the House, and he hoped it might not again be alluded to, unless it was relevant to the matter under debate. With regard to the resolution, he hoped the inquiry might be had, but he was perfectly indifferent as to the manner in which it should be had. He cared not whether the object was attained through a select committee, or through the regular standing committee of the House. Our generals in Florida had not added to their laurels any of the evergreens which bloomed in that southern clime; but this was attributable to the nature of the country, and the description of the enemy. The country is without roads and without provisions, and it was unjust to attribute the failures of that campaign either to the generals, or to the gallant men who served in those campaigns, or to the late administration of the General Government. In justice to those distinguished commanders—in justice to the late administration—and in justice to the gallant men who perilled their lives in this service, this investigation should be had. The people require it, the national honor requires it, and the world should know why it was that a small and naked band of savages had been enabled so long to resist the power of the

American army. The people of the southern country should know why it was that they were so constantly called upon for volunteers and drafted men to march on this unpleasant service. The mechanic should know why he had been called from his workshop, and the farmer from his plough, at an unseasonable time, to the loss of his crop, to pursue over the barren sands and through pestilential marshes of Florida—perhaps to fall a victim to disease, and perish an inglorious victim to that insalubrious climate, or perhaps to return toil-worn to his impoverished family. It is true, that the enemy are too weak and contemptible to excite any thing like a national feeling; but still the Seminoles, from their long stand for their independence, must excite the sympathy of every honorable bosom. They, however, cannot remain in independence, even admitting that they could make the Withlacoochie their boundary; and their only safety is in removal west of the Mississippi. Let them execute their treaty, and remove beyond the contamination of the white men, and there is still before them a future which may be a future of happiness to those unsophisticated children of nature. He trusted the result of this investigation might lead to a termination of this war, which had cost the Government much money, and been the means of the loss of so many valuable lives.

Without taking the question, the House, on motion of Mr. CAMBRELENG, proceeded to the orders of the day; and on motion of the same gentleman, went into Committee of the Whole on the state of the Union, Mr. HAYNES in the chair, and resumed the consideration of the bill to

#### POSTPONE THE FOURTH INSTALMENT WITH THE STATES.

The question pending was on the amendment of Mr. PICKENS to strike from the bill the indefinite clause "till further provision by law," and insert "the first day of January, 1839."

Mr. C. SHEPARD took the floor, and opposed the bill, on the ground that the thirty-seven millions of surplus actually belonged to the States the moment the deposit act was passed. He granted there was a deficit, but this offered no justifiable reason for withholding the payment. In reference to the deposit act itself, he held it to be constitutional, at least as much so as depositing the public money in the State banks; and said, if he had been a member of the last Congress, he should have voted for giving the whole of the surplus absolutely altogether to the States. Admitting a deficit, the question arose, how the payment should be made. He thought there was no difficulty on that head. The debt of the Bank of the United States might be sold in Europe, or the payment might be met by reducing the salaries of the officers of the Government which had been raised last session, and by restricting a number of extravagant expenditures. In reference to the report of the Secretary of the Treasury, he said that if a Chancellor of the Exchequer in England had presented such a document, it would have been scouted and hissed out of Parliament. Mr. S. ascribed all the embarrassments to the measures of the late administration, but said he should enter more at large into the subject when the other bills came up for consideration.

Mr. SIBLEY also passed some strictures upon the report of the Secretary of the Treasury, opposed the bill, and said the first great question to be decided was, what are the obligations resting upon the Federal Government in the relation it stands to the sovereign States of the Union? The subject, it appeared to him, had been, so far, too much considered as if the Federal Government alone was interested in a wise and just conclusion of the question. Now were they bound to fulfil their obligations? and, if so, means ought and must be found, at all events, to conform to those obligations. The faith and honor of the Federal Government were involved in this question, and bound to the several States for the performance, in good faith, and to the utmost spirit of the engagement, for which the act of June, 1836, was the basis. That act he reviewed at some length. He conceded that that statute did not establish a contract, but it was a proposition for a contract from one party, which, if acceded to by the other party, became part and par-

cel of a contract. This had been done in the present case by the States consenting to take upon themselves the obligations of the act, and that assent of theirs made it at once a valid and binding contract, the provisions and requirements of which the Federal Government was bound to fulfil. On this point Mr. S. dwelt at length, and cited a number of precedents in proof of the validity of this contract. He replied to the objection that it had been given without consideration, by adverting to the charge and trouble it involved. In one form or another, it had already cost the people of the State of New York alone above two hundred thousand dollars, independent of the labor and trouble, and the pledge of their faith, for its safe keeping. It had, therefore, all the legal, technical forms of a contract. Moreover, the States had, in consequence, made contracts with their citizens, which contracts they would comply with, whatever might be the loss or inconvenience. He insisted that the question of impairing the contract was not one which ought to be considered by the General Government, for it had no right to prescribe what a sovereign State should do. Hence they had no power to pass a law to withhold this payment. He believed, however, the Government was in a condition to pay the money, for it was not improbable but that the States would receive orders on the deposit banks, and good faith and honor demanded that they should pay it.

Mr. CUSHMAN said, considering the position he occupied at the last session, on this very subject, he hoped the committee would indulge him with making a few remarks. There had been a great number of very ingenious arguments already offered to the consideration of the committee, and he was more and more impressed with the belief that honorable gentlemen who had addressed the committee lost sight of the main question at issue, and entirely mistook the spirit, and meaning, and intention of the deposit law; and it was in consequence of mistaking the spirit of that law that they had been suffered to range into so wide a field of debate on what he considered an erroneous issue. It had been, time and time again, asserted, that that law was a contract, an obligation from which the United States were not at liberty to depart. That it was a contract that could be enforced, and legally enforced. He disagreed altogether from this position. He did not go upon technicalities, but on a higher principle—as much higher as heaven itself was higher than the earth, he meant the moral one. It was upon that ground he originally voted upon this question. It was because he could not bring himself to believe that Congress had any right to deposite the surplus revenue of this Government with the several States of the Union.

Now was this law a contract as had been alledged? Did it partake of any of the features of a contract? No. It was a mere gratuity; a gratuity which was not the basis, and which could not be made the basis, of a contract. Why, supposing one individual should say to another, that he would make him a donation by a particular time, and something should intervene, some calamity, disappointment, or the loss, perhaps, of the very thing he promised to give, would any one contend that that promise formed a legal, binding contract? No. Would any one pretend that it formed a moral obligation on the part of him who promised to give? No. There was not a gentleman upon that floor, he apprehended, who would make that assertion.

He put another case. Supposing one individual should say to another, "I have the sum of \$50,000 now in hand, or soon will have in the hands of an agent of mine, for which I have no use. It is at present of no sort of benefit to myself. I, as your friend, will let you have the use of it until I call for it." Then supposing the money to be paid in four instalments of one, two, three, and four months, and he got the first three instalments, but the one who promised the money is overtaken by an unforeseen calamity; his property engulfed in a flood, or fire consumed his dwelling, he would have a use for that money, or some of it instantly. Let me ask (said Mr. C.) if that individual were to go to his friend, and tell him "It is true I agreed to

hand over to you \$50,000 for your use and benefit, till I should want it, but I am visited by a calamity, and I cannot do without this sum?" I ask, sir, (said Mr. C.) if he would have the hardihood to look his friend in the face, and say that that friend was under a moral obligation to give him the money? No, he would blush to make a charge of that sort.

Now let him bring to the attention of gentlemen what he considered a test question upon this subject. In passing the law of June '36, what did Congress say to the several States of the Union? Why, that they had a surplus revenue which they had then no use for, and they offered it to the several States for their use and benefit, until they should be under the necessity of calling for it, or until they wanted it. It was under these circumstances, and these circumstances alone, that the deposit act was passed. He put another case: Supposing that, on the first of January, 1837, when the amount of the surplus in the Treasury was ascertained to be upwards of thirty millions, on the very next day the whole of that sum should be annihilated, what then? Why, forsooth, according to the argument used in that House, according to the declarations they had heard repeated over and over again, the United States would be bound, *legally bound*, say some gentlemen, to borrow money to make the deposit; ay, they go further, and say they are morally bound to contract a debt to deposite money! Mr. C. entreated gentlemen not to do this. He implored gentlemen not to incur a debt, not to tax the people, for the purpose of raising money to deposite with the States. Would an individual borrow money for the sake of depositing it in a bank, or in any other institution? Assuredly not. Mr. C. denied again that the act partook of the nature of a contract, and concluded by saying that it would be no breach of honor or good faith to withhold the payment of the fourth instalment.

Mr. HOLSEY went into a minute examination of the state of the Treasury, in order to show that there would be an excess of expenditure over the income of the present year, and that there would be no surplus remaining in the Treasury at the end of the year. Mr. H. said he had read the Report of the Secretary of the Treasury, which had been so much animadverted upon, and believed that if there was mist (as it was asserted) any where, it was in those minds who had not understood it, for it was certainly not in that document. He would venture to say, that if that report was submitted to a tribunal of foreign ministers of finance, they would pronounce it as plain, clear, and lucid a document as had ever been written on the subject. But the Secretary of the Treasury had himself divested it of all obscurity, by leaving out every technical phrase; and Mr. H. would venture to assert, that in less than twelve months from this time there was not an intelligent farmer in the whole country who would not comprehend it.

Mr. H. then entered into a variety of statements in support of the propositions he assumed. The result on the first point showed there would be, at the end of the year, an excess of expenditure over the means of the Government of somewhere about twelve millions of dollars. He then examined the proposition for borrowing money to make the fourth payment, and showed how contradictory it was to the intent of the framers of the Constitution to raise money for such an object. In reference to the deposit act, if a contract, it was a contract based alone upon the distribution of an existing surplus, not wanted for the ordinary or extraordinary expenditures of the Government. The structure was reared upon that rock, and was so understood at the time the statute was enacted. The money to be distributed was out of a surplus fund. Where was there a surplus fund. There was none. Therefore there was no obligation on the part of the Government to carry out the provisions of that act. The surplus being gone, the obligation to distribute went with it; and now, were they to tax the people for the purpose of raising a fund to pay out this surplus, or pretended surplus? Was such an exercise of the taxing power ever contemplated by the framers of the Constitution? It was not, nor would the people sanction it.

As to the power of Congress to pass such a bill

as the one under discussion, he had no doubt, for he held that one Legislature had the power to repeal the acts of the preceding one, no matter what rights had been given under it, except the right of property. Some gentlemen contended that the surplus was a gift to the States. But he contended that there were not the slightest grounds for such an assumption. One gentleman had said that the States had acquired a right to it, as a matter of equity. Why, he might as well contend that an individual to whom had been loaned a sum of money, had acquired a right to keep it, from that fact. Had the people in 1836 understood the bill to be otherwise than a deposit act, it would never have passed? No member would have dared to go home to his constituents, and tell them that he had voted their money out of the Treasury, and given it to the people. The people of Georgia would spurn the idea of receiving the money under such circumstances. He had no desire to contaminate his fingers with a fund which had been drawn from the people without any necessity.

Mr. FAIRFIELD, of Maine, addressed the committee as follows: Mr. Chairman, it is with great reluctance that I ever rise to say any thing upon this floor, and that reluctance is increased at the present time, by the reflection that so many gentlemen distinguished for their talents and eloquence have preceded me in this debate. But, sir, I feel impelled by a sense of duty which I cannot overcome, to present my views very briefly to the committee, however far I may fall behind other gentlemen, either in the matter or in the manner of presenting it.

The gentleman from North Carolina, (Mr. Shepard,) who has just given us a very handsome speech upon this subject, commenced with an eulogy upon the deposit act of 1836. Sir, I cannot agree with that gentleman as to the character of that act, either as to its expediency, or the principles involved in its passage. Its tendency to lessen the dignity and independence of the States, by rendering them, to some extent at least, dependants upon the bounty of the General Government. Its covert and insidious introduction of an erroneous and dangerous principle into our system of legislation—the right of taxation for purposes of distribution. Its tendency to keep up, if not to raise a high tariff. The inequality in its ratio of distribution, being directly at variance with the principle of taxation recognised in the Constitution of the United States. These, to say nothing of numerous other objections to the act, stamp it with a character very different, to my mind, from that bestowed upon it by the gentleman from North Carolina. Sir, I voted against its passage, finding myself in a small minority of forty-one upon that occasion. My position was then taken after I had brought to the subject the best lights of my understanding, with the sincerest desire to learn what was true and to do what was right; and I have never seen cause to regret the result to which I was brought, nor has any thing since occurred to change, in any degree, my views of the law alluded to. Its reception by the citizens of my own State, and its operation there, certainly were not calculated to produce that effect. There was, I believe, but one voice among the democracy upon that subject. At all events, it was so in my own district. If gentlemen say that the late election in Maine indicates a change of opinion, I answer that this question, so far as my knowledge extends, was not involved in any way in the late political contest; and I will add that an election took place a few months after the passage of the law, and in my own district, at least, a most emphatic approval of my vote was given by the people. But, in passing, let me say one word upon the subject of our late election, as some gentlemen seem disposed to introduce it here, and to make it a matter of triumph, particularly the gentleman from Pennsylvania, (Mr. Biddle.) Let me tell gentlemen that it may yet appear that they have been "halloing before they were out of the woods." The news of our defeat comes from an opposition course, and, in the course of my short experience, I have generally found the first accounts coming from that quarter to be inaccurate; and I feel justified in this remark by the general

incredulity which is now manifested by all parties in regard to these accounts from Maine. It may be, however, that we are beaten; but if it should so prove, and gentlemen are rejoicing over a *permanent change* in the politics of the State, let me say, "lay not that flattering unction to your souls." The election, if lost, has been lost by a combination of personal and local questions and interests, not involving the great political questions of the day. Maine is essentially democratic, and the democracy will yet rise in their strength, redeem the State, and effectually throw off any odium that may have been incurred in the late contest. Yes, sir, "the star in the East," though its lustre may now be dimmed, will yet shine forth with renewed and increased effulgence.

But to return to the pending question, I need not say that being opposed to the original act in its inception, and in all its subsequent stages and processes, I am of course in favor of the bill now proposing the postponement of the payment of the fourth instalment. But it is said by several gentlemen that we cannot lawfully withhold this instalment. That the States have acquired a *vested right* in it, by virtue of a contract. Sir, I had thought that the doctrine of vested rights had become sufficiently odious through the indiscreet use of it by its friends, without attempting to apply it to this case. The gentleman from Massachusetts (Mr. Briggs) has labored to show that there is a contract between the States and the Government of the United States, and upon the establishment of that point, seemed to consider the right of the States to the instalment as clearly made out. Now, sir, does one follow the other? It appears to me not. If it be a contract, the next inquiry is, what are its terms, and is it a binding and valid one? And for the purposes of this argument, it may be admitted to be a contract. All bailments are contracts. This is one kind of bailment, and, therefore, a contract. It falls within that class of bailments, technically denominated in the law "deposit," which is the bailment of a thing by one to another, to be returned when the bailor calls for it. By this, the bailee acquires no right or title in the thing bailed, or to its use, but is bound to restore it when called for.

On the part of the United States this bailment of money to the States was merely *gratuitous*; and there was no such consideration in the case as to render the contract a legal and valid one. But it is said there was a promise on the part of the States to pay back the money, and this constituted a good consideration. Sir, as well might I set up a legal claim to my neighbor's horse—say, to a *vested right* in him, because my neighbor, in the exercise of a spirit of courtesy and kindness, said I might have the use of his horse at any time, *on my promise to return him*. But the gentleman from New York (Mr. Sibley) has undertaken to show that there was a good consideration upon strict common law principles, and has quoted from the old books the definition of a good consideration to be, "a charge or trouble to one party, or a benefit to the other;" both of which, he says, exist in this case. The States, it is said, incurred charges and trouble in receiving and keeping this money, and the General Government derived a benefit in having it kept for them. Sir, I must confess I was not prepared to hear such a position as this taken. Can it, in any sense, be said to be a *charge or trouble* to a State to receive a large sum of money, and use it for an indefinite period without paying interest for it? If so, I know of a great many people who would like to be *troubled* in the same way; and I cannot say that I should have any very serious objections to it myself. Again: how can it be said, in any proper sense of the term, that the United States Government derive a *benefit* from the transaction? Just look at the facts. The Government have a large surplus, which they do not want to use, lying in the deposit banks, and for which the Government is drawing interest. This surplus the Government withdraws from the banks, and deposits with the States, to be kept by them *without the payment of interest*. And this the gentleman from New York calls a *benefit to the United States Government*! Sir, I cannot conceive of a more palpable perversion of our mother tongue.

But, to strengthen his position, that the charge or trouble incurred by the States constitutes a good consideration, the gentleman from New York goes on to show how the Government of his State disposed of the money after it was received, and how various expenses were incurred. Sir, is this a legitimate and proper mode of construing a contract, or for ascertaining whether there be a legal consideration or not upon which it is founded? I think not. A contract, illegal or invalid at the time of its creation, cannot be purged of its illegal qualities, and made valid by any thing which may subsequently be done by either party.

The gentleman from New York has also urged upon us, in an eloquent and forcible manner, the moral obligation which it is said we are under to pay over this fourth instalment. Upon this point, however, I will not occupy the time of the committee, as it has been fully and ably replied to by others. At the best, for those taking this ground, there may be said to be conflicting claims upon the same fund. That of the Government, to carry on its necessary functions and operations, and that of the States, as borrowers without interest. Which of these claims is paramount, I will leave for each member to decide for himself, constituting as he does an important part of the Government itself.

But again, in relation to the construction of this alleged contract, it is said by the gentleman from Massachusetts, (Mr. Briggs) and others, that this money deposited with the States cannot be called back, except in the mode prescribed in the proviso of the 13th section of the deposit act; that is, in sums not exceeding \$30,000 per month. If this position be correct, then this law is not what its title imports, a *deposit* law, but is, in fact, with regard to some of the States, at least, a *distribution*. In New York, for instance, the amount thus drawn would amount to only about the legal interest on the amount deposited. So that, in about seventeen years, the claim of the United States will have become entirely satisfied, while every dollar of the principle will remain untouched in the hands of that State. Now, was this the intention of those who enacted this law? No, sir. Its friends repelled the charge that it was distribution in disguise, and strenuously maintained, while the bill was undergoing discussion in this House, that it created a *deposit* merely. Such also is the title of the bill. But if the construction of the gentleman from Massachusetts obtains, then this law is made what its framers never intended it should be, and will make the title as perfect a misnomer as can be conceived. Under this view, therefore, I contend that the construction sought to be fixed upon this law is incorrect, and cannot be sustained. What, then, is the true contract between the parties? The gentleman from New York (Mr. Sibley) says that the statute constitutes the contract. It appears to me to be otherwise. The statute, I admit, *prescribes the contract*, but nothing more. This contract is to be *in writing*, and its terms are set forth in the statute. What are they? The language of the statute is as follows:

"Be it further enacted, That the money which shall be in the Treasury of the United States, on the first day of January, 1837, reserving the sum of five millions of dollars, shall be deposited with the several States in proportion to their respective representation in the Senate and House of Representatives of the United States, as shall, by law, authorize their Treasurers, or other competent authorities, to receive the same on the terms hereinafter specified, and the Secretary of the Treasury shall deliver the same to such Treasurer, or other competent authorities, on receiving certificates of deposit therefor, signed by such competent authorities, in such form as may be prescribed by the Secretary aforesaid, which certificates shall express the usual and legal obligations, and pledge the faith of the State, for the safe-keeping and repayment thereof, and shall pledge the faith of the States receiving the same, to pay the said moneys, and every part thereof, from time to time, whenever the same shall be required by the Secretary of the Treasury, for the purpose of defraying any of the wants of the public treasury beyond the amount of the five millions aforesaid." Here, so far as regards the terms of the contract,

which is to be in writing, the statute stops. The States are to pay back, not in sums of \$10,000, or \$20,000, nor at any particular times, but in any sums, at any times, whenever the Secretary of the Treasury shall require it. To be sure, in a proviso to the law, the Secretary of the Treasury is prohibited from calling back the deposits except upon notice of thirty days, and then only in limited amounts. But with this the States have nothing to do, any farther than they are indirectly benefited by the regulations imposed by the Government for its own purposes. This proviso does not constitute a part of the contract, but was a restriction imposed by Congress upon the Secretary, who, they had reason to believe, was hostile to the law, and, they perhaps feared, would call back the deposits more rapidly than they might deem necessary.

But I do not take this ground, sir, because I am in favor of calling this money back from the States, so far as the deposits have been made. And here I differ with the gentleman from Georgia (Mr. Holsey) who has just taken his seat. I do not believe a vote can ever be obtained for calling it back; and, with my present views, I should not be willing to be instrumental in effecting that object. The mischief has been done, and it cannot be remedied by insisting upon a repayment of the money.

If my views of the legal rights of the parties to this contract be correct, then the only question is, whether it is *expedient* to withhold the payment of the fourth instalment. And, in regard to this question, I cannot conceive how there can be two opinions, except as between those who hold that a national debt is a national blessing, and those who hold otherwise. For we are shown, most clearly, in the report of the Secretary, that there will be a deficit in the Treasury if this instalment be paid to the States. I know that gentlemen talk about this report being a Cretan labyrinth that they cannot understand how there is to be any deficit; that they are in a mist and cannot see clearly. Sir, is the Secretary to blame for this? If gentlemen are groping their way in the mists of error, let them make haste to reach those elevated grounds, where the clear sunlight of truth will chase away all mists, and enable them to see clearly. The report of the Secretary appears to me to state the facts in a manner perfectly clear and intelligible, so that he who runs may read. These facts have also been placed before us in different modes by the gentleman from Virginia, (Mr. Jones,) and by the gentleman from Georgia, (Mr. Holsey,) all arriving at the same result, and showing, most conclusively, that if this instalment be paid over, there will necessarily be a deficit in the Treasury. The only question then is, whether we shall resort to a loan to raise money for the purpose of depositing it with the States. Sir, what would be thought of the man who should hire money from one bank for the purpose of depositing it in another *without interest*? Would he not be regarded as a fit subject for an insane hospital? And why should we not be exhibiting a similar spectacle, by refusing to pass this bill, and resorting to a loan to raise money for deposit with the States?

In every view which I can take of this case, it seems to me that a postponement of the payment of this instalment is called for by every consideration of common sense, prudence, and patriotism. But shall the postponement be indefinite, as by the bill, or to January, 1839, as proposed by the amendment? Sir, I prefer the bill without the amendment. We are told here of the disappointments to which the States will be subjected by withholding this money; how it will thwart their plans and multiply the troubles which are already sufficiently abundant. I ask, then, if we should not by adopting the amendment be probably subjecting the States to the same disappointments and troubles over again. If we fix a definite time when the instalment is to be paid, will not States go on as heretofore, laying their plans, and arranging their affairs in correspondence with such holding out on our part? And if so, will they not be destined to disappointment? For one, sir, I trust that such a policy is to be pursued that we are to have no more large surpluses; that the people are no longer to be taxed that Gov-

ernment may be enabled to return to them again the amount thus levied, deducting a large proportion of it for expenses, losses, etc. The gentleman from North Carolina, (Mr. Shepard,) regrets the disagreeable scrambles that have been witnessed for appropriations for internal improvements in the States, and yet is in favor, as it seems to me, of a policy whose necessary tendency is to renew those scrambles. Go on with your system of division, and you directly and powerfully strengthen the motives to create a surplus; and whenever there is a surplus, there will be witnessed a disagreeable scrambling for its possession. Sir, I dread a surplus nearly as much as I do a national debt. Neither of them are compatible with the interests of our people. The one imposes taxes, and often very unequally, to pay interest and the salaries of a horde of petty officers; while the tendency of the other is to corrupt all the streams of legislation, and to generate a low and mercenary spirit among the people. I would then avoid them both. Let the Government be administered in plain republican simplicity and economy. Let no more money be abstracted from the pockets of the people, either directly or indirectly, than is wanted for this purpose; and let the States preserve their dignity and independence, by relying upon their own resources for internal improvements or other objects, instead of being humble supplicants for the bounty of the General Government. But, sir, I have detained the committee much longer than I had intended, and will now close, thanking them for the attention which they have given me.

Mr. PARKER said it had not been his intention to take any part in the discussion of this bill, and he should not now do so, if he had not learned from the remarks of his colleague, (Mr. Sibley,) that some of the delegation from the State of New York entertained on this subject sentiments very different from his own. He therefore considered it a duty he owed to his constituents, as well as his colleagues, to state briefly to the committee the reasons that would induce him to vote in favor of the bill.

It has been said, Mr. Chairman, by the honorable gentleman from Tennessee, (Mr. Bell,) that this measure has originated in a settled hostility to the deposit act of 1836. I do not know, sir, what facts within the knowledge of that gentleman may have led him to that conclusion, but I am bound to say no such inference can be fairly drawn from the history of the deposit act, or of the bill now under discussion. That act was passed on the 23d of June, 1836, and during the whole session which intervened between that time and the present, no effort was made by the administration or its friends to repeal any portion of it. Since the close of the last session, the revulsions and pecuniary embarrassments, so prevalent throughout the commercial world, have reached even the finances of the Government. The revenue arising from duties has been greatly diminished, and the sales of public lands lessened. The Treasury has become nearly exhausted, and we are expressly told by the Secretary of the Treasury in his report, that the funds in the Treasury on the 1st October next will be entirely insufficient for the payment of the fourth instalment under the deposit act. Such is the state of the finances of the United States, that the Secretary of the Treasury finds it necessary to recommend the issuing of Treasury notes to meet temporarily the expenses of Government. With all these facts before me, sir, I am led irresistibly to the conclusion, that the measure originates from the actual necessity of the case, and not from any hostility to the deposit act. Whatever may be the fate of this bill, therefore, the fourth instalment cannot be paid. There are no funds to meet it.

But it is said by some honorable members of this committee, that it is the duty of Congress to authorize a loan for this purpose. I admit this is the only alternative; and the consideration of this proposition involves questions of a most grave and important character.

In the first place, it is very doubtful whether Congress have power to borrow money for such a purpose. The eighth section of the Constitution

gives to Congress "the power to borrow money on the credit of the United States." Taken in connection with the tenor of the other provisions, it seems fair to infer the true construction to be, that money may be borrowed to pay the debts, and provide for the common defence and general welfare, of the United States. It cannot be supposed that the framers of that instrument intended this power should be exercised in the manner proposed—that money should be borrowed—that a national debt should be created, for the sole purpose of depositing the money with the States. A strict construction of that instrument would hardly warrant such an inference.

But, sir, even if such a law were not unconstitutional, it would be a precedent entirely new, and in my opinion, of the most dangerous tendency. The act of 1836 only proposed that a surplus *actually in the Treasury* should be deposited with the States. A very different question is now presented. We are now asked to go a step farther, and *borrow money* for that purpose. To borrow money and pay interest on it, and loan it to the States without interest. If nine millions may be borrowed by the General Government for such a purpose—if this principle is once established by such a precedent—loans for hundreds of millions may yet be effected for distribution among the States. Sir, this would be an alluring bait—a golden prize. It would endanger the independence of the sovereign States. It would place them in a situation of dependence on the General Government incompatible with their true interests, if not with their separate existence; and these immense debts of the General Government could only be paid by an excessive tariff, or by other direct or indirect taxation of the people.

But it is said by some, that withholding this instalment is a breach of contract; and by others, that it is a violation of good faith towards the States. On this point, Mr. Chairman, I am compelled to dissent entirely from the honorable gentlemen who oppose this bill. There is no debt existing from the General Government to the States. The act authorized no distribution of money—it was merely a deposit. It is so expressed in the act of 1836; it was so urged by its supporters at the time; and it was so recognised in the acts of the Legislatures of the several States by which their consent was given to the acceptance of the deposits. It has been said by my colleague on my left, (Mr. Sibley,) to be a rule of law, that where an arrangement is made of such a nature as affords a benefit to one party, and imposes a burden or trouble on the other party, there is a good consideration, and a valid contract is created; and he applies this doctrine to the case under consideration, by saying that the General Government were to enjoy the benefit of having their funds kept safely by the States, and the several States were subjected to the trouble of taking charge of, and loaning out, the money; and he proceeded to say, that the State of New York had expended nearly two hundred thousand dollars in passing the act of acceptance, and in paying the expenses of loaning the money to the different counties of that State. If, sir, this common law doctrine is correctly stated, it cannot be applicable to the case under consideration. The General Government derive no benefit from the transaction, for they receive no interest on the sums deposited; and the State of New York will complain of no trouble imposed, when the interest which it actually enjoys on the sum already deposited with that State, amounts annually to nearly double the sum alleged by the gentleman to have been expended.

No agreement has been made between the General Government and the States, except in regard to the money already deposited; and, on receiving that money, the States severally agreed to refund it whenever required by the Secretary of the Treasury. No act has yet been done by the States by which they hold themselves responsible for the fourth instalment. They have only signified their willingness to accept it; and if the condition of the Treasury is such that the deposit cannot be made, there is surely no contract broken—no violation of good faith.

But admit for a moment that there is a contract, a substantial contract, invested with all the legal forms, and three-fourths of it executed on the part

of the General Government. If the fourth instalment can only be paid by committing a palpable violation of the Constitution, or by a disregard of principle, which would endanger the safety and welfare of the States, as well as of the General Government, such a contract would be void by the well settled rules of law, as well as by the acknowledged principles of justice.

In the course of this debate it was said by my colleague on my right (Mr. Foster) that postponing the fourth instalment will operate more injuriously upon the State of New York than on many of the other States. I have great reason to doubt the correctness of this conclusion; but I should undervalue the patriotism of the people of my State if I supposed they would not cheerfully submit to inconvenience under such an emergency. I know my own constituents too well to believe that they will expect their representative on this floor to vote for a measure fraught with so much danger.

On the 31st day of July last, a circular was issued by the Comptroller of the State of New York, stating that he had made arrangements to borrow money from the Erie and Champlain Canal fund to supply any deficiency that might exist in case of the non-payment of the fourth instalment; and that the holders of certificates—all of whom had executed mortgages for the full amount—might rely on receiving their money on the first Tuesday in October. Of course the people of that State will not be disappointed in receiving their money according to their certificates.

But my colleague proceeded to say that the State banks who have a portion of this Erie and Champlain Canal fund on deposit would be required to furnish the requisite funds from their vaults, and must, of course, call upon their debtors and curtail their discounts to that amount, and thus produce serious embarrassment. This cannot be the case to any great extent, for more than nine-tenths of the money borrowed by the people on bond and mortgage under the late act is paid immediately to the banks. It is borrowed, in most instances, for the very purpose of paying bank debts. It is changing the indebtedness from the banks to the State, and on much more advantageous terms. In place of a credit of ninety days from the bank, the borrower obtains from the State a credit of at least one or two years, and that portion borrowed from the canal fund will not be called in till 1845.

The canal fund will also be the gainer by this arrangement; its moneys on deposit in the banks draw only 4 and 5 per cent. interest; but that portion taken to supply the present deficiency, will draw 7 per cent. thus adding to that fund more than thirty thousand dollars per annum over and above its present receipts, without exacting from the borrower any more interest than would be paid if the United States Treasury had furnished the money.

How much soever, therefore, we may all regret the inability of the General Government to deposit the fourth instalment with the States, according to its original design, I cannot admit that its being postponed will operate with so much severity upon the people of New York as has been represented on this floor.

The honorable gentleman from Ohio, (Mr. Loomis) in his zeal to defeat the passage of this bill, took occasion yesterday to speak with great freedom of what he is pleased to denominate "New York politics," and said that the measures of the President, and of the administration party in that State, have been of a bold and daring character. Among other instances cited by that gentleman, he asserted that "a bill had been urged through the Legislature of New York, in the short space of a few hours, pledging the faith of the State to the amount of six millions of dollars, for the purpose of sustaining the local banks."

The act, Mr. Chairman, to which he probably refers, was passed in the spring of 1834, during the famous panic which the honorable gentleman cannot yet have forgotten. At a time when the expiring agonies of the late United States Bank convulsed the business world to its very centre; when that powerful institution was attempting to extort from the fears of the public, what the calm deliberation of the American peo-

ple had denied it—its recharter; when panic speeches were made on this floor, and echoed through the bank-bought presses of the country; when doubt and dismay were pictured upon the countenances of a large portion of the community. It was then, sir, that the capable and efficient Chief Magistrate of New York, in a special message, submitted to the Legislature the project alluded to, and that body passed the law by an unusually large majority, not in the space of a few hours—promptly I admit—but after due deliberation and reflection.

By that law the State interposed its credit as a shield between the United States Bank and the people. Its object was to restore confidence, and that object was fully attained by it, without the necessity for borrowing or loaning out a single dollar by virtue of its provisions. I think the honorable gentleman cannot have forgotten that this law encountered the most bitter opposition from the political party to which he belongs. It was called by that party "Marcy's Mortgage," and the people were told by the opposition press, that their farms were mortgaged to the amount of six millions of dollars. But, sir, it was a senseless and unavailing clamor—*vox et preterea nihil*; for in about six months after the enacting of that law, Governor Marcy was re-elected to the executive chair, by a majority of nearly thirteen thousand votes.

So far as the act referred to operates as a precedent, it is against the position assumed by those who oppose this bill. It shows that the power of borrowing money to loan out to the people, may be properly exercised by the States. It does not show that that power has been conferred on the General Government.

I am happy to perceive, sir, that the old and stale cry of "non-committalism" is now abandoned by that party which the gentleman from Ohio represents; but before he charges upon our distinguished Chief Magistrate and his supporters in his native State, that their measures are too bold and decided, he ought to have examined into the effect of those measures in that State. He would have found that it was under the influences of the party composed of the President's political friends, that the resources of that State have been developed—that her forests have become cultivated fields, and her villages have grown into cities—that her great works of internal improvement have been projected and constructed—that her banking institutions have been regulated and restricted, and the safety fund system adopted, affording more ample security to the public, than any other system yet devised. In short, he would have found that it was under administrations of the same political character, that New York has become what the honorable gentleman thought proper to call her, the "Empire State." If the gentleman had rightly understood "New York politics" and "New York politicians," he would perhaps have formed a higher estimate of the wisdom of their measures and the correctness of their principles.

Mr. Chairman, I have already occupied the attention of the committee longer than I intended. I am constrained, by a thorough conviction of duty, to vote for this bill. I should prefer it without the amendment offered by the gentleman from South Carolina, (Mr. Pickens,) because I do not think that amendment postpones the fourth instalment sufficiently long to enable the public finances to meet it, and because I am unwilling to see the expectations of the States again disappointed. But I shall vote for the bill, whether the amendment be adopted or rejected.

Mr. SMITH then took the floor, and several members calling out "rise," "rise," Mr. S. made that motion.

Mr. CAMBRELENG, understanding that Mr. S. had withdrawn the motion, said he would mention some circumstances that, he thought, might induce a more speedy action on the various bills now in Committee of the Whole. He said that, unless they acted on some of those measures, in one week, the Treasury would be stopped for want of funds.

Mr. SMITH here interposed, and said he had not withdrawn the motion or yielded the floor. He said he himself had no personal wish on the matter of the rising of the committee, but had

made the motion from the expressed wish of several members.

Mr. CAMBRELENG hoped the committee would not rise at that hour, at all events.

The motion, however, prevailed, and the committee rose and reported.

The SPEAKER laid before the House a report from the Secretary of the Treasury, of the amount of appropriations and expenditures for the current year; which, on motion of Mr. BRIGGS, was laid on the table, and ordered to be printed.

Mr. PATTON then moved that the House adjourn.

Mr. CAMBRELENG called for the yeas and nays, which were ordered, and were—yeas 96, nays 85.

So the House adjourned.

## IN SENATE,

SATURDAY, September 23, 1837.

A message was received from the President of the United States, enclosing a report from the Secretary of War; which was ordered to lie on the table, and be printed.

Mr. CALHOUN presented a petition from citizens of Mobile, praying the establishment of a national bank.

Mr. SWIFT presented two memorials from citizens of Vermont, remonstrating against the annexation of Texas.

## ORDER OF THE DAY.

The Senate then took up, in committee of the Whole, the bill imposing additional duties on certain officers, as depositories in certain cases. Mr. CALHOUN'S amendment being under consideration—

Mr. KING of Georgia addressed the Senate in a speech of upwards of three hours' length. He said there appeared two projects before the Senate; the one was the deposit system of 1834, and the other in relation to a divorce from all banks. Mr. K. professed himself not altogether in favor of either. The magnitude of the questions, and the great interest involved, made it rather incumbent on them, in his opinion, to postpone the whole subject until an opportunity could be had to commune with their constituents, and learn their wishes upon the relative merits of the antagonist questions.

The deposit system had never been a favorite of his, and he had, at the very onset, predicted, step by step, all the evils that had resulted. Mr. K. here made some allusions to certain banks in the South, that had despatched agents to New York with specie for certain purposes, which banks had realized immense profits out of the laboring classes. Such institutions, he thought, were beneficial to no class save the large capitalists, and were not likely to be reached by the fluctuations incident to their mismanagement.

The idea that had been held out of putting down banking capital by sacrificing the Bank of the United States, was as preposterous as the idea of a certain president of a temperance society, who proposed to prostrate a respectable grocer in Chestnut street, on whose ruin five hundred grog shops were established in the Northern Liberties. He had been opposed to the deposit system from its commencement, though some of its friends were induced to believe it had not a fair trial; he was not prepared to say that if the banks had been let alone, and not been tormented and tampered with as they were, they might have done better; though, in his opinion, they never would have constituted so safe and politic a depository of the public revenue as the national bank. It was experiment after experiment that had sunk the currency to its present degradation, and no nation ever had or could survive such trickery, if it were tried to the end of time.

The gentleman from Missouri (Mr. Benton) had said that his was not an experiment. He had collected a mass of historical facts, on which date he had based his position. He has told us of the free and enlightened empires of Rome, Turkey and Spain, and of Roman heroines, and of that great lover of national liberty, Napoleon. He could tell the gentleman that he had read a little Roman history, though he did not pretend to be as well versed in historical lore as his friend, and from what he had read the Romans would be the last people

he would quote to sustain any position. They were the plunderers and murderers of the human race, which for aught he knew might have been a part of their financial system. As for Napoleon, who found his coffers empty on his ascendancy to the throne, and had them soon filled to redundancy, how did he effect it? Let the blood and tears of the German States answer; let him look to the plunder of the bank at Antwerp, one of the most commercial and free cities of Europe. Possibly he (Mr. K.) might have voted for the bill as amended; but really the reminiscences of his friend from Missouri had "frighted him from his propriety," and made him more than ever wish the whole subject postponed until the regular session.

It was the duty, he said, of every Senator, on a momentous question like the present, to give his free, unbiased opinion. Though he had not time to look into the subject as he ought, he had not, like his friend from North Carolina, (Mr. Strange,) taken for granted the views laid down by the President. As to the causes of the distress, as set forth by this high functionary, he confessed himself never more astonished than when he saw them. Mr. K. said he did not embark in the business before him with any very pleasant feeling. He had helped the present Executive by his vote to the place he now occupied; that step he did not regret; and he hoped he might still be able to sustain him. Mr. K. said he must express his regret, however, that the President had not taken the trouble to make himself acquainted with the facts in the case; and he regretted that our public men should prepare their State papers so loosely. The whole Message appears to him to be made up from stump speeches, paragraphs of editors of newspapers, and *saves* from quack politicians.

It never occurred to the President that the administration might have been the cause of all the mischief. [Mr. K. here read parts from the President's Message.] This he said was very pretty, very captivating, but, unfortunately, there was not one word of truth in the whole matter. So far from the issues of the English banking establishments proceeding *pari passu* with those of the United States, it was proved, from the most undoubted authority, that from the first of January, 1834, to the same month in 1837, the increase was not more than one and a half per cent. say about four hundred thousand pounds, while the increase in the United States was upwards of one hundred millions of dollars. In England there was a remarkable increase of trade, while there was no speculative rise of prices. In this country it was widely different. While every thing was advancing in price, we were importing largely from England—importing specie on credit, when we had nothing to pay with, and which went into banks to increase the paper issues, thus keeping up an unnatural state of exchange. Mr. K. read extracts from evidence taken before the British Parliament, to show that there had been a gradual increase in the value of money, which was accounted for by the vast exportation of bullion from the British shores. There was a great increase of wealth in England, while there was not a corresponding increase of money. This could not be accounted for at the time, but had they known that we had been increasing our issues at the rate of two hundred per cent. and dealing with them at the same rate we did on credit, their surprise at this state of things would have vanished in a moment.

As soon as the United States Bank was prostrated, banks sprung up all through the country like magic. The banking system, he admitted, had been abused, and he was ready to grant that the Senator from Missouri had not overrated that abuse in his remarks; still he was willing to concede that some were honest and faithful among them, and he could not bear to hear that torrent of abuse and invective that had been lavished indiscriminately against them all. Their issues were called paper trash, rags, shin-plasters, and the like; but would they not buy as much now of any articles in market as they would before—provisions, clothing, land, houses, etc.? Could not this money be loaned out at a higher rate of interest than it could be before the suspension?

He did not think, if gentlemen had their notes in possession, they would conceive them altogether so worthless as they were disposed to represent them. The great object to be gained was to reach the evil of the system. As well might gentlemen undertake to make a full-grown, rational thinking man, with mortar and pestle, as to regulate currency by the iron hand of Government. It was that attempt which had produced the ills we were now laboring under, the effects of which were tremendous. Mr. K. here went into an argument to show how detrimentally the Specie circular had operated in counteracting the natural course of trade, and that the New York merchants, to their eternal honor, had paid thirteen or fourteen per cent. for money, rather than run upon their banks, when so much of the specie had been abstracted to send to the West. The measure, he said, had been opposed in the cabinet, and in both houses of Congress; yet the President had taken it into his head, that whoever opposed his political plans were conspiring against him, and hence had determined to persevere in his scheme. It was understood as a boon to the West, though the people of that section of country were unpatriotic enough not to thank him for it; and he must confess, for himself, that he would not like to be fuddled even with Champagne. Yes! it was this Specie circular, that had struck down this young and vigorous Republic; had rendered bankrupt her merchants, had ruined the planters, and thrown two thirds of the laborers of the country out of employ; yet this was what the gentleman from Missouri termed that "ever glorious Specie circular!" He thought glory must have depreciated in a more fearful ratio than the bank rags against which the gentleman vented so much of his spleen.

He [Mr. K.] could but express his astonishment and regret at the remark of the gentleman from South Carolina [Mr. Calhoun] that the United States Bank of Pennsylvania might restore specie payments, but "he was unwilling to employ it as an agent, because it would afford that bank a triumph over the Government!" What Government? did the gentleman mean the Government at the Hermitage, or the White House?

He professed himself shocked at such a remark, and asked if the blood of '76 had all evaporated, that he was induced to believe more grey hairs had made their appearance on the head of the Republic within the last five years than might have been expected in a century. Mr. K. said he was a democrat in principle, and did not use the term as a catchword; they would never find him with democracy on his tongue and federalism in his heart. He owed every thing to the republican party, and had no sympathies with any other. He had found it necessary to take a stand against Executive encroachments, and wanted his friends to rally with him. The Executive financiering which this country had been subjected to within the last few years, was such as no nation ever had, or ever could, prosper under, and if the present President was determined to tread in the same footsteps, he for one would try to jostle him. So long as the banking system of the country remained as it did, to return at any time to a pure metallic currency would confiscate more than one-third of the property of the nation. Specie vanished, it was no used as currency, but was had found in the hands of brokers and large capitalists, where it was kept as a commodity for barter. Under such a state of things, to compel an entire specie circulation would be to make ruin and desolation stalk through the country. Although he was a hard money man in principle, and had as much antipathy as any man could have to the multiplication of banks, yet he thought there had been a great deal of unreasonable clamor against these institutions; they were doing all they could to bring about a healthful action, and had already reduced their circulation a hundred millions since the suspension of specie payments. To bring the power of the Government to bear upon them now, would be to ruin the people. Mr. K. moved to postpone the whole subject until the regular session.

Mr. STRANGE replied to the various arguments urged by Mr. King in relation to the recommendations of the President's Message, and the causes given therein as having produced the exist-

ing distress. He contended that neither the measures of the late administration nor of the present had led to a derangement in the currency, and originated all the difficulties under which the country was now suffering. He maintained that the banking operations of England, as well as those of the United States, had brought them about. He defended the course pursued by the President in having brought forward his measures for the relief of the country. He said that if the Executive had not done so, we should have heard much of his being non-committal, and not evincing a disposition to afford some cure for the existing evils. The gentleman from Georgia had argued that it was the duty of the Executive to follow, and not to lead. This position he (Mr. S.) begged leave to controvert. It was the constitutional duty of the President to lead, instead of to follow.

Mr. KING of Georgia made a few explanatory remarks in reference to what he had before said.

Mr. NILES replied at some length to the remarks of the Senator from Georgia. He denied that the Message was not based on correct information, and contended that the very arguments of the Senator himself proved that the President was right in all his deductions.

Mr. TIPTON said the question now under consideration was of so much importance to the people of the State from which he came, that he felt it to be his duty to claim the indulgence of the Senate while he gave his views on some of the topics that engage public attention at this time. In a time of profound peace, surrounded, as we thought, by all the elements of prosperity, we are suddenly overtaken by a wide spread calamity, our commerce crippled, public credit injured, private fortunes ruined, and the public treasure bankrupt. The late session of Congress had but just closed; the members had scarce reached their homes, when we were summoned to return to this city to legislate the Government out of its difficulties; and we find ourselves here in September, instead of December, engaged in deliberating on the mode and manner of relieving the distresses of our country. The inquiry naturally addresses itself to every mind, why is this so, what has produced it, and what the remedy to be adopted. The honorable Senator from South Carolina, (Mr. Calhoun,) when he proposed his amendment to the bill under consideration a few days ago, told us that this question should be met boldly, manfully; to use his own words, let every one, said he, show his hand. I, said Mr. T. respond to the noble sentiment of the honorable Senator; the question should be met boldly and fairly; it is a time of deep anxiety with the people; there should be no skulking among their public servants, every one should speak freely of the causes which have produced the present embarrassment, and act promptly on measures to relieve the people.

It was his opinion that the putting down of the Bank of the United States was the first step to the present embarrassment. The transfer of the public deposits from that bank to the local or State banks, stimulated these institutions to extravagant issues, far beyond their ability of redemption. They discounted notes on the public deposits, extending their lines of discounts beyond the bounds of prudence. The people in the neighborhood of the banks, finding that bank accommodations could be had with great facility, entered largely into speculations in public lands, town lots and other property. Extravagance in living as well as in dressing, increased their indebtedness. In a word, sir, said Mr. T. the whole country overtraded, ceased to labor, and contracted debts beyond their ability of payment. Speculations were uppermost in the mind of every one.

The Executive of the United States, seeing the public domain rapidly exchanging for credits on the books of the banks, by the process I have described, determined to check it, and issued his Treasury order of the 11th of July, 1836, directing the receipt of nothing but gold and silver in payment for the public lands. Under the operations of this order, those engaged in the purchase of public lands had to procure bank paper, draw the specie from the banks, and transport it to the land

offices. It was no sooner paid into the land office, than the receiver of public moneys deposited it again with the banks, to the credit of the Government. Thus the indebtedness of the banks was daily and rapidly increased. The banks, fearing that the public deposits would be called for in coin, became alarmed at their own condition, closed their doors, and suspended specie payment; thereby putting it out of the power of this Government to pay the public dues, according to law, in specie, or its equivalent.

This, said Mr. T. is a brief statement of my opinion of the causes which produced the present embarrassment and distress that surround us; it was an unfortunate tampering with the currency and the public deposits by the Executive. Our troubles have come sooner, but come lighter than they would have done, had the Treasury order never existed. Now for the remedy. The bill reported by the honorable chairman of the Committee on Finance, imposing additional duties on public officers, as he understood it, intended to cut loose the Government from all banks, and to authorize the Treasury Department to keep and disburse as well to collect the whole revenue of the Government, dispensing with banks as fiscal agents altogether. This policy he thought might well be questioned. It would strike a large portion of the American people like a shock of electricity, on account of the increased power and patronage it would confer on the Executive arm of the Government. He would not declare in advance that he could not go for it, or for something like it, but he would be slow in yielding it his support, and he hoped that a better remedy would be found. He had never been an advocate for using a litter of State or local banks as fiscal agents of the Government. They contain within themselves antagonist principles; each possessing separate views, and looking to the interest of its own stockholders, they cannot or will not act together in transmitting and disbursing the public money of the United States, and so long as they are used as depositories of the public moneys, embarrassments and occasional losses are to be expected.

Mr. T. said that he was opposed to taking any step here that would have a tendency to cripple or break down the State banks. The people were encouraged to establish State banks to keep down the Bank of the United States. They had vested their capital in them to a very large amount. Many of these banks were perfectly solvent and safe; none more so than the banks of the State which he had, in part, the honor to represent here. The banks of Indiana were waiting to see what Congress, the Executive, and other banks, could or would do, intending very soon to resume specie payments, and honestly to redeem all their paper; and he would give no vote to discourage or to procrastinate so desirable an object. It was true the banks had not acted well in suspending specie payments and embarrassing the Government, but we should deal mercifully with them. A single breath from Congress and the President, saying to the State banks, "We will not receive your paper in payment of duties or for public lands," will strike fifty per cent. off the value of all the property of our constituents vested in these banks; indeed, off all their property of every description; and he was not prepared to sanction such a course. In the language of the West, give us *land office money*. Whatever will buy land is as good as gold. It is at par in all the moneyed transactions of the western country. No matter how old or ragged paper may be, if it contains words, letters, and figures enough to be receivable in the land offices, it equals gold; and if not receivable for public lands, it is of uncertain and changeable value. It finds its way into the hands of the poorer class of people, who are liable to be imposed on, and shamed by the rich, in whose hands the better currency was always found. This would be the effect on the western people, should we refuse to receive the paper of their banks in payment for public lands. He left it for Senators representing States east of the mountains to say what would be its effect on the interest of their constituents, should this Government refuse to receive their bank paper in payment for revenue. Above

all things, Congress should establish and maintain a uniform currency. Have gentlemen forgotten how forcibly the Senator from South Carolina (Mr. Calhoun) described the influence of this Government on currency the other day, when he said if the United States will endorse the note of the beggar, it will pass at par? And will that Senator now say to a very large proportion of the people of this country, we will not receive the paper of your banks in payment of dues to the Government, although you may redeem your paper with specie, when, by that act, he will bankrupt thousands who have strong claims both on the justice and the clemency of the General Government?

Mr. T. would not detain the Senate by an attempt to show what effect the measures before it would have on our commerce or exchanges. He left that to able hands. He pretended only to take a plain common sense view of their mischievous tendency on the interests of his immediate constituents, and to enter his protest, in their behalf, against the ruinous consequences that must follow the passage of the bill with the amendment proposed. He said the course that he had marked out for himself to pursue, put it out of his power to vote for the bill or the amendments proposed by the honorable Senators from South Carolina and Missouri, their amendment, if adopted, looked to a refusal on the part of this Government, at an early day, to receiving or using in its ordinary transactions the paper of all banks, and a return to a metallic currency. This, said Mr. T. looks well on paper, but in my opinion it is impossible to reduce it to practice. There surely is not metal enough to answer one half of the business transactions of this great and growing country. It was on a mixed currency, partly *paper issued on a metallic basis*, that our country reached the summit of its prosperity, and who could ask more than to be placed where we were in 1837?

He would vote for the proposition offered by the Senator from Virginia, when it came. It contemplated preserving the property of our people vested in the State banks. Let us collect from the late depositories the money in their vaults, but in doing so give time for them to pay us without crushing these institutions. This would enable the banks to indulge their creditors, and go far to relieve the embarrassments under which our country was suffering. He cared not what those in high places might think. He considered it the duty of this Government to relieve the people, when this can be done with an eye to public justice. Congress now had the power of relief, and he hoped would exercise it.

The frequent charges thrown out by the late President, in his messages to Congress, against the Bank of the United States, had a tendency to discredit that bank with the people, and we all witnessed its downfall. The constant lauding of the State banks by the President and his Secretary of the Treasury as, depositories of the public money, encouraged the people to take stock in those banks. They grew up, as it were, under Executive favor, and shall Congress now lend itself to break them down? If we intend to avoid embarrassment and losses hereafter, we must put the regulation of the currency, and the deposits of the public money, under laws, passed by the joint wisdom of Congress, and leave less to the whims of a President and his Secretary of the Treasury.

If the bills which had passed the Senate authorizing an issue of Treasury notes, and that regulating collection from the deposit banks, become laws, he wished to see this extra session brought to a close, and let us return to our masters, the people, and consult them on what is further to be done. He did not stand here to register the Executive will; he looked to the boys of the West—those with hard hands, warm hearts, and strong arms, who fell the forest, hold the plough, and repel foreign invasion—for his instructions; it was their voice he felt bound to obey; it was their wishes and their interest he came here to represent. If the Executive desires the additional responsibility of keeping and disbursing, as well as of collecting, the revenue of the country, he now has it, under the regulations of the Treasury Department, since the suspension of specie payment by the deposite

banks; and he warned honorable Senators who, like himself, wished to sustain the present administration, provided its conduct entitled it to the support of the people, to be careful how they entered upon new and dangerous experiments. If he was bent on breaking down an administration, he would give up to it the unlimited control of the public moneys of the Government. He could not vote for the bill reported from the Committee on Finance, but he would vote for the motion of the Senator from Georgia, (Mr. King,) to postpone the whole subject to the next session of Congress, when we shall have had an opportunity of ascertaining the wishes of our constituents. It is good for us occasionally to consult the sovereign people.

Mr. CALHOUN expressed his surprise that the Senator from Georgia should have made a motion to postpone the further consideration of this subject until the meeting of Congress in December next. He regretted, too, that that Senator should not have assigned some reasons for his motion. He (Mr. Calhoun) thought it was due to the country and to Congress, that this question should be settled at the present session. He stated that there were millions of money now waiting the result of our decisions. Even in the city of New York, the very centre of the distress, a large amount was held back under the supposition that a Bank of the United States would be created—a vain and idle and delusive expectation. The objections to such an institution were insurmountable. The commercial world knew not what to do. No man was more sensible than the gentleman from Georgia of the necessity of prompt and decisive action on the part of Congress. Why, then, should the subject be postponed? Were we not as prepared to decide the question now, as we should be in December? A postponement would be fatal to the best interests of the country. Let the question be decided *now*, and much would then be done for the relief of the country. "Delays (said Mr. C.) are dangerous," and the remark was never more true than in the present case. Those opposed to the Sub-Treasury scheme, backed by the banking institutions of the country, presented an array of force, formidable in the extreme. The banking power and influence presented itself in every direction, and would be brought to bear against the measure, should there be any delay. To postpone, then, would be doing nothing less than to surrender the question.

Mr. C. concluded by briefly defending his course in reference to the Bank of the United States, against the sentiments expressed by the Senator from Georgia (Mr. King.)

Mr. RIVES would, he said, say a word or two in reply to the Senator from South Carolina, who had again spoken of the Pennsylvania bank of the United States, as if it was at all connected with this question. But is it so? He denied that it had anything to do with this bill. It strikes a vital blow at the whole banking system of the country, which was now incorporated with the prosperity of the country. Although opposed to the abuses of that system, yet he saw that this blow would be fatal. He was in favor of preserving the system at present, inasmuch as it was necessary to the existing interests of the country. He went on to answer the Senator from South Carolina, who yesterday insisted that this was a struggle between Mr. Biddle and the Government; that it was an attempt to recapture the deposits; that Mr. Biddle was trying to get control of the Government and of the political institutions of the country. Now is that the proposition I have submitted? He denied that his bill proposed any such thing. The gentleman had treated the whole question as if it related to the Bank of the United States, and the restoration of the deposits to that institution. It did not relate to that more than to any other bank, nor to the deposits at all.

Mr. CALHOUN explained, if the Government received the bank notes, they endorsed their credit, and the deposits would follow.

Mr. RIVES said, then the objection did not apply to his (Mr. R.'s) bill, but to the existing law of the land. The law directs the mode in which the depositories shall be selected. He referred to the duties of the Secretary of the Treasury under the

law; yet the gentleman says the practical issue is whether the Bank of the United States shall have the deposits? Would Mr. Woodbury give them to that bank? He thought in very unlikely. He thought he could leave that issue to the Secretary with perfect confidence. He would protest against the ghost of the dead bank being paraded here for effect. A great deal had been said about arguments *ad captivum*. If there had been any such, it was this: all that had been said in relation to the deposits was gratuitous. His firm conviction was, that there could be no general resumption of specie payments without a simultaneous movement; all must resume at the same time. His great object in introducing his proposition was to indicate a day for it, so that the banks may be prepared. Without that, the resumption cannot take place.

He stood here as little subject to suspicion in regard to favoring the United States Bank as any gentleman here. The gentleman from South Carolina signalizes his zeal as a new convert. In 1816 he introduced and supported the bill for chartering the Bank of the United States. He had been a firm and unflinching opponent of that institution. When that gentleman advocated a Bank of the United States in '34, he was opposing it. He hoped the gentleman would throw out no more appeals of that character. He had thrown out insinuations for effect, and then disclaimed their application. It appeared to him that the repetition of these factitious appeals showed the weakness of their cause. Are we children, that the gentleman endeavors to frighten us with the ghost of a Bank of the United States? No, sir. He hoped that Senators were too sensible of their position to be influenced by these scenic exhibitions. Let the gentleman show that there is any real foundation for the alarm about the banks recovering the Government deposits, and not endeavor to excite groundless fears, and work upon our imaginations.

But no ground had been alleged for these insinuations. They were altogether gratuitous. There was nothing in this proposition that favored the Bank of the United States more than any other bank.

He begged leave to say a word or two to the gentleman from Missouri. He was thankful to him for the suggestion, that if he looked over his right shoulder he would see whom he was acting with. Let me tell that gentleman, that when I offer a proposition on this floor, I never think who will vote for or against it. If the gentleman supposes that I am to derive any support over my right shoulder, he knows more than I do. I know one thing: I know who supported this bill before. I know that five-sixths of the friends of the administration supported this bill. It was supported almost unanimously. That is all I know. I do not pretend to speculate as to who will vote for it or against it. I had not the support of the gentleman from Missouri, nor do I expect it now, nor do I expect that of any other particular gentleman. It is enough for me to believe, that it is essential to the best interests of the country. So far from seeing why his proposition should now be abandoned, he saw every thing to stimulate and urge him to bring it forward. It would be impossible that the banking institutions should ever rise again, without a measure of this sort. They must lie prostrate. The people wished to see an end of this paper money, that the gentleman from South Carolina and the gentleman from Missouri so much deprecated. No one had a deeper sense of its danger than he had. We should never get rid of this evil, unless some measure of this character should be adopted. He was unwilling to go back to his constituents without having first done something for the relief of the country. He was unwilling that the American people should witness an adjournment of these bodies, without the passage of some measure of a healing and a salutary character, in regard to the currency of the country. He felt that it was necessary to fix some day for the resumption of specie payments by the banks before we go home, in order that the people might have an assurance of getting rid of that most horrible abomination, the spurious or precarious substitutes for money that

are now overrunning the land. But, in regard to the personal appeal of the Senator from Missouri, if I stand in a position which he indicates; if I am to look over the right shoulder for a guide or leader, will the honorable gentleman, oblige me by looking immediately in front of him, he will find his file-leader. [Mr. Calhoun sits in front of Col. Benton.] Now, that is a singular transposition of places, indeed. The honorable gentleman from Missouri, who has so long taken the subject of the currency under his particular care, is now content to furnish facts and hints for another leader. He had not looked for or sought any special support from any gentleman on that floor. He had not changed his position. If any gentleman supported him, he presumed it would be from patriotic motives. When the Sub-Treasury scheme was introduced into the House of Representatives in 1834, it received but thirty-three votes, and only one of those was a friend of the administration; and this scheme was then denounced under the auspices, and in the name, of the administration as revolutionary, disorganizing, anti-republican—tending to enlarge the Executive power, and place in its hands the means of corruption. Believing now, as he did then, that such is the character and tendency of the measure, he adhered to the ground taken by the republican party in 1834; and he would use every weapon which reason and argument could furnish in opposition to it. He would freely co-operate with any party, or any individual, in resisting a scheme which he believed to be fatal to the best interests and happiness of the country; and in doing so, he did not consider himself as abandoning, but, on the contrary, maintaining, the true republican faith.

Mr. CALHOUN said that, after his disclaimer yesterday, he was much surprised to find himself the object of a personal attack. He contended that the stand taken by him in the year 1834 would speak for itself. He rebutted, with much warmth the remarks of the Senator about his "zeal," and identifying him with the Senator from Missouri, and said the whole remarks were alike unworthy of the Senator and the State he represented.

On motion of Mr. CLAY,  
The Senate adjourned.

#### HOUSE OF REPRESENTATIVES,

SATURDAY, September 23, 1837.

Petitions and memorials were presented by

Mr. MAY of Illinois.

Mr. EWING of Indiana.

Messrs. BOND and TAYLOR of Ohio.

Mr. HAYNES asked leave of the House to make a motion that from and after Monday next, the House shall meet at ten o'clock.

Objection being made—

Mr. HAYNES moved a suspension of the rules, which was agreed to, and the motion to meet at ten o'clock prevailed.

Petitions and memorials were further presented by

Messrs. DARLINGTON, MORRIS, McKEN-NAN, and OGLE of Pennsylvania.

[Mr. M. MORRIS of Pennsylvania presented the memorial of John Paxson, Charles Marquedant, and eighty others, citizens of Bucks county in the State of Pennsylvania, remonstrating against the annexation of Texas to the United States.]

Messrs. MARVIN and LOOMIS of New York.

Mr. TILLINGHAUST of Rhode Island.

Messrs. ADAMS and PARMENTER, of Massachusetts, and

Mr. FAIRFIELD of Maine.

INQUIRY IN RELATION TO THE FLORIDA WAR.

The House then proceeded to the unfinished business of the morning hour, which was the consideration of the following resolution, submitted by Mr. Wise on the 19th instant:

*Resolved*, That a select committee be appointed by ballot to inquire into the cause of the Florida war, and into the causes of the delays and failures, and the expenditures which have attended the prosecution of that war, and into the manner of its conduct, and the facts of its history generally; that the said committee have power to send for persons and papers, and that it have power to sit in the recess, and that it make report to the next session of Congress.

Mr. GLASCOCK had moved to amend the foregoing resolution by striking out all after the word "resolved," and insert the following:

"That a select committee be appointed to inquire into the cause of the Florida war, and the causes of the extraordinary delays and failures, and the expenditures which have attended the prosecution of the same, and all the facts connected with its history generally; and that said committee have power to send for persons and papers."

The question immediately pending, was the motion of Mr. HOWARD to strike out the words "that a select committee be appointed," and insert "that the Committee on Military Affairs be instructed."

Mr. WISE said, when he came to Congress four years ago, and when he was first elected by the people of his district, he was the friend of power. He had not been here long before he found that power needed no friend; it was too strong already. He looked narrowly at the condition of the public institutions. He watched closely the enemies of the public institutions of this country, and he found that the chief enemy of those institutions was the consolidation of all power in the hands of the Executive. He looked at the public domain, the richest inheritance which any nation was ever gifted with, and he saw that all these riches were at the disposal of the President. He saw this power so exercised that the new States were at the bidding of the Executive. He looked at all the other sources of power, at all the little springs and all the large fountains, and he saw them all pouring into the hands of the Executive. He looked at the public press, and he found that it belonged to the Executive, and a greater power still he found to consist in the appointment and removal of officers. All this, and more than this, he saw concentrated into the hands of one man. It was true that some check was provided in the Constitution, by giving Congress the control of the public purse; but between his first election and the time of taking his seat here, the President, through the power of appointment to, and removal from, office, seized upon the custody and control of the public money; and, instead of Congress controlling him, he had the control of Congress through the removing and appointing power. In consequence of these important and extensive powers offences must need come, and these offences were corruption, dictation, and oppression. This was not mere theory that offences must come; for he found a party with the maxim, when he came here, that to the victors belonged the spoils in full practice. He was not long here before he was undeceived, and he then declared that he was no longer the friend of power. He then set himself to work to diminish this power, by exposing its abuses. It was a sacred duty which he owed to his country; and he took it upon himself, disregarding every personal risk to which he might expose himself. It was true, he foresaw the difficulties which any man would have to encounter, who should undertake to beard the lion of power in his den. It was necessary that corruption should be exposed; and how was it to be exposed? The House of Representatives, the grand inquest of the nation, he took to be the proper place to expose it, as the responsibility rested there. He then took upon himself this task, but not alone: there was another individual, who was now absent, connected with him; and with a fixed resolution in their minds, they commenced the work, regardless of all difficulties and dangers. They knew who the enemies of the institutions of their country were, and they estimated the enemies of those institutions as more dangerous than a foreign foe. He wished to be permitted to say of that absent friend, that he was more than a companion: he was powerful in intellect, eloquent, magnanimous and brave; and stretch as he would in zeal, reach as he would in mighty energy, to keep by that friend's side, his onward march was such that he could not keep pace with him. That man was Balie Peyton of Tennessee, than whom a more generous, honorable or high minded man never lived. The difficulties and dangers of their duty were constantly compelling them to throw themselves on the spears of power and its parasites. The truth had to be told boldly, bravely and unflinchingly. In making their charges, they were frequently met,

and had charges hurled back against them, but they received them as became honorable men. They never made personal charges wantonly; and when general party charges were hurled back at them, they never received them as personal to themselves. They met all personal charges as became them, for they had put their hand to the plough and it was not for them to turn back. When assaulted, they returned the assault. They never had been personally attacked but once, by any of the favorites of power, although he doubted not that the resolution to do so had oft times been formed. He had seen those persons march to a certain line boldly, but they never came over it. It was true, however, that he never desired to meet them, as he always wished to avoid personal conflict, either in the House or out of it. General attacks on his party he could meet as well as any other gentleman; and although he had no desire to have personal conflicts, personal attacks, whenever made, either on himself or his absent friend from Tennessee, should be met in that determined spirit with which he had entered upon the discharge of this duty to his country. He was induced to make these remarks in consequence of the general declaration—for general declaration he must call it, made by the gentleman from Mississippi yesterday. He knew not whether the declaration was intended as personal to his friend from Tennessee, or himself, or not; but the remark was certainly true in its terms. The gentleman remarked that the scenes enacted in the rooms of the investigating committees last session, were disgraceful to the committee, disgraceful to the United States, and disgraceful to the nation.

Now, he perfectly agreed with the gentleman from Mississippi in that general remark. The scenes enacted in the investigating committee rooms were disgraceful to the committee, disgraceful to the House, and disgraceful to the nation. Such scenes never were exhibited before in this Capitol, and he hoped that they never again would be enacted. Sir, they were all scenes perfectly exhibiting servility to Executive power. He (Mr. W.) saw scenes enacted in both those committees which were enough to convince him of the corruptions of the Government. He saw the majorities of those committees stooping before the power of the Executive, bowing at the will of the President; covering up all the abuses that had been charged against the Government, and directly sanctioning them. We saw a scene in this House that was disgraceful to the last Congress, and to the last House of Representatives. The very person who was charged as connected with the Executive in wasting the public money, and bribing and corrupting the public mind, contumaciously refused to appear before the committee and testify, and this House sustained him in that conduct.

He concurred most fully with the gentleman from Mississippi that the scenes enacted in those committees were disgraceful to the House, and two of the members of the majority of the committee of which he was chairman, have been most signally rebuked, in consequence thereof. They have been condemned by the voice of the people, and are left at home. By looking over the list, it would be found that there was but two here out of the six, who were the majority of that committee.

In relation to the remarks of the gentleman from Mississippi, he took none of them to himself as personal, nor did he think any of those remarks as applicable to his friend from Tennessee. If he did, or if it was really apparent that those remarks were intended for him, or his friend, or whenever he or his friend were charged as the authors of the disgrace of these scenes, or whenever any disgraceful conduct was charged to him or his friend, he would say to the man who uttered the charge, that in his foul throat he lied!

Mr. GHOLSON wished to be understood as not making any personal allusion in his remarks to the gentlemen from Tennessee, (Mr. Peyton,) as it never was his custom to make any remarks to apply to persons who were not in a position to defend themselves.

As to the gentleman from Virginia, (Mr. Wise,) he might take the remarks he had made on this

subject on yesterday as they were delivered, and make a *personal application* of them if he chose; he was not responsible for the publication as it appeared in the Globe of yesterday, not having seen the report of yesterday's remarks before they went to press; the gentleman from Virginia (Mr. Wise) might take the remarks he had made just as they were made, and make what use of them he pleased; he repeated again, that scenes did take place in the committee rooms which were disgraceful to Congress and to the country; but in making this remark, he differed from the gentleman from Virginia in believing that the investigation threw any disgrace upon the late administration. He had not been able, for the life of him, to discover, after a close examination of the testimony adduced, that any disgrace could attach to the late administration. Although it had been repeated again and again by the gentleman from Virginia, that corruption did exist in the administration, he (Mr. G.) had not been able to discover it. The gentleman had said that a disgraceful scene took place in the House at the time; the majority of the House sustained a witness who refused to appear before one of the investigating committees. Now Mr. G. believed that the late House sustained that witness, because they believed that it would be doing injustice to him to send him before a committee; whose chairman had treated him in the manner the chairman of that committee had treated the witness.

A certain difficulty had taken place before another committee, in which the chairman of that committee took a part, and in consequence of this difficulty, as he (Mr. G.) understood, the majority of the House would not force the witness before his committee. He considered that the circumstances of the case fully warranted the House in making this decision, and he justified their conduct on that occasion. Then, was this a disgraceful scene? Was it a disgraceful scene for the American Congress to protect an American citizen? If so, Mr. S. was satisfied to take his share of the disgrace. The witness (Mr. Whitney) was a freeman, and entitled to all the rights and privileges of an American citizen; and as much entitled to protection as the gentleman from Virginia, or any other gentleman. He had before said that he knew nothing of Whitney personally, and what he knew of him from reputation was rather calculated to make an unfavorable than a favorable impression on his mind in relation to that individual; because he was charged with being in league with the banks in Mississippi, which banks, and those that sustained them, were his (Mr. G.'s) political enemies—the enemies of the people—and sustained by the party to which the gentleman from Virginia belonged. Yet, notwithstanding these banks were owned and controlled by the whigs, they were denominated here the pet banks "of the Government." He repeated here that those banks in Mississippi were opposed to the administration, and opposed to the election of himself and his colleague (Mr. Claiborne.) This House was to be looked upon, according to the doctrine of the gentleman from Virginia, as enacting disgrace, because it has sustained an American citizen, in a stand he had taken in not appearing before a committee, whose chairman had made violent charges against him. It was easy to make charges, but it was difficult to prove them. The gentleman from Virginia no doubt believed all the charges he had made against this individual, but he denied that he had proved them. He knew Whitney as the agent of one of the banks alluded to, but further than this he knew him not, nor did he care what his character or conduct had been; he viewed him only as an American citizen, and as such he had rights secured by the Constitution, that those in power had no right to take from him. He considered it a duty to protect every individual until the charges brought against him be proved. Surely he did not look upon this as bowing at the footstool of power to protect this individual under the circumstances of the case. If it was so, however, he was ready to take his share of the responsibility. He cared not what charges gentlemen might make against him; he came there the representative of an independent and of a magnanimous people, who

were not to be deterred from the support of an administration which they believed acted in accordance with the republican principles contained in the Constitution, by the denunciations of any set of men, or any party. He had not changed his mind since he came to this House. He had not seen the corruptions of which the gentleman from Virginia had spoken. And he had not changed his political opinions since he came here. He had not discovered those corruptions, and until he did discover them, he saw no reason for changing his political opinions. When he had the evidence of them presented to him, then it would be time enough to change the opinions he entertained when he entered this House. When that occurred, he could return and tell his constituents the cause of his change, and if they went with him be it so; but until he made this discovery, he should continue to support the party he had heretofore supported.

The gentleman from Virginia tells us that he has discovered that the new States were at the bidding of the President. Now he (Mr. G.) represented one of those new States, and he would take the liberty of informing that gentleman that it was neither at the bidding of the President nor of the monarch of bank rags. Although they sustained the late President and his administration, they did so because they looked upon that administration as acting in accordance with republican principles. This was the reason they sustained that administration, and not because they were bought up. If they could be bought up, they would be bought up by the banks. It was the banks that bought up men, and not the administration. Wherever you find the influence of banks existing to any extent, there you will find the aristocracy of wealth opposed to the democracy of numbers; and wherever you find gentlemen who have worshipped the golden calf, you will find that they have abandoned the good old republican doctrines, and cry out loud and long against the party in power, and those who sustain it. The only persons in the State he represented who were violently opposed to the administration, were those who, like the gentleman from Virginia, claim to possess all the talent, all the decency, and all the worth of the country.

The gentleman from Virginia further charges the democratic party with being sustained by a corrupt press. Now if the press had become corrupt, it had become universally corrupt, and if the press in favor of the administration was corrupted by the administration, the press of the opposition was corrupted in the same ratio by the opposition party, who had the command of nearly all the wealth in the country. A large majority of the presses of the country, so far as his observation extended—and in the State of Mississippi two to one—were opposed to the administration, and this arose, in his opinion, from the fact that the wealth of the country was to be found in the ranks of the opposition. The press, then, with all its corruptions, is against us, if it is corrupt. He denied the charge unconditionally, that the new States had been bought up by the administration, and it was an insult to the people of the new States to make this charge. If the gentleman from Virginia represented a constituency that would be bought up or bribed, he had nothing to say to it; but for himself and his colleague, [Mr. Claiborne] he claimed to represent an intelligent, independent people, who would not, nor could not, be bought up either by the Government or the banks; and who were not to be frightened by the cries of the gentleman and his party from the even tenor of their ways.

Mr. LOOMIS considered the remarks of the gentleman from Virginia as an unjust attack upon the absent members of the House. With regard to the gentleman from Rhode Island [Mr. Pearce] he had nothing to say, but left him to be noticed by those who had succeeded against him in that State. In regard to the gentleman from New York, [Mr. Mann] however, he must tell the gentleman that he was entirely mistaken, as he was not left out in the manner alluded to by the gentleman from Virginia, but remained at home in private life, of his own choice.

Mr. WISE said there were four members of the majority of that committee, who were not here

# CONGRESSIONAL GLOBE.

25TH CONG.....1ST SESS.

TUESDAY, OCTOBER 3, 1837.

VOLUME 5.....No. 5.

BY BLAIR & RIVES.

—WEEKLY—

PRICE \$2, FIRST TWO SESSIONS.

[Continued from No. 4.]

now. He was well aware that the gentleman from Indiana, [Mr. Hannegan] who was a personal friend of his, had been appointed to office by the President, and he believed Mr. Mann had been left out in consequence of the principle of rotation; but Mr. Parks, of Maine, was, he perceived by this morning's news, a defunct Governor; and Mr. Pearce of Rhode Island was signally defeated, and as he was informed, the conduct of that gentleman on that committee, had some weight in the election.

Mr. LOOMIS thought the attack upon those gentlemen was improper, because of their inability to defend themselves, and because that every thing which was said here was caught up and promulgated through the thousand papers of the country. They suffer under the attacks, and have no means of being heard. He should have supposed that all this feeling would have been smothered or forgotten before this, according to the statement of the gentleman from Pennsylvania.

Mr. WISE said he intended, when he was up before, to do justice to the majority of the committee, and to the gentleman from Pennsylvania (Mr. Muhlenberg) especially. It might be thought by some that his remarks conveyed the idea that his friend General Campbell really resisted the majority. That idea, however, was wrong. It was due to the gentleman from Pennsylvania to say, that he condemned the report when it was first presented. Mr. Pearce, of Rhode Island, also said that he did not concur in it, so that there was no necessity whatever for resisting the majority. When the report was first brought in, the minority thought that the majority were going to insist upon having it appear as it was drawn up; but it soon displayed itself in such a character that the majority expressed their reprehension of it. He recollected most distinctly, that his friend from Pennsylvania (Mr. Muhlenberg)—for he must still call that gentleman his friend, as also many of those who belonged to the administration party—condemned it. The majority of the committee had entrusted the drawing up of the report to Mr. Pearce, and Mr. Pearce had put it into the hands of a scullion, who drew it up, and, in consequence of their not having time to read it, took them by surprise. But if Pearce's remarks were to be taken as true, Mr. Mann furnished the materials for that report, and knew what it contained before it was read.

Mr. LOOMIS said it was extraordinary, from the description of the state of good feeling which existed, according to the statement of the gentleman from Pennsylvania, that an attack should be made upon absent members at this late day. Those attacks should have been made when those gentlemen were here, the equals of the gentleman from Virginia; when they could have been met by those gentlemen face to face. Then was the time to make those attacks, and not now.

Mr. LOOMIS was here interrupted by a call for the orders of the day.

On motion of Mr. CAMBRELENG the order adopted for the House to meet, from and after Monday next, at 10 o'clock, a. m. was changed to Tuesday. Mr. C. gave as a reason for the motion that, at that hour, on Monday next, the Committee of Ways and Means intended to hold a session.

The motion was agreed to without a dissenting voice.

Mr. CUSHING said, before the Speaker left the chair, he wished to put a question to the chairman of the Committee of Ways and Means. At the close of the sitting of yesterday, that gentleman was making a suggestion for more prompt action on the part of the House, and Mr. C. begged to ask that gentleman whether he had it in contemplation to endeavor to close the action of the Committee of the Whole on the bill to postpone the fourth instalment this afternoon?

Mr. CAMBRELENG replied that that was un-

doubtedly his expectation, and he hoped he should have the general concurrence of the House.

Mr. CUSHING. That would be of course for the committee to decide. But I wish further to ask the gentleman whether he, as representing a certain set of opinions in that House, intended to choke off debate. (Loud cries of "order.")

Mr. CAMBRELENG. Certainly not on my part.

The CHAIR interposed that the conversation could not be permitted without the assent of the House.

Mr. GARLAND of Louisiana said he also wished to propound an inquiry to the chairman of the Committee of Ways and Means.

Leave being given by the House—

Mr. GARLAND said, in reference to what fell from the gentleman (Mr. Cambreleng) last evening, he wished to inquire whether any, and what, financial arrangements had been made by the Treasury since the passage of one of the bills in the Senate; by what authority they had been made, and whether they had been made merely from the fact of that bill having been made?

Mr. CAMBRELENG rose to respond, but

The CHAIR interposed, and said this discussion should take place only where discussion on the bill was in order.

The House then passed to the orders of the day.

The CHAIR laid before the House a report from the Secretary of the Treasury, of the different methods adopted for the safe keeping of the public moneys of the United States from the first organization of the Government, designating the losses sustained, &c.; which, on motion of Mr. LOOMIS of New York, was laid on the table and ordered to be printed.

On motion of Mr. CAMBRELENG, the House then resolved itself into a Committee of the Whole on the state of the Union, Mr. HAYNES in the chair, and resumed the consideration of the bill to POSTPONE THE FOURTH INSTALMENT WITH THE STATES.

The question pending was on the amendment of Mr. PICKENS to strike from the bill the indefinite clause "till further provision by law," and insert "the first day of January, 1839."

Mr. CAMBRELENG would, with the permission of the gentleman from Maine, take that opportunity of making a response to the gentleman from Louisiana. He expressed his gratification that the gentleman had propounded the interrogatory, because it enabled Mr. C. to explain to the committee what he intended to have done last evening, if he had not been stopped by the gentleman from Maine, (Mr. Smith) who had not, as he had since informed him, understood his object.

What Mr. C. intended to refer to, was that the passage of the bill through the Senate, extending the time of payment of merchants' bonds nine months, carrying the first payment to February next, and that from the merchants' bonds not commencing to be paid till then, there was not only no demand at this time for Treasury warrants and drafts, but they had fallen four per cent. since the passage of that bill by an almost unanimous vote of the Senate.

The bill extending the term for paying the balances due from the banks to four, six, and nine months, having also passed the Senate by, he believed, a unanimous vote, had had another effect on drafts on these corporations, which would render even that portion of these balances unavailable to the Treasury, upon which calculations had been made to pay current expenses. As the credit commences from the day they refuse to pay them, they have every inducement not to pay, and will refuse to do so in all cases, where the bank desires to use the public money for four, six, and nine months.

The consequence of these two measures having passed, the action of the merchants in purchasing these drafts, and the action of the banks in consequence of the passage of that bill, the Treasury was

actually deprived at once of all the funds now in bank throughout the United States, and deprived of all its resources to meet the expenditures of the present year. On this ground, therefore, he appealed to the committee to say how long this Government could be supported, depending as it now did on the trifling cash receipts for lands and revenue.

Mr. C. added that he had been informed they had even been compelled to return thirty thousand dollars from the Treasury to the custom-house at New York, to pay debentures and current expenses. Under these circumstances, he thought he might confidently appeal to gentlemen on all sides of the House for their concurrence in a more prompt action upon the various bills before the House.

Mr. SMITH, who was entitled to the floor, (having temporarily yielded it to Mr. Cambreleng) expressed his regret that his honorable colleague (Mr. Fairfield) yesterday, should have gone back to the period of the passage of the deposit act of 1836. Now Mr. S. had contributed his humble share to that measure, and at no subsequent moment had he seen occasion to regret that course. He asked to whom, or to what, they were now indebted for not having thirty-seven millions of unavailable funds, instead of nine, but to the friends of that measure, and to the measure itself?

In regard to the amendment pending, if it had been originally inserted in the bill from the Senate, he should have voted for it, but he was opposed to it now with the proviso, because it made a general recognition of the system of distribution. The bill of the House he objected to, because it was a virtual, and in fact a positive, repeal of the distribution of the fourth instalment, under cover of a postponement. He maintained that the deposit act was not a contract, nor that it did, in any degree, partake of any of the legal or moral obligations of an instrument of that character. He assented, in part, to the cases put yesterday by the gentleman from New Hampshire, (Mr. Cushman,) but supplied a defect in them, by putting the case of a promise of two hundred thousand dollars, and, between the time of promise and that of payment, it was found to fall short of the amount of the fourth payment or instalment. In this case there would be neither moral nor legal obligation to fulfil the proposition. The law was passed under the supposition that there was a surplus, and the money was received under that same supposition, and that alone; and the moment it was ascertained that no surplus existed, both parties were relieved from the obligations of the law.

He denied that the passage of the bill would be a breach of faith on the part of the Government; certainly not more so than the proposition of the gentleman from Tennessee (Mr. Bell) to withhold the appropriations. If the one was a breach of good faith, the other was equally so. In adverting to the argument of the gentlemen from Pennsylvania and Ohio, (Messrs. Biddle and Loomis,) that their respective States would lose so much money, he expressed his surprise that such an argument, referring to pecuniary interest alone, should come from the sections it did. But the Secretary of the Treasury had himself anticipated the objections on that score. But even if those gentlemen's constituents could be influenced by such a consideration as that, the returns of the deposit banks showed they were better off than they would be, if the distribution were made; for their deposit banks had at this time twenty-five per cent. more of the public money than the fourth instalment would amount to, and it would be admitted that in proportion as those banks possessed the public money, so did they extend their accommodation to the public. In fine, he said, that unless the bill went openly for a repeal, or went for a postponement to a definite period, he should be compelled to vote against it. If the proviso of the Senate's bill were stricken out, he would vote for it, but he could not in the shape in which it then was.

In reference to the Maine election, he said the

result offered no exponent or indication of the will of the people on the measures of the administration, but arose from the combination of a variety of sectional and personal causes. He felt assured that the confidence and approval of the people in those measures had undergone no change.

Mr. THOMPSON of South Carolina desired, he said, to say a few words upon the particular measure before the House, in explaining his reasons for the vote he intended to give. He should vote for the amendment of his colleague, because it would make the measure somewhat more acceptable, but he should vote against the proposition thus amended. He had voted, with all his heart, for the distribution, and his mind had undergone no change, nay more had been confirmed, by every thing that had occurred since, of the wisdom of that measure. One of the very best features of that measure he regarded to be this: that it provided that, should the future exigencies of the Government require the return of the money deposited, it could be made by State taxation, instead of by the will of a majority of the Federal Congress, ignorant, as past experience had furnished a melancholy proof, of the individual interests of the States. If the case should be presented, he should regard himself as false to his principles, and also to those peculiar interests he, in part, represented, if he hesitated in giving back not only this instalment, but even the interests upon it. But he did not regard this as a case of that kind. He had gone over carefully and diligently, the statements made by the gentleman from Tennessee, and had also made a number of calculations of his own, and all came to the same result. The result of that examination was that, deducting \$15,000,000, which the Secretary of the Treasury admitted were not needed, the gross demands upon the Treasury for the past and present year would be over \$70,000,000. In this statement was included \$37,000,000 to be distributed, the \$16,600,000 of unexpended appropriations of former years, and \$32,000,000 of appropriations of last year, making altogether \$85,000,000 odd. Deducting the \$15,000,000 which the Secretary said would not be needed, there was then a clear fund of \$64,000,000, and with the addition of the funds in the hands of disbursing officers, upwards of \$69,000,000. The accruing revenue of the last half of the present year was assumed by the Secretary to amount to \$7,000,000, but it had been demonstrated to Mr. T.'s entire satisfaction to be about \$9,500,000, making about \$85,000,000. As to the funds in the hands of disbursing officers, he would ask, were they not as much the resources of the Government as the funds actually in the Treasury? They were only one step further towards expenditure: that was all. They were still in the hands of the Government. So in taking the revenue of the last half year at seven millions, instead of nine and a half, which was the more correct estimate, there would be a surplus. Hence, if \$9,000,000 be distributed among the States, and \$12,000,000 of Treasury notes, there would be upwards of \$20,000,000 remaining in the Treasury, not to meet the necessities and wants of the Government, but to be placed in the Sub-Treasuries.

In reference to the Sub-Treasury scheme, Mr. T. had one insuperable objection to it, among others. It was, that it would put into the power of the Government the means, not only of coercing the State banks, but of bringing absolute and inevitable ruin upon the communities in which those banks were located. He contended, however, that the condition of the Treasury was not such as to warrant the carrying out such a scheme. The States would not refuse to take the notes of their State banks in payment of the instalment. He adverted to the law itself. It was of a character even stronger than a mere common enactment, for it was a law implying an obligation. The effect of the bills proposed would be to ruin all the State banks, and he would rather see the whole surplus sunk in the ocean, ere he would inflict upon this country the calamity and ruin that must and would result from the coercion of those institutions. He regarded the bills to be all of the same character, part and parcel of the

same scheme, branches of the same system, so running into each other that it was impossible, wisely and intelligently, to look into one of them without considering the whole.

The policy the Government intended towards the banks, Mr. T. designated as not only unkind and cruel, but ferocious. To press them at such a time as this would bring on general ruin. To demand specie from them, they must necessarily press their own debtors for specie; and they, in turn, must press those owing them. Why was the great distinction made between the banks and the merchants? Specie was not demanded of the latter, nor should it be of the others, at such a period as the present.

As to the Sub-Treasury system, [Mr. T. said,] in no possible form in which the ingenuity of man could place it—by no false or delusive name by which it could be called—would he ever assent to it. He had been told that it was not a Sub-Treasury system. He insisted that it was. It was the very Sub-Treasury system he had been taught to look upon for years with alarm and dismay. It was the very Sub-Treasury system projected by a man he understood was holding an appointment at Washington, and who first became known to the country by the publication of this project—he alluded to Mr. Gouge. It was a proposition against which Mr. T. had been long warning, and he saw nothing then to change his position.

It was called not another experiment, but an "expedient." The word "experiment" had become odious; and he had strong reasons for believing that, if they were to go on much longer under the present order of things, they would run through the whole vocabulary of the English language for terms. However, it was a somewhat favorite sign of things, that the Jack Cade banner was to be taken down, and to be substituted by the ferule of the schoolmaster! This at least is a good sign, for that word was well chosen. The word "expedient" meant something employed in an exigency, and no word in the English language could have been better selected for the present purpose than that word "expedient."

Mr. T. then went into the objections to the system in question. The primary and main one was that it put into the hands of a Government, already armed with the sword, the unrestricted, free, uncontrolled, and almost irresponsible command of the purse strings. The present incumbent of the Executive chair was not able to wield the sword of Achilles, and therefore he must have in his own hands the complete control of the whole revenue of the country, to be used for party purposes, in elections, &c. Mr. T. put the case of an approaching election in the city of New York. How easy might it be, on the eve of that election, to forward on three, four, or five millions of dollars, to be placed, perhaps, in the hands of a single man or institution, to be used in controlling the election. Was it wise, prudent, or just to throw into the way of any set of men such a power as this? And what was it but giving the Federal Executive unlimited power over the whole money of the country, and in the most objectionable form? Mr. T. should infinitely prefer a Government bank, organized as a Government bank, with branches in the several States. Not a Sub-Treasury scheme! Why it was a Sub-Treasury system in its most irresponsible and most dangerous form. Nay, he would go further. The scheme was not only the embryo of a Government bank, but it was in itself, to all intents and purposes, a Government bank of issue and deposit. Unquestionably of deposit, for the public funds had to be deposited there. Unquestionably of discount; for how else were their funds to be disposed of from one place to another? There would necessarily be a vast accumulation in the city of New York; in another region, where payments were required to be made, there might be no funds; and how were they to be transferred? In wagons? No, but by bills of exchange, to be bought and sold, either with a profit or loss.

This, too, would produce another evil. They would be destined to see acted over there again, claims after claims, coming in day after day, of the

same character as the noted Purviance claim, which occupied half a century.

It was also to be a bank of issue. These warrants would not only pass current from one agent to another, but the Government itself was directly to issue a currency, in the form of notes, to be signed by the Secretary of the Treasury as cashier.

There was also another objection, not less insuperable, and that was the insecurity of the public money. Could bond to a sufficient amount be given by individuals to secure the Government from loss? Impossible.

Mr. T. reiterated his condemnation of what he described to be an effort to enlist popular prejudice against the deposit banks for their suspension of specie payments. They had never been able to pay the deposits in specie, and the administration knew it.

They were no more able to do so when the public money was first deposited with them than they were at the present time, and he adverted to the condition of the New York banks in proof of this fact. The Secretary knew, at the time he deposited, that they could not; and yet he deposited the money with them, and continued to do so, their condition remaining the same, he all the time telling Congress it was safe. And, added Mr. T., they were safe, and so they still were, unless society should be altogether torn up by the roots. They had not specie, it was true, but they had that which was as good. They had liens upon all the property in the country.

But did the Government itself pay in specie? Could it pay in specie? Unquestionably. How? Why, it possessed stock which, thrown into the European market, would procure as much specie as it wanted. He insisted, however, that in refusing to pay specie when they did, the banks had not only acted dishonestly, but they would have acted fraudulently if they had not, because they would thereby have given a preference to those living near them over the distant creditor; have prevented that general distribution of what funds they had among their whole creditors, and would have disabled themselves from paying a large portion of them at all. He then contrasted the conduct of the French Government during the time of the embarrassment consequent upon John Law's Mississippi scheme, with that of the United States in the late crisis, which he designated as atrocious. He also, for the same reason, adverted to the conduct of the British Government in 1797, which, on a like occasion, when ruin and universal distress threatened to engulf the commerce and trade of that country, came forward with the offer of a loan of several millions of exchequer bills to the merchants, the mere offer of which alone averted the impending calamity and restored confidence.

Mr. T. then entered into a variety of statements in support of his opposition to the recommendations of the President—the bankrupt law in particular. He examined the principles and effects of that law in England, and pronounced a similar one here, if adopted, to be one of the most unconstitutional and insolent assumptions of power ever set up in the history of this Government. He concluded by repeating his declaration, that he should support Mr. PICKENS's amendment, as making the bill less objectionable; but even should the amendment be engrafted on it, he should vote against the whole proposition as delusive, not required by the state of the Treasury, and inexpedient.

Mr. HALSTEAD asked the indulgence of the committee to state a few of his reasons for opposing the bill. Two of the grounds on which he based his opposition were, first, that the bill was unnecessary; and, second, that in the present state of the country it was inexpedient. On what grounds did the advocates of the bill rest their support? They said that there was a deficiency in the public Treasury. But he had been informed that there was a doubt on that subject; and if it should be shown that a doubt existed, that doubt, by right, belonged to the people, and not to the Government. Admitting, for the sake of argument, the statement of the Secretary to be correct, the whole amount of deficit was about nine millions of dollars.

The question then was, had not the Government

available means to meet the deficiency without passing the law? It had been said; that there were in the hands of disbursing officers five millions of dollars. Why not take that money? It was also said that the Government owned several millions in United States Bank bonds. Why not resort to that? He would much rather resort to either of those than to pass the proposed bill. But there was another source. The President had told them in his Message that the last Congress had last year appropriated six millions more than was asked. Then why not resort to that in the present emergency? Thus it was evident that there were from eighteen to nineteen millions of dollars available to Government from these sources. The advocates of the bill were attempting to pass it through the House under false colors. The bill said that the instalment would be postponed "until a further provision by law." There was no ground to suppose that the law would ever make that provision, and it was certain that it never would be made. He deprecated the idea of issuing Treasury notes, inasmuch as it would be the same as creating a national debt. He would, then, endeavor to show that the bill was unnecessary and inexpedient in the present state of the country. It had been said that the agreement between the Government and States was not a contract. What was a contract? A contract was an agreement between two parties to do a particular thing. He would hold that the United States Government was a corporation or party able to make a contract, as were also the State Governments; and when the latter agreed to accept what the former offered, that amounted to a contract between them. The Government had been held up as the creditor of the States, and as possessed of the right to exact payment from them. But instead of the General Government acting the miser, and demanding its "pound of flesh," it ought rather to act as the parent to the child, or the guardian to his ward. The aim of the Government should be the benefit of the majority of the people. The preamble of the Constitution told them that one of the objects of the Confederacy was the welfare of the people; but now a new reading was given to it. It was said that the Government had nothing to do with the people—it must take care of itself. When the ship of State was sinking, the Government took the long boat and left the people to perish. [Mr. H. then entered into a statement showing the difference in the amount of discounts and circulation of the deposit banks between the 1st of March and the 15th of August of the past year, to show the probable effects of a further withdrawal of specie from them.] For his part, if there was any source of relief he would be glad to see it, and to have an opportunity of drinking from the refreshing stream. What was the measure of relief proposed? It was similar to that, by which Dionysius the tyrant proposed to relieve the statue of Jupiter. There was a robe of massive gold on the statue, which the tyrant took away, alleging that it was too cold, and substituted a garment of wool. In like manner had the people been fleeced of the golden robe of their currency, and had been given a garment of rags. It had been said that the President would follow in the steps of his predecessor. If he did so, there would be a fair prospect of relief! for Andrew Jackson never fulfilled a single promise he had made to the people previous to taking possession of the Executive chair, or in his inaugural address.

Mr. WILLIAMS moved that the committee rise, explaining that he made the motion from the evidence exhibited that a number of gentlemen wished to address the committee, (several gentlemen rose to address the Chair at the time) and it was obvious they could not get through the bill that night.

The motion prevailed—ayes 90, noes 73; when the committee rose, and the Chairman reported progress.

Mr. GARLAND of Virginia rose and stated that, owing to domestic matters over which he could not dispense, he should be compelled to leave the city on Wednesday next; and in consequence of the peculiar position he occupied before the House and

the country, he was very anxious to submit his views before he left, and he gave notice that, on Monday next, he should throw himself upon the indulgence of the House for leave, at that time, to introduce the bill of which he had given notice some days since.

On motion,

The House then adjourned.

#### IN SENATE,

Monday, September 25, 1837.

Mr. McKEAN presented a memorial from Geo. M. Alsop, and one hundred and twenty other legal voters of Philadelphia; also, from Wesley Havall, John Burtis, and others, of Philadelphia city and county; also, from Benjamin J. Janey, William Simpson, and others, of Philadelphia city and county; also, from Jane Shoemaker, Sarah Burtis, and others, of Montgomery county, Pennsylvania, remonstrating against the annexation of Texas to the United States; which were laid on the table.

Mr. CLAY of Kentucky presented a petition from citizens of Wheeling, praying the establishment of a national bank; also, one from citizens of Baltimore, praying the incorporation of a national bank, or the substitution of the United States Bank of Pennsylvania: referred to the Committee on Finance and ordered to be printed.

Mr. BUCHANAN presented a memorial from sundry citizens of the city and county of Philadelphia against the annexation of Texas; which was ordered to lie on the table.

Mr. WEBSTER presented a memorial from the Insurance Companies of New York, Baltimore, and Maine, praying indemnity for loss of a vessel captured by a French privateer in the year 1800; which was referred to the Committee on Foreign Relations.

Mr. NILES submitted the following joint resolution:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the two Houses of Congress will adjourn, and close the present session on Monday, the 9th of October next.*

Mr. HUBBARD introduced a resolution that the meeting of the Senate from and after its passage should be 10 o'clock.

#### SPECIAL ORDER.

The Senate then resumed the consideration of the bill imposing certain duties on public officers as depositories in certain cases. The question pending being on Mr. CALHOUN'S amendment to separate the Government from the banks.

Mr. CLAY had waited to hear all the plans that could be brought forward to redress the evils under which we labored. He wished to learn from all quarters of the Senate, without regard to the opposition, the best means of alleviating the distress, and had, with that view, divested himself of every party tie, of every passion or prejudice that might be supposed to lead him from his purpose. He was, however, compelled in frankness to declare, that so far, he had heard nothing from one side but temporary expedients, and the other an aggravation of the ills instead of a cure. No matter from what cause our distresses sprung, sufficient for us was it to know they did exist, and under these circumstances, it was the duty of every parental Government to afford relief. If the cause of the distress was by the action of the Government, how much more necessary was it to correct the consequences of its own error. In looking back, and tracing these evils to their true source, it was far from his wish to cast reproaches, or awaken animosities; under the extreme suffering that pervaded the land, he hoped that all past political strife was forgotten. Five years ago we had the soundest currency in the world, its character stood high in every quarter of the globe; it regulated foreign and domestic exchange, and controlled, and kept within healthful bounds, the private banking institutions of the country. If the currency was in that high perfection then, and now in a state of utter derangement, and predictions had been made as to the consequences of disturbing it, and fulfilled to the very letter, could any rational man doubt the causes of the present condition of our beloved country?

The President, in his Message, had referred to the

condition of Europe, and told us that the same causes that produced the distress here, had operated there; this was a most erroneous conclusion. The monetary system in England was sound and perfect, and ever had been so. The question of chartering the banking institutions of the two countries was a contemporaneous one. In England, there was no refusal to charter; here there had been. There, business was active and thriving; here, every thing was languid and prostrate; there, the currency was sound—no suspension of specie payments; here it was deranged, and specie no where to be seen. Had the United States Bank been rechartered, these evils would not have been felt; or if felt in a limited degree, would soon have passed off.

Mr. Clay read from documents, to show that instead of an expansion in England, as stated in the Message, there had been an actual diminution, and how the Message could justify itself by such an assertion, was to him astounding.

The greater portion of the distress that prevailed in England, was owing to her connection with our country. England had the largest trade with us, and France next, and France had suffered in proportion. All the great houses that had failed in Europe, were more or less connected with American trade.

An explanation would be found for all the causes of our present state in the conduct of the General Government in refusing to recharter the bank. The removal of the deposits, the gold bill, and, last not least, the glorious Treasury circular so often referred to. The United States Bank would have acted as a sentinel, keeping the other banks in their proper spheres; but, in the present system, the responsibility was divided among some 50 or 60 banks, all ignorant of each other, and of the means of meeting the exigencies of the Treasury, and having no affinity with it.

Mr. C. asked what was intended to be done ultimately with the deposits; it was their intention to remove them at some time he presumed, and then the consequences would have been alike injurious to those banks. The deposit law of 1836 took the surplus and placed it in the keeping of the States; that was calculated to check the expansion of the banks, to open their eyes, and arrest their ruinous progress.

Mr. C. said there might be another way of accounting for the embarrassment; for the last four years our Government could not be said to be a free Government. In a free Government, the will of the people controlled the Chief Magistrate; in a despotic one, the Chief Magistrate controlled the nation. He did not believe the Jackson party would have governed the country so badly, if it had been permitted to have its own way. "It was not so much want of wisdom as want of firmness. Its fatal error had been in not listening to the sound dictates of its judgment, but in justifying all the President did. He appealed to Senators if such were not the fact. He did not wish them to make any precious confessions to him, but to satisfy their own consciences. He believed a majority of the party here were in favor of a recharter of the bank; a majority of them had discountenanced the removal of the deposits, and the Treasury circular; but the will of one man had controlled the party, and the consequences were what we now beheld them.

He alluded to an honorable Senator whom he had long known, he might say from his early youth, who had introduced the subject of the recharter in the Senate and supported it with great ability, and, in three weeks afterwards, applauded and extolled the veto. Where was he now? The fact might speak for itself. When a man was found passing, as it were, a self-castigation on his own acts, and extolling the conduct of the Executive veto on those acts, filling a splendid mission abroad, it was only for enlightened men to pass upon such facts.

Mr. C. adverted to the plans proposed by the administration as fraught with the worst consequences to the people—he alluded particularly to the bill in relation to this district, which he called a bill of pains and penalties, and doubted the constitutionality of the proposed proceedings in relation to the State banks. He maintained there was

not a sufficiency of the precious metals in the world for the purposes of commerce, to allow us our distributive share. He instanced the city of New York, where the business in one year alone was one thousand five hundred millions of dollars. A friend had assured him of the operation of one of the banks being two millions of dollars in one day. It was impossible to do without the credit system, for the purposes of the commerce of the country, and the common operations of the Government. He maintained that the specie circulation was liable to variation as well as a mixed currency. The sensation would be the same in proportion; both were governed by the commerce of the country, and the quantity or scarcity of it in the market.

Mr. C. said he had heard it intimated that there would be no use in passing a bill to recharter a United States Bank, as the President would certainly veto the measure. He did not believe there had been any such expression of determination on the part of the Executive. If there had been, it was prejudging the matter. He asked what would be said, if the Senate were to say that it would be of no use for the Executive to make certain appointments, as they would not be confirmed. They might take his word for it, that if the will of the people were clearly manifested in relation to this subject, the President would never veto the bill. He was too good a democrat to divorce himself from the people, whatever other divorces he might contemplate.

He argued that if this bill should be passed, the most disastrous consequences would ensue; that the deposit banks had not fulfilled the expectations of those who had advocated the removal of the deposits; and denied that the domestic exchanges of the country could be as well regulated by the State institutions as by the Bank of the United States, and that the "experiment" was a total failure. He next adverted to the question of currency, and contended that one of gold and silver only was not practicable, if desirable; that it was not just, if both desirable and practicable; that it was not within the scope of the powers of the Government. He said, that if even none of these objections existed, that it would be contrary to the habits of this people; unjust—eminently unjust, dangerously unjust, in the relation which exists between man and man. Having made some observations in regard to the importance of the duties which he and other Senators had been convened here to discharge, he continued:

Mr. President, never before have I felt myself placed in an attitude in which I felt such a deep and profound regret, as when I come to speak of the measures which, it appears to me, alone can relieve the country. I know, sir, that partial friends have looked to me (probably on account of some instrumentality I may have had in assisting them in former epochs of our history—in times of hazard and difficulty) for some measures of relief—for some measures of compromise and conciliation, which shall restore to the land prosperity, and bring the country back to that high and palmy state in which it was but a short time ago. I acknowledge myself not adequate to furnish a remedy. I have seen this country in other trials and in other difficulties, threatening its very destruction, but for which remedies were to be found. In the present instance, however, I see nothing but an impenetrable gloom hanging over us for the future as the present. I see nothing that can save the patient but the patient himself. He alone can administer to the disease, for he has the best knowledge of it, and has it in his power to bring himself back to health. Gladly would I have fulfilled those expectations which partial friends, who have too much overrated the humble powers I possess, have directed towards me. But there is no remedy—no remedy. I repeat, that I can propose, politically constituted as the Senate now is.

Mr. C. proceeded to condemn the Sub-Treasury scheme on the ground of its being, in his opinion, an "experiment" which ought not to be tried, as it was pregnant with evil to the country. He asserted that it was useless for him, or those with whom he acted on that floor, to bring forward any measure calculated to afford relief to the country, and

which they had reason to believe would not be acceptable to those who controlled the deliberations of that body. He said that he felt himself compelled to declare that, after the utmost consideration he had been able to give to the state of the currency and the business of the country, he could conceive of no remedy for the existing disorders and evils under which we were laboring but in the establishment of a Bank of the United States. No, he could conceive of none, without the agency—the instrumentality of such an institution—a Bank of the United States, under such restrictions as should have been suggested by experience; and especially under that restriction which he thought would be the most salutary of all, to guard against evils connected with a paper medium, and that was, a limitation on the powers of the bank which would cut off all motive for making excessive issues. He regarded the establishment of a Bank of the United States as a settled question. His opinion was that, for a great many years before, and indeed up to the period when the late bank was overthrown, a majority of the people were in favor of the existence of such an institution. He believed that it was essential and necessary to the best interests of the Union.

Mr. C. adverted to several points in the President's Message, and among others, to that in reference to the question of "bank or no bank," having been decided upon by the people. He denied this position, and insisted that the question had never been tried. It was his solemn conviction, he remarked, that at no period, since 1816 to the present time, if the question were fairly presented to the people—simple, naked, and alone—there would have been a large majority in favor of a bank. If the question were tried in that quarter of the country from which he came, the people would be decidedly for having an institution of that character. It was indispensable to them, for the interior States were so situated that they could not do without one. Delay, put it off from year to year, but come it must.

The question of a sound currency and the Union, in his opinion, were identical. And if a bank, in some form or other, should not be established, means, sooner or later, would be resorted to, to supply a substitute for it. He replied to the argument that to establish a national bank would be to aggravate the existing distress of the country, and that there is not specie capital to put it in motion.

He contended that the President was mistaken, and that the establishment of such an institution would have, at this juncture, a twofold effect: first, of relieving us of our foreign debt; and, second, of regulating the present deranged state of the currency. His firm belief was, that if a bank were to be established, putting into its vaults the public deposits, and making its notes receivable in payment of the public dues, it would, in a short time, not only put the bank in operation, but would gradually drag after it all the other banks which are solvent. He gave it as his opinion that if Congress had authorized a loan to be contracted, of fifteen or twenty millions, redeemable in eight or ten years, the greater part of it would have found its way to England, liquidated our commercial debts, and would have prevented the exportation of specie, and thus would have enabled the banks to resume. To obviate the objections which some entertain in regard to a Bank of the United States, an account of foreigners holding stock in it, and the political influence they think the stockholders generally exercise, a provision might be inserted in the charter prohibiting them from voting at the elections.

Mr. C. went into an examination of Mr. RIVES'S bill, and declared that he conceived it to be wholly insufficient to accomplish the purposes which that gentleman has in view. He said that he preferred the project of the Senator from Indiana, (Mr. Smith,) to the Sub-Treasury scheme, or the plan of the Senator from Virginia—not, however, as the best adapted to the present state of the country. He intended to vote for the postponement of the whole subject until December, though he could have wished that the Senator had moved the indefinite postponement of it. After making a few other remarks in relation to the relief of the country, he concluded by saying: "Sir, let me ask whether it

is not wiser and better for us to go home—mix again with our constituents—talk with the people—ascertain their wishes—consult with them, and advise with them, for they are, in the general, the safest counsellors? And then we shall come back here instructed by their wants and wishes as to what we shall do. Above all, I do hope that Congress will not go back with invidious distinctions around them—that they have taken care of themselves and the Government, and abandoned this great, enlightened and free people to the deplorable situation in which we now find them."

Mr. CLAY addressed the Senate for upwards of three hours in opposition to the bill.

The question was then taken on the motion of Mr. KING of Georgia to postpone the bill till the first Monday in December next.

Mr. BENTON asked for the yeas and nays, and the question being taken, was decided in the negative—yeas 19, nays 27, as follows:

YEAS—Messrs. Bayard, Black, Clay of Kentucky, Clayton, Crittenden, Kent, King of Georgia, Knight, McKean, Nicholas, Prentiss, Robbins, Ruggles, Smith of Indiana, Spence, Tipton, Webster, White, and Williams—19.

NAYS—Messrs. Allen, Benton, Brown, Buchanan, Calhoun, Clay of Alabama, Fulton, Grundy, Hubbard, King of Alabama, Linn, Lyon, Morris, Niles, Norvell, Pierce, Preston, Rives, Roane, Robinson, Smith of Connecticut, Strange, Tallmadge, Walker, Wall, Wright, and Young—27.

The bill to remit duties on certain goods destroyed by fire in New York; and

The bill for the suppression of Indian hostilities; were taken up, read a second time, and ordered to be engrossed for a third reading.

On motion of Mr. GRUNDY, the Senate went into the consideration of Executive business; and when the doors were reopened,

Adjourned.

#### HOUSE OF REPRESENTATIVES,

MONDAY, September 25, 1837.

Mr. WHITTLESEY of Ohio said, that before proceeding to business this morning, he wished to make an inquiry of the Chair in relation to providing seats for persons who had the privilege of coming on the floor of the House. He wished to know whether the Speaker considered that he had the power to provide seats for those persons. In former times, seats were provided for persons who were admitted on the floor of the House, and he thought it would now be treating those persons with no more than proper respect to provide seats for them in front of the Clerk's table, or in the other vacant places on the floor of the Hall.

The SPEAKER replied that the rules gave the general direction of the Hall to the Chair, but he did not know that it gave him the power to provide seats for privileged persons on the floor. He would, however, be guided in the matter by the House; and if it was the pleasure of the House, the Chair would direct seats to be provided for Senators and other privileged persons. He would take the occasion to remark, however, that it had never been done heretofore by order of the Chair.

Mr. WHITTLESEY said he believed that seats had been provided some years ago by the officers of the House, and he thought it would be nothing more than proper that it should be done now. It might perhaps not be in our power to provide seats for the whole of those persons, but they might be furnished for a portion of them.

The SPEAKER said if it was the general sense of the House, he would direct seats to be provided.

Mr. MERCER was understood to object, on the ground of the great difficulty of hearing in the hall; and remarked, that if persons were permitted to fill up the vacant space in front of the Chair that this difficulty would be increased. The conversation here dropped.

Petitions and memorials were presented by—Messrs. ADAMS, PHILLIPS, LINCOLN, BORDEN and PARMENTER, of Mass.

[Mr. PARMENTER presented remonstrance of Harriet C. Kenrick and 46 others, of Newton Centre—Sally Fletcher and 50 others, of Carlisle—Ma-

ry C. F. Browne and 72 others, of Shirley—Sally Dunn and 64 others, of Dunstable—Melania A. Parker and 414 others, all of the county of Middlesex, Massachusetts—against the annexation of Texas.]

Mr. CRANSTON, of Rhode Island.

Messrs. ALLEN and SLADE, of Vermont.

[Mr. ALLEN, of Vermont, presented the remonstrance of Samuel Kingsbury, and 121 others, of whom 70 are legal voters, of Underhill, in the county of Chittenden, Vermont—Augustus Young, and 29 others, citizens of Craftsbury, county of Orleans, Vermont—Bethuel Holcomb, and 102 others, inhabitants of Annsville, Oneida county, and State of New York—against the annexation of Texas to the Union.]

Messrs. SERGEANT, FRY, NAYLOR, S. W. MORRIS, and MATTHIAS MORRIS, of Pennsylvania.

[Mr. M. MORRIS presented two memorials of similar import, signed by citizens of Bucks county, Pennsylvania, one containing 32 names, and the other 45, remonstrating against the annexation of Texas to the Union.]

Messrs. CRAIG and ROBERTSON, of Virginia.

Mr. CHAMBERS of Kentucky.

Mr. HEROD of Indiana.

Mr. BUCHANAN, from the Committee of Elections, made a detailed report on the subject of the Mississippi elections, accompanied with the following resolution:

*Resolved*, That Samuel J. Gholson and John F. H. Claiborne are duly elected members of the 25th Congress, and as such are entitled to take their seats.

The report having been read—

Mr. BUCHANAN moved that it be made the order of the day for to-morrow during the morning hour, and printed.

Mr. MERCER considered this question one of very great importance, and one which should not be decided without being fully discussed. He therefore moved that the report be committed to a Committee of the Whole on the state of the Union.

Mr. MAURY (a member of the Committee of Elections) stated that the committee were divided on the subject; but they deemed it unnecessary to present a minority report. They had determined to permit the majority to bring forward their report, and when the subject came up in the House, to move to amend it, in accordance with their views.

Mr. WHITTLESEY of Ohio would inquire whether there had ever been a report of a committee on the subject of a contested election decided without going to a Committee of the Whole. He considered that the proper course for this report to take, and hoped that the House would determine on giving it that direction.

Mr. WILLIAMS of North Carolina hoped, as this was as important a question as any which might be brought before the present Congress, that it would take the usual course. It was a question which required very grave deliberation, and free and full discussion, and he therefore trusted it would be referred to the Committee of the Whole on the state of the Union. The question involved a grave constitutional question, and he wished to see it settled, and settled after full, free and deliberate discussion, which he considered it could not receive out of the Committee of the Whole.

Mr. HARRISON of Missouri then rose and said as there appeared to be a great many empty seats in the House from some cause or other, he would move a call of the House; which motion was agreed to.

The Clerk proceeded to call over the roll; but many members in the mean time coming in—

On motion of Mr. MERCER, the further proceeding under the call was dispensed with.

Mr. HAYNES said that several gentlemen had expressed a belief that no question of this sort had ever been considered and decided before this House, without being previously referred either to the Committee of the Whole on the state of the Union, or a committee of the whole House. Now, according to his recollection, the report of the committee in

the case of Newland and Graham, from North Carolina, at the first session of the last Congress, was considered exclusively in the House. He had not had time to follow that case through on the journal from the time it first came into the House; but he was very certain that the whole discussion upon it took place in the House. The journal, however, would show what course it had taken; but whether it had been the uniform practice of the House to refer subjects of this kind to a committee of the whole House or not, the peculiar situation of the public business should, in his opinion, induce us not to pursue that mode. We have been considering for nearly a week a single subject, admitted on all sides to be one of great importance, without seeming to be any nearer its termination than when we commenced. Therefore, even if it had been the uniform practice of the House to refer reports of committees on contested elections to a committee of the whole, the peculiar position in which we were placed was an ample justification, in his opinion, for changing our course of proceeding, and give this subject only the morning hour, without referring it to a committee of the whole. He was, therefore, decidedly in favor of the motion first submitted by the honorable gentleman from Pennsylvania, (Mr. Buchanan.)

Mr. WILLIAMS, of North Carolina, believed the gentleman was correct in saying that the case of Newland and Graham had been considered in the House, but he considered these to be subjects of too great importance to be disposed of in that way; and he wished to be allowed to say to the gentleman from Georgia [Mr. Haynes] that he considered this subject one of infinitely more importance than any one which can be presented at the present session of Congress. We all know that subjects receive more grave, calm and deliberate consideration before the Committee of the Whole on the state of the Union, than when they were taken up and debated morning after morning, during the morning hour in the House. This being the case, it was due to the House of Representatives, it was due to the people of Mississippi, it was due to the nation, that this subject should be referred to the Committee of the Whole on the state of the Union.

Mr. HAYNES would merely say, in answer to the gentleman, if it was expected that this question would receive more ample discussion than what took place in the case of the North Carolina contested election, that he did not know that it would be desirable to send it to a Committee of the Whole. He considered that that question was as fully discussed as any subject need be. He was utterly at a loss to perceive why there should be so much anxiety to have this subject referred to a Committee of the Whole. He believed that, upon a reference to the history of the various contested elections, from the origin of the Government down to the present time, it would be found that a large number of them had been settled without much discussion. He differed entirely from the gentleman from North Carolina, (Mr. Williams,) in giving more importance to the discussion of this subject of the Mississippi election, than the questions which had been already referred to the Committee of the Whole on the State of the Union. He considered that their first duty was to do all that they could for the relief of the country.

Mr. MERCER preferred sending the subject to the Committee of the Whole on the state of the Union, because it would receive a more calm and full discussion than in the House, and prevent such scenes as were enacted in the case of the North Carolina contested election at the last Congress. He believed cases of contested elections had seldom been settled, without being referred to a Committee of the Whole.

Mr. HAYNES then referred to a case of contested election from some of the districts in the western part of the State of New York, which came before the House at the first session of the nineteenth Congress; and was settled as soon as the report of the Committee of Elections came in, and never was committed or debated.

Mr. GLASCOCK considered that the proper mode of disposing of this report, was the adoption

of the motion submitted by the chairman of the Committee of Elections. It is well known that in cases of contested elections heretofore, that the parties have been present with all the testimony which they could collect, to lay before the House; but this was an exception to the general rule, there being no person here to contest the election; and, in his opinion, it could be calmly and dispassionately considered in the House, and disposed of without any of the excitement which frequently attended cases of contested elections. This was not a case where the opposing candidates came forward and contested the seat of those gentlemen because of illegal votes being given; but it was a case submitted by the gentlemen themselves, who look upon it as a constitutional question, which they desire to have settled for their own satisfaction, and for the satisfaction of the people of Mississippi. Those who are of opinion that these two gentlemen are not constitutionally elected, will have the opportunity of laying their views before the House, and those who believe they are constitutionally elected, and entitled to their seats, can reply to them, and give their views. This can be done in the House calmly and dispassionately, and then every gentleman will be prepared to form his own opinion. He imagined that the question now pending before the House during the morning hour—the inquiry in relation to the Florida war—would be disposed of on to-morrow morning; and then this question in relation to the Mississippi election can be taken up, and be easily, fairly, and correctly disposed of by taking it up every morning, during the morning hour, until it is decided.

Mr. CAMBRELENG suggested to the gentleman from Pennsylvania (Mr. Buchanan) that the House would be better able to dispose of this question after the report was printed and laid upon the table. He therefore hoped the gentleman would modify his motion by moving to postpone the subject until to-morrow, or Wednesday, and have the report printed in the mean time.

Mr. BUCHANAN then modified his resolution by moving to postpone the further consideration of the subject until Wednesday next, and that the report be printed.

Mr. HARRISON of Missouri made some remarks in opposition to committing the report to a Committee of the Whole, and referred the House to the case of Graham and Newland, as having received ample and satisfactory discussion in the House without a reference.

Mr. GHOLSON hoped that this report might take such course as to ensure the action of the House upon it at the present session. If it was referred to the Committee of the Whole on the state of the Union, and other subjects were permitted to take precedence of it, it would be impossible to have it disposed of at the extra session; and for this reason, and this reason alone, he hoped the motion of the Chairman of the Committee of Elections would prevail. Under the circumstances of the case, he sat here with extreme reluctance, and he hoped this subject would occupy the morning hour until it was settled. Surely, in his opinion, would not occupy a great length of time to settle the question, and he hoped it would be disposed of as speedily as practicable, because at present there was but one candidate before the people of Mississippi for election at the fall elections, and he felt authorized to say that there would be no other until this question was determined by the House.

Mr. WHITTLESEY said if the question was referred to the Committee of the Whole it would be within the power of a majority of that committee to take it up at any time they pleased, no matter what other business there was before it.

The question was then put on the motion to postpone till Wednesday, and printed, and agreed to, without a division.

Mr. CAMBRELENG, from the Committee of Ways and Means, to which had been referred several memorials on the subject of a national bank, reported the following resolution:

*Resolved*, That it is inexpedient to charter a national bank.

Mr. C. said that this resolution was presented to the House, merely for its decision, without debate,

The gentleman from Kentucky (Mr. Chambers) had said this morning on the presentation of some petitions, that a dark cloud was hanging over the administration, and he now barely wished to tell that gentleman, and he now barely wished to tell that gentleman, he apprehended that the friends of a national bank had a dark cloud hanging over them.

Mr. CHAMBERS said he had referred to the dark cloud hanging over the prospects of the administration in the West.

Mr. CAMBRELENG remarked that he had referred to the dark cloud which was hanging over the friends of a national bank, here and throughout the country. He did not, however, wish to debate the question, and simply called for the yeas and nays, which were ordered.

Mr. EVERETT said the gentleman from New York, (Mr. Cambreleng,) had introduced this subject, and called upon the House to give a silent vote upon it, and send it out to the people of the country, as the expression of opinion of the House of Representatives of the United States. His sentiments on this subject were known to the House; it was known that he was in favor of a national bank; and whenever the proper time arrived, he should give his views on the subject fully. He would not, however, now go into this subject. The Executive had interposed his veto in advance upon a national bank, and there would be no opportunity of bringing this question forward at present. He hoped no friend of a United States Bank would think of bringing forward a proposition for the establishment of a national bank, until he was certain of there being two-thirds in its favor in Congress. If the President of the United States had left the matter, as he ought to have left it, to the representatives of the people, and said that he would carry out the measures agreed upon by Congress, there might have been some expectation of carrying through some permanent measures of relief to the country. But the President had brought forward some little petty measures for the relief of the Government, and said, when you adopt these measures, you may go home. All the measures of relief were for the relief of the Government, and there was no relief proposed for the people or the country. Mr. E. concluded by moving to lay the resolution on the table.

Mr. CAMBRELENG called for the yeas and nays on this motion, which were ordered, and were—yeas 89, nays 122, as follows:

[The yeas and nays could not be obtained for this night's paper. They will be given on to-morrow.]

Without taking the question on the adoption of the resolution, on motion of Mr. CAMBRELENG, the House passed to the orders of the day; and, on motion of the same gentleman, then resolved itself into a Committee of the Whole on the state of the Union, Mr. HAYNES in the chair, and resumed the consideration of the bill to

**POSTPONE THE FOURTH INSTALMENT WITH THE STATES.**

The question pending was on the amendment of Mr. PICKENS to strike from the bill the indefinite clause "till further provision by law," and insert "the first day of January, 1839."

Mr. WILLIAMS of Tennessee, who was entitled to the floor, gave way to

Mr. GARLAND of Virginia, who addressed the committee at length in support of the proposition submitted by him some days since, (the same as Mr. Rives's bill, introduced in the Senate,) and in a review of the Sub-Treasury scheme and its effects, Mr. G. entered largely into a defence of the State banks, and quoted the opinions of a number of distinguished men in support of them. The position he then occupied was the same he had occupied when he was first elected to the House over his able predecessor, (Mr. Gordon,) who had proposed the identical scheme now recommended by the President of the United States. Mr. G. had not changed, and should maintain his position until his constituents instructed him out of it. He then went on to show that the proposition he had submitted was a safe and practical one, republican in its principles, and had the sanction of the greatest minds of the country. Having addressed the House for upwards of two hours, he gave notice that he should extend his remarks in his prepared speech; and

then cite in full the authorities he had barely adverted to in his remarks on the floor.

Mr. WILLIAMS of Tennessee then obtained the floor, and addressed the committee in opposition to the bill withholding the payment of the fourth instalment, on the ground that it would amount to the violation of a contract. The scheme proposed by the President of the United States and the Secretary of the Treasury, he condemned *in toto*, as he also did the continuance of the State bank system. All the present embarrassments he ascribed to the conflict between the late administration and the Bank of the United States, in the removal of the deposits, &c. and he held that the only cure for the existing evils would be the establishment of another bank.

Mr. UNDERWOOD gave notice of an amendment he intended to move as a substitute for the bill providing that, in case the Treasury was unable to pay the fourth instalment, the deficit should be made up by selling the bonds taken from the Pennsylvania Bank of the United States for the stock of the late Bank of the United States.

Mr. RARIDEN wished to give a brief statement of the means which induced him to refrain from supporting the bill. He had come to Congress with the firm determination of supporting the administration, and he deemed it an imperative duty to explain his motives, lest he should be charged with reckless opposition. It was with diffidence that an humble individual like himself ventured to differ from persons elevated on the pedestal of superior endowments; but he considered it incumbent on him to pursue the course he had. He did not consider the object of the bill was simply to withhold the fourth instalment of the surplus revenue from the States. This was a false view of the case. The practical effect of the bill would be to take from the States the amount in hard money to which they would be severally entitled under the deposit act. Some gentlemen had considered the nature of the bill as that of a conflict between the State and General Governments. For his part, he did not view it in that light. In acting on this subject, he considered himself as much the agent and friend of the General Government as he was of the State which had sent him there. He could not comprehend how the general Government could have any claims or interests at variance with those of the several States. The General Government was the creature of the States; they had bestowed upon it all its energies for the performance of certain purposes beneficial to the whole. Among others, the States had invested it with the power of levying taxes for the purpose of carrying out the functions and accomplishing the ends they had designed it to fulfil. The case, then, stood as follows: If, from accidental causes, more money has been collected than is requisite, to whom did that money belong? Did it belong to the agent who had collected it, or to the principals from whom it had been collected? He looked upon it as the common property of the people, and to them it should be distributed. At the time Congress made the deposit law, it considered it calculated to promote the interests and industry of the country. Money was the generator of enterprise. Had it remained locked up in the vaults of the Treasury, it would have retarded enterprise, but by distributing it among the several States, it accelerated and stimulated that spirit, and ultimately caused a greater influx of wealth to the Government. It averted the jealousy with which many entertained, so long as the money remained with Government, lest the party in power should make it subservient to their purposes. He had heard it hinted that the success of a certain party at the elections had been much less since the passage of that act than it had been before, but how true it was, he could not say. Neither could he say that had money been placed in a national bank, its effects would not have been the same, for that institution was managed by fallible human nature, ever liable to err. Such a result might have been probable; but of that it was unnecessary to speak then. He compared the situation of the deposit banks at the time they received the money, with their subsequent state, after they had extended their issues to such an unwarrantable extent, and concluded by declaring it as his firm opi-

nion, that whether the Treasury was full or not, it was expedient to pay the money due to the States, as it would do much good, and prevent much harm.

Mr. CUSHING then moved that the committee rise.

Mr. RHETT expressed a hope that the committee would rise, and report the bill and amendment to the House.

The CHAIR said the motion could not be entertained while an amendment was pending.

The Committee refused to rise—yeas 92, noes 98.

Mr. CUSHING then spoke in opposition to the bill, taking the ground that the deposit act was a contract, and that the law had devolved the responsibility upon the Secretary of the Treasury. He said that the Government having involved them in difficulties, he would not relieve it of responsibility. Moreover, there were not data sufficient to warrant the passage of this bill. Mr. C. then went on to review the message of the President of the United States, as forming the groundwork of all the bills before the House, but, after speaking a few minutes, he gave way to

Mr. MERCER, who moved that the Committee rise. Lost—yeas 69, noes 79.

**YEAS**—Messrs. Adams, Alexander, Heman Allen, Ayckrigg, Bell, Biddle, Bond, Briggs, John Calhoun, William B. Campbell, John Campbell, Wm. B. Carter, Chambers, Cheatham, Clowney, Corwin, Cranston, Crockett, Cushing, Darling, Dawson, Davies, Deberry, Dennis, Evans, Ewing, G. R. Fletcher, Filmore, Rice Garland, Goode, J. Graham, Graves, Greenell, Griffin, Hall, Halsestead, Harlan, Harper, Hastings, Henry, Herod, Jenifer, H. Johnson, Lincoln, A. W. Loomis, Lyon, Mallory, Samson Mason, Martin, Maury, Maxwell, McKennan, Menifee, Mercer, M. Morris, Calvary Morris, Naylor, Noyes, Ogles, Patterson, Pearce, Peck, Phillips, Pope, Potts, Rariden, Reed, Ridgeway, Robertson, Ramsey, Russell, Sergeant, Augustine H. Sheppard, Shields, Sibley, Slade, Stratton, Thompson, Tillinghast, Toland, A. S. White, J. White, Elisha Whittlesey, Lewis Williams, S. Williams, Christopher H. Williams, Wise, and Yorke—59.

**NAYS**—Messrs. Anderson, Andrews, Atherton, Beatty, Beltrne, Bicknell, Birdsell, Boon, Bouldin, Brodhead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, T. J. Carter, Casey, Chapman, Claiborne, Cleveland, Coles, Connor, Craig, Cray, Curtis, Cushman, DeGraff, Dringdoole, Duncan, Edwards, Ewing, Farrington, Fairfield, Foster, Fry, Gallup, James Garland, Gholson, Glascock, Grantland, Grant, Gray, Haley, Hammond, Hamer, Harrison, Hawes, Hawkins, Haynes, Hecay, Holt, Howard, Hubley, William H. Hunter, Robert M. T. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Joseph Johnson, Nathaniel Jones, John W. Jones, Kenble, Kilgore, Klingsmire, Legare, Leadbetter, Logan, Arphaxad Loomis, J. M. Mason, May, McKay, Robert McClellan, A. McClellan, McKim, Miller, Montgomery, Moore, Morgan, A. W. Morris, Muhlenberg, Noble, Owens, Palmer, Parker, Patton, Payson, Penningback, Pettikin, Phelps, Pickens, Plumer, Potter, Pratt, Prentiss, Reily, Rencher, Rhett, Richardson, Rives, Sawyer, Sheffer, Shipley, Smith, Snyder, Southgate, Spencer, Stewart, Tallaferra, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vandever, Wagener, Webster, Weeks, Thomas T. Whittlesey, Jared W. Williams, and Worthington—122.

Mr. CUSHING then proceeded in his examination of the Message. He insisted upon it that nothing had been proven to justify the convening of Congress, nor to make out a case for the propositions under consideration. According to Mr. C's judgment, the first thing that ought to have been recommended should have been a direct loan, instead of an issue in the shape of continental paper. On this topic, and on the causes of the present embarrassment, he dwelt at some length, when he again gave way to

Mr. POPE, who moved that the committee rise: lost—yeas 69, noes 79; and

Mr. CUSHING concluded his remarks at half past seven o'clock, p. m. when

Mr. RHETT arose, and made an earnest appeal to the committee to take the question on the amendment, so that the bill might be reported to the House. He adverted to the extraordinary range the debate had taken, and thought this particular bill had been discussed long enough.

Mr. MARTIN said he had intended to submit some remarks to the committee upon this bill, but the lateness of the hour, and the evident disposition of the committee to take the question, admonished him to refrain. He should, therefore, content himself then with giving notice of his intention to move to strike out the proviso to the bill.

Mr. WILLIAMS of North Carolina expressed his dissent to the whole bill, as well as to the amendment. The bill would be a violation of the public faith of the Government of the United States, pledged to the individual States to pay this money according to the provisions of the deposit act. That was the ground of the first objection.

If that objection were well founded, did not the amendment of the gentleman from South Carolina

(Mr. Pickens) equally conflict with the principles assumed by the opponents of the bill? The gentleman proposed a postponement of the payment of the last instalment until the first of January, 1839. Now Mr. W. insisted that if they could postpone the payment of this instalment for one year, they could postpone it indefinitely; and they had just as good a right to postpone it indefinitely, or for ever, as to the first of January, 1839. This alone would be a sufficient reason for Mr. W.'s resisting the amendment, although he must confess that, if obliged to take the original bill or the bill with the amendment, he would of course prefer the latter.

The lateness of the hour, and the protracted discussion that had already taken place, prevented him from giving his views at length. He, however, protested against the passage of this bill on behalf of the State he in part represented. He saw no necessity for withholding this instalment, for the allegation that the wants of the Government required it had not been made out to his satisfaction. At all events, if it were so, they might meet the deficit by a greater issue of Treasury notes. If they issued twelve millions of dollars to satisfy merely the wants of the Government, could they not issue twenty millions of dollars to comply with its obligations? He would as soon withhold the appropriations for the army, the navy, or the civil list, as to withhold this payment from the States.

Mr. FILMORE then obtained the floor, and expressed his wish to submit some remarks, but the lateness of the hour would prevent him.

Mr. CAMBRELENG said that it was not the intention to do more than report this bill to the House to-night. On to-morrow it would come up in the House, when gentlemen would have the opportunity of discussing it, if they desired to do so.

Mr. FILMORE, however, moved that the committee rise; but the motion was not sustained—ayes 87, noes 97.

The honorable member then addressed the committee at length in opposition to the bill, on the ground of its impairing a contract, and that the condition of the Treasury did not warrant it, or that, if it did, means should be found, either by loan, or by withholding other appropriations, to comply with the obligations of the deposit law. At a quarter to 9 o'clock, Mr. F. gave way to

Mr. GRAVES, who moved that the committee rise; which motion was again lost—84 to 111.

Mr. FILMORE resumed, and continued his remarks on the same subject, with the addition of a lengthy argument in favor of a Bank of the United States, till a few minutes before 10 o'clock, when—

Mr. BRONSON obtained the floor. He said he was in favor of the amendment of the gentleman from South Carolina, as presenting the bill in a less objectionable shape; but he should, most assuredly, protest most sincerely and heartily against the amendment, (notice of which had been given by Mr. Martin,) which went to strip the bill of the only palatable feature about it.

Mr. B. was assured, from the proof adduced, that there was not available means in the Treasury to meet its liabilities. He also controverted the position of the payment of deposit partaking of the character of a contract between private individuals; there might be some plausibility in the argument, but it was not the proper and right ground to put it upon.

Was there any common ground on which they could meet? He thought there was. That common ground was to take the bill as it originally was, with the amendment of the gentlemen from South Carolina, but without the amendment of the gentleman from Alabama. Adopting this, there was a guarantee offered that no portion of the three instalments should be called in till after the expiration of twelve months. The United States said to the States, give up your claim for the fourth instalment, and we will not call back any of the others.

Mr. B. avowed that he could not vote for the original bill without Mr. Pickens's amendment, because it would be an indefinite postponement of the payment, and to that he could not consent.

Mr. MARTIN was about to make an explanation in reference to the remarks of the gentleman

from New York on his proposed amendment, but, by request, gave way to

Mr. DAWSON, who moved that the committee rise—lost, 78 to 97.

Mr. MARTIN said he should not trouble the committee with the remarks which he had desired to submit upon the bill under consideration, but for the denouncement as "extraordinary" by the gentleman from New York, (Mr. Bronson,) of the amendment which he had given notice he would submit, when in order to do so, to the bill before the committee. He had felt it to be his duty to himself to present fully to his constituents his views, as well as the part which he should take, upon this measure; but from the great labor which the committee had undergone, the fatigue which all seemed to feel, and to be borne down by, he had been induced, when he gave notice of the amendment which he would offer, to decline then to address the committee, with the hope that some more auspicious occasion would be afforded him of making known those views.

That his amendment might seem extraordinary to those who considered the provisions of the act of June, 1836, when accepted by the States, a contract, which the Government was bound to execute under all circumstances, and to those, too, who claim as a debt due from the Government the amount to be deposited—as has been contended by many of the gentlemen who have addressed the committee—did not surprise him. Indeed, when gentlemen can contend, with this act before them, in defiance of its letter, that it creates an obligation upon this Government to each of the States, to pay its proportion of the surplus revenue, no demand that could be made by them, however extravagant, could excite his astonishment. Little did those who were unacquainted with the course of legislation here, suspect that at any time after the passage of the act of 1836, and more especially within so short a time as this, when even by the terms of the act itself the time for making the last of the deposits has not arrived, that any gentleman on this floor would have the temerity openly to avow that he considered even that which he had received a donation to his State, much less the claim which is here set up to the fourth instalment; and that, too, by some of those who voted for the act of 1836. He said it was known at least to the members of the Twenty-fourth Congress, and, as he believed, was understood by the country generally, what were the causes which produced the passage of that act, and the object intended by it. The idea of making a donation of the surplus revenue to the States was not whispered in this hall, if secretly intended by any individual member; and, however some may have thought upon the subject, a majority of the members believed that Congress had not the power, under the Constitution of the United States, to make such a disposition of it.

Mr. M. said it had turned out in the course of events, of which it was unnecessary for him now to speak, that a large amount of revenue, over and above the demands of the Government, would be in the Treasury on the 1st of January, 1837. It was thought to be inexpedient that it should remain there, particularly when it was considered that the resources of the Government would afford an ample fund, from time to time, to meet all its necessary expenditures as they should accrue, to permit so large a sum of money to remain on deposit in the deposit banks; against which, at that time, much complaint was made by those opposed to the then administration, and many charges of bribery and corruption uttered, and a fear expressed of improper interference in the pending election of Chief Magistrate. Many of the friends of the administration, looking impartially at this subject, came to the conclusion that—as profit might arise from the use of this money, which might not be needed by the Government for some time to come; and as, too, by withdrawing it from the deposit banks would at least silence the complaints upon that score—a circumstance at least desirable—it would be expedient to deposit it with the States in proper proportions, so as to divide equally among the States the benefit of its use, and, at the same time,

supposing that it would afford a fund to which we could with certainty resort in any great emergency which might require such an amount of treasure. A doubt, he said, never crossed his mind that it would be looked upon by the States as their own, or that its return would be delayed for one moment, after it was needed by the Government; and one of the important effects which he supposed it would have upon the legislation of Congress, would be to provide an economical administration of the Government, by bringing our responsibility more nearly home to the people. He well knew that if the tariff was increased, the inquiry would be made by the people, why is this, when you have this surplus? And if the surplus with the States was touched, the people would scrutinize our conduct, and mark our extravagance with its merited rebuke.

Mr. M. said that by recurring to the history of the act of 1836, it would be obvious, that the return of these deposits was looked to by the framers of the act; for he said, as it passed the Senate, in which it originated, it required the issuance by the States to this Government of stock to the amount of the money deposited, which it should be the duty of the Secretary of the Treasury to dispose of, at any time when the money should be necessary to meet the disbursements of the Government—a mode by which the amount could be reimbursed without delay or difficulty—that this feature was of the bill was changed, not because it gave too speedy a mode of obtaining the money again, but that it made the Government a dealer in stocks, which was thought objectionable.

Mr. M. said the gentleman from New York, (Mr. Filmore,) had labored to prove, that by a proper construction of the act of 1836, it would be impossible to obtain a return of the deposits within a very great length of time; contending that not more than two hundred and forty thousand dollars per annum could be demanded even of the State of New York. To put this construction upon that act, Mr. M. said was to charge the last Congress with imbecility and gross ignorance, to which he could not agree. He said the return of the money was clearly contemplated by the act; and to suppose that so small a sum as that stated by the gentleman was the largest amount for a return of which any State could be called upon, could not be true. Mr. M. said the act limited the call of the Secretary to ten thousand dollars a month from any one State, "without previous notice of thirty days for every additional sum of twenty thousand dollars." Does this provision of the bill limit this demand to any particular time? is it required that upon any particular day, the notice shall be given, or is the demand of this last sum limited in any way whatever? Certainly not—true it is he said, that the sum of \$20,000 could not be drawn under this act, without the notice of thirty days; but, if necessary, and the proper notice was given, that sum could be required upon each day, so long as that amount should remain upon deposit. Mr. M. said that the amendment which he desired to submit was intended to leave the act of 1836 as it was intended to be, a deposit law; that the proviso to the bill under consideration, which was by his amendment proposed to be stricken out, although not expressly, will in effect, change the act of '36 to that of a distribution law; for he said an executive officer would execute a law which it was made his duty to carry into effect. But when it was left to Congress to make a demand upon the States for a return of money to be levied directly upon the people, but little expectation could be indulged that they would do so, under any circumstances; but under the feeling now manifested that any other expectation would be more reasonable.

He said that, in addition to his objection to the change, he had still another, and an insuperable one, to this proviso. It does not speak the language which it should; for if the effect which it would have was actually intended, let it speak in plain terms, that our constituents may not be deceived in what we are doing here. There is a covert mode of doing business here, to which he said he would never agree.

Mr. M. said, that he was not prepared to say he would vote against the passage of this bill, if the amendment which he desired should be made, should fail; for, from the disposition discovered by a majority here, not only to hold on to that which they have, but to get all they can, from the public Treasury, he was disposed to save as much for the Government as he could; and to do so, it might be necessary to relinquish the three instalments now deposited, to secure the last.

Mr. M. said that he had reluctantly detained the committee as long as he had done, and should not trespass upon their patience longer; that they had endured much already, in listening to the few remarks touching the measure under consideration, which had been made by several gentlemen, and a very great number of remarks upon every other subject that could be thought of by gentlemen upon this floor. He had not gone into the effects which this measure threatened to produce upon the legislation here. All understand its danger, who will reflect upon it for one moment. Settle this policy of distribution upon the country, and the rights of the States will become a thing that has been, but which is now gone forever.

Mr. TILLINGHAST spoke briefly against the bill, on the ground of its being a violation of a contract.

Mr. ADAMS inquired of the Chair whether the amendment submitted by the gentleman from Alabama (Mr. Martin) was in order.

The CHAIR replied that he had entertained the amendment, not feeling himself authorized to reject it, and no objection was made to entertaining it at the time.

Mr. ADAMS did not consider the amendment of the gentleman from Alabama as an amendment to the amendment of the gentleman from South Carolina, (Mr. Pickens.) He (Mr. A.) had an amendment to that amendment to submit, which, from the nature of it, could not be submitted in the House unless it was first offered in committee, which he should like to have the privilege of submitting.

Mr. MARTIN then rose and stated that he did not consider his amendment as entirely regular, and as he would take the opportunity of submitting it hereafter, he, for the present, would withdraw it.

Mr. ADAMS then submitted the following amendment:

"And all the balances of public moneys due from all the deposite banks are hereby appropriated to the said payment, and no part of them shall be applied to any other payment whatever; and if the portion of the said balances due by the said deposite banks cannot be recovered in time to enable the Treasury to pay the whole of the said deposite with the States, hereby made payable on the first day of January, 1839, then the instalment of debt from the late Bank of the United States, for the stock in that institution held by the United States, payable in October, 1838, is hereby appropriated to make up any insufficiency of the sums recovered from the deposite banks to complete the said payment of the fourth instalment of the deposite with the States; and if the said sums, so appropriated, should still prove insufficient to complete the said payment, the faith of the United States is hereby pledged that provision shall be made by Congress to complete the same."

Mr. ADAMS did not wish to enter into the discussion which had occupied so much of the time of the House, as to whether the deposite bill was a contract or not; without entering into the question, whether it was technically a contract, it was clear to his mind that it was a promise, given by the Government, and accepted by the States, and whether that was a contract or not, he considered it binding upon both parties. The promise was to deposite a given specific sum, and that sum was to be divided into four parts or instalments; but the promise was that the whole sum was to be deposited with the States. As to the matter, whether a portion of this was liable to be called for, he thought it would not be called for, because the contingency had not happened, and he did not think it would happen, that would require a portion to be called for. He took it that the promise on the part of the

United States must be fully fulfilled, as much as if it were a debt.

Mr. PICKENS hoped that the committee would rise, so as to give the gentleman from Massachusetts the opportunity of giving his views at a more propitious moment than the present. He would, therefore, move that the committee rise, if the gentleman would give way.

Mr. ADAMS did not ask that the committee should rise, as he had but a few words to say. He held that the United States was bound in good faith to perform, as far as it could, the whole of the promise which it had made. A state of things has arisen in which the nation itself is not able to perform, at present, the promise it had made with respect to one fourth of the sum it had promised. This state of things arises from the circumstance of the inability of the deposite banks to pay the sum due by them to the Government. Now he was willing to go so far as to modify this promise in a manner to indulge the Government of the United States with time—to indulge the deposite banks, who are unable to make the payment, with time; and he was willing to take the time proposed by the gentleman from South Carolina; but in doing that, he wished for his own part, and as a representative of the State of Massachusetts, to be fully and thoroughly understood as opposing a repeal of the deposite law, and that this bill should never be construed into a repeal of that bill, so far as this fourth instalment was concerned.

It so happened that, by the statement of the Secretary of the Treasury, the sum to be paid was as nearly as possible the balance which was due from the deposite banks to the United States—about nine millions of dollars; and as he supposed a portion of this sum might still not be obtained from some of those banks, in order to make assurance doubly sure, he had inserted a conditional appropriation of the instalment which will be due the Government from the Bank of the United States in October next, which will just be in time to meet this case; and if it should turn out that even that sum should not be sufficient, he proposed by his amendment to give a solemn pledge of the United States, that it will provide for the fulfilment of the promise it made by the deposite law.

Mr. JOHNSON of Maryland of Maryland had intended originally to have voted for the amendment of Mr. Pickens, and then for the bill, but it was now his intention to vote against both of them. His reason was this. He had originally supposed that the bill was designed for the relief of the Treasury, and then that it would leave a sufficient fund to enable that Department to go on. He should also vote against the bill to authorize the issue of Treasury notes, because it would have the effect of throwing out a spurious currency; and it was his decided conviction that they ought to effect a loan. They had the constitutional right to do this. If the Government was bankrupt, they ought at once to meet that question, and not dodge it by authorizing the Secretary of the Treasury to do what Mr. J. believed that officer had not the power to do. He (Mr. J.) was for a loan of from ten to twenty millions, and he would heartily vote for it.

One gentleman had said that if a loan was effected, they must necessarily increase the tariff. Now, although Mr. J. had no hostility to a tariff, yet he should be as unwilling as any other member, at that time, to increase it. But it did not follow as a matter of course, that, because they created a loan, they must necessarily increase the tariff.

Mr. RHETT again appealed to the committee to take the question. He was willing to sit there as long as any one, but it should be borne in mind that they had other duties to perform, for which the people had sent them there. Speak they must, speak as long as it was necessary to inform their minds upon the subject; but when their minds were made up, they should act. The Senate had disposed of this question in one morning. We had been debating it a whole week, with late sessions, and had been in session twenty-one days, without acting on one single question on which they had commenced. Was this right? Was it not time to do something, and not be wasting the people's money? Surely it was not

worth while to be sitting there after every man's mind was made up. He meant no discourtesy to the gentleman who last addressed the House, but even he had distinctly declared that he had positively made up his mind, and intended to vote both against the bill and the amendment.

Mr. POPE insisted that the original bill, unless amended, though not in terms, was in effect a repeal of so much of the deposite law as authorized the payment of the fourth instalment, a law of as solemn an engagement, in his opinion, as was ever passed. That the General Government was most solemnly bound by that act was a proposition as clear to his mind as any he was ever called upon to consider. He therefore protested against the passage of the bill, unless the two amendments (of Messrs. Pickens and Adams) were engrafted upon it. If they were, he was willing to go for the bill, because it then only postponed the payment of the fourth instalment; without them, he could not, because the bill would be a virtual but covert repeal of a solemn act of Congress.

Mr. CHAMBERS of Kentucky opposed the bill, and commented upon the mode in which the Secretary of the Treasury had carried out the provisions of the deposite law.

Mr. UNDERWOOD then rose and brought to the notice of the House an amendment which he desired to offer when the proper time should arrive, but stated that he had no prospect of getting before the House to-night. He deprecated the course pursued by the majority of sitting all night to force a bill through Committee of the Whole. He never had seen any good to result from it, and hoped it would not be practised at the present session, as it had been at former sessions of Congress. It was useless for the majority to attempt to control the natural course of proceeding, because when there were a large number of gentlemen who desired to speak on a measure, they would speak no matter what the hour was. Mr. U. then, at half past twelve o'clock, moved that the committee rise, and the question being taken, it appeared the ayes were 84, noes 84; the Chair voting in the negative, the motion was disagreed to.

Mr. MERCER then renewed the motion that the committee rise, and called for tellers, when the vote stood—ayes 90, noes 89.

The committee then rose and reported, and the Speaker having resumed the Chair,

Mr. HOWARD asked leave of the House to make a motion that the hour of meeting of the House on to-day should be changed to 11 o'clock.

Objection however being made—

On motion of Mr. REED,

The House adjourned at a quarter before one o'clock.

HOUSE OF REPRESENTATIVES,  
Sept. 23d, 1837.

GENTLEMEN—Believing that the report in the Globe of Friday is calculated to produce an impression different from that which I intended to convey in relation to the feelings of my brother, (Gen. Campbell) towards the majority of the select committee of the last Congress, whose proceedings have been so often adverted to, "in the debate on the Florida war," I request that you will publish the following, which contains the substance of my remarks on that delicate subject:

I expressed my conviction that General Campbell thought, and perhaps justly, that the majority of the committee was under the influence of strong party feelings, but had never, to my knowledge, imputed to that majority, or to an individual member of it, dishonorable motives—that he cherished no bitterness of feeling towards the majority: nay more—for a part of that majority, I was convinced that he entertained feelings of personal regard.

Very respectfully,

JOHN CAMPBELL.

Messrs. BLAIR and RIVES.

HOUSE OF REPRESENTATIVES,  
Washington, Sept. 23, 1837.

F. P. BLAIR, Esq.

DEAR SIR: The Globe of Thursday evening last, in giving a sketch of my remarks on that day, on the bill to postpone the payment of the fourth in-

stalment to the States, represents me as declaring myself *opposed* to the bill.

I stated in the debate, and for the reasons which I then gave, that I *preferred* the bill *with the amendment* postponing the payment to the first of January, 1839; but I at the same time said, that, in any event—under the conviction which I had of the present embarrassed state of the Treasury—I *could not bring myself to vote against the bill*.

I yesterday morning called the attention of your reporter to the mistake in reporting my remarks, which he said should be corrected; but, on looking into your last evening's paper, I find the matter has escaped his recollection.

I hope you will do me the favor to correct the mistake in your next paper.

I am, very respectfully,

Your ob't servant,

HENRY A. FOSTER.

#### IN SENATE,

TUESDAY, Sept. 26, 1837.

Mr. ALLEN presented a memorial from Loraine county, Ohio, (signed by two hundred and forty-one ladies,) remonstrating against the annexation of Texas; which was laid on the table and ordered to be printed.

Mr. BUCHANAN said, while absent yesterday, a memorial was presented by the Senator from Massachusetts, (Mr. Webster,) from certain insurance offices, praying indemnity for a vessel destroyed in 1800, which had been referred to the Committee on Foreign Relations. The claim might be a very just one; but as there had been an understanding that no business was to be acted on unless of a very urgent nature, he would move that the committee be discharged from the consideration, and the memorial be laid on the table; which was agreed to.

The joint resolution offered yesterday by Mr. NILES, fixing the adjournment of Congress on Monday, the 9th of October next, was taken up and agreed to.

The resolution offered yesterday by Mr. HUBBARD, fixing the hour of meeting of the Senate at 10 o'clock in the morning, was taken up and adopted.

The following engrossed bills were read a third time and passed:

A bill to remit duties on certain goods destroyed by fire in New York.

A bill making additional appropriations for the suppression of Indian hostilities.

Mr. WRIGHT, from the Committee on Finance, called up the report in relation to the petition for a national bank; which was

*Resolved*, That the prayer of the respective petitions ought not to be granted."

Mr. CLAY did not see the utility of bringing forward the resolution of the Committee on Finance; it was a simple negative proposition, and therefore should not be called up unless there was a disposition on the part of the Senate to pass an affirmative one. The course pursued by the gentleman from New York (Mr. Wright) reminded him of a circumstance which took place a little before the declaration of the late war with Great Britain. A very extraordinary man belonging to the other House, now no more, [he alluded to Mr. Randolph,] learnt that a message would be sent by Mr. Madison, then President of the United States, recommending a declaration of war. That gentleman arose in his place, and offered a resolution similar to the one called up by the gentleman—*Resolved*, That it is inexpedient to declare war against Great Britain." For his part, he entertained a very different opinion from the gentleman relative to the expediency of granting the prayer of the petitioners; and he thought unless there was a disposition evinced to pass an affirmative proposition, the true course would be to let the resolution lie on the table. Like the Irish ambassador he might say, "situated as the Senate then was," there was not much likelihood of such a step being taken. If, however, the gentleman should persist in immediate action, he should move to add the following amendment, which was to strike out all after *Resolved*, and insert, "that it will be expedient to establish a Bank of the United States

whenever it shall be manifest that a clear majority of the people of the United States desire such an institution;" and ask for the yeas and nays thereon.

Mr. WEBSTER deemed the question one of too much importance to be acted on without full consideration. It was not a matter to be passed over lightly. There was other business under discussion in the Senate which could go on to completion; and he would, therefore, move to postpone the subject until Monday next.

Mr. PRESTON said he wished it to be postponed to a later period than Monday, if possible. He viewed the question as one of great moment. If the amendment were adopted, it would be declaring, in so many words, that a bank was necessary. On the other hand, if the report prevailed, it cut us off from all chance of establishing a bank. So far as he was concerned, he was not prepared to say a Bank of the United States was *inexpedient*, until he knew *what would be expedient*. Before two weeks had elapsed, a state of things might occur which would induce him to vote for a United States Bank. He wished to know what measures the friends of the administration intended to bring forward for the relief of the people, before he gave his vote either for the amendment or the resolution. He was not prepared to say that he would advocate a Bank of the United States: such an institution might be dangerous; but he very much doubted whether it was as dangerous as that of divorcing the Government from the people; and he would prefer the establishment of a bank to such a cold and heartless alternative. Before he committed himself on either the negative or affirmative proposition, he wished to know where the ship of state was to land, for she was evidently riding among rocks, and shoals, and breakers. He deemed it safest to postpone the measure for ten days, or until near the close of the session. If nothing satisfactory were then offered, this subject would come up for discussion.

Mr. WEBSTER briefly replied that he had mentioned an early day, because he did not wish to deprive the Senate of an opportunity to discuss the subject. If it were postponed until Monday, and the Senate were not ready, it would then be further postponed.

Mr. MORRIS asked for the yeas and nays.

And the question being taken, was decided in the negative—yeas 15, nays 30, as follows:

YEAS—Messrs. Bayard, Black, Clay of Kentucky, Clayton, Crittenden, Davis, Kent, Knight, McKean, Prentiss, Preston, Robbins, Smith of Indiana, Swift, and Webster—15.

NAYS—Messrs. Allen, Benton, Brown, Buchanan, Calhoun, Clay of Alabama, Fulton, Grundy, King of Georgia, Linn, Lyon, Morris, Nicholas, Niles, Norvell, Pierce, Rives, Roane, Robinson, Ruggles, Smith of Connecticut, Strange, Tallmadge, Tipton, Walker, Wall, White, Williams, Wright, and Young—30.

Mr. TALLMADGE then moved to amend the amendment by striking out all after the word *Resolved*, and inserting: "That in the opinion of the Senate a clear majority of the people of the United States are opposed to a national bank, and that it is inexpedient to grant the prayer of the petitioners."

Mr. BENTON asked for the yeas and nays.

Mr. CLAY asked if he were to understand by the amendment of the gentleman, that a majority of the Senate had declared that a majority of the people were averse to a Bank of the United States, and that, therefore, the prayer of the petitioners ought not to be granted. In that case, if he did not know it was out of order, he would move to add, "but that, whenever it is ascertained that a majority of the people of the United States shall be in favor of a national bank, then a Bank of the United States ought to be established."

Mr. PRESTON made some few further remarks in opposition to the measure. He thought it a parliamentary trap. He might be opposed to a bank now, and before ten days take it as a dernier resort. He desired first to know what was to be done before he would consent to strangle the only mode of relief left us in its birth.

Mr. WRIGHT did not wish to be drawn into any debate upon the subject, and his only purpose

in rising was to have the views of the committee properly understood. The Senate had referred the memorial of sundry persons to the Committee on Finance, praying the establishment of a national bank. The committee had discharged its duty faithfully; and, after a full consideration of the whole subject, had promptly reported "that it was inexpedient to grant the prayer of the respective petitioners." While he was up, Mr. W. would inquire of the Chair, (for he professed himself not well acquainted with parliamentary rules,) if it were in order for gentlemen to amend the report to suit their own views, and then for others to move an amendment to the amendment; if so, where was the thing to stop?

Mr. CALHOUN said that the course which he intended to pursue was, first to vote against the amendment to the amendment, and, if that succeeded, to vote against the amendment itself, so as to bring the question nakedly on the report of the Committee on Finance, that the prayer of the petitioners ought not to be granted. He was not prepared to say what the opinion of the people of the United States at this time is in relation to a bank; and much less was he prepared to commit himself in favor of one in contingencies contemplated by the amendment to the amendment. Where the Constitution or important political principles are involved, his only guide was his judgment and his conscience, and not the popular voice.

If there was any trick or management in bringing forward the report, to entrap any Senator who may not have made up his opinion definitively as to the necessity of a bank, as my colleague supposes, he was wholly ignorant of it. He did not know that the Committee on Finance had reported until this morning, nor that it was intended to take up the report, till a short time before it was called up; but he did not doubt the propriety of taking the sense of the Senate upon the subject of the bank. The memorialist had petitioned to establish a national bank, and it was due to them, as well as to the country at large, that there should be an explicit declaration of the sense of the Senate on the subject. He considered it, in fact, among the measures of relief, that the sense of Congress should be fully known as to what ought and what ought not to be done; there is a vast amount of capital now locked up awaiting our decision, which would flow out, as soon as it was known, to stimulate business, and relieve the money pressure, at this important season, when the fall trade is about to commence.

Mr. C. then said that his colleague had made some remarks which he could not pass unnoticed. He understood him to say that to assent to any important part of the Message was to support the whole, and that it was, in fact, to become a partisan of the administration.

[Here Mr. FRANKLIN dissented, and stated that what he did say was, that according to his impression, the support of the leading measure of the administration seemed to him, as necessarily involving an entire support of the administration.]

Mr. C. resumed, that he was gratified to receive the explanation of his colleague; and that he now understood him as merely stating his impression of what ought to be the effects of supporting any of the prominent measures recommended in the Message. He must say that his (Mr. C's) impression were wholly different. No one knew better than his colleague, that he never acted but in relation to an object, and that object usually one somewhat remote, and that he advanced towards it with a steady step, regardless of the difficulties and the party combinations about him. He was master of his own move, and acknowledged connection with no party but the State rights party and the small band of nullifiers; and acted either with or against the administration or the national party, just as it was calculated to further the principles and policy which we of that party regarded essential to the liberty and institutions of the country. It was thus he acted in the present instance. He knew his latitude and longitude; he had not neglected his log-book, and had kept an exact reckoning, and knew the precise point where he was, and in what direction he was moving. The object for which he and those with whom he had acted had united with the national

had been accomplished. Executive usurpation had been arrested. The Treasury was empty, and the administration had scarcely a majority in either House, or the Union. But the event which had separated us and the nationalists, had at the same time put an end to the Jackson party—they had run out. That remarkable man had formed a personal party, held together by his great influence, and the immense patronage placed in his hands. He was off the stage now, and the gorged Treasury had been turned into empty boxes. The cohesive principle of his party was destroyed, and it had dissolved into its elements. It had no option but to re-unite on the old principles that brought it into power, and fall back on the ground where it stood in 1827, and where he and his friends had continued to stand all along. It was that or utter destruction. In the meantime, the Government itself had been brought back by a series of decisive moves, almost to where it stood at its commencement in 1798; no bank, no tariff, nor almost any of those measures to which they were the fruitful parent. This was the point we had reached: Executive encroachments arrested from its own weakness, and Legislative encroachments by the overthrow of the system which it had builded up in a long course of years. Could he, a member of the State Rights party, hesitate what course he should pursue in so remarkable a juncture? It was clear as the noon-day sun. We are the sworn enemy both of Executive and Legislative usurpation; and of the two, more opposed, if possible, to the latter than the former; because, in the nature of things, it must take precedence in the order of time. Without the Legislative, there could be no Executive usurpation. Congress must first encroach on the powers of the State, before the Executive can be strong enough to encroach on its powers; but as soon as they do, the benefit enures, not to them, but the President. Reason and experience both prove this. Now, sir, while the national party have shown themselves the foe of Executive encroachments, they have been, and he feared were still, the advocates of a liberal construction of the Constitution—the supporters of delegated against reserved powers. To it, then, may he traced most of those acts which have gone so far to convert this into a consolidated Government, and to which they still cling. On the contrary, a very large portion of the Jackson party, then drawn off from their principles, by his extraordinary influence and power, still professed, and, I doubt not, sincerely, the opposite principle, notwithstanding their frequent, and, he must say, great departure from their practice in many particulars. Now, he would ask, what course ought he to pursue under such circumstances? He, the opponent of all encroachments, from whatever quarter, Executive or Legislative? Was it for him to join the friends of the tariff, of a national bank, and the whole system of congressional usurpation, and utterly break down his old allies of 1827, who had sheltered under his position, and thus give a complete and final victory to his old opponents of that period, and with it a permanent ascendancy to them and their principles and policy, which he honestly believed could not but end in consolidation, with the loss of our liberty and institutions? Or rather was it not his duty, thinking as he did, and with the objects he had been long pursuing, to prevent such a result, and to call a rally of his old allies on the ground where he stood, and where they did in 1827, in order to arrest the final triumph of the principles to which he and they were then both opposed? But my colleague seems to think that the danger of Executive usurpation is not yet over, and that that Department is not so prostrated as he (Mr. C.) supposed. Instead of this, he thinks they still are meditating schemes of power. Be it so. He was not more confiding than his colleague. Experience had taught him distrust of power; and if his apprehensions should prove correct, he stood ready to rally with his recent allies against executive usurpation, with all the zeal and energy which had ever impelled him.

He was prepared to go much further, and hoped to have the aid of those with whom he so lately acted, to push forward and guard, by prudent and

wise enactments, guided by our recent experience, against the recurrence hereafter of the danger of the encroachments of the Executive. We now know the great danger from that quarter, and he was prepared to do his duty in providing effectual guards.

He saw that this was the moment to reap the fruit of the double victory which had been achieved, mainly by the small party to which he belonged, both against the encroachment of Congress on the rights of the States, and the President on the rights of Congress, and thereby place the liberty and institutions of the country on a durable basis, which he hoped to effect by uniting with the nationalists in providing effectual guards against the future usurpations of the Executive, and his old friends and allies of '27, in resisting the usurpation of Congress on the States; and as the first step in the discharge of this important duty, he joined them in opposing a bank and a reanion of the Government with the banking system, and was prepared to act throughout with them against Congressional encroachment in every form and shape. He trusted he had now defined his position so as to leave no possibility of mistake as to where he was, where he was going, and under what flag he sailed. In taking his course, he was neither an administration man nor an opposition man, and much less any man's man. He belonged to no party but the States rights, and wished to be considered nothing more than a plain, and an honest nullifier.

Mr. CLAY said that the President of the United States stated, in his Message, that the people, on two occasions, had shown their opposition to a Bank of the United States; and on this affirmation, he presumed, was this report rested. What had been the course of the Senator? Five days ago, he had reported a negative resolution, stating it to be inexpedient to grant the prayer of the petitioners. The report was laid on the table, where it should have slept, according to the usage of the Senate. Why not have let it remain there until some disposition was evinced by the Senate to pass upon it affirmatively? Not content with that, they seek to pass this negative resolution, with a large majority of the people of the United States in favor of a national bank. He trusted the Senate would say whether the people should have what they wanted or not.

And the question being taken, was decided in the affirmative—yeas 29, nays 15, as follows:

YEAS—Messrs. Allen, Benton, Brown, Buchanan, Clay of Alabama, Fulton, Grundy, Hubbard, Linn, Lyon, McKean, Morris, Nicholas, Niles, Norvell, Pierce, Rives, Roane Robinson, Ruggles, Smith of Connecticut, Strange, Tallmadge, Walker, Wall, White, Williams, Wright, and Young—29.

NAYS—Messrs. Bayard, Clay of Kentucky, Clayton, Crittenden, Davis, Knight, Prentiss, Preston, Robbins, Smith of Indiana, Spence, Swift, Tipton, and Webster—15.

Mr. SMITH of Connecticut said, that as he should have to vote on the question, and that his vote might appear to be inconsistent, he felt disposed to assign his reasons for the vote he should give. He was prepared to vote against the resolution of the honorable Senator from Kentucky, in the shape in which he first presented it; but had he have done so, it might have been supposed that he was unwilling to be governed by the known voice of the people, and to vote in accordance with their wishes. In the first place, he was of opinion that a bank granted by the Government of the United States, would be unconstitutional; and until he should be understood upon that point, he could never consent to give his vote for a bank, in any shape, or under any circumstances. He had been waiting, and had expected to hear the question of constitutionality of the bank discussed by some of the learned, experienced gentlemen on this floor; and until he was convinced of his error by some argument that he had never yet heard, it was unnecessary for him to take into consideration the subject, or to say any thing upon the question of expediency of establishing a bank. The proposition of the Senator from Kentucky was, not that we should now act in obedience to the will, and in accordance with what we consider the wishes, of

the people on this subject, but that the people should have another opportunity of expressing their sentiments, by leaving the question of bank or no bank untouched for the present, so that by again agitating and investigating the subject, public sentiment might, at some future period, be moulded into, and assume a different shape, and be more favorably inclined to a bank. But his opinion was, that that period would never occur, and such an event would never happen, when a majority of the people would be in favor of a United States Bank. To adopt the resolution would be, in effect, to undertake to express an opinion as to what this body would do at some future period in reference to a different state of things, instead of adapting our action to the wants of the people at this time. He maintained that it was difficult to act upon the subject as it now stood; that we should act for the present, and not for the future. He had determined to vote against the proposition of the Senator from Kentucky; and as this might have the appearance of giving a vote against the voice of the people, he was desirous of accompanying his vote with his reasons for it. He had risen for the purpose of giving his opinion frankly, and he would now state, that he was wholly and entirely, on constitutional grounds, opposed to a Bank of the United States. It was his deliberate opinion, too, that the people did not want a bank. He would, therefore, vote against any proposition which stated that it now was, or would hereafter be, expedient to establish a Bank of the United States.

Mr. ROANE said that the moment had most unexpectedly arrived when he found himself constrained to say a few words to the Senate. He was as yet but little acquainted with the rules of that honorable body, nor was he versed in parliamentary law. The subject, as now presented to the Senate, was wrapped in such parliamentary involutions, that perhaps, in the votes he might give, he would be made to assume, in appearance, a position which was not his own. He therefore wished to unfold, in the briefest possible manner, his full and entire opinion.

The amendment now before us requires us to declare that a majority of the people of the United States are in favor of a Bank of the United States, and that, therefore, we ought to give them one. He, for one, declared that he knew not what were the opinions of the people of the United States on this subject. That body had not, in his opinion, that question, in any manner, before them; and if they had, had not, as he conceived, the testimony to enable them to pass a solemn judgment on it. He did not himself believe that such is their opinion—very far from it. Whenever there was a large majority of the people of the United States demanding a national bank, he had no doubt but that they would have one, but not with his consent given here or elsewhere; and this brings me, Mr. President, to declare, that as long as I occupy a seat on this floor, I shall never acknowledge but two criteria by which my votes are to be controlled. The one is the will—the known, ascertained will—of a majority of those who sent me here—my constituents. The other, the dictates of my own conscience. The opinion, then, of the majority—nay, of all the people of the United States, and of all the Senators on this floor—would not control him, as long as his constituents were opposed to a bank. In order that he might not, by possibility, be misunderstood by any of the votes he might give on the amendments now offered—lest he may fall into some of the "traps" which had been spoken of, if indeed any have been set—he would take occasion to go further, and declare that if, instead of being a member of the Senate of the United States, administering and construing our present Constitution, he was a member of a convention of the people of the United States, to remodel their present, or form a new Constitution, he would with manly firmness resist a bank, as composing one of its features. No, sir, never, with my consent, shall a power so potent, either for good or evil, constitute a feature in the Republic under which I live.

Mr. President, if there are any parliamentary "traps" set—if there is any unfairness going on, I know nothing of it. What is the state of the case?

At a very early period of the present session of Congress, petitions coming from large commercial cities, numerously signed, and from Chambers of Commerce, as they are termed, were presented to the Senate, praying the establishment by Congress of a United States Bank. These petitions were referred to the Committee on Finance, who have reported to this their constituent body their opinion, that "the prayer of the petitioners ought not to be granted." He had had some little experience in legislation, and he must declare, that he could not conceive what less the committee could have done, such being their opinion; and that if there was any "trap set," he could not see it in their report. He wished, himself, no amendment to that report; he knew of none that he would agree to, unless it was to insert in it the word "unconstitutional," for he most candidly and emphatically declared it to be his wish to shove away—to put out of sight, and out of hope, that "plank"—that rotten plank, as he thought it—which it was so much desired should be kept floating about in this chamber. He for one was ready and willing boldly to swim his course through the sea of troubles in which we are, and firmly to grasp the solid rock of the Constitution.

Mr. ALLEN said, I understand the question before the Senate to be on the adoption of the amendment submitted by the Senator from Kentucky, [Mr. Clay.] I shall not interpose, in any manner, to reconcile or to sharpen the conflict of opinion between the two Senators from South Carolina. Nor shall I pursue the course which the Senator who sits immediately in front me [Mr. Preston] has deemed it his duty to adopt, by diverging so far from the subject of the pending discussion, in search of topics not very obviously connected with it.

It is my purpose to give, with promptitude and brevity, the general reasons which urge my mind to a conclusion against the amendment. This amendment is objectionable, as involving a bare abstraction, and an abstraction, too, which relates not to what should be the present, but to what ought to be the future action of Congress, upon the occurrence of a remote contingency. The discussion of such a question is not among the objects for which we are assembled, nor is it required by the necessities of the occasion, or justified by the theory or the practice of the Government. It is our business to legislate for the future, but not to prescribe what future legislation shall be.

But, sir, the broad objection to this amendment is, that it asserts a principle destructive of the very existence of this body, absolutely revolutionary in its character, and tending directly to a subversion of the forms of our Government. What is it? It is a proposition which requires this Senate, the representative of the federative principle of our Constitution, to affirm, in advance, that whenever a majority of the people of the United States, told by the head, shall manifest their pleasure favorably to a particular measure, that measure ought for that reason alone to become a law. Thus, by this amendment, the States are treated as things that have ceased to exist, the whole people as being consolidated into one nation, and this body, in which States are represented as subsisting independent sovereignties, is required to proclaim its own dissolution. The establishment of this principle by the Senate, would be the act of a suicide, lifting the knife to his own throat. It would be the Senate annihilating the Senate—the representatives of the States abolishing the States themselves. Why have the States, regardless of their size or numerical strength, an equal representation upon this floor? It is because, as distinct communities, the Constitutional compact has armed the smaller with this check, in order to guard their corporate independence against anticipated dangers from the superior power of the larger. It is not men alone, but men and States combined, in the representation of the two Houses of Congress, that are authorized to give law to the land. But this amendment proposes to dissolve this combination, to fuse the two Houses into one, to make the action of the Senate dependent upon that of the House of Representatives, and to subject the small States, to the doubtful justice or generosity of the larger. Before this amendment is passed, its very principle requires that all the States should have

a representation upon this floor proportionate to their relative population, as in the other branch, because the principle of the amendment is based upon men alone, and not upon men and States combined.

It will doubtless happen again, as it frequently has happened, that a majority of the people, as represented in the other House, will be favorable to a particular measure, whilst a majority of the States, as represented here, will be hostile to it. Shall such a measure become a law? Shall I be expected to vote for such a bill because a majority of the people of the Union may be in favor of it, whilst not only a majority of the States, (Ohio among them,) but every man within her limits, may be opposed to it? Most certainly not; and if not, shall I pledge myself to do so in advance? It cannot be expected; and if so, how can I vote for this amendment? No, sir: I cannot and will not vote for a proposition which proposes at the very outset, as the first of its effects, to annihilate the very body that adopts it, to violate the constitutional compact of compromises between the States, and to subvert, in the end, the liberties of the country.

But again, sir, the amendment of the Senator from Kentucky is, as a matter of fact, vague and indefinite. It proposes, in a particular event, the establishment of a national bank. But what kind of bank is this to be, for which we are now to vote in anticipation? Is it to be established in, and confined to, the District of Columbia, and therefore a creation within the constitutional competency of Congress? or is it to be a bank-stationed at any other point, with power to obtrude its branches within the jurisdiction of the States, with or without their consent? If it is to be of either description, but particularly of the latter, had you not better consult the States here represented in the Senate in the creation of such a bank? And if so, if you are to consult them, how can you pass this amendment, which overlooks the States altogether?

Sir, whatever may be the will of a majority of the people of the Union—whatever may be the wishes of her sister States—Ohio will expect to be consulted before another attempt is made to thrust within her limits the branch of another national bank. She has not forgotten—she will never forget—that on a former occasion a thorn from a kindred tree was planted in her flesh. Yes, sir, and kept there, too, in contempt of her sovereignty, of her people, and of her law!

There is yet, sir, a further objection to this amendment. If passed, it will be received by the friends of a national bank as a direct invitation to them to combine their energies, to enter the political arena again, and to lacerate the public mind for the next four years with their strife for the establishment of such an institution. The consequences of this strife are easily foreseen. But I will not enter at present upon this subject, as it was my single object, in rising, to throw forward, in a word or two, my objections to this amendment.

Mr. TALLMADGE then moved to lay the whole matter on the table.

Mr. KING of Alabama asked for the yeas and nays; and the question being taken, was decided in the negative—yeas 20, nays 27, as follows:

YEAS—Messrs. Bayard, Clay of Kentucky, Clayton, Crittenden, Davis, Fulton, Kent, King of Georgia, Knight, McKean, Nicholas, Prentiss, Preston, Robbins, Ruggles, Smith of Indiana, Spence, Swift, Tallmadge, and Webster—20.

NAYS—Messrs. Allen, Benton, Black, Brown, Buchanan, Calhoun, Clay of Alabama, Grundy, King of Alabama, Linn, Lyon, Morris, Niles, Norvell, Pierce, Rives, Roane, Robinson, Smith of Connecticut, Strange, Walker, Wall, White, Williams, Wright, and Young—27.

Mr. RIVES said that if the amendment of the Senator from Kentucky should be rejected, then he would feel himself bound to vote against that of the Senator from New York, and for the reasons which had been so stated by the gentleman from Ohio. The terms of the amendment were objectionable, in his opinion, because they seemed to overlook a fundamental principle in the organic law of the Union. The relation which the States bore in our system, had been so strongly and ably

argued and shown, that he would not say one additional word on the subject. Even if the gentleman from Kentucky were disposed to modify his amendment, so as to read, "that whenever a clear majority of the people and the States should manifest a desire for the establishment of a Bank of the United States, then a Bank of the United States shall be established," then he should be opposed to it as an abstract proposition. We came not here to speculate upon what would be proper to do as to the future, but we came to devise and to adopt such measures as might, in our judgment, meet the existing exigencies of the country. We were responsible for our acts, and we must not do anything of an equivocal character. And, he would say further, that this proposition was not merely abstract, but was nugatory. To say that whenever a majority of the people of the States deem it expedient a bank of the United States ought to be established, was wholly needless, because then, so far as the legislative department of the Government was concerned, it would be established. But, in our Senatorial capacity, we had nothing to do with the collective opinions of the people of the United States. Every member was to look to his particular constituents; he was not to look to the aggregate majority.

He maintained that gentlemen on the other side were bound to meet the issue of a Bank of the United States. The memorials on the subject of a bank had been presented here, and we were bound to discharge our duty and answer them. He would say that it was proper that we should act upon them. It was incumbent upon us to dispose of them.

The honorable Senator from Kentucky had argued that a Bank of the United States was the only remedy for the present distress which pervaded the community. That, he (Mr. Rives) believed, was not the opinion entertained by a majority of the Senate, nor of the other branch of Congress, nor of the States, nor the people. Then how important it was, this being the state of things, that the sense of the Legislature should be expressed in regard to every remedy proposed? We should have a decision upon the Sub-Treasury scheme, in acting upon the bill reported from the Committee on Finance; and also upon the State bank deposit, in acting upon the bill introduced by himself.

Were we, he would ask, to act upon them, and not give any response as to the other remedy proposed, to wit: the establishment of a United States Bank? In his opinion; we should neglect our duty if we pursued this course. For one, he was prepared to give his verdict on it, and he presumed that there was not a Senator on that floor who was not so prepared. If the object of gentlemen was to make an appeal to the nation by discussions on that floor, he would not unduly precipitate the discussion. But he would repeat that he was for meeting the question now. It was an issue in the cause upon which an answer ought to be returned. It was impossible, in the present state of the public mind, that the business of the community could proceed on any satisfactory footing till the legislative authority had spoken on every branch of the subject.

It was for these reasons that he should vote against the amendment of the Senator from Kentucky, and then against that of his friend from New York, which would bring us to a naked vote on the resolution reported by the Committee on Finance, which presented the question of the establishment of a national bank in the simplest and most unequivocal form.

Mr. BENTON expressed his gratification as a North Carolinian, at the auspicious commencement of his Senatorial career by the Senator from Ohio who had just taken his seat (Mr. Allen.) He (Mr. A.) was born in the State of Nathaniel Macon, and delivered sentiments worthy of the school of that great patriot, and delivered in a style to adorn his station. He had the elevated and constitutional view of the subject, and shown himself to be the defender of the compromises on which this Union was founded, and without which it cannot be maintained. The first of these compromises is found in the structure of this Senate, and its participation in the legislative power. Here the States

are represented as sovereign States, and each is equal; and this is for the protection and preservation of the weaker States. Thus, no measure can become law, except by a double sanction—the sanction of the majority of numbers in the House of Representatives, and the sanction of the majority of States on this floor. The proposition of the Senator from Kentucky, (Mr. Clay,) to declare that a national bank ought to be established when a majority of numbers is for it, (which majority, by-the-by, cannot be ascertained by petitions, but by votes,) goes to knock off one leg from the Constitution, and one without which it cannot stand. It goes to the annihilation of the Senate, of the small States, and of the Constitution.

Mr. B. animadverted upon the extraordinary scene of the day—the Bank of the United States manœuvring to avoid a judgment on this floor, and endeavoring to escape the condemnation she has brought upon herself. How does this question come before the Senate? Upon petitions for a national bank. Whence originated these petitions? From New York, where the blank forms were prepared, and despatched to all parts of the Union, with a letter of instructions, to employ active agents to get signatures, and forward them to Congress in September. Such ready-made petitions came to St. Louis—were printed over again—the blanks filled up—and put into the hands of the city tax collector to collect names. This is the way it was done in St. Louis, and doubtless it was done so in other places. Many of the petitions which had come here, he knew to be copies of the New York form. Well, these petitions were referred to the Finance Committee; they report that the prayer of the petitioners ought not to be granted; that report decides nothing unless it is confirmed by the vote of the Senate, and that vote of the Senate is now what we ask, and what the friends of the bank are manœuvring to avoid. The bank is defeated by the people in this attempt to storm a new charter out of Congress. The people have not moved in her behalf; few are the petitions, even thus stimulated from New York, which have come in. The bank is sinking faster than ever. Since May last, she has been plunging into the gulf of perdition. The paucity of the petitions prove it; the vote of this day will prove it; and seeing this fate, her friends are playing out all their skill, exerting all their tactics, to extricate her from the doom of condemnation! condemnation on this floor, where a few years ago she had almost two to one. But she cannot escape; the mortifying doom is at hand. She will be condemned; for these petitions are for her—for the present mis-called Bank of the United States—though nominally for a bank. The whole proceeding, in Congress and out of Congress, is in reference to her; and this is proved by every thing that is said or done.

Mr. B. concurred with the Senator from Virginia, (Mr. Rives) that the Senate ought to reject all amendments, and vote upon the report of the committee alone—even the amendment which had been already adopted—that of the Senator from New York, (Mr. Tallmadge.) He had voted for that amendment, and should still maintain it to be true; but the parliamentary course was to vote upon the report of the committee, because that, and that alone, was a response to the petitions.

Mr. BLACK was understood to say that the petition which he had presented had not been got up by the agency of the Pennsylvania Bank of the United States, but originated with the people themselves. If he had had reason to believe that the petition had not, he, most certainly, would not have presented it.

Mr. BENTON replied: said it was no doubt true that the Senator had not presented any memorials of the character which he [Mr. B.] had mentioned. But he [Mr. B.] had himself presented one from St. Louis, which was copied from the New York petitions, and others of the same description had also been presented here.

Mr. WALKER said he should vote against the amendment, because he was desirous of meeting directly the main question presented in the resolution of the Committee on Finance. He was elected to his present station as the avowed oppo-

nent of the creation by Congress of any Bank of the United States. Since that period he had seen no occasion to change his views on that subject. The creation of a national bank at this time, with a capital adequate to regulate all the State banks of the Union, would but increase the existing embarrassments, by the new demand it would create for more funds and more specie, to put it in operation. Mr. W. also believed that such a bank, with a capital and powers adequate for these purposes, would be dangerous to the liberties of the country. The issue of bank or no bank was made in the pending elections in Mississippi; and he (Mr. W.) both before his departure from the State, and since his arrival here, had been repeatedly threatened with legislative instructions to support such an institution. To such menaces he had ever given but one answer; that if instructed by the Legislature to support the establishment by Congress of such an institution, he would most cheerfully resign his station in the Senate, that the State he represented might choose a Senator who could vote for the creation of a national bank. Deeply, most deeply, as he valued the honor of representing in this body the people of Mississippi, it was an honor not to be purchased by a sacrifice of principles which he believed inseparably connected with the liberties of the American people. Those principles he had fully avowed at the period of his election, and he could not desert or abandon them.

The question recurred on Mr. CLAY'S amendment, and being taken, was decided in the negative—yeas 16, nays 29, as follows:

YEAS—Messrs. Bayard, Black, Clay of Kentucky, Clayton, Crittenden, Davis, Kent, Knight, Prentiss, Robbins, Smith of Indiana, Spence, Swift, and Webster—16.

NAYS—Messrs. Allen, Benton, Buchanan, Calhoun, Clay of Alabama, Fulton, Grundy, Hubbard, King of Alabama, King of Georgia, Morris, Nicholas, Niles, Norvell, Rives, Roane, Robinson, Smith of Connecticut, Strange, Tallmadge, Walker, Wall, White, Williams, Wright, and Young—29.

The question was taken on Mr. TALLMADGE'S amendment, by yeas and nays, and decided in the negative—yeas 3, nays 40.

The question was then taken on the resolution as reported from the Committee of Finance, on which Mr. BUCHANAN had asked for the yeas and nays, and the resolution was adopted—yeas 31, nays 15, as follows:

YEAS—Messrs. Allen, Benton, Brown, Buchanan, Calhoun, Clay of Alabama, Fulton, Grundy, Hubbard, King of Alabama, King of Georgia, Linn, Lyon, McKean, Morris, Nicholas, Niles, Norvell, Pierce, Rives, Roane, Robinson, Smith of Connecticut, Strange, Tallmadge, Walker, Wall, White, Williams, Wright, and Young—31.

NAYS—Messrs. Bayard, Black, Clay of Kentucky, Clayton, Crittenden, Kent, Knight, Prentiss, Robbins, Smith of Indiana, Spence, Swift, Tipton, and Webster—15.

Mr. BENTON rose to say a few words by way of disclaimer to the gentleman from Virginia (Mr. Rives). Mr. B. perceived, in a speech of that Senator published in the Globe of last evening, that he understood him (Mr. B.) to have spoken of the gentleman as having a guide or leader on that side of the Senate. He (Mr. Benton) had risen to disclaim entirely having had any allusion to him.

Mr. RIVES replied, that it had been his misfortune not to have heard very distinctly the speech of the Senator from Missouri, but he had been informed that such an expression had been used by him.

The Senate then proceeded to the consideration of the bill imposing certain duties on public officers as depositories in certain cases. The question pending being on Mr. Calhoun's amendment.

Mr. CALHOUN, at the suggestion of Mr. Morris, made a slight verbal modification of his amendment.

Mr. MORRIS offered the following amendment, which, together with that of Mr. Calhoun, as modified, he moved to have printed and laid on the table, which motion was agreed to.

Strike out all after the enacting clause, and insert the following:

That no bank note of a less denomination than those authorized by existing laws to be paid out by the United States, nor of any bank that shall issue notes of a less denomination than five dollars, shall hereafter be received in payment to the United States for lands, duties, taxes, or other dues, or to the Post Office Department for postage, fines, forfeitures, or on any other account; and the joint resolution entitled "a resolution relative to the more effectual collection of the public revenue, approved thirtieth of April, eighteen hundred and sixteen, shall be so suspended in its operations that bank notes shall cease to be receivable in payment as aforesaid, as follows: from and after the first day of January, eighteen hundred and thirty-eight, not more than three-fourths of any payment to be made to the United States for lands, duties, taxes, or other dues, shall be received in bank notes: after the first day of January, eighteen hundred and thirty-nine, not more than one-half shall be so received: from and after the first day of January, eighteen hundred and forty, not more than one-fourth shall be so received; and from and after the first day of January, eighteen hundred and forty-one, the aforesaid resolution shall be repealed, and all payments to the United States for lands, duties, taxes, or other dues, and all payments to the Post Office Department for postage, fines, forfeitures, or on any other account, shall be in gold and silver coin only, or in such notes, bills, or public securities, issued under the authority of the United States, as shall be directed to be received by law: and from and after the first day of January, eighteen hundred and forty-one, every officer or agent engaged in making payments or disbursements on account of the United States, or of the Post Office Department, shall make such payments or disbursements in gold and silver coin only, or in such notes, bills, or public securities, as shall be authorized by law to be so paid or disbursed; and every disbursing officer, or agent, who shall neglect, evade, elude, or violate the provisions of this section, shall be dismissed from the service, and shall also forfeit all compensation which shall then be due such officer or agent: *Provided, always,* That no bank note shall be received in pursuance of this or any other act of Congress, other than the notes of banks who discharge their liabilities and redeem their notes in specie on demand.

On motion of Mr. LINN, the Senate went into the consideration of Executive business, and when the doors were opened,

The Senate adjourned.

HOUSE OF REPRESENTATIVES,  
September 27, 1837.

GENTLEMEN: In the report, as contained in the *Globe* of this morning, of the debate in Committee of the Whole on the evening of the 25th instant, when the bill to postpone the payment of the fourth instalment of the surplus revenue to the States was under consideration, I observe that I am represented, in the remarks which I made on that occasion, as having "avowed that I could not vote for the bill, without Mr. Pickens's amendment." My remarks on that subject must have been misapprehended by the reporter. No such avowal was intended to be made by me: it would have been contrary to my sentiments. I did urge the adoption of Mr. Pickens's amendment, (as stated in the first part of the report,) as calculated to make the bill more perfect and less objectionable, in my estimation, and because, without it, the act under consideration might, perhaps, be construed to operate as a virtual repeal of the deposit law, so far as it relates to the fourth instalment; but I did not avow any intention to vote against the bill, even without that amendment. Will you do me the favor to correct this error?

I am, gentlemen, very respectfully,

Yours, &c.

ISAAC H. BRONSON,

Messrs. BLAIR & RIVES.

HOUSE OF REPRESENTATIVES,  
September 27, 1837.

GENTLEMEN: My attention has been this moment drawn to a remark in the *Globe* of last evening, purporting to give the proceedings of the House on

Monday evening, in which I find the following statement:

"Mr. FILLMORE resumed and continued his remarks on the subject, with the addition of a lengthy argument in favor of a Bank of the United States."

Passing over some evident misapprehensions of your reporter as to the purport of my remarks generally, I wish to say that he is entirely and most singularly mistaken in saying that I made a lengthy argument in favor of a United States Bank. I made no argument in favor of the United States Bank, nor of a United States Bank; but, on the contrary, expressly disclaimed ever having been the particular friend of the United States Bank, and expressed my sincere doubts whether the incorporation of a new United States Bank, at this time, would relieve the present embarrassments of the community. Will you do me the justice to correct the mistake?

Respectfully, yours,

MILLARD FILLMORE.

MESSRS. BLAIR and RIVES.

#### HOUSE OF REPRESENTATIVES.

TUESDAY, September 26, 1837.

Petitions and memorials were presented by Mr. CHAPMAN of Alabama.

Mr. JOHNSON of Louisiana, having asked the leave of the House to submit a resolution calling for information from one of the Departments—

Mr. CHAMBERS rose and asked if there was a quorum present in the House.

The CHAIR having counted, stated that there was no quorum in attendance.

Mr. CHAMBERS then moved a call of the House, which was ordered.

The roll having been called through, it appeared that there were only 118 members present—no quorum.

The Clerk then proceeded to call the absentees; when,

Mr. HAMER moved that the further proceedings under the call be dispensed with, stating it was very evident that there was a quorum present.

Mr. DUNCAN hoped it would not be dispensed with, as he wished it to be seen, that those who had sat up nearly all night to legislate for the country, were as early on the ground, as those who went home at 6 o'clock in the evening.

The further proceedings under the call were then dispensed with—ayes 79, noes not counted.

Mr. EWING of Indiana asked leave to submit the following resolution:

*Resolved*, That the Secretary of the Treasury be directed, with as little delay as possible, to communicate to this House the quantity of lands sold, the proceeds thereof, and the amount of specie received in part of said proceeds, at the different land offices, during the past year, and embracing up to the last reported returns of the present; and to designate with as precise a description as the reports of the land offices and depositories of public money may enable him, all the paper, of every kind and denomination, received in payment during said period; the dates when received; whether the same or any other part thereof was in the shape of drafts, checks, notes, bills, or orders, by whom made, when and where payable, the amounts severally, at what land office received, by whom paid into the office, and by whom endorsed, if there were any endorsers; also, the names and places of the depositories thereof, or, if any, what other disposition has been made of said paper, or any portion, by order of the department.

Objection being made, Mr. EWING moved a suspension of the rules for this purpose.

Mr. WILLIAMS of North Carolina called for the yeas and nays on this question, which were ordered, and were—yeas 97, nays 76.

So the motion to suspend the rules was determined in the negative, two-thirds not voting therefor.

Petitions and memorials were then presented by Messrs. GOODE and ALLEN of Ohio.

Mr. MENIFFE of Kentucky.

Mr. STANLY of North Carolina.

Messrs. POTTER, TOLAND, and MATHIAS MORRIS, of Pennsylvania.

[Mr. M. MORRIS of Pennsylvania presented the

petition of Samuel Runk, of Bucks county, Pennsylvania, praying for a pension for services rendered during the Revolutionary war.]

Messrs. SLADE and FLETCHER of Vermont.

Mr. HALEY of Connecticut.

Messrs. CALHOUN, BRIGGS, ADAMS, and HASTINGS of Massachusetts.

Mr. FARRINGTON of New Hampshire.

Mr. BIDDLE gave notice that he should on tomorrow ask the leave of the House to submit a resolution on the subject of the report of the Secretary of the Treasury, in relation to the pay of members of Congress in specie, and the discriminations in the payment of public creditors.

Mr. DUNN, on leave, submitted the following resolution; which, by the general consent of the House, was considered and adopted:

*Resolved*, That the Secretary of the Treasury furnish to this House a statement of the probable number of bonds that will be renewed or extended under the operation of the bill which has recently passed the Senate giving further time on duty bonds, should the same become a law; also, what fees or charges, if any, are required on the renewal or extension of such bonds; and whether such fees or charges can with propriety be reduced.

Mr. JOHNSON of Louisiana submitted the following resolution, which, by the rule, lies over one day:

*Resolved*, That the Secretary of War be directed to submit to this House, during the first week of December next, a plan for the protection of the western frontier of the United States against Indian aggression; designating the points to be permanently occupied by garrisons; the auxiliary stations for reserves and deposits of munitions, arms, and other supplies; the routes to be established for the purpose of maintaining a safe and prompt intercourse between the several stations, and from these with the depots in the interior; and finally the minimum force which, in his opinion, will be required to maintain peace among the several tribes, and cause our border settlements to be respected. Also, to report, as far as the same can be ascertained, the number of Indians who will be in the occupancy of the country west and north of the States of Louisiana, Arkansas, and Missouri, and the number of warriors they may, collectively, be able to bring into the field.

#### NATIONAL BANK.

The House then proceeded to the consideration of the following resolution, reported from the Committee of Ways and Means on yesterday, it being the business next in order:

*Resolved*, That it is inexpedient to charter a national bank.

Mr. REED of Massachusetts, who was entitled to the floor, addressed the House on the subject. He thought the resolution submitted by the chairman of the Committee of Ways and Means was extraordinary; and the speech of that gentleman on yesterday as still more extraordinary. The resolution was, that it was inexpedient to establish a national bank. If it had been that it was inexpedient to legislate on the subject of a national bank at the present session, it might have been reasonable, for every body knew that there was not time at this session to go fully into that question. But the gentleman from New York had reported a naked resolution of a committee, and then called upon the House to adopt it without debate, excepting that the chairman himself took occasion to tell the gentleman from Kentucky (Mr. Chambers) that a dark cloud was hanging over the friends of a national bank. It appeared to him as astonishing that this question should be presented to the House in this way. Was it intended by it to present opinions to the country in advance, before it was ascertained that a national bank might be desired by the people, and thus endeavor to forestall public opinion? It appeared to him that it was getting to be the custom of the times to present opinions in advance. Former Presidents had consulted their cabinets in relation to great matters like this, and endeavored to ascertain the wishes of the people of the country in relation thereto; but in these days, the opinions of the President were thrown out in advance; and he could not see the object of this, unless it was to

preclude discussion, and bring Congress to be a mere register of the edicts of the President. He desired to offer an amendment, that it was inexpedient to legislate on the subject of a national bank at the present session of Congress, but he presumed if he submitted it, that it would be cut off by the previous question. If we were to be called upon to vote on this question, we ought to have all the information and light on the subject which could be obtained. It was not his intention to present argument for or against a national bank at present, but he protested against taking opinions and recording votes of gentlemen in advance, without argument, and without information. He therefore moved to postpone this resolution, until the first Monday in December next; when he should be able to meet the chairman of the Committee of Ways and Means on this subject, and he hoped the gentleman would then be able to support it in a better manner than by saying merely that a dark cloud was hanging over the prospects of the friends of a national bank.

Mr. WISE then obtained the floor, but gave way to

Mr. SERGEANT, who addressed the House at considerable length in opposition to the adoption of the resolution reported from the Committee of Ways and Means. He stated that he had been prevented from attending the meeting of the Committee of Ways and Means when this resolution was before them, in consequence of indisposition, which had also prevented him from taking any part in the important debates which had been going on for some days. He never had, and unless new light should come to him, he never could, as a citizen of the United States, agree to this resolution; but he had no complaint to make in relation to the Chairman of the Committee of Ways and Means, or any one else, in relation to this resolution, because he had ample notice that the subject was to be brought up in committee. Even if he entertained doubts on the subject of this resolution, he should still hesitate as to the propriety of adopting it at this time. It was a great measure, upon which he could see no reason why any man, and especially those who were to act here for the people of the United States for two years to come, should be called upon beforehand to express a decided and conclusive opinion. In his humble judgment, the more proper course would be to allow every member of the body to reserve his opinion until the time comes for action; action will be preceded by deliberation and by discussion, and he would ask gentlemen—excepting those who had constitutional scruples on the subject—whether they were prepared now to say, that if within the next two years it should become manifest that nothing else than a bank would restore the prosperity of the country, whether they would during that period vote against a national bank? And he would further ask of gentlemen, if hereafter they can be satisfied that a bank can be employed by the Government, and that that bank was the only thing which would be efficient in restoring confidence in the country, were they prepared now to say they were opposed to it? This would be rash expression of opinion, and therefore he took it that the proposition suggested by the gentleman from Massachusetts was the most discreet one. He would ask what this Congress was called for? It was understood that it was intended to convoke the collected wisdom of the United States, for the purpose of administering, if they could, a remedy for the existing distress. He had regarded that summons as an invitation to remain here but a short time, and the Committee of Ways and Means up to the present day, have continually informed us that there is but a short time for us here; and the general impression of members was that nothing was to be decided on that would not be disposed of without a very protracted debate, but already in the third week in the session, we have been sitting here till midnight, and this he did not consider a proper time to consider and discuss questions of such scope, bearing and consequence as the one which was now before this body. What was the state of affairs existing in the country which has caused the convocation of Congress? There were two kinds of interests which could not be disregarded, and it so happened that these

two united all portions of the country, and they could not be agitated without disturbing the interests of every man, woman, and child in the United States. The fact was, that there was an awful winter before us, when thousands of those who depend on their daily labor for their daily bread are to feel the deplorable condition in which they are placed, by the agitation which has begun with the two great interests—the planting and commercial interests of the country. Mr. S. then went into an examination of these two interests, pointing out the manner in which they bore upon all classes of society, and passing a eulogy upon the merchants of the country, and those connected with the mercantile interests.

In relation to the Treasury notes which were proposed to be issued, he took it that they would be something like the notes of the Tennessee banks were, some years ago, to a tavern keeper's son in Kentucky. A gentleman who was formerly in this House, and was subsequently Secretary of War, had told him a story in relation to the difficulty he had in passing Tennessee money along the road. He had stopped at a tavern in Kentucky, and when he went to pay his bill, the boy who attended to it told what the bill would be in specie, and said he could tell what it would be in the notes of the Commonwealth Bank of Kentucky, which were considerably below par; but he said that these Tennessee notes were neither one nor the other, and he could not tell what they would be worth, and what the bill would be in those notes. Now he imagined that this would be the way with the Treasury notes if they were issued; no one could tell what they would be worth.

He protested against taking a vote on the resolution at this time, because every kind of bank had not been tried; and because they had not, gentlemen ought not to commit themselves against any kind of bank which might be called a national bank. He contended that it was impossible to have a sound and uniform currency from the State institutions, controlled by the different State Legislatures, without some great controlling institution. With regard to the circulation and currency of the country, he thought the people ought to lead the Government and not the Government drive the people; and if the people desired to have paper for circulation and not specie, he thought it was not competent for the Government, according to the genius of our institutions, to tell them that they should not have it; and if the people chose to have banks, he thought it was not for the Government of the United States to tell the people that they should not have them; and he contended further that the Government should receive that kind of currency which the people desired to have. If the people chose to have tobacco for a currency, as had been the case in early times, he would have the Government receive of the people that which they had. In China, they have a currency of bone metals, and if that was the case here, he thought it would be wrong for the Government to refuse to take it; because it would be saying that it would not take that which the people had to give. Mr. S. then read several extracts from a pamphlet published in China, on the subject of the trade of that country, in illustration of the state of affairs existing at present in this country.

Mr. WISE then moved to amend the resolution by adding thereto "at this time." "And be it further resolved that it will be expedient to establish a national bank whenever there is a clear manifestation of public sentiment in favor of such a measure."

Mr. BELL then laid on the table the following, to be submitted as an amendment, which, with the amendment, was ordered to be printed:

"And that the adoption of the plan recommended by the President for the collection and disbursement of the public revenue through the agency of Sub-Treasuries, by means of which the public moneys would be under the unchecked control of officers holding their places at the will of the Executive, and often his mere creatures and dependants, or the establishment of a bank, or any fiscal system in the nature of a bank, founded upon the credit and revenues of the Government, would be in-

consistent with the spirit of a free constitution, and dangerous to the liberties of the country."

Mr. POPE then laid on the table the following amendment, to be proposed whenever in order; which, on his motion, was ordered to be printed:

"Strike out all after the word 'resolved,' and insert 'That to aid the fiscal operations of the Government, the business and commerce of the country, to restore public and private confidence, and to ensure to the nation a sound and uniform currency, it is necessary and proper to establish a Bank of the United States, with such capital as may be deemed sufficient, with such limitations and restrictions in the charter as will ensure an equitable distribution of the stock among the States and citizens of the United States alone, prevent excessive issues of notes, exorbitant profits, all interference with the policies of the country, and reserving to Congress the power of preventing and correcting abuses of the charter.'"

The House, at this stage, on motion of Mr. CAMBRELENG, passed to the orders of the day.

The SPEAKER laid before the House a communication from the Secretary of the Treasury, in answer to certain resolves for all orders issued, and correspondence with the several deposit banks, in reference to the transfer of the payment of the several instalments of deposits to the State Governments, under the deposit act of June, 1836, which, on motion of Mr. BRIGGS, was ordered to lie on the table and be printed.

#### ADJOURNMENT OF CONGRESS.

The House then took up the joint resolution from the Senate proposing an adjournment of Congress on Monday, the 9th of October.

Mr. BELL designated it as of an extraordinary and unprecedented character, in the situation of the public business, when the Senate must have known that the House had not passed upon one single measure referred to it. Was it intended, he asked, that they should have long night sessions? Was it intended they should act by voting instead of discussion? Was it intended as a rebuke upon the House that it was too slow? Were the Senate to be their masters, speaking thus indirectly? Why, there was nothing parliamentary about the resolution but its form—nothing but the mere parliamentary courtesy—every thing else in it was an insult to the House, since the Senate could not but know that they (the House) had not acted on one of the important measures before them.

Mr. B. well knew the interest felt there by many members for an early adjournment; but he trusted the great body of them would still, whatever their private feelings or interests might be, would yield sufficiently to allow time for discussing the important measures introduced into the House. He therefore moved to lay the resolution on the table.

Mr. CAMBRELENG appealed to the gentleman to withdraw the motion.

Mr. BELL refused.

Mr. HAYNES asked for the yeas and nays thereon, which were ordered.

Mr. REED thought it better to refer the subject to a committee.

Mr. MERCER asked leave to offer a resolution connected with the subject.

The CHAIR remarked that it could not be submitted till this question was decided.

Mr. BELL, at the request of Mr. MERCER, withdrew his motion; and the latter gentleman caused his proposition to be read. It was, in substance, that the Clerk of the House furnish a statement of the daily cost of the session of the two Houses, exclusive of their contingent expenses, and the aggregate cost of mileage of members thereof.

Objection being made from various parts of the hall,

Mr. MERCER moved a suspension of the rule, and asked for the yeas and nays. Both motions were rejected; not one-fifth voting for the call; and the latter without a division.

Mr. BELL then resumed his motion to lay the subject on the table.

Mr. HAYNES asked for the yeas and nays; which were ordered, and were yeas 94, nays 121.

So the House refused to lay the subject on the table.

Mr. CAMBRELENG said that under the impression that the House had no disposition to discuss this proposition, he would call for the previous question.

Mr. ADAMS requested the gentleman to withdraw that motion, to enable him to submit an amendment. [Loud cries of "No! no!"]

The House divided, and the Chair announced 90 as seconding the call for the previous question; when

Mr. CAMBRELENG, for the purpose, he said, of avoiding debate at that time, moved to postpone the further consideration of the resolution till Monday next, and that it be made the special order of that day at 11 o'clock. Agreed to.

Mr. ADAMS laid on the table a proposition to amend the resolution, by striking out Monday, the 9th of October, and inserting the first Monday in April next. [Great laughter.]

Mr. MERCER gave notice of his intention, at a proper time, to submit his amendment.

Mr. ROBERTSON laid on the table a project, in the form of a substitute, for several of the bills before the House, which was in the following words:

Sec. 1. *Be it enacted*, That until the first day of January, 1839, one moiety of all the public dues of the United States, of every description, may be paid in the notes of any bank or banks whose notes are receivable in the public dues of the State or Territory wherein the same shall be paid: *Provided*, the current depreciation of such notes, when and where paid, shall not be more than five per cent. below the legal currency of the United States, or if more, that the excess of such depreciation shall be made good to the United States by the person or persons paying the same: *And provided*, that no notes shall be received, the current depreciation whereof as aforesaid exceeds ten per cent.

Sec. 2. *And be it further enacted*, That until the said first day of January, 1839, the other moiety of all public dues, and from and after that date, all public dues, of every description, shall be paid, unless otherwise directed by law, in gold or silver, or in the notes of banks which shall not issue or circulate notes or bills of a less denomination than five dollars, and for whose notes gold and silver are payable, and paid on demand; and not otherwise: *Provided, however*, that this act shall not be construed to prevent the receipts of any kind of land scrip or Treasury certificates now authorized by law to be received for public lands: *And provided*, also, that it shall not be lawful for the Secretary of the Treasury to make any discrimination in the funds receivable between the different branches of the public revenue, except as is provided in this section, nor to make any discrimination in the funds payable to different public creditors, otherwise than shall be by law specially authorized.

Sec. 3. *And be it further enacted*, That all receivers of public money, and postmasters, be, and they are hereby, required to keep safely, without lending or using, all the public money collected by them, or otherwise at any time placed in their possession, till the same by law can be conveniently deposited, or shall be otherwise transferred, paid out, or disposed of according to law.

Sec. 4. *And be it further enacted*, That all marshals, district attorneys, and others having public moneys to pay over, and all patentees or public debtors wishing to make payment to the United States, make the same to the Treasurer in this city, or to the Mint and its branches, when near or convenient; and, when not, may deposit the same with such collector, receiver, or other depository, as may be most conveniently situated, and as may be selected for that purpose by the Secretary of the Treasury, or appointed by law for the reception or safe keeping thereof.

Sec. 5. *And be it further enacted*, That all public moneys in the possession of any collector or receiver shall, without delay, be specially deposited as hereinafter directed: *Provided*, There be convenient depositories provided by law for the reception thereof; and where there are no such depositories, the same shall either be drawn out for payments, or be transferred to the next most convenient depository so provided, for safe keeping, under the direction of the Secretary of the Treasury, or as may be by

law directed, and in the meantime, bonds, new and suitable in their terms, shall in all cases, at as early a day as possible after the passage of this act, be required of all collectors, receivers and depositories, in such sums and form as may be deemed reasonable and secure by the Solicitor of the Treasury, for the performance of all the duties required, or to be required, by law.

Sec. 6. *And be it further enacted*, That the said officers, respectively, may be allowed any necessary additional expenses for clerks, fire-proof chests or vaults, or other necessary expenses of safe-keeping, transferring, and disbursing said moneys; all such expenses, of every character, to be first expressly authorized by the Secretary of the Treasury, whose directions upon all the above subjects, by way of regulation and otherwise, are to be strictly followed by all the said officers, where not otherwise provided by law.

Sec. 7. *And be it further enacted*, That the Secretary of the Treasury shall be, and he is hereby, authorized to cause examinations to be made of the books, accounts, and money on hand, of the several officers charged by this act with the safe-keeping, transfer, or other disposition of the public moneys; and for that purpose to appoint special agents, as occasion may require, with such reasonable compensation as he may allow, or as may be allowed by law; which said examinations, in all cases, if there be any such, where the sum on hand usually exceeds one fourth of the amount of the officer's bond, shall not be made less frequently than once in each year, and as much more frequently, in those and all other cases, as the Secretary, in his discretion, shall direct, or as may be by law required. The agents selected to make these examinations shall be instructed to examine as well the books, accounts, and returns of the officer, as the money on hand, and the manner of its being kept, to the end that uniformity and accuracy in the accounts, as well as safety to the public moneys, may be secured thereby.

Sec. 8. *And be it further enacted*, That, in addition to the examinations provided for in the last preceding section, as a further guard over the public moneys, it shall be the duty of each naval officer and surveyor, as a check upon the collector of the customs of their respective districts; of each register of a land office, as a check upon the receiver of his land office; and of the director and superintendent of each mint and branch mint, as a check upon the treasurers, respectively, of the said mints, at the close of each quarter of the year, and as much more frequently as they shall be directed to do so by the Secretary of the Treasury or the law of the land, to examine the books, accounts, returns, and money on hand, of the collectors, receivers, and treasurers, and to make a full, accurate, and faithful return, on oath, to the Treasury Department, of their condition.

Sec. 9. *And be it further enacted*, That the Secretary of the Treasury shall, with as much expedition and convenience as the public business and the safety of the public funds will permit, withdraw the balances remaining with the late and present depositories of the public moneys, except such deposits as may have been made in the treasuries of the respective States, and confine the safe-keeping, transfer, and disbursement of those moneys to the depositories established by this act.

Sec. 10. *And be it further enacted*, That, for the payment of the expenses authorized by this act, the sum of \$— be, and the same is hereby, appropriated, to be paid out of any money in the Treasury not otherwise appropriated.

Sec. 11. *And be it further enacted*, That all officers charged by this act with the safe-keeping, transfer, and disbursement of the public money, are hereby required to keep an accurate entry of each sum received, and of the kind of money in which it is received, and of each payment or transfer, and of the kind of currency in which they are made; and that if any one of the said officers shall convert to his own use, in any way whatsoever, or shall use by way of investment in any kind of property or merchandise, or shall lend, with or without interest, any portion of the public moneys entrusted to him for safe-keeping, disbursement, transfer, or for any other purpose, every such act

shall be deemed and adjudged to be an embezzlement of so much of the said moneys as shall be thus taken, converted, invested, used, or lent, which is hereby declared to be a high misdemeanor; and any officer or person convicted thereof before any court of the United States of competent jurisdiction, shall be sentenced to imprisonment for a term of not less than two, nor more than five years, and to a fine equal to the amount of the money embezzled.

Sec. 12. *And be it further enacted*, That in all cases where it is made the duty of the Secretary by this act to transfer the public money, or any part thereof, in the hands of public collectors or receivers, to other depositories; and in all other cases where it is necessary or expedient to provide for the safe-keeping of the public money, he shall cause the same to be specially deposited in one or more of the State banks most conveniently situated, which may agree, for reasonable compensation, to receive the same on special deposit, and not as a fund for discounts; to deliver or pay out the same when legally required by the Secretary of the Treasury or the law of the land so to do; to keep an account of the funds deposited, their nature and amount, and to furnish such periodical statements thereof as may be required; *Provided*, it shall be the duty of the Secretary, in making the selection of a bank or banks, in all cases to give the preference to those which may be the depositories of the public money of the respective States or Territories in which they are situated.

On motion of Mr. CAMBRELENG, the House then resolved itself into a Committee of the Whole on the state of the Union, Mr. HAYNES in the chair, and resumed the consideration of the bill to POSTPONE THE FOURTH INSTALLMENT WITH THE STATES.

The question pending was on the amendment of Mr. PICKENS to strike from the bill the indefinite clause "till further provision by law," and insert "the first day of January, 1839," with the amendment of Mr. ADAMS, as given in last night's proceedings.

Mr. MERCER spoke against the bill, and entered at large into a review of, and strictures upon, the report of the Secretary of the Treasury.

Mr. RENCHER had been struck with the singular course some gentleman had taken in their opposition to this bill. They had deprecated the deposit bill. But if it had not been for the deposit law, where would the whole amount of surplus revenue have been at this time. That law had divested Government of its dangerous patronage, and had enabled the States to scatter blessings around them. In his opinion, if the emergency of the country required the passage of the present bill, we had a right to do it. But he must be satisfied that it was absolutely necessary for the welfare of the country, before he would vote for it. But why did they wish to raise a greater sum than the Secretary required? They were about to place at the disposal of the Secretary double the amount he asked. If they postponed the deposits to the States at all, it would be done for ever. It appeared that the whole expenditure for the present year amounted to forty-eight millions, five of which were said to be unavailable. Thus the whole expenditure of this year exceeded the expenditure of the whole term of the administration of the honorable gentleman from Massachusetts (Mr. Adams) who was driven from office by the cry of extravagance. If this bill did not pass, he would vote for the Secretary to have power to issue Treasury notes.

Some gentlemen had opposed the bill on the ground that it would create a national debt; but whether the bill passed or not, a national debt would be created. We were called upon to defer the payment of merchants' bonds. Those bonds would thus be thrown on the revenue of next year; by which time it was to be hoped that commerce would revive and resuscitate its exhausted energies, so as to replenish the Treasury, and enable the Secretary, by the increase of revenue, to absorb the Treasury notes. In two years, at least, the administration would be enabled to redeem those notes, and then we should have no national debt. If the bill did not pass, it was to be hoped that the

Secretary would be able to make available a great portion of the funds which were now said to be unavailable. He was sure that none of the States would refuse to take the notes of their own State banks. He could not vote for the bill, because he believed the State banks would be better able to make arrangements with the States than with the General Government; but the issue of Treasury notes would assist the States, and cause a greater influx of wealth into the Treasury by increasing the revenue, from which means the Secretary would be enabled to redeem them. If the money was not distributed among the States, it was very certain that it would be disposed of by the same extravagant and prodigal expenditures as heretofore. It would be expended in the erection of splendid light-houses, to enable vessels to avoid rocks which the pilots themselves could scarcely see in the daytime. It would be wasted in appropriations for splendid public edifices of no use whatever, or for expeditions to the polar circles for the advancement of science. Yes for an Exploring Expedition, at the enormous expense of two millions, more than had been already appropriated, for the purpose of making scientific researches, and ascertaining the different degrees of latitude and longitude in the southern hemisphere, while the people were suffering from the greatest distress at home. He could not vote for the bill, because he believed it uncalled for by the present condition of the country, and if adopted would not answer the purposes for which it was designed.

Mr. TAYLOR defended the bill, on the ground that it was called for by the exigencies of the Government, and answered the objections urged against it.

Mr. BOND opposed it on the ground that the States would suffer immense losses from the disappointment of their just expectations, in being deprived of that to which they were justly entitled, and which they had every reason to expect. And that although the Secretary might not be able to get specie from the deposit banks, the States would not object to receive the notes of their own banks in payment of their respective shares. He contended that the people were being experimented on in the same way that philosophers experimented on dogs and rabbits, although they frequently died under such experiments.

Mr. BOND continued his remarks. He was in favor of a well regulated national bank for the purpose of regulating the currency. He thought such an institution might be framed, from the experience of the last fifty years, so as to be beneficial to the country. He considered the object of the present Congress was the benefit of the people; but, in his opinion, the bill before them would afford no manner of relief.

[At the close of the gentleman's remarks, a cry of "Question" arose in various parts of the House.]

Mr. CAMBRELENG said, that if they would promise the question should be taken that night, he did not mind how late they remained; but if otherwise, he hoped gentlemen would have some consideration for the health of those who had been deprived of their rest last night.

Mr. WISE wished an opportunity to give his reasons for voting against the bill, but if gentlemen would pledge themselves he should be heard tomorrow, he would defer his remarks till then; but he was rather fearful that he could not rely upon pledges. On many occasions he had received a pledge, but when the time arrived, the previous question popped up like the keys of a piano forte.

Mr. EWING spoke at considerable length against the bill. He adverted to the Specie circular, and said that, had he been permitted to offer his resolution that morning, he would have shown that the Specie circular had been made for the people, but was not binding on the favorites of Government. He wished the Government might be taught a little experience from its recent measures and if it did not learn experience, he was willing to afford it sympathy.

But the course of Government made it obvious that it was determined to take care of itself, and to let the people alone. For his part, he was willing to vote for any measure which would be beneficial to the whole; but he felt prohibited from voting for

any partial measure of relief. Much had been said about the deposite banks having disgraced themselves, as being unable to pay. But there was no disgrace attached to them; they were as well able to pay now, as before they suspended specie payments. No, they had not disgraced themselves; it was the Secretary himself who had brought disgrace and dishonor upon them. There had been much talk about western paper, but he would tell them that so far as Indiana was concerned, for every two dollars of paper issued, she had one dollar in specie. She was ready to pay her debts at any time when the Government thought fit to pay her, and she asked for none of the proposed measures of relief, but was ready to pay her share. He was willing to vote for the amendment proposed by the gentleman from Massachusetts, but he would vote for no partial measures of relief. Why did not the House permit him to introduce his resolution, calling for returns from the land offices? He would then show them that there was one law for the people, and another for the favored few who enjoyed the patronage of Government. As an instance, he would mention a case where an order had been issued from the War Department to an officer, but that order was accompanied with a private letter, informing him that he might disobey the order if he thought proper. It was this state of things which he wished to expose. Again, it had been said that a portion of the money due to the Treasury was unavailable; but they might depend upon it, that although they did not choose to make it available to the people, they would speedily find means to make it available to themselves. They had the power to make it available or unavailable, just as they pleased.

Mr. JENIFER wished to give his views on the bill, but was willing to defer his remarks until tomorrow, provided the Chairman of the Committee of Ways and Means would pledge himself that the previous question should not be taken until late in the day.

Mr. CAMBRELENG said he believed there was an understanding that the question on the passage of the bill would not be taken until late in the day.

The question was then taken on the amendment proposed by Mr. ADAMS, to that of Mr. Pickens, viz:

"And all the balances of public moneys due from all the deposite banks are hereby appropriated to the said payment, and no part of them shall be applied to any other payment whatever; and if the portion of the said balances due by the said deposite banks cannot be recovered in time to enable the Treasury to pay the whole of the said deposite with the States, hereby made payable on the first of January, 1839, then the instalment of debt from the late Bank of the United States for the stock in that institution held by the United States, payable in October, 1838, is hereby appropriated to make up any insufficiency of the sums recovered from the deposite banks, to complete the said payment of the fourth instalment of the deposite with the States. And if the said sums, so appropriated, should still prove insufficient to complete the said payment, the faith of the United States is hereby pledged that provision shall be made by Congress to complete the same."

Ayes 89—noes 104. So the amendment to the amendment was rejected.

The question was then taken on the amendment of Mr. Pickens, viz: to strike out "until further provision by law," and insert "the first of January next"—ayes 65, noes not counted.

So the amendment was rejected.

Mr. UNDERWOOD moved to amend the bill by striking out the whole of it, after the enacting clause, and inserting the following:

"That if the funds set apart to be deposited with the States, in virtue of the act of June 23, 1836, shall prove unavailable or insufficient to any extent to meet the provisions of that act, in such case the Secretary of the Treasury is hereby authorized and directed to sell, and transfer to the purchaser or purchasers, the bonds of the United States Bank of Pennsylvania, or evidences of the debt which the said bank has contracted to pay the United States, for and in consideration of the stock which the United States owned in the late Bank of the United

States, and apply the proceeds of such sale or sales to make up the deficiency; provided, that the said bonds or evidences of debt shall not be sold for less than their par value; and provided, also, that the bonds and evidences of the debt aforesaid, for the first instalment thereof, shall not be disposed of under this act."

The amendment was rejected—ayes 81, noes 107. After the rejection of other amendments offered by Messrs. MASON and MARTIN,

On motion of Mr. CAMBRELENG, The committee rose and reported the bill to the House without amendment.

The SPEAKER presented a Message from the President, forwarding to the House, in compliance with a resolution of the 13th inst. a Report of the Secretary of the Treasury relative to the diplomatic correspondence between the United States and Great Britain, on the subject of the northeastern boundary. Also, copies of diplomatic correspondence between the United States and Brazil.

They were laid on the table, and ordered to be printed.

On motion of Mr. CAMBRELENG, The House adjourned.

## IN SENATE,

WEDNESDAY, September 27, 1837.

Mr. TIPTON presented a petition, praying the revival of the pre-emption law;

Also a memorial from a committee, appointed by a meeting of the citizens of Marion county, Indiana, complaining of the tardy operations on the Cumberland road, and praying the assistance of a superintendent of the road within that State; which were laid on the table.

Mr. M'KEAN presented a memorial from Aaron S. Haines, Thomas Johnson, and one hundred and twelve others, remonstrating against the annexation of Texas; which was laid on the table.

Mr. PRENTISS presented nine memorials from different counties in Vermont, signed by women, remonstrating against the annexation of Texas; which were laid on the table.

Mr. WEBSTER presented a memorial from Laura R. Marsh, daughter of the late Elisha Phelps, of the revolutionary army, for a pension; which was laid on the table.

The resolution submitted by Mr. PRESTON, that the Committee on the Library be instructed to inquire whether the purchase of Mr. Madison's books, authorized by an appropriation of the last session of Congress, has been made, and if so, that the said committee inquire into and report a plan for the publication of the same, was taken up and agreed to.

On motion of Mr. HUBBARD, the petitions of Lieutenants Lang and Rideway, which were presented by him some days since, and laid on the table, were taken up, and referred to the Committee on Naval Affairs.

## SPECIAL ORDER.

The Senate resumed the consideration of the bill imposing certain duties on public officers as depositaries in certain cases—the question pending being on Mr. CALHOUN's amendment.

Mr. WALKER addressed the Senate at some length in favor of the Sub-Treasury system, as a measure the best calculated to relieve the present distressed state of the country.

At the suggestion of Mr. HUBBARD, a verbal modification was made in the amendment of Mr. CALHOUN.

Mr. MORRIS stated that his objection to the amendment of the Senator (Mr. Calhoun) was, that it permitted the reception of bank notes of any description by the Government. He remarked that he was opposed, *in toto*, to that. He had heretofore expressed his opinion that the Government had no right to discharge or receive their dues in any thing but gold and silver. His object, then, in offering the amendment he did last evening, was to obtain a repeal of the law to which he objected, as soon as could conveniently be done. If the Senator should not think proper to modify his amendment, so as to meet his (Mr. M's) views in this respect, he would ask at the proper time, to strike out the amendment of the Senator from South Carolina.

Mr. CALHOUN replied that he had no objection to provide that no notes under five dollars shall be received.

Mr. C. then made a slight modification of his amendment.

Mr. BENTON rose and said that an objection had been urged against the Sub-Treasury system, on the ground that drafts on the Government might be circulated as a currency like gold and silver. He would therefore offer an amendment to meet the objection.

The following was then sent to the Secretary's desk, and after being read, was laid on the table:

"And be it further enacted, That it shall be the duty of the Secretary of the Treasury to prescribe regulations to enforce the speedy presentation of all Government drafts, for payment, at the place where payable; and in case of unreasonable delay in such presentation, payment of the draft so delayed may be made at any other place within the limits of the United States."

Mr. CALHOUN suggested whether it would not be better that the Senate should now adjourn, in order that Senators might give to the amendment of the Senator from Ohio (Mr. Morris) some little reflection. Besides, this body was far advanced in the business before them.

Mr. BUCHANAN hoped that an adjournment would not now take place. It was too early an hour, and we should proceed as fast as possible with the business we had to transact.

Mr. CALHOUN disapproved of the time for the adjournment of Congress being fixed at so early a day. An early decision on the matters before Congress was important, but still it was necessary that discussion should be had on them.

He said he was willing to remain here till December or January next, rather than leave this important question unsettled. He would vote for an adjournment for the reasons which he had stated.

Mr. CRITTENDEN then rose and delivered his views at length in opposition to the bill.

On motion of Mr. WEBSTER, The Senate adjourned.

## HOUSE OF REPRESENTATIVES,

WEDNESDAY, September 27, 1837.

The Hon. JOSEPH L. WILLIAMS, a member elect from the State of Tennessee, appeared, qualified, and took his seat.

Petitions and memorials were presented by Messrs. GRENELL, ADAMS, and CALHOUN, of Massachusetts.

Mr. EVERETT, of Vermont.

Mr. MARVIN of New York.

Mr. BIDDLE asked the leave of the House to offer the following resolution:

*Resolved*, That the report of the Secretary of the Treasury, on the subject of payments in specie, be referred to the Committee of Ways and Means, with instructions to inquire and report how far the discretionary power, now exercised by the Secretary of the Treasury, may, without prejudice to the public service, be subjected to legislative regulation.

Objection being made,

Mr. BIDDLE then moved a suspension of the rules, and called for the yeas and nays.

Mr. CAMBRELENG said, with permission of the House, he would make a suggestion to the gentleman from Pennsylvania.

Mr. MERCER rose and objected.

Mr. CAMBRELENG. All I wanted to say was that the subject has been already reported upon by the Committee of Ways and Means.

Mr. HAMER wished to ask of the Chair when resolutions would be in order.

The CHAIR replied that the rules of the House presented the order of business. After the presentation of petitions and reports from committees, then resolutions would be in order.

Mr. SMITH rose to make a remark—

The CHAIR. It is not in order to entertain a discussion on a motion to suspend the rules.

Mr. SMITH rose to a question of order. This was a subject that had already been reported on, as we had been informed by the chairman of the Committee of Ways and Means; and this being the

# CONGRESSIONAL GLOBE.

25TH CONG.....1ST SESS.

MONDAY, OCTOBER 9, 1837.

VOLUME 5.....No. 6.

BY BLAIR & RIVES.

—WEEKLY—

PRICE \$2, FIRST TWO SESSIONS.

[Continued from No. 5.]

case, he wished to inquire if it was in order to open up this subject anew.

The CHAIR said it was in order to move to suspend the rules, and that was the only question he had to decide.

The yeas and nays were then ordered, and the question being taken, was decided in the negative—yeas 85, nays 101, as follows:

YEAS—Messrs. Adams, Alexander, Ayckrigg, Bell, Biddle, Bond, Buchanan, William B. Calhoun, John Calhoun, William B. Campbell, William B. Carter, Chambers, Cheatham, Childs, Corwin, Cranston, Crockett, Curtis, Cushing, Darling, Dawson, Davies, Deberry, Dennis, Everett, Ewing, Richard Fletcher, Fry, Goode, James Graham, William Graham, Grennell, Griffin, Hall, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Herod, Henry Johnson, William Cost Johnson, Andrew W. Loomis, Mallory, Marvin, Samson Mason, Maury, Maxwell, McKennan, Menifee, Mercer, Milligan, Matthias Morris, Calvary Morris, Naylor, Noyes, Ogle, Patterson, Phillips, Potts, Potter, Rariden, Ridgway, Robertson, Rumsey, Russell, Sergeant, Augustine H. Shepperd, Charles Shepard, Shields, Southgate, Stanley, Stratton, Taliaferro, Toland, Albert S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph L. Williams, Christopher H. Williams, Wise, and Yorke—55.

NAYS—Messrs. John W. Allen, Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Boon, Bouldin, Brodhead, Bronson, Bruyn, Cambreleng, Casey, Chaney, Chapman, Cilley, Clark, Cleveland, Clowney, Coles, Connor, Craig, Crary, Cushman, Davee, Farrington, Fairfield, Foster, Gallup, Gholson, Glascock, Grandland, Grant, Gray, Haley, Hammond, Hamer, Harrison, Haynes, Holsey, Hopkins, Howard, Hubley, W. H. Hunter, Ingham, T. B. Jackson, J. Jackson, J. Johnson, Kemble, Kilgore, Klungen Smith, Lincoln, Logan, Arphaxed Loomis, James M. Mason, Martin, May, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Moore, Morgan, Samuel W. Morris, Muhlenberg, Noble, Owens, Parker, Parmenter, Patton, Paynter, Pennybacker, Petriken, Phelps, Pratt, Prentiss, Reel, Reilly, Rhett, Richardson, Rives, Sawyer, Shipley, Smith, Snyder, Spencer, Stewart, Thomas, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Wagoner, Webster, Weeks, Thomas T. Whittlesey, Jared W. Williams, Worthington, and Yell—101.

Messrs. FRY, NAYLOR, and PAYNTER of Pennsylvania.

Mr. HOWARD of Maryland.

Mr. BOULDIN of Virginia.

Mr. CONNOR of North Carolina.

Mr. POLK, Speaker, of Tennessee.

Mr. GRIFFIN of South Carolina.

Mr. OWENS of Georgia.

[Mr. OWENS presented the memorial of citizens of Camden county, praying the establishment of a mail route from Larysburg to Burnt Port, in said county.]

Mr. MASON of Ohio.

Mr. SNYDER of Illinois.

Mr. LEWIS of Alabama.

Mr. THOMAS, on leave, submitted the following resolution, which was considered and adopted:

*Resolved*, That the Committee on the Judiciary be instructed to inquire what laws will expire with the termination of the present session of Congress, and to report a bill to continue in force such as ought to be extended.

Mr. W. C. JOHNSON of Maryland, on leave, submitted the following resolution, which was considered, and adopted:

*Resolved*, That the Commissioner of the Public Buildings be, and he is hereby, requested to lay before Congress the plan of the Treasury building now erecting; showing the whole design of the edifice, and its exact location upon the public ground, and its arrangement with the adjacent streets and avenues; and also in his report to say whether it is intended to take down the building now occupied by the State Department, or whether that building is to form a part of the new edifice.

The following resolutions were submitted, which, by a rule of the House, lie over one day, viz:

By Mr. WILLIAMS of North Carolina:

*Resolved*, That the Postmaster General be directed to report to this House the expense of transporting the Express Mail, the amount of revenue derived from it, and the regulations adopted for the government thereof.

By Mr. STANLEY:

*Resolved*, That the Secretary of the Treasury be requested to furnish this House with a statement of the number of Sub-Treasuries which will be required, if the bill imposing additional duties as depositories, in certain cases, on public officers,

should become a law; and further, how many new offices must be created, if any; how many new buildings to be erected; and what will be, as nearly as he can estimate, the annual expense of the system; what the salaries to be paid the officers, and what will be the commissions to which they will be entitled.

By Mr. MALLORY:

*Resolved*, That the Secretary of the Navy be requested to communicate to this House the cause of the detention in the sailing of the Exploring squadron, together with the correspondence between the Department and the commander, and other officers or persons who are now, or have been at any time, attached to that service; and also report what amount of the appropriation made by Congress for that purpose has been expended, and whether an additional sum will not be required within a short period to carry on the expedition.

Br. Mr. EWING:

*Resolved*, That the Secretary of the Treasury be directed, with as little delay as possible, to communicate to this House the quantity of lands sold, the proceeds thereof, and the amount of specie received in part of said proceeds, at the different land offices, during the past year, and embracing up to the last reported returns of the present; and to designate, with as precise a description as the reports of the land offices and depositories of public money may enable him, all the paper, of every kind and denomination, received in payment during said period; the dates when received; whether the same or any other part thereof was in the shape of drafts, checks, notes, bills, or orders, by whom made, when and where payable, the amounts severally, at what land office received, by whom paid into the office, and by whom endorsed, if there were any endorsers; also, the names and places of the depositories thereof; or, if any, what other disposition has been made of said paper, or any portion, by order of the Department.

## NATIONAL BANK.

The House then proceeded to the consideration of the following resolution, reported from the Committee of Ways and Means on the 25th instant, it being the business next in order:

*Resolved*, That it is inexpedient to charter a national bank.

The question pending was the motion of Mr. WISE to amend the resolution by adding thereto, "at this time. And be it further resolved, that it will be expedient to establish a national bank whenever there is a clear manifestation of public sentiment in favor of such a measure."

Mr. SERGEANT, who was entitled to the floor, stated that he felt greatly indisposed, and would feel obliged if the House would indulge him till to-morrow.

Mr. CAMBRELENG had understood the report on the Mississippi election to be the first thing in order this morning, and he therefore hoped the above would be postponed till to-morrow. At the suggestion of the Chair, Mr. C. varied his motion so as to postpone it till Saturday morning, and give it precedence over all other business; which was agreed to.

Mr. SMITH of Maine, on leave, submitted a motion to print 5,000 extra copies of the Message of the President, communicating the correspondence in relation to the northeast boundary; which was agreed to.

Mr. ADAMS then asked leave to move to print 5,000 extra copies of the correspondence in relation to Brazil; but it was objected to.

Mr. PATTON, from the Joint Committee on the Library, on leave, reported the following resolution; which was considered and adopted:

*Resolved*, That the Committee on the Library be instructed to ascertain, whether the purchase of Mr. Madison's work, authorized by an appropriation at the last session of Congress, has been made; and if so, that the said committee inquire into, and report a plan for the publication of the same.

## MISSISSIPPI ELECTION.

The House then proceeded to the consideration of the business of the morning hour, being the report of the Committee on Elections, which was accompanied by the following resolution:

*Resolved*, That Samuel J. Gholson and John F. H. Claiborne, are duly elected members of the 25th Congress, and as such are entitled to take their seats.

The question was on concurring with the Committee in the above resolution.

Mr. MAURY addressed the Committee at some length in opposition to the resolution. He contended that by the Constitution of the United States, it was made the duty of the Legislature of Mississippi to prescribe the time, places and manner of holding their elections. The Constitution of the United States had made it their specific duty to do so, and if they refused or neglected to exercise the power conferred upon them, it was for Congress to exercise it. It was not in the power of the Governor, he argued, to determine upon the time, places and manner of holding elections; and even if the Legislature of Mississippi had conferred this power upon the Governor, he could not have exercised it legally, because it would have been in contravention of the Constitution of the United States. [He then went into a critical examination of that clause in the Constitution of the United States which says: "When vacancies happen in the representation from any State, the Executive authority thereof shall issue writs of election to fill such vacancies," and of the definition of the word "happen," to show that the vacancy which had occurred by the expiration of the term of the two representatives from Mississippi on the third of March last, was not such a vacancy as that contemplated by the framers of the Constitution when they inserted the above clause.] The above clause, in his opinion, only referred to the contingency of a vacancy happening by the death, resignation, or other inability, of a member from a State, and did not refer to the case of the expiration of the term of service of representatives.

He contended, also, that argument as to time would not lie, because the Governor of Mississippi could have assembled the Legislature and had an election held in time enough in the legal and proper mode. He next referred to cases that he considered cases in point, which had occurred in the Senate of the United States, where seats became vacated by the expiration of the term of Senators, and where the Governor had filled such vacancies; and showed that two decisions had been had by the Senate where it refused to permit such Senators so appointed to qualify and take their seats, because they declared that the Governor of the State had no power to make a temporary, where the regular term of the member had expired.

Mr. M. concluded by moving to strike out all after the word "*Resolved*," and inserting "that Samuel J. Gholson and John F. H. Claiborne, not being duly elected members of the House of Representatives, are not entitled to seats on this floor as such."

Mr. PENNYBACKER gave the reasons at some length which had operated upon his mind, as well as that of the majority of the committee, in coming to the conclusion he did. The facts of this case had been set specially by the committee, in their report, and they were briefly and simply these. Messrs. Claiborne and Gholson were members of the 24th Congress. Their term of office expired with that Congress, which was on the 3d of March last. By the election laws of the State of Mississippi, it was provided that the general election for members of Congress, as well as other public functionaries, should take place at the times and places, and in the mode therein specified. The time fixed by that law for the election of representatives to the Congress of the United States, was the first Monday in November biennially. Then the first Monday in the coming November would be the day it would have taken place, if it had not been for a state of things which was entirely unexpected.

There would have been no necessity whatever for an extraordinary election to have taken place, had not the President deemed it proper to issue his proclamation convening Congress on the first Monday in September. The Governor, seeing that the State of Mississippi would not be represented in the extra session of Congress, in virtue of the power he conceived conferred upon him, authorized an election to be held at an early day. The election was held in the month of July; but the Governor, in issuing his proclamation and writs of election, limited the period for which these gentlemen were to be elected to the first Monday in November; and this question would come up as to how far he was authorized to do so. The Governor had claimed this authority under that clause of the Constitution of the United States which had been referred to by the gentleman from Tennessee, which was, that "when vacancies happen in the representation of any State, the Executive shall issue writs of election to fill such vacancies." Mr. P. contended that this was the plain and simple construction of the Constitution, and that it must be so construed. We must take the plain and simple meaning of words, and not place forced constructions upon them. In the very nature of things, all language must be defective; therefore we must endeavor to ascertain what was meant by those who made use of this language. It seemed to him, from the state of the facts given, and the literal meaning of words, that it was self-evident that such a vacancy had happened in this case as was contemplated by the Constitution. The office of representative was created by the Constitution of the United States, and was as much an office and as much one created by the Constitution, as the office of Judge of the Supreme Court, President or Vice-President of the United States, or any other office created under the Constitution. The tenure of that office was two years, and it expired on the third day of March, and consequently the office became vacant on the fourth day of March, and remained so until it was filled.

Mr. P. then went into an examination of the word "happen," and contended that the gentleman had placed altogether too narrow a construction on the word. He came to the conclusion that the language was sufficiently broad to comprehend this case, and authorize the Executive of Mississippi to issue his writs of election, directing an election to be held in July last. It was necessary, from the very nature of the case, that this power should be exercised by the Executive to have the interests of the State represented at the present session. We must place a practical construction upon the Constitution, and in doing so it would be found that the same reason existed for issuing his writ directing an election to be held, as in the case of death or removal from office. Mr. P. then referred to a variety of cases in illustration of his position, and came to the conclusion that such a vacancy had happened as was contemplated by the clause in the Constitution which had been referred to.

Mr. MAURY made a few additional remarks in explanation of the position he had taken.

At this stage Mr. CAMBRELENG interposed, and called for the orders of the day.

The bill from the Senate to remit the duties upon certain goods destroyed in the late conflagration in the city of New York, was taken up, read twice, and, on motion of Mr. CAMBRELENG, referred to the Committee of Ways and Means.

The bill from the Senate, entitled an act making an additional appropriation for the suppression of Indian hostilities in Florida, having been read twice,

Mr. CAMBRELENG remarking that this bill was identical with one already before the Committee of the Whole on the state of the Union, he moved that this bill be also committed thereto; which was agreed to.

#### DEPOSITE ACT.

The House then proceeded to consider the "bill to postpone the fourth instalment of deposit with the States," reported last night, without amendment, from the Committee of the Whole.

Mr. JENIFER opposed the bill. If, however, it were to pass, he preferred it with the amendments of Messrs. Pickens and Adams, but con-

demned the proviso introduced in the bill by the Senate.

Mr. MENIFEE followed on the same side, on the ground that the deposit act, in its character, partook of the solemn and inviolable obligation of a treaty, of far more binding force than even a positive contract, and the passage of this bill was not justified on financial grounds.

Mr. FRY said it was well known to the House that it was very seldom he troubled the House with any remarks. He generally contented himself with giving a silent vote upon every question presented to him. But, sir, so many gentlemen seem disposed to induce the belief that this bill of June, 1836, was conceived in a spirit of distribution, that I feel called upon to say that I know better. Sir, I was a member of the Congress that conceived and brought to perfection this deposit bill; and, sir, I appeal to every gentleman who acted with me at the time, to say whether it was not, in every sense of the word, clearly a deposit bill; a bill, the object of which was to secure the public moneys, to give safety to the funds of the Government, and an enlargement of the system of deposit commensurate with the immense augmentation of its funds. To show that it was considered a distribution act, the gentleman from Kentucky, who just addressed the House, has cited the speeches of two gentlemen from New York, and one from Pennsylvania. It is well known that each of these gentlemen was opposed to the passage of that bill; and they took the ground with a view of defeating the measure. Sir, let me turn the attention of the gentleman from Kentucky to a speech which was delivered while the bill was under consideration by the distinguished gentleman of Virginia, (Mr. Mercer), who addressed the House yesterday: "Mr. Mercer was astonished that gentlemen should consider the two propositions distinct. He would not vote for the one unless united with the other—it was a proposition to reduce the amount of deposits in the banks, from thirty-eight millions to five millions—it was an important part of the subject regulating the deposits, and indissolubly connected with it—it made the States responsible for the repayment of the money, and ought not to be called a distribution." Here are the remarks of a gentleman who participated in the debate at the time, who knew well the spirit and meaning of the act. Sir, what is a distribution? A distribution must have an object in view. If this money was distributed among the States, for what purposes was it distributed? Was it a donation to the States? If it was, why the necessity for any provision for its repayment? Was it a loan to the States? If we turn to the proceedings of the Senate upon that bill, you will find that upon a motion to strike out the words "deposit with the States," and insert "loan to the States," there were but five out of forty-five votes in its favor. It then clearly was not a loan, nor a donation, and not a distribution in the sense which it is endeavored to be sustained here. Sir, I know the act was a deposit act, and I know it was not until the bill, when it came into this House, was stripped of every feature that would characterize it as any thing else than a deposit bill, that those who eventually supported it could be united in its support.

Sir, suppose Congress had at that time passed a bill to deposit thirty-seven millions of the money in the Treasury with the Bank of the United States, and suppose a fourth instalment was claimed by that bank, under the same circumstances, as gentlemen now claim for the States. Does any gentleman think the bank could claim? Or suppose the Secretary of the Treasury in counting up the balance in the Treasury, on the 1st of January last, had made a mistake of ten millions, and that, consequently, three instalments would have absorbed the whole Treasury, should Congress borrow money merely to make that deposit with the States? It cannot seriously be thought of. Sir, it was a deposit bill; the States have nothing to claim; they entered into no contract about the money; they had merely to say whether they were willing to become the depositories of a part of the Government funds or not. If the appropriations made by law since the passage of that bill had much over-reached the income of the Government, and to meet those

appropriations, the Secretary had withheld one or two instalments, without any legislation on our part, he would have been justified before the country. No man can or will deny it. Then how idle to contend that the Secretary of the Treasury shall make this fourth instalment with the States, and let the General Government borrow the money and tax the people, so that the instalment can be made. Sir, the people would not justify this House, if we should borrow money with a view to give it to the States. Sir, a distinguished colleague of mine, (Mr. Biddle) I understood a few days ago to say, that he could not return to his constituents, and say that he had relinquished Pennsylvania's share of this money. Sir, I am as willing, and I have always contributed what I could to my native State, and under proper circumstances, that is, if this money was here and not wanted, I should be the last man to withhold any thing from that State. But, sir, the people of Pennsylvania are too high-minded to beg from the General Government. Sir, the people of Pennsylvania, besides their industry and economy, have abundant resources without depending upon help from the General Government, especially when the General Government wants all it has for its own use.

I beg to differ from my colleague in one particular. I understood him to say, that it was the firmness and sagacity of the present Executive of Pennsylvania, that that State was in a condition not to require this fourth instalment. Sir, I have no fault to find with the veto message upon the Improvement bill passed at the last session of the Legislature of Pennsylvania. But, sir, whether the policy of that message is to be attributable to the foresight and sagacity of the present incumbent, is what I doubt. That veto message, written in Philadelphia, as was generally supposed, was transmitted to Harrisburg, vetoing the whole bill, as it was expected it would pass. Unfortunately, however, before the message reached its destination, two or three material items of appropriation were struck out of the bill just before its final passage. Our worthy Governor, however, signed the message, and sent it to the Legislature, vetoing the whole bill, including the items that had been struck out. I do not recur to this epoch in the history of Pennsylvania politics with a view to derogate from the character of the Executive of Pennsylvania; nay, I respect him as the Governor of that great and growing Commonwealth, and he has friends here for whom I cherish the kindest feelings, and who I am proud to own as Pennsylvanians; but I recur to the fact to show that it was not so much to be attributed to the sagacity of the Executive of Pennsylvania, as my colleague was wont to show, that that State was in a condition to do without this fourth instalment.

Sir, it was stated here on yesterday by a gentleman from Massachusetts, [Mr. Cushing,] that the amendment which was introduced into the deposit bill by a then colleague of mine, [Gen. Anthony,] was written in, or came from, one of the departments, and that my colleague acted as the instrument of one of the Executive officers in submitting it, and said he could prove it. Sir, I know not where that amendment came from, I know Gen. Anthony presented it, and it was the only course that we could at that time unite upon. If the gentleman was in his seat, I would suggest to him that it probably would be better to justify that charge, with the proof which he has at hand.

Sir, I am opposed to making this deposit of this fourth instalment, because I am opposed to the measure of issuing Treasury drafts. I wish the Government to get along without a resort to an increase of paper circulation of any kind at this time. Sir, the banks, since the suspension of specie payments, have been gradually reducing their discounts, so that their condition, at this time, is infinitely improved to what it was when the suspension took place. If now the Government issue twelve millions of Treasury notes, they necessarily will find their way into the banks—the banks will discount upon them to at least double their amount, and when the time arrives for their redemption, you will find that by this act we have added twenty-five or thirty millions

to our paper circulation without adding a dollar to the specie basis. Then, sir, when redemption takes place, the amount now issued will come in, and all that is issued upon it will fall to the ground, and another revulsion in our money affairs will take place, and every revulsion brings us near to a national bank. Moreover, if this issue takes place, and the consequent discounting upon by the banks, we will have the channels of trade bloated and inflated with a paper currency, as much and as dangerously as they were when the suspension took place. Sir, I am for collecting the money due the Government before I will resort to such a measure to raise money. Gentlemen here denounce the Sub-Treasury system, and laud the deposit bank system for the collecting and disbursing of the public money. Sir, if the banks are safe depositories for the public money, then they are able to pay the Government what they owe it, and we need not resort to that issue of Treasury bills. Sir, I think it is due to the people of this country, at least, to make an effort to collect some of the money in these banks, and owing by the merchants, before we authorize the issue of any paper money, without it be upon a specie basis. No doubt the Government is amply able to redeem all the Treasury notes that may be issued, but it is still objectionable, and I think exceedingly so, in consequence of adding to, and consequently disturbing the present state of our paper currency. Sir, the amount of paper money in circulation has diminished to a very considerable extent, which to that extent is an improvement in its value; and now for the Government to commence issuing paper drafts, or money, is only to throw the paper circulation into the same unhealthy state from which it is now recovering. With this view I am opposed to any addition whatever to the paper circulation of this country, without a corresponding acquisition to our hard money. Sir, I am also opposed to an extension of credit for duty bonds due the Government. Sir, I believe this Government ought to require cash duties upon all importations into this country, to be paid as soon as a cargo is discharged.

Sir, if we extend the time of paying those bonds that are due to the Government, and ought to be paid, what will follow? Why, sir, immense importations. Our merchants have been gradually reducing their debts abroad; importations have in a measure ceased; goods have accumulated in the hands of foreigners; they are anxious to sell—our merchants are anxious to import; and if they can get Congress to trust them, our markets will soon be so overstocked with foreign goods that our own manufactures will suffer; and what is to follow that? An increase of the tariff. Sir, I am opposed to legislating money into the pockets of any class of citizens. It is the duty of the Government to require the taxes to be paid as they fall due. The farmers of the country cannot get credit from year to year for their taxes, and you ought not to extend to others, or to any, what you cannot extend to all. Before I leave the subject, I will answer an argument made use of here, which was intended to show that the immense increase of bank capital within the last few years was owing to the destruction of the United States Bank. Sir, I agree that there may have been some increase of the banking capital of this country when the recharter of the United States Bank was refused; but, sir, I put it to the candor of gentlemen to say whether the greatest extension of our paper currency did not take place after the Legislature of Pennsylvania, of 1835, with the present Executive of that State, by some kind of political galvanism, again resuscitated the dying Bank of the United States. Sir, it was then that the States took the alarm at the position of Pennsylvania, in granting a charter of thirty-five millions to a bank; and it was then that State jealousy caused an immoderate increase of banking capital.

I hope the House will pass this bill, and we have this amount of money towards defraying the ordinary expenses of the country. Let us collect the money due upon the bonds given for duties. Gentlemen say if we collect it now we will lose it. If it can't be collected, I am willing to lose it. I want the people of the country to know what they have

to expect. I want the Government to collect what is due it, and then if it be not sufficient, the people are at all times ready every one to contribute his part to the support of his Government.

Mr. POTTER expressed his views in support of the bill at considerable length. He contended that the present measure was one calculated to promote the interests of the people, and to afford them time to restore their prostrate credit. His remarks will appear hereafter.

Mr. WISE opposed the bill, because it would be a fraud upon legislation, expressing one thing and meaning another; for, by the word "postpone" was intended to mean "repeal." Mr. W. addressed the House at length on the subject.

Mr. HAMER concluded his remarks, and Mr. DAWSON followed, but without concluding, gave way to

Mr. CRAIG, on whose motion

The House adjourned at half past seven o'clock, p. m.

#### IN SENATE,

THURSDAY, September 28, 1837.

Mr. SWIET presented a memorial from 117 women of the town of Vergennes, in Vermont, against the annexation of Texas to the United States; which was laid on the table.

Mr. PIERCE presented a petition from O. H. Bliss, widow of Capt. John Bliss, late of the United States army, praying for pecuniary aid from the Government. Also, a petition from Polly Robertson for a pension on account of the services of her husband, Peter Robertson, during the revolution; which were laid on the table.

Mr. CALHOUN offered a resolution proposing to amend the 47th rule of the Senate in order to admit Judges of the Supreme Courts of any of the States on the floor of the Senate, and asked its consideration.

Being taken up, it was so modified as to read "judges in law and equity."

The resolution was then adopted.

#### SPECIAL ORDER.

The Senate resumed the consideration of the bill imposing certain duties on public officers as depositories in certain cases—the question pending being on Mr. CALHOUN'S amendment.

Mr. WEBSTER spoke against the bill, occupying the floor for several hours.

Mr. HUBBARD followed, and addressed the Senate in favor of the bill as reported by the Committee on Finance.

Mr. BUCHANAN intimated his intention to address the Senate, but as the hour was late, he moved the Senate to adjourn.

At the suggestion of Mr. GRUNDY, Mr. B. withdrew his motion, to enable the Senator to make a motion.

Mr. GRUNDY then moved that the resolution fixing the hour of meeting at 10 o'clock, be rescinded, in order that the Senate should hereafter meet at 11, as that hour would better suit the convenience of Senators; which was agreed to.

The Senate then adjourned.

#### HOUSE OF REPRESENTATIVES,

THURSDAY, September 28, 1837.

Petitions and memorials were presented by Mr. CRARY, of Michigan.

[Mr. CRARY presented the petition of Daniel H. Deming, and 83 other citizens of Lenawee county, Michigan, against the annexation of Texas to the United States.]

Messrs. WEBSTER and HAMER, of Ohio.

Messrs. SERGEANT, NAYLOR, FRY, PLUMER, BIDDLE, LELAND and PAYNTER, of Pennsylvania.

Mr. STRATTON, of New Jersey.

Messrs. MARVIN and HOFFMAN, of New York.

Messrs. REED, GRENELL, BORDEN, and ADAMS, of Massachusetts.

Mr. ADAMS asked the leave of the House to submit a resolution calling on the Secretary of the Treasury to report to this House, at the commencement of the regular session of Congress, the number of slaves exported from, and imported into, the several ports of the United States, by the coasting

trade, for the last two years, and discriminating between the two years; but it was objected to by many members.

Mr. TOLAND asked the leave of the House to submit the following resolution:

*Resolved*, That the Secretary of the Treasury be directed to communicate to this House copies of all correspondence between the department and all individuals, banks, or other corporations, relative to a bill now before Congress to authorize the President of the United States to cause the issue of Treasury notes, and relative to the disposition of such notes; together with copies of all documents or papers on file in the department relative thereto.

Objection being made—

Mr. TOLAND moved a suspension of the rules for the purpose of offering said resolution; which motion was disagreed to.

Mr. SNYDER submitted the following resolution, which, by the rule, lies over one day:

*Resolved*, That the Secretary of the Treasury be instructed to inform this House what amount of specie the Bank of the State of Missouri had in its vaults on the 5th of July, and on the 16th of August, 1837.

Mr. SHERROD WILLIAMS of Kentucky, on leave, submitted the following resolutions, which were read, laid on the table, and ordered to be printed:

1. *Resolved*, That it is expedient immediately to establish a Bank of the United States, for the purpose of affording to the people of the United States a fixed, uniform, and certain currency; that it is important and highly expedient to have such an institution as a fiscal agent for the Government, in the collection and disbursement of the revenue of the nation.

2. *Resolved*, That in the creation of a Bank of the United States, the charter should be so constituted as to exclude foreigners from holding stock in the same; and to hold the stockholders responsible and liable, out of their private and individual property, according to the amount held by each, for the redemption of the notes issued, and debts and liabilities of said bank.

3. *Resolved*, further, in the opinion of this House, That a Bank of the United States is the only safe, certain and sure means by which a uniform, fixed and permanent paper currency can be obtained.

#### MISSISSIPPI ELECTION.

The House then proceeded to the consideration of the business of the morning hour, being the report of the Committee of Elections, which was accompanied by the following resolution:

*Resolved*, That Samuel J. Gholson and John F. H. Claiborne, are duly elected members of the 25th Congress, and as such are entitled to take their seats.

The question pending was the motion of Mr. Maury to strike out all after the word "resolved," and insert "that Samuel J. Gholson and John F. H. Claiborne, not being duly elected members of the House of Representatives of the Twenty-fifth Congress of the United States, are not entitled to seats on this floor as such."

Mr. HARLAN addressed the House at some length in opposition to the report of the Committee of Elections, contending that there was no such vacancy existing between the 4th of March last and the coming November, in the Mississippi representation in Congress, as was contemplated by the framers of the Constitution of the United States, in the clause declaring that "when vacancies happen in the representation from any State, the Executive authority thereof shall issue writs of election to fill such vacancies." He argued that the case was that of an original appointment and not a vacancy, and being such, could only be filled at the time and in the manner provided for by the laws of the State of Mississippi, and that it was a usurpation on the part of the Executive to attempt, in opposition to the laws of the State, to fill these vacancies by issuing his writ directing these elections to be held.

Mr. BRONSON replied to the arguments of the gentleman from Tennessee, (Mr. Maury,) and the gentleman from Kentucky, (Mr. Harlan,) at some length. He first inquired whether a vacancy had happened on the 4th of March last in the represen-

tation of the State of Mississippi? It was clear that the State of Mississippi had no representatives in Congress on the 4th of March last. That being the case, he apprehended there was a vacancy, and such a vacancy as was contemplated by the framers of the Constitution of the United States, which the Governor was authorized to fill by special election. He then went into an examination of the meaning of the word "happen." Horne Tooke had said that words of doubtful meaning were made the everlasting engines of fraud and oppression; but he hoped that the State of Mississippi was not to be made the victim of scholastic technicalities. If this word was of doubtful meaning, the most liberal construction should be placed upon it; and fraud and oppression should not be practised upon the State of Mississippi in consequence thereof. But he contended that the word was not one about which there was much doubt; because almost all lexicographers agreed on this point, that *whatever comes to pass, whether in the course of things or out of the natural order, happens*. Others placed this definition on the word "happen": "to intervene," "to fall out." The only question which appeared to be raised, was, whether a vacancy had "happened." Then had it intervened, had it fallen out, had it come to pass, that there was a vacancy in the representation of the State of Mississippi? He contended that it had, and held that "happening" might refer as well to a thing foreseen or foreknown, as to a thing not foreseen or not foreknown.

Mr. B. then referred to a case of vacancy which occurred in an office which was to be filled by the Executive under the following clause of the Constitution, as a parallel case: "The President shall have power to fill all vacancies that may happen during the recess of the Senate, by granting commissions which shall expire at the end of their next session." The vacancy had occurred during the session of the Senate, but, from some cause or other, was not filled up; and the Executive having some doubts as to whether he had the right to fill the vacancy, took the opinion of Attorney General Wirt on the matter, and he placed this construction upon the word "happen." His opinion was, "that the President had the right to fill any vacancy which might happen to exist in the recess of the Senate." There was another case in which the gentleman from Massachusetts, (Mr. Adams,) while President, had filled the office of Navy Agent under similar circumstances. In the case of Gwyn there was also an able opinion of the Attorney General of the United States on this subject; and the ground taken in that opinion was, "that if it falls out that any office is found to be vacant, then the President may fill it." Thus it appeared to be the common construction of this clause, that if there happened to be a vacancy during the recess, the President might fill it.

He contended further that the laws of Mississippi could not deprive the people of Mississippi of a part of the rights which were guaranteed to them by the Constitution, and went into an examination of a variety of cases to rebut the arguments adduced by the gentlemen who opposed the report, and in support of the position he had taken.

At this stage of the proceedings, without taking the question, the House, on motion of Mr. CAMBRELENG, passed to the orders of the day.

#### DEPOSITE ACT.

The House then proceeded to consider the "bill to postpone the fourth instalment of deposits with the States," reported last night, without amendment, from the Committee of the Whole.

Mr. DAWSON who was entitled to the floor, yielded it to Mr. CAMBRELENG, for the purpose of enabling that gentleman to make an explanation in reference to an interrogatory addressed to him by Mr. D. last night on the condition of the New York banks.

Mr. CAMBRELENG, having the permission of the gentleman from Georgia, said he would explain more fully his answer to one of that gentleman's questions, last evening, concerning the condition of the banks in the State of New York. He did not mean to be understood that any of them, strictly speaking, were insolvent, or that they could not ultimately pay all their notes.

Mr. C. had referred to the Dry Dock Bank, which was placed by the Chancellor in the hands of receivers, and to the heavy losses sustained by many of the banks in the late revulsion. By reference to the Treasury report, it would be seen that one of the city banks alone had \$1,200,000 of suspended debt; yet even that bank would, in a few years, restore its capital to its original amount, by its collections and profits. He had merely intended to express that the actual capitals of many of the banks had been diminished during the revulsion. He begged to be understood as entertaining no hostile feelings towards the gentlemen interested in those institutions, nor to look as the mere agents of trade, but to that legislation which is perpetually and improperly interfering with this, as well as other branches of trade. His hostility was exclusively directed to this mischievous and corrupting interference with the business of men, which was not among the legitimate duties of Government.

Mr. DAWSON then concluded his remarks in opposition to the bill, and went on to point out what he conceived to be its partial effects.

Mr. TOWNS replied to his colleague on the particular points referred to by that gentleman.

Mr. GRAVES spoke at length against the bill till about 3 o'clock, when he gave way to

Mr. PHILLIPS, who moved that the House take a recess for one hour.

Objection being made,

Mr. PHILLIPS moved a suspension of the rule.

Mr. PETRIKEN moved a call of the House.

Lost.

The motion to suspend the rule was not ageed to—ayes 63, noes 24; no quorum.

After some suggestions from Messrs. JOHNSON of Maryland, GLASCOCK, and GRAVES,

Mr. PHILLIPS moved a suspension of the rule for the purpose of moving that the House take a daily recess from 3 to 4 p. m.; which was not agreed to—ayes 74, noes 15; no quorum.

Mr. PATTON moved an adjournment.

Mr. HAYNES called for the yeas and nays; whereupon,

Mr. PATTON withdrew the motion, and Mr. CHAMBERS of Kentucky renewed it.

Mr. HAYNES again called for the yeas and nays; which being ordered,

Mr. CHAMBERS again withdrew the motion.

After a few words from Messrs. CHAMBERS and GHOLSON,

Mr. HARRISON of Missouri moved a call of the House: lost.

The CHAIR then counted the House, and ascertained that 111 members were present—no quorum.

Mr. POPE moved an adjournment.

Mr. GHOLSON called for the yeas and nays, which being ordered, the former gentleman withdrew his motion.

The CHAIR again counted the House, when there appeared to be 119 members present, wanting two of a quorum, which appeared a moment afterwards.

Mr. PHILLIPS renewed his motion for a daily recess of one hour, from 3 to 4 o'clock.

The rule was suspended, 89 to 37.

Mr. PATTON moved to amend the motion, by confining its operation to this day: lost.

Mr. BELL moved from half past three to five o'clock: lost.

Mr. REED moved to change it from two to three o'clock: lost.

Mr. MARTIN moved to change it from half past two to four o'clock, which was agreed to—ayes 81, noes not counted.

Mr. GRAHAM said that as a third of the members had gone home and returned from their dinners, he moved to strike out so much as referred to this day: lost.

The resolution, as amended, was then agreed to, and the House accordingly took a recess for one hour.

#### EVENING SESSION.

Upon the assembling of the House at half past four o'clock, there being but very few members present,

Mr. McKAY moved a call of the House; and, upon taking the question, there appeared ayes 38, noes 38; the Chair voting in the affirmative, the call was accordingly ordered, and a quorum having appeared, its further proceedings were dispensed with.

#### DEPOSITE LAW.

The House resumed the consideration of the "bill to postpone the fourth instalment of deposits with the States."

Mr. GRAVES concluded his remarks in opposition to the bill, and to the policy of the administration generally, on the subject of finances. He denied that the bills proposed would afford any relief to the country, but on the contrary, that, under the guise of relief, they would have no other effect than to augment the pressure. On this position he dwelt at length, and entered into a variety of statements, drawn from the condition of the banks and the course of trade, especially in the west, to substantiate it.

Mr. CUSHMAN rose and remarked that this question had long been very considerably and very fully discussed, and, he believed, to the satisfaction of every gentleman of the House. He believed that any further discussion of it would be entirely useless, and the House was worn down with the debate. Still, he confessed, he should be very happy if the House would then pass upon the several amendments submitted in Committee of the Whole, if it could be done without further delay. He rose for the purpose of asking whether it was not the sense of the House that the discussion had been carried as far as it ought to be? whether the subject had not been fully and fairly debated—sufficiently debated? In the full belief that it had, it was his intention to call for the previous question; but although he had risen for that purpose, he would make this proposition—

Mr. ROBERTSON. I call the gentleman to order. The previous question cannot be debated.

Mr. CUSHMAN. I am going to make this proposition. If it meets the general approbation of the House to close the debate, I should be willing to have the vote taken upon every amendment, and give the movers of them an opportunity of calling for the yeas and nays on each. For the purpose, however, of testing the sense of the House to bring this discussion to a close, I move the previous question.

Mr. HAYNES moved a call of the House.

Mr. RIVES expressed his willingness to assent to the proposition of the gentleman from New Hampshire, and he presumed it would be generally assented to by the House.

It was true they had had a very protracted debate upon this subject, and he had been anxious to reach this vote. There had been various amendments presented to the bill under consideration. It was a subject of vast importance, and there were some gentlemen who would prefer the bill with some of the amendments, to having it without. There were others who preferred it in its original shape. But in order that each gentleman's views should be distinctly understood, especially of those who preferred amendments, he would wish the proposition of the gentleman who moved the previous question to be assented to, provided the House would permit the question to be taken on each amendment without further discussion. [*Agreed, agreed, from many voices.*] Mr. R. added that, before he took his seat, he hoped no one would take the floor for the purpose of entering into an argument.

Mr. MASON of Virginia said he could not offer his amendment on those terms.

Mr. UNDERWOOD said he should be very glad to move his amendment upon the terms suggested.

Mr. OWENS then asked for the yeas and nays on the motion for a call of the House, which were ordered, and were—ayes 112, nays 100.

So the call was ordered.

After proceeding till it was ascertained that the members were present, on motion of

Mr. HAYNES, all further proceedings in the call were dispensed with.

Mr. SMITH arose, and commenced by saying: Mr. Speaker, I believe there can be now effected a

general assent on the part of the House. [Mr. S. was here interrupted by loud cries of "order!"]

The demand for the previous question was then seconded by the House, tellers having been appointed—ayes 107, noes 78.

Mr. REED called for the yeas and nays on the question, Shall the main question be now put? which were ordered, and were—yeas 124, nays 102, as follows:

**YEAS**—Messrs. Anderson, Andrews, Atherton, Ayckrigg, Beatty, Beine, Bicknell, Birdsall, Boon, Borden, Bouldin, Brothead, Bruyn, Buchanan, Bynum, John Calhoun, Cambreleng, Timothy J. Carter, Casey, Chaney, Cilley, Cleveland, Coles, Connor, Craig, Crockett, Curtis, Cushman, Deberry, DeGraff, Dennis, Dromgoole, Edwards, Farrington, Fairfield, Isaac Fletcher, Fry, Gallup, Haley, Halstead, Hammond, Hamer, Harrison, Hawkins, Haynes, Henry, Holsley, Holt, Hopkins, Howard, Hubley, William H. Hunter, Ingham, Thos. B. Jackson, Jabez Jackson, Joseph Johnson, William Cost Johnson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, Klingsmith, Leadbetter, Logan, Arphaxed Loomis, Mallory, May, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Milligan, Miller, Montgomery, Moore, Morgan, Samuel W. Morris, Muhlenberg, Murray, Noble, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petriken, Phelps, Plumer, Potter, Pratt, Prentiss, Randolph, Reilly, Richardson, Shaffer, Charles Shepard, Shields, Shipley, Smith, Snyder, Spencer, Stewart, Stratton, Taylor, Thomas, Toucey, Towns, Turney, Underwood, Vail, Vanderveer, Wagener, Webster, Weeks, Thomas T. Whitlesey, Sherrod Williams, Jared W. Williams, Christopher H. Williams, Worthington, Yell, and Yorke—124.

**NAYS**—Messrs. Adams, Alexander, Herman Allen, John W. Allen, Bill Biddle, Bond, Briggs, Bronson, William B. Calhoun, William B. Campbell, John Campbell, William B. Carter, Chambers, Cheatham, Claiborne, Clark, Clowney, Corwin, Crary, Cranston, Crockett, Curtis, Dawson, Daves, Davis, Dunn, Elmore, Evans, Everett, Ewing, Richard Fletcher, Foster, Rice Garland, Gholson, Glascock, Goode, James Graham, William Graham, Grantland, Grant, Gray, Grennell, Griffin, Hall, Harlan, Harper, Hastings, Hawes, Herold, Hoffman, Robt. M. T. Hunter, Jenifer, Henry Johnson, Legare, Lewis, Lincoln, Andrew Loomis, Lyon, Marvin, James M. Mason, Martin, Maury, Maxwell, Mercer, Mathias Morris, Calvary Morris, Naylor, Ogle, Patterson, Patton, Pearce, Peck, Phillips, Pickens, Potts, Rariden, Reed, Rencher, Rhett, Ridgway, Robertson, Rumsey, Russell, Sergeant, Augustine H. Shepherd, Sibley, Slatte, Southgate, Stanley, Taliaferro, Thompson, Tillinghast, Tins, Toland, Albert S. White, John White, Eliza Whitlesey, Lewis Williams, and Joseph Williams—102.

So the House determined that the main question be now put.

The main question, being on ordering the bill to a third reading, then recurring—

Mr. BRIGGS asked for the yeas and nays thereon, which were ordered, and were—yeas 119, nays 117, as follows:

**YEAS**—Messrs. Anderson, Andrews, Atherton, Beatty, Beine, Bicknell, Birdsall, Boon, Bouldin, Brothead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, T. J. Carter, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Cushman, Daves, De Graff, Dromgoole, Duncan, Edwards, Farrington, Fairfield, I. Fletcher, Foster, Fry, Gallup, Gholson, Glascock, Grantland, Grant, Haley, Hammond, Hamer, Harrison, Hawkins, Haynes, Holsley, Holt, Howard, Hubley, William H. Hunter, R. M. T. Hunter, Ingham, T. B. Jackson, J. Jackson, J. Johnson, N. Jones, John W. Jones, Kemble, Kilgore, Klingsmith, Legare, Leadbetter, Lewis, Logan, Arphaxed Loomis, Lyon, James M. Mason, Martin, McKay, Robt. McClellan, A. McClellan, McClure, McKim, Miller, Moore, Morgan, Samuel W. Morris, Muhlenberg, Murray, Noble, Owens, Palmer, Parker, Parmenter, Patton, Paynter, Pennybacker, Petriken, Phelps, Pickens, Plumer, Potter, Pratt, Prentiss, Reilly, Richardson, Rives, Sawyer, Shaffer, Shipley, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Webster, Weeks, Thomas T. Whitlesey, Jared W. Williams, Worthington and Yell—119.

**NAYS**—Messrs. Adams, Alexander, Herman Allen, John W. Allen, Ayckrigg, Bill Biddle, Bond, Borden, Briggs, William B. Calhoun, John Calhoun, W. B. Campbell, John Campbell, W. B. Carter, Casey, Chambers, Cheatham, Childs, Clowney, Corwin, Crary, Cranston, Crockett, Curtis, Cushing, Darlingston, Dawson, Daves, Deberry, Dennis, Dunn, Elmore, Evans, Everett, Ewing, Richard Fletcher, Fildore, Rice Garland, Goode, James Graham, W. Graham, Graves, Gray, Grennell, Griffin, Hall, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Herold, Hoffman, Hopkins, Jenifer, H. Johnson, W. C. Johnson, Lincoln, Andrew W. Loomis, Mallory, Marvin, Samuel Mison, Maury, May, Maxwell, McKennan, Menefee, Mercer, Milligan, Montgomery, Mathias Morris, Calvary Morris, Naylor, Noyes, Ogle, Patterson, Pearce, Peck, Phillips, Pope, Potts, Rariden, Randolph, Reed, Rencher, Rhett, Ridgway, Robertson, Rumsey, Russell, Sergeant, Augustine H. Shepherd, Charles Shepard, Shields, Sibley, Slatte, Smith, Snyder, Southgate, Stanley, Stratton, Taliaferro, T. Thompson, Tillinghast, Toland, Underwood, Albert S. White, John White, Eliza Whitlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, and Yorke—117.

So the bill was ordered to a third reading.

Mr. PICKENS, having voted in the majority, moved to reconsider the above vote, which motion lies over for to-morrow. Mr. P. then gave notice that he should then submit his amendment.

On motion of the same gentleman,

The House adjourned at 7½ p. m.

## IN SENATE,

FRIDAY, September 29, 1837.

Mr. McKEAN presented a memorial from citizens of Towanda, Pa.—one from citizens of Wy-

sox, Pa.—one from citizens of Montgomery county—and one from citizens of Philadelphia county, remonstrating against the annexation of Texas to the United States; which were laid on the table.

Mr. McKEAN also presented two petitions from citizens of Montrose, Pa. praying for the immediate abolition of slavery in the District of Columbia.

Mr. CALHOUN having objected to the receiving of these petitions, they were, on his motion, laid on the table.

Mr. LINN presented a petition from Henry Perrine, late United States Consul at Campeachy, in relation to the introduction of tropical plants; which was ordered to lie on the table and be printed.

Mr. WEBSTER offered the following resolution:

*Resolved*, That the Committee on the Judiciary report to the Senate what fees are due by law on the renewal of merchants' bonds, and whether any further legal provisions on that subject be required.

Mr. WEBSTER said that he had been given to understand, and had received several letters from respectable merchants in New York, complaining of the large fees demanded of them in the renewal of bonds. He knew not whether it was a statute regulation, or a regulation of the Secretary of the Treasury. He had learnt, from a source which was entitled to much credit, that in a renewal of a bond of \$6,000, the fees amounted to twelve per cent. on that sum. Of course he need not comment on such an exorbitant charge, until the facts were ascertained beyond a doubt by the Committee on the Judiciary.

Mr. W. asked that the resolution might be now considered.

Mr. KING of Alabama hoped that the resolution would now be considered. He had himself received information on the subject from New York. He thought that some action, on the part of Congress, should be had immediately on it.

Mr. GRUNDY apprehended that the Committee on Finance was the more appropriate committee to refer the matter to, as doubtless they had had it before them.

Mr. WEBSTER considered that as this was a matter of fee, it came more within the scope of the powers of the Judiciary Committee than those of the Committee on Finance. He expressed his fears that unless the immediate intervention of Congress should be called to this matter, and proper means adopted, the measure of relief which had been passed by Congress, would give an opportunity for exorbitant fleecing.

The resolution was then considered, and adopted.

## SPECIAL ORDER.

The Senate resumed the consideration of the bill imposing certain duties on public officers as depositors in certain cases—the question pending being on Mr. CALHOUN'S amendment.

Mr. BUCHANAN delivered his views at large in reference to the bill and the amendments under consideration. He professed himself in favor of the Sub-Treasury system, in preference to any other plan which had been brought forward, or heretofore tried, and he concluded his speech by declaring, that the frank and manly manner in which the President of the United States had expressed his sentiments in regard to the causes of the present distress of the country, had challenged the admiration even of his political opponents.

Mr. PRESTON then rose, and after addressing the Senate some time in opposition to the bill, gave way on a motion of Mr. BUCHANAN for an adjournment.

## HOUSE OF REPRESENTATIVES,

FRIDAY, September 29, 1837.

Petitions and memorials were presented by Messrs. BORDEN and ADAMS of Massachusetts.

Mr. TILLINGHAST of Rhode Island.

Messrs. POTTS, FRY, SERGEANT, and TOLAND, of Pennsylvania.

Messrs. SHIPLEY and LEADBETTER of Ohio.

Messrs. RARIDEN and HEROD of Indiana.

Mr. CRARY of Michigan.

[Mr. CRARY presented the petition of undry citi-

zens of Livingston county, Michigan, against the annexation of Texas to the Union.]

Mr. THOMAS, from the Committee on the Judiciary, reported the following bill, which was read twice and referred to a Committee of the Whole on the state of the Union:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That all acts and parts of acts, or provisions contained within any, which, by the terms thereof, are made to expire at the termination of the first session of the Twenty-fifth Congress, be, and the same are hereby, declared to continue in force to the end of that session of Congress which shall commence, or shall be in session, on the first Monday of December, 1837.

Mr. CAMBRELENG, from the Committee of Ways and Means, by unanimous consent, reported a bill making additional appropriations for the year 1837; which was read twice, and committed to a Committee of the Whole on the state of the Union.

Mr. TOLAND, on leave, submitted the following resolution, which, under the rule, lies over one day:

*Resolved*, That the Secretary of the Treasury be directed to communicate to this House copies of all correspondence between the department and all individuals, banks, or other corporations, relative to a bill now before Congress to authorize the President of the United States to cause the issue of Treasury notes, and relative to the disposition of such notes; together with copies of all documents or papers on file in the department relative thereto.

On motion of Mr. STANLEY, the following resolution, submitted by him on a former day, was taken up, considered, and adopted:

*Resolved*, That the Secretary of the Treasury be requested to furnish this House with a statement of the number of Sub-Treasuries which will be required, if the bill imposing additional duties as depositories, in certain cases, on public officers, should become a law; and further, how many new offices must be created, if any; how many new buildings to be erected; and what will be, as nearly as he can estimate, the annual expense of the system; what the salaries to be paid the officers, and what will be the commissions to which they will be entitled.

Mr. EWING moved a suspension of the rules for the purpose of submitting a resolution calling on the Secretary of the Treasury for information in relation to the quantity of public land sold, and amount of funds of various denominations received therefor, within the last two years: disagreed to.

## MISSISSIPPI ELECTION.

The House then proceeded to the consideration of the business of the morning hour, being the report of the Committee of Elections, which was accompanied by the following resolution:

*Resolved*, That Samuel J. Gholson and John F. H. Claiborne are duly elected members of the Twenty-fifth Congress, and as such are entitled to take their seats.

The question pending was the motion of Mr. MAURY to strike out all after the word "resolved," and insert, "that Samuel J. Gholson and John F. H. Claiborne, not being duly elected members of the House of Representatives of the Twenty-fifth Congress of the United States, are not entitled to seats on this floor as such."

Mr. TURNEY addressed the House at some length in support of the report of the Committee of Elections. He went into an examination of the two clauses of the Constitution, in relation to filling vacancies in the Senate and House of Representatives. In the clause in relation to the filling of vacancy of Senators, there was a limitation of restriction on the word happen. The clause reading "if vacancies happen by resignation or otherwise, during the recess of the Legislature of any State, then the Executive thereof may make temporary appointments." In the case of Mr. Sevier of Arkansas, which had been alluded to the other day, the decision of the Senate was, that the words "by resignation or otherwise," embraced not only the cases of death, resignation, or removal, but that it embraced every variety of case which was unforeseen, and thus the term otherwise might be made to comprehend a case which had expired,

in case the expiration of the term was unforeseen by the State of Arkansas, and his term of service being determined by lot was unforeseen by the Legislature of Arkansas. The clause of the Constitution, in relation to the House of Representatives, was without this limitation and restriction, and being so, he contended that it comprehended all cases of vacancy which might occur. This, he contended, was the plain evident meaning of the framers of the Constitution. If this was not the meaning of the framers of the Constitution, why was there a distinction between the two claims. The great principle of our Government is, that the people are capable of self-government, and he argued that whether the election was held under the forms prescribed by the law of the State, or under the writ of the Governor, it was equally valid. In his view of the case, he believed that the framers of the Constitution placed limitations and restrictions upon the clause in relation to filling the vacancy of Senators, because that they were to be appointed by the Governor of the State; but had left the clause in relation to representatives unrestricted, because they went back and received their appointments from the source of all power—the people; and the framers of the Constitution, very properly had placed no restrictions or limitations upon the people. He argued that the Constitution contemplated that the Legislature of the several States should make general provision for the holding of elections; but the laws of the States provided for the holding of special elections; and, from the very nature of things, this cannot be regulated by law, because it cannot be foreseen. This case, then, could not be foreseen by the Legislature; and therefore it was nothing more than justice to the people of Mississippi that they should be represented on this floor. The people of the State had chosen Messrs. Claiborne and Gholson as their representatives, and it was not for us to tell them that they were to have no representatives in the House of Representatives.

Mr. TOWNS dissented from the report of the committee, on the ground that the Legislature of the State alone had the right to prescribe the times, places, and manner, of holding elections; and failing to do so, it was the duty of Congress to provide for the case. He took it for granted that there must be some uniform rule by which members were to be elected, and known here as members of this House. He contended that where there was a law affecting that subject, that law must control the subject. There was a law, then, of the State of Mississippi, declaring that the election for members of Congress should take place on the first Monday in November, biennially; and the members here claiming seats were not elected under that law. He had examined this subject with his feelings favorable to the gentlemen from Mississippi, but his judgment told him they were not elected in pursuance of law, and, consequently, were not entitled to seats on the floor of the House.

Mr. ROBERTSON contended that the proclamation of the Governor was illegal, and consequently the election must be illegal; and argued, that if the Governor had the power to fill the vacancies by issuing his writs of election, that the Legislature could not exercise the power.

Mr. CAMBRELENG then called for the orders of the day, but withdrew the call at the request of

Mr. GHOLSON, who moved that the report of the Committee of Elections be postponed to Monday next, and be made the special order for that day after 12 o'clock. He made this motion with the hope that by that day every gentleman would have his mind made up one way or the other, and that the question might then be decided.

Mr. CLAIBORNE said it was desired by himself and colleague to have an early decision of this question. He did not merely ask it for themselves, but they considered it as due to the people of Mississippi, that this question should be acted upon. He hoped, inasmuch as this was not an ordinary contested election, but depended entirely upon a question of constitutional law, that all parties in the House would consent to have the subject made the special order of the day for Monday, and then decide upon it finally.

The motion to postpone to Monday, and make

the report the special order for that day, was agreed to.

The SPEAKER laid before the House a report from the Secretary of the Treasury, of the probable number of bonds issued, renewed, or extended, under the operation of the bill recently passed the Senate of the United States; and also upon the subject of fees of district attorneys thereupon; which,

On motion of Mr. CAMBRELENG, was laid on the table, and ordered to be printed.

#### DEPOSITE LAW.

The House then took up the "bill to postpone the fourth instalment of deposit with the States." The question pending was the motion of Mr. PICKENS to reconsider the vote by which it had been ordered to a third reading last night.

Mr. PICKENS said it was not his desire to occupy the attention of the House for any length of time, for he was perfectly certain that its patience must be exhausted by the discussion that had already taken place. He wished first to inquire of the Chair whether he was authorized to discuss the merits of his amendment and the bill?

The CHAIR replied that upon a motion to reconsider the whole merits of the subject were open. No amendment being pending, of course its discussion would not be strictly within the rules, but the whole merits of the bill were open.

Mr. HOWARD inquired whether, on a motion to reconsider a bill, ordered to a third reading under the operation of the previous question, the bill was not still under that operation.

The CHAIR. Certainly not. The previous question has expended itself by the vote of the House under it, and the bill is placed precisely in the situation it was before the previous question was moved.

Mr. PICKENS resumed. He repeated that he did not desire to occupy the attention of the House, except to present in a brief manner, the main points that had presented themselves to his mind for consideration. I desire, said he, to reconsider the vote, because every gentleman must be aware that, under the peculiar and technical operations of the previous question, a majority of this House had not been brought to vote upon the amendment proposed. Sir, I consider the amendment which I had the honor to propose as important, both in principle and in policy. I desire the House to be brought to a distinct vote upon that amendment, and it is with that view I moved to reconsider the vote ordering this bill to a third reading; and, in presenting that, I beg gentlemen to reflect upon the course which they are disposed to pursue.

Mr. Speaker, suppose you reject this bill, what will be the effect? You leave the deposit act of 1836 in full operation. You make it imperative upon the Secretary of the Treasury to distribute the fourth instalment under the terms of that act. There is no discretion left to your Secretary. Now gentlemen have assumed the position, I believe with considerable truth, that the present administration, and particularly the Secretary of the Treasury, were at first opposed, in principle, to this deposit act. And they also assume, and I believe with much truth, that, in the execution of that act, so far as the payment of the three instalments has been made, they have executed it so as to produce embarrassment.

Sir, either from ignorance or intention, I will not now attempt to explain, but in the execution of the payment of those three instalments, which would have been, if executed upon proper commercial principles, a relief to the commercial community, we all know that, instead of producing relief, it has produced, to a certain extent, very great embarrassment. Now, sir, I put it to gentlemen whether they are disposed to leave the fourth instalment in the hands of the Secretary of the Treasury for execution, without discretion, and without limitation? These being his feelings, these his sentiments, how will he execute the payment of that fourth instalment? Sir, I have not seen his plan: I have not discussed this matter with a single officer of the Government, nor any friend of the administration. I have had no consultation with, nor have I ever seen, on the subject, a single officer of the Government, nor have I ever lauded one,

from the President down; but I venture to predict, that if this fourth instalment be left to the execution of this officer—I say I venture to predict, that its execution will produce far more embarrassment than its suspension can.

Mr. Speaker, the provisions of that act—the deposit act of 1836, I mean—are peculiar. They give, in certain contingencies, power to the Secretary of the Treasury to call back the three instalments already distributed, under certain limitations. Sir, it is a power which you yourself, by the very act which you desire to enforce by refusing to pass this bill, place in the hands of the Secretary of the Treasury. What will be the result then of defeating this bill? Why that you leave it a claim upon the Treasury, and that by solemn discussion, and solemn vote rejecting this bill, you make it the imperative duty of the Secretary to execute the deposit act to its very letter.

Now, sir, look at the proposition. They say the Treasury is embarrassed, that it is reduced, and that it will want funds, then how will the deposit act be executed? Why the Secretary must, of necessity, call upon the States for the three instalments already made. But suppose, as gentlemen say, that the Treasury is full, and that there are ample funds in its hands. If this be true what a spectacle will be presented to the American people! That your Secretary of the Treasury, your authorized officer, has presented a set of statements to this House and to the country which are utterly false! Can any administration stand under the scorn and indignation this would produce amongst an outraged people, when Congress meets in December and find his statements a thorough delusion! But I doubt it, sir. It is my sincere impression that the Treasury is embarrassed, and that if you reject the bill on your table, you place not only the States, and the treasuries of the States, but the State banks also, which gentlemen wish to protect, at the mercy and under the control of the Secretary. Now, sir, I put this to gentlemen: are they prepared to see this deposit act executed to its letter, and especially under the existing pressure? Are they prepared to pay back the three instalments? Under this specific provision of that act, I know the course the Treasury will pursue—or, at least, what I believe it will pursue. It is this. That it will, if the fourth instalment be paid over at all, throw the expenses of this Government upon the States, by drawing upon them for the three other instalments; and the inevitable result will be, that you compel the Treasury to rely upon the States to support and sustain the General Government. This will produce more pressure than will be produced by the suspension of the act of 1836, than could possibly be by withholding the fourth instalment. Let gentlemen from the West look at this. The deposit banks of Alabama, Mississippi, Louisiana, Kentucky, Indiana, and Ohio, have, at this time, nearly seven millions of dollars on deposit out of the nine and a half required to pay the fourth instalment. What will be the result? You will compel the Secretary of the Treasury to call upon those banks to pay up so as to enable him to execute that payment. Look at Ohio, having more now than she is entitled to under the fourth payment. Do you suppose the paper of the Ohio banks, though perfectly good and current in that State between man and man, will be received at par in Pennsylvania, which is to draw a million? Or do you suppose the funds of Alabama banks will be taken by Georgia for her instalment, when perhaps they are from ten to fifteen per cent. below par there, and then pledge its faith to refund—in what? in specie, or in available funds equivalent to specie, to this Government? Would this be a sound financial operation on the part of Georgia, or would her Government assent to it?

Again, sir, suppose this bill be not passed, what will be another result? That you call upon the Secretary of the Treasury to enforce the law, or distribute the fourth instalment, and where are the means you put in his control? Do you not see that, under such an operation, you inevitably compel him to execute the law to the letter, and that, to do so, he must draw contributions from the

States to distribute back to them. Is this sound policy?

Now, sir, look at the Treasury note bill. Will it relieve the Treasury from embarrassment? If that bill should pass the House in its present form, as passed by the Senate, paying interest on its notes, what will be the result? Why, the moment you throw them out, they will be taken up by capitalists, as the very best investment, as stock, under existing circumstances. There are, at this time, millions of capital lying idle in the vaults of banks, watching the operations of this Government, and ready to take stock in a Bank of the United States, if such an institution should be created. Yes, sir: these very capitalists, the moment you throw out your ten millions of treasury notes, bearing interest, will seize upon them, and instead of serving for a circulation, they will be invested as stock. It will only then afford temporary relief, and the final effect will be, to all intents and purposes, to create a debt. How are these notes, with interest, to be redeemed? By taxation, sir. And are we prepared to incur that debt? Now, if you throw into circulation ten millions of certificates, receivable only for public dues, not bearing interest—(but I much question whether you will ever get a majority in this House to pass such a bill as that, for the simple fact that, the moment the Government throws into circulation such bills as that, the notes of the Bank of the United States of Pennsylvania, will be excluded to that extent from circulation in the southwest, when they have been at five and ten per cent.)—I say if you throw into circulation such certificates, their circulation would spread through the country, and might relieve the present embarrassment, and could be redeemed in future dues. But there is an interest struggling against this—the banking interest of the country.

Now, sir, some gentlemen suppose the notes I have referred to will fall below par. How can that be? If they be receivable for the revenues of the Government, and no more be issued than enough to meet the payment of those revenues, they will be above par, or, at least, equal to gold and silver. Nothing can depreciate them but an issue beyond the amount of the revenue of the country, and it is even questionable if that would. But, sir, can we pass such a bill as that, viz: without interest, and throw no more into circulation than the amount necessary for the public dues? It is very doubtful whether this House would.

But throw out \$10,000,000 of notes, bearing interest, and at the end of the year the Government will be called on to redeem them, or they will run on at interest, thus creating a debt in its most odious and objectionable form. Capitalists in stocks are deeply interested in such an issue. Whatever this Government makes receivable in dues is, to all intents and purposes, money, and such a circulation, limited to the amount of expenditures, would be equivalent to gold and silver, and relieve the commercial community in collection of customs. It would in fact be a currency resting upon the credit of Government. And this is all the Government could do, even though a bank endorse the notes or loan its credit.

Now, sir, I repeat, we are not prepared for the state of things that will ensue upon the rejection of this bill. You will press upon the Secretary of the Treasury, and compel him to execute that fourth instalment, and the result will inevitably be that you compel this Government to create a debt, which debt you are bound to pay in the revenues of the country, and how these revenues are collected we all too well know!

Who receives the distribution? Do you distribute it according to the payment of taxes? Many suppose that we consume according to population, and pay taxes according to consumption. If this be true, we do not receive our proper distribution, for two-fifths of a certain class of our population, under our representation, will be excluded. Are gentlemen prepared to carry out this system permanently, or create a debt by distributing this instalment.

Take another proposition, not far from the truth, that consumption is in proportion to capacity to consume, and what will that proposition

lead to? Why, that the exports of the country purchase its imports, and, directly or indirectly, those who produce exports consume imports. For the imports through New York, if even consumed in non-exporting sections, they are enabled to do so from their internal trade with the exporting region. Under this system you indirectly collect two-thirds of your import duties from the exporting interest of this Confederacy. And if you distribute, you distribute to those who raise one-fourth of the exportations two-thirds of the fund. Yet, sir, this is the inevitable result if gentlemen should reject this bill, and compel the Secretary of the Treasury to execute the fourth instalment. It is under this apprehension that I have made the motion to reconsider this bill, and I can assure gentlemen that it was from no hasty or excited feeling of the moment. I voted, to be sure, with those I have been unaccustomed to vote with on this floor; and I here take occasion to say that I voted from mature deliberation, and with reference, also, to the peculiar interests I, in part, represent. Sir, let it not be supposed that, from any party tie or from any party feelings, I am disposed to sustain the bill on your table. No, sir. When gentlemen ask me in relation to my present position, I can only say to them that I am precisely where I have been educated to be, upon those great principles, which I deem to be identified with the Constitution and liberties of my country. There is a conflict of interests upon this floor. There is a conflict of interests in all communities; and when gentlemen talk about this class depending upon another class, and all being beautifully blended in one whole, I can admire the theory. It appears interesting on paper. It is interesting to contemplate the parts of a great empire—all depending upon one great combination of the whole. I can understand it, sir, but I know there is a conflict of interests in all societies. Why is it that we see the world deluged with blood? Is it not from a supposed division of interests in society? Why is it that revolution after revolution has swept over the fairest portion of this habitable globe? Is it not because one class or one interest in society are found struggling with or endeavoring to trample down another class or interest? This is nature—this is man, as found organized in all society.

Sir, let not gentlemen suppose I am actuated by party ties or party feelings. No. I ask no favors, and I scorn and defy power, whether it come from the Executive, or from the banking interests of this country. Sir, I know the conflict that is about to arise on this floor. I see and hear the rushing of the elements, and I stand prepared to meet it in advance. I confess I am prepared to meet it, and let not gentlemen suppose they are to call up interests in this country powerful enough to dictate laws and government to us. No, sir. If they do produce this conflict, I say I am prepared to meet it. It has been said, that in meeting this contest, we are prepared to break down the banking institutions of the States. Sir, I repel this insinuation with scorn and contempt, as a vile slander for party effect. I, sir, will sustain, to the last, the institutions of my own State, and the banking interests she has organized. But, sir, when I am called upon to identify them with this Federal Government, I will not do it. I will not bring them under its subjection, and place the credit and banking system again at the mercy of a lawless and despotic Government here, to yield the destinies of this country. We have seen and felt too much of it. We have seen this union of the banks with Government for the last three or four years, producing the most disastrous effects upon the policy of the country. Sir, it was this very union that brought the present Executive into office. It was this union which has done more, in my opinion, than any thing else to break down the freedom of elections. I stand where I did as to the manner of the election: I am actuated by no other desire but to promote equal liberty to all classes; and when men in power choose to assert right principles of liberty and of the Constitution, by separating the banking institutions of the country from the Government of the country, I am prepared, thus far, to go with them. Sir, no issue shall ever separate me, in a conflict of this kind, from the

great interest I have always supported. But I entreat gentlemen to pause in this most career, because the conflict will be fatal even to the banking institutions of the States themselves if they urge it on. I desire they shall be sustained by the States upon bona fide capital—sustained free from the influence of this Government; and it is because I desire they should be sustained that I am in favor of their separation. Sir, in conclusion, permit me to say, that I stand where the republican party stood in 1798, in 1826, '27 and '28, and where the State Rights party stood in 1832 and '33; and upon those principles I am prepared to stand, and the power of a combined press, or the whole interest of banks, shall never drive me from it.

Mr. Speaker, the view I had in introducing the amendment was, that if there be any surplus remaining in 1839, then let it be deposited; and I thought at the time, and still think, it would meet the assent of a majority of the House. The tendency of this would be to produce economy in the appropriations for next year, under the hope of receiving the deposit then. Upon all the other questions presented by gentlemen in this debate, discursive as they were in their character, "*de omnibus rebus et quibusdam aliis*," I desire to reserve myself for the great bill—for I call that the great measure of the session—the divorce bill, I mean. That bill I hold myself prepared to defend, and I fear no consequences.

Mr. ADAMS opposed the bill on two grounds. Ist, that it was, in effect, a repeal of the fourth instalment, and 2d, that it involved a proposition to raise revenue, and should have originated in the House, and not in the Senate. He said he would vote for the bill, if the amendment of the gentleman from South Carolina, together with his own, were engrafted upon it.

Mr. GRAY remarked that he had opposed the passage of this bill in its present objectionable shape, from its introduction to the present time, in the hope, that before its final passage, an opportunity would be afforded to try the sense of the House upon the amendment which had been proposed by the gentleman (Mr. Pickens) from South Carolina, which would postpone the deposit until the first of January, 1839, instead of an indefinite postponement, as proposed by the bill. He said it was highly important that the laws of Congress, in reference to the interests of the States, should be carried into effect strictly, according to their evident meaning, and especially where, as in the present case, the States, relying upon their immutability, have anticipated their beneficial results. He did not consider the act of June, 1836, as a deposit act only; exclude its title, and judge of it from its provisions, which alone must govern its character, and he apprehended that no one would view it in the light of a deposit act, or as a distribution act, as some had contended. The bill provides that when the money shall be wanted, that it shall be called for in "rateable proportions from the different States, in sums not exceeding \$10,000 in any one month, without previous notice of thirty days for every additional sum of \$20,000." Under this provision, it had been claimed that the whole amount could be drawn within a short period of time. Such a construction (he said) was irreconcilable with the act: \$30,000 was the largest amount that could be drawn in any one month from the State having the largest amount of the deposits, and from the other States in proportion; and, in confirmation of this opinion was the opinion of the Secretary of the Treasury, who, in his report, laid before the House, says: "that, under the limitation of the act of June, 1836, the whole amount that could be legally recalled during the ensuing quarter, would not exceed \$650,000;" thus showing that to be the basis of his calculation; and showing, too, that the amount that could be recalled would encroach but little, if any, upon the principal sum. It is then a matter of importance to the States, as they could always enjoy the use of the money by paying the interest, and is therefore a loan, rather than a deposit law. It is an interest which the States would be unwilling to surrender, unless some paramount emergency should demand it. It has been shown clearly that the wants of Government required the fourth instalment to be withheld

for the present; and he regretted that the bill had not provided for a definite instead of an indefinite postponement; that the bill, without the amendment, presented but a choice between two great evils—the one an indefinite postponement and virtual repeal of the fourth instalment of the deposit law; the other its defeat, which requires of the Government the performance, on their part, of a gratuitous proposition, with which they cannot, with the present limited and unavailable means in their Treasury, comply. The opponents of this bill, with the proposed amendment, ask you to let your Government take care of itself. From those who contend that this is not a Government of the people, and have condescended to the remark that the Government desired to separate itself from the people, such a position was to be expected. Suppose this to be the Government of one man, and he acting in reference to his interests, would he take the means indispensably necessary to its operations? This, thank heaven! is not the Government of one man; it is the Government of the whole people, having a common and united interest in sustaining their Government, act as one man. Let the appeal, then which has been made to the interests of the States go on; let it extend to the people of the States, and they will respond, in a voice not to be mistaken, and caution those who are so disposed not to take this first step in the retrograde to anarchy.

Mr. G. further remarked, that for the purpose of passing the bill with the proposed amendment, he had, since the House had resolved itself into Committee of the Whole, and after the bill had been several days discussed, and the mind of each member, as he presumed, fully made up, voted uniformly against rising without report; and, that the sense of the House might be taken upon the amendment, he had voted against the previous question, which cut off all amendments not previously adopted; and, notwithstanding the previous question has prevailed, an opportunity is now afforded to reconsider, and he hoped the motion would prevail, and the sense of the House be tried upon the amendment. If this motion should not prevail, and the bill pass its final vote, the opponents of the bill must take the responsibility of its objectionable feature. They profess to be less opposed to it with than without the amendment. A large portion of the friends of the bill desire that the amendment be added, but the course taken by its opponents in the unlimited range of discussion, and its continuance persisted in, has compelled the necessity of moving the previous question, at the expense of the exclusion of the amendment by so large a majority; if, desired, however, the motion should not prevail, he should prefer the lesser evil, and vote for the bill. It has seemed somewhat singular, that a question like the present, in which there exists three principal conceded facts, viz: the passage of the deposit law of June, 1836, its acceptance by, and action on the part of the States, and the inability of Government, out of present available means to make the anticipated deposit, should have produced a discussion so unlimited in its range, upon subjects having not the remotest relation to the bill under consideration. The venerable gentleman from Massachusetts (Mr. Adams) very properly remarked that many things had been said in the course of the discussion, in regard to Government abuses, that were not believed. This, however, seems to have been the least possible consideration. No one, in or out of this House, supposes the speeches were made to have effect upon this floor, but to send among the people, under the mistaken impression that the people were less wise than themselves, and would believe the oft refuted matter sent forth to them. In this, however, little success could be anticipated; times past had showed that the assumed difference between the intelligence of the people and their representatives did not exist. This is a peculiar case in for the opponents of the administration. He was sure they would not feel ungrateful that the President had convoked them. It is a peculiar crisis; (although much to be regretted,) there is a pressure; it is their political aliment; they do not prosper during the people's prosperity; it is only when embarrassment and dismay pervades all classes that they thrive. No speeches are made calculat-

ed to encourage exertion in business; all are calculated to create distrust, and produce despondency. The times, notwithstanding, are growing easier, and business becoming more sound; and it might seem, therefore, uncourteous, when public calamity is so nearly ended, to move the previous question, leaving so many speeches in embryo.

Mr. EVERETT addressed the House in opposition to the bill.

Mr. LOOMIS then said as this subject had been debated both in Committee of the Whole and in the House, at very great length, he took it that gentlemen must be prepared to vote upon the question; but he withdrew the motion at the request of

Mr. TOUCEY, who desired to present his views to the House. Mr. T. then gave way to

Mr. LYON, who made an explanation in relation to the bank of Mobile; when

The hour of half past two having arrived, the House, in pursuance of the order of yesterday, took a recess until 4 o'clock.

#### [EVENING SESSION.]

The House resumed the consideration of the motion submitted by Mr. PICKENS, on yesterday to reconsider the vote on the bill to postpone the fourth instalment of deposit with the States.

Mr. TOUCEY said he had risen for the purpose of stating very briefly the reasons which induced him to support the present bill. He was one of the number by whose agency, in the last Congress, the act regulating the deposits of the public money had become a law. It was well known to every one, to the whole country, that the great object of that law, so far, at least, as regarded the deposit with the States, was to dispose of a large and inconvenient surplus, which had accumulated in the Treasury. It was admitted on all sides, that this accumulation was a great and alarming evil. It was deposited in banks through every State in the Union; was used as banking capital for the benefit of stockholders; and stimulated the spirit of overbanking, overtrading, and excessive speculation, which then raged throughout the country. Its tendency was strongly felt and distinctly visible here, to encourage extravagant appropriations and wasteful expenditure of the public money. This surplus was the evil to be remedied. It pressed with disastrous weight upon the great interests of the country. The object, acknowledged and avowed on all sides, was to remove it. That object had been fully and entirely accomplished. There was no longer any surplus in the Treasury. The reason of the law had ceased to exist.

Mr. T. said that the condition of the Treasury, about which so much had been heard, could not be concealed from any one. The most ordinary understanding could readily comprehend it. It was clearly disclosed in the Treasury report, and in the Message of the President. The amount in the Treasury beyond the sum to be deposited with the States, was, on the first of January last, about six millions and a half. The income during the present year would be twenty millions, and the expenditure thirty-two millions and a half. No one could fail to see, therefore, that the receipts for the year would fall short of the expenditures for the year twelve millions and a half, and, after applying the whole sum in the Treasury, on the first of January last, there would be a clear deficiency of six millions of dollars. One million of dollars is appropriated by law for the uses of the mint, and is indispensably necessary for its operations, pre-eminently so at this crisis, in the efforts of the Government to restore a currency of gold and silver. To say nothing of the charge upon the Treasury, arising from the extraordinary convention of Congress, the further sum of a million and a half is called for, and will doubtless be appropriated without opposition, for the immediate exigencies of the Florida war, increasing the deficiency from six to eight millions and a half. If the fourth instalment, therefore, directed to be deposited with the States, should be retained in the Treasury, amounting to nine millions and a third, and applied to the service of the current year, the Treasury would be exhausted; exhausted—for so it was with less than a mil-

lion of dollars on hand, and a charge upon it of more than fifteen millions of unexpended or unsatisfied appropriations. This was the condition of the Treasury, if all its funds, wherever deposited, in banks or elsewhere, were immediately available in gold and silver. At the end of the year, if the present bill became a law, and the fourth instalment should be withheld from the States, all the money in the Treasury, including that instalment, and the deposits in the suspended banks, whether available or not available, and making the legal allowance for the mint, would be absolutely exhausted within less than a million of dollars, and leave fifteen millions of out-standing appropriations, unsatisfied and unprovided for, to be thrown upon the resources of the following year.

It had been said that the five millions in the hands of disbursing officers, should be applied to diminish this deficiency. But that was a manifest error. That sum had already once been taken into the account, and constituted a part of the twenty-four millions already expended; was considered as expended when paid out of the Treasury, and was in the progress of disbursement. It was too manifest to require illustration, that after that sum had been paid out of the Treasury, and regarded as having extinguished charges upon it to that extent, it could be again applied to extinguish the charges which still remained.

But this was not the worst aspect of our financial condition. By the Treasurer's report of the 30th of August last, we had twelve millions deposited in suspended banks, of which nine millions were in the western and southwestern banks, whose bills were at a discount, varying from ten to fifteen per cent. It was notorious that these banks could not immediately respond to the demands of the Government, and a bill had already been sent here from the Senate giving them time. These funds were, therefore, deemed unavailable; not lost, but at present not available; and to supply the deficiency, the temporary deficiency, arising from this source, Treasury notes were to be resorted to. Those funds had already been drawn upon to the extent of about five millions, but these drafts had not been paid, and most of them would be chargeable upon our future revenues. It seemed very obvious, therefore, that a debt must be created, either in the form of drafts or Treasury notes, or a direct loan, to the extent of eighteen or twenty millions of dollars, if the present bill should not receive the sanction of Congress—in other words, if the fourth instalment, which was directed to be deposited with the States upon the mistaken estimate that the revenue of the current year would be at least equal to the expenditure, instead of falling short of it, near thirteen millions of dollars, should, notwithstanding this mistake, still be ordered to be made. The object of the law and the intention of Congress had been fully accomplished. The entire actual surplus had been deposited. The letter of the law directed the further sum of nine millions to be deposited, which subsequent events had shown, were no part of any actually existing surplus; and if the law be now executed literally, you go counter to the designs of those who framed it; you create a debt of nine millions, for the purpose of depositing nine millions with the States.

This Mr. T. said presented the issue, upon which he was willing to go before the country, and he denied that Congress could constitutionally and rightfully borrow money, or raise it by taxes in any form, for the purpose of depositing it with the States. They might go through with the forms of law, but it was a perversion and abuse of the powers of this Government to raise money for any such purpose.

Another alternative had indeed been suggested by an honorable member from Tennessee, (Mr. Bell,) that certain appropriations for the public works, for armories, for arsenals, for ships of war, for armament of fortifications, arming the militia, and other like purposes, might be diminished or suspended, that the fourth instalment might be deposited with the States. This presented another issue for the country: this would be even worse than had been predicted. It had been apprehended by many, very many, that a deposit of the Federal

treasure with the States would tend to defeat appropriations for the constitutional purposes of this Government; the very purposes for which it was called into existence. Worse than this had now already been witnessed. It had been recommended upon them, to recal or suspend appropriations which a former Congress had made for proper and necessary constitutional objects; that the sum of nine millions of the public moneys, put into the hands of the Federal Government for those very objects, might be withdrawn from them and deposited with the States. Such a course could not receive his sanction: it would be contrary to his convictions of duty; and he had formed a very erroneous estimate of the intelligence and patriotism of the American people, or it would not meet with their approbation.

Mr. CAMBRELENG thought the House would agree with him when he said there had been sufficient discussion on this subject. For his part, he was most anxious for a short session, as were many others. With that view, he now proposed to the House that the question be taken on the subject before it. He believed it was the general desire of all parties that the previous question should be demanded. He, therefore, called for it, but he had no objection to a call of the House, if it was required.

At the suggestion of several members, Mr. C. also made the latter motion; which prevailing, the Clerk proceeded to call the roll, and 215 members having answered to their names,

Mr. MUHLENBERG moved that all further proceedings in the call be dispensed with.

Mr. CAMBRELENG, with a view of affording the absent members time to resume their seats, moved that the yeas and nays be taken on that proposition; which being ordered, resulted as follows—yeas 128, nays 74.

So the motion prevailed.

The previous question was then seconded without a division.

Mr. CLARK called for the yeas and nays on the main question; which being ordered, resulted—yeas 149, nays 81, as follows:

YEAS—Messrs. Adams, Alexander, Heman Allen, John W. Allen, Beatty, Bell, Biddle, Bond, Borden, Briggs, Bronson, Bruyn, William B. Calhoun, John Calhoun, William B. Campbell, John Campbell, William B. Carter, Casey, Chambers, Chaney, Chatham, Childs, Claiborne, Clark, Cleveland, Clowney, Connor, Cray, Crausdon, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Duncan, Dunn, Edwards, Elmore, Evans, Everett, Ewing, Richard Fletcher, Filmore, Foster, Rice Garland, Gholson, Glascock, Goode, James Graham, William Graham, Grantland, Grant, Graves, Gray, Greenell, Griffin, Hall, Hammond, Hamer, Harlan, Harper, Hastings, Haynes, Jenifer, Herod, Hoffman, Holsey, Hopkins, Jabez, Jackson, Jenifer, Henry Johnson, Nathaniel Jones, Kilgore, Legare, Leadbetter, Lewis, Lincoln, Andrew W. Loomis, Lyons, Mallory, Marvin, Samson Mason, Maury, May, Maxwell, McClure, McKim, McKennan, Menefee, Mercer, Milligan, Montgomery, Matthias Morris, Calvary Morris, Murray, Naylor, Noyes, Ogle, Patterson, Peck, Pettikin, Phillips, Pickens, Pope, Potts, Prentiss, Rariden, Read, Reacher, Rhett, Richardson, Ridgeway, Robertson, Rumsey, Russell, Sawyer, Sergeant, Augustine II. Shepperd, Charles Shepard, Shickle, Shipley, Sibley, Slide, Smith, Snyder, Southgate, Stanley, Taliaferro, Thompson, Tillinghast, Titus, Toland, Towns, Underwood, Vail, Vanderveer, Albert S. White, John White, Elisha Whitlessey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, Worthington, and Yorke—149.

NAYS—Messrs. Anderson, Andrews, A'hearn, Ayckrigg, Belme, Bicknell, Birdsall, Boon, Brodhead, Buchanan, Cambreleng, Timothy J. Carter, Chapman, Cilley, Coles, Craig, Cashman, Daves, DeGraff, Dromgoole, Farrington, Fairfield, Isaac Fletcher, Fry, Gallup, Haley, Halstead, Harrison, Hawes, Hawkins, Holt, Howard, Huxley, William H. Hunter, Robert W. T. Hunter, Ingham, Thomas B. Jackson, Joseph Johnson, William Cost Johnson, John W. Jones, Kemble, Klingensmith, Logan, Aphraxad Loomis, James M. Mason, Martin, McKay, Robert McClellan, Abraham McClellan, Miller, Moore, Morgan, Samuel W. Morris, Muhlenberg, Noble, Owens, Palmer, Parker, Parmenter, Patton, Paynter, Pennybacker, Phelps, Plumer, Randolph, Reily, Rives, Sheffer, Spencer, Stewart, Stratton, Taylor, Thomas, Toucey, Torney, Wagener, Webster, Weeks, Thomas T. Whitlessey, and Jared W. Williams—81.

So the question to reconsider prevailed.

Mr. PICKENS then submitted his amendment to strike out of the bill, "until further provision by law," and insert, "until the first of January, 1839." In submitting this amendment, he would merely say that it was not his intention to debate it further, and he hoped and trusted that we might be enabled to take the vote without much further debate, because he was satisfied that the House must be exhausted and the subject thoroughly understood. He hoped gentlemen would not protract the discussion, and that the previous question

might not again be moved until a vote was taken upon this amendment.

Mr. HAYNES suggested to Mr. Pickens to accept as a modification of his amendment the following: "To be made according to the provisions of the deposit act of June 23, 1836, provided there should be a sufficient surplus in the Treasury." In which Mr. Pickens expressed his entire concurrence, but declined accepting on account of the objections of gentlemen around him.

Mr. HAYNES then offered it as an amendment, on the ground that the amendment proposed by Mr. Pickens created an unconditional obligation upon the Treasury, whether it was in the possession of funds or not; but he subsequently withdrew it at the solicitation of others.

Mr. ADAMS then submitted the following as an amendment to the amendment:

"And all the balances of public moneys due from all the deposit banks are hereby appropriated to the said payment, and no part of them shall be applied to any other payment whatever; and if the portion of the said balances due by the said deposit banks cannot be recovered in time to enable the Treasury to pay the whole of the said deposit with the States, hereby made payable on the first of January, 1839, then the instalment of debt from the late Bank of the United States for the stock in that institution held by the United States, payable in October, 1838, is hereby appropriated to make up any insufficiency of the sums recovered from the deposit banks, to complete the said payment of the fourth instalment of the deposit with the States."

Mr. PHILLIPS, from what had been manifested in the House, concluded that there was now no intention to act otherwise than merely to postpone the payment of the fourth instalment of the deposit. Then the only question before the House was that of time, or, in other words, the way of doing business. So far as the Government was concerned, it was, in effect, the same as to whether Treasury notes were issued, or the bill before them was carried. The point that Government was under the obligation of paying the fourth instalment, had been conceded. He was in favor of adopting measures of relief, but thought it could be better accomplished by Government availing itself of other resources than the one in contemplation.

Mr. PATTON gave his reasons for dissenting from the amendment proposed by the gentleman from Massachusetts. He could not vote for the bill with that proviso attached, the tendency of which would be to prevent our ever getting the money again from the States. He hoped they would not make a law, binding on their successors, to raise money by taxes to pay the deposit.

Mr. LOOMIS suggested to Mr. Adams an amendment, striking out the word "pay," and inserting "deposit." Mr. A. refused to receive it.

Mr. ROBERTSON was opposed to the amendment and the bill. He did not see how the Government could pass it without a manifest breach of faith. In this instance, the United States Government, by the deposit law of 1836, had pledged itself, and in his opinion it was bound, to perform what it had promised. He would like to know how it was that the money which had been laid apart for this purpose had been disposed of. On the 1st of January, 1837, the amount was actually in the Treasury; and he wished to know what law justified the Secretary to lay his hands on a single dollar of this special deposit. If the Secretary had used it for other purposes, he had offended against the law of the land. No man had a right to use what had been destined for a specific object. It had been said that the money was in the banks, and not available, and that the States would not like to accept it in the paper of those institutions. But that was the concern of the States. They were willing to receive it in any way it could be given; and he was sure that Kentucky, Massachusetts, and other States, could make those notes available. Let the Government pay them with what it had; they asked no more.

Mr. BOULDIN said he had taken no part in the debate, but had voted for the bill, and against its reconsideration. He had done so with some doubt as to the propriety of such a vote. The only doubt he had, arose from a question in his mind, whether

we had not better make sale of the stock, or rather the bonds, which he understood to be due for the sale of stock in the late Bank of the United States. Perhaps they would bring their nominal amount, or might bring something less. The money received into the Treasury, as well as all sums of money in times of great speculation, and especially when there is a great proportion of paper money in circulation, was in a degree fictitious. It seems, he said, that we are now returning to more reasonable valuations of every thing, and he did not know why the Government should not suffer some loss as well as its citizens, when they all seem to have acted under the same delusion. Perhaps the people would be less distressed by a loss on these bonds than in any way that they could make a sacrifice. Mr. B. did not believe, however, that there would be any loss upon them if sold.

But the Secretary of the Treasury had said the money is wanting, and it seemed that there was no probability of getting it in any way by a vote of this House, unless it is by withholding this fourth instalment. Mr. B. had been willing, along with his friends, to vote for the bill.

If the money is needed, he is sure his vote can be justified. If it be not wanted, he cannot see how the bill can be justified, in his view of the matter. As the bill now stands, it withholds the fourth instalment, and gives up the first three which are paid. Mr. B. voted for the proposition of last session, proposing to deposit, only on the ground that we had got the people's money, either by mistake or wrongfully, and that we ought to restore it to them. He thought we could have done so more equally and justly by stopping the sales of the public lands, and taking off some of the taxes. He thinks so still. He views this fourth instalment as a mere essay to restore so much money to the true owners, but very unequally. If then the money be wanting here, the people must in some way, at some time, be taxed to raise it. It is much cheaper to pay their taxes with what we have, than to raise the same sum by taxing the people again for it; and then it goes back into the pockets it came out of. By the deposit law, few of the true owners from whom it was taken will ever get much of it. To raise ten millions by any kind of taxes will require something like twelve millions tax, to include expenditures. To pay ten millions of public dues, with that sum of the people's money in hand, will cost nothing more than that sum. No expense; no commissions; no losses. Why, then, not pay it if it be wanting? If not, why withhold it? Mr. B. wanted no bonds on the States. We have an execution, or that which is equal, against every particle of property of every citizen, and command of his personal services, and even of his life, if the public necessities require it. We can levy duties and taxes, which are equal to an execution, and why prefer a bond? Mr. B. could not vote for any thing to be attached to this bill that would leave any after-claps. He wishes to settle as he went. He wished the Government to have as much as it needed, and not one cent more. He had said on the passage of the deposit bill, that unless we get rid of these vast sums entirely, they would ruin us. If we keep them here, they will ruin every thing. If we place them about in any way in the States, reserving any discretionary control over them, they will ruin us. It is impossible not to see and to feel the solicitude now produced by this call. Men are obliged to feel that the calling for, or not calling for, this sum, must affect the interest of their constituents. Public works are undertaken in consequence of these deposits and promises to deposit. Is it not manifest that this power to call or not call, puts, to a great extent, into the hands of the Federal Government that controlling power over the States, and the representatives of the people of the States, for which they have been so long, and in so many ways, reaching?

Mr. B. wanted to settle finally, and leave each Government free of the other, exactly in that condition in which the Constitution of each placed them.

Mr. B. had often said in this House, and would repeat it, that the greatest difficulties we had to encounter, arose from having, or having had, or having supposed we had, these great sums. Collect

them, said he, in gold and silver, and place them in strong boxes, and guard them with bayonets; and who will keep the bayonets off them? Deposit them, and we see what it comes to!

But, said Mr. B. collect no more than you want, and pay as soon as you get it, and this trouble is over. Ten times the amount of the proper revenue of the United States is collected every year by deputy sheriffs and constables, and all paid over, or with very little loss. And, why, sir? It is because there is a carping, anxious plaintiff, or creditor, ready to receive it in any money that is paying. So it would be with us, if we collected no more than we had use for.

Mr. B. said he would conclude by saying that his great dread was, if we leave this money to be collected and paid hereafter, about the time the tariff compromise was about to expire, we should be told we must keep up a high tariff to pay this money. How else can it be paid? the quarters from which most of these propositions came being mostly high tariff, he could not but feel sure that this would be the end of it. He would vote again for the bill if unaltered; but against it if any provision for after-claps were attached to it. He wanted to strike a balance now; and if hereafter we should get such sums as we had, or supposed we had, we can easily open a new account, and pass another deposit law should we find it necessary, which God forbid!

The question was then taken on Mr. ADAMS'S amendment, and decided in the negative—yeas 94, nays 136, as follows:

YEAS—Messrs. Adams, Alexander, Heman Allen, Bell, Bond, Borden, Briggs, William B. Calhoun, John Calhoun, William B. Campbell, Wm. B. Carter, Casey, Chambers, Cheatham, Childs, Corwin, Cranston, Crockett, Curtis, Cushing, Darling, Davies, Deberry, Dennis, Dunn, Evans, Everett, Ewing, Richard Fletcher, Filmore, Rice Garland, Goode, Wm. Graham, Graves, Grennell, Hall, Harlan, Harper, Hastings, Hawes, Henry, Herod, Hoffman, Henry Johnson, William Cost Johnson, Lincoln, A. W. Loomis, Mallory, Marvin, S. Mason, Maury, May, Maxwell, McKennan, Menefee, Mercer, Milligan, Matthias Morris, Calvary Morris, Naylor, Noyes, Ogle, Wm. Patterson, Pearce, Peck, Phillips, Pope, Potts, Rariden, Randolph, Reed, Reacher, Ridgeway, Robertson, Rumsey, Russell, Sergeant, Augustine H. Shepperd, Sibley, Slade, Snyder, Southgate, Stanley, Stratton, Tillinghast, Toland, Underwood, Albert S. White, John White, Elisha Whitelessey, Lewis Williams, Joseph Williams, and Christopher H. Williams—94.

NAYS—Messrs. John W. Allen, Anderson, Andrews, Atherton, Ayckrigg, Beatty, Bicknell, Birdsall, Boon, Bouldin, Brodhead, Bronson, Bruyn, Buchanan, Cambreleng, John Campbell, T. J. Carter, Chaney, Chapman, Cilley, Claiborne, Cleveland, Clowney, Coles, Connor, Craig, Cushman, Dawson, Davee, DeGraff, Dromgoole, Duncan, Edwards, Elmore, Farrington, Fairfield, Isaac Fletcher, Filmore, Rice Garland, Gholson, Glascock, James Graham, Grandland, Grant, Gray, Griffin, Haley, Halstead, Hammond, Hamer, Harrison, Hawkins, Haynes, Holsey, Holt, Howard, Hubley, Wm. H. Hunter, R. M. T. Hunter, Ingham, Thos. B. Jackson, Joseph Johnson, N. Jones, J. W. Jones, Kemble, Kilgore, Klingensmith, Legare, Leadbetter, Lewis, Logan, Arphaxed Loomis, Lyon, James M. Mason, Martin, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, Samuel W. Morris, Muhlenberg, Murray, Noble, Owens, Palmer, Parker, Paynter, Pennybacker, Petriken, Phelps, Pickens, Plumer, Potter, Pratt, Prentiss, Reilly, Rhet, Richardson, Rives, Sawyer, Sheffer, Charles Shepard, Shields, Shipley, Smith, Spencer, Stewart, Taylor, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Webster, Weeks, Thomas T. Whitelessey, Sherrod Williams, Jared W. Williams, Wise, Worthington, Yell, and Yorke—132.

Mr. HAYNES renewed his amendment, stating that it was intended to avoid the conclusion first mentioned by him, that it would create an unconditional charge upon the Treasury. That there was no difference in principle between the amendment of the gentleman from South Carolina, and an immediate deposit by the issue of Treasury notes, payable on the 1st of January, 1839, as had been conclusively shown by the honorable gentleman from Massachusetts, (Mr. Phillips.) Further, he offered it as a direct expression of what had just been indirectly expressed by the vote upon the amendment of the honorable member from Massachusetts, (Mr. Adams;) that this House will not, in any form, make an appropriation to meet the pledge contained in the amendment of the honorable gentleman from South Carolina, Mr. Pickens.

Mr. WILLIAMS, of North Carolina, then moved to lay the bill and amendments on the table.

Mr. COLES called for the yeas and nays, which were ordered, and were—yeas 101, nays 132, as follows:

YEAS—Messrs. Adams, Alexander, Heman Allen, Ayckrigg, Bell, Biddle, Bond, Borden, William B. Calhoun, John Calhoun, W. B. Campbell, Wm. B. Carter, Casey, Chambers, Cheatham,

Childs, Corwin, Cranston, Crockett, Curtis, Cushing, Darling, Dawson, Davies, Deberry, Dennis, Dunn, Evans, Everett, Ewing, Richard Fletcher, Goode, James Graham, Wm. Graham, Grennell, Hall, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Herod, Hoffman, Henry Johnson, William Cost Johnson, Lincoln, A. W. Loomis, Mallory, Marvin, S. Mason, Maury, May, Maxwell, McKennan, Menefee, Mercer, Milligan, Matthias Morris, Calvary Morris, Naylor, Noyes, Ogle, Wm. Patterson, Pearce, Peck, Phillips, Pope, Potts, Rariden, Randolph, Reed, Reacher, Ridgeway, Robertson, Rumsey, Russell, Sergeant, Augustine H. Shepperd, Charles Shepard, Sibley, Slade, Snyder, Southgate, Stanley, Stratton, Tallaferro, Thompson, Tillinghast, Toland, Underwood, Albert S. White, John White, Elisha Whitelessey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, and Yorke—101.

NAYS—Messrs. John W. Allen, Anderson, Andrews, Atherton, Beatty, Boime, Bicknell, Birdsall, Boon, Bouldin, Briggs, Brodhead, Bronson, Bruyn, Buchanan, Cambreleng, John Campbell, Timothy J. Carter, Chaney, Chapman, Cilley, Claiborne, Clarke, Cleveland, Clowney, Coles, Connor, Craig, Crary, Cushman, Davee, DeGraff, Dromgoole, Duncan, Edwards, Elmore, Farrington, Fairfield, Isaac Fletcher, Filmore, Foster, Fry, Gallup, Rice Garland, Gholson, Glascock, Grandland, Grant, Gray, Griffin, Haley, Hammond, Hamer, Harrison, Hawkins, Haynes, Holsey, Holt, Howard, Hubley, Wm. H. Hunter, Robert M. T. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Jennifer, Joseph Johnson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, Klingensmith, Legare, Leadbetter, Lewis, Logan, Arphaxed Loomis, Lyon, James M. Mason, Martin, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, Samuel W. Morris, Muhlenberg, Murray, Noble, Owens, Palmer, Parker, Paynter, Pennybacker, Petriken, Phelps, Pickens, Plumer, Potter, Pratt, Prentiss, Reed, Reilly, Rhet, Richardson, Rives, Sawyer, Sheffer, Shields, Shipley, Smith, Spencer, Stewart, Taylor, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Webster, Weeks, Thomas T. Whitelessey, Jared W. Williams, Worthington, and Yell—132.

So the motion to lay on the table was decided in the negative.

Mr. BELL moved to recommit the bill and amendments, to a Committee of the Whole on the state of the Union, with the following instruction, to strike out all after the enacting clauses, and insert the following:

"That the payment of the fourth instalment required to be deposited with the States, by the act of the 23d of June, 1836, be postponed until the first day of October, 1840; and that moneys to that amount, now in deposit to the credit of the Treasurer, and other public officers, in any of the deposit banks, be, and the same are hereby, appropriated for the payment of the same.

Sec. And be it further enacted, That it shall be the duty of the Secretary of the Treasury, as soon as may be after the first day of October next, to proceed to tender and transfer to the several States, his drafts and orders to pay their respective portions of said moneys, and that it shall be lawful for any State, which may be willing to accept such drafts or transfers in payment of its proportion of said instalment, according to the terms of said act of the 23d of June, 1836, to receive the same; provided, nevertheless, that any bank or banks upon which such transfers or drafts shall issue upon the condition of paying to the States holding the same, interest at the rate of five per cent. per annum, quarterly, shall be required to pay the principal only in the following instalments, to wit: one third on the first day of October, 1838; one third on the first day of October, 1839, and the remainder on the first day of October, 1840.

Messrs. ADAMS and THOMAS made a few remarks in explanation; when

Mr. BELL again spoke at some length in support of his proposition.

Mr. HAYNES said that his intercourse with the House would forbid the suspicion that he could intend any disrespect towards it. But, lest such an inference might be drawn from the remark he was about to make, he utterly and entirely disclaimed any such intention. He said that the course of our discussion looked like we were addressing a petit jury, or playing at the game common among boys, when he was a boy, of seeing who of us could get the last tag.

The question was then taken on the motion to commit, and decided in the negative—yeas 64, nays 149, as follows:

YEAS—Messrs. Adams, Alexander, Heman Allen, John W. Allen, Ayckrigg, Bell, Biddle, Bond, Borden, John Calhoun, William B. Campbell, Wm. B. Carter, Chambers, Cheatham, Corwin, Cranston, Crockett, Curtis, Darling, Davies, Deberry, Dunn, Ewing, Goode, James Graham, Graves, Grennell, Haley, Harlan, Harper, Hawes, Henry, Herod, Henry Johnson, Wm. C. Johnson, Mallory, Samuel Mason, Maury, Maxwell, Menefee, Milligan, Calvary Morris, Naylor, Ogle, Phillips, Pope, Randolph, Ridgeway, Rumsey, Russell, Sergeant, Slade, Southgate, Stanley, Stratton, Tallaferro, Tillinghast, Toland, Underwood, Albert S. White, John White, Elisha Whitelessey, Joseph Williams, C. H. Williams, and Yorke—64.

NAYS—Messrs. Anderson, Andrews, Atherton, Beatty, Beime, Bicknell, Birdsall, Bouldin, Briggs, Brodhead, Bronson, Bruyn, Buchanan, William B. Calhoun, Cambreleng, Timothy J. Carter, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Clowney, Coles, Connor, Craig, Cushman, Dawson, Davee, DeGraff, Dromgoole, Duncan, Edwards, Elmore, Evans, Everett, Farrington, Fairfield, Richard Fletcher, Foster, Fry, Gallup, Rice Garland, Gholson, Glascock, William Graham, Grandland, Grant, Gray, Grennell, Griffin, Haley, Hammond, Hamer, Harrison, Hastings, Hawkins, Haynes, Holsey, Holt, Howard, Hubley, William H. Hunter, Robert M. T. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Joseph Johnson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, Klingensmith, Legare, Leadbetter, Lewis, Lincoln, Logan, Arphaxed Loomis, A. W. Loomis, Lyon, Marvin, James M. Mason, Martin, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, McKennan, Miller, Montgomery, Moore, Morgan, Matthias Morris, Samuel W. Morris, Muhlenberg, Murray, Noyes, Owens, Palmer, Parker, Paynter, Patterson, Paynter, Pennybacker, Petriken, Phelps, Pickens, Plumer, Potts, Potter, Pratt, Prentiss, Reed, Reilly, Rhet, Richardson, Rives, Robertson, Sawyer, Sheffer, Augustine H. Shepperd, Charles Shepard, Shields, Shipley, Smith, Snyder, Spencer, Stewart, Taylor, Thomas, Thompson, Titus, Towns, Turney, Vail, Vanderveer, Wagener, Webster, Weeks, Lewis Williams, Sherrod Williams, Jared W. Williams, Worthington, and Yell—143.

Mr. TOLAND then moved that the House adjourn: lost.

Mr. PHILLIPS then moved to commit the bill to the Committee of the Whole on the state of the Union, with instructions "to strike out all after the enacting clause, and insert a provision for issuing Treasury notes, payable with interest at the rate of five per cent. per annum, on the first day of January, 1839, to an amount equal to such proportion of the fourth instalment, as cannot be paid in drafts, payable in specie, or in such drafts as may be accepted by the States, upon the deposit banks."

Mr. EVERETT called for the yeas and nays, but the House refused to order them, and the motion was lost.

The amendment of Mr. HAYNES was disagreed to without a division.

Mr. HARLAN then moved to amend the amendment by adding thereto "that the public faith is hereby pledged that no further or other postponement of the fourth instalment of deposit with the States shall take place," which was disagreed to.

The question was then taken on the amendment of Mr. PICKENS, and decided in the affirmative—yeas 130, nays 90, as follows:

YEAS—Messrs. Heman Allen, John W. Allen, Anderson, Andrews, Atherton, Beatty, Bicknell, Borden, Briggs, Bronson, Bruyn, Buchanan, William B. Calhoun, John Calhoun, Cambreleng, William B. Campbell, John Campbell, Timothy J. Carter, William B. Carter, Casey, Chaney, Cheatham, Cilley, Claiborne, Clark, Cleveland, Clowney, Connor, Corwin, Craig, Crockett, Cushman, Davee, Deberry, DeGraff, Duncan, Elmore, Fairfield, Foster, Gallup, Rice Garland, Gholson, Glascock, Grandland, Grant, Gray, Griffin, Hall, Hammond, Hamer, Hastings, Hawkins, Henry, Herod, Holsey, Howard, Robert M. T. Hunter, Ingham, Jabez Jackson, Jennifer, Henry Johnson, Joseph Johnson, Nathaniel Jones, John W. Jones, Kilgore, Legare, Leadbetter, Lewis, Logan, Andrew W. Loomis, Lyon, Martin, Maury, Maxwell, Robert McClellan, McClure, McKim, Menefee, Montgomery, Morgan, Matthias Morris, Samuel W. Morris, Murray, Naylor, Noble, Owens, Palmer, Parker, Paynter, Petriken, Phelps, Pickens, Plumer, Pope, Potts, Potter, Pratt, Prentiss, Rariden, Randolph, Rhet, Richardson, Ridgeway, Rumsey, Russell, Sawyer, Sergeant, Sheffer, Augustine H. Shepperd, Charles Shepard, Shipley, Slade, Smith, Spencer, Taylor, Thomas, Thompson, Titus, Towns, Vail, Vanderveer, Wagener, Webster, Weeks, Albert S. White, Elisha Whitelessey, Thomas T. Whitelessey, Sherrod Williams, Worthington, and Yell—130.

NAYS—Messrs. Adams, Ayckrigg, Beime, Bell, Biddle, Birdsall, Bond, Bouldin, Brodhead, Chambers, Chapman, Childs, Coles, Crary, Cranston, Curtis, Cushing, Darling, Dawson, Davies, Dennis, Dromgoole, Dunn, Edwards, Evans, Everett, Ewing, Farrington, Richard Fletcher, Filmore, Fry, Goode, James Graham, William Graham, Graves, Grennell, Haley, Halstead, Harlan, Harrison, Harper, Hawes, Haynes, Hoffman, Holt, Hubley, William H. Hunter, Thomas B. Jackson, William Cost Johnson, Kemble, Klingensmith, Lincoln, Arphaxed Loomis, Mallory, Marvin, James M. Mason, Samuel M. Mason, McKay, Abraham McClellan, McKennan, Mercer, Milligan, Miller, Moore, Calvary Morris, Muhlenberg, Noyes, Ogle, Patterson, Paynter, Pearce, Peck, Pennybacker, Phillips, Reed, Reilly, Rhet, Rives, Robertson, Shields, Sibley, Snyder, Southgate, Stanley, Stewart, Stratton, Tallaferro, Tillinghast, Toland, Toucey, Turney, Underwood, John White, Lewis Williams, Jared W. Williams, Joseph Williams, Christopher H. Williams, Wise, and Yorke—90.

Mr. MASON of Virginia then submitted the amendment which he had submitted in Committee of the Whole, the effect of which was a repeal of the deposit law of 1836, so far as related to the fourth instalment to be paid under that act; and addressed the House briefly in support of the amendment.

Mr. M. called for the yeas and nays on the adoption of his amendment, which were ordered.

After some remarks by Mr. READ, Mr. ROBERTSON moved to commit the bill to a Committee of the Whole, with certain instructions, which he sent to the Chair, and called for the

years and nays; but the House refused to order them.

Mr. PETRIKEN then moved the previous question; but it was not seconded by the House.

After someremarks by Mr. EWING, the motion to commit was disagreed to without a division.

Mr. TURNEY then moved to amend the proviso to the bill, by striking out the words, "until further provision by law," and insert, "until the 1st of January, 1839."

After some remarks by Mr. McKAY,

Mr. HAYNES said that it would afford him the greatest pleasure to vote for the amendment proposed by the honorable gentleman from Virginia, (Mr. Mason,) and show thereby that he sustained the principles of his native State, but for the conviction that there was but one mode of closing this debate. He moved the previous question, which was seconded by the House, ayes 117, noes not counted; and the main question was ordered to be put.

Mr. REED called for the yeas and nays on the main question, (which was on ordering the bill to a third reading,) which were ordered, and were—yeas 118, nays 106, as follows:

YEAS—Messrs. Anlerson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdall, Borden, Broadhead, Bronson, Bryn, Buchanan, Cambreleng, John Campbell, Timothy J. Carter, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Clowney, Coles, Connor, Craig, Cushman, Davoe, DeGraff, Dromgoole, Duncan, Edwards, Elmore, Farrington, Fairfield, Foster, Fry, Gallup, Gholson, Glascock, Grantland, Grant, Gray, Griffin, Haley, Hammond, Hamer, Harrison, Hawkins, Haynes, Halsey, Holt, Howard, Hubley, William H. Hunter, Robert M. T. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Joseph Johnson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, Klingensmith, Legare, Leadbetter, Logan, Arphaxed Loomis, Lyon, James M. Mason, Martin, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, Samuel W. Morris, Muhlenberg, Murray, Noble, Owens, Parker, Parmenter, Paynter, Penhysbacker, Petriken, Phelps, Pickens, Plumer, Potter, Pratt, Prentiss, Reily, Rhett, Richardson, Sheffer, Shipier, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Vail, Vanderveer, Wagener, Webster, Weeks, Thomas T. Whittlesey, Jared W. Williams, Worthington, and Yell—118.

NAYS—Messrs. Adams, Alexander, Heman Allen, John W. Allen, Ayerrig, Bell, Biddle, Bond, Bouldin, Briggs, William B. Calhoun, John Calhoun, William B. Campbell, William B. Carter, Casey, Chambers, Cheatham, Childs, Corwin, Crary, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Evans, Everett, Ewing, Richard Fletcher, Filmore, Goode, James Graham, William Graham, Graves, Grinnell, Hall, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Herold, Hoffman, Jenifer, Henry Johnson, William Cost Johnson, Lincoln, Andrew W. Loomis, Mallory, Marvin, Samson Mason, Maxwell, McKennan, Menefee, Mercer, Milligan, Matthias Morris, Calvary Morris, Naylor, Noyes, Ogile, Patterson, Pearce, Peck, Phillips, Pope, Potts, Riden, Reed, Rencher, Ridgway, Rives, Robertson, Rumsey, Russell, Sawyer, Sergeant, Augustine H. Shepperd, Charles Shepard, Shields, Sibley, Slade, Smith, Snyder, Southgate, Stanley, Stratton, Tallafiero, Thompson, Tillinghast, Toland, Underwood, Albert S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, and Yorke—106.

So the bill was ordered to a third reading at this time.

The bill being read a third time,

Mr. RICE GARLAND moved to postpone the further consideration of the bill until Tuesday next.

Mr. G. advocated his motion on the ground that he did not wish the deposit banks in his State to be left at the mercy of the Secretary of the Treasury; and he therefore wished to defer the postponement bill till the bill to settle with the deposit banks was acted on.

Mr. CAMBRELENG said, for himself, he was disposed to deal as generously with those banks as circumstances would admit; for, though no friend to the banks, yet he was willing to afford them every indulgence, for the sake of the people who were indebted to them.

Mr. DAWSON and Mr. MASON of Ohio, designated this as a bargain between the two gentlemen, and made some strictures thereon.

Mr. GOHLSON said he was in favor of this motion. Sir, I have been the friend of this bill at every and all stages of its progress. I have been here for the last 22 days, giving my aid to this bill; but, sir, now that the struggle is over, I, as one of the friends of this bill, and as one of the Representatives of the State of Mississippi, in which is one of the deposit banks, having a large amount of public money, about which so much has been said during the progress of this debate, by gentlemen on this floor, think it impolitic to permit this bill to pass out of our reach until we have had the action of this House on the bill to regulate the settle-

ment of the Government with the deposit banks. Sir, as much as the interest I have felt for the passage of this bill has been, I feel more interest in the protection of the deposit banks, for the obvious reason that, by the protection of the banks, I protect those indebted to the banks. Mr. Speaker, the gentleman from Ohio (Mr. Bond) appears to be willing, as usual, to make the Chairman of the Committee of Ways and Means (Mr. Cambreleng) the scapegoat, and on his head to place the sins of all of us. He says that the Chairman of the Committee of Ways and Means is willing to grant indulgence to those banks, because they are located in the States favorable to this administration, and intimates that this is bargainings contrary to the course that should be pursued here. Sir, I wish, once for all, to inform that gentleman and all others, that I stand here ready prepared to bargain, whenever I can do so honorably, and by that means promote the interest of my constituents. Sir, that gentleman cries out against the chairman of the Committee of Ways and Means, and the friends of this administration, because he says we say we care nothing for the banks, but feel great interest for the people. Now I presume that there is nothing inconsistent with the principles of honorable legislation in this. I am one of those that feel but little for these banks, in their corporate capacity; but I feel a great disposition to grant them as long indulgence as may be, for the reason that by so doing I extend indulgence to the people, who are the debtors of these banks. Now we have in Mississippi, in the deposit bank, about \$1,767,000 of deposits; I know, sir, although our banks cannot at this time redeem their circulation in specie, yet, sir, the banks in Mississippi are as solvent as any banks in the Union having on hand a like sum of money as deposits. Now, sir, much has been said about relief. Again and again have we heard that nothing is proposed by the friends of this administration for the relief of the people. Now, so far as I can understand what is meant by relief, any measure that will relieve the banks will relieve the people. Sir, we of Mississippi owe a large debt, but we have the means of paying a larger debt than any people in the United States; but we can pay only once in the year; we can only pay when we receive the annual returns of our cotton crops. And I have no doubt but we can, if we are indulged until we can realize the proceeds of another cotton crop, in addition to the one we are now gathering, pay our debts. Now, sir, by the bill on your table from the Senate, in relation to the settlement with these banks—they propose to grant us the relief of four, six, and nine months, upon our complying with certain conditions. Now this is such relief as we do not want. We do not want less than twelve months; and unless we can obtain this much time, much as we have suffered, and are suffering, we prefer that the Government should commence its suit against us; for it is impossible for us to comply with these conditions. Now, sir, it is something remarkable to me, that at the same time that it is proposed to give us this four, six, and nine months' relief, the same body proposes to give the merchants indulgence of twelve months on their bonds. Now, sir, we are the debtors of the Government as well as they, and should have the same indulgence extended to us.

Mr. Speaker, the gentleman from South Carolina (Mr. Thompson) says it is not the intention of this administration to collect this money. He says this money is to be kept in the doubtful States, Alabama, Mississippi, and Louisiana, for the purpose of corrupting the people, and bringing them over to this administration. Now, sir, that gentleman would take it as extremely unkind if it were to be said that the people that he represents could be thus corrupted. He should recollect, then, that I know the people of Mississippi too well not to know that they cannot be corrupted in this way; and I will give the gentleman an undoubted reason for this; and that is, that these banks, controlling this immense sum of money, have been at all times, and still are, opposed to the party in power in Mississippi. Then, sir, if this money could have corrupted them, or bought them up, would not this have been already effected? Have we not already passed

through as great pecuniary embarrassment as we are likely ever to have to contend with? Mr. Speaker, it is now eleven o'clock, p. m. and I am unwilling to detain the House longer. Entertaining these views, I believe I should be recreant to my constituents to let this bill pass out of the reach of this House until the action of this House can be had upon the other bill. Let me ask this House to remember, that this money was received by the banks, for the Government, in paper; that paper has since depreciated, and we are now to pay this money to the Government, when we do pay it, in specie. Now, sir, if gentlemen are not disposed to give us reasonable relief, let them order a suit; let them collect this if they can. This I know cannot be done, for we cannot pay this money until the debtors of the banks can have time to pay their debts. It is then with a view to favor the people who are the debtors of these banks, particularly, that I have sustained this motion, and for the further reason, that if the Government relieves any of debtors, it should relieve them all equally.

The motion to postpone was then disagreed to—ayes 74, nays 97.

Mr. CHAMBERS of Kentucky, after addressing some remarks to the House, moved an adjournment. Lost.

Mr. McKIM then moved the previous question, which was seconded; and the main question having been ordered, the bill was read a third time, and passed.

On motion,

The House adjourned at 11 o'clock, p. m.

## IN SENATE,

SATURDAY, September 30, 1837.

Mr. YOUNG presented a memorial from ten individuals relative to pre-emption of public lands; which was laid on the table.

Mr. BUCHANAN presented three memorials from citizens of the county of Philadelphia, against the annexation of Texas to the United States; also, a memorial from a number of citizens in Bucks county, Pennsylvania, praying that Texas may not be admitted; which were laid on the table.

Mr. PRESTON objected to their reception. He rose for the purpose of saying, in regard to the presentation of petitions on the subject of slavery, and as the public mind was running in that direction, that an attempt would be made to exclude them from the halls of Congress. He would take leave to say, that the southern delegation and the southern portion of the Union, intended to disallow the prayer of petitions of this character, if, by any possibility, it could be done; and, at an early day, consistent with the proceedings of Congress, a motion would be made for the purpose of testing the opinion of the country and of the two houses of Congress in reference to the presentation of these petitions; and he stood pledged to bring forward the question here.

The petitions were then laid on the table.

## SPECIAL ORDER.

The Senate resumed the consideration of the bill imposing certain duties on public officers as depositaries in certain cases. The question pending being on Mr. CALHOUN's amendment—

Mr. PRESTON traced the ill that have befallen the country to the action of the late Executive bill, in relation to the removal of the deposits, and Treasury circular. He contended, that so far from the banks being the cause of the distress, that they were the conservatives of commercial prosperity and agricultural interest; that the General Government had seduced the banks into the connection, and now wanted to throw its victims back upon the people.

Mr. BROWN followed Mr. P. replying at length to the remarks of that gentleman. Mr. B. expressed his astonishment that the State banks, which before had been denounced as unsafe, and unworthy depositaries of the public revenue, were now lauded as worthy of all Government patronage—of all parental care. He defended, with much zeal, the late President from the aspersions thrown upon him as the cause of the general distress, and said, that the conduct of that illustrious individual, so far from deserving the censure cast upon him as the cause of the present distress, would go down

to all after ages as a patriot and statesman worthy of the country that elevated him to the station.

On motion of Mr. BAYARD, the further consideration of the subject was postponed till Monday.

On motion of Mr. WRIGHT, the "bill to postpone the fourth instalment of deposits with the States," which was returned from the House with an amendment, was taken up; when

Mr. WRIGHT stated that the Committee on Finance had examined the amendment, and recommended its adoption.

Mr. TIFTON rose and stated that he was opposed to the bill as it passed the Senate, and could not favor its passage as amended by the House. He considered this Government pledged to make the deposits with the States in strict conformity to the deposit act of 23d June, 1836. The States had a right to expect it, and in most instances made arrangements for the disposal of the money. The State from which he came, had appropriated the three instalments received, and created expectations for the appropriation of the fourth instalment, and would be disappointed and embarrassed if Congress postponed or withheld the fourth instalment as proposed by the bill returned to us from the House of Representatives.

The deposit act of 1836 made it the duty of the Secretary of the Treasury to ascertain and state the amount of surplus that would be coming to each State on the first of January, 1837. He had done so, and had paid three instalments; and now Congress were to step in, and say to the States, we expected to be able to deposit the sum stated by the Secretary of the Treasury, but we were mistaken; times have changed, you must do without it; the Government will be embarrassed if we make the deposits.

He considered it a relief measure to make the deposits in good faith. This Government can not make a more deadly stab at the interests of the Western States, and the western people, than induce them to expect money, and then withhold it from them. The western banks had a large amount of public money deposited in their vaults, and if we permit the deposit to be faithfully executed, the banks would now transfer the public money to the States. It will remain and enter into circulation amongst the western people; the Legislatures can indulge the banks, and the banks will be enabled to favor, thereby making it a prominent relief measure.

Should we withhold the fourth instalment, and force the silver from the western banks into the Treasury of the United States, the consequences must be most ruinous to the interests of the new States, check their internal improvements now going successfully on, and distress the people.

This bill passed the Senate, some days ago, soon after he reached the city, when the state of his health prevented him from expressing his objections to the bill; he now took occasion to say that the effects of this measure would be most fatal to the people of the State which he had in part the honor to represent here.

The question being on concurring with the House in the amendment,

Mr. TIFTON asked for the yeas and nays thereon, and being taken, the amendment was concurred in—yeas 30, nays 2, as follows:

**YEAS**—Messrs. Allen, Bayard, Benton, Black, Brown, Buchanan, Calhoun, Clayton, Fulton, Grundy, King of Alabama, King of Georgia, Linn, Lyon, Morris, Nicholas, Niles, Norvell, Prentiss, Roane, Robinson, Smith of Connecticut, Strange, Swift, Walker, Wall, White, Williams, Wright, and Young—30.

**NAYS**—Messrs. Pierce and Tipton—2.

Mr. GRUNDY, from the Committee on the Judiciary, reported a bill to regulate the fees of district attorneys. [It provides that no district attorney shall receive a fee of more than five dollars for renewal of a bond.]

The bill was read a first time and ordered to a second reading.

Mr. BLACK offered a resolution, which was adopted, directing the Secretary of the Senate to send ten copies of a compilation of public documents to the Land office.

On motion of Mr. BAYARD,  
The Senate adjourned.

## HOUSE OF REPRESENTATIVES,

SATURDAY, September 30, 1837.

Petitions and memorials were presented by Mr. ALLEN of Ohio.

[Mr. ALLEN of Ohio presented a remonstrance from citizens of Medina county, against the admission of Texas; and two petitions, one for the abolition of slavery in the District of Columbia, and one to abolish the slave trade between the States.]

Mr. JONES of Virginia.

Messrs. NAYLOR, SERGEANT, MORRIS, PAYNTER, and FRY, of Pennsylvania.

On motion of Mr. TOLAND, the following resolution, offered by him yesterday, was taken up on its adoption:

**Resolved**, That the Secretary of the Treasury be directed to communicate to this House copies of all correspondence between the department and all individuals, banks, or other corporations, relative to a bill now before Congress to authorize the President of the United States to cause the issue of Treasury notes, and relative to the disposition of such notes; together with copies of all documents or papers on file in the department relative thereto.

Mr. HAMER moved to strike out the word "individuals," for he did not think the House wanted to go into the private or confidential correspondence of the Secretary of the Treasury.

Mr. TOLAND did not want to see the private correspondence of any one, but the letters from individuals to the Secretary of the Treasury, on a subject like this, did not partake of that character.

Mr. WHITTLESEY of Ohio, suggested a modification, by the insertion of the word "official," before correspondence.

Mr. HAMER had himself risen to suggest the same modification.

Mr. TOLAND accepted it; and so modified, the resolution was agreed to.

Petitions were further presented by

Mr. HALSTEAD of New Jersey.

Mr. ALLEN of Vermont.

[Mr. ALLEN of Vermont, presented the petition of Luther Cole and 45 others, citizens of Montgomery, in the county of Franklin, and State of Vermont, against the annexation of Texas to the Union.]

Mr. PARMENTER of Massachusetts.

Mr. CAMBRELENG, on leave, from the Committee of Ways and Means, reported, without amendment, the bill from the Senate to remit the duties on certain goods destroyed by the late conflagration in the city of New York, and the same was committed to a Committee of the Whole on the state of the Union.

Mr. CAMBRELENG, from the same committee, reported an amendment to the Senate's bill to postpone the payment on duty bonds; which was committed to the same Committee of the Whole, having charge of the bill on the same subject.

On motion of Mr. DUNN, the report from the Secretary of the Treasury, in reference to the further postponement of duty bonds, and the fees of district attorneys thereon, was taken up and referred to the Committee on the Judiciary.

## NATIONAL BANK.

The House then proceeded to the consideration of the following resolution, reported from the Committee of Ways and Means on the 25th instant, it being the business next in order:

**Resolved**, That it is inexpedient to charter a national bank.

The question pending was the motion of Mr. WISE to amend the resolution by adding thereto, "at this time. And be it further resolved, that it will be expedient to establish a national bank whenever there is a clear manifestation of public sentiment in favor of such a measure."

Mr. SERGEANT continued his remarks, but, without concluding, gave way to

Mr. CAMBRELENG, on whose motion the House passed to the orders of the day.

Mr. ROBERTSON gave notice of his intention to move an amendment to the amendment as follows:

"Nor ought such an institution to be chartered at any time hereafter, unless by an amendment to the Constitution, which the United States shall specially express, by delegating to Congress the power to do so."

## TREASURY NOTES.

On motion of Mr. CAMBRELENG, the House then resolved itself into a Committee of the Whole on the state of the Union, Mr. CONNOR in the Chair.

Mr. CAMBRELENG moved to take up the bill from the Senate "To authorize the issuing of Treasury notes."

Mr. BELL and Mr. ADAMS objected to taking up the Senate's bill, on the ground that it was a money bill, and should be first considered in the House.

Mr. WISE moved that the committee rise and report to the House that objections had been made to the bill in Committee of the Whole, on the ground of its being a money bill, and consequently ought to have originated in the House.

Mr. CAMBRELENG said it must be within the recollection of many gentlemen here, that the compromise act of 1833, was sent from the Senate to this House, with a very large increase of tax, which would have made the very same objections now raised, lie against that bill. This bill did not propose a tax; it proposed no public debt; as our means were ample, but not at this time available. It was merely a measure to enable the Government to anticipate resources already in its possession. Gentlemen had said a great deal about this bill originating in the Senate. The cause of this was that the Senate's Committee on Finance was organized four days before the Committee of Ways and Means in the House, and consequently their bills were sooner brought forward, and acted upon by the Senate. Beside the Senate's committee had not the obstacles thrown in their way which had been thrown in the way of the Committee of Ways and Means of the House. We have had obstacles thrown in our way day by day, and if we were now to have a grave constitutional question to be settled, we may as well have the question postponed until the first day of the regular session of Congress. On to-morrow the merchants' bonds all expire, and he hoped gentlemen would permit the business to progress at this time.

After a few words by Messrs. MERCER and ROBERTSON,

Mr. CAMBRELENG withdrew the motion to take up the Senate's bill, and moved to take up the bill reported by the Committee of Ways and Means of this House.

After some conversation between Messrs. WISE, MERCER, WILLIAMS, HAYNES, and GLASCOCK, as to whether it was in order to withdraw this motion, and submit another at this time—

The question was taken, and decided in the affirmative.

The House bill was then taken up, and read through by the Clerk.

Mr. CAMBRELENG said that, when he presented the first bill to the consideration of the Committee, he had presented a statement of the condition of the Treasury on the 1st of October. As we now proposed to issue Treasury notes, based on the existing resources of the Treasury, he would submit to the committee an estimate, founded on the best information that could now be obtained, as to our resources and liabilities on the 1st January next. Mr. C. then submitted the following

Estimate of the state of the Treasury, and of its outstanding resources and liabilities, on the 1st of January, 1838; excluding the amount deposited with the States, and assuming that ten millions of Treasury notes will have been issued, and that all the custom-house bonds and claims upon the banks be postponed till the next year.

Estimated to be in the Treasury on the

1st of October—	
In money	- \$1,000,000
In the Mint	- 500,000
	\$1,500,000

Estimated receipts in the last quarter

from lands and customs - 2,000,000

From Treasury notes - 10,000,000

13,500,000

Expenditures in the last quarter, including new appropriations made at the present session for the Florida war, the expenses of the session,

the payment of debentures, &c. - 10,500,000

3,000,000

#### Outstanding resources—

Probable amount which will remain unpaid by the banks, and payable in 1838 - 7,000,000  
Custom-house bonds payable in 1838 - 6,000,000  
Bonds in suit - 1,000,000  
Bonds due from the sufferers by the fire in New York, payable in 1839, '40, and '41 - 1,000,000  
Instalments due from the Bank of the U. States in 1838, '9 and '40, exclusive of interest - 6,000,000

21,000,000

24,000,000

#### Liabilities—

Outstanding appropriations, deducting the amount which may probably be curtailed 12,000,000  
Treasury notes - 10,000,000  
22,000,000

Mr. C. alluded also to the fact, that there were seven or eight millions of outstanding, appropriations at the end of every year, which might be considered permanently outstanding. It would thus appear that our money and resources probably amount to twenty-four millions and a half. We were not called upon to authorize a loan or to create a public debt. There was no occasion for a stock, however desirable it might be for investment or for remittance to Europe. All that was now proposed, was to anticipate our actual resources by an issue of Treasury notes. The material question was, whether the notes should bear interest or not. In the present extraordinary condition of the country, he should think notes without interest an important auxiliary to aid in the collection of the revenue, and in relieving our internal circulation? He believed it quite as important to adjust the balance between the southwestern and northwestern portions of the country, as it was to pay off our foreign debt. If there was a current revenue coming into the Treasury, such an issue might be safely made and sustained in circulation, and would not, like the small notes issued in 1815, interfere with the currency. Gentlemen denounced notes of this description as paper money; they perform the office of exchange, and not of currency, and at the same time were convenient for making payments into the Treasury, and for our public expenditures. The currency of France, with her four hundred and fifty millions of gold and silver, had not been disturbed by the issues by the Bank of France of notes of about a similar denomination. The demands of commerce alone will not, however, sustain Treasury notes, without interest, in circulation. We must also be in receipt of a current revenue. Since the extension of time to the merchants and the banks, all the payments into the Treasury were thrown into the next year, and for some months very little would be coming into the Treasury. Under such circumstances, there was reason to fear that the notes would be depreciated. He had, therefore, adopted the principle of the Senate's bill, allowing an interest. He was not in favor of issuing Treasury now, or at any time, whether with or without interest; but, although our resources are ample, we are compelled to anticipate them, in order to give indulgence to the debtors of Government. In relieving them, and giving means to the Treasury, it is fortunate that we can afford to the southwest a medium of remittance, and at the same time, aid the merchants on the Atlantic to pay off their foreign debt. It was the prospect of this issue of ten millions of Treasury notes which had already considerably reduced the price of specie. Mr. C. then moved an amendment to the bill, by proposing substantially the provisions of the Senate's bill, authorizing an issue of Treasury notes, bearing interest not exceeding six per cent.

Mr. RHETT addressed the House at some length in support of the bill for the issue of Treasury notes, but contended that they should not bear interest, as that would have the effect to keep them out of circulation. If they bore five per cent. interest, he contended they would be bought up by capitalists and held as stock. He opposed the union of the Government with banks, and said that he, as a nullifier, would never consent that this Government should be allied with the great moneyed institutions of the country. Mr. R. concluded by moving to amend the amendment by inserting "or bills receivable," after the words "Treasury notes," wherever they occur, and striking out all that part relating to interest.

Mr. RICE GARLAND raised a question whether it was in order for the Chairman of the Committee of Ways and Means to move the Senate's bill as an amendment to this bill.

Mr. CAMBRELENG then modified his amendment so as to bring it within the rules of the House.

Mr. BELL made some remarks in favor of taking up the bill for the extension of duty bonds, and pass upon it before this bill was passed, so that they might actually know what the amount of deficit in the Treasury would be. He thought it a novel proceeding to take up this bill before the passage of the other bill, because the amount of deficit would depend in some measure upon the passage of the bill to extend the merchants' bonds. When that bill was acted upon, we could tell what the deficit in the Treasury would be, and then we could act accordingly.

Mr. CAMBRELENG said he did not hold himself responsible for the very extraordinary delay in the passage of the bill to postpone the fourth instalment which passed last night. But gentlemen would not drive him from the course he had taken in bringing these bills before the House. The first object of the Committee of Ways and Means was to bring the bill to postpone the fourth instalment before the House, and have it acted upon. Their next object was to supply the deficiency in the Treasury to enable it to go on with its disbursements; and with great deference to the gentleman from Tennessee, (Mr. Bell,) who had become very lately the advocate of the merchants, he must say, that he must provide for the wants of the Government before he did any thing else. We have been told but yesterday by the gentleman from Pennsylvania, (Mr. Sergeant,) and it was repeated again to-day, that he could not obtain, for a friend of his, the payment of a draft for \$811. He would not budge from the position he had taken, and he felt very confident that this committee would not do so. Gentlemen understood this question perfectly. It was simply whether Congress would authorize the issue of Treasury notes *with* or *without* interest. The bill was printed in various forms, both in this House and the Senate; and gentlemen would make up their minds on the subject as well now as a month hence.

Mr. BELL made a few remarks in explanation, contending that the course he had suggested before was the proper course now to be pursued.

After a few remarks by Messrs. HAYNES and MERCER,

On motion of Mr. BELL, the committee rose and reported.

The SPEAKER having resumed the Chair,

On motion of Mr. PICKENS, the amendments to the bill were ordered to be printed.

Mr. ADAMS, on leave, submitted the following resolution, which was considered and adopted:

*Resolved*, That the Secretary of the Treasury be directed to transmit to this House copies of the monthly returns from the receivers of public moneys to the Treasury Department, required by the circular order of the 11th of July, 1836, specifying the amount received by them, respectively, of gold and silver, and of bills authorized by the said circular order to be received; and also copies of all the certificates of deposits received at the Treasury from the late deposit banks, with the annexed proportions of gold and silver, and of bank notes, required of the said banks by the said circular order.

The SPEAKER laid before the House the following report from the Secretary of the Treasury:

TREASURY DEPARTMENT,  
September 30, 1837.

SIR: This report is submitted in compliance with the following resolution, passed on the 28th instant, and received at the department this day:

*Resolved*, That the Secretary of the Treasury be required to furnish this House with a statement of the number of Sub-Treasuries which will be required, if the bill imposing additional duties as depositories in certain cases on public officers should become a law; and further, how many new officers must be created; if any, how many new buildings to be erected, and what will be, as nearly as he can estimate it, the annual expense of the system; what the salaries to be paid the officers, or what will be the commissions to which they will be entitled."

In answer to the first inquiry, I would state that I have had recurrence to the printed bill of the House of Representatives, "imposing additional duties as depositories in certain cases on public officers and for other purposes," and which is supposed to be the bill referred to in the resolution. Under that bill, if in its present form it should become a law, I should not feel authorized to appoint any number of "new officers," whether called Sub-Treasurers, or otherwise, and created either to keep or disburse the public money. The bill seems merely to impose further duties as depositories on the officers now existing and employed in the collection of the customs and lands, and in the Post Office and Mint. The number of those in each of these establishments, if that information be desired, appears, with a few exceptions, and more accurately than could otherwise be stated without delay, in the last Biennial Register, published by the State Department under the direction of Congress, and to which I would respectfully refer for that purpose.

As to the second inquiry, it may be observed that in one of the plans suggested by this Department in the report at the commencement of the session, it was proposed that from four to ten "new officers," separate from, and independent of, those now in existence, might be authorized to act as commissioners, or keepers of the public money, at these important points where it should accumulate much beyond the current expenditures.

But that plan does not appear to be incorporated into the bill before me.

In reply to the third question, I would state, that no "new buildings" seem to be contemplated by this bill, nor have any been considered necessary by this Department.

In answer to the fourth inquiry, "what will be, as nearly as he can estimate it, the annual expense of the system—what the salaries to be paid to the officers—or what will be the commissions to which they will be entitled?"—the following statement is presented:

As the bill now stands, in the fourth section an allowance exists which covers all the additional expenses authorized by its provisions.

That allowance is not considered as sanctioning any commissions, or any new salaries to any of the keepers of the public money.

But if independent commissioners or agents had been authorized, as proposed in one of the plans submitted by the Department for consideration, it was estimated that their number need be only from four to ten, and their salaries not exceed on an average \$2,000 annually, without commissions.

That plan not being adopted, the only additional expenses of the system annually, as permitted by the above section in the present bill, would be "for clerks, fire-proof chests, or vaults, or other necessary expenses of safe-keeping, transferring, and disbursing said moneys."

It is computed that, in all, from ten to twenty additional clerks may be necessary at the most important points of collection and disbursement. As the warrants paid at the places of the greatest receipts and disbursements do not generally exceed four or five per day, that number of clerks will probably be amply sufficient.

Fifteen at \$1,000 salary per year will be \$15,000; and it is not supposed that the compensation need, on an average, exceed that amount.

At a similar number of places, additional iron chests, safes, or vaults, may be necessary. But, as they now exist at several ports and land offices, and the first cost of them will not have to be renewed annually, it is computed that the yearly expense for these will not exceed the sum of \$10,000.

The only other additional expenses contemplated will be some small items for blank books, transfers, etc. But the last will probably not amount to any thing beyond, if it equal, what is now paid for conveying money to the banks from the land offices.

Should the Treasurer, as recommended in my recent report on the finances, be permitted to receive money in advance for lands, at such points as may be selected by him for public convenience, little or no expense whatever will occur in transfers.

The whole additional expense under the bill mentioned is, therefore, computed not to exceed yearly the aggregate of \$25,000.

Respectfully, yours,

LEVI WOODBURY,  
Secretary of the Treasury.

HON. JAMES K. POLK,

Speaker of the House of Representatives.

Mr. CAMBRELENG, at the request of several members, moved the printing of the statement which he had submitted to the House; which motion was agreed to.

On motion of Mr. PICKENS,

The House then adjourned.

#### IN SENATE,

MONDAY, October 2, 1837.

Mr. ROANE presented a petition from the heirs of Everard Meade, for interest on commutation; which was ordered to lie on the table.

Mr. MORRIS presented a memorial from a number of citizens of Jefferson county, Ohio, against the annexation of Texas to the United States;

Also a memorial from citizens of Hanibal county, New York, against the annexation of Texas; which were laid on the table.

Mr. ALLEN presented a memorial from a number of citizens of Columbiana county, Ohio, against the incorporation of a national bank, and praying an increase of the circulation of gold and silver; which was laid on the table, and ordered to be printed.

Mr. GRUNDY expressed a desire to call up the bill reported by him on Saturday last, (and ordered to a second reading,) in relation to regulating the fees of the district attorneys in cases of renewal of merchants' bonds. He was the more desirous that it should be taken up to-day, because, if the House of Representatives adopted the joint resolution for adjournment on the 9th instant, there would not be an opportunity of passing it this session, and it was a measure greatly needed.

The bill not having been printed, the second reading was delayed, and the Senate passed to the order of the day, viz: the bill imposing additional duties on public officers as depositories in certain cases.

Mr. PRESTON gave notice that, when in order, he would prepare an amendment to the bill making the State banks the special depositories of the accruing revenue.

Mr. BAYARD rose, and spoke near three hours in opposition to the bill, and as not calculated, in any way, to remedy the distress under which the nation labored. He contended it was the imperative duty of Congress, under the Constitution, to furnish a sound metallic currency, and if it did not, the representatives were recreant to their duty; and went into a long argument to show the power delegated under the Constitution. He maintained that the powers of the Government were trust powers for the benefit of the people at large, and not for the purpose of establishing salaries for the President and Secretaries, the mere tools by which the people worked the machinery of Government. The great object of the Union was for the purpose of regulating commerce, and having a sound and uniform currency established. A divorce from the banks he held, under the present state of things, as utterly impracticable, and that it was the bounden duty of Congress to control and regulate those institutions. He maintained that Congress had the power to impose a duty on notes of less than five

dollars, if it saw fit to restrict the issues to notes of a less denomination than ten dollars. He thought the Sub-Treasury system dangerous to the safe-keeping of the public funds, and read a statement of defalcations to show, that under all the restrictions imposed, Government was liable to imposition; and under the system brought forward by the committee in their bill, there were not checks sufficient to guard the public treasure from the hands of such a corrupt agent.

A message was received from the House of Representatives, stating the passage of the joint resolution fixing the day of adjournment on the 9th October, with an amendment, in which the concurrence of the Senate was asked.

Mr. GRUNDY asked the Senate to take up, informally, the "bill regulating the fees of the district attorneys in the renewal of merchants' bonds." No objection being made, the bill was taken up and read a second time.

The bill is as follows:

A BILL to regulate the fees of District Attorneys, in certain cases.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That upon every extension of a custom-house bond, granted under the instructions of the Solicitor of the Treasury, the district attorney shall be entitled to the sum of five dollars, to be paid by the person applying for and obtaining such extension; and no other charge or compensation whatever shall be made or allowed to any district attorney for his services in any case of the extension of a custom-house bond.*

Mr. G. briefly explained the views of the committee in relation to the bill before them. The object was to fix some uniform price for the services of district attorneys in such cases. The fees varied materially in some of the different States, and in some he believed no compensation was allowed. The present sum Mr. G. thought was, according to his judgment, about a fair equivalent. Filing up a bond was not the only duty performed by the district attorneys; they had to look into the conditions of principal and sureties, &c.

Mr. WEBSTER was of opinion that the bill as reported would not reach the mischief—it did not probe deep enough for that. The fees of the Government officers at New York were ten times greater than those of Boston, Baltimore, or Charleston, and he was desirous that they should be restricted within some reasonable limits, for at present they were beyond all reason. The office of the District Attorney of New York produces more than the salary of the President of the United States, and the clerk received more than would pay the annual salary of the Chief Justice of the United States. There was not only gross enormity, but gross inequality in this business, which the bill, in his estimation, was not calculated to cure.

Mr. GRUNDY was of opinion that the bill as reported, covered all that the resolution of the Senator from Massachusetts had referred to. The Senator should have attended to the subject when before the committee. It could not be expected that a full examination of the modes of taking fees as regulated in the different States, would be gone into at a juncture like the present. The committee had prepared an adequate remedy, in its opinion, for the evil complained of. Mr. G. expressed his willingness, however, at a proper time, to go into the subject, and have a thorough reformation of the whole business of fees.

Mr. WEBSTER then proposed the following amendment, which he thought would cover all the ground:

SEC. 2. And that no suit shall be brought, or costs incurred, on any bond, for the renewal of which provision is made by law, unless the party or parties shall neglect to apply for such renewal for more than twenty days after the maturity of such bond.

Mr. BUCHANAN thought the matter required more consideration, and moved to postpone it until to-morrow; which motion was agreed to.

Mr. WRIGHT then rose and delivered his views in relation to the Sub-Treasury bill. Mr. W. met at length the several objections urged against the

system, and vindicated the President, the Secretary of the Treasury, and the Committee on Finance, from the reflections cast upon them, in desiring every thing for the Government, and nothing for the people. He asked if the extension of time on the merchants' bonds was for the good of the Government alone? if extending the time of settlement with the deposit banks did not carry with it relief to the people? He maintained that the bill did not increase the patronage of the General Government, and instanced the case of the collector at New York. Did it increase the patronage because that officer keeps the money himself, instead of paying it over to the banks? The President would have no more control over that officer under the contemplated law, than he has now. So far from increasing Executive patronage, its tendency was to increase Executive responsibility. Mr. W. occupied the floor until near four o'clock.

Mr. CALHOUN moved that the Senate adjourn; he subsequently withdrew his motion at the suggestion of Mr. Walker, who moved to take up the resolution relative to the adjournment, as amended by the House of Representatives, viz: to strike out the 9th and insert the 16th October.

Mr. HUBBARD expressed his dissent from the amendment. He thought the 9th was the proper time, and it was well known, that when the day was definitely fixed there was always a better disposition to get through the business. He therefore hoped the Senate would adhere to the resolution as originally passed.

Mr. GRUNDY was for concurring with the House in their amendment, and giving them to the 16th. It was well known they were behind the Senate in legislation, and it was but reasonable to concur.

Mr. KING of Alabama thought it would be better to wait a day or two before acting on the amendment. If the bill under discussion before the Senate were passed, the 16th would not be time enough for the other House to act on it; on the contrary, if it were not passed, the 9th would be the proper time for adjournment. He would prefer that the matter be laid on the table, though he would not make a motion to that effect.

Mr. BUCHANAN asked gentlemen to consider what might be the effect of sending back the resolution. We might then be kept until the 29th October, or probably not adjourn at all. He thought, therefore, the Senate had better concur at once with the amendment.

The question being taken on concurring with the amendment of the House, it was carried; and

The Senate then adjourned.

#### HOUSE OF REPRESENTATIVES,

MONDAY, October 2, 1837.

The Hon. JOAB LAWLER, a member elect from the State of Alabama, appeared, qualified, and took his seat.

Petitions and memorials were presented by

Messrs. INGRAM of Connecticut.

Mr. LINCOLN of Massachusetts.

Mr. FLETCHER, SLADE, and EVERETT of Vermont.

Mr. TOLAND of Pennsylvania.

Mr. W. C. JOHNSON moved a suspension of the rules for the purpose of submitting a resolution in relation to returning to the Senate the bill for the issue of Treasury notes, on the ground of its being a revenue bill; but the motion was negatived.

Mr. WHITE of Indiana.

[Mr. WHITE of Indiana, presented the petition of James Gregory and others, citizens of Indiana, praying that Madison Collins be placed on the pension roll.]

Mr. LAWLER of Alabama.

Mr. CRARY of Michigan.

#### NATIONAL BANK.

The House then proceeded to the consideration of the unfinished business of the morning hour, being the resolution reported from the Committee of Ways and Means, as follows:

*Resolved, That it is inexpedient to charter a national bank.*

The question pending was the amendment of Mr. WISE, to add to the end thereof "at this time.

And that it will be expedient to charter such a bank whenever the clearly expressed will of the people shall be in favor of the same."

Mr. SERGEANT, who was entitled to the floor, addressed the House in opposition to the adoption of the resolution, until cut off by a motion for the orders of the day, which prevailed.

#### ADJOURNMENT OF CONGRESS.

The House then took up the joint resolution from the Senate fixing the adjournment of the present session of Congress on this day week, the 9th inst.

Mr. HAYNES moved to strike out Monday the 9th, and insert Thursday the 12th.

Mr. JOHNSON of Maryland preferred the amendment, but he was not prepared to vote for any adjournment till Congress had acted on all the measures before it, and afforded some relief to the country. If there were gentlemen whose private interests or public calls of duty called them imperiously home, they could get leave of absence. Mr. J. moved to lay the whole subject on the table.

Mr. PICKENS appealed to the gentleman to withdraw that motion.

Mr. JOHNSON refused.

Mr. BOON thought it extraordinary, if not unprecedented, for a gentleman to make a considerable argument against a proposition, and then deprive any one else of the opportunity of replying, by making a motion that cut off debate.

The motion to lay on the table was lost by a very large majority, there being but very few voices in the affirmative.

Mr. PICKENS adverted to the importance of the great question to be decided at this time, the divorce of the Government from banks, and hoped the House would not adjourn before, if possible, that question was settled. At any rate, he hoped they would extend the time at least another week beyond the period fixed by the Senate.

Mr. CAMBRELENG concurred entirely in the view of the gentleman from South Carolina. It was necessary to do something during this session, and he suggested to the gentleman from Georgia to modify his amendment to Monday the sixteenth instant. He was convinced they could not get through earlier, but he hoped they might by that time.

Mr. HAYNES accepted the suggestion, and modified his motion accordingly. He also expressed his entire concurrence with the views of Mr. Pickens in the necessity of acting upon the great measure he adverted to, and stated that, as a question of economy, the daily pay of the members, from the 16th of October to the first Monday in December, would exceed their travelling pay, and that, for his part, he did not believe the session would be shortened a single hour by adjournment next summer, if they should remain there until the regular time of meeting in December.

Mr. SMITH was opposed to any change of the resolution as it came from the Senate, for if it went back to that body amended, it was impossible to tell when it might return. As for waiting till the "divorce bill" passed the House, if they were to do so, they would have to wait for weeks and months.

Mr. ADAMS moved to amend the amendment by inserting the first Monday in April, 1838, and supported his proposition at length, adverting to the various propositions before the House.

Mr. PATTON could not vote for the last amendment; for it was entirely too early to fix the adjournment of the general session; especially as they had lost all the time of the present session in the general public and private business of the country, by the adoption of the order to take up and consider nothing but what was contained in, or recommended by, the President's Message. He contended, however, that the time proposed in the amendment of the gentleman from Georgia was too short for the deliberation of a measure of such importance as the one adverted to. The Senate, consisting of only fifty members, had been discussing this very bill, the Sub-Treasury scheme, for about three weeks, while a single fortnight was only to be allowed for the discussion not only of that measure, but of the resolution on the subject of a national bank, the Mississippi election, the State bank project, and all, in a body of nearly two

hundred members, consisting of the direct representatives from the people.

Mr. P. moved to postpone the further consideration of the whole subject till Monday next.

Mr. THOMPSON of South Carolina preferred going home as soon as possible, so that members might have an opportunity of consulting their constituents upon a measure which contemplated a change as great in the financial affairs of the country as the invention of gunpowder had wrought in the art of war.

Mr. BOON said if gentlemen were sincere in their desires, and he had no doubt they were, that action was necessary for the well-being of the country, they would sustain him in the motion he should make of demanding the previous question.

Mr. CAMBRELENG hoped not.

The House refused to second the motion—ayes 72, noes 102.

Mr. CAMBRELENG wished to move a suspension of the rules, so as to enable the House to take the question on the amendments without debate.

The CHAIR decided that that motion could not be made.

Mr. WISE did not believe it was the intention of the administration to take up the Sub-Treasury scheme, and he inquired of the Chairman of the Committee of Ways and Means if such was their intention, whether the day of adjournment was fixed for the 9th or the 16th.

Mr. CAMBRELENG would answer the gentleman. He could assure him that he would take the earliest opportunity to call up what the gentleman was disposed to call the Sub-Treasury bill, and, so far from fearing to meet that question, I apprehend, said Mr. C. that gentlemen will find no flinching here upon that subject, and we will see whether the gentleman from Massachusetts, as in a celebrated letter, will "toe the mark." Let us see what the gentleman will do. Let us have no non-committalism.

In conclusion, he assured the gentleman, that whether they sat there for one week or two weeks, or even for six months, he should take the earliest opportunity of bringing that measure forward, after having disposed of the different measures of relief proposed for the country.

Mr. WISE was still convinced that there was no serious intention of acting on the Sub-Treasury bill.

In reference to the adjournment, Mr. W. said he came there to administer relief to the people; and, with the gentleman from Massachusetts, was ready to remain there not only till the first Monday in April next, but for twelve months if necessary. He said that every movement made there convinced him that the administration had no intention of carrying out that plan. He hoped that the opposition, conservative and all, would unite in remaining there until it was fairly demonstrated that it was the friends of the administration who adjourned without giving relief to the country.

Mr. GLASCOCK, after some preliminary remarks, expressed himself in favor of the 12th; and if that did not prevail, he should prefer adjourning on the 9th. He hoped, however, the motion to postpone would be rejected.

Mr. HAMER adverted to the several relief bills on the Speaker's table, and considered that two weeks would afford ample time for a reasonable discussion upon every one of them.

The motion to postpone was then put, and disagreed to; and the question recurring on the proposition to insert the 16th instead of the 9th—

Mr. SMITH asked for the yeas and nays thereon, which were ordered, and were—yeas 115, nays 103, as follows:

YEAS—Messrs. Alexander, Heman Allen, Anderson, Andrews, Atherton, B. Atty, Bell, Bicknell, Bidle, Birdsall, Brodhead, Bronson, Bynum, Cambreleng, John Campbell, William B. Carter, Chaney, Cheatham, Cilley, Cleveland, Clowney, Coles, Connor, Crary, Crockett, Cushman, DeGraff, Dringooole, Duncan, Edwards, Ewing, Farrington, Foster, Fry, Gallup, Gholson, James Graham, Grantland, Grant, Graves, Gray, Griffin, Hamer, Harlan, Harrison, Hawes, Haynes, Herold, Hoffman, Holsey, Holt, Hopkins, Howard, Hubley, William H. Hunter, Thomas B. Jackson, Jabez Jackson, Joseph Johnson, William Cost Johnson, Nathaniel Jones, John W. J. nes, Kemble, Lawler, Legare, Leadbetter, Arphaxed Loomis, James M. Mason, Manry, McKay, Robert McClellan, McClure, McKim, Menefee, Mercer, Miller, Montgomery, Morgan, Samuel W. Morris, Muhlenberg, Noble, Ozle, Owens, Palmer, Parker, Parmenter, Patton, Paynter, Pennybacker,

Pettriken, Phelps, Pickens, Pope, Potts, Pratt, Prentiss, Ridgway, Rives, Robertson, Shaffer, Slade, Southgate, Spencer, Stewart, Taliaferro, Taylor, Titus, Toland, Toucey, Turney, Vail, Webster, Weeks, Albert S. White, Thomas T. Whiteley, and Wise—115.

NAYS—Messrs. Adams, John W. Allen, Aycrigh, Beirne, Bond, Boon, Borden, Briggs, Buchanan, William B. Calhoun, John Calhoun, William B. Campbell, Casey, Chambers, Chapman, Childs, Corwin, Craig, Cranston, Curtis, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, Evans, Everett, Fairfield, Richard Fletcher, Filmore, Rice Garland, Glascock, Goode, William Graham, Haley, Hall, Halsead, Hammond, Hastings, Hawkins, Henry, Ingham, Jenifer, Henry Johnson, Kilgore, Klingensmith, Lincoln, Logan, Andrew W. Loomis, Lyon, Marvin, Samson Mason, Martin, May, Maxwell, Abraham McClellan, McKennan, Milligan, Matthias Morris, Calvary Morris, Murray, Naylor, Noyes, Patterson, Pearce, Peck, Phillips, Plumer, Potter, Rariden, Randolph, Read, Reilly, Rencher, Richardson, Rumsey, Russell, Augustine H. Shepperd, Charles Shepard, Shields, Shipley, Sibley, Smith, Snyder, Stanley, Stratton, Thompson, Tillingshast, Towns, Underwood, Vanderveer, Wagener, John White, Elisha Whiteley, Lewis Williams, Sherrod Williams, Jared W. Williams, Joseph Williams, Christopher H. Williams, Yell, and Yorke—103.

So the amendment was agreed to.

Mr. MERCER moved to postpone the further consideration of the resolution till the first Monday in April next, and asked for the yeas and nays; but the House refused to order them, and rejected the motion without a division.

The question recurring on the adoption of the resolution as amended,

Mr. WILLIAMS, of Kentucky, asked for the yeas and nays, which were ordered, and were—yeas 153, nays 65, as follows:

YEAS—Messrs. Alexander, Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Bidle, Birdsall, Boon, Borden, Briggs, Brodhead, Bronson, Bruyn, Buchanan, Cambreleng, J. Campbell, Timothy J. Carter, Casey, Chambers, Chaney, Chapman, Cilley, Cleveland, Clowney, Coles, Connor, Corwin, Craig, Crary, Curtis, Cushman, Darlington, Dawson, Darce, Davies, Deberry, DeGraff, Dringooole, Duncan, Dunn, Edwards, Evans, Ewing, Farrington, Fairfield, Isaac Fletcher, Foster, Fry, Gallup, Glascock, James Graham, William Graham, Grantland, Grant, Gray, Grennell, Haley, Hall, Halsead, Hammond, Hamer, Harlan, Harrison, Hawkins, Haynes, Henry, Heald, Holsey, Holt, Hopkins, Howard, Hubley, William H. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, Klunzen-smith, Lawler, Legare, Leadbetter, Lincoln, Logan, Arphaxed Loomis, Andrew W. Loomis, Lyon, James M. Mason, Martin, Maxwell, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, McKennan, Miller, Montgomery, Moore, Morgan, Samuel W. Morris, Muhlenberg, Noble, Noyes, Ogile, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Pettriken, Phelps, Pickens, Plumer, Potts, Potter, Pratt, Prentiss, Rariden, Randolph, Reed, Reilly, Rencher, Richardson, Ridgway, Rives, Russell, Shaffer, Augustine H. Shepperd, Shipley, Slade, Spencer, Stewart, Stratton, Taylor, Titus, Toland, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Weeks, Albert S. White, John White, Thomas T. Whiteley, and Jared W. Williams—153.

NAYS—Messrs. Adams, Heman Allen, John W. Allen, Bell, Bond, William B. Calhoun, John Calhoun, William B. Campbell, William B. Carter, Cheatham, Childs, Cranston, Crockett, Elmore, Everett, Richard Fletcher, Filmore, Rice Garland, Goode, Graves, Griffin, Hastings, Hawes, Robert M. T. Hunter, Jenifer, Henry Johnson, Joseph Johnson, William Cost Johnson, Lewis, Marvin, Samson Mason, Maury, May, Menefee, Mercer, Milligan, Matthias Morris, Calvary Morris, Murray, Naylor, Patterson, Patton, Pearce, Peck, Phillips, Pope, Robertson, Rumsey, Charles Shepard, Shields, Sibley, Snyder, Southgate, Stanley, Taliaferro, Tillingshast, Underwood, Webster, Elisha Whiteley, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Yell, and Yorke—65.

So the resolution, as amended by inserting the 16th, was concurred in by the House.

#### MISSISSIPPI ELECTION.

The House then proceeded to the consideration of the business of the morning hour being the report of the Committee of Elections, which was accompanied by the following resolution:

Resolved, That Samuel J. Gholson and John F. H. Claiborne are duly elected members of the Twenty-fifth Congress, and as such are entitled to take their seats.

The question pending was the motion of Mr. MAURY to strike out all after the word "resolved," and insert, "that Samuel J. Gholson and John F. H. Claiborne, not being duly elected members of the House of Representatives of the Twenty-fifth Congress of the United States, are not entitled to seats on this floor as such."

Mr. BUCHANAN addressed the House briefly in support of the report of the Committee of Elections.

The hour of half past two having arrived, the House took the usual recess, until four o'clock.

#### [EVENING SESSION.]

#### MISSISSIPPI ELECTION.

The House resumed the consideration of the report of the Committee of Elections, on the subject of the election in the State of Mississippi.

The question being on the adoption of the resolution declaring Messrs. Gholson and Claiborne entitled to their seats for the 25th Congress, and the immediately pending one being on the amendment of Mr. MAURY, declaring those gentlemen not duly elected—

Mr. LEGARE, who was entitled to the floor, contended that if Messrs. Gholson and Claiborne were elected at all, they were elected members for the ensuing two years. This was clear, beyond all controversy. The election had been held and conducted throughout in the strictest conformity with the laws of the State of Mississippi. The writ had been issued in due time, the proclamation of the Governor had been made precisely at the time it ought to have been; and the whole election was carried on throughout according to law. The whole people of the State of Mississippi had been deeply interested in the contest: they attended the polls in full numbers, and decided the election of the gentlemen present by a very large majority. The question then was, whether this election, which was complete in all its parts, exact in all its forms, and decisive beyond all controversy, was to be set aside as a mere nothing, the voice of a whole State stifled, and their representatives sent back. Mr. L. then quoted largely from "Binney on the Kentucky Election," and entered into a long argument to show that the election was strictly legal, and not at variance with the spirit and letter of the Constitution.

Mr. UNDERWOOD said that in reference to this particular election, he could suggest a plausible reason why the present members should retain their seats—a reason which had not as yet been urged, and to which he confessed he should be puzzled to find an objection. It was this: The House of Representatives was composed of members chosen every second year; and the Constitution said that the States should regulate the manner and time of choosing them, unless Congress should interfere. The State of Mississippi had acted in accordance with this provision, and had elected her representatives to serve for the ensuing two years. The time of their election had not yet expired; and if they had been permitted to retain their seats to this period, in that view of the case, he would confess that if the objection were urged, he should be puzzled to set it aside. Under the letter of the Constitution, there was nothing to prohibit it.

Mr. MASON of Ohio thought, that if the Governor of the State of Mississippi, with all his legal knowledge, both of the State law, and that of the Constitution, was of opinion that the terms of election would expire with the present session, (and that was his opinion, he having inserted a clause in the writ to that effect,) then it would be a fair inference to suppose that the people of the State of Mississippi had a similar impression.

Mr. GHOLSON hoped the gentleman would allow him to state that, at the time of his and his colleague's election, there was not the slightest doubt among the people of Mississippi but that, whoever were elected, were elected for the whole term of the twenty-fifth Congress.

Mr. MASON disclaimed any disrespect to the gentlemen from that State, but had merely stated what, in his opinion, was a fair inference, without knowing any thing about facts. He then went on to give his reasons why he could not vote for the resolution reported by the committee. After which, on motion of Mr. HAYNES,

The House adjourned.

#### IN SENATE,

TUESDAY, October 3, 1837.

No petitions or resolutions having been offered, the Senate proceeded to the

#### ORDER OF THE DAY,

The bill imposing additional duties on public officers as depositaries in certain cases.

Mr. CALHOUN rose, and delivered his views in favor of the bill, and was followed by Mr. WEBSTER in reply. Mr. BUCHANAN replied briefly to Mr. WEBSTER; after which the question on Mr. CALHOUN'S amendment was taken by yeas and nays, when there appeared for the amendment 24, against it 23, as follows:

YEAS—Messrs. Allen, Benton, Brown, Buchan-

an, Calhoun, Clay of Alabama, Fulton, Grundy, Hubbard, King of Alabama, Linn, Morris, Niles, Norvell, Pierce, Roane, Sevier, Smith of Connecticut, Strange, Walker, Wall, Williams, Wright, and Young—24.

NAYS—Messrs. Bayard, Black, Clay of Kentucky, Clayton, Crittenden, Kent, King of Georgia, Knight, McKean, Nicholas, Prentiss, Preston, Rives, Robbins, Robinson, Smith of Indiana, Southard, Spence, Swift, Tallmadge, Tipton, Webster, and White—23.

The question was then taken on substituting the bill of Mr. RIVES, "designating the funds receivable in payment of the revenues of the United States," and decided in the negative—ayes 22, nays 26, as follows:

YEAS—Messrs. Bayard, Black, Clay of Kentucky, Clayton, Crittenden, Kent, King of Georgia, Knight, McKean, Nicholas, Prentiss, Preston, Rives, Robbins, Smith of Indiana, Southard, Spence, Swift, Tallmadge, Tipton, Webster, and White—22.

NAYS—Messrs. Allen, Benton, Brown, Buchanan, Calhoun, Clay of Alabama, Fulton, Grundy, Hubbard, King of Alabama, Linn, Lyon, Morris, Niles, Norvell, Pierce, Roane, Robinson, Sevier, Smith of Connecticut, Strange, Walker, Wall, Williams, Wright, and Young—26.

The question was then taken by yeas and nays on the amendment offered by Mr. PRESTON, to make the State banks the special depository of the accruing revenue of the United States, and decided in the negative—yeas 22, nays 26, as follows:

YEAS—Messrs. Bayard, Black, Clay of Kentucky, Clayton, Crittenden, Kent, King of Georgia, Knight, McKean, Nicholas, Prentiss, Preston, Rives, Robbins, Smith of Indiana, Southard, Spence, Swift, Tallmadge, Tipton, Webster, and White—22.

NAYS—Messrs. Allen, Benton, Brown, Buchanan, Calhoun, Clay of Alabama, Fulton, Grundy, Hubbard, King of Alabama, Linn, Lyon, Morris, Niles, Norvell, Pierce, Roane, Robinson, Sevier, Smith of Connecticut, Strange, Walker, Wall, Williams, Wright, and Young—26.

The amendment offered by Mr. BUCHANAN, was modified and agreed to.

An amendment was then offered by Mr. MORRIS, that no notes should be received for the public dues, of a less denomination than ten dollars, and which were not payable where issued.

Mr. STRANGE moved to amend the amendment of Mr. MORRIS, so as to strike out the restriction as to notes under five dollars. The question being taken by yeas and nays—there appeared for it 24, against it 20, as follows:

YEAS—Messrs. Bayard, Brown, Calhoun, Clay of Alabama, Clayton, Fulton, Grundy, Hubbard, Kent, King of Alabama, Knight, Linn, Lyon, Nicholas, Prentiss, Roane, Robbins, Sevier, Spence, Strange, Swift, Wall, Wright, and Young—24.

NAYS—Messrs. Allen, Benton, Black, Buchanan, Clay of Kentucky, Davis, King of Georgia, McKean, Morris, Niles, Norvell, Pierce, Rives, Robinson, Smith of Connecticut, Smith of Indiana, Tipton, Walker, White, and Williams—20.

The question was then taken on Mr. MORRIS amendment; which was adopted.

The bill then having been reported to the Senate as amended, was ordered to be engrossed for a third reading, by the following vote:

YEAS—Messrs. Allen, Benton, Brown, Buchanan, Calhoun, Clay of Alabama, Fulton, Grundy, Hubbard, King of Alabama, Linn, Lyon, Niles, Norvell, Pierce, Roane, Robinson, Sevier, Smith of Connecticut, Strange, Walker, Wall, Williams, Wright, and Young—25.

NAYS—Messrs. Bayard, Black, Clay of Kentucky, Clayton, Crittenden, Davis, Kent, King of Georgia, Knight, McKean, Nicholas, Prentiss, Preston, Rives, Robbins, Smith of Indiana, Southard, Spence, Swift, Tallmadge, Tipton, Webster and White—23.

The bill is in the following words:

A BILL imposing additional duties as depositaries, in certain cases, on public officers.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress

assembled, That the Treasurer of the United States, the treasurers of the Mint and its branches, all collectors of the customs, and surveyors acting in that capacity, all receivers of public money, and postmasters, be, and they are hereby, required to keep safely, without loaning or using, all the public money collected by them, or otherwise, at any time placed in their possession, till the same is ordered by the proper department to be transferred or paid out; in which cases, the transfers and payments shall be faithfully made by them as directed, and all other duties performed as fiscal agents, which may be imposed by this or former acts of Congress, or by any regulation of the Treasury Department made in conformity thereto.

SEC. 2. And be it further enacted, That all marshals, district attorneys, and others having public money to pay over, and all patentees wishing to make payment to the United States, may make the same to the Treasurer in this city, or to the Mint and its branches, when near or convenient; and, when not, may deposit the same with such collector, receiver, or other depository, as may be more conveniently situated, and may be selected for that purpose by the Secretary of the Treasury.

SEC. 3. And be it further enacted, That whenever the public money in the possession of any depository, by collection, transfer, or payment, shall be inconveniently situated for public use, or shall accumulate so as to exceed the amount of the existing bond of any such officer, any part of it, or the excess (as the case may be) shall either be drawn out for payments, or be transferred elsewhere to some other depository; or the Secretary of the Treasury shall require such additional security as may be considered proper and safe; and in the mean time, bonds, new and suitable in their terms, shall in all cases, at as early a day as possible after the passage of this act, be required of all depositories, in such sums and form as may be deemed reasonable and secure by the Solicitor of the Treasury, for the performance of all the duties required under the same or any previous laws.

SEC. 4. And be it further enacted, That the said officers respectively may be allowed any necessary additional expenses for clerks, fire-proof chests, or vaults, or other necessary expenses of safe-keeping, transferring, and disbursing said moneys; all such expenses of every character to be first expressly authorized by the Secretary of the Treasury, whose directions upon all the above subjects by way of regulation and otherwise, are to be strictly followed by all the said officers.

SEC. 5. And be it further enacted, That the Secretary of the Treasury shall be, and he is hereby, authorized to cause examinations to be made of the books, accounts, and money on hand, of the several officers charged by this act with the safe-keeping, transfer and disbursement of the public moneys; and for that purpose to appoint special agents, as occasion may require, with such reasonable compensation as he may allow, to be fixed and declared at the time of each appointment; which said examinations, in all cases where the sum on hand usually exceeds three-fourths of the amount of the officer's bond, shall not be made less frequently than once in each year, and as much more frequently, in those and all other cases, as the Secretary, in his discretion, shall direct. The agents selected to make these examinations shall be instructed to examine as well the books, accounts, and returns of the officer, as the money on hand, and the manner of its being kept, to the end that uniformity and accuracy in the accounts, as well as safety to the public moneys, may be secured thereby.

SEC. 6. And be it further enacted, That, in addition to the examinations provided for in the last preceding section, as a further guard over the public moneys, it shall be the duty of each naval officer and surveyor, as a check upon the collector of the customs of their respective districts; of each register of a land office, as a check upon the receiver of his land office, and of the director and superintendent of each mint and branch mint, as a check upon the treasurers, respectively, of the said mints, at the close of each quarter of the year, and as much more frequently as they shall be directed to do so by the Secretary of the Treasury, to examine the books, accounts, returns, and money on hand,

[Continued from No. 6.]

of the collectors, receivers, and treasurers, and to make a full, accurate, and faithful return to the Treasury Department of their condition.

SEC. 7. *And be it further enacted*, That the Secretary of the Treasury shall, with as much expedition as the convenience of the public business and the safety of the public funds will permit, withdraw the balances remaining with the late and present depositories of the public moneys, and confine the safe-keeping, transfer, and disbursement of those moneys, to the depositories established by this act.

SEC. 8. *And be it further enacted*, That, for the payment of the expenses authorized by this act, a sufficient sum be, and the same is hereby, appropriated, to be paid out of any money in the Treasury not otherwise appropriated.

SEC. 9. *And be it further enacted*, That all officers charged by this act with the safe-keeping, transfer, and disbursement of the public money, are hereby required to keep an accurate entry of each sum received, and of the kind of money in which it is received, and of each payment or transfer, and of the kind of currency in which they are made; and that if any one of the said officers shall convert to his own use, in any way whatsoever, or shall use by way of investment in any kind of property or merchandise, or shall loan with or without interest, any portion of the public moneys intrusted to him for safe-keeping, disbursement, transfer, or for any other purpose, every such act shall be deemed and adjudged to be an embezzlement of so much of the said moneys as shall be thus taken, converted, invested, used, or loaned, which is hereby declared to be a high misdemeanor; and any officer or person convicted thereof before any court of the United States of competent jurisdiction; shall be sentenced to imprisonment for a term of not less than two, nor more than five, years, and to a fine equal to the amount of the money embezzled.

SEC. 10. *And be it further enacted*, That, from and after the thirty-first day of December, eighteen hundred and thirty-eight, the resolution of eighteen hundred and sixteen, authorizing the receiving of notes of specie paying banks in dues to the Government, shall be so repealed that only three-fourths of the amount due to the Government, for duties, taxes, sales of public lands, or other debts, may be received in the notes of specie paying banks; and that, from and after the thirty-first day of December, eighteen hundred and thirty-nine, one-half may be so received; and, from and after the thirty-first day of December, eighteen hundred and forty, one-fourth: *Provided*, That the notes of no bank shall be received which shall refuse to receive in payment and deposit, at par with gold and silver, such Treasury notes or bills as Congress shall authorize to be received, by law, in the public dues: *Provided further*, That no bank note of a less denomination than ten dollars, or which note shall not be payable when issued, shall be receivable into the Treasury of the United States; and, from and after the thirty-first day of December, eighteen hundred and forty-one, all sums due for duties, sales of public lands, or other debts to the Government, and all payments to the General Post Office, shall be paid in gold and silver coin only, or in such notes, bills, or paper, issued under the authority of the United States, as may be directed to be received by law; and, from and after the said thirty-first day of December, in the year eighteen hundred and forty-one, every officer or agent engaged in making disbursements on account of the United States, or of the General Post Office, shall make all payments in gold and silver coin only, or in such notes, bills, or paper, issued as aforesaid, when authorized by law; and any receiving or disbursing officer or agent, who shall neglect, evade, or violate the provisions of this section, shall be dismissed the service, and shall forfeit all compensation which may then be due him.

SEC. 11. *And be it further enacted*, That it shall be the duty of the Secretary of the Treasury to pre-

scribe regulations to enforce the speedy presentation of all Government drafts for payment, at the places where payable, and to prescribe the times, according to the different distances of the depositories, within which they shall be presented for payment; and in default of such presentation, to prescribe any other mode and place of payment which he may deem proper.

The CHAIR presented a report from the War Department from the president of the board of officers appointed to examine certain new inventions in fire arms: laid on the table, and ordered to be printed.

On motion of Mr. CLAY of Alabama,  
The Senate adjourned.

## HOUSE OF REPRESENTATIVES, TUESDAY, October 3, 1837.

On motion of Mr. SMITH,  
Mr. EVANS of Maine obtained leave of absence from and after Monday next.

Petitions and memorials were presented by  
Mr. MARTIN of Alabama.  
Messrs. NAYLOR and DARLINGTON, of Pennsylvania.

Mr. MAXWELL of New Jersey.  
Mr. FILMORE of New York.  
[Mr. FLETCHER presented—

A memorial of the inhabitants of the town of Concord, county of Essex, State of Vermont, against the annexation of Texas to the Union.

A memorial of S. A. Chandler and thirty-three others, of Peacham, county of Caledonia, Vermont, against the annexation of Texas.

A remonstrance of one hundred and forty-one women, of Berlin, county of Washington, State of Vermont, against the annexation of Texas to the United States.

A remonstrance of Joseph Flagg and thirty-three others, inhabitants of Wheelock, Vermont, against the admission of Texas.

A remonstrance of ninety-two women, of Warren, Washington county, State of Vermont, against the annexation of Texas to the Union.

A remonstrance of L. P. Parks, of Barnet, Vermont, and fifteen others, against the admission of Texas to the Union.

A petition of S. A. Chandler and thirty-three others, of Peacham, county of Caledonia, Vermont, for the abolition of the slave trade in the District of Columbia.

A petition of ninety-two women, of Warren, Washington county, Vermont, for the abolition of the slave trade in the District of Columbia.

A petition of the inhabitants of Concord, county Essex, Vermont, for the abolition of slavery in the District of Columbia.

A petition of one hundred and forty-one women, of Berlin, Washington county, Vermont, for the immediate abolition of slavery and the slave trade in the District of Columbia.

A petition of one hundred and fifty-six women, of Waitsfield, Washington county, Vermont, for the immediate abolition of slavery in the District of Columbia.]

Messrs. ADAMS and PARMENTER, of Massachusetts.

[Mr. PARMENTER presented the petition of Geo. W. Story and 78 others, of Carlisle, and Ezra Ripley and 127 others, of Concord, both of the county of Middlesex, Massachusetts, against the annexation of Texas to the American Union.]

Mr. DAVEE of Maine.

## MISSISSIPPI ELECTION.

The House then proceeded to the consideration of the business of the morning hour, being the report of the Committee of Elections, which was accompanied by the following resolution:

*Resolved*, That Samuel J. Gholson and John F. H. Claiborne are duly elected members of the twenty-fifth Congress, and as such are entitled to take their seats.

The question pending was the motion of Mr. MAURY to strike out all after the word "resolved,"

and insert, "that Samuel J. Gholson and John F. H. Claiborne, not being duly elected members of the House of Representatives of the twenty-fifth Congress of the United States, are not entitled to seats on this floor as such."

Mr. HAYNES said that, until particular circumstances had called his attention to the subject of discussion yesterday, he had not intended to participate in it. But, as his own views had not been presented by any one, he would offer them very briefly to the House.

In the various definitions which had been given of the term vacancy, and the circumstances which could produce it, he thought gentlemen had confined themselves to a too nice and rigid technicality. To enable us to arrive at a just conclusion, it is necessary to consider the purpose of the Federal Convention in organizing the Congress of the United States. What, then, was that purpose? It was to create a perpetuity in the office of each. He then placed himself on the ground, and announced the proposition, which he was sure no one could controvert, that the representative office is a perpetual office in the plain contemplation and meaning of the Constitution. If he was correct in his position—and he believed it to be impregnable—it follows, as a necessary consequence, that there should be perpetual succession in that office. Gentlemen had discussed the meaning of the term casualty, in reference to a vacancy, with, as he believed, the same confined and erroneous notion of it which they had applied to the term vacancy. They seemed to consider it as only applicable to the act of the incumbent of an office, or the providence of God in removing him from it, when its fair and legitimate import made it equally applicable to the party possessing the power and the right to fill such office. If the representative office is perpetual, and if it implies perpetual succession, there is no further difficulty in the present case. The inevitable consequence must that, be whenever the perpetuity of succession is broken, no matter whether it be occasioned by the individual who previously filled the office, or by the negligence or otherwise of the constituent holding the power of appointment in his hands, there results a vacancy. And in carrying out our inquiry, it is proper to look back to the period when the Constitution went into operation. The representative office is for the term of two years; and in setting the new system in motion, its operation commenced on the fourth of March, 1789; thus fixing the time from which the constitutional period is to be estimated. All the elections to Congress were computed in anticipation of it; and on that day, or near to it, was the first session of Congress under our present organization commenced.

He said the views he had presented received confirmation from the fact, that at the present time a majority of the States which formed the Constitution, consisting of Massachusetts, New York, New Jersey, Pennsylvania, Delaware, South Carolina, and Georgia, and the States of Maine and Vermont, since formed of a portion of them, and sending here a large majority of representatives from the original thirteen States—a majority of one hundred and eighteen to fifty-five—keep up a perpetual succession in this House.

But to show the mischievous operation of a different doctrine, it would be sufficient to state, that there was an actual House of Representatives existing on the 4th of March last, by the previous election of at least one hundred and forty members, constituting a constitutional quorum for the transaction of business. Suppose some great national contingency had then made it the duty of the President to convene Congress at the earliest practicable period? There was a constitutional quorum for business in existence, and no one can deny the constitutional power of the Executive, under the emergency supposed, to call them together. But although a quorum might have been so convened, a majority of the States would have been unrepresented for

months, according to the doctrine contended for, that no such vacancy existed as authorized the exercise of Executive authority to fill it according to the provisions of the Constitution. And here gentlemen had mistaken the true point, by presuming that all which ought to have been done, either by the Legislatures of the respective States or the Congress, had been done in this matter. But how stands the case? If the representative office is perpetual, and if that perpetuity implies, as it most unquestionably does imply, perpetual succession, it follows, as a consequence, that neither the one nor the other has come up to the intention of the Constitution, so far as the States which have postponed their Congressional election beyond the commencement of the term are concerned. If, then, by the negligence of those States, and of Congress, the perpetuity of succession has been broken, how can that deprive the Governor of his constitutional right, or excuse him from his high constitutional obligation, to see that the vacancy shall be filled? There is certainly no conflict between the rights of the States or of Congress on the one hand, and the Governor on the other, under this view of the subject. It was made the duty of the States, and in default of it, of Congress, to keep up a constant succession in the representative body. And in the failure of either to do so, the right and the duty of the Governor of a State requires of him to supply the omission.

Nor is this view derogatory to the rights of the people, but in support and affirmance of them. In the case already supposed, of a convention of Congress at the commencement of the constitutional term, according to the doctrine advanced by those who oppose the regularity of the Mississippi election, nearly two-thirds of the States would have been unrepresented for months, and their constituents unheard in this body. But, upon the doctrine advanced by him, Mr. H. said the omission of the State legislatures and of Congress would be supplied, and every State represented in this House as it should be, without the least possible delay. But he would go one step farther with his argument, and say, that as the representative office is perpetual, and as that implies perpetual succession, if the State legislature and Congress shall so leave it, that on the 4th of March, corresponding with the biennial commencement of the representative term in this House, any State shall be unrepresented, a vacancy has happened on which arises the power and the obligation of the Governor to cause it to be filled.

He said he was aware that this might be considered a novel doctrine, but it was the legitimate consequence of his original proposition: the *perpetuity of the representative office*; and he had already shown that the people were deeply interested in the establishment of the doctrine. If his premises and conclusion were legitimate, the honorable gentlemen claiming a right to seats in this House as representatives from the State of Mississippi, are as much entitled to them as any members belonging to it.

Mr. SLADE contended neither the resolution nor the amendment took the true ground. He did not believe that the members elected were entitled to hold their seats during the entire continuance of the 25th Congress, and he did believe they were entitled to seats at the extra session; and if any gentleman would bring forward a proposition to this effect, he would vote for it. He was not in favor of the amendment, but if he was compelled to decide between it and the original resolution, he would be compelled to vote for it. From the most careful examination which he could give the subject, he had come to the conclusion that such a vacancy had happened as was contemplated by the Constitution. He contended that the Governor had the power to fill up this vacancy, by issuing his writ of election to fill the vacancy until the time of the regular election under the Constitution of the State, and went into a lengthy argument in support of this view of the case.

Mr. TILLINGHAST thought it perfectly manifest that the people of Mississippi intended to have representatives in Congress at the present extra session, and he was glad that by the rules of the House the gentlemen were permitted to take seats

at the present session of Congress, because he was always willing to take into account the will of the constituency. It was assumed, however, that the people believed at the time of the election, that they were electing representatives for the twenty-fifth Congress; but this he took to be an improper assumption; because the people were only authorized by the Governor to vote for members to the extra session of Congress, and therefore it was but fair to presume, that the people were not generally of opinion that they were electing members for the whole of the Twenty-fifth Congress. They were led to believe by the proclamation of the Governor, that the term of those they were voting for would expire at the time when the existing law of the State provided that the election for members of Congress should take place. He contended that it was not in the power of the Governor to authorize an election for the whole of the 25th Congress; because, if the Governor was clothed with this power, he could set aside the laws of the State entirely. He contended that the real difficulty in relation to the Mississippi election was defective legislation; because the Legislature had not provided for the exigency which might arise in case of a call of an extra session of Congress immediately after the fourth of March. It appeared to him that the proper course would have been for the Governor to call the Legislature to provide the means of filling up the vacancy which had occurred, and cited the late election in Rhode Island as an illustration of his idea. There the Legislature provided for the case of an earlier election of Representatives to Congress, and no one dreamed that this difficulty would be remedied by the Governor issuing his writ of election to supply the vacancy.

Mr. HOWARD had supposed it was conceded on all hands that we must come to one or two decisions on this question, and that there was no such middle ground as that assumed by the gentleman from Vermont, (Mr. Slade,) and that was, that we must either adopt the report of the committee, or the amendment submitted by a member of the minority. He had thought that gentlemen on all hands had conceded that these two gentlemen were either members of the Twenty-fifth Congress, or that they were not members at all. But the gentleman from Vermont had taken a middle ground, and says he believes these two gentlemen elected to fill the vacancy during the extra session of Congress; yet he brings forward no proposition, and declares, notwithstanding, that he believed these gentlemen members of the extra session, that he will vote for the amendment pending, thereby expelling those gentlemen from the House during the present session; because, if the vote was taken to-day, and the amendment carried, they would not be entitled to seats to-morrow.

Although the gentleman admitted that the people of Mississippi were entitled to have representatives at the present extra session, yet he is prepared to deprive them of their representatives to-morrow. They had been told by the gentleman from Mississippi on yesterday, that the people of that State elected them under the impression that they were electing members for the whole of the Twenty-fifth Congress, and that scarcely a man in Mississippi thought that the election was merely for the extra session; and he took it that there was the strongest evidence of this being the case, exhibited by the fact that there was now but one person in Mississippi who had brought himself to the notice of the people of Mississippi for election in November. If the people of the State believed that these gentlemen were not elected for the whole of the Twenty-fifth Congress, he imagined they would be making every preparation for the election in November next. Congress, he contended, was an entire body, and could not be made up of one set of men for two months, and another set of men for the remainder of the term. The members all came in at one time, and all went out at one time. They might be compared to the changes of a stage coach, which, having run its stage, had an entire change of horses; but according to the construction of the gentleman from Vermont, he would be stopping at every mile to introduce a new horse. He contended that the people were entitled to the benefit of the whole of the time of a representative, or of a set of

representatives, and that it would be entirely improper to have one set of men at the commencement of a Congress, when the President presented the state of the country to the view of the House, and another set two months afterwards, who knew nothing of these subjects. Gentlemen had contended that no vacancy had occurred in the representation from the State of Mississippi, and that if the two representatives were removed to-morrow, by a vote of the House, there would be no vacancy. If the representatives from that State were removed from the House by a vote of the House to-day, he would ask any gentleman whether there would not be a vacancy in their seats? He would point to those vacant seats, and ask gentlemen if no vacancy had occurred in the representation from the State of Mississippi. Oh! but say gentlemen, this is not such a vacancy as is contemplated by the Constitution. This he took to be a very forced construction of the word vacancy. Mr. M. then referred to Elliot's debates on the adoption of the Constitution, to show that it was the intention of the framers of the Constitution to make the clause in relation to the vacancy apply to all cases of vacancy, no matter in what manner it might occur; and he also referred to the opinion of Judge Story on a case of vacancy in the office of a foreign minister, in which there had been a difference of opinion between the Senate, or a portion of the Senate, and President Madison; and it was stated in the work of Judge Story that the Senate had entered a protest against a certain appointment made by President Madison.

Mr. ADAMS rose, and stated that it was a mistake in Judge Story, in saying that a protest had been entered by the Senate, in relation to the appointment alluded to. A Senator from Massachusetts had brought forward a proposition, declaring the appointment alluded to illegal and unconstitutional, and the subject was debated to the close of that session, without coming to any conclusion, and was again resumed at the commencement of the next session; and after as patient deliberation as the Senate ever gave to any subject, it was indefinitely postponed by a vote of the majority of the Senate; so that there never was any protest by the Senate against the appointment. And now, if he might be permitted to say one word, he would give his understanding of this word "happen" in cases of vacancies. He believed, in relation to offices, that every one happens to be vacant which is not full, and that he believed was the sense and meaning of the Constitution, whether the vacancy occurred from casualty, the regular course of events, expiration of term, or other cause. In relation to the offices of public ministers, they were not offices created by the laws or the Constitution, but were offices known to the laws of nations, and created by the laws of nations. Ministers were sent to every part of the world by the President, and whenever there is a necessity for the appointment of such minister, that office is vacant. This was what he understood by the term vacant, and he believed this was the understanding of every President of the United States.

Mr. HOWARD was glad the gentleman from Massachusetts had had an opportunity of explaining, as he considered his opinion as having very great weight in this matter. It had demolished the structure raised by the gentleman from Ohio [Mr. Mason] entirely.

Mr. MASON explained, and contended that the remarks of the gentleman from Massachusetts had not effected the argument he had used, or the authority he had referred to.

Mr. HOWARD resumed, and contended that it was not in the power of the Legislature of a State to prevent the people from having a representation in Congress. If the Legislature neglected to provide for having the people represented on all occasions in the House of Representatives, then it was the duty of the Governor of a State to provide that the vacancy should be filled, as it was the right of the people always to be represented. According to his understanding of what the intention of the framers of the Constitution was in relation to this matter, he believed it was intended that, if the Legislature failed to make provision for filling all vacancies which might exist, then it was the

duty of the Governors of the States to provide for the case; and that the power of regulating this matter was only intended to rest with Congress in cases of great emergency. This was what he understood to be the spirit and meaning of the Constitution of the United States.

The subject was further discussed by Messrs. LINCOLN and HASTINGS, in opposition to the report of the committee, and by Mr. LOOMIS of New York in its support, till half-past two o'clock, when the House took its usual recess till 4 o'clock.

#### [EVENING SESSION.]

The SPEAKER laid before the House a communication from the Secretary of the Treasury, in answer to a resolution of the House, calling upon him to communicate to the House all the correspondence between that Department and any individuals or banks, relative to a bill now before Congress, to authorize the President to direct the issue of Treasury notes; which, on motion of Mr. GRENNELL, was laid on the table and ordered to be printed.

The SPEAKER also laid before the House a communication from the Secretary of the Treasury, in answer to a resolution calling upon him to communicate to this House the returns of receivers of public moneys, in pursuance of the order of the 11th July, 1836, the amount of gold, silver, and bills received by them, &c.; which, on motion of Mr. GRENNELL, was laid on the table, and ordered to be printed.

The SPEAKER laid before the House the following message from the President:

*To the House of Representatives of the United States:*

I transmit to the House of Representatives a Report of the Secretary of State, containing the information requested by their resolution of the 19th inst. [in relation to the tobacco trade] together with the documents by which the report was accompanied.

M. VAN BUREN.

WASHINGTON, Sept. 30, 1837.

On motion of Mr. HAYNES,

The message was laid on the table and ordered to be printed.

The SPEAKER laid before the House the following message from the President:

*To the House of Representatives of the United States:*

In compliance with the resolution of the House of Representatives of the 13th inst. respecting an annexation of Texas to the United States, I transmit a Report from the Secretary of State, and the documents by which it was accompanied.

M. VAN BUREN.

WASHINGTON, Sept. 30, 1837.

On motion of Mr. ADAMS,

The message and documents were laid on the table, and 10,000 extra copies ordered to be printed.

The SPEAKER also laid before the House the following message from the President:

*To the House of Representatives of the United States:*

In compliance with the resolution of the House of Representatives of the 13th ultimo, concerning the boundary between the United States and the Mexican Republic, and a cession of territory belonging to the Mexican Confederation to the United States, I transmit a Report from the Secretary of State, and the documents by which it was accompanied.

M. VAN BUREN.

WASHINGTON, Oct. 2, 1837.

*To the President of the United States:*

The Secretary of State, to whom was referred a resolution of the House of Representatives, dated the 13th ult. requesting the President to communicate to that House, so far as may be consistent with the public interest, all the correspondence between the Government of the United States, and that of Mexico, concerning the boundary between them; and particularly concerning any proposition for a cession of a territory belonging to the Mexican Confederation to the United States, and also all correspondence relating thereto between the Department of State and the Diplomatic Representatives of the United States in Mexico, and of the said Department with those of the Mexican Republic, accredited to the Government of the United States, has the honor to lay before the President copies of

all the correspondence between the two Governments on the subject of the boundary line, not heretofore communicated to Congress, and of all the instructions to the representatives of the United States at Mexico on the subject of a cession of territory by the Mexican confederation to the United States. No other correspondence between the Government of the United States and Mexico has taken place on the subject of a cession of territory, either at Mexico or at Washington. In one of his communications to this Department, however, Mr. Butler mentions a note which he addressed to Mr. Alamon on the 15th of July, 1832, giving his reasons for reviewing the question of boundary, and explaining the advantages which both nations would probably derive by changing the line from the Sabine. No copy of this note has ever been communicated to this Department, nor is there any draft on record of it in the archives of the legation of the United States at Mexico. The communication of the representatives of the United States to their own Government on that subject, are within the limitation contained in the resolution referred to this Department. All which is respectfully submitted.

JOHN FORSYTH.

DEPARTMENT OF STATE,

Washington, October 2, 1837.

On motion of Mr. CAMBRELENG, the message and accompanying documents were laid on the table and ordered to be printed.

#### MISSISSIPPI ELECTION.

The House then resumed the consideration of the report of the Committee of Elections, which was accompanied by the following resolution:

*Resolved*, That Samuel J. Gholson and John F. H. Claiborne are duly elected members of the Twenty-fifth Congress, and as such are entitled to take their seats.

The question pending was the motion of Mr. MAURY to strike out all after the word "resolved," and insert, "that Samuel J. Gholson and John F. H. Claiborne, not being duly elected members of the House of Representatives of the twenty-fifth Congress of the United States, are not entitled to seats on this floor as such."

Mr. LOOMIS resumed and concluded his remarks in favor of the resolution.

Mr. ADAMS said the question was not as to whether or not the vacancy had been filled, but whether it had been filled for the whole term of the present Congress. The law of the State of Mississippi made it clear, that although the Governor had a right to issue his writ to fill the vacancy, it was only until superseded by the general election in November. He had no right to issue his writ for an election for the whole term, as was evident from the words, "until superseded," etc. which were added to the writ. These words had been inserted in conformity with the laws of that State, and had they been omitted, the Governor would virtually have repealed the State law. But it might be taken for granted that a large portion of the people at the polls believed they were electing members for the whole term. Mr. A. went on to show that the present members could not retain their seats, unless re-elected the 1st of November, in conformity with the law of their State; but as they were here, he wished them to remain until the expiration of the present session, and then return home, when there would be no doubt of their being again chosen by the people.

Mr. CAMBRELENG asked that there might be a call of the House. This was agreed to, and the roll was called, when 105 members answered to their names.

Mr. CAMBRELENG moved that all further proceedings in the call be dispensed with; and with a view of affording the absent members time to resume their seats, asked for the yeas and nays on his motion, which being ordered, resulted—yeas 137, nays 61. So all further proceedings in the call were dispensed with.

Mr. WHITTLESEY of Ohio said, that as there was a doubt as to whether the gentlemen from Mississippi had been elected for the present session only, or the whole Congress, he thought it would be the better plan to lay the whole subject on the table, and thus afford time for them to return, and be

re-elected. With that view he moved that the report of the Committee of Elections, with the amendment thereto, be laid on the table, and on that question he asked for the yeas and nays.

Mr. WHITTLESEY withdrew his motion at the request of Mr. FILMORE, who hoped the subject would not be thus disposed of, as it would leave the people of Mississippi in doubt.

Mr. WHITTLESEY then renewed his motion, and the yeas and nays being ordered, resulted—yeas 70, nays 145, as follows:

YEAS.—Messrs. Adams, Alexander, John W. Allen, Ayckrigg, Bell, Bond, John Calhoun, Wm. B. Campbell, Wm. B. Carter, Chambers, Cheatham, Childs, Corwin, Cranston, Crockett, Curtis, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Evans, Everett, Ewing, Goode, Wm. Graham, Graves, Grennell, Hall, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Herod, Henry Johnson, Lawler, Lewis, Lyon, Mallory, Mason, Maury, Maxwell, McKennan, Menifee, Mercer, Milligan, Morris, Ogle, Potts, Rariden, Randolph, Reed, Rencher, Ridgway, Russell, Sawyer, Sergeant, Slade, Southgate, Stanley, Thompson, Tillinghast, Toland, Elisha Whittlesey, Lewis Williams, Wise, and Yorke—70.

NAYS.—Messrs. Heman Allen, Anderson, Andrews, Atherton, Beatty, Belne, Bicknell, Birdsall, Boon, Borden, Bouldin, Briggs, Brodhead, Bronson, Bryn, Buchanan, Bynum, William B. Calhoun, Cambreleng, John Campbell, Timothy J. Carter, Casey, Chaney, Chapman, Cilley, Clark, Cleveland, Clowney, Coles, Connor, Cray, Cushman, Davee, DeGraft, Dromgoole, Duncan, Edwards, Farrington, Fairfield, Isaac Fletcher, James Graham, Grant, Gray, Griffin, Haley, Hammond, Hamner, Harrison, Hawkins, Haynes, Holsey, Holt, Hopkins, Howard, Hubley, Robert M. T. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Joseph Johnson, Nathaniel Jones, John W. Jones, Kilgore, Klingensmith, Leadbetter, Lincoln, Logan, Arphaxad Loomis, Andrew W. Loomis, Marvin, James M. Mason, Martin, May, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Menifee, Mercer, Miller, Montgomery, Morgan, Samuel W. Morris, Muhlenberg, Murray, Noyes, Palmer, Parker, Parmenter, Patterson, Patton, Paynter, Pearce, Peck, Pennybacker, Petriken, Phelps, Plumer, Potter, Pratt, Prentiss, Raily, Rhett, Richardson, Rives, Robertson, Rumsey, Sheffer, Charles Shepard, Shields, Shipley, Smith, Snyder, Spencer, Stewart, Stratton, Taliaferro, Taylor, Thomas, Titus, Toucey, Towns, Turney, Underwood, Vall, Vandever, Wagener, Weeks, Albert A. White, John White, Thomas T. Whittlesey, Sherrod Williams, Jared W. Williams, Joseph Williams, Christopher H. Williams, Worthington, and Yell—145.

So the motion to lay on the table was decided in the negative.

Mr. HAYNES then moved the previous question which was seconded—yeas 105, nays 81; and the main question was ordered without a division.

Mr. BRIGGS called for the yeas and nays on the main question, which was the adoption of the resolution reported by the Committee of Elections, that Messrs. Claiborne and Gholson were entitled to their seats, which were ordered, and were—yeas 118, nays 101, as follows:

YEAS.—Messrs. Anderson, Andrews, Atherton, Beatty, Belne, Bicknell, Birdsall, Boon, Bouldin, Brodhead, Bronson, Bryn, Buchanan, Bynum, Cambreleng, John Campbell, T. J. Carter, Casey, Chaney, Chapman, Cilley, Clark, Cleveland, Coles, Connor, Cray, Cushman, Davee, DeGraft, Dromgoole, Duncan, Edwards, Elmore, Farrington, Fairfield, Isaac Fletcher, Foster, Fry, Gallup, Glascock, William Graham, Grant, Gray, Haley, Hammond, Hamner, Harrison, Hawkins, Haynes, Herod, Holsey, Holt, Howard, Hubley, Ingham, Thomas B. Jackson, Jabez Jackson, Joseph Johnson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, Klingensmith, Legare, Leadbetter, Lewis, Logan, Arphaxad Loomis, James M. Mason, Martin, May, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, Samuel W. Morris, Muhlenberg, Murray, Noble, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petriken, Phelps, Plumer, Potter, Pratt, Prentiss, Kelly, Rhett, Richardson, Rives, Sheffer, Shipley, Smith, Snyder, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Turney, Vall, Vandever, Wagener, Webster, Weeks, Albert A. White, Thomas T. Whittlesey, Jared W. Williams, and Worthington—118.

NAYS.—Messrs. Adams, Alexander, Heman Allen, John W. Allen, Ayckrigg, Bell, Bond, Borden, Briggs, William B. Calhoun, John Calhoun, William B. Campbell, William B. Carter, Chambers, Cheatham, Childs, Clowney, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Evans, Everett, Ewing, Richard Fletcher, Filmore, Rife Garland, Goode, Graves, Grennell, Griffin, Hall, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Robert M. T. Hunter, Henry Johnson, Lawler, Lincoln, Andrew W. Loomis, Wm. Mallory, Marvin, Samuel Mason, Maury, Maxwell, McKennan, Menifee, Mercer, Milligan, Calvary Morris, Noyes, Ogle, Patterson, Patton, Pearce, Peck, Phillips, Pope, Potts, Randolph, Reed, Rencher, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, Augustine H. Sheppard, Charles Shepard, Shields, Sibley, Slade, Southgate, Stanley, Stratton, Taliaferro, Thompson, Tillinghast, Toland, Towns, Underwood, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, and Yorke—101.

So Messrs. Gholson and Claiborne were declared to have been duly elected members of the Twenty-fifth Congress from the State of Mississippi, and, as such, entitled to their seats on this floor.

Mr. RICE GARLAND laid on the table an amendment to the bill relative to the state of the deposite banks, which was ordered to be printed; when, on motion of Mr. MORGAN,

The House adjourned.

## IN SENATE.

WEDNESDAY, October 4, 1836.

Mr. McKean presented a memorial from sundry citizens of Philadelphia city and county, against the annexation of Texas; also one from the citizens of Montgomery county, Pennsylvania, remonstrating against the annexation of Texas; which were ordered to lie on the table.

Mr. ROANE presented two petitions from Wm. J. Brent, of Virginia; the one praying for a certain national institution, the other an inquiry into the best mode of healing the distresses of the times. Both these petitions were ordered to lie on the table and be printed.

Mr. NORVELL presented a memorial from certain citizens of Michigan, praying for the passage of a pre-emption law for their relief.

Also, for the establishment of a port of entry at the mouth of the river St. Joseph in that State.

Also, praying for an adequate appropriation from Congress to finish Grand river road.

Also, to improve the harbor at the mouth of north Black river, on Lake Michigan; all of which were ordered to be laid on the table.

Mr. GRUNDY, from the Committee on the Judiciary, reported the following joint resolution:

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Postmaster General be, and he is hereby, directed to cause the postage on all letters sent by the Express Mail of the United States, to be paid in advance at the time of depositing them for transportation by said mail.

This resolution having been read twice, was referred to the Committee on Post Offices and Post Roads.

The bill regulating the fees of district attorneys in the renewal of merchants' bonds, was called up for consideration.

Amendments to this bill were offered by Mr. CLAYTON and Mr. CLAY of Alabama, and some remarks made, which were not distinctly heard.

Mr. CLAY of Kentucky said he would have been better satisfied if the Committee on the Judiciary had reported a different bill; for if it passed in its present shape, the attorney's fees for the city of New York would amount to between twenty and thirty thousand dollars, so numerous were the bonds to be renewed under existing emergencies. Why (said Mr. C.) take the business out of the hands of the collector of the customs? Why not let him renew the bonds, and give him the same fee for the renewal that was charged on the original document? On what pretence are they handed over to the attorney unless for suit? in which case, he was entitled to his fees.

The tax of five dollars, as contemplated by the bill, would fall heavily on the class of small importers, many of whose bonds did not exceed fifty dollars. Five dollars on that sum—ten per cent. on the whole amount—would be unreasonable; while bonds for a very considerable amount were subjected only to the like charge. There was no equity, no propriety in such a measure. He would propose to remodify the bill entirely.

Mr. GRUNDY said the object of the bill was to secure to the attorney five dollars, and allow no further charge. The usage in New York was, when papers were placed in the hands of an attorney, to charge certain fees whether the suit was brought or not; it was the custom, he understood, in that State, though certainly not in any other, as far as his knowledge went, and he presumed it was under this law, that the attorney had received the fees so much complained of.

Mr. BUCHANAN said the repeated attention of Congress had been called to the subject of fees of Government officers; but as yet no adequate remedy had been provided. Fees varied in the different States as much as two, three, and even four hundred per cent. He believed they acted under a law of Congress of 1799, which left the control to the ever varying laws of the States. He had consulted the Solicitor of the Treasury on the subject, and had been told by that distinguished officer, that in three-fourths of the States no change whatever was made; while acting in the capacity of district attorney, that officer had never received a farthing for such

duty. Mr. B. agreed with the Senator from Kentucky, that five dollars, ten per cent. on a bond of fifty dollars—as much as was exacted for a large one—was unjust. To obviate that difficulty, and do justice as far as practicable, he would propose to amend the bill, so as to make the fee five dollars on all bonds exceeding five hundred dollars, and two dollars for all of and under that sum, instead of five on all classes, as reported by the bill.

Mr. TALLMADGE was of opinion that it would be better to postpone the subject, and lay the bill on the table until something definite could be fixed on. The fees received by the district attorney were in entire accordance with the usage of the courts. Mr. T. went into an explanation of the manner in which the practice was regulated in the State of New York, and the fees law officers were entitled to under the present regulations. The bill as offered to be amended by the gentleman from Pennsylvania, (Mr. Buchanan,) graduated the fees for the renewal of bonds of a small amount; but he doubted whether more than five dollars was charged for the mere renewal. Mr. T. said he had conversed the other day with a merchant from New York, who told him that he had been surety on thirty-one bonds; for renewing these the district attorney had charged only two dollars on each bond, making sixty-two dollars for the whole, which was far less even than proposed by the Senator from Pennsylvania.

Mr. WEBSTER said when he introduced his resolution he mentioned that, from the enormous amount exacted, he presumed there was some mistake, but the facts were for the committee to investigate. He had since received a letter on the subject, which should go to the Committee on the Judiciary for their inspection. The charge made by the district attorney was, according to his own showing, \$6 64; which charge he presumed was according to the old English rule of taxing by the folio, (so many words); and if that were the fact, the attorney might be entitled to that amount; but he thought it high, as blank bonds were now printed, and hence the expense materially lessened. There were now more than four thousand bonds to renew, and he thought two dollars on each would be sufficient. It was the matter of fees, however, that was most complained of, which the bill before them did not touch. Evils or abuses were contagious, and he feared unless the bill covered the whole ground, we should find the fees in other places based on the system at New York.

Mr. WRIGHT went into some explanation of the practice of the State in relation to fees, and said, in justice to the district attorney of New York, that the fees received by him were legal, and such as citizens paid in like cases. The highest charge made for a mere renewal in any case, had never been more than six dollars and sixty-four cents; and in cases where the amount of the bond did not exceed two hundred dollars, he had invariably remitted one-third even of that charge. Where so many bonds were to be renewed, as would be the case at present, he thought the fee high; but in places where there were only a few bonds, he was not prepared to say it was too high.

The question on Mr. TALLMADGE's motion to lay the bill on the table being taken, it was decided in the affirmative.

The bill imposing additional duties on public officers, as depositaries in certain cases, having had its third reading, the question being on its final passage—

Mr. CLAY, of Alabama, rose and occupied the Senate for the space of near two hours in support of the bill. Whatever suggestions might have presented themselves to his mind in the first instance as a measure somewhat harsh towards the banks, all objections had been removed by the amendment of the Senator from South Carolina (Mr. Calhoun.) Mr. C. went into a full detail of the conduct pursued by the United States Bank; the attempts of that institution to interfere in the politics of the country, and the panic it had created on the removal of the deposits.

In the course of his remarks, he alluded to the argument of Mr. CLAY of Kentucky, that the charter of a national bank and the permanency of the Union were identified; and also remarked on the

declaration made by the distinguished Senator from Kentucky, (Mr. CLAY) shortly after the removal of the deposits, (made in Philadelphia,) that "we were in the midst of a revolution." He also spoke of declarations made in the newspapers and elsewhere, that the deposits must be restored, or a revolution was at hand; and that matters went so far, according to the accounts of the newspapers, that two members of Congress addressed the mob at Baltimore on Sunday; and, as he understood it, one of those members had said, by way of apology, that there were no sabbaths in revolutionary times.

[When Mr. CLAY of Alabama concluded his speech,

Mr. WEBSTER rose, and thanked him for having alluded to the subject; that he knew such a report had been in circulation through the newspapers, as that he, or another gentleman, (Mr. Binney,) then a member of the other House, had made it; but that it was false and calumnious; that he heard no such remark made on that occasion.

Mr. CLAY rejoined, that he believed, whatever might be the character of the report, it had emanated from newspapers, which supported the correctness of the gentleman's position; that he spoke from the newspaper account, which he had never before heard controverted.

[As soon as the Reporter can write out his speech from his notes, it will be given in full.]

Mr. SOUTHARD followed Mr. Clay in opposition to the bill.

Mr. CLAY of Kentucky asked for the yeas and nays on the passage of the bill, and they were ordered, and were—yeas 26, nays 20, as follows:

YEAS—Messrs. Allen, Benton, Brown, Buchanan, Calhoun, Clay of Alabama, Fulton, Grundy, Hubbard, King of Alabama, Linn, Lyon, Morris, Niles, Norvell, Pierce, Roane, Robinson, Sevier, Smith of Connecticut, Strange, Walker, Wall, Williams, Wright, and Young—26.

NAYS—Messrs. Bayard, Black, Clay of Kentucky, Clayton, Crittenden, Davis, Kent, King of Georgia, Knight, McKean, Nicholas, Prentiss, Robbins, Smith of Indiana, Southard, Swift, Tallmadge, Tipton, Webster, and White—20.

Mr. CLAY of Alabama again alluded to the Sunday affair, and produced the tenth volume, part second, of Gales and Seaton's Register of Debates of 1833—4, and, with the leave of the Senate, read the following report of Mr. Webster's own account of the affair alluded to, just after his return from Baltimore, having premised that, from the statement of the Senator from Massachusetts, no man would have supposed that any such remark had been made on the occasion by any one:

"Mr. WEBSTER said he was very sorry to be compelled to rise again on this subject. But circumstances had come within his own knowledge which he deemed it necessary to mention. When he arrived in Philadelphia, on his return to Washington, he received information of the very extraordinary communication sent by the President to the Senate; and certainly all that he conversed with, viewed it with the utmost alarm and disapprobation. When he arrived at Baltimore, he found multitudes of people in the streets, certainly not assembled in a riotous manner, but evincing a deep state of feeling from some great cause. When the boat arrived at the wharf, a gentleman came forward, and introduced one venerable man, who addressed him by saying, 'I am a member of the Presbyterian church; and you may be surprised to see me in the crowd on such a day; but I remember that we had no Sabbaths in revolutionary times to interfere with our duty to our country. We know that our liberties are in danger; and we come down to you for the purpose of making you acquainted with our true situation, and to ask what we are to depend on.'"

Having read this extract from Mr. WEBSTER's account in the Senate, just after his return from Baltimore—

Mr. CLAY of Alabama said he was willing to submit it to the Senate how far the declaration of the Senator from Massachusetts—that he had heard no such remark as the one mentioned at the Baltimore Sabbath meeting—was correct.

Mr. WEBSTER replied that he certainly did not make any personal imputation against the

Senator from Alabama, in what he had before stated, but against the newspaper report.

Mr. CLAY of Alabama rejoined, that he (Mr. C.) certainly did not understand the Senator from Massachusetts (Mr. W.) as so intending, or he should have treated him very differently from what he did on the occasion.

On motion of Mr. TIPTON, the Senate went into Executive business; and, after some time spent therein, the Senate adjourned.

#### HOUSE OF REPRESENTATIVES,

WEDNESDAY, October 4, 1837.

Mr. HOWARD, on leave, submitted the following resolution, which was considered and adopted.

*Resolved*, That the President of the United States be requested to communicate to this House, the proceedings of the Court of Inquiry, whereof Major General Scott was President, and which commenced on the 4th of September, 1837, at Knoxville, in Tennessee, pursuant to General Order No. 49, to examine into the transactions of Brevet Brigadier General Wool, and others under his command, in reference to his and their conduct in the Cherokee country.

On motion of Mr. PATTON, the following resolution submitted by him on the 19th September was taken up, considered and adopted:

*Resolved*, That the President of the United States be requested to transmit to this House—

1st. A copy of all the documents and correspondence in his department, relative to the recall of Major Gen. Scott from the command against the Seminole and Creek Indians.

2d. A copy of the record of the proceedings of the Court of Inquiry convened at Fredericktown, in relation to the operations against the Seminole and Creek Indians, together with the decisions thereon of the late and present Executive.

3d. A copy of the orders to Major Gen. Scott, relative to the conduct of his command, and the terms he might offer to the enemy.

4th. A copy of the orders of Major Gen. Jesup, on assigning to him the same command; and all other orders and correspondence with Gen. Jesup subsequent thereto, which he may deem not injurious to the public service to communicate.

Mr. ROBERTSON, on leave, submitted the following resolution, which was considered and adopted:

*Resolved*, That the Postmaster General be directed to report to this House, with as little delay as may be, the balances now on hand, so far as ascertained, to the credit of the Department; together with an estimate of the receipts and disbursements during the residue the current year; also, the aggregate amount received and disbursed by the Department since the first day of May last, distinguishing the amount in specie from that in other funds. Also, the regulations touching the funds to be received and disbursed, if any, other than those already communicated; the instances in which those regulations have been disobeyed or dispensed with; with separate statements of the aggregate amounts left in the hands of collecting officers, paid into the Treasury, and deposited in bank, the mint and its branches, or other depositories, since the date first mentioned.

On motion of Mr. MALLORY, the following resolution submitted by him on a former day, was taken up, considered, and agreed to:

*Resolved*, That the Secretary of the Navy be requested to communicate to this House the cause of the detention in the sailing of the Exploring Squadron, together with the correspondence between the Department and the commander, and other officers or persons who are now, or have been at any time, attached to that service; and also report what amount of the appropriation made by Congress for that purpose has been expended, and whether an additional sum will not be required within a short period to carry on the expedition.

On motion of Mr. WILLIAM COST JOHNSTON, it was

*Ordered*, That the Committee on the Public Buildings inquire into the plan of the Treasury building now being erected, to examine the general and detailed plan of said building, as to locality and con-

struction; and whether it would not be changed to the advantage of the public convenience and economy; whether flues should not be substituted instead of fire-places; to examine the various plans of improvement, which may be submitted to the Committee, and report at a convenient time to Congress.

#### NATIONAL BANK.

The House then proceeded to the consideration of the following resolution, reported from the Committee of Ways and Means on the 25th instant, it being the business next in order:

*Resolved*, That it is inexpedient to charter a national bank.

The question pending was the motion of Mr. WISE to amend the resolution, by adding thereto, "at this time. And be it further resolved, that it will be expedient to establish a national bank whenever there is a clear manifestation of public sentiment in favor of such a measure."

Mr. SERGEANT, who was entitled to the floor, proceeded with his remarks for a few minutes, when he moved to refer the resolution to a Committee of the Whole on the state of the Union.

Mr. CAMBRELENG said he was very sorry this motion was submitted by the gentleman from Pennsylvania. He must be sensible that if the motion he now made prevailed, that it would have the effect to make a final disposition of the question now before the House. The Committee of Ways and Means felt bound to present this question before the House, in the form they did, in consequence of the memorials referred to them by the House, praying for the establishment of a national bank. In presenting it, however, they did not anticipate a lengthy discussion. It was supposed by the Committee of Ways and Means, that the nation desired to know what course this House and the other branch of Congress intended pursuing on this question; and they had submitted this resolution in order that gentlemen might be brought to a direct vote, and either adopt or reject the resolution. It was introduced because the subject had been referred to the Committee of Ways and Means, and they considered it proper that the nation should understand what course they intended to pursue on this all important question. He hoped that the motion to commit would not prevail, as there was not time to discuss it at the present session of Congress.

Mr. ADAMS wished to ask the chairman of the Committee of Ways and Means, whether there had not been a number of petitions referred to that committee, praying for the establishment of a national bank.

Mr. CAMBRELENG answered, that there had been, and this resolution was founded upon those petitions.

Mr. ADAMS. My next inquiry is, whether they were read in the committee.

Mr. CAMBRELENG stated, that there had been but about forty of those petitions printed and laid on our tables, and referred to that committee, and it would be very extraordinary if they had not been read by every member of the House and of the committee.

Mr. ADAMS took this answer to be that they were not read. Now, how stands the fact? The Committee of Ways and Means have had a number of petitions referred to them by the House; they have not read a single one of those petitions, and they have reported a resolution that it is inexpedient to establish a national bank. Sir, (said Mr. A.) I signalize this as another instance of the treatment which the petitions of the people of the United States receive from this House. It is now submitted to the House to pass this resolution, without further inquiry. What reason, what argument, what pretence or right, have the Committee of Ways and Means to report such a resolution, unless it was upon the memorials referred to them? And what right have they to tell the House that it is expedient or inexpedient to charter a national bank, before they have read the petitions they profess to report upon? What is the next conclusion? Here is a resolution offered to this House, predetermined not only to force this House to vote upon the question of inexpediency of a public measure, not only without waiting to hear from the people,

but without even condescending to read their petitions when presented! Was the time of this session, which was called for a special purpose, to be wasted upon a mere question of inexpediency? Why, the Committee of Ways and Means might as well have reported that it was inexpedient to increase the navy of the United States; or they might, with much more propriety, have reported that it was inexpedient to prosecute the war in Florida, and waste the money of the United States like water in pursuit of a few hundred Indians, that never could be found. They might have reported on the inexpediency of a great variety of questions; and reporting upon the expediency or inexpediency of establishing a national bank at this time, was a very idle question; and it was as idle for this House to consume its time upon it. If the Committee of Ways and Means had reported in answer to these petitions after reading them, that this House and the white house had predetermined that there should not be a national bank, then there might be some reason for bringing such a resolution before the House. But what were the reasons which the gentleman assigned for reporting this resolution of having an expression of the House upon it? Why, it was, to settle the question that we should never have a national bank in the United States. But why did the gentleman not put this in his resolution? Why did he not say so, and make the members of the House toe the mark? Why not say, resolved, that never to the end of time shall a national bank be established in the United States? Does the chairman of the Committee of Ways and Means suppose his power is to last forever? I admit, said Mr. A. the gentleman's power now; but when he calls upon me to toe the mark, I beg to be excused. His mark is not straight enough for me. It is too much like a Virginia fence. It is too zig-zag for me to come up to; and when he wants me to toe the mark, I want him to make a straight mark. I want something more rational than a resolution that it is inexpedient to charter a national bank, and then be told that the object is that there shall never be a national bank. I complain to this House, and to the country, that the chairman of the Committee of Ways and Means is wasting our precious time with these useless questions, and wasting the time and health of the members of the House by keeping them up till three o'clock in the morning to force through his measures. If we are to waste time on these frivolous questions, instead of adjourning on the 16th of October, we may sit here till Christmas a year. I want to know what the House will do, and what it will not do. If the question is debated, however, I would rather have it debated in Committee of the Whole. Mr. A. concluded by moving to lay the resolution on the table.

Mr. CAMBRELENG hoped the gentleman would not make this motion, which cut off all reply, after making such an attack upon him as he had made.

Mr. ADAMS. I will withdraw the motion if the gentleman will renew it when he has done.

Mr. CAMBRELENG certainly could not do this.

Mr. ADAMS. Well, then, I will withdraw the motion unconditionally, so the gentleman may have the opportunity of replying.

Mr. CAMBRELENG said the gentlemen from Massachusetts, (Mr. Adams) with his accustomed courtesy, had been kind enough to speak of his (Mr. C's) "zig-zag" course. He little expected the gentleman to make that charge. Mr. C. thought he (Mr. A.) would not have alluded to a point which was so very tender to some gentlemen, perhaps on both sides. The gentleman, continued Mr. C, has alluded to my "zig-zag" course, and said that I did not walk in a straight line. Sir, I have been a member of this House for seventeen years, and before I was a member I was an advocate of the broadest doctrines of free trade, and of those doctrines set forth at large in the message of the President; doctrines which the South have uniformly sustained and supported. I have been obliged, sir, from necessity, to make this brief allusion to my own course, in consequence of the ex-

traordinary attack of the gentleman from Massachusetts.

Sir, it is perfectly well known, at least to some members, that, upon this bank question—upon the tariff question—and upon the interference of this Federal Government, or State Legislatures, with the affairs of trade and money, I have been uniform and consistent, and, after seventeen years, I have the pleasure to find myself surrounded by gentlemen from every part of the Union advocating the same doctrines I advocated before I was a member of this House.

Sir, in alluding to the gentleman from Massachusetts the other day, I did it in a pleasant manner, and not for the purpose of provoking an attack upon me. The gentleman had alluded to the proposition now submitted to the nation and to Congress, I mean the proposition to separate the affairs of this Government and our Treasury from all connection with banks. In alluding to that proposition, he had reference to the published opinion of the gentleman, who doubted whether the President had the courage to propose it; and if he had the courage to do so, the gentleman left us in some doubt, whether he would help him out of the difficulty.

Now, I had hoped the gentleman would have given us his aid on that bill; and why? Because I did not think the gentleman would vote for a proposition to incorporate an association of counterfeiters; because I could not suppose it possible that the gentleman could denounce all the presidents, cashiers, and directors, of all the banks, and afterwards come here and vote for an association of counterfeiters. The gentleman told us in that letter that he doubted, as well he might, the expediency of employing any bank of discount as an agent of the Government. Now, there is no Government upon earth which employs a bank of discount. Even the Bank of England is not a bank of discount, according to its practice or its organization: not a bank of commercial discount upon the plan of the banks of this country. The public moneys are not permitted to be employed in commercial discounts, to be suddenly withdrawn. Sir, I rose merely to remind the gentleman that on these questions I wished him to remove all doubt—to toe the mark on the resolution against chartering a national bank.

Mr. GLASCOCK was somewhat astonished that the gentleman from Pennsylvania (Mr. Sergeant) after occupying the time of the House on three different mornings during the morning hour, should move to commit the resolution to the Committee of the Whole on the state of the Union. If he could believe for a moment that any good could result from it, he would not interpose the objection he now made; but so far as this question was concerned, it appeared to him that every gentleman had a full and fair opportunity offered him of making known his views to the House and to his constituents, in relation to the establishment of a national bank, in Committee of the Whole, on the bills before that committee. This being the case, he was surprised that the gentleman should have made the motion after he had finished his own remarks. It was also he thought very extraordinary that the gentleman from Massachusetts should have made the motion to lay the resolution on the table, after a similar motion had been rejected by a large majority of the House. He hoped the motion to commit might not prevail, because we had but some eight or ten days to determine on all the great questions before the House, and the morning hour, he took it, was as much time as could be set apart specially for the discussion of this resolution. Gentlemen could discuss this question during the morning hour, and those who desired to give their views on the subject of a bank at any other time, could do so on the bills under discussion in the Committee of the Whole.

Mr. CLARK was somewhat surprised at the gentleman from Pennsylvania making this motion at the present time, after the indulgence which had been given him by the House. It seemed to him that there was business enough before the House, without going into this wide and unlimited range of debate on the question of establishing a national bank. The subject has been debated to death, and

the public stomach is sick of it; and he hoped we would not now hear any more of this bank war. The battle has been fought and won, and why renew the contest? A charge has been brought against the Committee of Ways and Means for not having read the different petitions and memorials referred to it on the subject of a national bank. Why, sir, these petitions are as familiar to the people of the country as household terms. We all know where they are got up. They are sent from the printing offices of the city of New York through the country for signatures, and are all of the same kind. He hoped this question of a Bank of the United States was not now to be fought over again. General Jackson had had the good fortune to harpoon this leviathan, and he hoped the question might be left at rest for the present.

Mr. ROBERTSON thought it surprising that the House should be called upon to vote on this important question, without the opportunity of a full and free discussion. He thought the proper course would be to commit it to the Committee of the Whole on the state of the Union, so that every gentleman would have the opportunity of giving his views upon it; and if there was not time to dispose of it at the present session, it would remain on the table to be considered at the coming session.

Mr. WISE concurred in opinion with his colleague. He said there were three distinct plans before the country, supported by the three different parties in the House. One was the Sub-Treasury system, submitted by the chairman of the Committee of Ways and Means as a positive plan, and the other was a positive plan, submitted by the gentleman from Virginia, (Mr. Garland,) who belonged to the conservative party in the House, and both these plans were referred to the Committee of the Whole on the state of the Union. The other was a negative proposition, introduced by the gentleman from New York, (Mr. Cambreleng.) This negative proposition the gentleman sees fit to keep confined to a few minutes' discussion every morning, instead of giving to it the same chance for free discussion which he ther two plans have in Committee of the Whole. He objected to this course, and he objected to having this issue presented at this time, and in this form. He did not desire this summary mode of execution for the bank. He did not desire to see this vote, taken without debate, held up to the country as another triumph over the bank; but he wished to see a clean avenue for discussion, where he could meet the gentleman from New York on the question in every point in which it was presented, and this he hoped they would be able to obtain.

Mr. BYNUM obtained the floor, but yielded to a call by Mr. CAMBRELENG for the orders of the day.

#### TREASURY NOTES.

On motion of Mr. CAMBRELENG the House went into Committee of the Whole on the state of the Union, Mr. CONNOR in the chair, and resumed the consideration of the bill "to authorize the issuing of Treasury notes."

The question pending was on the substitute of Mr. RHETT.

Mr. BIDDLE addressed the committee at length in opposition to the whole proposition.

Mr. ROBERTSON expressed his intention of voting against this or any other bill proposing to raise revenue, on the ground that the condition of the Treasury was such as not to require it. He gave notice of his intention to move to strike out the first clause.

Mr. THOMAS made some explanation in reference to the proceedings of the Committee on the Judiciary, on that part of the President's Message on the subject of a bankrupt law.

The hour of half past two having arrived, the House took its usual recess till four o'clock.

#### [EVENING SESSION.]

#### TREASURY NOTE BILL.

The House, on meeting in the evening session, went into Committee of the Whole on the state of the Union, Mr. CONNOR in the chair, and resumed the consideration of the "bill to authorize the issuing of Treasury notes," with the amendment to, or substitute therefor, of Mr. RHETT.

Mr. DUNN briefly opposed the bill, and gave notice of his intention to submit an amendment, when it was in order to do so.

The amendment of Mr. RHETT was disagreed to.

Mr. WILLIAMS of North Carolina, also opposed the bill.

Mr. DAWSON moved an amendment to restrict the number of clerks to four, and limiting their compensation to \$1200 to each.

Mr. CAMBRELENG had no objection to the amendment.

Mr. McKAY suggested the introduction of the words "per annum," which Mr. DAWSON accepted as a modification, and so modified, the amendment was agreed to.

Mr. RIVES moved to strike out the second clause of the bill, which provides that the notes should bear interest. He explained, as the reason of his motion, that he was in favor of the bill as originally reported in the House from the Committee of Ways and Means, that bill not providing that the notes should bear interest. [This was the main distinction between the House and Senate bills; the latter making the notes bear interest, the former not.]

Mr. SNYDER said he would vote for the amendment of the chairman of the Committee of Ways and Means, if we were under the necessity of issuing ten millions of paper money; for one, he thought it important that the paper should be of equal value with specie, unless it is, the consequences will be that the issue of this paper will add to, in place of diminishing, the evil, which at present exists; for, disguise this as you may, it is a debt which we are involving the nation in to the amount of ten million of dollars. I have been in the habit of always legislating in a manner that my constituents would understand my acts; hence I would much prefer a loan of ten millions to the present proposed mode of issuing warrants to that amount, redeemable in one year; for, depend upon it, if we keep our faith with the States, we have ten millions to pay them in 1839. There is now a deficit in the Treasury of two millions and upwards, this, together with the ordinary expenditure of the Government, will consume all the contemplated revenue of the next year; and at the end of that time, the money must be raised to redeem the warrants, and rest assured that the people will understand it, when they are called upon to pay it. It is objected to, that if these warrants bear interest, they will be anxiously sought for, and being more valuable than specie, they will be locked up, and withheld from circulation. Admit this, it will take ten millions of specie or its equivalent to withdraw from circulation the warrants, thus adding to the means of the banks to resume specie payment. Not only the wants of the people, but the character of our Government, imperiously demands that we should issue none other than a circulating medium which would relieve the degraded state of the currency, and have an equal value with specie. I repeat, sir, I would prefer a loan to the odium of issuing a paper currency, not based on a specie capital, and which the taxes of our constituents must in the end pay.

The amendment was further briefly discussed by Messrs. RIVES, HAYNES and CAMBRELENG, when:

Mr. CHAMBERS, of Kentucky, moved that the committee rise, but subsequently withdrew the motion.

Mr. BELL suggested that the question be taken on the several amendments, the bill laid aside to be reported, and the further discussion be had in the House. He was also willing that all the bills should be reported early, except the last, (the Sub-Treasury scheme.)

Mr. UNDERWOOD gave notice of a substitute he intended to offer, containing two propositions: 1. To authorize a sale, at par, of the bonds upon the Pennsylvania Bank of the United States; and 2. That if the Secretary of the Treasury cannot sell those bonds, that he borrow the same amount of money, (viz: \$6,500,000,) at a rate of interest not exceeding six per cent. per annum.

Mr. RIVES modified his amendment by moving, instead of striking out the second section, to insert

in the first section the words, "not bearing interest."

Mr. HOLSEY opposed the amendment on the ground that it was necessary to vest that discretionary power in the President and Secretary of the Treasury, to prevent the contingency that might arise of their becoming below par. The clause vesting that discretionary power in the Treasury Department, would prevent that contingency.

Mr. McKIM expressed his decided approbation of the proposition to pay interest, because it would prevent the notes being depreciated below par; and the Government being bound by existing laws to pay its creditors in specie, it would not be just to offer them merely paper in liquidation of its debts. He was, however, in favor of a moderate rate of interest, perhaps six per cent. at first, but that rate might hereafter be reduced, even to as low as one per cent. That, however, would depend upon a variety of circumstances, such as the future condition and wants of the Treasury, the amount of imports, the negotiability of the Treasury notes, their demand, &c. Without interest they might at once become depreciated, as it was within his recollection they did in the late war no less than ten per cent. The time might come when they need not bear any interest, but that was not the present moment.

Mr. McK. objected to a temporary loan for a year, from the difficulty there would be of negotiating it for so short a period. That was one objection. He had several others which he would not then go into. He also said that he would not, at that time, go farther into the subject generally, but he trusted the clause providing for the payment of interest, under the restrictions devised, would be agreed to.

The question was then taken on Mr. RIVES's amendment, and it was decided in the negative—ayes 56, noes 91.

Mr. UNDERWOOD then submitted his amendment, notice of which he had given before, as above, which was rejected—ayes 80, noes 91.

Mr. DUNN moved to amend by inserting a clause making the Treasury notes receivable in payment of debts due to Government, from the sales of public lands, custom-house dues, and balances from the deposit banks, whether such Treasury notes should be due at the time or not. He said his object in offering the amendment was, that if the notes depreciated in value, it was right to call into the market as many purchasers as possible.

Mr. CAMBRELENG objected to the amendment. The object of the bill was to issue the notes, and to receive them in payment of merchants' bonds, and other debts, when such notes became due, and not before, and to prevent any depreciation in their value.

Mr. ROBERTSON could not agree with the proposed amendment, which, if carried, would afford an opportunity to the United States Bank to pay off the whole of its debt by buying up the notes at a discount. He did not like the idea of debts due to Government being paid in advance by such a method.

Mr. FILLMORE thought the merchants ought to be allowed to purchase the Treasury notes, and to pay their bonds with them when they became due, whether the notes were due at the time or not.

Mr. DUNN said his object in offering the amendment was, to prevent the notes depreciating as much as possible.

Mr. CAMBRELENG saw no advantage in adopting the amendment. It was quite time enough for the merchants to pay the notes into the Treasury when they became due.

Mr. CHAMBERS made some observations in which he endeavored to show that the present measures were parts of a scheme to destroy the banks. He concluded by moving "that the bill be laid aside for the present, and that the Senate bill No. 4, for adjusting the remaining claims against the deposit banks, be taken up instead."

After some debate as to whether such a proposition could be received at that time, the Chair decided it was in order.

The question was then taken on the amendment, and lost without a count.

Mr. WISE moved to strike out the words "he may think proper," and to insert "the exigencies of the Government may require." Also to strike out "and shall include the principal of each note, and the interest which may be due thereon at time of payment," and insert "provided that it shall not be lawful for any officer of Government to pay out or circulate Treasury notes, so long as there shall remain on hand any specie or other available funds, and the whole amount of the five millions, provided by law for contingencies, shall be kept on hand in Treasury notes, until their use shall become unnecessary," &c.

Mr. W. said it was not his intention to give his views at large at that time on the Treasury note bill. But he considered it as the commencement of the system of a Treasury bank. It was never contemplated by the administration, in adopting their system of Treasury banks, to present the entire plan at once. It was their intention to develop it gradually, and to give it to the people by piecemeal. The first and the longest stride to familiarize the minds of the people, was their Treasury issues. The plea now urged for these notes, with or without interest, was "the necessity of the Government." And not only that, but it had been openly avowed by a gentleman in the other House, "that Government should have a permanent circulation." He, Mr. W. was not only opposed to the creation of a public debt without necessity, but he would the state in advance and enter his protest against the Treasury bank scheme. He thought his friend from Pennsylvania, (Mr. Biddle,) in his able speech in the morning, in one instance had mistaken the figure. That gentleman had thrown out the idea "that the Government of the United States had violently and irreligiously forced a divorce from the United States Bank, which was its lawful wife, and had been united in wedlock for forty years; that the Government, Turklike, had then set up a seraglio; but getting sick of that, had taken a number of harlots, whom it pelted and dandled on its knee in the most indecent manner." Now he would tell the gentleman that he certainly had mistaken the whole figure. Whence had we this doctrine of divorce? Why, it was first suggested by Fanny Wright, (and he should very likely have to quote from her writings before long;) it was from her that the idea originated; but shortly after he had read her book denouncing matrimony, and crying up divorce, the very first thing that he saw was, that Fanny Wright had become Mrs. Darusmont, and had actually got married herself, after abusing matrimony in such strong terms. Just so it was with the Government; it was crying up the doctrine of divorce, when at the same time it was about contracting matrimony with one of the vilest termagants, in the shape of a Treasury bank.

The question on this amendment was then taken, and rejected—ayes 82, noes 89.

Mr. CAMBRELENG'S amendment, or substitute for the bill, was then put and agreed to.

Mr. DUNN moved to amend by adding an additional section to the bill, limiting the power of the Secretary to issue notes, to the first Monday in May, 1838. Rejected without a count.

Mr. FILLMORE moved to strike out that portion of the bill relating to punishment for forgery, making it penal to have in possession the same kind of paper; &c. and to insert "With intent to use the same fraudulently." Negated without a count.

The question was then taken on Mr. DUNN's former amendment, and lost without a count.

Mr. JOHNSON, of Maryland, moved to amend by adding "the power given to the President to issue Treasury notes, shall cease on the second Monday in June, 1839." He said his object in offering the amendment was to ascertain whether this bill was only intended to give present relief, or whether it was to be permanent for all time to come, and that Government intended to cover the whole country in future with its own spurious paper.

Mr. DUNCAN complained of the many occasions on which the friends of the administration were compelled to sit and listen to the taunts of the opposition, who were continually charging them with being under Executive influence, and so forth. He would admit that they acted together, and what of that? The friends of the Government had come

here for the very purpose of acting together, to relieve the country from its present distress. But the opposition were continually raising the panic note, and yet did nothing towards relief. They not only refuse to act themselves, but they endeavored to embarrass and prevent others from so doing. Was it not but the other day, that one who claims to be a leader of the other side, (Mr. Wise) told them "that he would offer nothing, and he hoped that none of the opposition would offer any proposition for relief?" Mr. H. then referred to the various measures now proposed, and contended that they were all calculated to afford relief to the banks and country at large. He referred to the short period remaining of the session, and earnestly entreated the opposition, that if they would not act themselves, at least to permit others to act for the benefit of the people.

The question was then taken on the amendment offered by Mr. JOHNSON, and rejected—ayes 83, noes 89.

Mr. GRENNEL submitted an amendment in relation to the clause for punishing those having plates of the notes in their possession, with intent to make a fraudulent use of them. Lost.

On motion of Mr. CAMBRELENG, the Committee then rose, and reported the bill and amendments to the House, which were ordered to be printed; and then, on motion of the same gentleman,

The House adjourned, at 8 o'clock, p. m.

#### IN SENATE,

THURSDAY, October 5, 1837.

Mr. McKEAN presented several memorials remonstrating against the annexation of Texas; which were ordered to lie on the table.

Mr. PRENTISS presented several memorials, also remonstrating against the annexation of Texas, and one for the abolishment of slavery in the District of Columbia; which were laid on the table.

Mr. ROBBINS, from the Committee on the Post Office and Post Roads, reported the joint resolution referred yesterday from the Committee on the Judiciary, requiring the postage on all letters for Express mail to be paid at the office where they were deposited for transportation.

Mr. LINN submitted the following resolution, which was agreed to:

*Resolved*, That the Secretary of the Senate be directed to transmit to the Secretary of the Territory of Wisconsin such public documents as have heretofore been given to the members of this body.

The Senate then adjourned until Monday next.

#### HOUSE OF REPRESENTATIVES,

THURSDAY, October 5, 1837.

Mr. HAYNES submitted a motion to reconsider the following resolution adopted on yesterday; which motion was entered and lies over:

*Resolved*, That the Secretary of the Navy be requested to communicate to this House the cause of the detention in the sailing of the Exploring squadron, together with the correspondence between the Department and the commander, and other officers or persons who are now, or have been at any time, attached to that service; and also report what amount of the appropriation made by Congress for that purpose has been expended, and whether an additional sum will not be required within a short period to carry on the expedition.

Mr. HOWARD submitted a motion to print ten thousand extra copies of the correspondence in relation to the Mexican boundary; which was agreed to.

Mr. ADAMS then moved that the same number of the Brazilian correspondence be printed; which was agreed to.

#### NATIONAL BANK.

The House then proceed to the consideration of the following resolution, reported from the Committee of Ways and Means on the 25th instant, it being the business next in order:

*Resolved*, That it is inexpedient to charter a national bank.

Mr. WISE had moved to amend this resolution, by adding thereto, the following "at this time:"

"And be it further resolved, that it will be expedient to establish a national bank whenever there

is a clear manifestation of public sentiment in favor of such a measure."

The question pending was the motion of Mr. SERGEANT to commit the resolution to the Committee of the Whole on the state of the Union.

Mr. BYNUM, who was entitled to the floor, said he had not risen on yesterday, so much with the intention of making a speech, as to express his hearty concurrence in the sentiments expressed by the honorable gentleman from Georgia, (Mr. Glascock,) and the honorable gentleman from New York (Mr. Clark,) and he exceedingly regretted that it became the duty of the Chair to interpose and arrest the remarks of those honorable gentlemen, knowing that they would have been able to place the subject in a clearer point of view than it was in his power to do. He also rose to express his astonishment at the extraordinary course pursued by the gentleman from Pennsylvania, (Mr. Sergeant,) in moving to commit the resolution to a Committee of the Whole on the state of the Union, after having been indulged by the House for three or four days in succession, in lecturing the House and administration, and eulogizing—almost delivering a funeral sermon over the corpse of the dead monster—the bank. After all this, it appeared to him strange that the gentleman should conceive it to be his duty, to the prejudice of those who feel it to be their duty to oppose a recharter of the United States Bank, to move to commit the resolution to the Committee of the Whole, thereby depriving them of the opportunity of defending themselves, or replying to the arguments adduced by the gentleman, because it is well known that the rules prevent a member in Committee of the Whole from replying to arguments made in the House. He hoped the House would not adopt the motion made by the gentleman from Pennsylvania, for this reason: that these gentleman had raised the hue-and-cry about the distresses under which the country was laboring; when, in his opinion, if there was any distress in this country, it had sprung from the action of that profligate and monstrous institution, the Bank of the United States. He believed it was the Pandora's box which had been the cause of all the complaints, all the evils, and all the distresses, of which we have heard so much on this floor. He hoped the question might be taken at the present session of Congress, so that the country might be put at rest in relation to it. Let gentlemen come up to the question, and toe the mark. Let the question be decided in the House, and not sent to the Committee of the Whole, where no vote can be taken on it, and where discussion will only add to the distresses which already exist. In his humble opinion, there could be nothing which would afford more solid and substantial relief than a decision of this House, that will show to those who make complaints of distress, and ring the changes on the word panic, that their favorite project is hopeless; that a United States Bank can not be chartered by the Congress of the United States; and that it was in vain for them to be indulging themselves with the hope that it can. The sooner this was done the better it will be for the people of the country. In his opinion, if we intend to act in good faith to the people, and do any thing for the relief of the people of the country, and the distresses of that people, the very first thing we should do would be to determine whether the establishment of a United States Bank was to be expected by any party in the country; to settle and fix the question finally, so that the people of the country and the capitalists of the country might know what to do. He had no doubt that there was a great deal of capital now held up which would be invested in other business, if this question was determined; and why not determine it at once, and put it at rest? Gentlemen, in support of their motion to refer this resolution to the Committee of the Whole, say they want a discussion of the subject. Why, do they not know that it has been discussed from year to year for the last six years, throughout the whole country, and in both branches of Congress? Do they not know that it has been discussed in both branches of Congress at the present session, on almost every subject which has been brought forward? Have we not heard the ditties which have been sung in this

House by the gentlemen from Pennsylvania, in eulogy of their favorite institution. And do gentlemen not know that this subject has been discussed until a large majority of the people of the country turn away from it with loathing and disgust? It has been decided at the ballot box that a majority of the people of the country were opposed to the establishment of a national bank; and he wished to be permitted to tell gentlemen that they mistook the intelligence, virtue, and patriotism of the people of the country, if they expect by this protracted discussion of the question, to drive them from their opposition to a Bank of the United States. It was in vain for them to expect to rivet the chains which had sprung from that institution, on the necks of the people; and the sooner the matter was decided, the better for the country, as it will put at rest all agitation and turmoil. The President of the United States has been accused of taking an extraordinary course, and of endeavoring to forestall public opinion, by the very consistent gentlemen of the opposition. He has been denounced and declaimed against by those who deal in declamation, for the extraordinary and high handed course he has pursued; and it will be recollected by every gentleman here, that those who now denounce him for throwing out his opinions in advance, denounced him two years ago because of his non-committalism. These gentlemen then said that he was non-committal on every thing—that he would never toe the mark—that he would never go in advance of public opinion, but always followed after it. Now, however, they say the President has introduced both reckless and extraordinary measures, and they denounce him for endeavoring to forestall public opinion. All these arguments and denunciations should be fairly met, and he would ask the gentleman from Pennsylvania, whether the friends of the administration would have the opportunity of answering him in Committee of the Whole? because the gentleman well knows it is against the rule to reply to arguments made in the House. He wished to see a direct and early vote upon this subject. The people of the country require it. They want to know what prospects there are for the recharter of a national bank, so that they may know what to expect. He did not believe that there was any gentleman in this House who was inimical to the establishment of a national bank, who desired to avoid the question by referring it to the Committee of the Whole. Every individual who was at heart hostile to a recharter of the bank, must be disposed to keep the subject in the House, and not permit it to go to the Committee of the Whole, where it may be discussed to the end of the session without coming to any conclusion thereon. Gentlemen have talked a great deal about skulking and dodging questions; but he would ask who ever saw such dodging as there had been on this question. Gentlemen desired not only to dodge the question, but to dodge behind the rules of the House to save themselves from having their arguments answered, and their denunciations exposed.

It was easy to make assertions, but it was not so easy to prove them; therefore, gentlemen endeavor to shield themselves by having the subject referred to the Committee of the Whole. Let the American people see what party support a national bank; let them see their strength, and what prospect there is for them to succeed, and they will be satisfied. The farming and mechanical interests are now satisfied. Who, then, are making all these complaints? It is the bankites, the rag barons, and the stockjobbers. These are the men who are endeavoring to render the Government unpopular with the people, and make them discontented with their country. The rapid strides which the bank is making for almost universal dominion in America, warn us of the necessity of letting the country and the world know its fate as soon as possible. We have heard but recently of this institution sending an agent to Europe, perhaps to interfere with our commerce. Every day admonishes us of the danger of the bank; and shall we longer sit by and encourage agitation, and add to its power of doing injury to the country? He hoped that the democracy of this House would give it as their opinion to the

democracy of the country, and to the agricultural, mechanical, and laboring interests of the country, that it was inexpedient to establish an institution which had declared war upon the country, and stood out against the sovereignty of the people themselves. Let them know this; let the world know it, and we will bear but little of this distress which has been so long sounded in our ears. If, however, this subject is kept in agitation before this House and the country, the cry of distress, and panic, and confusion will be kept up, the President will be denounced, and a Bank of the United States will be held up as the only panacea for the country. Gentlemen could not suppose we are ignorant of the game they are playing. They tell us the time has not arrived for introducing the subject of a national bank. But what do they mean by this? They mean that they do not want it condemned; they do not want the true voice of the people spoken on this subject, because they know it would be against them.

He hoped that no one who was opposed to the recharter of this institution would hesitate in voting to reject the proposition submitted by the gentleman from Pennsylvania, to refer this resolution to the Committee of the Whole on the State of the Union.

Mr. CUSHMAN said, that believing every gentleman to have made up his mind on the question in relation to the expediency of chartering a national bank, and that the state of the public business would not permit of its further discussion, he moved the previous question.

Mr. HAYNES moved a call of the House, which was ordered; and the roll having been called over, and 195 members answered to their names—

Mr. MORGAN moved to dispense with all further proceedings under the call, which was agreed to.

The previous question was then seconded—ayes 83, noes 80.

Mr. REED called for the yeas and nays, on ordering the main question; which were ordered, and were—yeas 101, nays 101, as follows:

YEAS—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Bouldin, Bruyn, Buchanan, Bynum, Cambreleng, Timothy J. Carter, Chapman, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Crary, Cushman, Davee, Dromgoole, Duncan, Edwards, Elmore, Fairfield, Isaac Fletcher, Fry, Gallup, Gholson, Glascock, Gray, Haley, Hammond, Hamer, Harrison, Hawkins, Haynes, Holsey, Holt, Hopkins, Howard, Hubley, William H. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Joseph Johnson, Nathaniel Jones, John W. Jones, Kilgore, Klingensmith, Leadbetter, Logan, Archibald Loomis, James M. Mason, McKay, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, Samuel W. Morris, Noble, Owens, Palmer, Parmenter, Paynter, Pennybacker, Pettrick, Phelps, Pickens, Plumer, Potter, Pratt, Prentiss, Reilly, Rhett, Rives, Shaffer, Shields, Shipley, Smith, Spencer, Stewart, Taylor, Thomas, Thoms, Toucey, Turney, Vanderveer, Vazenger, Webster, Thomas T. Whittlesey, Jared W. Williams, Worthington, and Yell—101.

NAYS—Messrs. Adams, H. Allen, John W. Allen, Ayer, Bell, Biddle, Borden, William B. Calhoun, John Calhoun, William B. Campbell, Casey, Chambers, Cheatham, Childs, Clowney, Corwin, Canston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Everett, Ewing, Richard Fletcher, Rice Garland, Goode, James Graham, William Graham, Grennell, Hall, Halstead, Harlan, Harper, Henry, Herod, Robert M. T. Hunter, Jenifer, Henry Johnson, William Cost Johnson, Lawler, Lewis, Lincoln, Andrew W. Loomis, Lyon, Malbury, Marvin, Samson Mason, Martin, Maury, May, Maxwell, McKennan, Menefee, Mercer, Milligan, Matthias Morris, Calvary Morris, Navlor, Noyes, Ogil, Patterson, Patton, Pearce, Peck, Phillips, Pope, Potts, Rariden, Read, Rencher, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, Augustine H. Shepperd, Charles Shepard, S. de Snyder, Southgate, Stratton, Tallaferra, Thompson, Tillinghast, Tabard, Underwood, Albert S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, and Yorke—101.

The CHAIR voted in the affirmative, so that the main question was ordered to be now put.

Mr. CLARK inquired if it would now be in order to move to lay the subject over until to-morrow.

The CHAIR replied that it would not be in order, the main question being ordered to be now put.

The main question was then reported as follows:

Resolved, THAT IT IS INEXPEDIENT TO CHARTER A NATIONAL BANK.

Mr. WISE called for the yeas and nays on the main question, which were ordered, and were—yeas 122, nays 91, as follows:

YEAS—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Bond, Bouldin, Broadhead, Bruyn, Buchanan, Bynum, Cambreleng, T. J. Carter, Casey, Chapman, Cilley, Claiborne, Clark, Cleveland, Clowney, Coles, Connor, Craig, Crary, Cushman, Dawson, Davee, Dromgoole, Duncan, Edwards, Elmore, Fairfield, Isaac Fletcher, Fry, Gallup,

Gholson, Glascock, Grandland, Gray, Griffin, Haley, Hammond, Hamer, Harrison, Hawkins, Haynes, Hoisey, Holt, Hopkins, Howard, Hubley, William H. Hunter, Robert M. T. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Joseph Johnson, Nathaniel Jones, John W. Jones, K. J. Kingensmith, Legare, Leabather, Lewis, Logan, Arphaxad Loomis, Lyon, Mallory, James M. Mason, Martin, McKay, A. McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, Matthias Morris, Samuel W. Morris, Muhlenberg, Noble, Ogle, Owens, Palmer, Parmenter, Paton, Paynter, Pennybacker, Perlick, Phelps, Pickens, Plumer, Potter, Pratt, Prentiss, Reily, Rhett, Rives, Robertson, Sheffer, Shields, Shipley, Smith, Snyder, Spencer, Stewart, Taliaferro, Taylor, Thomas, Thompson, Titus, Toucey, Towus, Turney, Vanderveer, Wagener, Webster, Thomas T. Whittlesey, Jared W. Williams, Worthington, and Yell—122.

**YAYS**—Messrs. Adams, Heman Allen, John W. Allen, Ayer, Bell, Biddle, Borden, William B. Calhoun, John Calhoun, William B. Campbell, Chambers, Cheatham, Childs, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Davies, Deberry, Dennis, Dunn, Everett, Ewing, Richard Fletcher, Filmore, Rice Garland, Goode, James Graham, William Graham, Graves, Greenell, Hall, Halstead, Harlan, Harper, Hawes, Henry, Herod, Jenifer, Henry Johnson, William Cost Johnson, Lawler, Lincoln, Andrew W. Loomis, Marvin, Samson Mason, Maury, May, Maxwell, McKennan, Mercer, Mercer, Milligan, Calvary Morris, Naylor, Patterson, Pearce, Peck, Phillips, Pope, Potts, Rariden, Randolph, Reed, Rencher, Ridgway, Rumsey, Russell, Sergeant, Augustine H. Shepperd, Charles Shepard, Sibley, Slade, Southgate, Stanley, Stratton, Tillinghast, Toland, Underwood, Albert S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, and Yorke—91.

So the resolution was agreed to.

The House then passed to the orders of the day.

#### DIVORCE BANKS BILL.

The bill from the Senate, entitled "an act imposing additional duties in certain cases on public officers," was taken up on its reference.

Mr. **CAMBRELENG** remarked, that as this bill corresponded in almost all its provisions with the House bill under the same title, reported by the Committee of Ways and Means, and referred to the Committee of the Whole on the state of the Union, in order, therefore, that there might be no delay upon the action of this bill; and as there was only one slight difference between them, he had been instructed, he said, by the Committee of Ways and Means, to move that this bill be at once committed to the same Committee of the Whole as the other.

The motion was assented to, *nem. dis.*

#### TREASURY NOTES.

The House then proceeded to the consideration of the "bill to authorize the issuing of Treasury notes."

The bill had been entirely amended in Committee of the Whole, and a substitute submitted by Mr. **CAMBRELENG** adopted.

Mr. **RIETT** moved to amend the first section by inserting in the second line, after the word "notes," the following: "or bills receivable in payment of the public dues;" and supported his amendment at some length, and went somewhat at large into the subject generally.

Mr. **FLETCHER** opposed the bill, on the ground of its not being required, and therefore they were not justified in incurring a debt when the Government had sufficient means in hand. What were they? The bonds of the Pennsylvania Bank of the United States amounting to \$6,000,000, without interest, which might be readily sold in Europe, even for specie, if it was wanted. Then there were \$16,000,000 in the deposit banks, which might be rendered available by drafts being drawn on it. These were sufficient resources for all the necessities of the Government, without incurring a loan of \$10,000,000.

He objected to the bill, also, because it was deceptive in its mode. The object and purpose of the bill were not consistent with its title. Instead of merely authorizing the issue of ten millions of Treasury notes, it was really a bill authorizing a loan of ten millions, and that should be its title. It was therefore deceptive in its character, and nothing more nor less than an imposition.

He also objected to it on the ground of unconstitutionality, and inquired where existed the power of the General Government to issue bills of credit? Such a power belongs not to it.

The discretionary power left the Executive to fix the rate of interest on the Treasury notes, short of six per cent. was another valid objection he had to it. It was involving uncertain legislation, vesting too much power in the Executive, and disrobing the legislative department of that which was peculiarly and strictly within its province.

Mr. **CUSHING** said it would be idle for him to think of adding any thing to the force and clearness of the observations of his colleague, (Mr. Fletcher;) but one of the remarks made by that gentleman had recalled to his recollection a curious fact, bearing upon the question at issue, which he begged leave to state to the House.

It would be remembered, that one of the main arguments of those gentlemen who deny the constitutionality of a national bank, is the consideration that the power to establish such a bank is not expressly given to Congress in the Constitution; that it is what is called a constructive power; and that a proposition was made in the convention which framed the Constitution to confer on Congress power to create corporations, and rejected.

Now that (said Mr. C.) the analogy between this question of a national bank, and that of bills of credit, is perfect in all its parts. There is no express power in the Constitution for Congress to issue bills of credit. It is a constructive power, just as much as the power to establish a national bank; and Mr. Pinckney of South Carolina proposed, as may be seen by the printed journal of the convention, that in the enumeration of the powers of Congress, one clause should read thus: "To borrow money and emit bills of credit." This latter branch of the proposition the convention rejected: the actual provision as to loans being in these words: "To borrow money on the credit of the United States."

Mr. C. said that, without himself admitting the conclusiveness of the arguments adverse to the constitutionality of a national bank, he did not see how those who did entertain that view of the Constitution could consistently support a law for the emission of bills of credit.

Mr. **PARMENTER** supported the bill, and opposed the proposition to sell the United States Bank bonds in Europe, showing that it would lead to results similar to those which had lately taken place. He also insisted that the resources adverted to by Mr. Fletcher were not available. The issue of Treasury notes was far preferable to a loan, or to the issue of Treasury drafts. The former would be taken by the large cities, the latter would be in large and inconvenient sums, and would thence fail in giving general relief to the country, because they would not become current.

Mr. P. then traced the evils of the present condition of things to their source, arising out of the universal spirit of speculation in land, town lots, new inventions, &c. and in conclusion, he said, that after having examined the report of the Secretary of the Treasury, he was well assured there would be a deficiency of our resources, and that this bill proposed no more than was absolutely required for the indispensable wants of the Government.

Mr. **CROCKETT** questioned the declaration made by some gentlemen, that there were no embarrassments felt in the country, for they were not only acknowledged by the President in his Message, but were felt in almost every section, and yet not one of the bills proposed by the Committee of Ways and Means was designed for the relief of the people.

In reference to the bill under consideration he objected to it, because it clothed the President with power to create a national debt: for this scheme, he contended, was nothing more nor less—while nothing was intended for the people, who were to be dismissed with a lecture on prudence, moderation, and economy. He likened this course to the case of Job and his wife, whose only comfort and consolation she afforded to her husband was well known. This was pretty much like what the President said to his constituents, to the people. Mr. C. denounced the system of the Sub-Treasuries, or what he regarded as a Treasury bank. In reference to the late President, he said it appeared that he was not alone content with dictating his successor, but he must also dictate what that successor should do. Instead of attempting to devise means to keep up the present prodigal and extravagant expenditures of the Government, Mr. C. was for beginning at the right place, and in the right manner, viz: by retrenchment, reform, and economy. Moreover, it had been, to his mind, shown conclusively, that these \$10,000,000 would not be wanted,

after withholding the deposit of the fourth installment with the States. But even if it were otherwise, he said, so let it be. If the Government had actually brought itself into a state of insolvency, it ought to be known. He denied, however, that the balances in the deposit banks were unavailable, since Treasury drafts drawn upon those deposits would be taken every where; nor could he see the difference between a protested Treasury draft and a Treasury note bearing interest. In conclusion, he was in favor of a national bank, as the only means of furnishing the country a sound and uniform currency, and of regulating the exchanges. Of the power of Congress to charter such an institution, he had no constitutional doubts whatever; and if he had, he would not set them up against the overwhelming authority on the other side. Even if it were true that the late bank had been guilty of all the charges alleged against it, that offered no good reason why they should not have another, with proper safeguards to prevent a recurrence of such abuses, if any such existed. He believed there was a large majority of the people in favor of a national bank, if their sense could be fairly ascertained.

Mr. **HAMER** had thought last night that the debate on this bill was closed, but it seemed that they had taken a fresh start that morning. He himself did not rise to make a speech, but briefly to throw out a few suggestions in reply to some things that had been thrown out by gentlemen in the course of the discussion.

Some complaints had been made of the order in which the business of the House had been brought before it. Gentlemen had urged that this bill ought to have been laid aside, and that the bills to allow time to the deposit banks, and to postpone the payment of merchants' bonds, should have been first disposed of, before the final action was had upon the present bill. Now, there were two reasons why that was not the proper course.

The first was, that, so far as had been seen by the course, and gathered from the declarations of gentlemen in the opposition, they were opposed to all the measures brought forward; and hence it was but fair and reasonable that the friends of those measures should be allowed to select the order in which they should be brought before the House. That was one reason.

The other was, that the Government ought to act, in regard to this matter, precisely as an individual would in similar circumstances. Suppose that he owed a thousand dollars, and was unprepared to pay it when called upon, and asked time of his creditor; that creditor said he would give him time if he (the creditor) could raise it from any other source—must not that creditor ascertain first whether he could raise the amount of money before he could indulge him (Mr. H.) his debtor? That was precisely what they wanted to ascertain in the present case. They were first to ascertain whether they had the means of granting the indulgence proposed in the other two bills, before they could take upon themselves to do so. This was fair and reasonable, and was the only perfectly proper course.

Now, in regard to the arguments advanced that morning by the very able gentleman from Massachusetts, (Mr. Fletcher.) That gentleman insisted that this bill was unnecessary, and assigned his reasons. He said they should sell the claim upon the Bank of the United States. Why, the Government was now out of money, and wanted funds immediately. Which, then, was the most reasonable: for the Government to go into the market and force a sale of that claim, and the paper she holds against the Bank of the United States? or to issue Treasury notes, and take time to render that debt available, or collect it at maturity? Was a forced sale advantageous, under any circumstances, either to an individual or to the Government? Certainly not. It is better, therefore, that the notes should be issued.

Again: There was a large amount in the deposit banks, said the gentleman. Now they heard that repeatedly before, but did not every gentleman there know, that the amount in the deposit banks could not be commanded at that time? Nay, more: was it not insisted by gentlemen of the oppo-

sition, that that money should not be commanded under one, two, or three years.

What was another argument connected with this proposition? It was that they might issue Treasury drafts upon the banks, and suffer them to be protested, and circulated through the community, as now, instead of notes. Why, in the first place, they had heard from all quarters of the Union, that the Secretary of the Treasury had no right to issue drafts upon the banks, knowing they would be protested. But suppose he had the right, was there any difference between those drafts now circulating and the Treasury notes they proposed to issue? Where was the difference between drawing a draft upon a bank, which they knew would not be paid, but would be protested and allowed to circulate through the community upon the credit of the Government, and a Treasury note, which was to circulate *exclusively* upon the credit of the Government, and with the belief that the amount it represents will be paid the moment the banks are in a condition to pay? Now if any gentleman was so astute as to be able to point out any difference—not the metaphysical, but the practical, difference—he would be glad to hear it. Both were certainly circulated on the credit of the Government.

But it seemed that these notes, in the opinion of some gentlemen, were unconstitutional; and then, from all quarters, they were told it was a loan—a loan in disguise. Well, if it be a loan, did not the Constitution expressly authorize the Government to borrow money for its needful wants? If it be a loan, as they admit it to be, and so Mr. H. admitted, in one sense, but not in the ordinary sense in which a loan was understood—but if it were, the Constitution authorized them to borrow money whenever the necessities of the country required them to do it. How was it a loan? Why, it was just such a loan as he would make to an individual to whom he was indebted, and who called upon him for a settlement, and he could not pay him, but gave him his note promising to pay him in a year. In that sense, but in no other, was it a loan; but no one would so understand it. It was precisely that kind of transaction too. Those who had claims upon the Government called for their money; the Government had not got it, because the merchants and the banks could not pay her, and what does she do? Why, give her notes, and say she will pay up at the end of a year. This is a plain every day transaction between individuals.

Again, it was said this bill would be a burden upon the people. How a burden upon the people? He heard that complaint rung throughout the House, and he asked, how was it a burden upon the people? Did it propose any new tax upon them? Did it propose any levying fresh burden? Did it take any money out of their pockets? If they regarded the bill passed to withhold the fourth instalment of deposits with the States as furnishing the means to redeem these notes, in that way it was a burden. But no body pretended that those notes were to be so redeemed, or to be redeemed at all, except when the deposit banks and the merchants paid up their debts.

Gentlemen talked, too, a good deal about the people not understanding this. Mr. H. had a higher respect for the intelligence of the people. They would understand it; they did understand it.

Mr. PHILLIPS then took the floor, and commenced an argument against the bill, but his remarks were cut off by the arrival of the hour (half past 2) for the House to take its daily recess till four o'clock.

#### [EVENING SESSION.]

Mr. ADAMS, on leave, submitted the following resolution, which was considered and adopted:

*Resolved*, That the Secretary of the Treasury be directed to lay before this House, the last weekly statement of the Treasurer of the United States, showing the amount at his credit in the late deposit banks, by the returns last received from the said banks; and specifying what portions of the balances due from the said banks, at the times given in the statement annexed to the report of the said Secretary on the finances, made at the com-

mencement of the present session of Congress, have been since drawn from the said banks respectively.

On motion of Mr. EVERETT, the Committee on Public Buildings obtained leave to sit during the sessions of the House.

#### TREASURY NOTES BILL.

The House then resumed the consideration of the "bill to authorize the issuing of Treasury notes," being the substitute reported from the Committee of the Whole on the state of the Union.

The question pending was on the amendment of Mr. RHETT to amend the first section, as stated in this morning's proceedings.

Mr. PHILLIPS resumed his remarks. He endeavored to prove that the most injurious effects had resulted from the late measure of the Secretary of the Treasury in allowing a large amount of deposits to remain in several isolated banks, while he withdrew nearly the whole sums deposited with the banks on the seaboard. It was his opinion that much of the distress now existing in the commercial cities was to be attributed to that measure. He referred to the prospects of the country for the ensuing year, and contended, that from the report of the Secretary, and the statements given in the House, if a balance were drawn, the amount of difference between the expenditure and receipts would not exceed two or three hundred thousand dollars. He would tell them frankly, that when he came here his impression was, that the only practicable relief was the creation of a Government loan, by which our account with Europe could be speedily closed, or to issue such kinds of Treasury notes as would be useful to the people; and he thought that the payment of the fourth instalment of the deposits would be the means of distributing these notes to the country. But that measure had failed, and with it a great portion of the ground for issuing these notes.

It was his opinion that specie payments would not be resumed for the present, if the measures now before the House were adopted; and he also wished it to be known that, in his opinion, the period of distress had not passed over. It still existed, and, under the present state of things, must increase. Some gentlemen had attributed the distress to overtrading; but, although he would admit that might have had some influence, yet the great evil which they were called on to remedy was that of obstruction to our credit, both at home and abroad, and to restore the currency to its former state, and the banks to that confidence they enjoyed before the suspension of specie payments. It was desirable that they should make the notes of the banks receivable for public dues; and, when they had done that, they would have done all that was expected from Government; for, when such notes were so receivable, confidence would be restored, and nothing more would be wanting. He could not vote for the bill to its present amount; and, if Treasury notes were issued at all, he would suggest the expediency of issuing them without, rather than with interest.

Mr. HOWARD said that he would make a few remarks in reply to the gentleman from Massachusetts, (Mr. Phillips,) upon the point which had been very zealously pressed upon the House by him. It was proposed to raise the money which the Treasury wanted, by a sale of the bonds of the Bank of the United States, instead of issuing Treasury notes. As a financial measure, Mr. H. said, his understanding was not convinced of its propriety, although he freely admitted that the gentleman from Massachusetts was much more conversant with such subjects than himself. It seemed to him that this plan of selling the bonds of the bank was urged upon the House with great pertinacity. During the discussion of the bill to postpone the fourth instalment, it was the policy of the opponents of that measure to show that the Treasury had ample resources at command, and the conversion of those bonds into cash was directly in the track of the argument. But that matter had been decided, and the question now was merely whether the Government should use its own credit, or that of the bank, in order to raise funds.

If the proposition to sell had been brought forward by the adversaries of the bank, and sustained

upon the ground that it would be wise to part with the bonds for whatever they might bring, because the bank had not paid the first bond at maturity, it would have been an argument that he could understand. Mr. H. said that he begged to inquire from the chairman of the Committee of Ways and Means whether the first bond, which was due on the first of October, had been paid?

[Mr. CAMBRELENG replied, that no notice of its payment had been received, and that the Secretary of the Treasury had been obliged to write to the president of the bank about it.]

Mr. H. said that it was generally reported that the bank intended to set-off certain Treasury warrants or drafts which had been issued, in payment of the third instalment, to some State under the deposit act, into the correctness of which step he would not now enter, as it would lead him out of his way.

The reason why he mentioned it at all was to show, that if the bank thought itself entitled to discharge the first bond in this way, it might think it just to pay the others by the same set-off; because the assignee of a bond would take it subject to all the equity which attached to it in the hands of the obligee. What would these bonds sell for at the risk of being paid off in this manner? It was true that we might direct otherwise by law; but then it would be a harsh measure, deprive the bank of a privilege which belonged to every body else—that of paying its debts to the Government in such paper as was received from all other persons. If this course had been recommended by the Committee of Ways and Means, might it not have been deemed severe, and tending to embarrass the operations of the bank? But to consider it strictly as a financial measure, what did it amount to? When we had to choose between using the credit of the Government and the credit of the bank, why should we prefer the latter. He admitted that the credit of that institution stood high, both in our own country and Europe, and he had not the slightest wish to impair that credit. But it was not equal to that of the Government. Would the gentleman from Massachusetts contend for this? He apprehended not. But let us follow out the operation. Suppose the bonds put up for sale in New York. In what money would payment be required? In specie, or notes of non-specie paying banks? The existing laws forbade the reception of the latter, and specie must therefore be required. Where would six millions of dollars in specie come from? It would be unwise to tempt the banks to bring it out of their vaults, in order to purchase these bonds, because the abstraction of such a quantity would retard a resumption of specie payments, which all agreed in wishing to hasten. Would the hoards of individuals be brought out, and vested in these bonds? Perhaps they might, but they might more reasonably be expected to be enticed from their hiding places by Government securities. Even if the bonds should be thus sold, the currency of the country would remain just as it now is, and no facility be afforded for domestic exchanges, which was one great object of the present bill. Treasury notes would be a valuable addition to the existing circulating medium, because they would enable remittances to be made from one part of the country to another. The plan of the gentleman from Massachusetts, on the contrary, just left things as they were without moving a single inch towards the relief of the mercantile community. But it had been said that these bonds might be sent to England, and sold there, and the specie brought here. This might be true. He would pass over the delay which must be experienced in the remittance, sale, and importation of the specie, in order to call the attention of the gentleman from Massachusetts to the singular situation in which this proposal placed him. General Jackson had been severely censured by the opposition with interrupting the course of commerce, and forcing exchange, by causing large importations of specie; and here was a proposition to do the same thing, except as to amount. The only difference was, that General Jackson imported thirty millions, and the gentleman proposed to import six. He was actually treading in the footsteps

of Gen. Jackson. But what would be the consequence of such an importation? The Bank of England had become alarmed before, when it found its bullion reduced from eight millions sterling to between three and four, and had taken vigorous measures to prevent further loss, by discounting American bills and lowering the price of cotton, the consequence of which was a necessity of shipping specie from the United States. It had now regained its usual amount, and the price of exchange was gradually falling. But the sudden abstraction of a million sterling from London, could not do otherwise than reproduce the alarm which had now subsided, or was subsiding, and thus we should have fresh trouble. But the gentleman from Massachusetts had also said, that the Secretary might draw bills of exchange upon the proceeds of these bonds, and thus bring down exchange. True, this could be done; and he would concur cheerfully with the gentleman in any measure which could restore the par of exchange, and at the same time relieve our people from their domestic difficulties. But when the bills were sold, the same question arose as about the bonds. In what was payment to be received? It must of course be in specie, and nothing would be added to the currency as a means of making remittances from one State to another. This was the great advantage which the present bill possessed over the amendment, and he should therefore adhere to the bill.

Mr. TOUCEY contended that the bill under consideration was well adapted to the wants of the country, and well calculated to afford relief to the Government and the people; and that, if we attempted to draw the money from the deposit banks while they owe the Government, it will force them to press their creditors, and add to the distress of the community. The country stood in the relation of creditor to the banks and the merchants, and it was its duty to deal with them in such manner as to afford the greatest relief to them. In relation to sending bonds abroad, he must say that he felt a great repugnance to sending them into a foreign market, to raise money upon them to carry on the operations of the Government; besides, if they were sent abroad, it would have the effect of increasing our foreign debt, which now presses so heavily upon us. He supported the bill at some length, and answered the arguments of the gentleman from Massachusetts in relation to the constitutionality of the measure.

Mr. BELL said he had some remarks to make upon the bill, but he would decline doing so, if gentlemen were disposed now to take the question on the amendments; he would not stand in the way of the question being taken. After that, however, he desired to have the opportunity of addressing the House on the merits of the bill, and would then move to strike out the enacting clause for that purpose.

Mr. CAMBRELENG suggested to the gentleman to allow the question to be taken on the amendment, and on the engrossment of the bill; and then he would have the opportunity of discussing the whole merits of the bill on its third reading.

After a few remarks by Mr. WISE, the question was taken on the amendment of Mr. RHETT, and it was rejected.

Mr. UNDERWOOD then moved to strike out all after the enacting clause, and insert:

"That the Secretary of the Treasury be authorized to sell and transfer to the purchaser or purchasers the bonds or evidences of debt executed by the president, directors, and company of the Bank of the United States of Pennsylvania, for and in consideration of the stock held by the United States in the late Bank of the United States, and to apply the money arising from such sale and transfer, in payment of any demands upon the Treasury: *Provided, however,* That no sale and transfer of said bonds or evidences of debt shall be made for a less sum than the nominal amount of said bonds or evidences of debt, exclusive of interest."

Mr. WHITTLESEY of Ohio called for the yeas and nays on the adoption of this amendment; which were ordered.

Mr. PATTON then suggested an amendment to the gentleman from Kentucky, which he hoped the gentleman would accept as a modification, which

was a provision directing the Secretary of the Treasury to draw drafts on the deposit banks for the balances due the Government in favor of public creditors; directing the Secretary also to receive such drafts in payment of all dues to the Government. He explained his object to be to prevent the issue of Treasury notes, except in cases of very great emergency. He thought this to be the proper course of proceeding, and took it to be extraordinary that the chairman of the Committee of Ways and Means should not have brought forward a proposition of this kind, when, on a late occasion, at the time a war with France was expected, that gentleman had brought forward a proposition to sell the stock in the Bank of the United States. Now, however, the gentleman had left this proposition to be brought forward by a friend of the Bank of the United States. He went into an argument some length in support of the proposition he had brought to the notice of the House.

Mr. UNDERWOOD accepted of the gentleman's amendment as a modification.

Mr. CAMBRELENG. The gentleman from Virginia (Mr. Patton) had referred to a period some years since, when the country was upon the eve, or supposed by some of us to be on the eve, of a French war, when an amount of money was due from the Bank of the United States, and which money the Committee on Foreign Affairs at that time (the same being actually due, and not then converted into bonds) supposed might be applied to the public emergency.

The gentleman had expressed great surprise that a friend of that bank should make this proposition now, and that Mr. C. and others, who were so much opposed to the bank, should oppose it. Now he had attributed to that gentleman a little more sagacity. He did not suppose that any gentleman opposed to the Bank of the United States would wish to adopt a proposition which, if adopted, would compel them to alter the title of the bill under consideration, and make it read, "a bill for the benefit of the Bank of the United States."

What was the proposition but to sell the bonds of the bank, with the endorsement of the United States upon their back; thereby making them, in effect, the bonds of the United States? And that the gentleman called "a divorce and separation of this Government from the Bank of the United States!" They were to endorse the bonds of that bank, and then go into the market as merchants and sell them, with the endorsement of the United States upon them. We might with equal propriety dispose of the merchants' bonds in the same manner.

What, then, would be the next operation? Why, that the Bank of the United States would itself indirectly buy them. Where were six millions of dollars to be raised? Was there any capitalist in this country, or any association of capitalists, or any institution, except the bank of the United States, that could, at the present crisis, purchase this stock? There was not. The bank would have no competitor, and would itself purchase her bonds, not directly, but by an agent, who would pay for them by drafts on some banker in London, aided, perhaps, by the Bank of England. They would be transmitted to London, and the bank would realize an immense profit by the operation. Mr. C. had no doubt that every friend of the bank upon that floor would vote for the proposition, since it would put at least \$100,000 (more probably half a million) into the pockets of the stockholders of that institution. But how is it proposed to realize this amount? When is it to be paid—when, and what description of money? In the meantime, where were the Government debtors to procure money to pay their debts to the Government? Or where was the Government itself to get the means of paying its current expenses in every quarter of the Union? Was any body to be benefitted by such an operation? Nobody, but the Bank of the United States.

Mr. C. said there were two extremes to this proposition for supplying the Treasury with means. Before he would consent to put forth the bonds of the Bank of the United States with the endorsement of the Government upon them, and then send them through the agency of the bank itself to England for disposal, he would infinitely prefer

at once an issue of Government stock. It would be degrading to this country to issue its credit in the form of an endorsement. Their credit was amply sufficient without any connection with that of the Bank of the United States. The proposition for stock was the extreme on one side. It would suit very well the gentleman from Massachusetts, (Mr. Fletcher.) It would suit very well the great capitalists of this country who wanted to make investments. To them it would give relief, very great relief, and profit too; but let him tell the gentleman from Massachusetts, that the merchants who owe their bonds to the custom-house, and others who have debts due them from other States, would not thank the gentleman. Neither would merchants in the West and Southwest, and in the interior, thank the gentleman for substituting a stock in place of supplying them with a medium of remittance to their creditors in the Atlantic cities. An issue of stock was one extreme of the proposition.

The other extreme was the proposition of the gentleman from South Carolina, (Mr. Rhett,) to issue Treasury notes, without interest. Mr. C. spoke not then of the character of notes of that description—but in effect it was best for our internal circulation. We had, however, bills before us, which would undoubtedly pass, postponing almost all our Treasury receipts till the next year. There was danger, therefore, that such notes would become depreciated. As Mr. C. said, when up before, he did not wish this Government to issue Treasury notes of any description, in any form whatsoever, liable to depreciation. There was already an outcry throughout the country against depreciated paper. We had too much of it now; and the evil would be augmented, if the credit of the Government should become depreciated. He was anxious to guard against that event. For this reason, among others, he had therefore come to the conclusion that it was better, taking all interests into consideration, to adopt the issue of Treasury notes, bearing a moderate rate of interest.

The beneficial effect of these notes would be felt from one end of the Union to the other. Take the southwestern country alone. They would be paid out for the expenses of the Florida war, and for other expenditures in the interior. This would enable the merchants, through them, to liquidate their debts in the Atlantic cities. When, in the form of remittances, they reach these points, they would be paid into the custom-houses, or remitted abroad. The amount issued in the northeast, either for expenditures or to raise means for the Treasury, would also be in part purchased for remittances abroad. But the two gentlemen from Massachusetts, (Messrs. Fletcher and Phillips,) or at least one of them, tell us that they will not be sent abroad; and why? Because the certificates were not in duplicate! Why, sir, are certificates of bank and State stocks, of which millions are remitted to Europe, issued in duplicate? But these Treasury notes were payable in twelve months, and could not therefore be negotiated. Sir, what have we seen within a few months past? Have we not seen the twelve months' bonds of the United States Bank remitted to London and sold there? Nay, have we not even seen the bonds of the Morris Canal company—an institution by the way not of the most unquestionable credit—have we not seen even the bonds of that company remitted and sold abroad. Yes, sir, gentlemen tell us that five per cent. Treasury notes issued by the Government of the United States can not be remitted to discharge any portion of our foreign debt.

In conclusion, Mr. C. said he did hope the House would adopt such a measure as would go to maintain the credit of this Government, by authorizing the issue of Treasury notes with interest. The sale of the bonds might be very profitable to the Bank of the United States. The issue of a stock might be advantageous to our banks and capitalists. The Treasury notes without interest, would relieve our internal trade from much embarrassment; but Treasury notes with interest, would essentially afford relief to every part of the Union, and aid in equalizing our internal and external exchanges.

Mr. THOMAS said he had not heard the objections urged by others to the amendment of the gen-

tleman from Kentucky, (Mr. Underwood,) and might, therefore, possibly offer considerations to the House similar to those that had been presented. If so, he should regret it; for he did not desire to extend our sessions, and weary the patience of the House, by repeating arguments which had been submitted over and over again. He would prefer to be a silent spectator of the scene, whenever the reasons upon which his vote was to be based had been assigned by other gentlemen in the debate.

The amendment before the House presents two propositions to be decided. What are we about to do? Let a direct answer be given; there is no necessity for disguise. Congress is about to act for a people having intelligence enough to understand distinctly the position in which the country is placed, and patriotism to sanction and sustain any measures called for by the public interest. Gentlemen are deceived if they suppose that the true state of the Treasury is, or need be, made a mystery. The whole country knows that the Secretary of the Treasury has not at command available means. It is not pretended however that the public money has been wasted or unwisely or illegally expended. It is where Congress ordered it, should be placed. But the holders of this treasure, in violation of public law, and of their own solemn contracts, refuse to pay it in legal currency. This being the case, money must be borrowed by the United States to comply with their engagements until the contracts of those selfish and refractory corporations have been enforced. This the amendment offered by the gentleman proposes to do, first, by authority of the Secretary, to issue drafts on the deposit banks.

This measure, I had supposed, would not be offered again by any one who had witnessed a scene which could not have escaped the attention of every member present. After the bill to postpone the deposit of the fourth instalment under the act of 1836 was ordered to be engrossed for a third reading, two members of the House, (one from Kentucky, and the other from Louisiana,) who had opposed that bill in all its stages, proposed to postpone its final passage until after the House had disposed of the bill from the Senate giving indulgence to the deposit banks. They appeared to be suddenly seized by the conviction that there was an intimate connection between those two measures. This, sir, the President well knew when we assembled. Hence he recommended a postponement of the deposit. This, also the majority of this House well understood at the commencement of the session. Unless the Treasury was relieved from the obligation to make the deposit with the States, we foresaw that no indulgence whatever could be given to the deposit banks. The balances due by them to the United States must, in that event, have been immediately collected, or converted into funds that would be received at par by all the States, in exchange for their several bonds, or certificates of deposit. Hence we, the majority of the House, struggled day after day to pass the bill postponing the deposit of the fourth instalment, and we have succeeded; I regret to add, sir, without the aid of many gentlemen representing States in which deposit banks are located, having a large amount of public money due from them to the United States, and due to them by the people of those States. Now sir, is there the slightest reason for supposing that the majority of this House will change their purpose. We have relieved the Treasury of the United States from the onerous responsibility, that we might indulge the deposit banks, and enable them to indulge in turn their debtors. When the bill for that purpose comes up for consideration, those who voted for the bill to postpone the deposit, will vote to give time to the banks, and to these (judging from the scene to which I have referred) will be added a large proportion of members who have impeded the progress of the law which has passed. They will not refuse, I predict, confidently, to accept for their constituents the advantages which Congress can now conveniently offer. But there can be no necessity for this detail. There is not an intelligent member of this House who doubts about the passage of a law to give time to the deposit banks. As to the

extent of time to be given, there are, and will be, different opinions. But time will be granted. This being known, of what value are all those tabular statements which gentlemen have exhibited to the House and to the country, showing the amount of money in those banks? These columns of figures serve but to obscure a question otherwise clear of all serious difficulty. We intend, by law, to release the banks from all obligation to pay any part of the money at this time. We intend, in effect, to pass this money out of the Treasury, and give absolute control over it to the directors of the banks for a limited time, and to receive in lieu thereof of the bonds of the banks. Has not then this House passed several weeks in a most unprofitable debate, intended to determine precisely the amount of these funds? We are looking for available means in the Treasury now, at this time, not next year; and gentlemen who undertake to aid the House in its deliberation, go off into a labyrinth of figures to determine the amount of a fund which all admit will not be in the Treasury when this House adjourns. I have considered this debate in a great degree—with unfeigned respect for the able gentlemen who have participated in it I say so—a useless and unprofitable consumption of precious hours. If gentlemen who have opposed the measures recommended by the administration, had proposed to deposit with the States the bonds we are to receive from the deposit banks, I could have comprehended fully what they were at. And if they would now submit a motion to amend the bill before us, so as to authorize the use of the bonds we are to receive from the banks, to pay the debts of the Government, this object would be direct and easy to be understood by the country. Instead of this, we have had proposition after proposition, requiring the Treasurer to issue drafts for funds which we all know will not be subject to draft after we shall have passed, as we will pass, the bills before us. These movements may satisfy a small, a very small portion of the people; but the great mass of the community can not but condemn any attempt to leave the Government without other means to comply with the public engagements but Treasury drafts, that we know will not be paid, and which we, by law, intend to say shall not be paid, on demand. Such a proceeding would be ridiculous in the extreme. We all know that the drafts of the Treasurer, heretofore issued, have been dishonored by the banks, and protested for non-payment. We know, too, that these drafts are in the market below the value of gold and silver, the standard by which all legal tenders, in payment of debts, is to be tested. Would it not, under such circumstances, be discreditable to Congress to adjourn without providing better means than depreciated Treasury drafts to pay the debts of the people of the United States?

Mr. BOULDIN addressed the House at some length, in support of the amendment of the gentleman from Kentucky, (Mr. Underwood;) when,

On motion of Mr. BOND,  
The House adjourned.

MESSRS. BLAIR AND RIVES:

You are respectfully requested to state in your paper, that the undersigned, having been casually absent when the question was taken this morning on the resolution "that it is inexpedient to charter a national bank," would, if they had been present, have voted in the affirmative. Yours, etc.

ROBERT McCLELLAN, JOHN CHANEY,  
HENRY VAIL, HENRY A. FOSTER,  
AMASA J. PARKER, R. BORN,  
JOHN J. DEGRAFF, A. P. GRANT,  
JOSEPH WEEKS, ISAAC H. BRONSON.  
JAMES FARRINGTON,  
October 5, 1837.

CORRECTION.—In the short sketch which we gave yesterday of the remarks of Mr. Tillinghast, in his speech on the Mississippi election, he is reported to have said, that "There (in Rhode Island) the Legislature provided for the case of an earlier election of representatives." etc. This was an error in reporting. Mr. Tillinghast's statement was, that such a provision was there deemed to be properly and exclusively a subject for legislative ac-

tion, and that a bill providing for an earlier day for the election than that ordained by the existing law, was moved and considered, though it did not prevail.

#### HOUSE OF REPRESENTATIVES,

FRIDAY, October 6, 1837.

Mr. HAYNES withdrew the motion to reconsider the resolution in relation to the exploring expedition.

Mr. THOMAS asked the general consent of the House to take up the bill to continue in force certain laws to the close of the next session of Congress.

Mr. WISE inquired what laws were intended to be continued.

Mr. THOMAS, after some explanations, moved to discharge the Committee of the Whole from the further consideration of this bill, with a view to have it taken up and acted upon in the House; which motion was agreed to; and the bill having been read by the Clerk,

Mr. BRIGGS moved to recommit the bill to the Committee on the Judiciary, with instructions to report the titles to the bills to be continued in force; which motion was disagreed to.

The bill was then ordered to be engrossed, and read a third time to-day.

At a subsequent stage of the proceedings, the bill was read the third time and passed.

Mr. WISE and Mr. MORGAN, on leave, presented petitions.

[Mr. Wise presented a memorial of sundry ladies and gentlemen, of Halifax county, in the State of Virginia, praying Congress to provide suitable husbands, at the national expense, for all female petitioners upon the subject of slavery; thereby giving their minds a direction calculated to make them good matrons, and averting the evils with which the priesthood and fanaticism of the eastern States threaten the people of the south.]

#### INQUIRY IN RELATION TO THE FLORIDA WAR.

The House then proceeded to the unfinished business of the morning hour, which was the consideration of the following resolution, submitted by Mr. WISE on the 19th of September:

*Resolved*, That a select committee be appointed by ballot to inquire into the cause of the Florida war, and into the causes of the delays and failures, and the expenditures which have attended the prosecution of that war, and into the manner of its conduct, and the facts of its history generally; that the said committee have power to send for persons and papers, and that it make report to the next session of Congress.

Mr. GLASCOCK had moved to amend the foregoing resolution, by striking out all after the word "resolved," and insert the following:

"That a select committee be appointed to inquire into the cause of the Florida war, and the causes of the extraordinary delays and failures, and the expenditures which have attended the prosecution of the same, and all the facts connected with its history generally; and that said committee have power to send for persons and papers."

The question immediately pending, was the motion of Mr. HOWARD to strike out the words "that a select committee be appointed," and insert "that the Committee on Military Affairs be instructed."

Mr. LOOMIS, of New York, who was occupying the floor when this subject was last up, and interrupted by the orders of the day, resumed his remarks, and said: That, when this matter was last under consideration, he had commenced some observations in vindication of his predecessor, (Abijah Mann, jr.) from the censures cast upon him by the gentleman from Virginia. He had characterized the attack made upon his predecessor, six months after occurrences had transpired, and when the circumstances of the parties had entirely changed, as extraordinary, and, in his view, entirely unjustifiable, and he was about proceeding, when interrupted, to show that no censure could be imputed to his predecessor, even from the statement of the gentleman from Virginia himself. He was well aware that he might leave the character of his predecessor to its own vindication wherever it was known, and if he had not some observations which he wished to submit on another branch of the sub-

ject, and more directly pertaining to its merits, he should have contented himself to let this matter rest where it was, after so long a lapse of time; but he would show, in a few words, that no censure was imputable to the majority of that committee, or the individuals who had been designated. The gentleman from Virginia had prefaced his charges by a statement, made with all the emphasis of manner which peculiarly distinguish his remarks, by announcing to the House that he was about to make a statement never before communicated to this House or to the country, and the substance of that communication was, the manner in which the reports of the majority and minority of that committee had been made up. And how was it? Why, sir, stripped of its coloring, and stated in brief space, it was, in sum and substance, that the members of the majority had furnished their chairman—the individual of their party first named on the committee—with their separate views, to be embodied into a report, and Mr. Mann had, in addition, furnished his notes of the proceedings and evidence before the committee; and this chairman of the majority, instead of performing the labor of embodying these views in the form of a report, had entrusted them to their clerk, to be arranged, and reduced to form. Now this was the whole substance of the charge announced to the House with so much solemnity, and upon which the answer imputed by the gentleman was grounded. Was there any thing censurable or extraordinary in this? was there any thing which should call down the indignation of this House, or of the community, as might be inferred from the remarks made by the gentleman from Virginia?

The offence particularly imputed to his predecessor, was that he had actually furnished the notes he had taken of the proceedings, as a member of the committee, to assist in making out the report of the committee.

[Mr. WISE interrupted Mr. L. and said that was not the pith of the charge against the gentleman's predecessor. The charge was that he denied that he knew the contents of the report, until it was read in the committee; and Mr. Pearce himself had said it was Mr. Mann who furnished the offensive matter for the report. The charge against the gentleman's predecessor was that he was guilty of falsehood.]

Mr. LOOMIS resumed, and said from the estimation in which the character of Mr. Pearce appeared to be held by the gentleman from Virginia, as exhibited in his former remarks, he should hardly suppose that he (Mr. W.) would introduce him (Mr. Pearce) as a witness against any one.

[Mr. WISE: Well I do confess I would not place much reliance on Dutee J. Pearce.]

Mr. LOOMIS resumed; he did not understand the gentleman from Virginia, either formerly or now, to say that Mr. Pearce told him that Mr. Mann knew the contents of the majority report; but he understood it that the gentleman inferred that fact from the circumstance that Mr. Pearce told him that Mr. Mann furnished the notes from which the offensive matter was taken. If he was mistaken in this, he desired to be corrected, and set right. The testimony did justify the inference, and he could see no impropriety whatever in that circumstance; he considered it the duty of every member of the committee to give his views to the member who drew up the report, and to furnish his notes of the proceedings also, if use could be made of them. It had appeared that the majority had not signed the report as drawn, but had amended it by striking out parts of it, to make it meet the concurring views of the six individuals who composed that majority. This was to have been expected, and the report of the minority shared no better fate. That was drawn by the gentleman from Virginia himself, and his colleagues had declined signing it, as he understood the gentleman to say; and finally the gentleman from Virginia alone, being the minority of the minority, and one out of the nine, had drawn up and signed his report alone. This report the gentleman had informed the House he wrote with his own hand, and crossed the *ts* and dotted the *is* himself, and he (Mr. L.) presumed that he agreed to it unanimously.

I have done with this branch of the subject, and

have said more than was perhaps necessary to say upon it.

With respect to the resolution and the amendment before the House, there was one part of it which Mr. L. considered objectionable. It was that part which gave to the proposed committee power to send for persons and papers. This was a high power which this House possessed, and which, in his opinion, ought never to be entrusted to a committee, except in cases of clear necessity. No such necessity was shown in this case. It was a power very liable to abuse; and though it was not to be expected that a committee of the House would sanction any abuse, yet he thought that prudence dictated to the House to reserve to itself these extraordinary powers, unless a case of necessity was presented. It would be time enough to grant such a power when a committee should inform the House that they had sought information of some person who had refused to disclose it. Does any one doubt but that the Secretary of War would disclose any fact or circumstance within his knowledge, that a committee might require, without being called up as a witness, and sworn? Or would any officer in the service refuse to answer any communication from a committee? The resolution before the House embraced a wide range. It would be almost matter of necessity, under it, to seek information from the officers now engaged in carrying on that war. The commanding general and all his officers would, by this resolution, be subject to be called here to testify before this committee.

This war had already undergone several partial investigations before courts martial and courts of inquiry. A great amount of evidence had been taken relating to it, and large sums expended—thousands upon thousands—in eliciting facts. There was now no charge of any concealment by any person; and he (Mr. L.) was averse to instituting a tribunal to try the comparative merits of the several officers who had been engaged in that service. The difficulties attending the prosecution of that war, and which had produced so much delay and expenditure, had been explained by several gentlemen in this very debate. We had been told of the great extent of wilderness—of the swamps and everglades, impenetrable to the whites, in which the savages concealed themselves. We had been told of the difficulty of transporting the necessaries of war, and above all, of the sickly and unwholesome climate.

These were, doubtless, the true causes; but he, Mr. L. was not averse to an investigation, but he preferred it should be in the ordinary mode, and by the Military Committee, as moved by the gentleman from Maryland.

Mr. L. concluded by moving to strike out that part of the resolution which gives power to send for persons and papers.

The CHAIR said this amendment would not now be in order, until the amendment pending was disposed of.

Mr. GLASCOCK then modified his amendment, by inserting the following, "except such as may be engaged at the time in the service."

Mr. WISE suggested to the gentleman that as the House was to adjourn on Monday week, that the committee should have power to sit during the recess, and not have the investigation confined to ten days.

Mr. GLASCOCK replied that it would be continued at the regular session of Congress.

Mr. WISE cared nothing about this investigation. The moment an attempt was made to enter upon an investigation, the old disposition is manifested by the party in power. The leopard would as soon change his spots as this party change its disposition. It still comes up and hides the abuses and corruptions of the Government; and it is now even transcending the course it pursued at the last session. The whole investigation of the whole of the Executive departments was then thrown upon one committee, and but two months given then to cleanse the Augean stable; and now it was proposed to commit an investigation of a matter which had taken up three years in its prosecution, and was from a thousand to fifteen hundred miles distance, to a committee, and only ten days allowed

for the investigation. He believed the investigation would lead to no good, but would be productive of much evil, from the manner in which it would be conducted; as all these investigations were so managed as to fortify and strengthen the Government in its abuses. Mr. W. then brought to the notice of the House a letter he had received from an assistant surgeon of the army, detailing a transaction in relation to the conduct of an agent of the Government, who made an arrangement with the clerk of a steamboat, on one of the rivers in Alabama, by which the Government was defrauded out of \$400. After the reading of the letters, Mr. W. made some further remarks in relation to the manner in which investigations were prosecuted.

Mr. HOWARD said that he would not have troubled the House with any further observations upon the amendment which he had submitted, if it had not been that he wished distinctly to say to the House and the nation, that it was not his wish to smother investigation into either the causes or conduct of the Florida war. On the contrary, he thought that the members of any committee to which the inquiry might be sent would not do their duty to the House, the country, or themselves, unless they gave the freest scope to the examination, regardless of the persons upon whom the censure might fall, if any censure was due, and influenced solely by a spirit of strict justice and impartiality to all. Having said this, he had a right to expect, and did expect, from the gentleman from Virginia, (Mr. WISE,) that upon whomsoever else he might cast the imputation of desiring to stifle inquiry, he would exempt him (Mr. H.) from being included in it.

When the resolution was under consideration some two weeks ago, the gentleman from Tennessee (Mr. BELL) had made some statements which appeared to be strong arguments in favor of sending the subject to the Military Committee. Perhaps the House had forgotten the debate which then took place, although they seldom forgot any thing which that gentleman said. The disappearance of resolutions from before the eye of the House, and sudden reappearance at a distant day, was a great practical inconvenience. According to his classic reminiscences, there was somewhere in Greece a river which plunged under ground, and started up, to the surprise of those to whom it unexpectedly showed its current, far away from the place of its submersion. It was just so with some of our resolutions. The honorable gentleman from Tennessee had said that we had the skeleton of an army, but that it was not filled up.

Mr. BELL said that the fact which he stated was this, that when a lieutenant of a company fell in action, the command devolved upon a sergeant, and that there appeared to be a deficiency in the number of officers on duty there.

Mr. HOWARD said that he had so understood the gentleman, and would use that fact to show the propriety of referring this subject to the Military Committee, because that committee could, and doubtless would, urge upon the House a bill which had been reported every year since he had been in Congress, and the necessity for which was fully shown by the Florida war. He alluded to a bill establishing a corps of engineers, detached altogether from duty in the line. Every body knew that a general order had been issued last winter, recalling officers of the army from engineer duty and directing them to repair to their respective regiments. The services of those officers acting as engineers were very useful to the country, and the pressing demands for them from all quarters had caused their absence, on furlough, from their posts in line. The experience of the Florida war showed the absolute necessity of separating the two arms of service. Such a measure would, of itself, be of great service to the organization of the army. But there were probably other improvements which might be proposed, after a minute examination into the manner in which the war had been carried on. He desired to attain some practical good, instead of having merely a barren inquiry, and, therefore, was in favor of referring the matter to a committee which could report bids in the discharge of its regular duty, instead of

stopping with a resolution either censuring or not censuring some officer of the Government.

Mr. GLASCOCK regretted that it became his duty again to address the House on this subject; but, as he had thought proper to move an amendment to the original resolution, and in consequence of remarks made to-day, he felt it to be his duty to do so. It seemed now, from the remarks of the gentleman from Virginia (Mr. Wise) that he evinces a great indifference from that heretofore evinced by him in relation to the disposition to be made of the resolution offered by him; and he seems to think that there is no disposition on the part of the majority of the House to go into the investigation proposed. Sir, (said Mr. G.) that gentleman must see entirely different from himself, if he has recently discovered any thing like a disposition to evade this question. He had expressed himself on a former occasion in favor of this inquiry, and he was still desirous that it should be had. He felt it to be due to all the officers in the army who have been engaged in that unfortunate war—he felt it due to the Government, and he felt it due to the people of the country—and whatever disposition the gentleman now feel disposed to make of this question, he hoped the majority of the House would maintain its original intention to carry out the investigation. His object in not wishing the committee to sit during the recess, was to save as much as possible the country from the expenses already incurred; in the prosecution of that war, particularly when all the ends of all parties asking this investigation could be attained without it. It has been truly and justly remarked by the gentleman from Maryland, (Mr. Howard,) that there are weighty and important documents, which will occupy the attention of the members of the committee, which may be appointed at this time, during the recess, which will give them the opportunity of forming correct opinions in relation to the matter, and enable them to proceed promptly to the execution of their duty at the next session of Congress. But what astonished him most was, to find the gentleman from Virginia (Mr. Wise) reading letters and documents to the House for the purpose of forestalling public opinion in relation to this inquiry. Mr. G. confessed that this was pursuing a course which he had been taught from the commencement of his political life, in all transactions, studiously to avoid. He had been taught that, whenever an investigation was to be had where it was expected that all the testimony would be brought to bear upon every point, it was improper to forestall public opinion, and produce a prejudice in the public minds, by introducing evidence in advance, and sending it forth to the country.

Mr. WISE said this was very different ground from that taken by the gentleman's party last session, when it was insisted, on that specific charges should be made against the Executive Departments before a committee should be asked for to investigate them.

Mr. GLASCOCK said this was not the first time that the party to which he belonged had been referred to. As for himself, he was only responsible for his own acts; and the gentleman would do him the justice to say, that he was among the first to advocate the investigation then asked for. He stood almost alone in the first instance in favor of the inquiry.

Mr. WISE would do the gentleman the justice to say that he did; but at that time he was not exactly recognised as one of the party.

Mr. GLASCOCK replied, that, whether he was considered as one of the party or not, no man in his section of country ever doubted where he stood in relation to the prominent measures of General Jackson's administration. No man ever doubted that; even his political enemies never doubted it; or, if they did, no act of his life authorized it, and it was gratuitous on their part. But to proceed to the question before the House: he confessed, so far as the resolution was concerned, the true and proper course, in his judgment, would be to adopt the amendment he had submitted. He differed from the gentleman from Maryland as to the manner in which this committee should be appointed, and as to what committee the matter should be referred

to. In his opinion, the true course of policy was, that a select committee should be appointed by the Chair, and he again repeated, that if the committee was to effect any practicable good, it should be so constituted as to have the confidence of the people of the country. The gentleman from Tennessee had opposed the appointment of political partisans on the committee, and had intimated that he (Mr. G.) seemed to wish it. This, however, was not the proper inference to draw from his remarks. He was as much opposed to having political partisans on the committee as the gentleman himself, but he desired to have it so constituted as to embrace men of some weight of character, and to be composed of men who would do justice to all the interests concerned. He wished to see the rights of all the officers who were engaged in that service protected, and the investigation to be conducted in such manner as to be of some practical benefit; and with this view he had submitted the amendment now under consideration.

Sir, said Mr. G. the situation in which I stand to the ex-President of the United States, will not permit me to pass over in silence the bitter denunciations which have been uttered against him on this floor by gentlemen of the opposition. My attachment for him was formed at an early period of my life, under peculiar circumstances, and the most trying scenes, and it gives me pleasure to say, that there are but few acts of his whole life, either civil or military, which has not served to increase, rather than to diminish that attachment. But to what source shall I trace this violent opposition to him? the bitter invectives which have been heaped upon him, emanating from the most bitter feelings. Sir, to his hostility to the Bank of the United States; to the veto which he stamped upon the bill rechartering that institution in 1832; because he had the moral courage to effect that which his friends in this House failed to effect; because he threw himself in the breach, and armed with the virtue and integrity of the people, and sustained by the Constitution, grappled with the monster, and triumphantly overthrew it. This, sir, "is the head and front of all his offending," and to this cause alone may be traced the vindictive feelings of his adversaries. But, sir, we hail that act as the greatest in his political career; one that has covered him with glory, and one that will serve to perpetuate his name and his memory, even if unconnected with any other act of his life. Sir, the character of Andrew Jackson is the property of his country; his services are too well known to that country not to be appreciated; they have secured to him the affections of the people, which the combinations of his enemies can never deprive him of.

Permit me (said Mr. G.) here to state, that he was in hopes he would not have found it necessary to vindicate the character of one needing no vindication; but my feelings, under the circumstances, could not and can not be controlled. I listened with pain and regret to the uncalled for and unqualified abuse of him. "I heard much declamation without argument," and the foulest charges without proof, and especially from one from whom it was but little expected. I mean the gentleman from Massachusetts, (Mr. Cushing,) who spoke in relation to the Florida war, and who pronounced that war as one of the damning sins of the Government, and a foul blot on the American character; this, too, before an investigation was had, thereby prejudging the case, and charging it home upon General Jackson. Better things were expected from that quarter. For my part, I have always listened to him with the greatest pleasure. His arguments have generally been respectful and able, and free from personal abuse; but, in the present case, he has wandered from his usual course, and I envy him not the position he occupied on that occasion. Many others have been lavish of their abuse of the ex-President and of his measures; but I shall not stop specially to reply to them. I feel no disposition to do so, as it will be an unnecessary consumption of the time of this House, but must invoke the pardon of the House for making a general fire at the whole flock, and tell them that the numerous squibs they have fired will have about as much effect upon the

character of Andrew Jackson before the people of this nation, as the firing of pop-guns would have upon the rigging of the splendid Pennsylvania.

Sir, said (Mr. G.) that venerable patriot never expected, and never asked forgiveness at the hands of his enemies. He knew he had incurred their eternal displeasure. He never expected quarters from those whose pride and pleasure had been to embitter his declining years, whose objects were to thwart the views of his administration in every prominent measure, to triumph in the misfortunes of their Government, to rejoice in the distresses of the people, and to prevent as far as possible the relief of those distresses, with a view to the overthrow of the administration, and to ride themselves into power in the midst of these distresses. In conclusion, sir, and as the time advances when it is expected he will make his final exit "to that bourne from whence no traveller returns," and as the time approaches when we may expect to hear "that he has slept the sleep of death," and closed his earthly career, I wish to be permitted to say to those influenced by such feelings, and controlled by such motives, looking as he does to his country's good, he has never been inclined to hold communion with, or extend to them the hand of fellowship.

Mr. CAMBRELENG here called for the orders of the day.

Mr. ADAMS hoped the gentlemen would withdraw the motion to permit him to address a few remarks to the House.

The question being taken, the House refused to proceed to the orders of the day—ayes 84 noes 96.

Mr. ADAMS opposed the reference of this subject to the Military Committee: first on the ground that out of nine members of which that committee was composed, eight of them to use the language of the gentleman from Virginia, (Mr. Wise,) were the friends of power; and second, because only one of the nine came from the States north and west of Virginia.

He was also opposed to leaving the selection of the committee to the Chair, and adduced and read copious extracts from the journals, during the presidency of the present Speaker, in support of the point to show that such an appointment ought not to be committed to him.

Mr. A. was in favor of the appointment by ballot, or to secure the appointment of such a committee, the majority of whom would be favorable to the investigation. He earnestly called upon the House to follow out this practice, a practice which had always prevailed in the British parliament.

On motion of Mr. CAMBRELENG, the House then passed to the orders of the day.

#### DEPOSITE BANKS.

The SPEAKER laid before the House a communication from the Secretary of the Treasury, transmitting a statement of the balances of public money remaining in the deposite banks; which, on motion of Mr. SMITH, was ordered to lie on the table, and be printed.

#### TREASURY NOTE BILL.

The House then resumed the consideration of the "bill to authorize the issuing of Treasury notes," as reported from the Committee of the Whole on the state of the Union.

The question pending, was on agreeing to the amendment of Mr. UNDERWOOD, as modified by the amendment of Mr. PATTON (given in another column.)

Mr. BOND addressed the House in support of the amendment, and in opposition to the bill.

Mr. McKIM denied that the sale of the United States Bank bonds would bring an immediate supply of money into the Treasury; for, in the first place, there must, at least, be a delay of four or five months expended in the negotiation, at a probable loss too of from four to six per cent. and then the Government would be likely to get in return only bank notes. He was not unfriendly towards any banks; but it should be borne in mind that the Secretary of the Treasury could not pay out bank notes; they would be useless to the Treasury.

Another consideration was, that the bonds given by the bank were for two millions each, an amount that would be inconvenient to negotiate in London,

and how did they know that the bank would consent to divide them up into bonds of a smaller size, say for a thousand dollars each? He apprehended that it would not only interfere with the arrangements of the bank, both here and in London, but that it would be found to be against their interest to do so.

Again, in point of economy, there would be saving by the issue of Treasury notes. How? Why, the United States Bank bonds bore an interest of six per cent. whereas the Treasury notes would not, probably, bear a higher rate than three or four, or, at the utmost, five per cent. The saving would be the difference between those two rates of interest on several millions of dollars—no slight consideration.

Again, there would be a probable loss on the sale of the bonds from their par value, of from five to six per cent. for, by the latest advices from the English money market United States Bank bonds were at 94 or 95 there. This too, was independent of the exchange, whatever it might be, and the commission or expenses of negotiation.

Another objection he had to the amendment was, that it would be disreputable to the character and credit of the Government to be selling its securities in the market. The same objection would also apply on the part of the bank itself, for she, no more than merchants, would like to see her liabilities hawked about for sale. Moreover, the United States would have to endorse the bonds before they could be negotiated at all; and he was indisposed to place the Government in so disreputable a position.

Now, what would be the effect of the Treasury notes? Why, they would be equal to so much gold and silver thrown out among the community, for they would, when out, be received by the Government, in payment of dues, as gold and silver, and the creditors of the Government would gladly take them as such, as they could readily pass them as such, because they would be sought after by the importing merchant to pay his bonds. Moreover, the Secretary of the Treasury would not attempt to issue more than were applied for. It was then, in effect, putting so much gold and silver into circulation the moment the bill passed.

Mr. BOND inquired if he was to understand the gentleman to say that paper could be made equal to gold and silver.

Mr. McKIM. Certainly not. He meant only to convey the idea that the Treasury notes would answer in the place of gold and silver, being receivable for the dues of the Government, and its claimants being glad to get hold of it. After a few further remarks of the same tenor, Mr. McK. concluded by hoping the House would pass the bill in its original form as it came from the Committee of the Whole; for he considered the amendment would be destructive to the business of the Treasury, which was in immediate want of the means for carrying on the Government, and which it could not procure under the operation of the amendment.

Mr. CUSHING addressed the House at length in opposition to the bill; and after a few words from Mr. BELL and Mr. McKIM, the hour having arrived, the House took its usual recess till 4 o'clock.

#### [EVENING SESSION.]

On assembling after the recess, but few members appearing—

Mr. CAMBRELENG moved a call of the House, which was ordered—ayes 24, noes 22.

After proceeding a few minutes—

Mr. WILLIAMS of North Carolina moved to suspend the further proceedings on the call. Lost—ayes 30, noes 45.

The roll was then called through, when a quorum having appeared, the call was suspended.

The Hon. WILLIAM STONE, a member elect from the State of Tennessee, appeared, qualified, and took his seat.

#### TREASURY NOTE BILL.

The House then resumed the consideration of the bill reported from the Committee of the Whole on the state of the Union, "to authorize the issuing of Treasury notes."

The question pending being on the amendment of Mr. UNDERWOOD, as modified on motion of Mr. PATTON, (stated at length in yesterday's Globe.)

The CHAIR then stated the question, and was about to propound it to the House, when

Mr. CAMBRELENG stated that upon this amendment depended the state of this bill, because, if it should be adopted, the Treasury of the United States would be in the power of the Bank of the United States. He should, therefore, ask for a full attendance of the House, and should move for a call, [the House was still thin,] unless some gentleman wished to address the House.

Mr. HOPKINS, for one, was inclined to vote for the amendment. He could not see how its adoption would place Government in the power of the United States Bank. The object in selling them was, to command an amount of gold and silver to meet the wants of the Treasury; and admitting the bank would become the purchaser, so much specie would be drawn from its vaults, and he did not see how Government could be injured by having a debt thus paid in advance.

Mr. CAMBRELENG wished to state that he had not said the United States Bank would be the direct purchaser, but that the bonds would be bought up by the agents of the bank.

Mr. HOPKINS was opposed to the Treasury note system, at least so much of it as was intended to operate as currency, although he was willing to provide for the wants of the Treasury. He was induced to regard the amendment, as the least exceptionable proposition before the House. In case the sale of the bonds could not be effected, then the Secretary was authorized by the amendment to borrow money; and he believed the mover of it (Mr. Underwood) would have no objection to modify it, so as to empower that officer to negotiate a loan to the amount of even ten millions, should it be required. If the Treasury notes were really intended to operate as a currency, the denomination of the notes should be so low as to benefit the poor as well as the rich. But he was opposed to the plan of thus forming a currency with the notes, in every shape and form. He was mortified and pained to see the support which had been given to the measure by advocates of the hard money system; he was not willing to pay ten millions for such an experiment, of establishing an Executive currency. He did not wish to be misunderstood. He was willing to give the Treasury any amount of relief in a legitimate way, but he was not willing to convert an Executive officer into the cashier of an Executive bank.

Mr. WISE eulogized his colleague on the course he had just taken. He was glad to find displayed so honorable and independent an opposition to the bill. Mr. W. then read several extracts from President Jackson's Messages of 1834 and 1835, to show that the sales of Government stock in the United States Bank had been recommended by the President at those periods.

Mr. UNDERWOOD said, that in offering the amendment, he had not been actuated by any sinister motive. He had never been connected with the United States Bank, nor had he ever owned a dollar's worth of stock. His motives were perfectly disinterested; and as had been suggested, he would have no objection to modify his amendment so as to empower the Secretary, in the case the bonds could not be sold, to negotiate a loan to any reasonable amount; and for that purpose, he would leave a blank in that line, to be filled up at the pleasure of the House. He deprecated the idea of a Treasury bank as a most dangerous measure, and fatal to the liberties of the people.

Mr. HAYNES said that there was one feature in the amendment which had been overlooked. The United States Bank bonds were not only worth the value on their face, but also the premium on London; and if thrown into the market, the bank would purchase them at par value, and then reap all the advantage of the difference of exchange on London.

Mr. UNDERWOOD did not know that the Secretary would be restricted from selling the bonds at a premium.

Mr. McKAY was willing the bonds should be sold, if they could be sold immediately, and at their

fair value; but if they were sent to Europe for sale, it would be a long time before they could be made available. But he had another objection. The bonds would go to Europe endorsed by the Government, which would then be responsible as well as the bank; and, besides, what was to prevent the bank from inducing the holders to keep them back for any length of time that would suit its purpose, even for ten or fifteen years. A similar game had been played before, and what ground was there to suppose it would not be played again? But, if the gentleman would alter his amendment so as to sell the bonds, principal and interest, and absolve Government from all liability, he would have no objection; but the amendment proposed no such thing; therefore he could not vote for it. But the Treasury notes could be made available immediately, and were liable to none of those objections. He would accordingly support it, although he was as much opposed to the establishment of a Treasury or Executive bank as any one.

Mr. ROBERTSON was in favor of the amendment. He adverted to the danger of flooding the country with spurious paper, which, in his opinion, would be the result of the passage of the bill. He could not think how Government, at this time of distress, could adopt such a measure as that of issuing bills of credit, as the Treasury notes certainly were.

Mr. WISE read an extract from a letter to the Secretary of the Treasury from a commercial house in New York, wherein it was stated that, at that date, (September 22,) the Treasury notes would fetch from 92 to 94 per cent. in specie.

Mr. LEGARE was in favor of issuing Treasury notes without interest; which issue, in his opinion, would answer the purpose of relieving the community and the Government at the same time. This, he contended, was strictly within the letter and spirit of the Constitution. He answered the argument of gentlemen in relation to those notes being bills of credit, and contended that it was nothing more nor less than borrowing money; and certainly the Government of the United States, and of every State, had the power to do this. In relation to the Government becoming a great banker by the issue of those notes, he thought it an entirely new doctrine, because, if borrowers were to become bankers, he took it there were a great many bankers in this country. Mr. L. entered into a brief argument in support of this view of the question.

Mr. PATTON did not see how the chairman of the Committee of Ways and Means could assume that the United States Bank would become the purchaser of the bonds any more than others. The bank could not purchase them, unless she paid the full value; and of what consequence could it then be who bought them?

Mr. CUSHING made some remarks explanatory of what he had said in the morning.

Mr. FOSTER replied at some length to the arguments of the gentleman from Massachusetts, (Mr. Cushing) in relation to the Treasury notes being bills of credit. He contended that the Constitution authorized Congress to issue these notes if the exigencies of the Government required it, even though they were bills of credit. The Constitution of the United States prohibited the States from issuing bills of credit, coining money, and making treaties and alliances; but there was no clause in it which prohibited the United States from issuing bills of credit, if it was necessary to do so. The *bona fide* object of issuing these notes was to raise money to carry on the operations of the Government, and that being the case, he contended that this was strictly constitutional. He opposed the amendment as being insufficient to meet the exigencies of the country. These bonds, by being thrown into the market, might raise something for the relief of the Government, but he contended that they would be inadequate to supply all the wants of the Government.

Mr. MENIFEE said it was believed that the nature of the bill was such that it would not affect the currency. But he would ask if gentlemen who had said so, had not been rebuked officially for so doing. He went on to show why he thought the notes would form a constituent part of the currency,

and declared his opposition to the measure, as giving a dangerous power to the President.

Mr. CUSHMAN asked what would be the effect of the previous question.

The SPEAKER said it would have the effect of bringing the House to vote on the engrossment of the bill, with a view to its third reading.

Mr. CUSHMAN said that in mercy to the House he would move the previous question.

Mr. WISE asked for the ayes and noes.

The SPEAKER reminded the gentleman that it was out of order.

Mr. OWENS moved a call of the House, which was lost.

The question was then taken on seconding the demand for the previous question, and lost—ayes 88, noes 89, the Speaker voting in the negative. So the previous question was not ordered.

Mr. CAMBRELENG adverted to one fact. It was the general understanding, (at least among many members of the opposition,) on both sides of the House to take the question on this bill to-day. In conversation with several gentlemen on the other side of the question he had received a distinct pledge from them last night, that if the House would then adjourn, such was their intention. He earnestly hoped then they would redeem their pledge and take the question at once.

He had but a single word to say to the gentleman from Virginia, (Mr. Hopkins,) and that was that he was a most sagacious gentleman, for while he expressed himself opposed to the bank of the United States, he was in favor of a proposition to place the Treasury of the country at the mercy of that institution.

Mr. WISE admitted that he gave a pledge for himself, and he was not only willing to do so, but had aided by it, for he had not addressed the House on the subject. He also expressed a hope that his friends would suffer the question to be taken then, and that no member would be frightened from his course by the *brutum fulmen* of the gentleman from New York, in order to force that House to sustain a Treasury bank in its most odious form.

Mr. JOHNSON advised to an amendment offered by him when the bill was in committee, limiting the power of issuing the notes to June, 1839, and which had been rejected. He said the vote on that amendment convinced him that the Government intended to make the Treasury notes a permanent thing, and not merely to meet the present emergency. He then gave his views as to what would be the probable consequences.

Mr. UNDERWOOD thanked gentlemen for the very able arguments they had adduced in support of his amendment. He really thought now that it had been discussed enough, and he would be happy to have the question taken upon it. Mr. U. then gave the reasons why he could not modify his amendment, as requested by some of his friends.

Mr. PHILLIPS made some explanations in relation to the amount at which banks would receive Treasury notes, and read various extracts from letters from the officers of different banks, stating on what terms these Treasury notes could probably be received at.

The question was then taken on the amendment of Mr. UNDERWOOD, as modified by Mr. PATTON, and decided in the negative—ayes 104, noes 112, as follows:

YEAS—Messrs. Adams, Alexander, Heman Allen, John W. Allen, Ayer, Bell, Biddle, Bond, Bouldin, Briggs, William B. Calhoun, John Calhoun, W. B. Campbell, John Campbell, Wm. B. Carter, Chambers, Cheatham, Childs, Clowney, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Dennis, Dunn, Elmore, Everett, Ewing, Richard Fletcher, Filmore, Rice Garland, Goode, James Graham, Wm. Graham, Graves, Grennell, Griffin, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Herod, Hoffman, Hopkins, Robert M. T. Hunter, Jenifer, Henry Johnson, William Cox Johnson, Lawler, Lincoln, A. W. Lewis, Malby, Marvin, Samson Mason, Maury, Maxwell, McKennan, Menefee, Meyer, Morgan, Calvin Morris, Naylor, Noyes, Ogil, Patterson, Patton, Peck, Phillips, Pope, Pott, Rariden, Reid, Rencher, Ridgeway, Robertson, Rumsey, Russell, Sawyer, Augustine H. Shepperd, Charles Shepard, Sibley, Slade, Southgate, Stanley, Stratton, Tahaierro, Thompson, Tillinghast, Underwood, Albert S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, and Yorke—104.

NAYS—Messrs. Anderson, Andrews, Abertson, Beatty, Beirne, Bicknell, Birdsall, Boon, Brodhead, Bronson, Bryn, Buchanan, Cambreleng, Timothy J. Carter, Casey, Chaney, Chapman, Ciley, Claiborne, Clarke, Cleveland, Coles, Connor, Cray,

Cushman, Davee, DeGraff, Dromgoole, Duncan, Edwards, Farrington, Fairfield, Foster, Fry, Gallup, Gholson, Glascock, Grantland, Grant, Gray, Haley, Hammond, Harrison, Hawkins, Haynes, Holsey, Holt, Howard, Hubley, Ingham, Thomas Jackson, Jabez Jackson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, Klingensmith, Legare, Leadbetter, Lewis, Lozan, Arphaxad Loomis, Lyon, James M. Mason, Martin, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Morgan, Samuel W. Morris, Muhlenberg, Murray, Noble, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petrikon, Phelps, Plumer, Potter, Pratt, Prentiss, Reilly, Rhett, Richardson, Rives, Sheffer, Shipley, Snyder, Spencer, Stewart, Taylor, Thomas, Titus, Toncey, Towns, Turney, Vanderveer, Wagener, Webster, Weeks, Thomas T. Whittlesey, Jared W. Williams, Worthington, and Yell—112.

So the amendment was disagreed to.

Mr. RHETT then moved to amend the second section, by striking out all that part relating to interest.

On motion of Mr. WILLIAMS of North Carolina,

The House adjourned at 9½ o'clock, p. m.

## HOUSE OF REPRESENTATIVES

SATURDAY, October 7, 1837.

Mr. ADAMS, on leave, made an explanation in relation to some remarks made by himself on yesterday, relative to a call which had been made on the late President of the United States with reference to the Creek war. He had since ascertained that the late President had answered the call, near the close of the last session of Congress, when it could not be printed in time to be laid on the tables of members at that session; and the information contained therein was the strongest proof which could be necessary of the propriety of instituting an inquiry on this subject.

Petitions and memorials were presented, on leave, by

Mr. HENRY of Pennsylvania.

Mr. DAVEE of Maine.

Mr. CUSHMAN of Massachusetts.

[Mr. CUSHMAN presented the remonstrance of Mary Moses and 445 other women of Somersworth, N. H. against the admission of Texas into the Union.]

Mr. HARRISON, on leave, submitted the following resolution, which was considered and adopted:

*Resolved*, That the President of the United States be requested to communicate this House, at its next session, so far as in his judgment is consistent with the public interest, whether any foreign power, or the subjects of any foreign power, have possession of any portion of the Territory of the United States on the Columbia river, or are in the occupancy of the same; and, if so, in what way, by what authority, and how long such possession or occupancy has been kept by such persons.

Mr. HALSTEAD, on leave, submitted the following resolution, which was considered and adopted:

*Resolved*, That the Secretary of War be requested to inform this House, at its next session, who was the superintendent for the work for the improvement of Little Egg Harbor, and whether it was executed according to the plan reported to the War Department, as required by the law making the appropriation; and if not, on what authority was any other plan substituted.

Mr. BOND asked the leave of the House to submit a resolution calling on the Secretary of the Treasury to inform the House whether he had made any contract with any engraver to engrave a plate for the purpose of issuing Treasury notes, in case the bill now pending becomes a law, and if so, whether such plate has been finished, and any notes stricken off therefrom.

Objection being made,

Mr. BOND moved a suspension of the rules, for purpose of permitting him to submit the resolution.

Mr. WHITTLESEY called for the yeas and nays, and the House dividing it, it appeared there was no quorum in attendance.

Mr. HOPKINS, thereupon moved a call of the House, and the roll being called through, and 126 members answering to their names, all further proceedings under the call were suspended.

The yeas and nays were then ordered, and were—yeas 70, noes 85.

So the House refused to suspend the rules.

## INQUIRY IN RELATION TO THE FLORIDA WAR

The House then proceeded to the unfinished business of the morning hour, which was the consideration of the following resolution, submitted by Mr. WISE on the 19th instant:

*Resolved*, That a select committee be appointed by ballot to inquire into the cause of the Florida war, and into the causes of the delays and failures, and the expenditures which have attended the prosecution of that war, and into the manner of its conduct, and the facts of its history generally; that the said committee have power to send for persons and papers, and that it have power to sit in the recess, and that it make report to the next session of Congress.

Mr. GLASCOCK had moved to amend the foregoing resolution by striking out all after the word "resolved," and insert the following:

"That a select committee be appointed to inquire into the cause of the Florida war, and the causes of the extraordinary delays and failures, and the expenditures which have attended the prosecution of the same, and all the facts connected with its history generally; and that said committee have power to send for persons and papers, except such persons as may be engaged at the time in the Florida war."

The question immediately pending, was the motion of Mr. HOWARD to strike out the words "that a select committee be appointed," and insert "that the Committee on Military Affairs be instructed."

Mr. MCKAY had not intended taking any part in this debate, and would not now have done so, had it not been for the remarks of the gentleman from Massachusetts, (Mr. Adams,) on yesterday, in relation to the composition of the Committee on Military Affairs. The gentleman from Maryland, (Mr. Howard,) who had made the proposition to refer this subject to the Committee on Military Affairs, would do him the justice to say that the amendment was moved without any consultation with him, and he presumed without any consultation with any member of the Military Committee. The gentleman from Massachusetts, (Mr. Adams,) had objected to sending the inquiry to the Committee on Military Affairs, because eight of its members were friends of power, as he chose to designate them. By this, however, he understood the gentleman as meaning nothing offensive, but merely that eight of its members were in favor of the administration, and but one opposed it. Now he (Mr. McK.) believed it was well understood that this committee has had no connection with the politics of the country, as all that ever was required of it, was to look to the military affairs of the country, and all subjects connected therewith. He had taken the trouble to look into this matter, and see how this committee had been made up for some years back, and would call the attention of the House to the fact. Four years ago the Military Committee was organized precisely as it is now. When the distinguished gentleman from Virginia, who is now our Minister to England, occupied the Chair, this committee was made up in the same way, and it was precisely the same while the gentleman from Tennessee (Mr. Bell,) was presiding officer of the House. This committee still stood, with reference to the administration, eight to one. During the second session of the twenty-third Congress, Mr. Vance, who is the present Governor of Ohio, was the only member on that committee opposed to the administration; and during the twenty-fourth Congress, Mr. Bunch of Tennessee, if he might be considered an opponent of the administration, was the only member on that committee in the opposition. This he thought was a sufficient answer to the objections of the gentleman from Massachusetts on this point. Well, how was it with regard to other committees of this House? He took it, if gentlemen would take the trouble to examine, that they would find many of the committees with majorities opposed to the administration. The committee of which the gentleman from Massachusetts is chairman, (the Committee on Manufactures) has a majority of its members opposed to the administration. It was the same case with the Committee of Claims. It was the same with all the principal committees on the expenditures of the Executive Departments. The committees on the expenditures of the War Department, the Navy

—WEEKLY—

PRICE \$2, FIRST TWO SESSIONS.

[Continued from No. 7.]

Department, and the Post Office Department, had all majorities opposed to the administration. With regard to the Committee on Military Affairs being composed of eight friends of the administration, and one member of the opposition, he presumed it was altogether accidental. He observed it was in accordance with the previous practice of the House, as it was precisely in the same situation in which it had been in for the last four years, and he had never before heard any complaint in relation to it. But the gentleman from Massachusetts had urged another objection against this committee, and that objection was, that there were eight of its members taken from the southern States, and only one left to take charge of the peculiar interests of the northern States. Now if the gentleman would look into the organization of the other committees, he would find the same objections to lie against them.

How was it with the Committee of Ways and Means? Out of the nine members of that committee, there was only one member, the gentleman from Ohio, (Mr. Hamer) to take care of the interests of the whole valley of the Mississippi and Ohio. How is it with regard to the committee of which the gentleman from Massachusetts himself is chairman—the Committee on Manufactures; a committee whose measures affect all branches of industry in the country? Seven of its members live in the northern States, and four of that seven in the New England States, while the whole of the southern States had but one person on it to represent their interests. How is it with regard to the Committee on Naval Affairs and the Committee on Commerce? The western States have not a single member on the Committee on Naval Affairs, or the Committee on Commerce, to represent their interests.

But could not the gentleman from Massachusetts see the fallacy of these objections? There were only nine members on each committee, and there were twenty-six States in the Union; so that it was a natural consequence that at least seventeen States must be unrepresented on each committee. There was, therefore, nothing in the objection. He would next call the attention of the gentleman to the Committee on Roads and Canals, a committee so intimately connected with the great question of internal improvements. That committee stands seven to two, and only one of its number to take care of the interests of the ten States in the South and Southwest. That committee, too, stands in regard to the administration in precisely the same situation as the Committee on Military Affairs.

The gentleman from Massachusetts on yesterday said that, during the last long session of Congress, a resolution was adopted calling on the late President of the United States to lay before Congress a statement in relation to the late Creek war; and that no answer was returned by the President. On this morning, however, the gentleman had corrected this statement, but had again fallen into an error. The gentleman had said that the resolution was answered by the President within a day or two of the end of the session. Now, if the gentleman would consult the journal, he will find that this communication was sent in on the 14th day of February; that it was only a report in part; and that the commissioners appointed by the President to make the necessary examinations were engaged in the further prosecution of the inquiry; and Mr. McK. understood that they were now in this city, preparing a report, to be laid before Congress at its next regular session.

The resolution offered by the gentleman from Virginia (Mr. Wise) proposes an inquiry into the causes of delay and expenditure in the prosecution of the Florida war. Now, that gentleman will recollect that, during a former Congress, he submitted a resolution calling for information from the Departments relative to this identical subject. On the 22d of May, it would be found by referring to the journals, that a resolution was adopted, on motion

of the gentleman from Virginia, (Mr. Wise,) calling on the President to communicate to the House all measures taken to suppress Indian hostilities in Florida, and also to communicate the causes of such hostilities. It would also be found that on the twenty-sixth, the President sent a report from the Secretary of War on the subject; on the twenty-seventh, an additional report, and on the third of June, a supplemental report on the same subject; therefore there were three reports made in answer to this resolution, giving all the information in relation to the causes of the war, and the means taken to suppress Indian hostilities.

Mr. WISE said he knew that this report did not contain all the information in possession of the Department. He would not say by what authority he knew this; but the late Secretary of War himself, knew by what authority he (Mr. Wise) knew that he did not communicate to this House all the information in his possession.

Mr. McKAY resumed. That did not affect what he was going to say. The gentleman says all the information was not communicated. That was extraordinary. He did not pretend to say that the gentleman had not good grounds for making the assertion; but let us look to the terms of the resolution. They were, that the President be requested to communicate all the measures taken for the suppression of Indian hostilities, and all the information relative to the causes of those hostilities. Now, if what was stated by the gentleman from Virginia was true, it would form a grave matter of inquiry for the House to take notice of, and it would be called upon to institute some inquiry into the conduct of the late Secretary of War, in consequence of this dereliction of duty. But would the House suppose that the Secretary was so very regardless of his official duty as not to comply with the order of the House, requiring him to communicate all the information in regard to the causes of this war?

Mr. WISE said he would now state by what authority he spoke. Sir, said Mr. W. the Secretary of War, unless his messenger told a falsehood, did, before he answered that very call, send a gentleman to me with certain papers marked confidential. They were submitted to me, and I know it upon this information. I read them, and the question was put to me, "do you want these papers?" My reply was, that I wanted all relating to the subject.

Mr. McKAY rose to resume, when,

On motion of Mr. CAMBRELENG, the House proceeded to the orders of the day.

The SPEAKER laid before the House a communication from the Secretary of the Treasury, giving a statement of the number of bushels of wheat, barley, oats, rye, and other grain and bread-stuffs, imported into the United States during the last twelve years; which, on motion of Mr. WHITTLESEY of Ohio, was ordered to lie on the table and be printed.

## TREASURY NOTE BILL.

The House then resumed the consideration of the "bill to authorize the issuing of Treasury notes," being the substitute reported from the Committee of the Whole.

The question pending was on the amendment of Mr. RHETT, as stated heretofore, [to strike out the provisions for bearing interest, &c.]

Mr. BELL opposed the bill, and asked what compromise had been effected between the party in power and certain gentlemen now giving it their zealous and earnest support. The present bill he regarded as a part of the great scheme to carry on the war against the institutions of the country, as they have been fostered for the last thirty or forty years. It was, in effect, not only in itself a measure levelled against the credit system of the country, but it was itself providing the means to carry on that war. On this point he dwelt at great length, going largely into the general policy and measures of the administration, and also entered into a variety of details and statements to sustain his argument of the non-necessity of this bill. He

maintained that it was the first step to the establishment of a Government or Treasury bank. It was the lever by which it was to be carried into execution.

Mr. B. concluded, by moving to strike out the enacting clause of the bill, (which motion prevailing, is equivalent to a rejection of the bill.)

Mr. CAMBRELENG asked for the yeas and nays; which were ordered.

Mr. BRONSON supported the bill, and showed that it was neither the incipient step to a Government bank, or a national currency, nor was it fraught with the evils pictured by those opposed to it. He also went into an argument to prove, that unless this bill passed, the Government could extend relief neither to the merchants nor to the deposit banks. Let this bill die, and the bills for the relief of those two great interests would die with it, for the Government, without it, would not be in a situation to relieve them.

With reference to a compromise, Mr. B. denied that any such was in existence, or had been entered into. There were differences existing upon certain points, among the democratic party, but those differences, he believed, would drive no one of them, certainly not himself, into the ranks of the whig party.

Mr. HALSTEAD commenced in reply to Mr. B. when the time for the recess arrived, and the House accordingly adjourned till 4 o'clock, p. m.

[EVENING SESSION.]

## TREASURY NOTE BILL.

After a call of the House had been ordered and proceeded in for some time, the House resumed the consideration of the "bill to authorize the issuing of Treasury notes."

The question pending was the motion of Mr. BELL to strike out the enacting clause of the bill.

Mr. HALSTEAD resumed his remarks, and entered into an argument to prove that Treasury notes were bills of credit, and therefore not warranted by the Constitution. He quoted the Message of General Jackson in 1836, Judge Marshall, and various decisions of the Supreme Court, in support of his position. He was, therefore, unwilling to give to the administration the power of issuing Treasury notes, as they evidently had no right so to do.

He contended that the language of the Secretary, and the bill itself, indicated that the notes were intended to form a constituent part of the currency, which of itself was a sufficient objection. He also opposed the bill on the ground that it provided no fund for the redemption of such notes, and quoted authorities to show that Government debts should never be incurred without some specific means being appropriated for their liquidation. It was likewise his opinion that the issue of Treasury notes would prevent the banks resuming specie payment. He could not vote for the bill, because it would lay the foundation of a Treasury bank, and add to the Executive power, so as to enable him to buy up the liberties of the people.

Mr. WHITTLESEY hoped the gentleman from Tennessee (Mr. Bell) would withdraw his proposition, and that the question would be taken on the bill that night, at least some time before twelve o'clock.

Mr. BELL withdrew his proposed amendment.

Mr. RIVES would like the gentleman to amend further, by making the Treasury notes redeemable twelve months after date, instead of six, as proposed. For his part, he was not willing to pledge the credit of Government, unless it had funds to comply with its engagements. If the gentleman would modify his amendment as suggested, he would vote for it.

Mr. RHETT accepted the modification.

Mr. RIVES said that, when they came there, they were accused by the opposition with having involved the country in difficulty; and, on that account, the opposition had adopted the motto of "hands off," and would propose nothing them-

selves, nor co-operate with others in adopting measures of relief. One gentleman (Mr. Bell) had told them, that morning, that they ought not to do any thing. That gentleman was a "parliamentarian," well versed in the rules, and he was accustomed to make use of that skill in order to attain his objects. Indeed, if he had not been misinformed by his friend, had that gentleman (Mr. B.) succeeded in the morning with his amendment to strike out all after the enacting clause, the bill would have been lost; and, by that course, the gentleman would have prevented any relief to the banks or to the nation. It was thus evident that the object was to defeat the bill, without offering any substitute for it. Mr. R. said that, when he came to Congress, he came with the impression that the Government and country were embarrassed; and, divesting himself of all party feeling, he had not stopped to investigate the causes, but was bent on removing the evil. When a house was in flames, the inquiry was, not how it caught fire, but how the fire could be extinguished? So, in the present case, all debate as to the probable cause of the present distress was worse than useless. All little differences should be laid aside, and each member act for the public good. He then referred to a letter written by Mr. Jefferson, in 1813, to his son-in-law, then chairman of the Committee of Ways and Means, wherein he strongly recommended the issue of Treasury notes, and said they would be more useful, if not bearing interest, than otherwise; also to an act passed in 1815, and various other acts, authorizing the issue of such notes, without a dissentient voice. He thought, therefore, it was a fair inference that their predecessors had no doubt as to the right given by the Constitution for the adoption of such measures, when required by the exigency of Government. He believed the passage of the present bill, whether amended or not, would enable the banks to resume specie payments, and afford relief to the merchants and country at large.

Mr. CALHOUN of Kentucky would vote for the bill, but more willingly if the notes bore interest than otherwise.

The question was then taken on Mr. RHETT's amendment, which was rejected—yeas 81, nays 137, as follows:

YEAS—Messrs. Bell, Bond, Boon, Brodhead, William B. Campbell, John Campbell, William B. Carter, Chapman, Childs, Claiborne, Cleveland, Clowney, Connor, Crary, Curtis, Dawson, Davee, Dennis, Duncan, Dunn, Elmore, Ewing, James Garlan, Rice Garland, Gholson, Gwercok, James Graham, William Graham, Graves, Gray, Griffin, Hammond, Harlan, Harper, Hawes, Hawkins, Herod, Holt, Hubley, Ingham, Jenifer, Henry Johnson, William Cost Johnson, Legare, Lewis, Lyon, Martin, McClure, Montgomery, Mathias Morris, Calvary Morris, Muhlenberg, Murray, Petrikon, Phillips, Pope, Potter, Rariden, Rhett, Richardson, Ridgeway, Rives, Russell, Sheffer, Augustine H. Shepperd, Sluicks, Shepler, Sibley, Smith, Stone, Thompson, Towns, Wagener, Webster, Albert S. White, John White, Elisha Whitesley, Lewis Williams, Sherrod Williams, Wise, and Yorke—81.

NAYS—Messrs. Adams, Alexander, Heman Allen, John W. Allen, Anderson, Andrews, Atherton, Ayer, Beatty, Beirne, Bicknell, Biddle, Birdsall, Borden, Brodhead, Bronson, Bruyn, Buchanan, Bynum, William B. Calhoun, John Calhoun, Cambreleng, Timothy J. Carter, Casey, Chambers, Chaney, Cheatham, Clark, Coles, Corwin, Craig, Cranston, Crockett, Cushing, Cushman, Darlington, Davies, Deberry, DeGraff, Dromgoole, Edwards, Evenden, Farrington, Richard Fletcher, Fillmore, Foster, Fry, Gallup, Goode, Grantland, Grennell, Haley, Halstead, Harrison, Hastings, Haynes, Henry, Holsely, Hopkins, Howard, William H. Hunter, Robert M. F. Hunter, Thomas B. Jackson, Jabez Jackson, Joseph Johnson, John W. Jones, Kemble, Kilgore, Klingensmith, Leadbetter, Lincoln, Logan, Arphaxad Loomis, Andrew W. Loomis, Maltry, Marvin, James M. Mason, Samson Mason, Maury, McKay, Robert McClellan, Abraham McClellan, McKim, McKennan, Menefee, Mercer, Milligan, Miller, Morgan, Samuel W. Morris, Naylor, Noble, Noyes, Ogles, Owens, Palmer, Parker, Parmenter, Patterson, Patton, Paynter, Pearce, Peck, Pennybacker, Plumer, Potts, Prentiss, Read, Reily, Rencher, Robertson, Rumsey, Sawyer, Sergeant, Sluick, Snyder, Southgate, Spencer, Stanley, Stewart, Stratton, Taffaferro, Taylor, Thomas, Titus, Toucey, Turney, Underwood, Vail, Vanderveer, Weeks, Thomas T. Whitesley, Jared W. Williams, Joseph Williams, Christopher H. Williams, Worthington, and Yell—137.

Mr. WISE then renewed his amendments, offered in Committee of the Whole.

The first amendment, striking out in the first section, "as he may deem expedient," and inserting, "as the exigencies of the Government may require," was adopted without a division.

The question was then taken on the other three following amendments, which were severally rejected.

Mr. WISE, after some preliminary remarks, offered the following:

*Provided*, That it shall not be lawful for the Se-

cretary of the Treasury, or any disbursing officer of the Government, to pay out or circulate any Treasury note or notes, so long as there remains in the hands of such disbursing officer, or the Treasurer of the United States, any specie or other available funds: *And provided further*, That the whole amount, or so much of the five millions of dollars as by law is to remain in the Treasury for contingencies, shall be kept on hand in Treasury notes, until the exigencies of the Government shall render their use or circulation necessary.

On this amendment Mr. W. asked for the yeas and nays, which were ordered.

Mr. MERCER suggested a modification to the amendment, providing for the payment of specie first, and afterwards Treasury notes, which was accepted by Mr. WISE.

Mr. CAMBRELENG hoped the House would not adopt any such impracticable amendment, and gave his reasons therefor.

Mr. WISE modified his amendment with a view of obviating the objection.

Mr. McKAY opposed the amendment as altogether impracticable.

Mr. HOWARD said he would make a remark or two upon this amendment. It proposed to take away all discretion from the Secretary of the Treasury, and compel him to pay specie until the last dollar was expended, before he could issue a single Treasury note. This discretion ought to exist. Specie was more imperatively required for some expenses than others. For example, if a vessel of war were about to sail to a foreign station, she must carry some specie with her. Take the case as of the exploring expedition, which, although it was about to go to what the sailors called the "Star Pole," yet must necessarily touch at civilized ports, and therefore would require no small amount of specie, in order to be prepared for contingencies. If the necessary sum was in the Treasury, there would be no power to reserve it for this purpose, but the first applicant for payment of a demand at the Treasury would sweep it away, and oblige the Secretary of the Navy to postpone the sailing, until he could sell Treasury notes enough to supply the sum wanted. Many other cases of inconvenience might be stated. But further. There was probably no custom-house from Boston to New Orleans, in which some specie had not been collected. This was placed to the credit of the Treasurer as soon as received, and was, of course, in the Treasury. Should the proposed amendment prevail, the Secretary would have to ascertain from every custom-house whether there was a dollar there, before he could issue a single Treasury note; and if any amount, however small, was in the hands of any collector, no matter how distant from the place where the expenditure had to be made, the hands of the Secretary would be tied up. The amendment would, in practice, entirely defeat the bill.

Mr. RHETT moved a reconsideration of the vote, by which the amendment of Mr. UNDERWOOD, proposing to sell the United States Bank bonds owned by Government, had been rejected the day previous.

The Speaker ruled that the motion was not in order during the pending another motion then before the House.

Mr. WISE, with a view of enabling the above motion to be entertained, withdrew his proposition for a time.

Mr. CAMBRELENG had hoped, from the vote given on this amendment last night, that gentlemen had made up their minds that it could not be adopted. He did not rise to debate the question, but to entreat the House to take the question on the bill to night. As the question came before the House in this compromising form, he desired to have a full House to vote on the question, and therefore moved a call of the House.

Mr. GRIFFIN moved that the House adjourn.

Mr. CAMBRELENG called for the yeas and nays, which were ordered.

Mr. GRIFFIN thereupon withdrew the motion.

Mr. MAURY renewed it.

Mr. McKIM called for the yeas and nays; but the House refused to order them, and the motion to adjourn was negatived—yeas 75, nays 121.

Mr. UNDERWOOD hoped the House would reconsider this vote. He had pledged himself to the gentleman to modify his amendment in pursuance of his suggestion, and was desirous of testing the sense of the House on it in this form. He must say that he did not like the modification so well as the original amendment, but he liked it better than the bill; and, therefore, was glad of the opportunity afforded of testing the sense of the House in relation to it.

The motion for a call of the House was then negatived.

Mr. FILMORE called for the yeas and nays on the motion to reconsider; which were ordered, and were—yeas 110, nays 113, as follows:

YEAS—Messrs. Adams, Alexander, H. Allen, J. W. Allen, Ayer, Bell, Biddle, Bond, Bouldin, Briggs, William B. Calhoun, John Calhoun, William B. Campbell, John Campbell, William B. Carter, Chambers, Cheatham, Clowney, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, Ever, u, Ewing, Richard Fletcher, Fillmore, James Garland, Rice Garland, Goode, Jas. Graham, William Graham, Graves, Grennell, Griffin, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Herod, Hoffman, Hopkins, Robert M. F. Hunter, Jenifer, Henry Johnson, William Cost Johnson, Legare, Lewis, Lincoln, Andrew W. Loomis, Mallory, Marvin, Samson Mason, Maury, McKennan, Menefee, Mercer, Milligan, Calvary Morris, Naylor, Noyes, Ogles, Patterson, Patton, Pearce, Peck, Phillips, Pope, Potts, Rariden, Read, Rencher, Rhett, Richardson, Ridgeway, Robertson, Rumsey, Russell, Sawyer, Sergeant, Augustine H. Shepperd, Sluicks, Sibley, Sluick, Southgate, Stanley, Stone, Stratton, Taffaferro, Thompson, Underwood, Webster, Albert S. White, John White, Elisha Whitesley, Lewis Williams, Sherrod Williams, Joseph L. Williams, Christopher H. Williams, Wise, and Yorke—110.

NAYS—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Boon, Borden, Brodhead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, T. J. Carter, Casey, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Crary, Cushman, Davee, DeGraff, Dromgoole, Duncan, Edwards, Farrington, Fairfield, Foster, Fry, Gallup, Gholson, Glascock, Grantland, Gray, Haley, Hammond, Harrison, Hawkins, Haynes, Holsely, Holt, Howard, Hubley, W. H. Hunter, Ingham, F. B. Jackson, J. Jackson, J. Johnson, Nathaniel Jones, J. Jones, Kemble, Kilgore, Klingensmith, Leadbetter, Logan, Arphaxad Loomis, Lyon, James M. Mason, Martin, McKay, Robert McClellan, Abraham McClellan, McKim, McKim, Miller, Montgomery, Morgan, Samuel W. Morris, Muhlenberg, Murray, Noble, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petrikon, Phelps, Plumer, Potter, Pratt, Prentiss, Kelly, Rives, Sheffer, Shipley, Smith, Snyder, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Weeks, Thomas T. Whitesley, J. W. Williams, Worthington, and Yell—113.

So the motion to reconsider was negatived.

Mr. WISE then renewed his amendment, as modified, to except the Superintendent of the Mint.

Mr. WISE called for the yeas and nays on this amendment; which were ordered.

Mr. THOMAS said the gentleman from Virginia (Mr. Wise) has appealed to all members who are not now for commencing a Treasury bank to vote for his amendment. Now, sir, I am of that class; I am for the Treasury note bill, as a means to replenish the Treasury, and provide for the execution of the money contracts of the Government. I shall vote in good faith for the bill, as a bill of supplies, and think that the Secretary would be guilty of a misdemeanor, if he should execute the law as if it had been passed to furnish a paper circulation to the country. But I cannot vote for the amendment to guard against the construction which the gentleman fears will be given to this measure. He proposes to forbid the Secretary, the Treasurer, and all disbursing officers, to issue or circulate one of the Treasury notes while the Treasurer or the disbursing officer has either gold or silver on hand. A very few words I think are needed to make it manifest that such a provision in the law would make it impracticable for the officers of Government to accomplish the purposes for which it is designed.

Before the policy was adopted of leaving in the mint a large amount of money, to increase rapidly the gold coinage, it was considered prudent to keep in the Treasury at all times a surplus of at least two millions of dollars. Notwithstanding the earnest desire felt in Congress after the war to pay speedily the public debt, the commissioners of the sinking fund authorized to purchase the evidences of the public debt, were required to leave at all times in the Treasury at least two millions of dollars. It was then supposed to be indispensable to have that amount of money always in the Treasury. In 1836, when the deposit law was passed, the authors of that measure directed the Secretary to retain five millions of dollars in the Treasury, supposing, obviously, that a less sum would not be sufficient to supply our numerous disbursing offi-

vers with small sums, in anticipation of demands, and at the same time keep the mint in active operation. It is now proposed to abandon this uniform policy, and to prohibit the treasurer from keeping on hand any surplus whatever, except the money needed by the mint. The Secretary, and all other officers, are to be forbidden to issue or circulate a Treasury note to raise supplies, until all the money in the Treasury has been expended. Let us see how such a rule, if prescribed for the government of those officers, would operate.

All the money in the various depositories is in the hands, in contemplation of law, of the Treasurer. Portions of it are in this city to pay officers of Government and laborers on the public works at this point. Other portions are in New York to fit out the expedition for the South Seas. There are, at the same time, considerable sums of public money in depositories near to the northwestern and southwestern frontier, to pay Indian annuities, or the several corps of our army stationed on that border of the Union. At these and other points throughout the Union, the Secretary of the Treasury must take care to keep a constant supply to meet the demands that are to be made on officers employed to disburse the public money. If this amendment could prevail, what would be the condition of this high officer, charged to provide for the prompt fulfillment of almost innumerable contracts. He might, on the fifteenth of this month, learn that five hundred thousand dollars would be required in New York on the first of November next, to complete the equipment of the South Sea expedition. On the same day he might receive information that one hundred thousand more would be required on the fifteenth of November at St. Louis, to pay the army in that vicinity, or the annuity to Indians, from whom we have purchased vast tracts of rich and fertile lands. Well, sir, he refers to the books of the Department, and finds that the Treasurer has on hand, that is to his credit, fifty thousand dollars in the Bank of the Metropolis, intended to pay the laborers employed on the public buildings. He finds, perhaps, that there are also to the credit of the Treasurer small sums, at various other points, intended there to meet the engagements of the United States, what would, in such a state of things, if the amendment could be adopted, be the duty of the Secretary and of the Treasurer. Those officers would not, of course, request the disbursing officers at New York or St. Louis, to wait until all the money standing to the credit of the Treasurer elsewhere had been expended. But it would be incumbent upon them to do an act not much more reasonable. They would have to draw from dispersed depositories moneys standing to the credit of the Treasurer, to be sent to New York and St. Louis, and then issue Treasury notes to borrow money to be distributed amongst the depositories which had been exhausted. They would possibly have to encounter the expense and inconvenience of transmitting gold and silver from Richmond, Pittsburgh, Washington, Baltimore, or elsewhere, to New York, and then having exchanged the Treasury notes in the last named city for gold and silver, it would be sent back to the points first mentioned, so as to be conveniently disbursed.

These are some of the objections that have occurred to me on the instant, to the motion of the gentleman from Virginia. They are to my mind conclusive against its adoption. The amendment appears to be founded upon the supposition that all the debts from and to the United States are to be paid at one point. Even if that was the case, the rule which it is intended to establish would be extremely inconvenient to the officers and to the creditors of the United States. But until the system which has been adopted for the convenience of all concerned, in the receipt and expenditure of the public revenue, shall be abandoned, and this I suppose no man proposes, it will be impossible to administer well the Treasury Department, without a surplus of several millions of dollars. If large banking corporations have not always at command unemployed capital of two, three, and in some cases eight and ten millions of dollars, their directors are justly charged with a culpable carelessness about the credit of the institutions committed to their care. We are in part the man-

gers of an immense body politic, having engagements to be executed in every quarter of the globe, and must not refuse to make ample provision to keep the public faith untarnished. The bill the House has been conceived in a proper spirit. It places within the reach of the Executive all that may be needed, and nothing more. I do not apprehend that the power to be conferred on the President and the Secretary will be abused. Large sums of money will not be withdrawn from circulation to be locked up in the vaults of the public depositories. So believing, I shall vote against the amendment that distrusts, and for the bill which confides in, the capacity and patriotism of those to whose custody I have cheerfully assisted to commit the highest and most important powers of Government.

Mr. WISE then modified his amendment by inserting at the end thereof the words "at the place where the demand is made."

The question was then taken, and the amendment rejected—yeas 96, nays 118, as follows:

YEAS.—Messrs. Alexander, Heman Allen, John W. Allen, Ayer, Bell, Biddle, Bond, Briggs, William B. Calhoun, John Calhoun, W. B. Campbell, William B. Carter, Chambers, Cheatham, Childs, Clowney, Corwin, Cranston, Crockett, Curtis, Darlington, Dawson, Davies, Dennis, Dunn, Elmore, Everett, Ewing, Richard Fletcher, Filmore, James Garland, Rice Garland, Goode, James Graham, W. Graham, Graves, Grennell, Griffin, Halstead, Harlan, Harper, Hastings, Hawes, Herod, Hoffman, Hopkins, Jenifer, J. Johnson, W. C. Johnson, Lewis, Lincoln, Andrew W. Loomis, Lyon, Mallory, Marvin, Samson Mason, Maury, McKennan, Menefee, Mercer, Milligan, Calvary Morris, Naylor, Ogle, Patterson, Pearce, Peck, Phillips, Pope, Potts, Reel, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, Augustine H. Shepperd, Sibley, Sibley, Sledge, Southgate, Stanley, Stone, Stratton, Taliaferro, Thompson, Underwood, Albert S. White, John White, Elihu Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, and Yorke—96.

NAYS.—Messrs. Adams, Anderson, Andrews, Atherton, Beatty, Belne, Bicknell, Birdsell, Borden, Brodhead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, T. J. Carter, Casey, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Cols, Connor, Craig, Crary, Cushman, Davee, Deberry, DeGraff, Dromgoole, Duncan, Edwards, Farrington, Fairfield, Foster, Gallup, Gholson, Glascock, Grantland, Gray, Haley, Harrison, Hawkins, Haynes, Holsey, Holt, Howard, Hubley, William H. Hunter, R. M. T. Hunter, Ingham, T. B. Jackson, J. Jackson, J. Johnson, N. Jones, John W. Jones, Kemble, Kilgore, Klingensmith, Leadbetter, Logan, Arphaxed Loomis, James M. Mason, Martin, McKay, Robt. McClellan, A. McClellan, McClure, McKim, Miller, Montgomery, Morgan, Samuel W. Morris, Muhlenberg, Murray, Noble, Noyes, Owens, Palmer, Parker, Parmenter, Patton, Paynter, Penneybacker, Petriken, Phelps, Plumer, Potter, Pratt, Prentiss, Rardin, Reily, Rencher, Richardson, Rives, Sheffer, Shields, Shepler, Smith, Snyder, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Webster, Weeks, Thomas T. Whittlesey, Jared W. Williams, Worthington and Yell—118.

Mr. WISE then said he should not now offer his other amendments.

Mr. MCKAY moved to add a new section to the bill, the object of which was to prevent receivers of public money from charging the Government more interest on these notes than was actually due at the time they came into their hands; which was agreed to.

Mr. BRONSON moved an amendment that the time to which the issue of these notes should be extended, should not be later than the 31st of December, 1838; which was agreed to.

Mr. UNDERWOOD then moved an amendment, providing that the Secretary of the Treasury should not issue notes exceeding three and a half millions dollars, until he has offered for sale the bonds of the Bank of the United States, for three months, and then he should not be empowered to issue more than ten millions of dollars.

After a few remarks by Messrs. UNDERWOOD, BYNUM, MCKIM, MERCER, LEWIS, and THOMSON,

On motion of Mr. OWENS,

The House adjourned at 10 o'clock p. m.

#### IN SENATE,

MONDAY, October 9, 1837.

Mr. GRUNDY moved to take up the joint resolution, reported from the Committee on the Post Office and Post Roads, in relation to the payment in advance on all letters sent by express mail. Mr. G. went into an explanation of the necessity there was for an immediate action on the measure. The express mail was of recent origin, and was authorized under an act of Congress, passed some three years since. It was introduced by the Postmaster General, with a view to afford facilities to

merchants and men of business, for which advantage the law authorized the payment of treble postage. There were persons who were ignorant of the object of the mail, that had sent many letters of no importance, either to themselves or others, which letters were not taken out of the office, but returned as dead letters to the great diminution of the revenue. There were others again, who from mischief or sport, had also sent numerous letters by this conveyance; and the object of the resolution was to prevent in future all such occurrences, by requiring the money in advance. Mr. G. had consulted the Postmaster General, as to whether he could not make the arrangement without the intervention of the laws; but as that officer appears to think the passage of an act necessary to enforce the measure, the bill before the Senate had been resorted to.

Mr. KNIGHT expressed himself as unfriendly to the system of express mail as calculated to afford facilities to the rich, which the poor could not avail themselves of—and besides that the railroads of the country yielded advantages, in point of speed, beyond any express that could be arranged.

Mr. GRUNDY did not intend to defend the system—it had been created by laws, and must be repealed by laws, before it could be stopped. The object now was to prevent the abuse of the system, by providing against the accumulation of dead letters, which would effectually be done by requiring the postage in advance in all instances.

The resolution was then ordered to be read a third time.

Mr. GRUNDY moved to take up the bill regulating the fees of district attorneys, which was agreed to.

Mr. TALLMADGE offered a modification of the amendment offered by Mr. Clayton last week, when the bill was under discussion, which was accepted, and the amendment as modified agreed to.

The amendment provides a second section to the bill, and reads as follows:

Sec. 2. *And be it further enacted*, That no fee shall accrue to any district attorney on any bond left with him for collection, or in any suit commenced on any bond for the renewal of which provision is made by law, unless the party or parties shall neglect to apply for such renewal for more than twenty days after the maturity of such bond.

The amendment offered by Mr. Buchanan at a prior discussion of the bill, viz: to strike out the word "five," in the 5th line, and insert "for all bonds exceeding \$500, four dollars, and for all bonds of and under that sum, two dollars be allowed," was agreed to.

Mr. CLAY (of Ky.) thought the original bill was improved by the amendment of the Senator from Pennsylvania, (Mr. Buchanan) but still the amount of compensation was in his opinion far beyond the service rendered. If, as had been stated the other day, there were upwards of four thousand bonds to be renewed, ought so enormous a sum as would accrue, be allowed to the district attorneys, when all the labor would be performed in less than three months? What, asked Mr. C. is the service in these cases? the bonds are all printed, and have merely to be filled up with the signatures, and he would undertake to say, that he, or any business man could fill five hundred bonds in a day. Why have the original bonds taken by the collector, and order them to be renewed by the District Attorney? Was not the collector better qualified from his intimate knowledge of merchants and mercantile affairs, to do the duty? He had not examined the laws very closely lately, but he believed the collector was allowed forty or sixty cents for the duty. Why not then continue it with him at the same price? Was it right, was it reasonable, to take the duty from the collector, to give it to the attorney, at the vast increase of expense, at times like the present, when the mercantile interests of the country were so prostrate. Mr. C. then moved to strike out all after section 1st, and insert "That in all cases of extension of the time of payment of bonds given for duties on imports, it shall be according to such directions as may be given by the Secretary of the Treasury, and the extension of payment of the old bond, or the taking of a new bond, shall be by the resp. c-

tive collectors, subject to no other charge than such as may be legally receivable on the taking of the original bond, upon the entry of merchandise."

According to my amendment (said Mr. C.) the direction of the matter will be left with the Secretary of the Treasury; and hence there can be no difficulty in passing over instructions to the collectors; and the effect of the laws will then be to keep the bonds with the collector.

Mr. BUCHANAN said he felt very little interest in the matter, other than a strong desire to see the same justice done to the district attorneys that he would desire done to all mankind. He had stated the other day on what he deemed very good authority, that three-fourths of the district attorneys of the United States had never made any charge whatever, because they did not know what to charge, or what allowance was granted for such duty. The Senator from Kentucky (Mr. Clay) said that he could fill up five hundred bonds in a day. Mr. B. was aware that the gentleman did business very rapidly, but that would exceed the powers of any man in that or any other public body. Mr. B. had been told by a gentleman of truth, that he had been engaged from morning until night for a whole month in taking about four hundred bonds. Mr. B. said he would be very sorry to take the responsibilities annexed to the duties; the condition of the parties was to be inquired into; the sureties have to be looked to, and he did not think the amendments as offered by himself to graduate the price, so as to allow two dollars for all bonds of and under five hundred dollars, and four dollars for all above that sum, would be unreasonable.

If the amendment of the Senator from Kentucky prevailed, what would be done with all the past cases, where the attorneys had never received a cent nor made a charge, because they did not know what to charge? Again, the bonds would have to be re-transferred from the attorney's hands to those of the collector. In his opinion, it was better to let the law stand as it was, and let the district attorneys retain the bonds, and hold those officers responsible, and allow them a fair compensation.

Mr. CLAY asked why, if the labor be the same in all cases, four dollars should be exacted for one bond and two dollars for another? If the gentleman alluded to by the Senator from Pennsylvania did occupy his time for a month in the taking of three or four hundred bonds, the price at three dollars even would give him a sum superior to that of any officer under the Government, save the President. Mr. C. said he would undertake to maintain that five hundred bonds could be filled up in one day, and the best mode was to retain the whole business in the hands of the collector.

Mr. WEBSTER said the question had arisen how came the bonds in the hands of the district attorney? The laws made it the duty of the collector to turn over all bonds not paid at maturity to the district attorney for suit; and hence, if the bonds had to be renewed, it would be done at the attorney's office, where the fees were claimed under the practice of the New York courts. In the present case, where an act of clemency of Congress extended the time on these bonds, the collector was undoubtedly the best judge of the matter from his long acquaintance with, and intimate knowledge of the merchants; besides the duties, were merely clerical, and the parties he took it for granted, were in most instances the same. In the present relaxed state of business, there was plenty of aid in the custom-house for all the duties that would be required.

Mr. TALLMADGE expressed his intention of voting for the amendment of the Senator from Kentucky, (Mr. Clay), and in so doing, he conceived no injustice would be done to the district attorneys. If the Government allowed the renewal, there was no necessity for the bonds to be sent to the district attorney, and that officer ought not in justice to claim any thing, unless put in his hands for suit.

Mr. CALHOUN was averse to any charge on the parties, or subjecting the Government to any.

Mr. GRUNDY was anxious that the law remain undisturbed. With regard to compensation, he did not pretend to be a very correct judge. He

was aware that in a place like New York, where there was so much business, a fee, ever so moderate, would amount to a very considerable sum of money; in one place, then, it might be too much, in another too small. It was necessary, he thought, to allow as much as would secure the services of a faithful and competent agent. The moment a bond became due, it was handed over to the district attorney for suit; on that head the law was imperative. The collector then took the attorney's receipt for the bonds. Would it not be better to let the law remain as it is, and allow what was right and proper to a competent person, than, by altering it, run the risk of disordering the whole manner of keeping the books of the custom-house?

Mr. CRITTENDEN said it struck him that the district attorney was entitled to no compensation under the law; that the whole was a mere lawless and unwarrantable exaction of fees. Mr. C. read the law of the United States, and said that the charge was nothing more nor less than extortion.

Mr. GRUNDY said, on this head the district attorney of New York had taken the opinion of the most eminent lawyers, and the fees had been taxed under the supervision of Chancellor Kent; and hence the district attorney had neither violated law nor usage. Mr. G. did not wish to spend further time in the discussion. He was of opinion that the party benefited ought to pay the expense; and where it was fixed at so low a rate as two dollars on bonds of five hundred, there could be no reasonable ground for complaint.

Mr. TALLMADGE explained that the fees charged by the district attorneys were the regular taxed fees. If a bond placed in his hands for suit were paid by the parties, the attorney would still be entitled to his fee under the usage of the courts of New York. Unless placed in his hands for collection, no charge was made; but by the amendment of the gentleman from Pennsylvania, you would give him as much for the renewal as he would be entitled to under the tax cost.

Mr. WRIGHT would vote against the amendment of the Senator from Kentucky (Mr. Clay.) Every bond not paid at maturity was immediately handed over to the district attorney for suit. It was not the mere extension of time that officer had to look to, but in giving that time to see that the bonds be made perfectly secure. Great changes had taken place in the commercial relations of the city of New York, and much and fearful responsibility would necessarily be incurred; and hence it was our interest to charge some officer with the duty that would feel his responsibility to the Treasury. Mr. W. thought if \$4 were allowed on the larger bonds, and \$2 on the smaller denomination, it would be imposing no burden on the mercantile community.

The question was then taken on Mr. CLAY's amendment, by yeas and nays, when there appeared—for it 22, against it 18, as follows:

YEAS—Messrs. Bayard, Black, Calhoun, Clay of Kentucky, Clayton, Crittenden, Kent, Knight, Morris, Nicholas, Prentiss, Roane, Robbins, Ruggles, Smith of Indiana, Southard, Spence, Strange, Swift, Tallmadge, Webster, and White—22.

NAYS—Messrs. Allen, Benton, Buchanan, Clay of Alabama, Fulton, Grundy, Hubbard, King of Alabama, Niles, Norvell, Pierce, Robinson, Smith of Connecticut, Walker, Wall, Williams, Wright, and Young—18.

Mr. GRUNDY said he would now be compelled to vote against the bill, because it left the fees of the District Attorney of New York precisely where they were, and made provision for no others save the District Attorney of Alabama.

Mr. BUCHANAN said he could not vote for the bill in its present shape, because he thought it would exclude those district attorneys who had already done business to a very considerable extent. He would, therefore, move to recommit the bill to the committee, "with instructions to provide a reasonable compensation to district attorneys for services which they have already rendered in extending the bonds of the merchants;" and on this motion he asked for the yeas and nays.

After some further desultory debate, the question was taken on the recommitment, when there appeared, yeas 15, nays 26, as follows:

YEAS—Messrs. Buchanan, Clay of Alabama, Fulton, Hubbard, King of Georgia, McKean, Nicholas, Niles, Norvell, Robinson, Strange, Walker, Wall, Wright, and Young—15.

NAYS—Messrs. Allen, Bayard, Benton, Black, Calhoun, Clay of Kentucky, Clayton, Crittenden, Grundy, Kent, King of Alabama, Knight, Pierce, Prentiss, Roane, Robbins, Ruggles, Smith of Connecticut, Smith of Indiana, Southard, Spence, Swift, Tallmadge, Webster, White, and Williams—26.

The question was then taken on agreeing with the several amendments as adopted in Committee of the Whole, and carried. The bill being reported as amended, was ordered to be engrossed for a third reading.

A message was received from the House of Representatives, stating that it had passed a bill to continue in force certain acts passed at the last session.

Mr. GRUNDY moved to take up the joint resolution in relation to postage on express letters; which had its third reading, and was finally passed.

Mr. BENTON communicated to the Senate a letter from the Treasury, giving the imports and exports of gold and silver for the last fortnight, in which the import was \$490,000, and the export was \$150,000; ordered to lie on the table, and be printed.

Mr. GRUNDY then moved to take up the bill received from the other house, and explained the necessity there was for its immediate passage. Some laws had been passed at the last session which were to continue in force to the close of the ensuing session. The present being an extra session, and unlooked for at the time, rendered necessary the adoption of this measure.

This bill, having had its three several readings, was finally passed.

Mr. WRIGHT then moved to take up the bill authorizing merchandise to be deposited in the public stores, and for other purposes.

Mr. KING of Alabama thought it would be better to postpone the bill, particularly, as from all appearances just now, there would be no chance of its passing the other body this session; and, as there was a great diversity of opinion involved, he thought it better to postpone it until the first Monday in December next.

Mr. CALHOUN agreed with the Senator from Alabama that it was better to postpone it to the period named, when it could be fully acted on, and all its features maturely considered. He was not prepared at this time to enter on any discussion, and he was aware that there was a great diversity of opinion on the subject.

Mr. WRIGHT did not suppose there would have been any objection to taking up the bill, neither was he aware of any diversity of opinion in relation to it. So far as he was concerned, he was perfectly willing for the Senate to take its own course. The measure had been pressed on his consideration by the parties interested. He felt persuaded, if the bill were fully examined, that it would not be found objectionable in any shape.

The question being taken on the adoption of Mr. WRIGHT's motion, there appeared, for it 20, against it 7. The bill was accordingly taken up for consideration.

Mr. BUCHANAN moved to amend the bill, by inserting, after the last clause, "Provided, That the existing laws, permitting the landing and delivery of railroad iron, imported for the purpose of being permanently laid down on railroads and inclined planes, shall be and remain in full force, any thing in this act to the contrary notwithstanding;" which amendment was agreed to.

Mr. CLAY said that, although he had expressed an opinion favorable to this bill when it was last up, yet he would feel himself obliged to vote against it, from a consideration which had not presented itself to his mind at that time. He alluded to the compromise act, by a fair interpretation of which credits could not be abolished until after the expiration of that act, which would not take place until the 3d June, 1842. After this period, all duties were to be collected in money, and all credits abolished. Disposed as he was to adhere faithfully and scrupulously to this act, he felt himself pre-

vented from voting against the abolishing of credit; but would have no objection to vote for the warehouse system. If gentlemen chose to violate the compact, the effect would be to revive all the angry discussion in relation to that great interest, which had so long and so fearfully agitated the country. If Congress did not respect the act, no individual would; and he regretted to see the Senate was divided in regard to a measure which, if violated in one instance, the right might be claimed to violate it in all others. Mr. C. expressed himself as friendly to the abolishment of credit, and the collection of the revenue in cash, because he believed such a measure favorable to the great manufacturing interests of the country.

Mr. CALHOUN thought the view taken by the Senator from Kentucky was correct. There was no subject that could be touched on which would excite greater contention, and he submitted to the Senators on all sides whether there was any necessity for agitating this question now. If it met the wishes of the chairman of the Committee on Finance to have the bill passed without the clause which violated the compact, it might do very well; but if not, he would move to postpone the bill till the first Monday in December next.

Mr. WRIGHT said the passage of this bill had been pressed upon his consideration by the mercantile community. According to the present law, the importer has to give his bond for a definite period, say six months, while the effect of the bill before them was to allow the merchandise to be warehoused, where it might remain three years, if they pleased the merchant having no control of his property, and the Government no bond. He did not see how the bill could possibly conflict with the views of gentlemen in relation to the compromise act, though he did not admit that act as a matter of right to the exclusion of all others.

Mr. CLAY said he had not examined the bill very carefully; but still he must contend that it would be a violation of the compact. Either there was an extension of credit beyond the time allowed, or a less credit was given. It was true, the merchant might keep his goods for three years in the warehouse; but then he might also remove them in three days, by which means he could always avail himself of an advantageous state of the market. In one view of the matter there was more credit—in the other less; and in either case, it violated the principle on which the compromise act was founded; and on that ground he would be compelled to vote against it.

Mr. WRIGHT asked Mr. CALHOUN to withdraw his motion; which having been acceded to, Mr. W. moved to postpone the further discussion, and make it the special order of the day for to-morrow. This motion was agreed to.

On motion of Mr. WHITE, the Senate went into Executive business; and, after some time spent therein,

The Senate adjourned.

## HOUSE OF REPRESENTATIVES,

MONDAY, October 9, 1837.

Petitions and memorials were presented by Messrs. ADAMS, REED, LINCOLN, CUSHING, and GRENELL of Massachusetts.

Mr. CRANSTON of Rhode Island.

Messrs. FILLMORE, MARVIN, and PATTERSON of New York.

Messrs. SERGEANT, OGLE, MATTHIAS MORRIS, L. W. MORRIS, FRY, NAYLOR, and PAYNTER, of Pennsylvania.

[Mr. M. MORRIS of Pennsylvania presented three memorials of similar import, one signed by thirty, and another by forty-four, and one other by forty-six, citizens of Bucks county, Pennsylvania, remonstrating against the annexation of Texas to the United States.

Also, one petition, signed by 33 women of the same county, praying for the abolition of slavery in the District of Columbia and the Territories of the United States, and the slave trade between the States.]

Mr. POLK (Speaker) of Tennessee.

Messrs. ALLEN, RIDGEWAY, and GOODE, of Ohio.

Mr. CLAIBORNE of Mississippi.

[Mr. CLAIBORNE presented the petition of a number of citizens of the State of Mississippi, in favor of the establishment of a national bank.]

Messrs. CASEY and MAY of Illinois.

[Mr. MAY presented the petition of a number of the inhabitants of Putnam county, Illinois, praying the establishment of a national bank.]

Mr. CRARY of Michigan.

Mr. MERCER, from the Select Committee on Rules, reported an additional rule, that the hour of the adjournments of the House be noted on the journal, and that no gentleman shall leave his seat after an adjournment until the Speaker vacates the Chair.

The report having been taken up for consideration,

Mr. BYNUM called for a division of the question.

After a few remarks by Messrs. HAYNES, BYNUM, DUNCAN, and MERCER, the first part of the report was adopted.

Mr. TAYLOR moved to strike out of the last part of the rule the words "shall vacate the chair," and insert, "shall declare the result;" which, after a few remarks from Mr. ADAMS, was rejected; and the latter part of the rule was also rejected.

Mr. HOWARD, on leave, submitted the following resolution, which was considered and adopted:

*Resolved*, That the Secretary of War be requested to cause to be compiled an abstract of the several pension laws now in force, for invalid, revolutionary, or other pensions, together with the constructions which have been placed upon such laws by the War Department, or Attorney General, and the forms necessary to be followed by the applicants for pensions under the several laws; and report the same at the next session of Congress.

Mr. ELLMORE, on leave, submitted the following resolution:

*Resolved*, That in addition to the 10,000 copies of the correspondence for the annexation of Texas to the United States, ordered to be printed, there be 10,000 more copies printed, to which shall be annexed, from the correspondence "concerning the boundary between the United States and the Mexican Republic, and a cession of territory belonging to the Mexican Confederation to the United States," communicated in the Message of the President of the United States, of the 2d October instant, the following documents: Mr. Clay to Mr. Poinsett, 26th March, 1825; extract from instructions; Mr. Torrens to Mr. Adams, 15th February, 1824; Mr. Clay to Mr. Poinsett, 24th September, 1825, extracts; the same to the same, 15th March, 1827, extract; Mr. Van Buren to the same, 25th August, 1829; Mr. Livingston to Mr. Butler, 20th March, 1833, extract; Mr. McLane to the same, 13th January, 1834; Mr. Forsyth to the same, 2d July, 1835, extract; and same, 6th August, 1835, extract.

Mr. ADAMS said he should move an amendment of this resolution. Instead of extracts, he moved to print the whole of the correspondence and documents alluded to. He was opposed to sending garbled statements of matters so interesting, before the people.

Mr. ELLMORE said that, having offered the resolution, which he had supposed would have elicited no debate nor opposition, he felt bound to say a word in explanation. This House had made two calls on the President for information upon subjects connected with Texas. The first was for the correspondence between the authorities of Texas and the United States, concerning the annexation of Texas. The second was for the correspondence with the authorities of Mexico, concerning the boundary line between the two countries, and the propositions for the purchase of any portion of the Mexican territory by the United States. Both calls had been responded to; and, in answer to the first, a communication from the Texan Minister to this Government proposing the annexation of Texas; a reply from the Secretary of State; and a rejoinder from the Texan Minister, had been laid before this House, and ten thousand copies were ordered to be printed. In reply to the second call, a voluminous correspondence between the proper agents of the Governments of the United States and Mexico had been communicated, and ten thousand copies of it ordered to be printed. Upon looking into the

last documents, (said Mr. E.) I find they are divided into two classes; the first class consisting of those named in the resolution now under consideration, and consisting mainly of instructions given by the different Presidents wielding the executive power of the United States, from 1824 to 1837, to our ministers resident in Mexico, directing them to propose for the purchase of Texas, and giving the reasons why such a purchase was desirable and important for the United States. These constituted but a small portion of the documents communicated under the second call; the rest, comprising nine-tenths or probably nineteen-twentieths of those sent by the President, relating almost entirely to a treaty of boundary which was negotiated at an early period of the negotiations between the two countries, and which recognised the boundary fixed for Mexico in 1819, in the treaty of Washington, between Spain and the United States; and in which the latter yielded Texas and consented to make the Sabine and Red rivers the boundary. This treaty, recognising this line as the true one between Mexico and the United States, was three times negotiated; and signed in almost the same terms, having twice failed in consequence of not being ratified by Mexico in the time prescribed by one of its articles. The various forms and shapes which these negotiations assumed, the several propositions to vary them, the causes which produced the failure to ratify—from frequent revolutions, changes in the executive departments charged with this subject, propositions to change the place of negotiation from Mexico to Washington—the formation of a commercial treaty between the countries, and tedious details of all its beginnings, interruptions and progress; and the urgent requisitions of this Government for the appointment of commissioners to run the line of boundary as fixed in 1819, constitute a mass of diplomatic notes, correspondence and instructions on these points, which have no bearing on the great subject, the annexation of Texas, which now engrosses the public attention. Ten thousand copies of these are already ordered to be printed; enough to diffuse all the information required. But, sir, it is not so as regards those mentioned in the resolution. They relate especially to the acquisition of Texas; they consist of instructions from the various Presidents who have been in power since 1824, showing in the arguments and views they suggest to our ministers charged with these important negotiations, the reasons why it has always been deemed important to the welfare of the United States that they should possess Texas.

Sir, the House will remember that some days ago, the gentleman from Massachusetts made the pregnant and startling declaration, that this question was a question of union or disunion. He presented this issue to the people of the United States. Now, sir, I wish my constituents, and the people of the south, to have all the information on this subject concentrated in one document, which will show them the official action and opinions of this Government, from 1824 to the present day. I wish them to see, by the instructions given our ministers in every administration since 1824, that it has always been considered essential to the safety and interests of these States, and that the sound wisdom and prudence of the reasons assigned in these able papers, may be submitted to their solemn deliberation, before they return their answer to the issue tendered by the gentleman from Massachusetts.

It may be, sir, as the gentleman from Massachusetts says, that these documents are "garbled," and only such extracts furnished the House as suit one side of the question. If garbled, it has been done by the President, or his Secretary of State. I propose to publish them exactly as they have been furnished to the House. If these documents, and especially the opinions of the distinguished statesman who was President in 1825, shall place any gentleman on this floor in the position of having entertained opinions on this subject not exactly consistent, of having favored and urged the acquisition of Texas at one time, as an important national object, and of having opposed and denounced it at another, it is a matter he must settle as best he can with the country. I have no further concern in the affair, than that I want the benefit of the

arguments of the then President, contained in these instructions, to aid the people in forming a correct estimate of the importance of Texas to the United States. I do not now propose to argue the merits of this great question, but I desire to spread before the people the information contained in the arguments of far abler men, which I here find prepared to my hand.

But, sir, I apprehend the gentleman from Massachusetts is mistaken in the course he has proposed, if his object is to have all the correspondence relating to the annexation or purchase of Texas, printed on this occasion. He complains that the correspondence is garbled. Let him then call, by a resolution, on the President for that which he says is suppressed. He can not, by his motion, if he succeed in carrying it, have that printed which is not furnished the House.

Mr. ADAMS observed that that would best appear by showing the House these documents. He wanted all or none. He was opposed to sending forth garbled extracts as the basis of opinions on a subject so momentous. The gentleman from South Carolina had proposed to print extracts from the documents favorable to his own peculiar views on the great question at issue, and not the entire documents. The President of the United States, in obedience to the call of the House, sends certain papers. The gentleman from South Carolina proposes to print a part of them. Mr. ADAMS said his proposition was to print the whole. He had a right to argue that the gentleman proposed to print such extracts as favored one side of the question rather than the other. No conclusion could possibly be drawn from what had already been communicated, and the people had a right to all the light that could be shed upon the subject.

Sir, (said Mr. ADAMS,) I say on my authority, that if such a proposition was ever made on the part of the United States to the Government of Mexico, it was received in such a manner as to show that it was offensive in the highest degree to that Government. If, as the gentleman from South Carolina intimates, some parts of those documents prove one thing, there may be other parts of them which go to prove directly the contrary. If any inference is to be drawn from the instructions referred to against the interests of my constituents, or against those of that gentleman's constituents, we ought to have also the answers to the propositions referred to, and not draw inferences from that which is communicated to us, which might be entirely refuted by that which has not been communicated. I repeat that, if there ever was such a proposition made to Mexico, it was received in such a manner that it never was repeated, and never ought to be repeated. I have very strong reason to believe, further, (said Mr. A.) that at one time the late Executive of the United States was deluded into an expectation that the Mexican Government were ready to make a cession of territory to the United States; and, indeed, in one of the documents lately communicated to this House, the Minister from Texas affirms to the Secretary of State, that the late Executive of the United States was so confident of the acquisition of Texas, that he offered to Mr. HORTCHINS G. BURTON, of North Carolina, the commission of Governor of that Territory. [Mr. ADAMS was here reminded by the Speaker that he was transcending the proper limit of debate upon a mere question of printing papers.] Well, (Mr. A. said,) he must then fall back upon the ground of natural justice, which he said would sufficiently sustain his argument that all the papers, if any, ought to go together to the American people.

Mr. ADAMS having demanded the yeas and nays on the motion to amend the resolution, and they having been ordered to be taken—

Mr. CAMBRELENG moved for the orders of the day.

#### TREASURY NOTE BILL.

The House then resumed the consideration of the "bill to authorize the issuing of Treasury notes."

The question pending being the amendment of Mr. UNDERWOOD, to authorize the Secretary of the Treasury to issue only three millions and a half of Treasury notes, until the bonds of the Bank

of the United States had been offered for sale for three months, exclusive of interest.

Mr. CAMBRELENG appealed to the members on all sides of the House to bring this measure to a conclusion. He did not suppose the gentleman from Kentucky (Mr. Underwood) really meant to embarrass the Treasury of the United States; but his amendment, if adopted, would be the most extraordinary proposition ever adopted by Congress. His proposition was to authorize the sale of three bonds, amounting each to about two millions of interest. Now there was not a capitalist on the face of the earth who would bid for them. Even the Bank of the United States, with all its capital, could not raise the means to do it, without the aid of the Bank of England, for the simple reason that the bonds could not be divided.

Now, what would be the effect of this proposition? Here was a bill before the House taking from the Secretary of the Treasury the power to draw drafts, which destroyed, in one single instant, the power to draw for one single dollar to pay the public creditors, who were now waiting for these Treasury notes. By the amendment he had the right to issue only three millions and a half of notes in the last quarter of the year, thus tying up his hands for three months, except so far as his reliance upon these three millions and a half only for the expenses of the Government during that time, when, according to the estimates, at least ten millions will be required for the same period. This would, in effect, bankrupt the Treasury.

Mr. C. said he wished too to reach another bill of primary importance, the divorce bill, before they adjourned, for he was anxious not to leave the Treasury and the finances in their present unregulated condition. In a New York paper he was made to say that he never intended to bring that bill up. He must have been mistaken in what he said, since he argued quite the reverse.

Mr. UNDERWOOD had understood that there were capitalists prepared to purchase the bank bonds; and after a few more words in its support, he modified his amendment by striking from it the words, "exclusive of interest."

Mr. LEGARE briefly opposed the amendment, but remarked upon what he called the unnecessary course of the Secretary of the Treasury in writing to brokers and others about the sale of the notes before they were authorized to be issued.

Mr. SERGEANT also remarked, that the Secretary of the Treasury had taken a view of this bill not warranted, either by the language of the bill, or by the views of members of that House, so far as those views had been disclosed. That gentleman had written to brokers and others, all over the country, to inquire of them at what rate it would purchase those notes; whereas there was no authority in the bill to sell the notes at all.

The authority or power of the Secretary of the Treasury was confined to two points. In the first place, he could only issue them to creditors of the Government, in satisfaction of debts, on their nominal amount, with the interest that may then have accrued. The next power was the power to borrow upon the hypothecation of the notes.

On these points Mr. S. dwelt at some length. As to the constitutional power of the Government to issue these bills he had no doubt in the world. It had as much constitutional power to do that as to charter a national bank. With reference to the wants of the Treasury, he preferred that they should borrow money of that description, which would answer the purposes of the Treasury.

Mr. CAMBRELENG said a few words in reply to Mr. S. and gave notice of his intention to enter more at large on the subject of the gentleman's present and late speech in support of a national bank, when the divorce bill came up. The gentleman's argument about the people's money and the Government's money, was a merely *ad captandum* one, designed to produce an effect upon the elections in Pennsylvania.

Mr. C. agreed with the gentleman that the Secretary of the Treasury had not properly construed the act now under consideration; for if he had construed it properly, there never could be any depreciation whatever of these notes. There was no

power given in the bill to sell the notes but to borrow money upon them.

Mr. PICKENS made an urgent appeal to the House, that, considering the lateness of the session, and the important measures behind, they would vote on all the propositions now before it on this bill. He declared his intention of voting against the bill himself if it embraced interest.

Mr. MERCER opposed the bill.

Mr. UNDERWOOD a *ain* modified his amendment, so as to authorize the Secretary of the Treasury to exchange the bonds with the Bank of the United States for smaller bonds.

Mr. GHOLSON replied principally to the remarks of Mr. BELL on Saturday last, and spoke in opposition to the establishment of a national bank, and in support of the bill, without the amendment, under consideration. He insisted that the bill was opposed, and was intended, if possible, to be defeated, for the express purpose of promoting the object to charter a national bank.

Mr. BELL spoke briefly in reply.

Mr. REED animadverted upon what he termed the miserably erroneous estimates of the Secretary, and argued against the necessity of passing the original bill without the amendment, viz: to sell the bank bonds.

Mr. GHOLSON rejoined to Mr. BELL, but his remarks were cut off by the hour having arrived for taking a recess, when the House adjourned till 4 o'clock.

[EVENING SESSION.]

On the Speaker resuming the Chair, a quorum not being present,

On motion of Mr. McKAY, a call of the House was ordered. The Clerk commenced calling the roll, when, a number of the absentees arriving, a motion prevailed, dispensing with all further proceedings in the call; and the House resumed the consideration of the

#### TEASURY NOTE BILL.

The question being on the amendment of Mr. UNDERWOOD:

Mr. GHOLSON resumed his remarks. He was in favor of granting indulgence to the banks, in order that they might extend indulgence to their debtors. The gentleman from Tennessee (Mr. Bell) had said something about "Government being forced into terms," if it would not comply with the wishes of the banks. Did the gentleman mean to hold out a threat that the banks would increase the distress which now prevailed, by creating anarchy over the country, if their terms were not complied with. Well, let them do so. He cared not for such threats; neither did he represent a constituency that was to be influenced by measures of intimidation. He was sure the administration were not to be frightened into terms. The object of the amendment was to benefit the United States Bank, and to enable it to reap a benefit to the injury of the country.

Mr. CURTIS, among all the measures of relief proposed, preferred the original House bill brought in by the chairman of the Committee of Ways and Means; and he had not been satisfied with the reasons given by that gentleman for abandoning it, and introducing that of the Senate. He was of opinion that the present measure was only calculated to relieve the Government, while it would certainly embarrass the people. He had a right to suppose, from the report of the Secretary, that it was intended to convert a certain portion of the Treasury notes, bearing interest, into specie. The effect would be that the merchants who had specie deposited in the banks would draw it out to purchase the notes. The banks, being thus deprived of their specie, would be effectually prevented from resuming specie payments. The banks relied on the co-operation of their depositors to enable them to resume the payment of specie, by allowing it to remain in their vaults, but their plans would be frustrated by the adoption of this bill without the amendment. It had been said that the Treasury notes would serve for foreign remittances, but in his opinion, that would not be the case, owing to the short period they had to run. Besides the price of exchange on London was now but about fourteen per cent. and he was informed that there would be no advantage in using the notes

for that purpose, unless the price of exchange was twenty-five per cent. He was willing to admit that the Treasury notes would give a limited relief, but so limited that he could not vote for it. In reply to a question from Mr. CAMBRELENG, he repeated that he was willing to vote for the original House bill; but now the Senate bill had been introduced in its stead, he would rather vote for the amendment now on the table, for the sale of the bonds, providing the bank could be prevailed upon to purchase so much of the stock, as would divide it, so as to make it saleable in the London market. He thought that measure would afford more relief than the issue of Treasury notes, bearing interest.

The question then recurred on the amendment of Mr. UNDERWOOD.

Mr. WILLIAMS called for the yeas and nays, which were ordered—ayes 95, noes 109, as follows:

YEAS—Messrs. Adams, Alexander, Heman Allen, John W. Allen, Ayerrigg, Bell, Biddle, Bond, Briggs, William B. Calhoun, John Calhoun, John Campbell, William B. Carter, Chambers, Cheatham, Childs, Clowney, Cranston, Crockett, Curtis, Cushing, Darlingston, Davies, Deberry, Dennis, Dunn, Elmore, Everett, Ewing, Richard Fletcher, Goode, James Graham, Grennell, Griffin, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Herod, Hoffman, Hopkins, Robert M. T. Hunter, Wm. Cost Johnson, Lawler, Lincoln, Andrew W. Loomis, Mallory, Marvin, Samson Mason, Maury, Maxwell, McKennan, Menefee, Mercer, M. Thias Morris, Calvary Morris, Naylor, Noyes, Ogle, Patterson, Peck, Pickens, Pope, Potts, Rariden, Randolph, Reed, Rencher, Ridgway, Robertson, Rumsey, Russell, Sergeant, Augustine H. Shepperd, Charles Shepard, Shields, Sibley, Slade, Stratton, Taliaferro, Thompson, Underwood, Albert S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, Yell, and Yorke—95.

NAYS—Messrs. Anderson, Andrews, Atherton, Batty, Byrne, Bicknell, Birdsall, Boon, Brodhead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, Casey, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Crary, Cushman, Davee, DeGraff, Dromgoole, Edwards, Farrington, Fairfield, Foster, Fry, Gallup, Gholson, Glascock, Grantland, Grant, Gray, Haley, Hammond, Harrison, Hawkins, Haynes, Holt, Hubley, William H. Hunter, Thomas B. Jackson, Jabez Jackson, Joseph Johnson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, Klingensmith, Leadbetter, Lewis, Logan, Arphaxad Loomis, Martin, May, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, Samuel W. Morris, Muhlenberg, Murray, Noble, Noyes, Owens, Palmer, Parker, Paynter, Pennybacker, Petrikon, Plumer, Potter, Pratt, Prentiss, Reilly, Rhett, Richardson, Rives, Sawyer, Sheffer, Shepler, Smith, Snyder, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vandever, Webster, Weeks, Thomas T. Whittlesey, and Jared W. Williams—109.

So the amendment was disagreed to.

Mr. ROBERTSON moved to amend by striking out the first section, and inserting a clause, authorizing the Secretary to borrow, from time to time, a sum not exceeding seven millions of dollars.

Mr. PICKENS said that if this amendment prevailed, it would be clothing the Secretary of the Treasury with a much greater power than that of issuing Treasury notes. He thought, therefore, as the gentleman was opposed to leaving power in the hands of the officers of the Government, he should not introduce an amendment of this kind.

Mr. ROBERTSON replied that the Constitution of the United States authorizes the President to borrow money, but it did not authorize the Government to issue paper money. This being the case, he must adhere to this amendment.

Mr. DAWSON was decidedly in favor of the amendment submitted by the gentleman from Virginia, and should give it his support.

The question was then taken on the amendment and decided in the negative—yeas 86, nays 131, as follows:

YEAS—Messrs. Adams, Alexander, Heman Allen, John W. Allen, Ayerrigg, Bell, Biddle, Bond, Briggs, William B. Calhoun, John Calhoun, John Campbell, William B. Carter, Chambers, Cheatham, Childs, Clowney, Coles, Corwin, Cranston, Crockett, Curtis, Cushing, Darlingston, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, Richard Fletcher, Filmore, Goode, Grennell, Griffin, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Herod, Hopkins, Robert M. T. Hunter, William Cost Johnson, Lawler, Lincoln, Andrew W. Loomis, Mallory, Marvin, Samson Mason, Maury, Maxwell, McKennan, Mercer, Milligan, Calvary Morris, Naylor, Ogle, Patterson, Peck, Phillips, Pope, Potts, Rariden, Randolph, Reed, Rencher, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, Slade, Southgate, Stanley, Stone, Stratton, Taliaferro, Thompson, Underwood, Albert S. White, Elisha Whittlesey, Christopher H. Williams, Wise, and Yorke—86.

NAYS—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Boon, Borden, Bouldin, Brodhead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, John Campbell, Casey, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Connor, Craig, Crary, Cushman, Davee, DeGraff, Dromgoole, Duncan, Edwards, Farrington, Fairfield, Foster, Fry, Gallup, James Graham, Gholson, Glascock, James Graham, Grantland, Grant, Gray, Haley, Hammond, Harrison, Hawkins, Haynes, Holsey, Holt, Howard, Hubley, William H. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson,

Joseph Johnson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, Klingensmith, Legare, Leadbetter, Lewis, Logan, Arphaxad Loomis, Lyon, Martin, May, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, Samuel W. Morris, Muhlenberg, Murray, Noble, Noyes, Owens, Palmer, Parker, Paynter, Pennybacker, Petrikon, Phelps, Pickens, Plumer, Potter, Pratt, Prentiss, Reilly, Rhett, Richardson, Rives, Sheffer, Augustine H. Shepperd, Charles Shepard, Shields, Shepler, Sibley, Smith, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vandever, Wagener, Webster, Weeks, John White, Thomas T. Whittlesey, Lewis Williams, Sherrod Williams, Jared W. Williams, Joseph Williams, Worthington, and Yell—136.

Mr. ROBERTSON then moved an amendment to the fourth section of the bill, providing that no Treasury notes shall be issued so long as there are any available funds in the Treasury, over and above one million of dollars.

Mr. ROBERTSON called for the yeas and nays on this amendment; which were ordered, and were—yeas 102, nays 120, as follows:

YEAS—Messrs. Adams, Alexander, Heman Allen, John W. Allen, Ayerrigg, Bell, Biddle, Bond, Bouldin, Briggs, William B. Calhoun, John Calhoun, J. Campbell, William B. Carter, Chambers, Cheatham, Childs, Clowney, Corwin, Cranston, Crockett, Curtis, Cushing, Darlingston, Dawson, Davies, Deberry, Dennis, Dunn, Everett, Ewing, Richard Fletcher, Filmore, James Garland, Goode, James Graham, William Graham, Graves, Grennell, Griffin, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Herod, Hoffman, Hopkins, H. Johnson, William Cost Johnson, Lawler, Lincoln, Andrew W. Loomis, Lyon, Mallory, Marvin, Samson Mason, Maury, Maxwell, McKennan, Menefee, Mercer, Milligan, Calvary Morris, Naylor, Ogle, Patterson, Peck, Phillips, Pickens, Pope, Potts, Rariden, Reed, Rencher, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, Augustine H. Shepperd, Charles Shepard, Sibley, Slade, Southgate, Stanley, Stone, Stratton, Taliaferro, Thompson, Underwood, Albert S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, and Yorke—102.

NAYS—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Boon, Borden, Brodhead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, Casey, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Crary, Cushman, Davee, DeGraff, Dromgoole, Duncan, Edwards, Farrington, Fairfield, J. Fletcher, Foster, Fry, Gallup, Gholson, Glascock, Grantland, Grant, Gray, Haley, Hammond, Harrison, Hawkins, Haynes, Holsey, Holt, Howard, Hubley, Wm. H. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Joseph Johnson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, Klingensmith, Legare, Leadbetter, Lewis, Logan, Arphaxad Loomis, James M. Mason, Martin, McKay, Robert McClellan, A. McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, S. W. Morris, Muhlenberg, Murray, Noble, Noyes, Owens, Palmer, Parker, Paynter, Pennybacker, Petrikon, Phelps, Plumer, Potter, Pratt, Prentiss, Reilly, Rhett, Richardson, Rives, Sheffer, Shepler, Smith, Snyder, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vandever, Wagener, Webster, Weeks, Thomas T. Whittlesey, Jared W. Williams, Worthington, and Yell—120.

So the amendment was disagreed to.

Mr. SOUTHGATE moved to amend by providing that no Treasury notes should be re-issued after their return to the Treasury, but that they be cancelled; which was adopted.

Mr. SOUTHGATE then moved to amend the bill by providing that notes should be issued as low as fifty dollars, instead of one hundred dollars, as named in the bill.

Mr. LEGARE hoped the gentleman would modify his amendment, by reducing the denomination of the notes as low as twenty-five dollars, so as to enable persons in the service of the United States to receive these notes, and instanced in support of this suggestion the case of a soldier in the army in Florida, who had to pay fifty per cent. to have money discounted which he had received.

Mr. MASON, of Va. called for the yeas and nays, which were ordered.

Mr. WISE said he should vote to reduce these notes as low as five dollars, or one dollar. If we were to have a paper circulation of this kind, he wished the laborer to be benefited by it, as well as the capitalist.

Mr. CAMBRELENG hoped the amendment would not prevail. He had no idea of using the credit of the Government of the United States to issue a small note circulation.

Mr. WHITTLESEY, of Ohio, was in favor of reducing the denomination of the notes to fifty dollars, because it would enable persons desirous of entering public land to use this paper in the purchase thereof. He said that a large number of those persons who bought public land in the State of Ohio, had paid for it in Treasury notes of forty acre lots, and this currency would suit their purposes; whereas, if the notes were of one hundred dollars and upwards, they could never be used by them.

Mr. WISE hoped his friend from Kentucky

would reduce the notes to five dollars instead of fifty.

Mr. SOUTHGATE said his only object was to have the notes in the most acceptable form; and at the request of several of his friends around him, he would modify his amendment by reducing the notes to twenty-five dollars.

Mr. McKAY called for the yeas and nays on this, which were ordered, and were—yeas 88, nays 130, as follows:

YEAS—Messrs. Beirne, Bond, Boon, Briggs, Bynum, John Calhoun, John Campbell, Wm. B. Carter, Casey, Chambers, Chapman, Cheatham, Childs, Clark, Corwin, Craig, Crockett, Deberry, Dennis, Dunn, Elmore, Ewing, Isaac Fletcher, Jas. Garland, Rice Garland, Gholson, Glascock, Goode, James Graham, William Graham, Grantland, Graves, Halstead, Harper, Hawkins, Henry, Herod, Robert M. T. Hunter, Henry Johnson, Joseph Johnson, Wm. C. Johnson, Lawler, Legare, Lewis, Lincoln, A. W. Loomis, Lyon, Mallory, Martin, May, McKay, McKennan, Menefee, Montgomery, Calvary Morris, Murray, Ogle, Patterson, Peck, Pickens, Rencher, Rhett, Richardson, Ridgway, Rives, Robertson, Rumsey, Russell, Augustine H. Shepperd, Charles Shepard, Shields, Sibley, Smith, Snyder, Southgate, Spencer, Stanley, Stone, Taliaferro, Underwood, Albert S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Wise, and Yell—88.

NAYS—Messrs. Adams, Alexander, Heman Allen, John W. Allen, Anderson, Andrews, Atherton, Ayerrigg, Beatty, Bicknell, Biddle, Birdsall, Borden, Brodhead, Bronson, Buchanan, William B. Calhoun, Cambreleng, Chaney, Cilley, Cleveland, Coles, Connor, Crary, Cranston, Curtis, Cushing, Cushman, Darlingston, Dawson, Davee, Davies, DeGraff, Dromgoole, Duncan, Edwards, Everett, Farrington, Fairfield, Richard Fletcher, Fillmore, Foster, Fry, Gallup, Grant, Gray, Haley, Hammond, Harrison, Hastings, Hawes, Haynes, Hoffman, Holsey, Holt, Hopkins, Howard, Hubley, William H. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, Klingensmith, Leadbetter, Logan, Arphaxad Loomis, Marvin, James M. Mason, Samson Mason, Maury, Maxwell, McKay, Robert McClellan, Abraham McClellan, McClure, Mercer, Milligan, Miller, Moore, Morgan, Samuel W. Morris, Muhlenberg, Naylor, Noble, Noyes, Owens, Palmer, Parker, Paynter, Pennybacker, Petrikon, Phelps, Phillips, Plumer, Potts, Potter, Pratt, Prentiss, Rariden, Randolph, Reed, Reilly, Sawyer, Sergeant, Sheffer, Shepler, Slade, Stewart, Stratton, Taylor, Thomas, Thompson, Titus, Toucey, Towns, Turney, Vail, Vandever, Wagener, Webster, Weeks, Thomas T. Whittlesey, Jared W. Williams, C. H. Williams, Worthington, and Yorke—130.

So the amendment was disagreed to.

Mr. SOUTHGATE then moved to strike out of the bill "one hundred," and insert "fifty," so as to reduce the notes to fifty dollars.

Mr. GHOLSON called for the yeas and nays, which were ordered, and were—yeas 141, nays 81, as follows:

YEAS—Messrs. Alexander, John W. Allen, Anderson, Andrews, Beirne, Bond, Boon, Bouldin, Briggs, Bronson, Bruyn, Bynum, John Calhoun, John Campbell, William B. Carter, Casey, Chambers, Chaney, Chapman, Cheatham, Childs, Claiborne, Clark, Cleveland, Clowney, Connor, Corwin, Craig, Crary, Crockett, Cushman, Davee, Deberry, DeGraff, Dennis, Dunn, Edwards, Elmore, Ewing, Fairfield, Isaac Fletcher, Fillmore, James Garland, Rice Garland, Gholson, Glascock, Goode, James Graham, William Graham, Grantland, Grant, Graves, Gray, Grennell, Griffin, Haley, Halstead, Hammond, Harlan, Harrison, Harper, Hastings, Hawkins, Haynes, Henry, Herod, Hoffman, Holt, Robert M. T. Hunter, Ingham, Jabez Jackson, Henry Johnson, Joseph Johnson, William Cost Johnson, Kilgore, Lawler, Legare, Leadbetter, Lewis, Lincoln, Andrew W. Loomis, Lyon, Mallory, Marvin, Samson Mason, Martin, Abraham McClellan, Calvary Morris, Muhlenberg, Murray, Noyes, Ogle, Palmer, Paynter, Patterson, Pickens, Pope, Potter, Pratt, Rariden, Reilly, Rencher, Rhett, Richardson, Ridgway, Rives, Robertson, Rumsey, Russell, Augustine H. Shepperd, Charles Shepard, Shields, Shepler, Sibley, Slade, Smith, Snyder, Southgate, Spencer, Stanley, Stone, Taliaferro, Titus, Towns, Underwood, Vail, Webster, Albert S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Wise, and Yell—141.

NAYS—Messrs. Adams, Heman Allen, Atherton, Ayerrigg, Beatty, Bicknell, Biddle, Birdsall, Borden, Brodhead, Buchanan, William B. Calhoun, Cambreleng, Cilley, Coles, Cranston, Curtis, Darlingston, Dawson, Davies, Dromgoole, Duncan, Everett, Farrington, Richard Fletcher, Foster, Fry, Gallup, Hawes, Holsey, Hopkins, Howard, Hubley, William H. Hunter, Thomas B. Jackson, Nathaniel Jones, John W. Jones, Kemble, Klingensmith, Logan, Arphaxad Loomis, James M. Mason, Maury, Maxwell, McKay, Robert McClellan, McClure, Mercer, Milligan, Moore, Samuel W. Morris, Naylor, Noble, Owens, Palmer, Paynter, Pearce, Pennybacker, Petrikon, Phelps, Phillips, Plumer, Potts, Prentiss, Reed, Sawyer, Sergeant, Sheffer, Stewart, Stratton, Taylor, Thomas, Toucey, Turney, Vandever, Wagener, Weeks, Jared W. Williams, Christopher H. Williams, Worthington, and Yorke—81.

So the amendment was agreed to.

Mr. MERCER then moved to reduce the whole amount of Treasury notes to be issued to seven millions of dollars.

Mr. MERCER called for the yeas and nays, which were ordered, and were—yeas 102, nays 130, as follows:

YEAS—Messrs. Adams, Alexander, Heman Allen, John W. Allen, Ayerrigg, Bell, Biddle, Bond, Bouldin, Briggs, William B. Calhoun, John Calhoun, Wm. B. Carter, Chambers, Cheatham, Childs, Corwin, Cranston, Crockett, Curtis, Cushing, Darlingston, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, Everett, Ewing, Richard Fletcher, Fillmore, Goode, Jas. Graham, William Graham, Graves, Grennell, Griffin, Halstead, Harlan,

Harper, Hastings, Hawes, Henry, Herod, Robert M. T. Hunter, Jenifer, Henry Johnson, William Cost Johnson, Lincoln, Andrew W. Loomis, Mallory, Marvin, Samson Mason, Maury, Maxwell, McKennan, Menefee, Mercer, Milligan, Calvary Morris, Naylor, Noyes, Ogle, Patterson, Pearce, Peck, Phillips, Pope, Potts, Rariden, Reed, Rencher, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, Augustine H. Sheppard, Charles Shepard, Shields, Sibley, Slade, Snyder, Southgate, Stanley, Stone, Stratton, Taliaferro, Thompson, Underwood, Albert S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, and Yorke—102.

**YAYS**—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Boon, Borden, Brodhead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, Timothy J. Carter, Casey, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Crary, Cushman, Davee, DeGraft, Dromgoole, Duncan, Edwards, Farrington, Fairfield, Isaac Fletcher, Foster, Fry, Gallup, James Garland, Rice Garland, Gholson, Glascock, Grantland, Grant, Gray, Haley, Hammond, Harrison, Hawkins, Halsey, Holt, Hopkins, Howard, Hubley, William H. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Joseph Johnson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, Legare, Leadbetter, Lewis, Logan, Arphaxed Loomis, Lyon, James M. Mason, Martin, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, Samuel W. Morris, Muhlenberg, Murray, Noble, Owens, Palmer, Parker, Parmenter, Pennybacker, Petriken, Phelps, Plumer, Potter, Pratt, Prentiss, Reilly, Rhett, Richardson, Rives, Sheffer, Shepler, Smith, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Webster, Weeks, Thomas T. Whittlesey, Jared W. Williams, Worthington, and Yell—121.

So the motion was disagreed to.

Mr. LEGARE then moved an amendment that the interest on these notes should be reduced from six to two per cent.

Mr. WHITTLESEY of Ohio called for the yeas and nays, which were ordered, and were—yeas 99, nays 127, as follows:

**YAYS**—Messrs. John W. Allen, Boon, Bouldin, Bruyn, John Campbell, William B. Carter, Chaney, Chapman, Childs, Cilley, Claiborne, Cleveland, Clowney, Connor, Craig, Crary, Crockett, Curtis, Cushing, Dawson, Davee, Dennis, Duncan, Dunn, Elmore, Ewing, Richard Fletcher, Isaac Fletcher, Jas. Garland, Rice Garland, Gholson, Glascock, Goode, James Graham, William Graham, Grennell, Griffin, Hammond, Harlan, Harper, Hastings, Hawes, Hawkins, Haynes, Herod, Hoffman, Hubley, Ingham, Jenifer, Henry Johnson, Joseph Johnson, William Cost Johnson, Nathaniel Jones, Lawler, Legare, Leadbetter, Lewis, Lyon, Martin, Montgomery, M. Morris, Calvary Morris, Muhlenberg, Noble, Ogle, Patterson, Peck, Petriken, Phillips, Pickets, Pope, Rhett, Richardson, Ridgway, Rives, Sawyer, Sheffer, Augustine H. Sheppard, Charles Shepard, Shepler, Sibley, Smith, Stewart, Stone, Thompson, Towns, Turney, Underwood, Wagener, Webster, Weeks, John White, Elisha Whittlesey, Thomas T. Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Wise, and Yell—99.

**NAYS**—Messrs. Adams, Alexander, Heman Allen, Anderson, Andrews, Atherton, Ayer, Beatty, Beirne, Bell, Bicknell, Biddle, Birdsall, Bond, Borden, Briggs, Brodhead, Bronson, Buchanan, Bynum, William B. Calhoun, John Calhoun, Cambreleng, Casey, Chambers, Cheatham, Clark, Coles, Corwin, Cranston, Cushman, Darlington, Davies, Deberry, DeGraft, Dromgoole, Edwards, Everett, Farrington, Fairfield, Fillmore, Foster, Fry, Gallup, Grantland, Grant, Graves, Gray, Haley, Halstead, Harrison, Henry, Halsey, Holt, Hopkins, Howard, William H. Hunter, Robert M. T. Hunter, Thomas B. Jackson, Jabez Jackson, John W. Jones, Kemble, Kilgore, Klingensmith, Lincoln, Logan, Andrew W. Loomis, Mallory, Marvin, James M. Mason, Samson Mason, Maury, Maxwell, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, McKennan, Menefee, Mercer, Milligan, Miller, Moore, Morgan, Samuel W. Morris, Murray, Naylor, Noyes, Owens, Palmer, Parker, Parmenter, Paynter, Pearce, Pennybacker, Plumer, Potts, Potter, Pratt, Prentiss, Rariden, Reed, Reilly, Rencher, Rumsey, Russell, Sergeant, Shields, Slade, Snyder, Southgate, Spencer, Stanley, Stratton, Taliaferro, Taylor, Thomas, Titus, Toucey, Vail, Vanderveer, Albert S. White, Jared W. Williams, C. H. Williams, Worthington, and Yorke—127.

So the amendment was disagreed to.

Mr. RHETT then moved as a substitute for the bill, a bill authorizing the Secretary of the Treasury to issue four millions of dollars in Treasury notes, without interest, and make sale of the bonds of the Bank of the United States.

The CHAIR decided this amendment to be out of order, on the ground that the House had passed upon many of the provisions contained in the substitute.

Mr. RHETT then moved to recommit the bill to the Committee of Ways and Means, with instructions to report the amendments contained in the substitute; which motion was lost without division.

The question then recurred upon concurring with the Committee of the Whole in their amendment to the original House bill, as again amended by the House itself.

Mr. BRIGGS called for the yeas and nays, which were ordered, and were—yeas 123, nays 99, as follows:

**YAYS**—Messrs. Heman Allen, Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Boon, Borden, Bouldin, Briggs, Brodhead, Bronson, Bruyn, Buchanan, Bynum, Cambreleng, Timothy J. Carter, Casey, Chaney, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Crary, Cushman, Davee, DeGraft, Dromgoole, Duncan, Edwards, Farrington, Fairfield, Richard Fletcher, Isaac Fletcher, Foster, Gallup, James Garland, Gholson, Glascock, Grantland, Grant, Gray, Haley, Hammond, Harrison, Hawes, Hawkins, Haynes, Hol-

sey, Holt, Howard, Hubley, William H. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Henry Johnson, Joseph Johnson, Nathaniel Jones, John W. Jones, Kemble, Kilgore, Klingensmith, Leadbetter, Logan, Arphaxed Loomis, Lyon, James M. Mason, Martin, Maxwell, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, Samuel W. Morris, Muhlenberg, Murray, Noble, Noyes, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petriken, Phelps, Pickets, Plumer, Potter, Pratt, Prentiss, Reilly, Rencher, Rives, Robertson, Sheffer, Shepler, Smith, Snyder, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Webster, Weeks, Thomas T. Whittlesey, Jared W. Williams, Worthington, and Yell—123.

**NAYS**—Messrs. Adams, John W. Allen, Ayer, Bell, Biddle, Bond, William B. Calhoun, John Calhoun, John Campbell, William B. Carter, Chambers, Chapman, Cheatham, Childs, Clowney, Corwin, Cranston, Crockett, Curtis, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, Everett, Ewing, Fillmore, Fry, Rice Garland, Goode, James Graham, William Graham, Graves, Grennell, Griffin, Halstead, Harlan, Harper, Hastings, Henry, Herod, Hoffman, Robert M. T. Hunter, Jenifer, William Cost Johnson, Legare, Lewis, Lincoln, Andrew W. Loomis, Mallory, Marvin, Samson Mason, Maury, McKennan, Menefee, Mercer, Milligan, Mathias Morris, Calvary Morris, Naylor, Ogle, Patterson, Pearce, Peck, Phillips, Pope, Potts, Rariden, Reed, Rhett, Richardson, Ridgway, Rumsey, Russell, Sawyer, Sergeant, Augustine H. Sheppard, Charles Shepard, Shields, Sibley, Slade, Southgate, Stanley, Stone, Stratton, Taliaferro, Thompson, Underwood, Albert S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, and Yorke—99.

So the House concurred with the Committee of the Whole.

Mr. BRIGGS then called for the yeas and nays on the engrossment of the bill, which were ordered, and were—yeas 127, nays 98, as follows:

**YAYS**—Messrs. Anderson, Andrews, Atherton, Beatty, Beirne, Bicknell, Birdsall, Boon, Borden, Bouldin, Brodhead, Bronson, Bruyn, Buchanan, Bynum, John Calhoun, Cambreleng, John Campbell, T. J. Carter, Chaney, Chapman, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Craig, Crary, Cushman, Davee, DeGraft, Dromgoole, Duncan, Farrington, Fairfield, Foster, Gallup, James Garland, Rice Garland, Gholson, Glascock, Grantland, Gray, Haley, Hammond, Harrison, Hawes, Hawkins, Haynes, Halsey, Holt, Howard, Hubley, Wm. H. Hunter, Ingham, Thos. B. Jackson, Jabez Jackson, Henry Johnson, Joseph Johnson, N. Jones, J. W. Jones, Kemble, Kilgore, Klingensmith, Lawler, Legare, Leadbetter, Logan, Arphaxed Loomis, Lyon, James M. Mason, Martin, Maxwell, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, Samuel W. Morris, Muhlenberg, Murray, Noble, Noyes, Owens, Palmer, Parker, Parmenter, Paynter, Pennybacker, Petriken, Phelps, Plumer, Potter, Pratt, Prentiss, Rariden, Reilly, Rhett, Richardson, Rives, Sheffer, Shepler, Smith, Spencer, Stewart, Taylor, Thomas, Titus, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Webster, Weeks, Thomas T. Whittlesey, Jared W. Williams, Worthington, and Yell—127.

**NAYS**—Messrs. Adams, Alexander, Heman Allen, John W. Allen, Ayer, Bell, Biddle, Bond, Briggs, William B. Calhoun, Wm. B. Carter, Casey, Chambers, Cheatham, Childs, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, Everett, Ewing, Fillmore, R. Fletcher, Fry, Goode, James Graham, Wm. Graham, Graves, Grennell, Griffin, Halstead, Harlan, Harper, Hastings, Henry, Herod, Hoffman, R. M. T. Hunter, Jenifer, Wm. C. Johnson, Lewis, Lincoln, A. W. Loomis, Mallory, Marvin, S. Mason, Maury, McKennan, Menefee, Mercer, Milligan, Mathias Morris, Calvary Morris, Naylor, Ogle, Patterson, Pearce, Peck, Phillips, Potts, Reed, Rencher, Ridgway, Robertson, Rumsey, Russell, Sawyer, Sergeant, Augustine H. Sheppard, Charles Shepard, Shields, Sibley, Slade, Snyder, Southgate, Stanley, Stone, Stratton, Taliaferro, Thompson, Underwood, Albert S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, and Yorke—98.

So the bill was ordered to be engrossed, and read a third time to-day.

The bill was then read a third time, and passed.

The SPEAKER laid before the House a message from the President of the United States in answer to a resolution of the House calling upon him to lay before the House the proceedings of the Court of Inquiry in the case of General Wool and others; which, on motion, was laid on the table and ordered to be printed.

On motion of Mr. CAMBRELENG,

The House adjourned at half past 8 o'clock p. m.

## IN SENATE,

TUESDAY, October 10, 1837.

Mr. BUCHANAN presented sundry memorials from the city and county of Philadelphia, and from Montgomery and other counties of Pennsylvania, remonstrating against the annexation of Texas; which were ordered to lie on table.

Mr. ALLEN presented a preamble and twenty-four resolutions, passed at a meeting of the citizens of Hamilton county, Ohio. Mr. A. said Hamilton county was known as the most populous and wealthy county in the State, and the paper was signed by the most respectable individuals, the views set forth were chiefly in accordance with the views of the Message, as set forth by the President;

he moved that the paper be laid on the table, and printed; which was agreed to.

A resolution giving to Wisconsin Territory certain public documents, was taken up and discussed, and afterwards laid on the table.

A message was received from the House of Representatives, stating that it had passed a bill authorizing the issuing of Treasury notes.

Mr. WRIGHT explained wherein this bill differed from the one emanating from the Senate. This bill, after being read twice, was referred to the Committee on Finance.

The bill regulating the fees of district attorneys in the renewal of merchants' bonds, received a third reading, and was finally passed. It now reads:

*Be it enacted by the Senate and House of Representatives of the United States of America, in Congress assembled,* That in all cases of extension of the time of payment of bonds given for duties on imports, it shall be according to such directions as may be given by the Secretary of the Treasury; and the extension of payment of the old bond, or the taking of a new bond, shall be by the respective collectors subject to no other charge than such as may be legally receivable on the taking of the original bond upon the entry of merchandise.

**SEC. 2.** *And be it further enacted,* That no fee shall accrue to any district attorney on any bond left with him for collection, or in a suit commenced on any bond for the renewal of which provision is made by law, unless the party or parties shall neglect to apply for such renewal for more than twenty days after the maturity of such bond.

Mr. WRIGHT then moved to take up the bill authorizing the deposit of merchandise in warehouses, and for other purposes.

Mr. CALHOUN made a few remarks in relation to his disposition to adhere strictly to the compromise act; and, so far as there was nothing in the bill to counteract that measure, it should receive his support. It was a measure intended for the relief of the commercial interests; and by the amendment which he would offer as a proviso to the first section, the interest which he represented he thought would not be compromised. He would, therefore, move to insert as a proviso to the first section the following:

"Provided always, that in all cases where, by the existing laws, credits are allowed for duties, and bonds to secure the payments of the same are receivable by the collectors of the customs, it shall be at the option of the importer, his factor, agent, or consignee, until the first day of July, 1842, to place the goods upon which such duties are chargeable, in store, pursuant to the provisions of this act, or to give the bonds for the duties allowed by the existing laws, and for the periods of time provided for in those laws; but the election shall in all cases be made at the time of importation, and before the goods have been placed in the store, as allowed by this, or any other existing law."

Mr. WRIGHT said he presumed there would now be no objection, as the bill in that shape would not conflict with the contending interests.

Mr. CLAY thought the amendment more objectionable than the original bill; it now left with the importer the option to land his goods, and warehouse them, and remove them at his pleasure from place to place, taking advantage of all the markets, from New York to Philadelphia, Baltimore or Boston. The privileges to the importer were too great. Mr. C. thought it better to let the whole matter lie over until the next session, and moved postponement until the first Monday in December next.

Mr. NILES made some remarks as to the impropriety of stimulating the commercial business to excess, which the credit system has the means of doing.

Mr. WEBSTER thought it better not to commit themselves by a vote on the bill, he believed it would be better to postpone it, as some of the features in his estimation might expose the revenue to danger.

Mr. KNIGHT, also wished the subject postponed, as the bill in its present shape might have a tendency to disturb the markets.

Mr. WRIGHT asked for the yeas and nays on the question to postpone, when there appeared—for it 17, against it 22, as follows:

**YEAS**—Messrs. Calhoun, Clay of Kentucky, Clayton, Crittenden, Kent, Knight, McKean, Rives, Robbins, Smith of Indiana, Southard, Swift, Tallmadge, Tipton, Webster, White, and Williams—17.

**NAYS**—Messrs. Allen, Benton, Buchanan, Clay of Alabama, Fulton, Grundy, Hubbard, King of Alabama, King of Georgia, Lyon, Nicholas, Niles, Norvell, Pierce, Roane, Robinson, Smith of Connecticut, Strange, Walker, Wall, Wright, and Young—22.

The question was then taken on the proviso offered by Mr. Calhoun. On this question the yeas and nays having been ordered, there appeared—for it 14, against it 23, as follows:

**YEAS**—Messrs. Allen, Calhoun, Clay of Alabama, Fulton, Grundy, Hubbard, King of Alabama, King of Georgia, Robinson, Smith of Connecticut, Spence, Walker, Wright, and Young—14.

**NAYS**—Messrs. Benton, Buchanan, Clay of Kentucky, Clayton, Crittenden, Kent, Knight, Lyon, McKean, Nicholas, Niles, Norvell, Pierce, Robbins, Smith of Indiana, Southard, Strange, Swift, Tallmadge, Tipton, Wall, Webster, and Williams—23.

Mr. CLAY moved to strike out the fifth section, which gives to the importer the privilege of ransporting goods from warehouse to warehouse, and from city to city, at his option. He considered this privilege of removing goods from port to port, without the payment of duty, as giving the importer too great an advantage, and as hazardous to the revenue.

Mr. NORVELL said that he was induced to vote for the motion of the honorable Senator from Kentucky, because the bill, without the fifth section, gave extensive credit to the importer by allowing his goods to remain three years in the public warehouse without the payment of duties, unless, in the intermediate time, he had found a market, and sale for them. The fifth section enabled him to throw his goods, prior to the payment of duties, into any market, to the detriment of goods of a similar kind already in that market, as well as of the articles of that sort, in the same market, manufactured in the country. But there was one difficulty in his mind as to the expediency of striking out the fifth section. The largest portion of foreign merchandise imported into the United States came into the port of New York. The Boston, Philadelphia, and Baltimore merchants imported many of their goods into New York. If they were required to pay the duties on them before they could take them out of the public warehouse in that city, it would place them on an unequal and disadvantageous footing with the New York importers, and would concentrate all the money paid for duties on merchandise intended for other cities, in the port of New York, already sufficiently favored by nature and circumstances as the great money and commercial emporium of the country. He desired to place all the importing merchants on an equality. If the Senator from Kentucky would remove this difficulty, if there were any substance in it, he would cheerfully vote for his motion to strike out the fifth section.

After some further discussion on this bill, it was postponed until to-morrow.

Mr. WRIGHT, from the Committee on Finance, then reported the bill from the other House, to "authorize the issuing of Treasury notes," without amendment.

Mr. WRIGHT explained the difference between the bill as received from the House, and that which had originated in the Senate.

Mr. BENTON moved so to amend the first section, as to strike out the words *fifty* dollars, and insert *one hundred*; that would make the bill approximately nearer to what it was when it left the Senate. Mr. B. expressed his strong objections to Treasury notes in general, and it was with great reluctance he could bring himself to vote for any bill that contained such a clause; nothing but the fact that Government would stop for the want of money would have induced him to vote for any paper money, in a time of peace. As the bill had gone from the Senate, it was well guarded, but in the other House these guards had been broken down; it would require but another plunge to reduce to *twenty*, then

ten, and by-and-by we should have notes as small as were now issued from banks; such was the tendency of the whole paper system. Mr. B. here alluded to the Bank of England, which in the first instance had issued no notes of a less denomination than one hundred pounds; but such was the genius of paper money, that in the course of about one hundred and three years it was reduced to one pound, when not a piece of gold was to be seen afterwards. The same was the fact with regard to the French assignats, first from five thousand to one thousand; and each successive diminution the gold was driven out, until at last they were reduced to ten sous. He had determined never to lend his sanction to such a proceeding, and would call for the yeas and nays on his motion, that he might at least record his name against the proceeding.

Mr. NORVELL remarked, that all the objections urged by the Senator from Missouri to the issue of notes of the denomination of fifty dollars, applied with nearly equal force to the issue of notes of the denomination of one hundred dollars. As far as either could be considered a currency, one hundred dollar notes were as much a currency as fifty dollar notes. Bearing interest, however, he doubted whether they did not possess more the character of a temporary loan than of a current circulating medium. One suggestion seemed not to have occurred to the Senator from Missouri. Many persons who emigrated to the western country and settled there, desired to purchase forty acres of public land. Fifty dollars in a Treasury note would precisely pay for such a tract. In the absence of a specie circulation, while the banks were in a state of suspension of specie payments, Treasury notes of that denomination, receivable at the land offices, would prove a great convenience to the poorer purchasers of public lands, and would accelerate the settlement and improvement of the West. For these reasons, he should vote against the motion of the honorable Senator.

Mr. CLAY supported the motion of Mr. BENTON to retain the \$100 as the least objectionable. He contended, however, that the whole measure was, to all intents and purposes, a national bank, and maintained it to be a great bank experiment—that in time of profound peace to issue ten millions additional capital, after decrying the banks for enlarging their circulation. Instead of issuing these notes, he thought it would have been better to have suspended some of these works, authorized by the appropriation of thirty-two millions.

Mr. WEBSTER made some remarks against the system, but in favor of the motion of Mr. BENTON to retain \$100 as the minimum.

The question being taken by yeas and nays on Mr. BENTON's motion, there appeared for it 16, against it 25, as follows:

**YEAS**—Messrs. Allen, Benton, Clay of Kentucky, Clayton, Kent, King of Georgia, McKean, Pierce, Rives, Robbins, Smith of Connecticut, Southard, Spence, Tipton, Webster, and White—16.

**NAYS**—Messrs. Buchanan, Clay of Alabama, Crittenden, Fulton, Grundy, Hubbard, King of Alabama, Knight, Linn, Lyon, Morris, Nicholas, Niles, Norvell, Roane, Robinson, Smith of Indiana, Strange, Swift, Tallmadge, Walker, Wall, Williams, Wright, and Young—25.

The bill was then reported to the Senate, and ordered to a third reading; and being read a third time, on the question of its passage,

Mr. WHITE asked for the yeas and nays, as he wished to record his vote; when there appeared—yeas 35, nays 6, as follows:

**YEAS**—Messrs. Allen, Buchanan, Calhoun, Clay of Alabama, Clayton, Fulton, Grundy, Hubbard, Kent, King of Alabama, King of Georgia, Knight, Linn, Lyon, McKean, Morris, Nicholas, Niles, Norvell, Pierce, Rives, Roane, Robinson, Smith of Connecticut, Smith of Indiana, Strange, Swift, Tallmadge, Tipton, Walker, Wall, Webster, Williams, Wright, and Young—35.

**NAYS**—Messrs. Clay of Kentucky, Crittenden, Robbins, Southard, Spence, and White—6.

On motion of Mr. BUCHANAN, the Senate

proceeded to the consideration of Executive business, and then

Adjourned.

## HOUSE OF REPRESENTATIVES,

TUESDAY, October 10, 1837.

Petitions and memorials were presented, on leave, by Messrs. LAWLER and LYON of Alabama.

Mr. JOHNSON of Louisiana.

Mr. GRAHAM of North Carolina.

Mr. CHEATHAM of Tennessee.

## UNITED STATES, MEXICO, AND TEXAS.

The House then proceeded to the consideration of the unfinished business of the morning hour, being the resolution submitted on yesterday morning by Mr. ELLMORE, calling for the publication of extracts of correspondence in relation to Mexico.

The question pending, was the motion of Mr. ADAMS to strike out the latter part of the resolution, and insert a clause providing that the whole of the correspondence communicated by the President be printed.

Mr. WHITTLESEY of Ohio, rose to inquire if it was the intention of the gentleman from South Carolina to reprint the correspondence already printed.

Mr. ADAMS said the intention of the gentleman was to publish certain extracts made by himself.

Mr. ELLMORE said the gentleman from Massachusetts was mistaken in this respect. He had not made the extracts, and only proposed to publish what was sent to the House by the Secretary of State, in answer to a call made upon him by the House. He explained that there was but a small portion of the correspondence transmitted, which had any bearing on the question in relation to the annexation of Texas; the greater portion of it being in relation to a commercial treaty and the boundary line. The gentleman was certainly mistaken in supposing that the selection was made by him. It was made by the President of the United States or the Secretary of State; and the only objection he had to having it all printed, was that it would add to the cost, occasion delay in the printing of the document, and be of no sort of service when done. He wished it printed as soon as possible, with a view of being laid before the people, so that they might be enabled to make up their minds in relation to the great issue presented to them by the gentleman from Massachusetts himself, in relation to this question of annexation, being a question of union or disunion. This was his only object in having the correspondence printed in the form proposed in the resolution.

Mr. ADAMS said that, after all, if the proposition prevails, it will be a garbled document. He had not supposed that the gentleman had made a selection of extracts from particular letters, but it was a selection of extracts from the whole publication; and he doubted not that the selection was made to suit the gentleman's own purposes, excluding all others; and the distinction the gentleman takes is that the remaining portions of the correspondence is in relation to a treaty of commerce and the boundary question, and has nothing to do with annexation. Now Mr. A. contended that the boundary question had something to do with the question of annexation. It was the boundary question which authorized us in the first place to propose to the Mexican Government a cession of their claim to that portion of their territory. We have had a special communication from the Executive but two sessions ago, stipulating to settle this boundary question, and bills were brought before this House for the appointment of Commissioners to settle it, but commissioners were never appointed, and the Texan revolt rendered it impossible to settle the boundary question. It might, perhaps, be looked upon as a violation of faith with Mexico that these commissioners had never been appointed; and why it was not done, could only be attributed to the impulse which carried forward a portion of our community to get possession of the whole of the Territory by treaty, by invasion, or by any other means.

The CHAIR interposed, and informed the gentleman that the merits of the question could not now be discussed.

Mr. ADAMS then proceeded to give his reasons for not wishing to have the extracts published without having the whole document published.

Mr. OWENS thought it must be very evident that it was not the intention of the gentleman from South Carolina to garble the correspondence, or suppress any matter connected with the question of annexation. His object simply was to have printed all the correspondence relative to the subject, without having it accompanied by matter foreign from the subject. With a view, however, of removing the difficulty in the mind of the gentleman from Massachusetts, he moved to amend the resolution, by adding to the end thereof the words "and all other matters having reference to the subject embraced in that correspondence."

Mr. ELMORE accepted this as a modification, and further modified his resolution, by omitting the word "extract," wherever it occurs.

Mr. HOWARD (chairman of the Committee on Foreign Affairs) said that he would not have participated in this debate, if he had not understood the honorable gentleman from Massachusetts (Mr. Adams) to say that it was the fault of the American Government that the boundary line between the United States and Mexico had not been run long ago, and from the high respect to which the opinions of that gentleman were entitled, especially respecting our foreign affairs, he wished to say that commissioners had been appointed to run the line, on our behalf, in proper time.

Mr. ADAMS said he had not expressed the opinion that the Government of the United States was in fault.

Mr. HOWARD said he had so understood him. With regard to the question of printing 10,000 additional documents, according to the list prepared by the gentleman from South Carolina, (Mr. Elmore,) he was obliged to vote somewhat in the dark, because, as the document had not been printed, he could not know what papers would be excluded by following that list, and he should therefore vote for printing the whole. The proposition to print this additional number of the document he considered as an appeal to the people from the decision of the President upon the question of the annexation of Texas; and he would suggest to the friends of that measure whether it would be prudent to assail the President upon what he (Mr. H.) considered to be an impregnable position. There were three classes of opinions in the House and in the country upon this subject.

The SPEAKER interposed, and said the debate was likely to take too wide a range.

Mr. HOWARD observed that he would not discuss these several opinions, but merely remark, that it was entirely for those who were considered as the especial friends of the annexation to say how far they were forwarding their own views by pressing this appeal. If they chose to take this course he had no objection, and would cheerfully vote for any number of copies they might propose. He felt very confident that the nation would sanction the position taken by the Executive department of the Government; and if the Texas question should be now pressed, it would inevitably become mixed up with extraneous matter, the result of which would be inauspicious to the cause which a portion of this House so zealously advocated. This, however, was a question entirely for them to consider. For himself, he would say, that he intended to make up his judgment upon national considerations only, throwing out of the case all sectional interests and sectional feelings, which, if not discarded, must lead to incorrect conclusions.

Mr. BIDDLE could not consent to have a set of extracts made out for publication, for the purpose of showing that the gentleman from Massachusetts had pursued a course in relation to this subject which was inconsistent. It might be made to appear, by extracting from any correspondence, that gentlemen had pursued an inconsistent course, when, by taking the whole in connection, such might not be the fact. He thought it entirely improper that a gentleman should be permitted to publish and circulate, at the public expense, a document, for the purpose of prejudicing the gentleman from Massachusetts with the people of the country.

Mr. ELLMORE explained that the gentleman

had totally misapprehended him. He had no objection if the House authorized the printing of the correspondence called for by the gentleman from Massachusetts. His only objection to it in the first place, was that it would delay the printing, and keep the information back from the people. The gentleman from Massachusetts, however, might move to have the whole printed separately.

Mr. BIDDLE resumed, and argued that if the public was once put in the possession of the documents proposed to be published by the gentleman from South Carolina, it would be very difficult to change the impression which would be made by them, and it would be doing injustice to the gentleman from Massachusetts to publish these documents separately. If they were to be published, they should be published all together.

Mr. PICKENS could not help being pleased at the generous sympathy exhibited by the gentleman from Pennsylvania (Mr. Biddle) for his distinguished friend (Mr. Adams.) He had always understood that charity covered a multitude of sins, but he could tell the gentleman that if he set out with the intention of covering up the inconsistencies of his friend, he would have a difficult task to perform. He understood the motion of his colleague to be to print the documents relating to the subject as they were sent from the President. Not to make any interpolation of them, but to print them as they were prepared at the State Department, and sent to this House, and as his colleague had accepted the proposition of the gentleman from Georgia, all the correspondence in relation to the subject would be laid before the public. If, then, the gentleman from Massachusetts desired other correspondence to be printed, the only course for him to pursue was to introduce a resolution without the limitation which accompanied the other resolution. He desired this correspondence laid before the public, so that they might be enabled to come to correct conclusions in relation to the subject, and that it might be known at the next session of Congress what the public sentiment was in relation to this question.

Mr. SLADE could see no reason why a selection should be made of this correspondence to be sent out to the people. We had had it all laid upon the Clerk's table, and printed; and why now make a selection, for the purpose of making an impression in a particular way on the public mind? He desired to have the whole correspondence published, if any was published. It appeared to him that there must be some motive for urging the publication of these extracts which did not meet the eye. He attributed no improper motives to gentlemen, but it appeared to him as extraordinary that a portion of this correspondence was only asked to be printed.

Mr. BRIGGS said he understood the gentleman from South Carolina had no objection to receive the amendment of his colleague as a modification. This being the case, he hoped the gentleman would modify his resolution, so as to put an end to the discussion.

Mr. THOMSON hoped his colleague would accept of this amendment as a modification. He would rather print a volume as large as the American state papers, than do injustice to the gentleman from Massachusetts, or have the suspicion created that injustice was intended to be done him. In relation to the remark of the gentleman from Maryland, (Mr. Howard) with respect to an appeal from the President to the people, he looked upon it as singular that a great leader of the democratic party should object to an appeal being taken from the President of the United States to the people. He had always understood that this was a doctrine which they held to, and ought never to raise objections to.

Mr. HOWARD explained, that he had not objected to it on this ground. He had not the least objection to its being printed.

Mr. ELLMORE accepted the amendment of the gentleman from Massachusetts as a modification. The question was then taken, and the resolution, as modified, was adopted without a division.

On motion of Mr. CAMBRELENG, the House then proceeded to the orders of the day.

The CHAIR laid before the House a communi-

cation from the Secretary of the Treasury, in relation to the claims of Orange H. Dibble, which, on motion of Mr. E. WHITTLESEY, was laid on the table, and, on that of Mr. FILLMORE, ordered to be printed.

#### EXPRESS MAIL.

The joint resolution from the Senate, directing the postage on letters sent by the express mail to be paid in advance, was taken up on its first and second reading, and the same having been twice read,

Mr. ADAMS objected to the form of the resolution, on the ground that it should be presented as a bill.

Mr. CONNOR did not deem the objection a very valid one, and moved its engrossment.

Mr. BIDDLE wanted some satisfactory reasons why this measure had been called for. They had no report from the Postmaster General, but, on the contrary, he had expressly disclaimed the necessity of any change being made. Mr. B. objected to it also, on the ground that it broke in upon the now established mode, and it would be a long time before the mass of the community would be made acquainted with the change.

Mr. BRIGGS briefly supported the resolution.

Mr. WILLIAMS of North Carolina moved to refer the resolution to the Committee on the Post Office and Post Roads.

Mr. CONNOR remarked, that if it should be sent to that committee it could not be acted on without a suspension of the rules, since the House had passed an order to take up no subject not embraced in the President's Message.

With reference to the necessity for the passage of the resolution, Mr. C. was not specially apprised of the reasons in its favor, no report having accompanied it from the Senate, but he had been given to understand that one main reason was, that it was almost impossible to make the community understand that letters sent to members of Congress by the Express Mail did not go free. From the inconvenience suffered by a number of gentlemen this way, he hoped the resolution would pass.

Mr. WILLIAMS then varied his motion to refer the resolution to the Committee of the Whole.

Mr. CUSHING hoped that motion would prevail.

Mr. BRIGGS hoped not.

The motion was disagreed to.

Mr. GRENELL wanted more information on the subject, and he therefore moved to postpone its further consideration till the first Monday in December next.

Mr. CAMBRELENG said they had not time to devote to a long discussion of this question. He thought it so simple and proper a one that they ought to pass upon it at once, and he must, therefore, move the previous question; which was seconded—yeas 88, nays 53, and the main question was ordered and carried.

So the resolution was ordered to be engrossed, and, having been engrossed, was read a third time and passed.

#### DIVORCE BANK BILL.

On motion of Mr. CAMBRELENG, the House resolved itself into a Committee of the Whole on the state of the Union, Mr. SMITH in the chair.

Mr. PICKENS moved to take up Senate bill, No. 6, being the "bill imposing additional duties as depositories in certain cases on public officers."

Mr. LEGARE hoped the other two bills would be first acted on.

The motion was agreed to—yeas 100, nays 80.

The bill was then taken up and read through by the Clerk.

Mr. PICKENS then addressed the committee at length in support of the principles of the bill.

Mr. GARLAND of Virginia said it was his intention to offer the substitute of which he had given notice, but he would wait until the friends of the divorce bill had perfected their measure.

Mr. CAMBRELENG said he appreciated the courtesy of the gentleman, but he had no amendment to offer to the bill, and preferred, himself, addressing the House on the subject to-morrow.

#### MERCHANTS' BONDS.

Mr. PHILLIPS moved that the bill be laid aside, and that the committee take up the "bill au-

thorizing a further postponement of payment upon duty bonds."

Mr. CAMBRELENG said it was his intention to have asked the consideration of that bill, and also the bill granting indulgence to the deposit bank, especially as they would, he supposed, take up but a very few minutes. He would, therefore, assent to the motion made by the gentleman from Massachusetts with the understanding that the divorce bill be again taken up in the afternoon.

The motion was agreed to—ayes 88, noes 54.

The bill was accordingly taken up, and having been read through—

Mr. CAMBRELENG submitted the following amendment, explaining that it had been unanimously agreed upon by the Committee of Ways and Means.

Strike out the second section, and insert:

"SEC. 2. *And be it further enacted*, That a credit of three and six months shall be allowed on the duty on all merchandise which shall be imported on or before the first day of November next, upon which the duties are payable in cash, and that the bonds received for such duties shall be payable in equal instalments, bearing interest at the rate of six per cent. per annum, and shall be in the form and upon the conditions prescribed by existing laws and by this act."

The amendment having been agreed to, the committee then rose and reported the bill as amended to the House; and the question being on concurring therein—

Mr. TITUS commenced addressing the House, but gave way for the House to take its usual recess (the time having arrived) till four o'clock.

#### [EVENING SESSION.]

But few members appearing in their seats when the Speaker resumed the chair,

Mr. BRIGGS moved a call of the House, which was ordered, and, after proceeding some time, was dispensed with.

#### MERCHANTS' BONDS.

The House then resumed the consideration of the "bill extending the time on merchants' bonds," reported this morning from the Committee of the Whole.

The question pending was on concurring with the committee in the following amendment:

Strike out the second section, and insert:

"*And be it further enacted*, That a credit of three and six months shall be allowed on the duty on all merchandise which shall be imported on or before the first day of November next, upon which the duties are payable in cash, and that the bonds received for such duties shall be payable in equal instalments, bearing interest at the rate of six per cent. per annum, and shall be in the form and upon the conditions prescribed by existing laws, and by this act."

After some remarks from Mr. McKAY,

Mr. CAMBRELENG modified the amendment by inserting the words "shall have been, or may be."

The question was then taken on agreeing with the Committee of the Whole in their proposed amendment, and adopted.

Mr. MENIFEE moved to add to the 3d section, the following proviso:

*Provided further*, That all others in anywise indebted to the United States, except for the public moneys received, shall be entitled to the benefits of this act, on the terms and considerations heretofore prescribed. Adopted.

Mr. ADAMS moved to commit the bill to the Committee on Manufactures: rejected.

Mr. DUNN moved to amend by adding an additional section, viz: That all persons indebted on such extended bonds, may pay the same or any part thereof in Treasury notes, at any time, whether said bonds or Treasury notes are due or not at the time of such offer to pay: rejected.

The question then recurred on engrossing the bill, and ordering it to a third reading, which was adopted, and the bill ordered to be read a third time this day. The question was then taken on the passage of the bill, and adopted without a division. So the bill passed.

On motion of Mr. CAMBRELENG, the house

resolved itself into a Committee of the Whole on the state of the Union, Mr. SMITH in the chair.

Mr. GARLAND moved to take up for consideration the Senate bill No. 4, for adjusting the remaining claims upon the late

#### DEPOSIT BANKS.

On this motion the ayes and noes were ordered, and resulted as follows: ayes 92, noes 41. So the bill was taken up.

Mr. GARLAND then moved to amend the bill by striking out all after the enacting clause, and inserting,

"That for every sum of money that may be owing by any of the former deposit banks to the United States, and standing to the credit of the Treasurer, or any disbursing officer, on the first day of the month of October, in the year eighteen hundred and thirty-seven, the Secretary of the Treasury is hereby authorized and required to allow to such of said banks as may ask the same, a delay for the payment of one-fourth of such sum as may be so owing, until the 30th day of the month of June, in the year 1838; for one other fourth until the 30th day of the month of September, in the year 1838; and for one other fourth until the 31st day of the month of December, in the year 1838, and for the remaining fourth until the 30th day of March, 1839: *Provided*, That each bank so applying for such delay shall, within forty days after the passage of this act, execute, or cause to be executed, a bond or bonds, with good and sufficient security, payable to the Treasurer of the United States, for each of said instalments, with interest thereon from the 1st day of October, in the year 1837, until paid, at the rate of five per cent. per annum; such security or securities to be approved by the judge of the district in which said bank or banks may be situated, and by the Secretary of the Treasury. Said bond or bonds shall be so taken from each bank as to include any costs or damages which may have accrued to, or been sustained and paid by the United States, from protests of drafts or checks drawn upon it at any time since the 1st day of the month of May last, one-third of such costs or damages to be included in each instalment. And in case any of said banks shall neglect or refuse to enter into or execute such bonds, and give such security as before provided, within the delay aforesaid, it shall be the duty of the Secretary of the Treasury to cause a suit or suits to be instituted against such bank or banks in the district court of the United States, holden in and for the district or State in which such bank or banks may be situated, to recover the amount due or owing."

Mr. LYON made some remarks in favor of striking out the interest to be paid by the banks.

Mr. LOOMIS could see no reason why the banks should be exempted from paying interest on the money owing by them to the Government, as the banks made those pay interest who held their paper. But the true object of the bill was to relieve the people through the banks, as, by granting indulgence to the latter, it would necessarily be extended to the former. He offered the following amendment to the first section of the bill: "Providing, that all banks give security for the payment of four per cent. per annum on all sums of money remaining in their possession as deposits." He also wished the interest to be paid semi-annually.

Mr. MARTIN gave notice, that at a proper time, he should move to strike out "four, six, and nine months," and to insert "six, twelve, and eighteen months." He considered that would afford ample time for the banks to wind up their concerns.

Mr. POPE was in favor of fixing July next as the time for the first instalment to be paid, as, for various reasons, it would be much more convenient at that time than before.

Mr. ROBERTSON moved that the committee rise.

On this motion a division was called, and tellers appointed, which resulted, ayes 74, noes 67.

So the motion prevailed; and the committee rose, and reported the bill to the House, without coming to any resolution thereon.

Mr. REED moved an adjournment; and on this motion,

Mr. CAMBRELENG demanded the ayes and noes, which were ordered, and resulted as follows: Ayes 98, noes 78.

So the House adjourned.

#### IN SENATE,

WEDNESDAY, October 11, 1837.

Mr. McKEAN presented two memorials from citizens of Montgomery county, and one from citizens of Southwark, in Pennsylvania, against annexing Texas to the United States; which were laid on the table.

Also, a petition from thirty-three females of Bucks county, in the same State, praying Congress to abolish slavery in the District of Columbia and the Territories of the United States.

Mr. WHITE moved that these petitions be not received; which motion was laid on the table.

The Senate then proceeded to the order of the day: the bill authorizing the deposit of merchandise in public warehouses, and for other purposes.

Mr. CLAY advocated the postponement of this bill until the first Monday in December next; on the ground that the other House could not, at this late stage of the session, possibly take it up. In the interval of six weeks which would intervene between this and that period, opportunities would be afforded to learn the views of the commercial and manufacturing interests in relation to the measure. Mr. C. came to the Senate with every disposition to support the bill; but there were views connected with it which, in his opinion, made it safer to postpone it. One he had alluded to the other day, the compromise act, which he felt particularly anxious to preserve inviolate; and the other was the expense of the warehousing system—the relative difference between England and this country, were all matters worthy the serious attention of the Senate; and he therefore hoped that the Senator would, from a spirit of conciliation and accommodation, agree to the postponement.

Mr. BUCHANAN said he had no doubt that the Senator from Kentucky (Mr. Clay) was sincere in what he said and felt in relation to the compromise act and domestic manufactures; but, for his part, he did not see how the bill before them could interfere with either the one or the other; if he thought it did, it would not have his support. Under the peculiar circumstances the compromise act was passed, he felt disposed to respect it more than a mere ordinary legislative enactment. So far from the present bill acting against the compromise, or the interests of domestic manufactures, it struck him that it would be beneficial to all classes. The merchants were now largely indebted to the Government, which state of things would be prevented hereafter; there was no complaint from the mercantile community; on the contrary, this class was anxious for its passage. Instead of being obliged to bond his goods as formerly, at a credit of nine or twelve months, as the case might be, he could now store them for three years if he pleased; or, if the demand for goods required it, he could pay the duty, and let his goods find the best market. Under the old system, merchants frequently had to make the most ruinous sacrifices to meet their bonds, and this it was that did the injury to the manufacturing interests.

As to the expense of warehousing, he apprehended it would not be so great as the fears of the gentleman seemed to suggest. Whatever would be the price, if the house was hired, the importers would have to pay the cost. Mr. B. professed himself the firm, undeviating friend of domestic manufactures, and would go all lengths to support them, provided, in so doing, he did not injure or cripple the other great interests of the country. This bill, in his opinion, would have a tendency to keep the market steady. The great injury that had occurred to the manufacturing interests was from the fluctuations in the foreign trade, which kept the market in an unsettled state, to the great injury of our domestic industry.

Mr. WRIGHT said the bill had been before the Senate for some weeks, and its passage had been pressed upon him; but if the Senate were unwilling to act upon it, he would not press it upon their consideration. In his opinion, however, it was free from all the objections that had been urged against it. It did not, so far as he could see, compromise

any of the great interests of the country. On the contrary, he thought it beneficial to all, and he really hoped it would be permitted to pass. He would, however, cheerfully acquiesce in the will of the majority.

Mr. CLAY testified to the liberality of the Senator from New York, (Mr. Wright.) He absolved him from all party feelings in relation to the premature passage of the bill, but he submitted to the better judgment of the gentleman, whether it would not be better to give time to act understandingly on the matter. He could not agree with his friend from Pennsylvania, (Mr. Buchanan) that the bill did not conflict with the principles laid down in the compromise act. The abolishing of credit, on the one hand, and the extension on the other, were clear violations of the spirit of that act. Again, he was not prepared to say what the warehousing system might be; it was a new and untried experiment, and should therefore be approached with caution. The Senator from Pennsylvania thinks it will have a tendency to steady the market; he (Mr. C.) was by no means certain that such would be the case. Instead of goods remaining in Europe, they would be thrown in immense masses into the warehouses here, where the dealers could raise or depress the price at pleasure. At all events he would like to have the views of sound practical men, of the mercantile and manufacturing interests, before he entered on an untried experiment. The relative charge of storing between Liverpool and the ports of this country, would have so important a bearing on this matter, that Senators must see the necessity of having all the light that could be afforded, and he therefore hoped sincerely that the bill would be postponed until the first Monday in December next.

Mr. BUCHANAN made a short reply, stating his inability to vote for the postponement, and reiterating his convictions that the bill would prevent fluctuations of the prices of foreign commodities—the great cause of injury to home manufactures.

Mr. BAYARD thought the bill had a tendency to disturb the compromise act. It gave the importer a credit of three years at his option, which must be considered as beneficial to the importing interest; it enabled the foreign manufacturer to fill the warehouses with goods and deluge the markets at pleasure. No interest could thrive where there was such an eternal shifting. It was the ever varying policy of this administration and Government that created the present embarrassment. The compromise act had been passed with the solemn understanding, that the features contained in it were to remain inviolate for a given number of years; he therefore thought it sound policy not to touch any subjects that could by any possibility be construed into an infraction of its principles. He would therefore vote for the postponement.

Mr. NILES said there was some weight to be attached to the remarks he had heard from the opposite side in relation to the abolishment of the credit system. He was glad to hear it admitted that we looked to all the great interests of the country. He thought it had been said that we looked only to the interests of the Treasury. He was pleased to say that the measures of that body had already made a salutary change, and this was one of the measures to be acted on to settle public opinion. He was anxious that this bill should be added to those already passed, because in his opinion it would do much to give people that confidence in Congress which he was sorry to say had been wanting for some time. It had been said there were no feelings in this body for the people, and that idea had been spread far and wide, with a view to strengthen the assertion. He felt convinced, however, that the people were well satisfied with the measures that had emanated from that body; and there required but this one to pass to make them the crown and glory of this Congress. He thought it would do much to raise the value of glory, which his friend from Georgia (Mr. King) had said, on a late occasion, was so much depreciated. He had no idea that the Executive should engross all the glory, but insisted that the Senate came in for its share.

It had been said that confidence alone was wanting to heal every thing; but it was his impression

that stability was quite as much wanting as confidence. When the people saw a uniform system of legislation, they would conform to that legislation, and deduce good from the evils they had been made to suffer through the banking system. Such was their native activity and energy, they would rise superior to every crisis. The bill before them was fraught with good to the mercantile and manufacturing interests, and he therefore hoped it would not be postponed.

Mr. CLAY would suggest to the gentleman from Connecticut (Mr. Niles) whether it would not be better to economise his glory, and reserve a little for the next session; and he put it to Mr. N. whether he ought not to join in postponing this matter, lest he should have no subject for glory in the coming day.

The question was then taken on the postponement of the bill to the first Monday in December.

Mr. CLAY having asked for the yeas and nays, there appeared for postponing 15, against it 23, as follows:

YEAS—Messrs. Bayard, Calhoun, Clay of Kentucky, Clayton, Kent, Knight, Prentiss, Roane, Robbins, Smith of Indiana, Southard, Spence, Swift, Tipton, and White—15.

NAYS—Messrs. Allen, Benton, Buchanan, Clay of Alabama, Fulton, Grundy, Hubbard, King of Alabama, King of Georgia, Linn, Lyon, Nicholas, Niles, Norvell, Pierce, Ruggles, Smith, of Connecticut, Strange, Walker, Wall, Williams, Wright, and Young—23.

The bill having been reported to the Senate as amended, in Committee of the Whole, the question was taken on ordering it to be engrossed for a third reading by yeas and nays, when there appeared for it 28, against it 5, as follows:

YEAS—Messrs. Allen, Benton, Buchanan, Clay of Alabama, Clayton, Fulton, Grundy, Hubbard, King of Alabama, King of Georgia, Linn, Lyon, McKean, Nicholas, Niles, Norvell, Pierce, Roane, Ruggles, Smith of Connecticut, Strange, Swift, Walker, Wall, White, Williams, Wright, and Young—28.

NAYS—Messrs. Calhoun, Kent, Smith of Indiana, Spence, and Tipton—5.

Mr. WRIGHT moved to take up the bill extending the time on merchants' bonds, which had been returned from the House of Representatives with an amendment. Mr. W. explained that the Committee on Finance had examined the amendment, and were of opinion that it ought to be concurred in.

Mr. KING of Alabama moved to lay it on the table, that he might examine it, pledging himself to call it up to-morrow. The motion was adopted, and the bill laid on the table.

Mr. WRIGHT said he felt it his duty now to move to take up the bill revoking the charters of certain banks in the District of Columbia, and for the suppression of small notes therein.

Mr. NORVELL urged the postponement of the bill to the regular session. He adverted to its character, and said that if the stern and rigid features of this bill could be applied to the banks of New York, (by which the example of suspending specie payments had been set,) he should be entirely willing so to apply them; and he would follow up the application to all the banks that had followed that pernicious example. But it must be perfectly manifest to every Senator who had reflected upon the subject, that while the neighboring State banks refused to redeem their bills with specie, the banks of this District could not keep their vaults open twenty-four hours. It would, therefore, be useless, it would be vain, it would not produce the desired effect, to urge the passage of this bill at the present time. It not only required an impossibility of the banks, but, in their efforts to comply with the wishes of Congress, they would have to press their debtors. The people of the District were without a representation in this or the other body. The bill would oppress them; and, as they had no special representative to support their interests here, they deserved the particular consideration of every Senator. It could be productive of no evil consequences to postpone the bill to the regular session; and, in conclusion, he would make a motion to that effect.

Mr. WRIGHT said the bill before the Senate had two objects in view: one to coerce as early a day as practicable, a resumption of specie payments by the banks; the other to suppress the worthless paper rags which had become almost the exclusive circulation of the District. Over the banks of this district, Congress had exclusive control, and the question involved no constitutional objection. If, however, gentlemen thought it too severe on the banks, and that some consideration was due under existing circumstances, he was not disposed to resist such modifications as might be offered. If sixty days was too short a period, that might be extended to a longer term; he was not disposed to act harshly with these institutions, but he considered it the duty of Congress to coerce as speedily a resumption as possible; but above all was it incumbent on them to discountenance and suppress the issues of individuals.

Mr. KENT thought the banks of this District in as good and sound a condition as those of any other in the country; the Bank of the Metropolis had done what few others had, that had been honored with the deposits. Almost its first step after the suspension, was to cancel its debt to Government.

Mr. BENTON did not think it was generally understood in the Senate, that these banks had already had three continued renewals within the last eighteen years. In the first one given, it was expressly stipulated that if, at any time, they should fail to redeem their notes in specie, it should be the duty of Congress to revoke their charters. It was also stipulated, that they should not issue or reissue any notes of a less denomination than five dollars; and yet we had seen that they had not only suspended specie payments, but had been issuing notes of as low a stamp as twenty-five cents. As their charters would expire in July next, it was the object of the committee to force a resumption before that period.

He did not believe Congress was disposed to perpetuate those institutions; they were, in his opinion, quite unnecessary, as Government disbursed more hard money than could be absorbed in the District. But, if we did not require them to wind up, we should, at least, force them to a resumption before their charter expires. We already saw another bank issuing the notes of a defunct institution; and so far as he was concerned, he was unwilling to leave the people to individual action, to obtain their money after their charters had expired. It had been said that the people of this District had no representation. When he saw the honest and industrious mechanic toiling from morning until night cracking stone, and paid in wretched irredeemable paper and shin-plasters, while this body was paid in gold, he felt indeed that the people had no representation. We had been told that one of these banks had paid up its debt to the Federal Government; and how was it paid? Why, in wretched depreciated paper, which the Government had received, and pushed on the needy and helpless laborer, who, with his starving family, was obliged to take that or nothing, and who would be glad to get it, even though it were fifty per cent. below par. By this mode of paying, the bank had made fifteen per cent. out of the Government, and now thought it a hardship to be made to redeem its notes of five dollars. With all the profits made out of the Government and people, they did not put themselves in a condition to redeem their pledges. He would not only give his voice to make them pay up, but to keep out of circulation that moral pestilence, a shin-plaster currency. What, asked Mr. B. would be the example to the States, if we, where we had the control, did not exercise it to bring about a healthful medium of exchange? Would it not be saying to them, "do likewise, and continue to deluge the whole country with shin-plasters?" If a little more time was asked, he had no objection to grant it; but he would lift his voice against any postponement of the bill, and against fixing a reasonable period for the resumption, as he had no idea of leaving the people to promote the interests of the lawyers by suits against these institutions after their charters had expired.

Mr. KENT said the currency was no worse here than in other portions of the Union; it was in

the same wretched condition every where. We had as good a currency as ever nation was blessed with; but the Government would not "let well alone." The few gold coins that were scattered through that body did not change the condition of things; for his part, he had not touched them, nor did he mean to do so; he recollected the same attempt was made in 1815, when he was a member of the other body, and was indignantly voted down. He did not stand there the advocate of any bank, nor had he seen any one connected with them; but he was unwilling to see harsh and tyrannical measures resorted to against the people of a district that had no representation. The people of this District had paid much into the Treasury—more indeed than those of other places, from the peculiar condition in which they were placed at the seat of Government; (he meant the pride of dress incident to such a location,) and yet, in the distribution of the surplus revenue among the States, not a cent was given to them; and now we seek to extinguish every hope by rudely revoking the character of their moneyed institutions for not doing what it is impossible for them to do, unless it would be by a simultaneous act throughout the whole country. It was said coming events cast their shadows before. The ex-President had written a letter, stating that now was the time to cut loose from all the banks. He wished that individual would refrain from interfering in public affairs; his action and evil counsels were already apparent. We were promised a better currency. Had we got it? We had the humbug of a few millions of gold imported in violation of the natural course of trade, and, with that in the country, we seek to make war upon the State institutions. Ay, with scarcely a majority in either branch of the Legislature, they seek to put down institutions that were here before the adoption of the Federal Constitution, and which he believed had as much capital, in proportion to the wealth and population of the country at that time, as those of the present day. The banks were now in as good and sound a condition as ever they were, and we had the authority of the Secretary of the Treasury for saying that the banks of this District were never stronger than at the present time.

Mr. NORVELL observed, that in the allusions made by the honorable Senator from Maryland to the Bank of the United States, and to the proceedings of this body in regard to the financial affairs of the country, he had touched a chord whose vibrations would, he was afraid, operate unfavorably to the object which he had in view. He regretted that the Senator had indulged in them; and he deprecated the effect which they might produce on a part of the Senate. The subject did not require the expanded view which that honorable Senator had taken of it. He hoped that it would be decided on its own merits. The principle involved in the bill was in a narrow compass. It resolved itself into the question whether the District banks could resume specie payments, with any prospect of continuing them over twenty-four hours, while the New York and other State banks were in the condition of a suspension of specie payments? In the general principles advanced by the honorable Senator from Missouri, and in his denunciations of individual issues of bills, he cordially concurred. He would, if he had the power, refuse to suffer the charter of a bank which, contrary to law, ceased to redeem its notes with gold or silver, to exist for a day; but he would begin with the originators of the transgression. Abstract principles, however, must sometimes yield to circumstances. We must be governed, in some degree, by those which surround us. The neighboring banks did not, at this time, redeem their notes with specie; and, he repeated, as long as this was the case, the District banks could not resume. The people of the District were debtors to the banks. This bill would compel the banks to press them; and he was extremely apprehensive that extensive suffering and distress among this unrepresented people, who were entitled to our sympathies, would be the consequence of its passage. In relation to the notes which were issued and circulated by individuals, he would go as far as any Senator to suppress them; and if the honorable Senator from New York, whose ability was compe-

tent to the performance of any task devolved upon him, would propose any provision for their suppression, he should have his cheerful co-operation and support.

Mr. STRANGE spoke some time in favor of the postponement. He felt painfully the position in which the District was placed. Every step taken convinced him more and more of the danger of the banking system. We had created these institutions, and must leave the result to the people. The same anxiety, he presumed, would be felt in every State. You can not approach the banking system without being told of the ruin in which some individual or other would be involved. He was opposed to all the features of the bill; of the three clauses he did not know which was most objectionable. He could not consent that the issuing of a *shin-plaster*, which another man agreed to take, should be punished penally, any more than for the issuing of "promise to pay" notes of another kind. When a man issued the *shin-plasters*, he expected to redeem them; it was the folly of the people which tolerated such a state of things, and he thought it better to leave the whole matter to experience, which could alone cure the evil.

Mr. CLAYTON also spoke against the bill.

Mr. WALKER announced his intention to vote for the postponement. He was opposed to the whole wretched banking system, the curse of the country; and when the proper time came, he would be found arrayed against it. But he asked what practical good could come from discussing this bill at this time, when unless it got through the Senate that day, there was no possible chance of its passage in the other House; he thought it waste of time to pursue any further legislation on the subject, and hoped the bill would be postponed.

Mr. WRIGHT made some further remarks.

Mr. NILES said that the true question which the motion to postpone the bill presented, seemed to be overlooked. The bill contains two principles; one to coerce the banks to resume payment, and fulfil their engagements to the public; the other the suppression of the small bills, appropriately called *shin-plasters*. To postpone the bill, will be to abandon the principle of coercion, and if not expressly, at least tacitly, to sanction the opinion that the legislature cannot, or ought not, to compel the banks to fulfil their engagements to the public. He was not willing to sanction any such idea. He believed it to be the duty of every legislature, which had created banking institutions, and conferred on them the power to supply a currency, and thus to exercise a part of the sovereign power, to supervise those institutions, so far as the security of the public might require; they were bound to see that they did not defraud the community, by flooding the country with irredeemable paper, which may become entirely worthless. His friend from North Carolina (Mr. Strange) seems to think that it is not proper for the legislature to interfere, but to leave individuals to their remedies, and to suffer the banks and individuals to go on and swindle the community by their fraudulent issues of spurious paper, which has entirely superseded and repealed that provision in the Constitution which was intended to secure to the people of the United States a stable and honest currency, consisting of coin.

This was carrying the principle of free trade one step too far for him. Free banking, so far as it consisted in supplying and issuing a paper currency, was, in his opinion, only another name for swindling. The creation of a currency could not safely be trusted to individuals; to provide and regulate the currency belongs to the sovereign power of the State. Money being the standard of value, by which property and contracts are governed, the legislature was bound to keep this standard as uniform and stable as possible. This cannot be done except by the sovereign power of the State. It is as important that we have a uniform standard of value, as it is that we have a uniform standard of weights and measures.

He could not subscribe to the doctrine that the Legislature can create banks and authorize corporations to issue a spurious currency, and thus depriving the people of the rights secured to them by the Constitution, and then leaving them to take

care of themselves, and to get rid, as well as they can, of the evils of a vicious paper currency. As legislation had created the mischief, it was the proper business of legislation to correct it.

Mr. N. said he did not regard this question, so far as respects the District, as of so much importance as he did its moral influence on the country. The banks of all the States have violated their engagements, and brought upon the people the evils of a depreciated currency; and the question now is, whether the Legislature can, and ought to coerce, and force them to redeem their bills? Congress has no power to act on this subject, except as respects the banks of this District. Yet our action would have force, as an example, and by its moral influence. In some few of the States the Legislature has been in session since the suspension of the banks; and some, if not all of them, have given, in some way, directly or indirectly, a sanction to this suspension for a limited time. These Legislatures, many of them, were in session at the time of the failure of the banks, and acted suddenly, and under surprise, and a species of duress. Now, after the lapse of some months, the public mind has become calm and settled upon this subject. The Legislatures of most of the States will soon be in session, and will be called upon to act upon this subject. The question will arise whether the banks or the State Governments are masters. Shall Congress set them an example of yielding to the banks; of suffering them to go on and defraud the community? Or shall we assert and exercise the principle of coercion, and of compelling the banks to pay their debts? Meeting here as we have, and finding the banks of the District prostrate, and refusing to redeem their notes, shall we adjourn without any action on the subject? Would not this be giving a tacit sanction to the conduct of the banks? Would it not be, tacitly at least, to sanction the opinion that the Legislature either can not, or ought not, to interfere to relieve the people? That they can not lay their hands upon the banks, and force them to redeem their bills? He thought that the action of Congress would have a salutary influence on the action of the States; and he was, therefore, opposed to the postponement of the bill.

Mr. HUBBARD spoke in favor of the postponement, rather than adopt the bill in its present shape. He thought the banks of the District as safe as any others; in fact, one already paid its bills on presentation, and the others would no doubt do so, as soon as practicable. Much as he was disposed to prohibit the individual issues of paper, he could not feel himself authorized to support the bill.

Mr. KING of Alabama thought it prudent to postpone the bill: he was not disposed to support it in its present shape. The banks of the District, he believed, were in as good a condition as any banks in the country. As their charters expired in July, he thought it better to allow more time for consideration: he should vote for the postponement.

Mr. BUCHANAN avowed himself unfriendly to the first and second sections of the bill; he thought they pressed too severely on the banks, that would in turn press on the people for their debts, at a time when they were least able to bear it. He would not vote to perpetuate these institutions. The charters expired in July next, when he should vote for the establishment of one bank, in which the stock and debts of the others might be merged, so as not to create any pressure. Mr. B. was decidedly in favor of retaining the last section by which *shin-plasters* could be put down.

Mr. YOUNG spoke against the postponement of the bill. He thought we ought to fix the time of resumption of specie payments before we attempted to renew their charters. The issuing of *shin-plasters* was penal in his State, and should be made so here. If a proper stand were made in this District by the National Legislature, it would at least have a moral effect abroad.

Mr. WEBSTER said there appeared to be a general feeling in the Senate that the first and second sections of the bill pressed too heavily on the banks, and as general a feeling to retain the last section, which prohibited the wretched issues with which this quarter was deluged. He thought the latter deserved no countenance, and, so far as

the Government could reach them, he would be pleased to see them put down. To press on the banks now, would be to press on the people; if the motion to postpone was withdrawn, he would move to strike out the first and second sections.

The motion to postpone being withdrawn, the question on striking out the first and second sections was carried.

Some further debate took place on amending the last section, in which Mr. SMITH of Indiana, Mr. YOUNG, Mr. BENTON, and others, took part.

The bill was then ordered to be engrossed for a third reading, and reads as follows:

*Be it enacted*, That after the expiration of thirty days from the passage of this act, it shall be unlawful for any individual, company, or corporation, to issue, pass, or to offer to pass, within the District of Columbia, any note, check, draft, bank bill, or any other paper currency, of a less denomination than five dollars; and if any person or corporation shall violate the provisions of this section, the person so offending, or, in case of any corporation so offending, the officers of any such corporation for the time being, shall be liable to indictment by the grand jury of the county within the District where the offence shall have been committed; and the person so offending, or the officers of the corporation so offending, shall, on conviction thereof, be fined in a sum not exceeding fifty dollars, at the discretion of the court, for every offence: one-half of said fine shall be paid to the prosecutor, the other half shall be for the use of the county where the offence shall have been committed; and the person so offending, and the officers of any corporation, shall also be liable to pay the amount of any note, bill, check, draft, or other paper, constituting part of such currency, to any holder thereof, with all costs incident to the protest and legal collection thereof, with fifty per cent. damages for non-payment on demand, to be recovered by action summarily and without delay, and with a right of immediate discovery on oath, in all cases where the defendant shall deny the issuing, or passing, or attempting to pass, the note, bill, check, draft, or other paper in question; and in case of judgment for the plaintiff, execution thereon shall be had forthwith; and it shall be the duty of the District Attorney of the District of Columbia to commence prosecutions against all persons and every corporation offending against this section, of which he shall have knowledge or probable information; and, in case of corporations, the prosecution shall be against the president, or any director or cashier thereof, for the time being; and it shall be the duty of the grand jurors to present all such offences of which they shall have knowledge or probable information; and that no member of a grand jury shall be ignorant of his duty in this particular, it shall be the duty of the court having cognizance of all offences against this section, to give the same in charge to the grand juries at the commencement of the first term after the passage of this act.

Mr. WALL introduced a bill for the relief of Mrs. Madison; which was passed to a second reading.

On motion of Mr. TIPTON,

The Senate went into Executive business, and soon after adjourned.

#### HOUSE OF REPRESENTATIVES,

WEDNESDAY, October 11, 1837.

On motion of Mr. JOHNSON of Louisiana, the following resolution, submitted by him on the 26th of September, was taken up, considered and adopted.

*Resolved*, That the Secretary of War be directed to submit to this House, as soon after the meeting of the next Congress as practicable, a plan for the protection of the western frontier of the United States against Indian aggression; designating the points to be permanently occupied by garrisons; the auxiliary stations for reserves and deposits of munitions, arms, and other supplies; the routes to be established for the purpose of maintaining a safe and prompt intercourse between the several stations, and from these with the depots in the interior; and finally the minimum force which, in his opinion, will be required to maintain peace among the several tribes, and cause our border settlements

to be respected. Also, to report, as far as the same can be ascertained, the number of Indians who will be in the occupancy of the country west and north of the States of Louisiana, Arkansas, and Missouri, and the number of warriors they may, collectively, be able to bring into the field; or such other plan as he may think proper.

Mr. CHAPMAN, on leave, submitted the following resolution, which was considered and adopted:

*Resolved*, That the Committee of Claims be instructed to inquire into the expediency of extending the provisions of the act approved on the 18th of January, 1837, entitled "An act to provide for the payment of horses lost or destroyed in the military service of the United States," to cases where horses have been surrendered or turned over by such persons to the Government, by order of the commanding officer, on leaving the service.

Mr. JOHNSON of Virginia, from the Committee of Accounts, to which the subject had been referred by a resolution of the House, reported the following resolution, which was considered and adopted:

*Resolved*, That the Clerk of the House of Representatives be authorized to retain in employ the assistant and additional assistant clerks now in the office of the Clerk of the House of Representatives, at the lowest rate of compensation fixed by law for clerks in said office, commencing with this session of Congress.

#### INQUIRY IN RELATION TO THE FLORIDA WAR.

The House then proceeded to the unfinished business of the morning hour, which was the consideration of the following resolution, submitted by Mr. WISE on the 19th of September:

*Resolved*, That a select committee be appointed by ballot to inquire into the cause of the Florida war, and into the causes of the delays and failures, and the expenditures which have attended the prosecution of that war, and into the manner of its conduct, and the facts of its history generally; that the said committee have power to send for persons and papers, and that it have power to sit in the recess, and that it make report to the next session of Congress.

Mr. GLASCOCK had moved to amend the foregoing resolution, by striking out all after the word "resolve," and insert the following:

"That a select committee be appointed to inquire into the cause of the Florida war, and the causes of the extraordinary delays and failures, and the expenditures which have attended the prosecution of the same, and all the facts connected with its history generally; and that said committee have power to send for persons and papers."

The question immediately pending, was the motion of Mr. HOWARD to strike out the words "that a select committee be appointed," and insert "that the Committee on Military Affairs be instructed."

Mr. McKAY, who was entitled to the floor, addressed the House at some length in opposition to the adoption of the resolution. He opposed the raising of this select committee, because the same subject was now under investigation in various ways. It had been referred to the President of the United States, who had caused an inquiry to be instituted, and had made a report in part, and he understood would probably report in full at the next session of Congress. Besides this, the chairman of the Committee on Indian Affairs (Mr. Bell) had moved to have this subject referred to that committee, and after a lengthy, and no doubt arduous investigation, the papers had been reported back to the House without coming to any conclusion thereon. He presumed, however, that, at the commencement of the regular session, the chairman of that committee would move to have the subject again referred to that committee, and proceed with the investigation. He could not, therefore, see the necessity of raising this select committee, because it was before the President of the United States, who had appointed commissioners to investigate the matter, and the gentleman from Massachusetts (Mr. Adams) had admitted that they had performed their duty faithfully, so far as they went, and laid before the House information of which, to use his own expression, had

made the blood tingle in his veins. They will doubtless lay the whole proceedings before the House at the next session of Congress. In relation to the causes of delays and failures of the campaign, it will be recollected that an inquiry was instituted by the President at Frederick, at which all the officers engaged in the first campaign, Scott, Gaines, and Clinch, were fully examined, and the court came to the conclusion that the failures and delays of the campaign were in consequence of the insubriety of the climate, the impregnability of the swamps, and the absence of all knowledge of the topography of the country by the commanding generals, and the difficulty in transporting supplies for the army from one point to another. Here, then, at this tribunal, all the causes of the failures of the campaigns conducted by General's Gaines and Scott were examined into; and it certainly could not be designed by the House to institute an inquiry in relation to the conduct of the present commander in Florida, (Gen. Jesup,) at a time when he was just preparing and organizing his forces for another campaign. It would certainly be improper for the House to interfere with this campaign before there was an opportunity of doing any thing with it. It would be interfering with the legitimate duties of the Executive to send an investigating committee, with power to send for persons and papers, into Florida; and by so doing, the whole of the benefits to be derived from the approaching campaign might be set aside. Mr. McK. next referred to the remarks of the gentleman from Tennessee, (Mr. Bell,) who had stated that the probable causes of failures of the campaigns in Florida had arisen from the deficiency in the number of officers connected with the army in Florida. He admitted that there might be some justice in this remark, but said the subject had already attracted the attention of the President of the United States, and referred to an order issued as early as October last, directing all officers of the army on detached service to join their regiments and companies, in which order the President had said that this state of things must no longer exist. If any notice was to be taken of this matter, however, by this House, it was the legitimate business of the Committee on Military Affairs to take charge of it, and he hoped they would take the matter under consideration. In relation to the subject of expenditures, he admitted that they had been very large, amounting, he believed, to about seven millions; but he could see no necessity of appointing a select committee to take charge of this subject, when we have committees appointed under the rules whose special business it was to take charge of these subjects. He alluded to the Committee on the Expenditures of the Executive departments, all of which committees he believed were composed of majorities opposed to the administration. The Committee on the Expenditures of the War Department should take this subject into consideration, and report upon it. Mr. McK. concluded by moving to postpone the further consideration of the resolution until the first Monday in December next.

Mr. WILLIAMS, of North Carolina, hoped this motion would not prevail. If a committee was to be appointed at all, it ought to be appointed at the present session of Congress. He doubted not if a committee was appointed, it would occupy their attention during the whole of the coming session of Congress. He trusted the resolution would be adopted, and the committee appointed at the present session of Congress.

Mr. ADAMS replied at some length to the arguments of the gentleman from North Carolina, (Mr. McKay.) If the gentleman's argument was good for any thing now, it would just be as good at the commencement of the next session of Congress. If it was improper to appoint a committee now, it would just be as improper then. He contended that the subject being referred to the President was no reason why this committee should not be appointed. The reading of the report made by the President proved the necessity of adopting this resolution. If he had had any doubt about the matter, that report would have confirmed him, and inclined him to vote for the resolution. In relation to the subject being referred to the Committee on Indian Affairs, he believed that inquiry had now ceased to exist; and if it

was not able to conclude its labors, and make a report after an investigation of a whole session, it was the strongest proof which could be adduced of the necessity of appointing this committee at the present session of Congress. As to the Committee on the Expenditures of the Executive Departments taking charge of this subject of the expenditures made in this service, he took it to be entirely out of the province of their duties, as their business, so far as he understood, was merely to take charge of the expenditures connected with the administration of the Departments. When he had the honor of being at the head of one of those Departments, reports on expenditures related merely to the expenditures connected with the Department, and no notice was ever taken of the expenditures connected with our foreign affairs. Of late years, however, he believed these committees seldom took upon themselves to make any inquiries into the condition of the Departments at all; and, in support of this, he instanced that the chairman of one of those committees, at a late session, had asserted on the floor that he did not even know who were members of the committee, it never having been called together.

Mr. A. then proceeded to make some comments upon the composition of the military committee, as regarded its political and geographical organization. He could not account for the fact of there being eight members on that committee from the southern and western States, while there was but one from the northern and eastern States, unless it was because the whole benefits of the army of the United States accrued to the people of the South and West. The whole military array of the United States was not of the slightest pecuniary benefit to his constituents, and he did not know how the gentleman from South Carolina, in his eye, (Mr. Thompson,) could reconcile this expenditure of seven or eight millions of dollars in Florida with the frequent assertions he had made on this floor that the whole expenditures of the Government flowed to the North and East.

At this stage of the proceedings, on motion of Mr. CAMBRELENG, the House proceeded to the orders of the day.

The Senate "bill to regulate the fees of district attorneys in certain cases" was taken up, ordered to a third reading, and then read a third time and passed.

#### DIVORCE BANKS BILL.

On motion of Mr. CAMBRELENG, the House then resolved itself into a Committee of the Whole on the state of the Union, (Mr. SMITH in the Chair.)

The first business in order, being the "bill for adjusting the remaining claims upon the late deposit banks."

Mr. PICKENS said he felt bound to move that the committee resume the consideration of the "divorce bill," which was agreed to—ayes 105, noes 35.

The bill was then taken up, the question pending being on the amendment or substitute for the whole bill submitted by Mr. GARLAND of Virginia.

Mr. HOFFMAN gave his reasons at length against the bill.

Mr. HUNTER, of Virginia, followed in reply, and in support of the bill.

Mr. MASON, of Virginia, gave the reasons which would constrain him to vote against the bill, regarding it, as he did, as an entire departure from those principles which were put forth by the late administration, and eagerly and warmly advocated by the people of the country, before whom those principles were promulgated.

Mr. M. spoke till the time arrived for the House to take its usual recess, from half past two till four o'clock, p. m.

#### [EVENING SESSION.]

The House went into Committee of the Whole, and resumed the consideration of the Senate bill "imposing additional duties as depositories on public officers, in certain cases."

Mr. MASON resumed his remarks. He denied any partiality for a national bank. He had always been known, both at home and abroad, as the uncompromising foe of such an institution. He would

like gentlemen who advocated this bill to say what they would next resort to, in case it failed, for fail it must. In his opinion, it could never be carried out. In that case, he did not know to what they could resort, unless they went to the Treasury to make a circulation, or threw themselves into the arms of a national bank. It was for that reason he wished to oppose the present bill, for he was convinced that if an issue of Treasury notes did not effect relief, nothing else would.

Mr. ROBERTSON gave notice, that at a proper time he would offer an amendment, authorizing the Secretary of the Treasury to deposit the public money in such banks as chose to receive it, for a fair compensation, as a special deposit, and without discounting on or using the same.

Mr. R. made some remarks in support of his proposed amendment. He contended that the fatal objection to the bill was, the temptation public officers would be under to speculate on the money in their possession.

Mr. GARLAND thought it his duty to make some remarks on the amendment he had proposed. After replying to some arguments of his colleague in relation to the Virginia banks, he adverted to the present bill. He was sure the Government would never prosper when divorced from the banks, between whom and the people there still existed a matrimonial connection. It was his opinion that, in less than eighteen months after the passage of this measure, the Government would seek to re-unite itself with the banks. The relief now proposed to the people, in lieu of the State banks, reminded him of a certain criminal, who, when on his way to the gallows, was offered a reprieve on condition of his marrying an ugly, wrinkled old woman. The man, after a moment's reflection, exclaimed:

"A sentence hard you do impart;

The woman's worse—drive on the cart."

And thus preferred hanging to a wedding on such terms. So the sentence was more preferable to the people than the system now proposed. The object of the divorce bill was to take the money from banks and to deposit it with sub-agents. But in his opinion, taking into consideration the frailties of human nature, it would be a dangerous scheme. He did not mean to say that the officers of Government had less integrity than other men; but when the lamentable instances were called to mind where individuals of high standing had sacrificed an unblemished character for a mere paltry amount, it ought to teach a lesson to guide them in the present instance. He would repeat the words of his colleague this morning, who had said even the words of our Savior were, "lead us not into temptation." He advocated the plan of keeping the money in the vaults of the banks, as more secure, and particularly if the amendment last offered were adopted, which provides that the banks shall receive the money as a special deposit, and without using it in any way whatever. He denied that the banks were insolvent, as had been stated. He had been informed on unquestionable authority, that they were as sound now as before they suspended specie payment. As regarded the proposed separation, he had always understood that our system of Government, although necessarily divided into many branches, was all one. But now they talked of a separation from those institutions of which the States had laid the foundation, and which they had cherished to this time. How fearful would be that time, should it ever occur, when this Government should consider it as its duty to make its action independent of the States! He did not say that gentlemen designed this, but he would entreat them to reflect whether the present measure would not pave the way for such a state of things. The true policy of Government was to cement itself more closely with the States, and he had no doubt but that the issue of Treasury notes would speedily afford relief, and enable the banks to resume specie payments. It had been said that these notes would lay the foundation of a Treasury bank, but he had no apprehension of that kind, for the restrictions to that bill would render such a result impossible. He contended that the bank note system had not had a fair trial, and referred to the Bank of France, and other institu-

tions, in support of his position. At the conclusion of his remarks,

On motion of Mr. HAYNES, the committee rose and reported the bill to the House, without coming to any resolution thereon; when,

On motion of Mr. BRIGGS, the House adjourned.

#### IN SENATE.

THURSDAY, October 12, 1837.

Mr. WEBSTER presented a large number of memorials from several of the eastern States, in relation to the annexation of Texas, which were ordered to lie on the table.

Mr. WILLIAMS presented memorials relating to the same.

Mr. MCKEAN presented memorials relating to the same.

Mr. SWIFT presented memorials relating to the same; these petitions were severally ordered to lie on the table.

Mr. WEBSTER introduced the following resolution, which was agreed to:

*Resolved*, That the President be requested to communicate to the Senate, early after the opening of the next session of Congress, copies of the instructions given to our Charge d'Affairs at the Hague, (if not inconsistent with the public interests,) relative to the seizure and sequestration, of the ship Mary and cargo belonging to Baltimore, by the Dutch Government at the island of Curacao, during the year 1800; also, copies of communications which may have been received from our said Charge d'Affairs at the Hague, to the Secretary of State, which may show the reasons assigned by the Dutch Government for so long refusing to restore to citizens of the United States their lawful property.

#### BANKRUPT LAW AGAINST BANKS.

Mr. GRUNDY moved that the Committee on the Judiciary be discharged from the further consideration of so much of the President's Message as related to the bankrupt law.

On this motion:

Mr. BENTON rose and said: The recommendation of the President for a bankrupt law, applicable to banks and bankers, has been made the subject of repeated animadversion on this floor, and that while the subject was not before the Senate, but in the hands of a committee. I noticed these animadversions on a former occasion; not for argument, but for the purpose of exhibiting their unparliamentary character; to dissent from their justness; to express my own approbation of the recommendation; and to declare myself ready to support it, whenever it could be done in a parliamentary manner, and without obliquing into a discussion foreign to the subject in hand. The suitable occasion now presents itself; and I embrace it with pleasure, that the great remedial measure proposed by the President, and called for by the rights and interests of the people, and by the character of the country, may not be prejudiced by the unparliamentary and precocious assaults which have been made upon it.

At the head of those who have made the attack on this part of the Message, and whose objections cover all the ground which has since been occupied by others, is the Senator from Massachusetts, who delivered his sentiments on the Treasury note bill, (Mr. Webster.) That Senator spoke briefly, but comprehensively, against this Executive recommendation. He presented all the points which others have since elaborated. In answering him, I answer all. His objections were particularly noted as he delivered them; but I find the substance of what he said so accurately condensed in one of the reports, that I think it the part of fairness to drop my own notes, and to have recourse to that report for the text of the observations which I propose to make. This is the report:

"Now, Mr. President, it is certainly true that the Constitution authorizes Congress to establish uniform rules on the subject of bankruptcies; but it is equally true, and abundantly manifest, that this power was not granted with any reference to currency questions. It is a general power—a power to make uniform rules on the subject. How is it possible that such a power can be fairly exercised by seizing on corporations and bankers, but excluding all the other useful subjects of bankruptcy laws? Besides, do such laws ordinarily extend to corporations at all? But suppose they might be so extended by a bankrupt law enacted for the usual purposes contemplated by

such laws, how can a law be defended which embraces them and bankers alone?

"How do the President's suggestions conform to his notions of the Constitution? The object of bankrupt laws, sir, has no relation to currency. It is simply to distribute the effects of insolvent debtors among their creditors; and I must say, it strikes me that it would be a great perversion of the power conferred on Congress, to exercise it upon corporations and bankers, with the leading and primary object of remedying a depreciated paper currency.

"And this appears the more extraordinary, inasmuch as the President is of opinion that the general subject of the currency is not within our province. Bankruptcy, in its common and just meaning, is within our province. Currency, says the Message, is not. But we have a bankruptcy power in the Constitution, and we will use this power, not for bankruptcy, indeed, but for currency. This, I confess, sir, appears to me to be the short statement of the matter. I would not do the Message, or its author, any intentional injustice, nor create any apparent where there was not a real inconsistency; but I declare, in all sincerity, that I cannot reconcile the proposed use of the bankrupt power with those opinions of the Message which respect the authority of Congress over the currency of the country."

These are the objections which the Senator from Massachusetts takes to the Executive recommendation. They are of a two-fold character: first, to the constitutional power of Congress to pass a bankrupt law, confined to moneyed corporations and bankers, and with a view to operate upon the paper currency; secondly, to the consistency of the President in having made such a recommendation.

I take up the second of these objections first, because it creates a prejudice against the whole recommendation of the President. The imputation of inconsistency creates a prejudice; and it is necessary to remove that prejudice before the recommendation can be fairly considered. The inconsistency imputed, lies in the supposed disclaimer of the President of all federal authority over the currency, and then, an assumption of power to regulate that currency, and to regulate it by an unauthorized exercise of the power to pass bankrupt laws. This is the point of the imputed inconsistency. It all turns upon this word currency; and now, what currency does the Senator from Massachusetts mean? Certainly not the currency of the Constitution; for the President recites the power to coin that currency, and to regulate its value. It must be the paper currency—the local bank notes and the shin-plasters—which are intended; and, if so, I have to remark that the President very explicitly disclaims both the authority, and the expediency, of having recourse to a national bank to regulate that species of currency. He disclaims that instrument of regulation; and in doing so, he stands upon the Constitution, which disowns its existence; upon the fact, which shows its impotency; and upon the ground which the authors of the first national bank occupied, and to whom the regulation of currency and of exchanges was wholly unknown as among the reasons for its creation. These reasons are of modern conception and recent date. They are an after-thought of the subsequent supporters of the second national bank. The President disclaims also a power to suppress the local banking institutions by federal legislation; but he nowhere disclaims the authority to prevent their paper issues from superseding and expelling the hard money currency of the Constitution. On the contrary, he claims that power, and points to the sources of its rightful exercise in the incidental effects of federal legislation in favor of hard money as necessarily improving the condition of paper currency; and then he points to the bankrupt power as furnishing the direct means of checking the issues of non-specie paying banks, and giving a remedy to the holders of their unpaid notes. This is what the President does; and nothing can be further from his words than a disclaimer of all authority over the regulation of currency. And here let me remark upon a systematic error into which some Senators incessantly fall: they always speak of the federal authority, and the federal duties over "the currency," meaning all the while, not gold and silver, but bank notes and shin-plasters. Now, sir, I repeat, for about the thousandth time, that the word currency is not in the Constitution, nor any word whatsoever which can mean what these speakers intend by it. The nearest approach to the term which the Constitution contains, is the word current, and that is coupled with the word coin; so that the thing which gentlemen have constantly in their minds, and which they use an equivocal term

to express, exists nowhere in the Constitution, and is not in any way known to that instrument, either by expression, or intendment. I think it right, on this occasion, thus to allude to the equivocal use of this phrase; for upon this equivocation there is built up, in these United States, an immensity of erroneous speaking, erroneous writing, and erroneous legislation. Vast is the number of persons who are mystified by the use of an equivocal term; and in nothing does the rhetorician show the perfection of his art in a higher degree, than in making a debate turn upon one of them.

The Senator from Massachusetts, in taking his objections, declared that he would not do intentional injustice to the Message or to its author; but it is the same thing to the Message, and to the author, if injustice had been done without intention; and this I apprehend to have been the case. The Message says nothing about confining the bankrupt law to corporations and bankers alone; it says nothing about excluding merchants and traders from the operation of the law; and it proposes something else to result from the law, besides an operation upon currency; and that something else is a remedy to the disappointed creditors of the delinquent banks. This is his recommendation:

"In the mean time, it is our duty to provide all the remedies against a depreciated paper currency which the Constitution enables us to afford. The Treasury Department, on several former occasions, has suggested the propriety and importance of a uniform law concerning bankruptcies of corporations and other bankers. Through the instrumentality of such a law, a salutary check may doubtless be imposed on the issues of paper money, and an effectual remedy given to the citizen, in a way at once equal in all parts of the Union, and fully authorized by the Constitution."

This is the recommendation—the whole of it; and here is no proposition to exclude merchants and traders; and here is an actual proposition to give a remedy to the injured citizens against the delinquent banks; which remedy would naturally be a *pro rata* distribution of the effects of the bankrupt institutions. Here, then, is injustice to the Message, in not stating it as it is, but as it is not; and here, also, is injustice to the author, in representing him as opposed to the extension of the bankrupt law to merchants and traders, when the records of this Senate bear the evidence of the fact that he has been one of the most able and zealous supporters of such a law applicable to the trading part of the community. I speak of the bill of 1827, brought in by General Hayne, of South Carolina, and earnestly supported by the present Chief Magistrate, then a member of this body. It is unjust to suppose that the present Chief Magistrate would object to a bill which should include now those for whom he so strenuously contended when a member of this body: there is nothing in life recommendation to deter the friends of a general bankrupt law from coming forward to include the trading class with the banking class; on the contrary, there may be something to encourage them. A general bill to include banks, as well as traders, might combine more support than the bills for the latter class alone have heretofore received. Besides, if the President had expressly recommended the exclusion of other classes from the bill, it would have been no impediment to the action of Congress. His recommendation would have been no prohibition upon their powers. They might have included what classes they pleased; and if they included those for which he contended in 1827, the bill might have become the more acceptable to him on that account.

The Senator from Massachusetts objects to our constitutional power to pass such a bankrupt law as the President recommends, qualifying that recommendation, as he does, with a limitation of the law to bankers and banking corporations, and with a primary view to the regulation of a paper money currency. I have shown that this qualification is an error and a mistake; and in doing that, I have sufficiently answered the Senator's objection; but I choose to go further, and to show not only the constitutional right, but the clear expediency, of passing such an act as the President recommends, whether merchants and traders shall be included in it or not.

The power of Congress to pass bankrupt laws is expressly given in our Constitution, and given without limitation or qualification. It is the fourth in the number of the enumerated powers, and runs

thus: "Congress shall have power—to establish an uniform rule of naturalization, and uniform laws on the subject of bankruptcies throughout the United States." This is a full and clear grant of power. Upon its face it admits of no question, and leaves Congress at full liberty to pass any kind of bankrupt laws they please, limited only by the condition, that whatever laws are passed, they are to be uniform in their operation throughout the United States. Upon the face of our own Constitution there is no question of our right to pass a bankrupt law, limited to banks and bankers; but the Senator from Massachusetts, (Mr. Webster,) and others who have spoken on the same side with him, must carry us to England, and conduct us through the labyrinth of English statute law, and through the chaos of English judicial decisions, to learn what this word bankruptcies, in our Constitution, is intended to signify. In his eye, and they, are true to the habits of the legal profession—those habits which, both in Great Britain and our America, have become a proverbial disqualification for the proper exercise of legislative duties. I know, Mr. President, that it is the fate of our lawyers and judges to have to run to British law books to find out the meaning of the phrases contained in our Constitution; but it is the business of the legislator, and of the statesman, to take a larger view—to consider the difference between the political institutions of the two countries—to ascend to first principles—to know the causes of events—and to judge how far what was suitable and beneficial to one, might be prejudicial and inapplicable to the other. We stand here as legislators and statesmen, not as lawyers and judges; we have a grant of power to execute, not a statute to interpret; and our first duty is to look to that grant, and see what it is; and our next duty is to look over our country, and see whether there is any thing in it which requires the exercise of that grant of power. This is what our President has done, and what we ought to do. He has looked into the Constitution, and seen there an unlimited grant of power to pass uniform laws on the subject of bankruptcies; and he has looked over the United States, and seen what he believes to be fit subjects for the exercise of that power, namely, about a thousand banks in a state of bankruptcy, and no State possessed of authority to act beyond its own limits in remedying the evils of a mischief so vast and so frightful. Seeing these two things—a power to act, and a subject matter requiring action—the President has recommended the action which the Constitution permits, and which the subject requires; but the Senator from Massachusetts has risen in his place, and called upon us to shift our view; to transfer our contemplation—from the Constitution of the United States to the British statute book—from actual bankruptcy among ourselves to historical bankruptcy in England; and to confine our legislation to the characteristics of the English model.

As a general proposition, I lay it down that Congress is not confined, like jurists and judges, to the English statutory definitions, or the *Nisi Prius*, or King's Bench, construction of the phrases known to English legislation, and used in our Constitution. Such a limitation would not only narrow us down to a mere lawyer's view of a subject, but would limit us, in point of time, to English precedents, as they stood at the adoption of our Constitution, in the year 1789. I protest against this absurdity, and contend that we are to use our granted powers according to the circumstances of our own country, and according to the genius of our republican institutions, and according to the progress of events, and the expansion of light and knowledge among ourselves. If not, and if we are to be confined to the "usual objects," and the "usual subjects," and the "usual purposes" of British legislation at the time of the adoption of our Constitution, how could Congress ever make a law in relation to steamboats, or to railroad cars? both of which were unknown to British legislation in 1789, and, therefore, according to the idea that would send us to England to find out the meaning of our Constitution, would not fall within the limits of our legislative authority. Upon their face, the words of the Constitution are sufficient to justify the President's re-

[Continued from No. 8.]

commendation, even as understood by those who impugn that recommendation. The bankrupt clause is very peculiar in its phraseology, and the more strikingly so from its contrast with the phraseology of the naturalization clause which is coupled with it. Mark this difference: there is to be a uniform rule of naturalization; there are to be uniform laws on the subject of bankruptcies. One is in the singular, the other in the plural; one is to be a rule, the other are to be laws; one acts on individuals, the other on the subject; and it is bankruptcies that are, and not bankruptcy that is, to be the objects of these uniform laws.

As a proposition, now limited to this particular case, I lay it down that we are not confined to the modern English acceptance of this term bankrupt; for it is a term, not of English, but of Roman origin. It is a term of the civil law, and borrowed by the English from that code. They borrowed from Italy both the name, and the purpose of the law; and also the first objects to which the law was applicable. The English were borrowers of every thing connected with this code; and it is absurd in us to borrow from a borrower—to copy from a copyist—when we have the original lender, and the original text before us. *Bancus* and *rupus* signifies a broken bank; and the word broken is not metaphorical but literal, and is descriptive of the ancient method of cashing an insolvent, or fraudulent banker, by turning him out of the exchange, or market place, and breaking the table to pieces on which he kept his money and transacted his business. The term bankrupt, then, in the civil law from which the English borrowed it, not only applied to bankers, but was confined to them; and it is preposterous in us to limit ourselves to an English definition of a civil law term.

Upon this exposition of our own Constitution, and of the civil law derivation of this term bankrupt, I submit that the Congress of the United States is not limited to the English judicial or statutory acceptance of the term; and so I finish the first point which I took in the argument. The next point is more comprehensive, and makes a direct issue with the proposition of the Senator from Massachusetts, (Mr. Webster.) His proposition is, that we must confine our bankrupt legislation to the usual objects, the usual subjects, and the usual purposes of bankrupt laws in England; and that currency (meaning paper money, and shin-plasters of course,) and banks, and banking, are not within the scope of that legislation. I take issue, sir, upon all these points, and am ready to go with the Senator to England, and to contest them, one by one, on the evidences of English history, of English statute law, and of English judicial decision. I say English; for, although the Senator did not mention England, yet he could mean nothing else, in his reference to the usual objects, usual subjects, and usual purposes of bankrupt laws. He could mean nothing else. He must mean the English examples, and the English practice, or nothing; and he is not a person to speak, and mean nothing.

Protesting against this voyage across the high seas, I, nevertheless, will make it, and will ask the Senator on what act, out of the scores which Parliament has passed upon this subject, or on what period, out of the five hundred years that she has been legislating upon it, will he fix for his example? or, whether he will choose to view the whole together? and out of the vast chaotic and heterogeneous mass, extract a general power which Parliament possesses, and which he proposes for our exemplar? For myself, I am agreed to consider the question under the whole, or under either of these aspects, and, relying on the goodness of the cause, expect a safe deliverance from the contest, take it in any way.

And first, as to the acts passed upon this subject; great is their number, and most dissimilar their provisions. For the first two hundred years, these acts applied to none but aliens, and a single class of aliens, and only for a single act, that of flying

the realm to avoid their creditors. Then they were made to apply to all debtors, whether natives or foreigners, engaged in trade or not, and took effect for three acts: 1st. Flying the realm; 2d. Keeping the house to avoid creditors; 3d. taking sanctuary in a church to avoid arrest. For upwards of two hundred years—to be precise, for two hundred and twenty years—bankruptcy was only treated criminally, and directed against those who would not face their creditors, or abide the laws of the land; and the remedies against them were not civil, but criminal; it was not a distribution of the effects, but corporal punishment, to wit: imprisonment and outlawry.\* The statute of Elizabeth was the first that confined the law to merchants and traders, took in the unfortunate as well as the criminal, extended the acts of bankruptcy to inability, as well as to disinclination to pay, discriminated between innocent and fraudulent bankruptcy, and gave to creditors the remedial right to a distribution of effects. This statute opened the door to judicial construction, and the judges went to work to define by decisions, who were traders, and what acts constituted the fact, or showed an intent, to delay or to defraud creditors. In making these decisions, the judges reached high enough to get hold of royal companies, and low enough to get hold of shchemakers; the latter upon the ground that they bought the leather out of which they made the shoes; and they even had a most learned consultation to decide whether a man who was a landlord for dogs, and bought dead horses for his four-legged boarders, and then sold the skins and bones of the horse carcasses he had bought, was not a trader within the meaning of the act, and so subject to the statute of bankrupts. These decisions of the judges set the Parliament to work again to preclude judicial constructions by the precision, negatively and affirmatively, of legislative enactment. But, worse and worse! Out of the frying pan into the fire. The more legislation the more construction; the more statutes Parliament made, the more numerous and the more various the judicial decisions; until, besides merchants and traders, near forty other descriptions of persons were included, and the catalogue of bankruptcy acts, innocent or fraudulent, is swelled to a length which requires whole pages to contain it. Among those who are now included by statutory enactment in England, leaving out the great classes comprehended under the names of merchants and traders, are bankers, brokers, factors, and scriveners; insurers against perils by sea and land; warehousemen, wharfingers, packers, builders, carpenters, shipwrights and victuallers; keepers of inns, hotels, taverns and coffee-houses; dyers, printers, bleachers, fullers, calenderers, sellers of cattle or sheep; commission merchants and consignees; and the agents of all these classes. These are the affirmative definitions of the classes liable to bankruptcy in England; then come the negative; and among these are farmers, graziers, and common laborers for hire; the receivers general of the king's taxes, and members or subscribers to any incorporated companies established by charter or act of Parliament. And among these negative and affirmative exclusions and inclusions, there are many classes which have repeatedly changed position, and found themselves successively in and out of the bankrupt code. Now, in all this mass of variant and contradictory legislation, what part of it will the Senator from Massachusetts select for his model? The improved and approved parts, to be sure! But here a barrier presents itself—an impassable wall interposes—a *veto* power intervenes. For it so happens that the improvements in the British bankrupt code, those parts of it which are considered best, and most worthy of our imita-

tion, are of modern origin—the creations of the last fifty years—actually made since the date of our Constitution; and, therefore, not within the pale of its purview and meaning. Yes, sir, made since the establishment of our Constitution, and, therefore, not to be included within its contemplation, unless this doctrine of searching into British statutes for the meaning of our Constitution, is to make us search forwards to the end of the British empire, as well as search backwards to its beginning. Fact is, that the actual bankrupt code of Great Britain—the one that preserves all that is valuable, that consolidates all that is preserved, and improves all that is improvable, is an act of most recent date—of the reign of George the Fourth, and not yet a dozen years old. Here, then, in going back to England for a model, we are cut off from her improvements in the bankrupt code, and confined to take it as it stood under the reign of the Plantagenets, the Stuarts, and the earlier reigns of the Brunswick sovereigns. This should be a consideration, and sufficiently weighty to turn the scale in favor of looking to our own Constitution alone for the extent and circumscription of our powers.

But let us continue this discussion upon principles of British example and British legislation. We must go to England for one of two things; either for a case in point, to be found in some statute, or a general authority, to be extracted from a general practice. Take it either way, or both ways, and I am ready and able to vindicate, upon British precedents, our perfect right to enact a bankrupt law, limited in its application to banks and bankers. And first, for a case in point, that is to say, an English statute of bankruptcy, limited to these lords of the purse-strings: we have it at once, in the first act ever passed on the subject—the act of the 30th year of the reign of Edward the Third, against the Lombard Jews. Every body knows that these Jews were bankers, usually formed into companies, who, issuing from Venice, Milan, and other parts of Italy, spread over the south and west of Europe, during the middle ages, and established themselves in every country and city in which the dawn of reviving civilization, and the germ of returning industry, gave employment to money, and laid the foundation of credit. They came to London as early as the thirteenth century, and gave their name to a street which still retains it, as well as it still retains the particular occupation, and the peculiar reputation, which the Lombard Jews established for it. The first law against bankrupts ever passed in England, was against the banking company composed of these Jews, and confined exclusively to them. It remained in force two hundred years, without an alteration whatever, and was nothing but the application of the law of their own country to these bankers in the country of their sojournment—the Italian law, founded upon the civil law, and called in Italy *banco rotto*, broken bank. It is in direct reference to these Jews, and this application of the exotic bankrupt law to them, that Sir Edward Coke, in his Institutes, takes occasion to say that both the name and the wickedness of bankruptcy were of foreign origin, and had been brought into England from foreign parts. It was enacted under the reign of one of the most glorious of the English princes—a reign as much distinguished for the beneficence of its civil administration as for the splendor of its military achievements. This act of itself is a full answer to the whole objection taken by the Senator from Massachusetts. It shows that, even in England, a bankrupt law has been confined to a single class of persons, and that class a banking company. And here I would be willing to close my speech upon a compromise—a compromise founded in reason and reciprocity, and invested with the equitable mantle of a mutual concession. It is this: if we must follow English precedents, let us follow them chronologically and orderly. Let us begin at the beginning, and take them as they rise. Give me a bankrupt law for

\* Preamble to the act of 34th of HENRY VIII.

"Whereas divers and sundry persons craftily obtained into their hands great substance of other men's goods, do suddenly flee to parts unknown, or keep their houses, not minding to pay or restore to any of their creditors, their debts and duties, but at their own wills and own pleasures consume the substance obtained by credit of other men, for their own pleasures and delicate living, against all reason, equity, and good conscience."

two hundred years against banks and bankers; and, after that, make another for merchants and traders.

The Senator from Massachusetts (Mr. Webster) has emphatically demanded, how the bankrupt power could be fairly exercised by seizing on corporations and bankers, and excluding all the other usual subjects of bankrupt laws? I answer, by following the example of that England to which he has conducted us; by copying the act of the 30th of Edward the Third; by going back to that reign of heroism, patriotism, and wisdom; that reign in which the monarch acquired as much glory from his domestic policy as from his foreign conquests; that reign in which the acquisition of dyers and weavers from Flanders, the observance of law and justice, and the encouragement given to agriculture and manufactures, conferred more benefit upon the kingdom, and more glory upon the king, than the splendid victories of Poitiers, Agincourt, and Cressy.

But the Senator may not be willing to yield to this example—this case in point—drawn from his own fountain, and precisely up to the exigency of the occasion. He may want something more, and he shall have it. I will now take the question upon its broadest bottom, and fullest merits. I will go to the question of general power—the point of general authority—exemplified by the general practice of the British Parliament, for five hundred years, over the whole subject of bankruptcy. I will try the question upon this basis; and here I lay down the proposition, that this five hundred years of parliamentary legislation on bankruptcy, establishes the point of full authority in the British Parliament to act as it pleased on the entire subject of bankruptcies. This is my proposition; and when it is proved, I shall claim from those who carry me to England for authority, the same amount of power over the subject which the British Parliament has been in the habit of exercising. Now, what is the extent of that power? Happily for me, I, who have to speak, without any inclination for the task—still more happily for those who have to hear me, peradventure without profit or pleasure—happily for both parties, my proposition is already proved, partly by what I have previously advanced, and fully by what every Senator knows. I have already shown the practice of Parliament upon this subject—that it has altered and changed—contracted and enlarged—put in and left out—abolished and created, precisely as it pleased. I have already shown, in my rapid view of English legislation on this subject, that the Parliament exercised plenary power, and unlimited authority, over every branch of the bankrupt question; that it confined the action of the bankrupt laws to a single class of persons, or extended it to many classes; that it was sometimes confined to foreigners, then applied to natives, and that now it comprehends natives, aliens, denizens and women; that at one time all debtors were subject to it; then none but merchants and traders; and now, besides merchants and traders, a long list of persons who have nothing to do with trade; that at one time bankruptcy was treated criminally, and its object punished corporeally, while now it is a remedial measure for the benefit of the creditors, and the relief of unfortunate debtors; and that the acts of the debtor which may constitute him a bankrupt, have been enlarged from three or four glaring misdeeds, to so long a catalogue of actions, divided into the heads of innocent and fraudulent—constructive and positive—intentional and unintentional—voluntary and forced—that none but an attorney, with book in hand, can pretend to enumerate them. All this has been shown; and, from all this, it is incontestable that Parliament can do just what it pleases on the subject; and, therefore, our Congress, if referred to England for its powers, can do just what it pleases also. And thus, whether we go by the words of our own Constitution, or by a particular example in England, or deduce a general authority from the general practice of that country, the result is still the same: we have authority to limit, if we please, our bankrupt law to the single class of banks and bankers.

The Senator from Massachusetts (Mr. Webster)

demands whether bankrupt laws ordinarily extend to corporations, meaning moneyed corporations. I am free to answer that, in point of fact, they do not. But why? because they ought not? or because these corporations have yet been powerful enough, or fortunate enough, to keep their necks out of that noose? Certainly the latter. It is the power of these moneyed corporations in England, and their good fortune in our America, which, enabling them to grasp all advantages on one hand, and to repulse all penalties on the other, has enabled them to obtain express statutory exemption from bankrupt liabilities in England, and to escape, thus far, from similar liabilities in the United States. This, sir, is history, and not invective; it is fact, and not assertion; and I will speedily refresh the Senator's memory, and bring him to recollect why it is, in point of fact, that bankrupt laws do not usually extend to these corporations. And, first, let us look to England, that great exemplar whose evil examples we are so prompt, whose good ones we are so slow, to imitate. How stands this question of corporation unliability there? By the judicial construction of the statute of Elizabeth, the partners in all incorporated companies were held subject to the bankrupt law; and under this construction, a commission of bankrupt was issued against Sir John Wolstenholme, a gentleman of large fortune, who had advanced a sum of money on an adventure in the East India Company's trade. The issue of this commission was affirmed by the Court of King's Bench; but this happened to take place in the reign of Charles the Second—that reign during which so little is found worthy of imitation in the government of Great Britain—and immediately two acts of Parliament were passed, one to annul the judgment of the Court of King's Bench in the case of Sir John Wolstenholme, and the other to prevent any such judgments from being given in future. Here are copies of the two acts:

*First act, to annul the judgment.*

"Whereas, a verdict and judgment was had in the Easter Term of the Kings Bench, whereby Sir John Wolstenholme knight, and adventurer in the East India company, was found liable to a commission of bankrupt, only for, and by reason of, a share which he had in the joint stock of said company: Now, &c. Be it enacted, that the said judgment be reversed, annulled, vacated, and for nought held." &c.

*Second act, to prevent such judgments in future.*

"That whereas divers noblemen and gentlemen, and persons of quality no ways bred up to trade, do often put in great stocks of money into the East India and Guinea company: Be it enacted, that no persons adventurers for putting in money or merchandise into the said companies, or for venturing or managing the fishing trade, called the royal fishing trade, shall be reputed or taken to be a merchant or trader within any statutes for bankrupts."

Thus, and for these reasons, were chartered companies and their members exempted from the bankrupt penalties under the dissolute reign of Charles the Second. It was not the power of the corporations at that time—for the Bank of England was not then chartered, and the East India Company had not then conquered India—which occasioned this exemption; but it was to favor the dignified characters who engaged in the trade—noblemen, gentlemen, and persons of quality. But afterwards, when the Bank of England had become almost the Government of England, and when the East India Company had acquired the dominions of the Great Mogul, an act of Parliament expressly declared that no member of any incorporated company, chartered by act of Parliament, should be liable to become bankrupt. This act was passed in the reign of George the Fourth, when the Wellington ministry was in power, and when liberal principles and human rights were at the last gasp. So much for these corporation exemptions in England; and if the Senator from Massachusetts finds any thing in such instances worthy of imitation, let him stand forth and proclaim it.

But, sir, I am not yet done with my answer to this question, do such laws ordinarily extend to corporations at all? I answer, most decidedly, that they do! that they apply in England to all the corporations, except these specially excepted by the act of George the Fourth; and these are few in number, though great in power; powerful, but few—nothing but units to myriads, compared to those which are not excepted. The words of that act are: "Member of, or subscriber to any incorporated commercial, or trading companies, established by charter act of Parliament." These words cut off at

once the many ten thousand corporations in the British empire existing by prescription, or incorporated by letters patent from the King; and then they cut off all those even chartered by act of Parliament, which are not commercial, or trading in their nature. This saves but a few out of the hundreds of thousands of corporations which abound in England, Scotland, Wales, and Ireland. It saves, or rather confirms, the exemption of the Bank of England, which is a trader in money, and it confirms; also, the exemption of the East India Company, which is, in contemplation of law at least, a commercial company; and it saves or exempts a few others deriving charters of incorporation from Parliament; but it leaves subject to the law the whole wilderness of corporations, of which there are thousands in London alone, which derive from prescription, or letters patent; and it also leaves subject to the same laws all the corporations created by charter act of Parliament, which are not commercial or trading. The words of the act are very peculiar; "charter act of Parliament;" so that corporations by a general law, without a special charter act, are not included in the exemption. This answer, added to what has been previously said, must be a sufficient reply to the Senator's question, whether bankrupt laws ordinarily extend to corporations? Sir, out of the myriad of corporations in Great Britain, the bankrupt law extends to the whole, except some half dozen, or dozen.

So much for the exemption of these corporations in England; now for our America. We never had but one bankrupt law in the United States, and that for the short period of three or four years. It was passed under the administration of the elder Mr. Adams, and repealed under Mr. Jefferson. It copied the English acts in including among the subjects of bankruptcy, bankers, brokers, and factors. Corporations were not included; and it is probable that no question was raised about them, as, up to that time, their number was few, and their conduct generally good. But, at a later date, the enactment of a bankrupt law was again attempted in our Congress; and, at that period, the multiplication and the misconduct of banks presented them to the minds of many as proper subjects for the application of the law: I speak of the bill of 1827, brought into the Senate, and lost. That bill, like all previous laws since the time of George II, was made applicable to bankers, brokers, and factors. A Senator from North Carolina (Mr. Branch) moved to include banking corporations. The motion was lost, there being but twelve votes for it; but in this twelve there were some whose names must carry weight to any cause to which they are attached. The twelve were, Messrs. Barton, Benton, Branch, Cobb, Dickerson, Hendricks, Macon, Noble, Randolph, Reed, Smith of South Carolina, and White. The whole of the friends of the bill, twenty-one in number, voted against the proposition, (the present Chief Magistrate in the number,) and for the obvious reason, with some, of not encumbering the measure they were so anxious to carry, by putting into it a new and untried provision. And thus stands our own legislation on this subject. In point of fact, then, chartered corporations have thus far escaped bankrupt penalties, both in England, and in our America; but ought they to continue to escape? This is the question—this the true and important inquiry, which is now to occupy the public mind.

The Senator from Massachusetts (Mr. Webster) says the object of bankrupt laws has no relation to currency; that their object is simply to distribute the effects of insolvent debtors among their creditors. So says the Senator, but what says history? What says the practice of Great Britain? I will show you what it says, and for that purpose will read a passage from McCulloch's notes on Smith's Wealth of Nations. He says:

"In 1814—15—and '16, no fewer than 240 country banks stopped payments, and ninety-two commissions of bankruptcy were issued against these establishments, being at the rate of one commission against every seven and a half of the total number of country banks existing in 1813."

Two hundred and forty stopped payment at one dash, and ninety-two subjected to commissions of

bankruptcy. They were not, indeed chartered banks, for there are none such in England, except the Bank of England; but they were legalized establishments, existing under the first joint stock bank act of 1708, and they were banks of issue. Yet they were subjected to the bankrupt laws, ninety-two of them in a single season of bank catalepsy; their broken "*promises to pay*" were taken out of circulation; their doors closed; their directors and officers turned out; their whole effects, real and personal, their money, debts, books, papers, and every thing, put into the hands of assignees; and to these assignees, the holders of their notes forwarded their demands, and were paid, every one in equal proportion—as the debts of the bank were collected, and its effects converted into money; and this without expense or trouble to any one of them. Ninety-two banks in England shared this fate in a single season of bank mortality; five hundred more could be enumerated in other seasons, many of them superior in real capital, credit, and circulation to our famous chartered banks, most of which are banks of moonshine, built upon each others paper, and the whole ready to fly sky-high the moment any one of the concern becomes sufficiently inflated to burst. The immediate effect of this application of the bankrupt laws to banks in England, is twofold; first, to save the general currency from depreciation, by stopping the issue and circulation of irredeemable notes; secondly, to do equal justice to all creditors, high and low, rich and poor, present and absent, the widow and the orphan as well as the cunning and the powerful, by distributing their effects in proportionate amounts to all who hold demands. This is the operation of bankrupt laws upon banks in England, and all over the British empire; and it happens to be the precise check upon the issue of broken bank paper, and the precise remedy for the injured holders of their dishonored paper, which the President recommends. Here is his recommendation: listen to it:

"In the mean time, it is our duty to provide all the remedies against a depreciated paper currency which the Constitution enables us to afford. The Treasury Department, on several former occasions, has suggested the propriety and importance of a uniform law concerning bankruptcies of corporations and other banks. Through the instrumentality of such a law, a salutary check may doubtless be imposed on the issues of paper money, and an effectual remedy given to the citizen, in a way at once equal in all parts of the Union, and fully authorized by the Constitution."

The Senator from Massachusetts says he would not, intentionally, do injustice to the Message or its author; and doubtless he is not conscious of violating that benevolent determination; but here is injustice, both to the Message and to its author; injustice in not quoting the Message as it is, and showing that it proposes a remedy to the citizen, as well as a check upon insolvent issues; injustice to the author in denying that the object of bankrupt laws has any relation to currency, when history shows that these laws are the actual instrument for regulating and purifying the whole local paper currency of the entire British empire, and saving that country from the frauds, losses, impositions, and demoralization of an irredeemable paper money.

The Senator from Massachusetts says the object of bankrupt laws has no relation to currency. If he means hard money currency, I agree with him; but if he means bank notes, as I am sure he does, then I point him to the British bankrupt code, which applies to every bank of issue in the British empire, except the Bank of England itself, and the few others, four or five in number, which are incorporated by charter acts. All the joint stock banks, all the private banks, all the bankers of England, Scotland, Wales, and Ireland, are subject to the law of bankruptcy. Many of these establishments are of great capital and credit; some having hundreds, or even thousands of partners; and many of them having ten, or twenty, or thirty, and some even forty branches. They are almost the exclusive furnishers of the local and common bank note currency; the Bank of England notes being chiefly used in the great cities for large mercantile and Government payments. These joint stock banks, private companies, and individual bankers are, practically, in the British empire what the local banks are in the United States. They perform the same functions, and differ in name only; not in substance, nor in conduct. They

have no charters, but they have a legalized existence; they are not corporations, but they are allowed by law to act in a body; they furnish the actual paper currency of the great body of the people of the British empire, as much so as our local banks furnish the mass of paper currency to the people of the United States. They have had twenty-four millions sterling, one hundred and twenty millions of dollars, in circulation at one time; a sum nearly equal to the greatest issue ever known in the United States, and more than equal to the whole bank note circulation of the present day. They are all subject to the law of bankruptcy, and their twenty-four millions sterling of currency along with them; and five hundred of them have been shut up and wound up under commissions of bankruptcy in the last forty years; and yet the Senator from Massachusetts informs us that the object of bankrupt laws has no relation to currency!

But it is not necessary to go all the way to England to find bankrupt laws having relation to currency. The act passed in our own country, about forty years ago, applied to bankers; the bill brought into the House of Representatives about fifteen years ago by a gentleman then, and now, a representative from the city of Philadelphia, (Mr. Sergeant,) also applied to bankers; and the bill brought into this Senate ten years ago by a Senator from South Carolina, not now a member of this body (General Hayne) still applied to bankers. These bankers, of whom there were many in the United States, and of whom Girard in the East, and Yeatman and Woods in the West, were the most considerable—these bankers all issued paper money; they all issued currency. The act, then, of 1798, if it had continued in force, or the two bills just referred to, if they had become law, would have operated upon these bankers and their banks—would have stopped their issues, and put their establishments into the hands of assignees, and distributed their effects among their creditors. This, certainly, would have been having some relation to currency: so that, even with our limited essays towards a bankrupt system, we have scaled the outworks of the banking empire; we have laid hold of bankers, but not of banks; we have reached the bank of Girard, but not the Girard bank; we have applied our law to the bank of Yeatman and Woods, but not to the rabble of petty corporations which have not the title of their capital and credit. We have gone as far as bankers, but not as far as banks; and now give me a reason for the difference. Give me a reason why the act of 1798, the bill of Mr. Sergeant in 1821, and the bill of Gen. Hayne in 1827, should not include banks as well as bankers. They both perform the same function—that of issuing paper currency. They both involve the same mischief when they stop payment—that of afflicting the country with a circulation of irredeemable and depreciated paper money. They are both culpable in the same mode, and in the same degree; for they are both violators of their "*promises to pay*." They both exact a general credit from the community, and they both abuse that credit. They both have creditors and they both have effects; and these creditors have as much right to a *pro rata* distribution of the effects in one case as in the other. Why, then, a distinction in favor of the bank? Is it because corporate bodies are superior to natural bodies? Because artificial beings are superior to natural beings? or, rather, is it not because corporations are assemblages of men, and assemblages are more powerful than single men; and, therefore, these corporations, in addition to all their vast privileges, are also to have the privilege of being bankrupt, and afflicting the country with the evils of bankruptcy, without themselves being subjected to the laws of bankruptcy? Be this as it may—be the cause what it will—the decree has gone forth for the decision of the question—for the trial of the issue—for the verdict and judgment upon the claim of the banks. They have many privileges and exemptions now, and they have the benefit of all laws against the community. They pay no taxes; the property of the stockholders is not liable for their debts; they sue their debtors, sell their property, and put their bodies in jail. They

have the privilege of stamping paper money; the privilege of taking interest upon double, treble, and quadruple their actual money. They put up and put down the price of property, labor, and produce as they please. They have the monopoly of making the actual currency. They are strong enough to suppress the constitutional money, and to force their own paper upon the community, and then to redeem it or not as they please. And is it to be tolerated, that, in addition to all these privileges, and all these powers, they are to be exempted from the laws of bankruptcy? the only law of which they are afraid, and the only one which can protect the country against their insolvent issues, and give a fair chance for payment to the numerous holders of their violated "*promises to pay*."

I have discussed, Mr. President, the right of Congress to apply a bankrupt law to banking corporations; I have discussed it on the words of our own Constitution, on the practice of England, and on the general authority of Parliament, and on each, and every ground, as I fully believe, vindicated our right to pass the law. The right is clear; the expediency is manifest and glaring. Of all the objects upon the earth, banks of circulation are the fittest subjects of bankrupt laws. They act in secret, and they exact a general credit. Nobody knows their means, yet every body must trust them. They send their "*promises to pay*" far and near. They push them into every body's hands; they make them small to go into small hands—into the hands of the laborer, the widow, the helpless, the ignorant. Suddenly the bank stops payment; all these helpless holders of their notes are without pay, and without remedy. A few on the spot get a little; those at a distance get nothing. For each to sue, is a vexatious and a losing business. The only adequate remedy—the only one that promises any justice to the body of the community, and the helpless holders of small notes, is the bankrupt remedy of assignees to distribute the effects. This makes the real effects available. When a bank stops, it has little or no specie, but it has, or ought to have, a good mass of solvent debts. At present, all these debts are unavailable to the community—they go to a few large and favored creditors; and those who are most in need get nothing. But a stronger view remains to be taken of these debts: the mass of them are due from the owners and managers of the banks—from the presidents, directors, cashiers, stockholders, attorneys; and these people do not make themselves pay. They do not sue themselves, nor protest themselves. They sue and protest others, and sell out their property, and put their bodies in jail; but, as for themselves, who are the main debtors, it is another affair! They take their time, and usually wait till the notes are heavily depreciated, and then square off, with a few cents in the dollar! a commission of bankruptcy is the remedy for this evil; assignees of the effects of the bank, are the persons to make these owners, and managers, and chief debtors to the institutions, pay up. Under the bankrupt law, every holder of a note, no matter how small in amount, nor how distant the holder may reside, on forwarding the note to the assignees, will receive his rateable proportion of the bank's effects, without expense, and without trouble to himself. It is a most potent, a most proper, and most constitutional remedy against delinquent banks. It is an able and a brave remedy. It does honor to the President who recommended it, and is worthy of the successor of Jackson.

Senators upon this floor have ventured the expression of an opinion that there can be no resumption of specie payments in this country until a national bank shall be established, meaning, all the while, until the present mis-called Bank of the United States shall be rechartered. Such an opinion is humiliating to this Government, and a reproach upon the memory of its founders. It is tantamount to a declaration that the Government, framed by the heroes and sages of the Revolution, is incapable of self preservation; that it is a miserable image of imbecility, and must take refuge in the embraces of a moneyed corporation to enable it to survive its infirmities. The humiliation of such a thought should expel it from the imagination of every patriotic mind. Nothing but a dire

necessity, a last, a sole, an only alternative,—should bring this Government to the thought of leaning upon any extraneous aid. But here is no necessity, no reason, no pretext, no excuse, no apology, for resorting to collateral aid, and, above all, to the aid of a master in the shape of a national bank. The granted powers of the Government are adequate to the coercion of all the banks. As banks, the Federal Government has no direct authority over them; but, as bankrupts, it has them in its own hands. It can pass bankrupt laws for these delinquent institutions. It can pass such laws either with or without including merchants and traders; and the day for such law to take effect, will be the day for the resumption of specie payments by every solvent bank, and the day for the extinction of the abused privileges of every insolvent one. So far from requiring the impotent aid of the miscalled Bank of the United States to effect a resumption, that institution will be unable to prevent a resumption. Its *velo* power over other banks will cease; and it will itself be compelled to resume specie payment, or die!

Senators have referred to this bank as the regulator of paper currency and of exchanges. Events have shown that it has no power upon these points but to make bad worse; to ruin paper currency by expansions, and by exporting specie; and to derange exchanges by flying kite-bills across the continent, and over the high seas. This is what experience has shown; but the whole conception is an afterthought! It is an *ex post facto* conception. Look to General Hamilton's reasons for the establishment of a national bank in 1791; look to all the debates of Congress at the charter of the first bank; you will not find one word upon the subject of regulating currency and exchanges. These modern conceptions, now so hackneyed in the use, and so flippantly discoursed on, and so conspicuous in the political debates of the haberdashers' shops, were unknown to the authors of the first bank! It was not until that institution, and still more its successor, had ruined currency and deranged exchanges, that these new-fangled reasons were thought of. It was only after it had done the mischief that the DESTROYER was appealed to as a REGULATOR; an appeal which can only be entertained on the principle of the proverb, that the hair of the dog is good for the bite. On that principle I could go for the appeal myself; for the meaning of the proverb is—not what is superficially believed by some, that you are to pull a few hairs out of the dog's back, and lay them on the bitten part—but that you must take all his hair, kill him, and skin him, and sell his hide to the tanner, and then he will never bite you again. In this sense of the appeal, I should be willing to have recourse to the Bank of the United States to cure the mischiefs of which it is the author.

Senators have demanded, somewhat in the tone of victory and exultation, where is this gold currency of which the promise was held out three years ago? They have put this question with an air of triumph! Has it not occurred to these Senators to extend the inquiry to the silver currency, and to the copper currency also? The same answer will meet the whole inquiry; and that answer is this: That the edict of the bank oligarchy has suppressed it since May last! suppressed it in that memorable act of suspension which was celebrated as a political victory over the Government of the country, and hailed as the restoration of the bank, and of the federal dynasty, to power. That edict suppressed all hard money—suppressed it—gold, silver, and copper; and breathed into existence that pestilential compound of lampblack and rags, yclept shinplasters, which now infests the land. Yes, sir, the oligarchy of banks, the present masters of our America, suppressed the gold, and the silver, and the copper; and they will suppress it again, and again, and as often as it suits their politics, or their purses, to do so, until this bankrupt law is passed, or until ruin provokes remedy.

Besides these great objects to be attained by the application of a bankrupt law to banking corporations, there are other great purposes to be accomplished, and some most sacred duties to be fulfilled, by the same means. Our Constitution contains three most vital prohibitions, of which the Federal

Government is the guardian and the guaranty, and which are now publicly trodden under foot. No State shall emit bills of credit; no State shall make any thing but gold and silver coin a tender in payment of debts; no State shall pass any law impairing the obligation of contracts. No State shall do these things. So says the Constitution under which we live, and which it is the duty of every citizen to protect, preserve, and defend. But a new power has sprung up among us, and has annulled the whole of these prohibitions. That new power is the oligarchy of banks. It has filled the whole land with bills of credit; for it is admitted on all hands that bank notes, not convertible into specie, are bills of credit. It has suppressed the constitutional currency, and made depreciated paper money a forced tender in payment of every debt. It has violated all its own contracts, and compelled all individuals, and the Federal Government and State Governments, to violate theirs, and has obtained from sovereign States an express sanction, or a silent acquiescence, in this double violation of sacred obligations, and in this triple annulment of constitutional prohibitions. It is our duty to bring, or to try to bring, this new power under subordination to the laws and the Government. It is our duty to go to the succor of the Constitution—to rescue, if possible, these prohibitions from daily, and public, and permanent infraction. The application of the bankrupt law to this new power, is the way to effect this rescue—the way to cause these vital prohibitions to be respected and observed, and to do it in a way to prevent collisions between the States and the Federal Government. The prohibitions are upon the States; it is they who are not to do these things, and, of course, are not to authorize others to do what they can not do themselves. The banks are their delegates in this three-fold violation of the Constitution; and, in proceeding against these delegates, we avoid collision with the States.

Mr. President, every form of government has something in it to excite the pride, and to rouse the devotion, of its citizens. In monarchies, it is the authority of the King; in republics, it is the sanctity of the laws. The loyal subject makes it the point of honor to obey the king; the patriot republican makes it his glory to obey the laws. We are a republic. We have had illustrious citizens, conquering generals, and victorious armies; but no citizen, no general, no army, has undertaken to dethrone the laws, and to reign in their stead. This partrical world has been reserved for an oligarchy of banks! Three times, in thrice seven years, this oligarchy has dethroned the law, and reigned in its place. Since May last, it has held the sovereign sway, and has not yet vouchsafed to indicate the day of its voluntary abdication. The Roman military dictators usually fixed a term to their dictatorships. I speak of the usurpers; not of the constitutional dictators for ten days. These usurpers usually indicated a time at which usurpation should cease; and law and order again prevail. Not so with this new power which now lords it over our America. They fix no day; they limit no time; they indicate no period for their voluntary descent from power, and for their voluntary return to submission to the laws. They could agree in the twinkling of an eye—at the drop of a hat—at the crook of a finger—to usurp the sovereign power; they can not agree, in four months, to relinquish it. They profess to be willing, but can not agree upon the time. Let us perform that service for them. Let us name a day. Let us fix it in a bankrupt law. Let us pass that law, and fix a day for it to take effect; and that day will be the day for the resumption of specie payments, or for the trial of the question of permanent supremacy between the oligarchy of banks, and the constitutional Government of the people.

We are called upon to have mercy upon the banks; the prayer should rather be to them, to have mercy upon the Government and the people. Since May last the ex-deposit banks alone have forced twenty-five millions of depreciated paper through the Federal Government upon its debtors and the States, at a loss of at least two and a half millions to the receivers, and a gain of an equal amount to the payers. The thousand banks have the country

and, the Government under their feet at this moment, owing to the community upwards of an hundred millions of dollars, of which they will pay nothing, not even ninepences, picayunes, and coppers. Metaphorically, if not literally, they give their creditors more kicks than coppers. It is for them to have mercy on us. But what is the conduct of Government towards these banks? Even at this session, with all their past conduct unatoned for, we have passed a relief bill for their benefit—a bill to defer the collection of the large balance which they still owe the Government. But there is mercy due in another quarter—upon the people, suffering from the use of irredeemable and depreciated paper—upon the Government, reduced to bankruptcy—upon the character of the country, suffering in the eyes of Europe—upon the character of republican government, brought into question by the successful usurpation of these institutions. This last point is the sorest. Gentlemen speak of the failure of experiments—the failure of the specie experiment, as it is called by those who believe that paper is the ancient and universal money of the world; and that the use of a little specie for the first time is now to be attempted. They dwell upon the supposed failure of “the experiment;” while all the monarchists of Europe are rejoicing in the failure of the experiment of republican government, at seeing this Government, the last hope of the liberal world, struck and paralyzed by an oligarchy of banks—seized by the throat, throttled and held as a tiger would hold a babe—stripped of its revenues, bankrupted, and subjected to the degradation of becoming their engine to force their depreciated paper upon helpless creditors. Here is the place for mercy—upon the people—upon the Government—upon the character of the country—upon the character of republican Government.

The apostle of republicanism, Mr. Jefferson, has left it as a political legacy to the people of the United States, never to suffer their Government to fall under the control of any unauthorized, irresponsible, or self-created institutions or bodies whatsoever. His allusion was to the Bank of the United States, and its notorious machinations to govern the elections, and get command of the Government; but his admonition applies with equal force to all other similar or affiliated institutions; and since May last, it applies to the whole league of banks which then “*shut up the Treasury*,” and reduced the Government to helpless dependence.

It is said that bankruptcy is a severe remedy to apply to banks; it may be answered that it is not more severe here than in England, where it applies to all banks of issue, except the Bank of England and a few others; and it is not more severe to them than it is to merchants and traders, and to bankers and brokers, and all unincorporated banks. Personally, I was disposed to make large allowances for the conduct of the banks. Our own improvidence tempted them into an expansion of near forty millions, in 1835 and 1836, by giving them the national domain to bank upon; a temptation which they had not fortitude to resist, and which expanded them to near the bursting point. Then they were driven almost to a choice of bankruptcy between themselves and their debtors, by the act which required near forty millions to be distributed in masses, and at brief intervals among the States. Some failures were inevitable under these circumstances, and I was disposed to make liberal allowances for them; but there are three things for which the banks have no excuse, and which should for ever weigh against their claims to favor and confidence. These things are, *first*, the political aspect which the general suspension of payment was permitted to assume, and which it still wears; *secondly*, the issue and use of shin-plasters, and refusal to pay silver change, when there are eighty millions of specie in the country; *thirdly*, the refusal, by the deposit banks, to pay out the sums which had been severed from the Treasury, and stood in the names of disbursing officers, and was actually due to those who were performing work and labor, and rendering daily services to the Government. For these three things, there is no excuse; and, while memory retains their recollection, there can be no confidence in those who have done them.

The Committee on the Judiciary, to whom was

referred the consideration of the President's recommendation for a bankrupt law against banking institutions, have deferred their report, and moved to be discharged. I shall make no objection to the discharge, as legislation on this subject can be delayed, without material prejudice to any interest, until the regular session. I shall look for a bill then, either, with or without the inclusion of other classes; and shall consider the decision upon that bill as settling the question of the rights of the people, and the supremacy of their Government, on one hand, and of the pretensions of the banks, and their permanent supremacy over laws, Governments, Constitutions, and the people, on the other.

Mr. CRITTENDEN followed Mr. BENTON in a speech of some length.

Mr. WHITE offered a resolution instituting inquiries in relation to the commissioners under the treaty of 1830 with the Choctaw Indians.

Mr. SOUTHARD introduced a resolution calling upon the War Department to furnish certain information in relation to the treaty of 1835 with the Cherokee Indians.

Mr. WALL introduced a resolution inquiring into the expediency of increasing the number of bills and documents to be printed for the use of the Senate.

The bill "to authorize the deposit of merchandise in public stores, and for other purposes," was read a third time and passed.

The bill to revoke the charters of certain banks in the District of Columbia, was read a third time and passed.

At the suggestion of Mr. WRIGHT, the title of the bill was altered so as to read: "A bill to restrain the issuing of small notes in the District of Columbia."

[This bill was published in our paper of yesterday.]

A bill for the relief of Mrs. Madison was also passed.

On motion of Mr. SMITH of Indiana, The Senate then went into Executive business, and then adjourned.

## HOUSE OF REPRESENTATIVES,

THURSDAY, October 12, 1837.

On motion of Mr. EVERETT, a communication from the Secretary of the Treasury in relation to the claim of Stockton and Stokes was ordered to be printed.

On motion of Mr. WHITTLESEY, the Committee of Claims obtained leave to sit during the sessions of the house.

Mr. GARLAND, of Va. on leave, submitted the following resolution, which was considered and adopted.

*Resolved*, That the Secretary of the Treasury communicate to this House, as early in the next session as practicable, the names of all receivers, collectors, or depositors of the public money who are in default to the Government, the amount of such default, the length of time due, the security given, if any, and how much has been or will likely be lost, together with a copy of all correspondence upon the subject from the 1st day of January, 1834, to this time.

### INQUIRY IN RELATION TO THE FLORIDA WAR.

The House then proceeded to the unfinished business of the morning hour, which was the consideration of the following resolution, submitted by Mr. WISE on the 19th of September:

*Resolved*, That a select committee be appointed by ballot to inquire into the causes of the Florida war, and into the causes of the delays and failures, and the expenditures which have attended the prosecution of that war, and into the manner of its conduct, and the facts of its history generally; that the said committee have power to send for persons and papers, and that it have power to sit in the recess, and that it make report to the next session of Congress.

Mr. GLASCOCK had moved to amend the foregoing resolution, by striking out all after the word "resolved," and insert the following:

"That a select committee be appointed to inquire into the cause of the Florida war, and the causes of the extraordinary delays and failures, and the expenditures which have attended the prosecution of

the same, and all the facts connected with its history generally; and that said committee have power to send for persons and papers."

The question immediately pending, was the motion of Mr. HOWARD to strike out the words "that a select committee be appointed," and insert "that the Committee on Military Affairs be instructed."

Mr. McKAY made some explanations in relation to the remarks he had made on yesterday.

Mr. ADAMS supported the resolution, and contended that neither the Committee on Indian Affairs, nor the Committee on Military Affairs, were appropriate committees to whom to refer this subject. He next replied to the remarks of Mr. McKAY in relation to the composition of the committees of the House, and went into a lengthy detail to show how the Committee on Manufactures, of which he was chairman, had been made up for several years past. He opposed the motion to postpone, because the committee should have all the time which could be given them on this important inquiry.

Mr. WILLIAMS of North Carolina called for the yeas and nays, on the motion to postpone, which were ordered.

Mr. BOND then went into a recital of the various appropriations made by Congress, to show that there had been expended in the Florida war upwards of ten millions of dollars.

Mr. McKAY said the gentleman was mistaken. A great part of these appropriations were for other purposes, and not for the service in Florida. The expenditures in Florida, according to an estimate he had made, did not exceed seven millions of dollars. He insisted upon the propriety of his motion to postpone, so that, at the commencement of the next session, one branch of the inquiry might be sent to the Committee on Indian Affairs, another to the Committee on Military Affairs, and the matter of expenditures might be investigated by the Committee on the Expenditures of the War Department.

Mr. REED insisted that an investigation should be had by a select committee, as the subject was one of the greatest magnitude, and well worthy the attention of the Congress of the United States.

Mr. WHITTLESEY thought this discussion would have one good effect; namely, to make the committees on the expenditures of the different Executive Departments do their duties. It was the duty of these committees to inquire whether any improper expenditures were made, and suggest such retrenchments as were proper; yet with one exception, that of the Committee on the Expenditures of the State Department, these committees had for years neglected to perform their duties. This he considered improper, and hoped it might be corrected.

Mr. A. H. SHEPHERD regretted that his colleague, who was known to be a reformer at heart, had thrown any obstructions in the way of this inquiry. He then went on to detail the proceedings of the Committee on the Expenditures, of which he was chairman.

On motion of Mr. CAMBRELENG, the House then resolved itself into a Committee of the Whole on the state of the Union, Mr. SMITH in the chair.

Mr. GARLAND of Louisiana moved to take up the bill granting indulgence to the deposit banks: lost.

### DIVORCE BANKS BILL.

The committee then resumed the consideration of the "bill imposing additional duties, as depositors in certain cases, on public officers."

The question pending was the substitute submitted some time since by Mr. GARLAND of Virginia.

Mr. HAYNES, who was entitled to the floor, addressed the committee as follows:

Mr. CHAIRMAN: At an early stage of this discussion, while the Committee of the Whole on the state of the Union was engaged in the consideration of the bill to postpone the fourth instalment of deposit with the States, so extraordinary were some of the statements of fact, inferences, and arguments presented by some gentlemen who took part in it, more especially the remarks made by my honorable friend from South Carolina, (Mr. Thompson,) that nothing but the position occupied by me could have prevented my endeavoring to offer an im-

mediate reply. That honorable gentleman, in his zeal to throw upon the late and present administrations the burden of the present difficulties and embarrassments of this country, was pleased to institute a comparison between the course pursued by the monarchies of Great Britain and France, in periods of commercial distress in those countries, for the purpose of contrasting their paternal solicitude for their subjects, and the grievous oppression of the American Government towards its citizens. Among the extraordinary statements sometimes ventured in this House, I was not prepared to hear an honorable gentleman speak in terms of eulogy of the conduct of the French Government in the memorable explosion which terminated the Mississippi bubble. The honorable gentleman from South Carolina surely has not lately revived his historical recollections, or he would have held very different language in reference to the conduct of the French Government at the period to which he referred.

What, Mr. Chairman, is the history of the Mississippi bubble? A foreign adventurer established a bank in Paris in the year 1716 or 17, which, having been managed to apparent advantage for a few months, was purchased in the name of the King in the course of the following year. Banking was then a novelty in France, and the scheme seemed to work so successfully, that an emission of paper sufficient to redeem the public debt was issued shortly after the bank became the property of the King. It would be a waste of time to recapitulate the measures which were adopted to enable this bank to monopolize the whole external commerce of France. By what means it is unnecessary to inquire, the shares, originally of the value of 500 livres, were raised by a series of speculations, to the enormous advance of 10,000. The Government having become alarmed by the wild and reckless spirit of speculation produced by an immense issue of bank notes without a specie fund for their redemption, and fearing there might be a run upon the bank, issued an edict, under severe penalties, that no individual should have in his possession, in coin, more than the sum of five hundred livres. To aid the bank in sustaining its credit, the livre, in coin, was reduced or debased to one-half its original value; and to cover the difference between the livre in coin and the livre in paper, the latter was made to undergo such successive reductions in value as should, in the course of a few months, bring it down to the standard of the debased coin of that denomination. All would not do to sustain the credit of the bank, and in the course of three or four years from its establishment, having added the enormous sum of four or five hundred millions of dollars of irredeemable paper, the notable scheme was wound up by issuing an edict reducing the price of shares to 5000 livres; which was shortly followed by another, compelling its holders to fund the bills for the miserable pittance of an annuity for fifty years' purchase, and that, so far as I can ascertain, without interest. This, sir, is a statement of what the honorable gentleman from South Carolina has been pleased to eulogize, as showing the paternal care of the French Government for its subjects.

How far it tallies with the history of the late and present administrations of this Government, the committee can judge. Of the parallel the honorable gentleman was pleased to institute between the course of the British and American Governments towards their subjects and citizens, in periods of pressure and alarm, I shall speak hereafter. Flat, stale, and unprofitable as it would seem to be, I was not particularly surprised to hear the American Government charged, by almost every gentleman opposed to the system of measures under consideration, with having produced the extraordinary state of things which has existed for the last few months in this country. Such is the infirmity of our nature, that what is often repeated may, sometimes, come to be believed as truth, when at its original promulgation it was known to contain not one single element of truth whatsoever. And in what manner has this grave charge been supported? If it would not be disrespectful to those who have made it, I would say, we have had "declamation without argument, and assertion without proof."

That the late President should have come in for a full measure of condemnation is not wonderful, considering the tone in which the opposition have spoken of him ever since the commencement of his administration. But, sir, I will not imitate the example of those who have ascribed the late commercial revulsion to Executive usurpation, by relying on a mere contradiction of their charge, although, in all fairness, I might do so.

The first specification against General Jackson is, that by refusing to sanction the recharter of the United States Bank, he opened the field for the creation and operation of State banks without limitation or control; and, as a consequence, that the country has been flooded with irredeemable paper. And here it may be proper to remark, that the opponents of the late and present administrations are not agreed whether the paper currency has, or has not, been extended to an unreasonable amount. If I did not greatly misunderstand the honorable gentleman from South Carolina, a considerable portion of his remarks was intended to show that the local bank issues had, at no period, gone beyond their proper and healthful proportion to the specie in this country. If his argument be true—and for the present I shall pass it by without further examination—this grave charge of Executive influence in producing an unsafe increase of bank capital and circulation, must fall to the ground. That the veto upon the bill to recharter the United States Bank in 1832, may have had some influence in increasing the establishment of local banks, and their consequent issues, I might be disposed to admit, if the testimony of a distinguished financier, high in the confidence of my honorable friend from South Carolina, together with considerations connected with it, did not go to establish the contrary. It is well known that the advocates of a national bank base their support of that measure on the ground that it can and will so regulate and control the issues of the local banks, as to keep them in a sound and healthy condition. For the purpose of the present argument, it is sufficient that I admit it. It is equally well known, that after a charter had been granted to the stockholders of the late United States Bank by the State of Pennsylvania, its President congratulated them upon its severance of the connection which had existed between the Government and the old bank, because it was better for both, and the bank was stronger without it than with it. Put this testimony together, and how dare any gentleman to say that the circulation of the local banks has been unsound or excessive? They shall not discredit their own witness, Mr. Biddle, for the purpose of extricating themselves from the contradictions by which they are environed. What then is the result? Either that there has been no excess of local bank paper in circulation, or a national bank is impotent to restrain it. I care not which horn of the dilemma gentlemen may select—either is fatal to their favorite scheme of a national bank. If I understood the honorable gentleman from South Carolina, he argued, or if he did not so argue, it is a fair inference from his remarks upon the currency, that there had been no over-trading in this country. And here, too, if I am correct in my recollection of what was said by that gentleman, he is sustained by the testimony of Mr. Biddle, given in a letter addressed to the distinguished member from Massachusetts (Mr. Adams) about the time Congress convened in 1836, in which he showed by the state of foreign exchange that this country had not over-traded.

It is true, that in a subsequent letter, addressed by him to the same distinguished individual, he did say that we had eaten, and drunken, and worn, a little too much, and we must pay for it. How his friends can reconcile the inconsistency, it is not for me to determine. But as other gentlemen have pursued a line of argument very different from that trodden by my friend from South Carolina, it may be necessary that I should show in what they have been mistaken. They seem to think, one and all, except the honorable gentleman from South Carolina, that the increase of local banks and banking was occasioned entirely by the measures of General Jackson's administration, and in urging this charge we have been taunted with the pre-

dictions of two distinguished citizens of Massachusetts, one a member of this, (Mr. Adams,) and the other a member of another branch of this Government, (Mr. Webster.) It is said, and I do not pretend to question it, that it was foretold by both the individuals referred to, that expansion, over-trading, pressure, and ruin, would be the result of the Executive veto of the United States Bank charter, and the withdrawal of the public money from the custody of that institution. Well might those gentlemen predict such a result, when their own immediate fellow-citizens were so actively engaged in the bringing about its fulfilment. And here permit me to make one observation, which seems to be a fair inference from the general tenor of the remarks upon this subject, that it would seem to be imputed to the friends of the late and present administrations, that they have mainly contributed to that creation of local banks and banking, under which it is alleged the country is now suffering. For the purpose of ascertaining not only the rate of increase of banking capital within the seven years from 1830 to 1836 inclusive, and the States which have contributed to it in the largest proportions, I will present a table comprising five administration and five anti-administration States

Banking capital in—		
	1830.	1836.
New York	- \$20,083,353	\$37,308,000
Maine	- 2,050,000	3,935,000
New Hampshire	- 1,791,000	2,603,000
Virginia	- 5,571,000	6,511,000
North Carolina	- 3,195,000	2,664,000
	<u>\$32,690,353</u>	<u>\$53,076,000</u>
		32,690,353
Increase,		<u>\$20,385,643</u>
Massachusetts	- \$20,420,000	\$40,830,000
Vermont	- 432,000	1,125,000
Maryland	- 6,250,495	8,203,000
South Carolina	- 4,631,000	7,936,000
Kentucky	- 1,875,000	5,116,000
	<u>\$33,608,495</u>	<u>\$63,210,000</u>
		33,608,495
Increase,		<u>\$29,601,505</u>

I have not considered it necessary to carry the comparison further by arraying any additional State. This selection probably makes it fair as if it included all the rest. But does not the result excite our wonder? That, in five opposition States, containing an aggregate representative population of two millions and a quarter, without fractions, and sending to this House forty-seven representatives, the increase of banking capital within the period referred to should have exceeded the increase in the five administration States, containing a representative population of upwards of four millions, and sending here eighty-seven representatives, by more than nine millions of dollars; and that the increase in Massachusetts alone, loyal as she is to a national bank, should exceed the increase in all the five administration States just mentioned, notwithstanding that the greatest commercial city in the Union is situated in one of them. Henceforward, let no member of the opposition taunt us with the increase of local banks and banking, nor with the fulfilment of Massachusetts predictions. It is preposterous, sir, in view of these facts, to accuse General Jackson and his friends of their agency in this business.

Well may it have happened that some who have made the charge were unable to see the mote in our eye, because there was a beam in their own. Suppose, then, it be conceded for this argument, that local banks and issues have been inordinately increased: let those who have had the largest share in the mischief take their part of the odium, and I am satisfied. But until they shall have done so, let them not again say that we did it. I might have adverted to facts in the banking history of other States under the control of those opposed to the late and present administrations, by which the disproportion would be increased; but it can not be

necessary. As I have shown the relative increase of banks in a series of administration and anti-administration States, I will make a single observation upon the subject of the general expansion of the paper circulation which is believed to have occurred since the first of December, 1833. At that period, the order had been but recently issued to change the custody of the public money from the Bank of the United States to the local banks. Every one remembers the panic and pressure which existed from a short time after the meeting of Congress in 1833, to the close of that protracted session in 1834. There was no expansion, there could have been none, in the panic-stricken state of the country throughout that whole session. It is true that within a short time after the adjournment the storm subsided, and things gradually returned to their accustomed channels. What followed?

It has been asserted, and, so far as I know, without contradiction, that from about November, 1834, to July, 1835, the Bank of the United States extended its discounts about twenty, and its circulation about ten millions of dollars, thus taking the lead in stimulating at its commencement, and, as I believe, creating that very spirit of speculation under which, so far as causes in this country have been concerned, we are now laboring.

It is true, we have heard much about the effect of the Specie circular in producing the present embarrassments of the country. But for my own part, I have no doubt that its effect was any thing but injurious. If its operation was to restrain, as it certainly must have been, and not to stimulate the speculations in public lands, its effect could only have been salutary. But I forbear to go further into that subject. Before I dismiss my review of the causes which have contributed to the multiplication of local banks, and the increase of their capital, I must refer to one which, above all others, aside from the expanding resources and augmented population of the country, has in my opinion, been of the most efficient in bringing about that result; and that is the rapid and final extinction of the public debt since 1829. In whatever form a promise to pay money may be made, it is credit; in all conceivable varieties, from the open account to the instrument under seal, including bank notes and stocks, whether of corporations or the Government, and in all these various forms may that credit be used for commercial purposes. But it is not particularly for the purpose of illustrating the commercial uses of the evidences of the public debt, that I now speak of the effect produced by the redemption of that debt upon the banking institutions of the country. I intend to speak of it merely as producing a transfer of capital from one employment to another. In the year 1830, the public debt amounted to forty millions of dollars, which was redeemed in the short period of four years.

A very large portion of that debt, how much it is not particularly necessary to mention, was owned by capitalists in the commercial portions of the Union. Owned generally by those who preferred the security of the Government at even a moderate rate of interest, to any private security whatsoever, and who would have been glad that their stock could have been irredeemable for ever.

But the Government had the right and the means to redeem it, and it was redeemed accordingly.

The same motive which gave a preference to Government security, would naturally prefer the next best security, and that security existed, or was to be obtained, by banking corporations. Hence, the redemption of the public debt, at least in the commercial portions of the Union, by releasing the capital which had been invested in it, was one of the most efficient, I doubt not the most efficient, cause of increasing the number and capital of the local banks in that portion of the Union to which I have referred.

In the younger States, where capital was scarce, other causes have been instrumental to the same result—the multiplication of banks, and the augmentation of their capital. Nor is it to be wondered at, that the scarcity of a circulating medium, in the States last referred to, has been mainly instrumental in introducing to the establishment of banks. When we consider a well settled principle

of trade—that a profitable channel of enterprise always, for a time, tempts adventurers into it, until its profits are brought down to the level of other pursuits, and for a time below them—especially when capital is suddenly released from other pursuits, and left unproductive in the hands of its owners, we need not doubt that much of the over-banking of this country has resulted from the redemption of the public debt. Having, as I think, acquitted the late administration of the charge of producing the banking mania which has manifested itself within the last seven years, I will proceed to inquire into the immediate causes which have produced the revulsion under which the country is now laboring. Whatever may be the opinions of others, I have no doubt that this revulsion has been occasioned by the heedless extension of credit in every form in which credit may be employed, as by bank issues, bills of exchange, &c.

It may be impossible not only to ascertain what is the amount of the currency of a country, but what should be its proportion to the commerce of that country; nor is it at all material to my purpose, in regard to the present inquiry: that individual or community has over-traded which can not meet its engagements. Will any one controvert this proposition? If it be incontrovertible, and I believe it to be so, have the banks been guilty of over-banking, and the merchants of over-trading?

The present condition of the country can answer this question. With a large balance of foreign debt unsatisfied, and for which there are no present means of satisfaction, who can deny that the merchants have over-traded?—and are the banks in a better condition? How stood the accounts of the late deposit banks as to immediate means and liabilities on the 15th of August? They show immediate liabilities to the amount of one hundred and four millions of dollars, and immediate means to the amount of but forty-four millions and about eight hundred and nine thousand dollars, of which only ten millions five hundred and eighty thousand dollars and a fraction was in specie. In the general account of means and liabilities, it is true that a large amount of these obligations are to the stockholders; but the fact of the great disproportion between their discounts and circulation, shows conclusively that much of the stock itself has been withdrawn from them, and exists in mere credit in the notes of the stockholders; thus showing that the supposed capital of the banks is credit, and not money. But if evidence is wanting, as conclusive as evidence can be, to prove that the banks have over-traded, it is found in the fact, that they can not redeem their promises, and at best are only able to exchange one promise for another. For my part, I can not conceive how any advocate of the banks can pretend that they have not over-traded to an enormous extent, without indirectly charging them with deliberate and wilful fraud upon the public. It may be said that the banks are unable to meet their engagements because their debtors are unable to pay them. But this only carries us one step further to the conclusion, that the whole country has over-traded—a fact of which I have not the smallest doubt. I might have shown the enormous disproportion between the value of our exports and imports for the two or three years ending with the year 1836, of the immense sums vested in public lands, the disproportion between the prices of various species of property, and the annual profits of such property; but I have chosen to save the committee and myself such details, and only to present incontrovertible facts, establishing, beyond the shadow of doubt, that the banks have over-banked, and the traders have over-traded. What has stimulated to all this is the inordinate hastening to be rich. I will not stop to inquire whether this over-trading has been occasioned exclusively by an over-issue of paper money, from reduced supply, or speculative demand for various commodities, believing, as I do, that the first and last of these causes have operated jointly in producing the present embarrassment. For the first, there is no remedy but the partial one of reducing and reforming the currency. I may be asked, if, as you suppose, the Government is free from the sin of producing the evils under which the country now labors, what is the remedy

for relieving them? I answer, that the remedy is mainly to be found in the industry and economy of the people. So far as the Government can indirectly relieve, by its action on the deposit banks, and the obligations of the importing merchants, it can go, and no further. But, in its action on these subjects, its relief will reach the remotest ramifications of society. It has been well said, that the mercantile community pervades the remotest portion of the body politic. If this be so—and none can deny it—relief to the importers will be felt by the humblest and remotest citizen of this great Republic, to whom mercantile credit has been extended. And, although indulgence to the suspended deposit banks will not reach to so wide an extent, it will relieve those who stand in the greatest need of relief. Thus, the passage of the bills to extend indulgence on duty bonds, and to give time to the banks gradually to call in their dues from their debtors, will extend relief to a number of our embarrassed fellow-citizens, which no one is able to estimate. And here I may be permitted to reply to the remarks of my honorable friend from South Carolina, in which he endeavored to contrast the conduct of the British Government, in 1797, in a period of commercial distress, with that of his own Government, in this season of pressure and embarrassment. My honorable friend told us that the pressure in Great Britain was relieved, at the period referred to, by the issue of no more than twelve millions of exchequer bills. And if he has attended to the state of the money market at New York, he must know that it has been decidedly improved even by the passage of the bills which have come down from the Senate, especially those giving indulgence on duty bonds, and authorizing the issue of Treasury notes, especially the latter. How, then, can he extol the British Government, and condemn his own for adopting a measure of the same character? What distinction can be drawn between exchequer bills, in the one case, and Treasury notes in the other, in their effects, I am at a loss to discover. I pass over the question, whether or not there is, or soon will be, a deficit in the Treasury. To me it seems to be a question on which there can be but one opinion: if at there is such a deficit, and that it can only be met by using the credit of the Government. Whether it is best to use it in the form of Treasury notes, or by authorizing a loan in the ordinary way, is a matter of indifference, as it respects the obligations which will be contracted by the Government. Nor am I sufficiently versed in questions of finance to say which will be the preferable mode. But, to my mind, the most immediate and direct is the course best suited to the present wants of the Government, and that is to issue Treasury notes. Nor can it be of any very great consequence whether they are hoarded or go into general circulation. In either case, they will displace an equal amount of the present circulating medium, driving it out of, or into circulation, as they may be laid up, or otherwise; and if we may be permitted to look forward to their final effect, they will contribute, at no distant day, most materially, to restore a sound currency. Situated as I was during the discussion of the bill to postpone the fourth installment of deposit with the States, connected, as it is, with the bills yet to be disposed of, I may be permitted, in the latitude given to the debate, to say a word or two upon it.

The period of making that deposit was at hand; the Treasury had not the means of making it, nor could they be commanded without creating a public debt. Thus necessarily arose the question, whether Congress had the power to tax the people to enable it to raise a fund to deposit in the treasuries of the States? To my mind, the answer was clear, that the Constitution had conferred no such power upon us. If it had, the policy might well be doubted of taxing the people with one hand, and returning the money so raised with the other, by which they would receive it with the loss of the expense of collecting, and the interest for the time intervening between the collection and transfer, subject to the serious objection that it would never, it could never, be equitably returned to those from whom it had been collected.

I have already adverted to the causes which led

to the present embarrassments of this country, the over-banking and over-trading which have characterized its business transactions for the last two or three years. But as these were the remote, what was the efficient or proximate cause of the present revulsion both in Great Britain and America? I answer, the course adopted by the bank of England when called upon to prop the failing credit of American houses, so called, but English bankers, who had gone enormously beyond their means in the acceptance of drafts from this country for which the owners had furnished no fund of redemption whatsoever. That measure of the bank not only destroyed for the time the credit of the owners of the bills referred to, but shook American credit to its foundation, and resulted in the immediate and ruinous fall in the price of the great staple of our country, by which the means of American merchants were reduced to almost one-half the amount of their value at the time their debts were contracted. This being the fact, which none can question, is it wonderful that consternation and ruin spread over the land? If any one can doubt the effect of that measure of the bank, in applying the match which has produced this mighty explosion, he is a much greater sceptic than I am. If any other proof was wanting beside open and apparent connection of the cause and its effect, it will be found in the existing state of the money market in Great Britain. Shortly after the Bank of England had, intentionally or unintentionally, I shall not stop to inquire, knocked down the price of cotton, she came forward to sustain the private bankers who had involved themselves by their American acceptances, the London money market became easy, and we are now told that money is a drug there, and can be obtained on unquestionable security for three and a half per cent. per annum, and probably much lower. Thus am I sustained in the assertion that the immediate and efficient cause of the present pecuniary condition of this country, was the conduct of the Bank of England towards the British acceptors of American bills of exchange, and the fall of cotton, which was produced by it. Panic, then, on the part of that bank, or a motive so much worse that I will not impute it, was the match that lighted up this tremendous explosion. Nor was a similar course in this country without its instrumentality, if we have been correctly informed—that from first to last there were millions of idle capital in New York, Boston, and other cities, which remained idle for want of that confidence between man and man which is the life-blood of credit in every country in the world. I have already stated what measures might, and as I supposed would, be adopted by Congress for the relief of the country in the present extraordinary emergency: extension of time on duty bonds, and reasonable indulgence to the suspended deposit banks.

But can no measures be adopted as preventives against the recurrence of a similar calamity? I think there can; and that they are to be found, not in the charter of a national bank, but in the measures proposed for ultimately collecting the public dues in the only medium recognised by the Constitution as money, and in changing the mode of keeping the public revenue. But I may be asked, why not establish a national bank? I answer, first, not only because the Constitution confers no power to do so, either in terms or rational inference, but its history forbids the implication of it in the fact that the federal convention was asked to confer it, and it refused peremptorily to do so. I will not so far insult the committee as to go over the argument to show how far any doubt arising upon the face of an instrument is to be settled by a reference to its history.

The next place I answer, that if the power had been explicitly granted in the Constitution, it would be inexpedient to exercise it. It would be inexpedient, first, because the whole history of the late national bank, and its successor, the United States bank of Pennsylvania, conclusively shows, that it can not, or it will not, prevent over-banking, and consequent over-trading, through the instrumentality of the local banks.

Now as I may be to public affairs, I have not forgotten the history of the commercial embarrassment which reached its acme in the year 1819, les-

than three years from the time when the United States Bank, established avowedly to prevent the future recurrence of excessive local bank circulation, had gone into operation. An embarrassment occasioned by the same spirit of reckless adventure in public lands, and every thing else that could be made the subject of speculation, which characterized the money transactions of the country in 1835 and 1836. If there are any here too young to remember, or who have been too indolent to acquire, information upon that subject, it is sufficient to point them to the impotence of the Pennsylvania Bank of the United States, avowed by its president within two short years to be stronger than its predecessor, to ward off such a calamity.

It is true, that when its suspension was announced in May last, its presiding officer informed the country that if it had consulted its own strength, that suspension would not have been necessary.

But, if the fact was as he stated, how much worse was that act than it has been characterized by a distinguished individual to whom the declaration was made, let an insulted and injured people decide. If it was true, there are no terms of condemnation known to human language strong enough to express the execration which it merits.

But there is another, and to my mind, equally strong, or stronger, if possible, objection to the establishment of a national bank. It is the political character assumed by the late bank, especially when coupled with its foreign connections. To the employment of foreign capital, wielded by American hands, directed by American hearts, in furtherance of objects of public or private enterprise, I make no objection. But I protest most solemnly against permitting in its use the shadow of foreign control or direction.

The late Bank of the United States was believed to have been influenced in its political course by foreign stockholders, not only having no sympathy with our political institutions, but hostile to them. If it was so—and of the fact there can be little or no doubt—how much closer is the connection of its successor with foreigners, how much more powerful will be their influence over it, let recent facts, showing the establishment of its agencies in Liverpool and London, attest. Let me not be answered that a national bank is advocated. I am not to be misled by such a declaration, from my firm conviction that the war upon the late and present administrations of this Government was and is waged for the revival of the Bank of the United States.

Having shown, as I think, that such an institution is not only unconstitutional, but dangerous to the Constitution itself, I come to the measures which, in my judgment, are best calculated to save the country, so far as our legislation can save it, from future revulsion and embarrassment; and here I take occasion to say, that no free Government can so legislate as entirely to prevent their recurrence. But, before proceeding to consider the measures referred to, I may be permitted to state one other objection to the establishment of a national bank: it is the clearly and strongly expressed decision of the people against it.

In discussing the measures most likely so to check and control the local banks, as to restrain their issues within safe and proper limits, I will first consider the proposition to require all payments to the Government to be ultimately made in the constitutional coin of the country, and in that only. It has been said by gentlemen opposed to this, what they call innovation, that it is calculated and intended to destroy the system of credit upon which this country has reached its present elevated rank among the nations of the world. But in what manner can it effect such a result? Is any member of this committee prepared to permit the debts due to the Government to be discharged in irredeemable and inconvertible paper? If not, who can entertain a reasonable objection to requiring their payment, not in promises, but money?

Where would be the difference between the payment of coin or bank notes, convertible into it at the will of the holder, in its effect upon the interests of the banks? If they should be always ready, as they certainly should be, to redeem their notes at the will of the holder, what hardship can there be in requiring that the Government debtor shall convert

them without making it necessary that it should be done by the collecting officers of the Government? It may be said, that as it would only be a question of convenience between private individuals and the collecting officers, that the convenience of the community should always be preferred. But, upon a closer examination, it will be found, that, even upon this point, there is no equality whatsoever. The collecting agents of the Government may be engaged, and in the large importing cities will certainly be almost constantly, in receiving money for the Government; therefore it is much more reasonable that individuals should convert their bank notes into specie before making payment to the collecting agents of the Government, than that the whole burden should fall upon these agents. But, I apprehend, that to require payment to the Government in coin, in every instance, will have a salutary influence upon specie paying banks, so called, in restraining imprudent issues of paper by them. That no injustice would be done either to individuals or the banks, upon the principle that all bank paper shall be convertible into specie, by the adoption of the scheme proposed, is, to my mind, as clear and conclusive as mathematical demonstration could make it. But we have heard it said by the opponents of this measure, who are alike the opponents of the late and present administrations, with, perhaps, occasional exceptions, that by this scheme we should create one currency for the Government and another for the people. But how such an objection can be sustained I can not imagine. Gentlemen, in making it, would seem to confound the present condition of bank paper with what would be widely different, if it possessed the supposed convertibility, the only element which can entitle it to the character of money. If the operation of the system of specie payments should be such as to bring back the banks to the fair and proper redemption of their notes, I would ask what essential particular would the one currency differ from the other? In fact, the whole currency of the country would then consist of specie or credits equivalent: a result which would do more to prevent the indulgence of rash and ruinous speculation, than any other measure the Government could adopt short of the entire destruction of that system of commercial credit, which, properly controlled by prudent foresight and economy, is so essential to the maintenance of our national and individual prosperity. If I have been so fortunate as to make my meaning understood, I think I have shown that the scheme proposed, would establish a currency of equal value to the Government and the people, and such an one as would lay the fabric of our prosperity on foundations too stable ever to be again shaken down by such revulsions as have occurred, at least on two occasions, within less than the last twenty years.

In the discussion which has taken place upon the various propositions presented by the Committee of Ways and Means, in conformity to Executive recommendation, we have heard much about taking care of the Government, and neglecting the people. What, sir, is the Government? It is but an agency constituted by the people themselves, for the promotion of their own prosperity and happiness. And what, I would ask, is desired in the measures proposed for relief of the Government, but to give it the means of carrying out the will of the people? To my mind, it is the idlest of all clamors to say, that because we intend to place the Government in a condition to execute the purpose of its creation, that purpose being to secure the public prosperity and happiness, that we are providing for the Government, as something distinct from, and opposed to, the interests of the people.

The last particular topic upon which I desire to offer a few observations to the consideration of the committee, is the mode proposed for the safe keeping of the public revenue. And what is that mode, stripped of all the mystery and disguise which has been attempted to be thrown around it, by the incessant outcry of exchequer banks, Treasury bank, Sub-Treasury system, and all the et ceteras gentlemen have applied to it. Nothing more nor less than the plain republican, unsophis-

ticated scheme of requiring the receivers of the public revenue to be answerable for its safe-keeping. What feature of a bank can it be possibly supposed to possess? It is not contemplated to authorize the issue of paper of any kind as the mere representative of the money so deposited for safe-keeping.

All that is intended, beyond the payment of money, upon properly authorized drafts from the Treasury, to the public creditors, is the occasional transfer of it, as circumstances may require, from one place to another, for the disbursements of the Government. It is not, therefore—it can not in any sense be so considered—a bank of any sort whatever.

What, then, are the objections to it? That it will increase the patronage of the Government, by the increase of public officers, and the additional expenditure necessary for their compensation; that the money will be unsafe in the custody of the public officers; and that it will open the door to the corrupt influence of the Executive, and may lead to the establishment of an odious despotism upon the ruins of the Constitution. The very decisive vote which has been recently given, here and elsewhere, on the subject of a national bank, renders it unnecessary for me to discuss its merit as a public depository. The only comparison which it is then necessary to institute is between the system pursued and a return to the employment of the local banks. Nor does it seem material to carry that comparison further than the consideration of the objections just stated to the placing the custody of the revenue in the hands of the collecting officers of the Government. So far as I have heard, no one is willing to restore the revenue to the custody of the banks, upon any other principle than as a special deposit, not to be used by them for any purpose, and to be paid over to the orders of the Treasury whenever it may be required.

Nor is it proposed, so far as I have understood, to ask the banks to perform this service without just compensation. What compensation, I would ask, do gentlemen suppose they would require for such service, including the risk of safely keeping the public money?

I know but little of banking transactions, but have little doubt the service required would not be performed by them for less than one per centum upon the money committed to their charge. Taking then, the public revenue at twenty millions per annum, and the cost of its custody would be two hundred thousand dollars.

But that I may be within the rate which must be conceded by every one as low enough, I will fix it at one-half of one per cent. and the annual expense will be one hundred thousand dollars, a sum larger by forty thousand dollars than the sum estimated by the Secretary of the Treasury, if it shall be committed to the collecting agents of the Government. On the score of economy, therefore, the calculation is decidedly in favor of the system proposed.

But to the question of patronage. How much will Executive patronage be increased by the appointment of a small additional number of clerks in some half a dozen cities or less in this Union? So far from being increased, it will be lessened in comparison with the numerous banks which would seek the custody of the public money, and to which it would be committed, the compensation being made an object to them, and without it they would not resume the responsibility, by a President desirous to establish the reign of influence and corruption. It may be answered, that there would be less danger of a corrupt use of the public money, if placed in the keeping of the banks, than in the hands of public officers. For my part, I can not perceive the force of such an objection. Is it said that there is danger of servility on account of dependence of public agents upon the Executive for their offices? The question is then resolved into a question of money, and as that reduces the objection against the public officers and the bank to the same principle, it is unworthy of further consideration. But, it may be said that the chances of Executive corruption will be increased by the greater facility of obtaining money from public officers than from the banks. To this, I answer, that there can be no possible

difference in the matter. The same checks and control exist in the one case as the other. And the banks are as much bound to answer the drafts of the public Treasury, as the public officers could be, and would as readily answer them. Human nature is essentially the same under equal circumstances, and the officers of banks would be quite as likely to act under the influence of temptation to execute a corrupt Executive will, sufficient inducements being offered, as would the collecting officers of the Government. I come now to the only remaining question—the question of the safety of the public revenue under the system proposed. And in discussing this question, I must be permitted to inquire, what magic is imparted by an act of incorporation, by which the honesty of men becomes so purified and refined, that they are placed above the ordinary level of their race? If the homely proverb of an English lawyer of former days be true, corporation morality has nothing to boast of when compared with that of individuals. But it is said that allowing that public collecting officers are generally as honest as the officers of banks, yet the stock of the latter furnishes better security than an individual can offer. On this point I am at issue with the objector, and say that the public officer will be able to make the Government as secure as the banks.

But if it were allowed that occasional default might be the consequence of confiding the custody of the public money to the collecting officers, how long would it be before it would amount to the loss and inconvenience already experienced by employing the banks, and receiving bank paper in payment for public lands before the system of cash payments was adopted, or the inconvenience already experienced within the last five months, not to say—for yet it cannot be said—what losses may in the end be sustained in the debts now due by the late deposit banks.

NOTE.—In making the hasty report of the foregoing remarks, I gave more consequence to the redemption of the public debt than the course those remarks, as delivered in debate, gave to it. I have no doubt that it was one of the most efficient cause of that increase was the pernicious principle of establishing and conducting banks upon credit, and not money. C. E. H.

Mr. CALHOUN of Massachusetts spoke at some length in reply to Mr. HAYNES, and against the bill.

Mr. POPE followed on the same side, and continued till half-past two o'clock, when his remarks were arrested by the hour, and the House took its usual recess till four o'clock.

#### (EVENING SESSION.)

#### DIVORCE BILL.

The House went into Committee of the Whole, and resumed the consideration of the Senate bill "imposing additional duties on public officers as depositaries in certain cases," the question being on the amendment offered by Mr. GARLAND.

Before Mr. POPE resumed, he gave way, at that gentleman's request, to Mr. CUSHMAN, who addressed the committee as follows:

Mr. CUSHMAN observed, that as the gentleman from Kentucky had made a personal allusion to him, he would wish that gentleman's leave say a word or two, by way of explanation. It is true, as that gentleman says, that while the report of the Committee of Ways and Means was under discussion, and after it had been debated during the morning hour for several days, he moved the previous question. It is true also, that the honorable gentleman from Kentucky asked him to withdraw the motion, that he might make a few remarks upon that subject, and he now complains that he was then prevented from so doing by the above mentioned motion.

Mr. C. said there were two reasons why he did not comply with that request. The first was, that there was around him a general desire that it should not be granted; and if he had withdrawn it, the same motion would have been renewed by some other gentleman. Secondly, that the subject of a United States Bank had, for the last five or six years, been the common theme of discussion in every city, town, village, and hamlet in the country. It is true, he said, that several gentlemen, during this debate, had declared that the subject of a bank has not been before the people for their discussion, but it was the bank.

Mr. C. said if gentlemen would only go back to the re-election of the late venerable President of the United States, they would find that that Presidential canvass was put upon the question of bank or no bank. A bank, the bank, or any bank, were all denounced by the people at that time, as appears by the result of that election. It was the pivot upon which that election turned. But if the subject of establishing a bank was not before the people for consideration at that time, the whole subject was before them during the election of the present Chief Magistrate of the United States.

Mr. Van Buren, before the late Presidential election, in pursuance of a call which was made upon him for that purpose, declared, in the most unequivocal manner, that he could not sanction an institution of that character; and this was the pivot, also upon which that distinguished individual was elevated to

the Presidency. Twice, therefore, have the people declared that a United States Bank ought not to be established.

Mr. C. observed that from the course which he had thought proper to pursue, some gentlemen may have supposed that he was disposed to check unnecessarily the freedom of debate. But he would assure gentlemen that they mistook his character altogether. He would go with him who would go furthest to protect the great vital principles of civil and religious liberty, the freedom of speech, the liberty of the press, and the right of petition. These sacred rights he never would yield, but with the last breath of life.

But there is a very wide difference between the rightful exercise of these invaluable privileges, and a wilful abuse of them. To correct this evil, this abuse, the rule regulating a call for the previous question, was adopted as a part of the by-laws of this House. A rule which has existed ever since the formation of the General Government. A similar rule has been adopted by several State Legislatures to correct the abuses which are the subject of so much complaint in this House. In fact, nothing of any importance could be accomplished in this House without such a law.

On the east side of the Atlantic, in the Spanish Cortes, the question asked is, "Has not this subject been sufficiently debated?" If this question is responded to by a majority of that body, an end is put to the discussion, and a vote taken upon the main question. This is the operation of the rule for the previous question in this House: the design of the motion is to ask the House if the subject under consideration has not been sufficiently debated, and can not be enforced without a majority of the members present. As the gentleman from Kentucky states that he merely alluded to him as stating a fact, and not for the purpose of impugning the purity of his motives, Mr. C. observed that he would close his remarks by stating, that so long as his fellow-citizens of New Hampshire should provide him a seat upon this floor, he would faithfully and independently execute his political trust; and should any gentlemen here or elsewhere dare to question the purity of his motives, he would pronounce him a base calumniator.

Mr. POPE concluded his remarks.

Mr. W. C. JOHNSON of Maryland was in favor of postponing a subject of so much importance for discussion at the regular session. He deprecated the idea of hurrying through the House such weighty matters. He went on at considerable length to endeavor to prove that the present distress of the country was caused by the war of General Jackson on the United States Bank, and the issue of the Specie circular.

On concluding his remarks, Mr. CAMBRELENG moved that the committee rise and report the bill.

On this motion a division was called and tellers appointed, when the motion was negatived; yeas 75, nays 93.

The question was then taken on Mr. GARLAND's amendment, and, tellers being ordered, it was rejected; yeas 73, nays 90.

Mr. DAWSON then offered another substitute.

Mr. CUSHING then obtained the floor, and stated that he was prepared now to go on with an argument he intended to make; or he would, if it was the desire of gentlemen, move that the committee rise.

Mr. C. therefore moved that the committee rise; which motion was agreed to—yeas 97, nays 69.

The SPEAKER having resumed the chair, Mr. WHITTLESLEY, from the Committee of Claims, by the general consent of the House, reported a bill to amend an act entitled "An act to provide for the payment of horses lost or destroyed in the military service of the United States," approved January 30, 1837; which was twice read, and committed to the Committee of the Whole on the state of the Union.

On motion of Mr. WILLIAMS of North Carolina, the amendment of Mr. DAWSON of Georgia to the bill imposing additional duties as depositaries on public officers, was ordered to be printed.

Mr. PATTON then moved that the House adjourn.

Mr. CAMBRELENG called for the yeas and nays; which were ordered, and were—yeas 102, nays 85.

So the House adjourned at 9 o'clock, p. m.

#### IN SENATE.

FRIDAY, October 13, 1837.

The VICE PRESIDENT being absent, the Senate proceeded to ballot for Chairman *pro tem*, when the Hon. WILLIAM R. KING was duly elected.

Mr. KENT presented a memorial from J. H. Cansten, praying a revocation of the charter of the Bank of the Metropolis: ordered to lie on the table.

Mr. TIPTON presented a memorial from certain citizens of Cass county, Indiana, praying that the pre-emption law of 1830 may be revived: ordered to lie on the table.

Mr. SOUTHARD presented a petition of H. R. Lee and others, praying the incorporation of a national bank: ordered to lie on the table.

Mr. SOUTHARD also presented petitions against the annexation of Texas; which were ordered to lie on the table.

Mr. YOUNG presented a preamble and resolutions from the Illinois Board of Public Works, in favor of aid from the General Government for completing certain internal improvements: ordered to lie on the table, and be printed.

A resolution was passed giving to the several officers of the Senate two months' additional pay.

The following resolution, submitted by Mr. WHITE, was taken up and agreed to:

Resolved, That the President of the United States be, and he hereby is, requested to inform the Senate, at the commencement of the next session of Congress, whether a board of commissioners has

been organized under the provisions of the act of Congress, approved the 3d day of March, 1837, entitled "An act for the appointment of commissioners to adjust the claim to reservations of land under the 14th article of the treaty of 1830 with the Choctaw Indians;" when said board was organized, and what progress the commissioners have made in the discharge of their duties; and that he cause to be laid before the Senate, at as early a day of the next session as practicable, a copy of the report of the said commissioners, together with a copy of such instructions as may have been given them, and also the amount of expenses incurred under said act.

On motion of Mr. CLAY, it was Resolved, That the President be requested to communicate, at an early period of the next session, what progress has been made in securing from the Mexican Government any acknowledgment of, or provision for, the payment of the claims due to American citizens, if not incompatible with the public interests.

Mr. WILLIAMS submitted the following resolution:

Resolved, That the Secretary of War be directed to submit to the Senate, at as early a day as practicable, a plan for the protection of the northern and eastern frontiers of the United States, designating the points to be permanently occupied by garrisons, the auxiliary stations for reserves and deposits of munitions and other supplies, the routes to be established for the purpose of maintaining a safe and prompt intercourse between the several stations, and from these with the depots in the interior; and, finally, the minimum force which, in his opinion, will be required to maintain the peace of the country.

The following resolution, submitted by Mr. SOUTHARD, was taken up and agreed to.

Resolved, That the Secretary of War be directed to furnish to this House, at the commencement of the ensuing session, copies of all the correspondence between the War Department, or any officer thereof, with any commissioner, agent or other person, not heretofore communicated, leading to and connected with the treaty of December, 1835, or the supplemental articles thereof, between the United States and the Cherokee Indians, and also such correspondence as grew out of said treaty, and communications received from the Cherokees, or any portion of them in relation to the same; as also a statement of the amount of money which has been drawn from the Treasury under any appropriation connected with said treaty; how the same has been disbursed; how much remains in the hands of any and what disbursing officer or agent, and what agents, and for what particular objects such disbursements have been made; copies of the instructions to such disbursing agents in relation to the same; copies of their accounts and correspondence with them, and the present situation of the appropriations and objects of expenditure; showing also how much of said expenditure is charged or chargeable to the fund appropriated to carry into effect said treaty.

On motion of Mr. SOUTHARD, it was Resolved, That the Secretary of the Navy be directed to report to the Senate at the commencement of the next session of Congress—

1st. The state, condition and amount of the navy pension fund.

2d. The state, condition and amount of the said fund on the 1st December next.

3d. The operation and effect upon said fund of the act entitled an act for the more equitable administration of the navy pension fund, passed 3d March, 1837.

4th. The number and names of persons placed on the pension list, the times when pensions were granted to them, and the amount of money paid to each under said act.

The bill from the House of Representatives to provide for the payment of horses destroyed in the military service of the United States, was taken up and passed; also the bill for the relief of Mrs. D. P. Madison.

On motion of Mr. WHITE, the Senate went into Executive business, and soon after adjourned.

## HOUSE OF REPRESENTATIVES,

FRIDAY, October 13, 1837.

On motion of Mr. WHITTLESEY, the House resolved itself into Committee of the Whole, Mr. EAMES in the Chair, and took up the bill to amend the act entitled "An act to provide for the payment of horses and other property lost in the military service of the United States."

[This bill was to provide for a class of cases of horses lost in the service in Florida and Alabama, which was not provided for in the bill passed in January last.]

Mr. CARTER said he was not opposed to the bill now under consideration, except that its provisions were not sufficiently extensive. It did not embrace a class of cases of real hardship that he believed existed. He said he would take this occasion to bring to the notice of the Committee, and at the same time suggest to the honorable chairman of the Committee of Claims, that there were among the volunteers some cases of real and peculiar hardships, that were not yet provided for by law, although great exertions were made at the last Congress in their behalf; and he would now tender to the honorable chairman of the Committee of Claims his acknowledgments of gratitude for his assiduity and exertions favorable to the relief of those patriotic young men he had the honor to represent, and who had sustained losses in the service of their country.

Mr. Chairman, in my opinion, the Government should always be scrupulously careful never to permit the patriotism of her citizens to be rewarded with ingratitude and with losses, and, consequently, with embarrassments that may render their domestic peace and tranquillity precarious for years. Sir, it is not the aristocracy or the wealthy that most usually embark in the toils and dangers attendant on a campaign in time of troubles and of war; but, sir, real patriotism and love of country, in its most disinterested form, is always found with those whose circumstances are more humble—not humble in the common acceptation of the term, but only humble so far as wealth is concerned. These are the men who are always first in the field in defence of the country's rights and honor. In the late campaigns in the West, many of such men were volunteers; and many were they who had not the means of equipping themselves, furnishing their horses, &c. only upon time, and by the aid and endorsements of their friends. Now, I submit it to this House—I submit it particularly to the Committee of Claims, and to the country—whether such men as these are to be permitted to be the sufferers, on account of their manifested patriotism and risks in the service? If so, I say to all that such conduct, such ingratitude, will deter all men in humble circumstances, or who are poor, from engaging in the country's defence.

The provisions of the laws now in force, for the payment for lost property, are limited, and do not cover the cases of hardship to which I have allusion. Those laws merely provide payment for property lost in battle, or lost on account of the Government failing to furnish the necessary supplies of provender. But, sir, there are other cases that Congress is in honor and in duty bound to make ample remuneration. I know some volunteers, that involved themselves, and their friends with them, to purchase horses and other necessary equipment for the campaign, and who lost their horses in the service; but perhaps not in battle, nor for the want of forage. Therefore, by the laws now in force, their claims can not be recognized and paid by the Third Auditor, who is charged with the settlement of these claims. But, sir, these horses were lost by casualty or unavoidable accidents, and were lost in the service of the United States; and being so lost, the Government is as much bound, in honor and justice, to remunerate the soldier thus circumstanced, as though the loss had occurred in battle, or by the default of the United States in furnishing forage. Sir, some of these praiseworthy volunteers are now doomed to labor by the day, or the month, or by the year, to procure the money they owe for horses purchased and taken into the public service, and there lost by casualty; and thus far the Congress of the United States, who directed the Executive to invite them into service, having wholly failed to meet their distresses, by ordering their relief, and indemnifying them against these liabilities and their losses. Is this right, sir? I say most unequivocally it is not; and I say, further, let the Government continue to refuse payment, and you cast a damp upon the patriotism of the West, and upon the whole country, which will in all time to come deter, in a great degree, men in moderate circumstances from incurring monetary liabilities, to go to the field at the call of the Government, for their defence. And whenever you cut off that class, by your parsimony and rigid policy, you cut off that portion of the defence of the country that have never deceived you, and have never lent a deaf ear to your calls, and the distresses of the country.

Sir, I will take occasion here to say that, in my opinion, (if the reports be true that have reached my ears,) the Government have not dealt as kindly and as liberally as she should have done towards the volunteers of Tennessee. We provided by law at the last Congress, that the soldiers or volunteers who had rendezvoused, were mustered, and immediately discharged, should be paid one month's full pay; and by the estimates furnished the Committee of Claims by the War Department, one month's full pay was made to amount to between \$63 and \$70, I think, perhaps \$68 and some cents; and, by the decision of the Attorney General under the old law, another class of those volunteers, that were indefinitely furloughed, and required to return to service if they should be ordered to do so, were to be considered in service until absolutely discharged, and consequently were entitled to their full pay. I have heard some hints, sir, that the War Department has not carried into effect this law, and this decision, as was contemplated by Congress and those representatives who were looked to guard and sustain the rights of those particular individuals. I do not know, sir, how far the War Department have failed in a compliance with the law; nor have I any idea to what extent those volunteers have been injured by the default of the Government. But I hope, and I have no doubt, I will be able to obtain the information; and, if my fears are realized, and they have been defrauded out of any portion of the amount that Congress intended they should have, and I can not obtain redress by an application to the Secretary of War, I will feel myself bound to bring the subject again to the consideration of this House, believing that the representatives of the people are ready upon all occasions to do justice to the people. And I am glad now to have the assurance of the honorable chairman of the Committee of Claims that he will afford all the aid in his power to render to the volunteers of my State ample compensation for their services and their losses at the next meeting of Congress. I have also a right to complain, on behalf of these men, in another point of view. I am informed our volunteers were paid off in the depreciated bank paper that was perhaps ten or fifteen per cent. below par. If this be

true, and my former suggestions be true, that they have not been paid as much as Congress intended them to have, why, sir, your volunteer soldiery of Tennessee have been cheated and defrauded out of half, or at least a large portion, of their just dues. And if so, we must ask Congress hereafter, whenever the true state of facts can be ascertained, to grant such relief as the merits of those claimants may justly and honestly demand. And I have no doubt, from the disposition heretofore manifested by this House, and by the Committee of Claims, in relation to this deserving and meritorious class of claimants, that ample relief will be awarded them.

Mr. WHITTLESEY explained the grounds on which the Committee of Claims had reported the bill; and after a few remarks by Mr. CHAPMAN,

Mr. EWING offered an amendment, extending the provisions of the bill to all persons engaged in the service at the battle of Tippecanoe, and prior to the late war with Great Britain.

After some few remarks by Mr. CARTER, the amendment was rejected.

Mr. THOMPSON of South Carolina moved to add a section to the bill providing payment for all horses impressed into the service in Florida.

After a few remarks by Messrs. THOMPSON, WHITTLESEY, and CLARKE, the amendment was rejected.

On motion of Mr. WHITTLESEY, the committee then rose and reported the bill to the House.

The SPEAKER having resumed the Chair, and the question being on the engrossment of the bill,

Mr. EWING of Ohio, after some remarks, renewed the amendment he had submitted in Committee of the Whole, and called for the yeas and nays on the question; which were not ordered.

After a few words by Messrs. PETRIKEN, WHITTLESEY, and EWING, the amendment was rejected.

Mr. EWING then varied his amendment somewhat, and moved it again; but the CHAIR ruled it to be out of order.

Mr. THOMPSON then renewed his amendment made in Committee of the Whole.

Mr. CARTER called for the yeas and nays, but the House refused to order them, and the amendment was rejected.

Mr. PETRIKEN moved that the further consideration of the bill be postponed until the first Monday in December next: lost.

The bill then having been ordered to be engrossed, was read a third time and passed.

Mr. McKENNA then, on leave, presented a memorial on the subject of the currency: laid on the table, and ordered to be printed.

On motion of Mr. CAMBRELENG, the House proceeded to the orders of the day.

The SPEAKER laid before the House a communication from the Secretary of the Navy, in answer to a resolution of the 4th instant, calling upon him to lay before the House the causes of detention in the sailing of the exploring expedition, and the correspondence between the department and the officers of that squadron; which, on motion of Mr. PATTON, was laid on the table, and ordered to be printed.

The bill from the Senate to authorize the deposit of merchandise in the public stores, and for other purposes, was read twice, and committed to a Committee of the Whole on the state of the Union.

The bill from the Senate for the relief of Mrs. Dolly P. Madison, was read a third time, and passed.

The bill from the Senate to restrain the circulation of small notes in the District of Columbia, having been twice read—

Mr. CAMBRELENG, at the suggestion of Mr. PATTON, moved to commit it to the Committee for the District of Columbia.

Mr. THOMPSON moved to postpone the further consideration of the bill until the first Monday in December.

Mr. THOMAS thought the bill ought to go to the Committee on the Judiciary; and if there was time to take it up in the House, he thought it might be trusted to the House.

Mr. THOMPSON did not wish to leave the interests of the District of Columbia in the hands of a bare quorum, or a little over a quorum, of members of this House; and he was satisfied, that when this Sub-Treasury bill was disposed of, a great many of the members of the House would leave the city.

Mr. BOULDIN said, so far as he was concerned, the insinuation was groundless, that the interests of the District would not be protected by the District Committee and the House.

Mr. ADAMS thought if Congress restrained the issue of small notes in the District of Columbia, members would have a difficulty frequently in getting their dinners. He alluded to the laws for the prevention of the circulating of small notes in the State of New York, and said that there were more small notes in circulation in the city of New York from other States than any other city in the Union.

Mr. HARLAN then moved to lay the bill on the table, which was agreed to without a division.

## DIVORCE BANK BILL.

On motion of Mr. CAMBRELENG, the House then went into Committee of the Whole—Mr. SMITH in the Chair, and took up the "bill imposing additional duties as depositaries in certain cases on public officers." The question pending was the substitute proposed by Mr. DAWSON.

Mr. LEGARE addressed the committee at length in opposition to the bill.

Mr. NAYLOR followed on the same side, and continued up to the hour for taking a recess, when the House adjourned until four o'clock.

## [EVENING SESSION.]

The House went into Committee of the Whole on the Senate bill "imposing additional duties as depositaries, on public officers, in certain cases." The question pending being the substitute to the bill offered by Mr. DAWSON—

Mr. NAYLOR resumed his remarks, in opposition to the bill, and entered into a long defence of the credit system. He contended it was a fact, that in proportion as a well regulated credit system prevailed in any country, so the happiness of the human family would increase.

Mr. ELY MOORE said it was with great reluctance that he ventured to trespass on the time of the House at this advanced stage of the session. Since he had been honored with a seat on this floor, he had troubled the House but seldom. He had hitherto refrained, because he did not consider it right for members to occupy the time in speech-making, unless they could throw some new light on the subjects before them. But of late it had become a practice for members to be estimated at home by the length of their speeches; and if a man did not fill so many

columns of a newspaper by a lusty harangue, however destitute of ideas it might be, according to the present fashion, he would lose favor with his constituents, and on returning, would not be greeted with "well done, good and faithful servant." He deprecated the system as obnoxious; but, at the same time, he regretted that there were but too many who acted upon it, and sacrificed the time and money of the country to their own interest. He then replied at some length to the arguments of Mr. NAYLOR, in relation to the working classes of the North. He (Mr. M.) would tell that gentleman and the House that he was in daily correspondence with all the working classes of the North, and as God lived, he believed what he said, when he told the House that, ninety-nine out of a hundred, the working-men of the North were in favor of the bill: they knew their rights, and knowing, they dared to maintain them. Mr. M. said it would take him several hours to go through with what he intended to say; but sudden indisposition compelled him to close his remarks. He intimated that he would publish the remainder.

Mr. CUSHING said that all he proposed to do was merely to throw up a rocket to cast light on the subject at this advanced period of the debate, and to show gentlemen the relative position in which they stood. He denied that the banking institutions of the North were calculated to bring into vassalage the working classes, as had been alleged. He contended that if the whole of the banks of Massachusetts were destroyed, it would not in the least affect the prosperity of that State.

Mr. CAMBRELENG addressed the House at some length in support of the bill.

Mr. WISE followed, and spoke at great length in opposition to the bill; and, having concluded,

The amendment of Mr. DAWSON was rejected; when,

On motion of Mr. CAMBRELENG, The committee rose, and reported the bill to the House.

On motion of Mr. PATTON, The House adjourned, at 12 o'clock.

## IN SENATE,

SATURDAY, October 14, 1837.

Mr. BUCHANAN presented petitions from citizens of Philadelphia city and county, praying that no new State that permits slavery may be admitted into the Union. Also, memorials from citizens of Pennsylvania, remonstrating against the annexation of Texas to the United States; which were ordered to lie on the table.

Mr. McKEAN presented memorials from citizens of Montgomery county, Pennsylvania, remonstrating against the annexation of Texas; which were ordered to lie on the table.

Mr. WRIGHT presented a memorial from sundry citizens, traders of Brooklyn, New York, in relation to the currency.

On motion of Mr. LINN, it was

*Resolved*, That the Secretary of War be directed to submit to the Senate, as soon after the meeting of the next Congress as practicable, a plan for the protection of the western frontier of the United States against Indian aggression; designating the points to be permanently occupied by garrisons; the auxiliary stations for reserves and deposits of munitions, arms, and other supplies; the routes to be established, for the purpose of maintaining a safe and prompt intercourse between the several stations, and from these with the depots in the interior; and finally, the minimum force which, in his opinion, will be required to maintain peace among the several tribes, and cause our border settlements to be respected. Also, to report, as far as the same can be ascertained, the number of Indians who will be in the occupancy of the country west and north of the States of Louisiana, Arkansas, and Missouri, and the number of warriors they may collectively be able to bring into the field, and such other plans as he may think proper, and what progress has been made in the locations of the military road.

The several resolutions submitted yesterday, were taken up and agreed to.

Mr. HUBBARD introduced a resolution to compensate the Chaplain; but afterwards waived it to examine the act in relation to the appointment of that officer.

Mr. WRIGHT moved to take up the bill amended by the House of Representatives, to postpone the time of payment of the merchants' bonds. The amendment was concurred in. [The time given is to 1st January, 1839.]

Mr. WALKER introduced a joint resolution to suspend the 16th and 17th joint rules; which was passed.

On motion of Mr. WHITE,

The Senate went into Executive business, and, after a few minutes spent therein, the doors were again opened.

Mr. GRUNDY then introduced a resolution giving to the Chaplain \$300 for his services during the present session; which was read three several times by unanimous consent, and passed.

On motion of Mr. NILES,

The Senate took a recess till half past 4 o'clock.

## [EVENING SESSION.]

Mr. HUBBARD presented the petition of an individual, praying that provision may be made for the widows and children of the non-commissioned officers and privates who may die or be killed whilst in service; which petition was ordered to lie on the table.

Mr. RIVES moved that the Committee on Naval Affairs be discharged from the consideration of the petition of Eli Ridgeway, and the memorial of John C. Long.

On motion of Mr. HUBBARD,

Ordered to lie on the table.

Mr. WRIGHT moved that the Committee on Finance be discharged from the further consideration of the report of the Secretary of the Treasury on the state of the finances, and the memorial of Littleton Denis Teakle, with that of the citizens of Columbiana county; which motion was concurred in.

Mr. WALL submitted the following resolution:

*Resolved*, That the members of the Senate who have not received a copy of the American State Papers, printed by Gales and Seaton, be supplied with the same.

Mr. NORVELL moved to amend the resolution by adding after the words "State Papers," "and the Register of Debates."

Mr. WRIGHT said, while he had no objection to the original resolution, (the papers in question not being under the control of the publishers,) he would feel himself bound to object if the amendment was urged on the consideration of the Senate.

Mr. LYNN thought the resolution ought to pass. He was clear that all the members of the Senate should be placed on the same equitable footing, and saw no reasons why those who had received these books should fare better in that respect than other Senators.

Mr. RIVES agreed that there ought to be no discrimination; but he thought, when the present edition of these papers should have been exhausted, it would be time to stop.

Mr. WRIGHT said he had received many books since his entrance into the Senate. They had been sent to him always without his consent; and he ever had been, and still was, opposed to the practice.

Mr. CLAY of Alabama concurred entirely with the views of the Senator from New York, (Mr. Wright) in regard to the motion. He thought the proceeding objectionable in the extreme, and ought not to be encouraged, and he hoped the Senate would persevere in rejecting it. He had, it was true, also received books, but without his vote, for he had never given his consent for an appropriation of the kind. As the State Papers were not within the control of the publishers, he would not oppose the resolution as originally introduced; but if the Register of Debates were added, which were within the control of the publishers, he would most unquestionably protest against it.

The amendments being withdrawn, the original resolution was, by unanimous consent, read three several times and passed.

On motion of Mr. HUBBARD, it was resolved that the Senate take a recess until half past seven o'clock.

## [HALF-PAST SEVEN O'CLOCK.]

A message was received from the President, announcing the signature of the bill for the relief of Mrs. D. P. Madison.

On motion of Mr. NORVELL, the Senate next went into Executive business, and after a few moments spent therein, the doors were re-opened.

A message was received from the House of Representatives, announcing the passage of the joint resolution to suspend the joint rules 16 and 17, with an amendment; [these rules relate to the passing of bills and the signature of the President within the three last days of the session—the amendment of the House of Representatives was to exclude bill No. 6, in relation to the sub-Treasury system;] which was concurred in by the Senate.

A message was received from the House of Representatives, announcing the passage of a bill making appropriations for the year 1837. The bill having been read a first and second time, was,

on motion of Mr. WRIGHT, referred to the Committee on Finance; and after about half an hour,

Mr. WRIGHT reported the bill to the Senate with three several amendments. Mr. W. briefly explained to the Senate the nature of the amendments, which was to grant the sum of \$20,000 for the printing of Senate documents, which were already in course of publication, and \$2,000 increase of clerk hire for the office of the Solicitor of the Treasury, the duties of which had been greatly increased within a short period of time; the other was to authorize the Secretary of the Treasury to receive the unpaid drafts in favor of the State Government issued by the Treasury under the deposit law.

The several amendments were passed, and the bill, as amended, sent to the House of Representatives. The bill, as amended, was afterwards received from the House of Representatives, which body had concurred in the first and third amendments, and dissented from the second.

Mr. WRIGHT moved that the Senate concur in the amendments of the House; he would not press the other amendment at this time; which was agreed to, and the bill passed.

A message was received from the House of Representatives, announcing the passage of a bill making appropriations for the suppression of Indian hostilities in Florida.

On the first reading of the bill,

Mr. WRIGHT pledged himself that it was a literal copy of the bill introduced by the Senate; and hoped, therefore, it would be read a second and third time, by unanimous consent, and passed.

Mr. WEBSTER thought the proceeding very extraordinary, and, he would say, unparliamentary. A fortnight ago the Senate passed a bill to the same effect, and sent it to the House. Nothing is heard of that bill; and now, at a late hour of the night, and that the last of the session, we have a bill sent for approval. It was to his mind, to say the least, a very extraordinary business, and one which ought not to meet the sanction of the Senate. Suppose the other bill were passed by the House, did not gentlemen see what such irregularity might subject them to?

Mr. CLAY of Alabama was glad to hear the remark of the gentleman; he understood we had been taken to task in the House for usurping there prerogative in originating these bills; that relating to the time of fixing the adjournment, was made the subject of particular remark. At this time, and on this subject, he was not disposed, however, to be ceremonious. He wished the bill passed at once; Florida had been bleeding at every pore for the last two years; we received news of her distress through every channel of information; and he, therefore, hoped the bill would be permitted to pass. He thought the objections should have been urged before.

Mr. BUCHANAN said he was not disposed at this time of night, and with the present thin state of the Senate, to stand upon its dignity; if he did, in his opinion, the business would be poorly attended to.

Mr. NORVELL read the joint resolution in which the 16th and 17th rules of the Senate had been dispensed with, for which the Senator from Massachusetts had voted, and now how could he oppose the bill on the ground of the objection urged by him.

Mr. WEBSTER saw no analogy, no connection, real or imaginary, between the cases cited by the Senator last up. The gentleman from Pennsylvania (Mr. Buchanan) said he was not disposed to stand upon the dignity of the Senate; but it was not a matter of dignity at all, but of regularity of business; and he was sure gentlemen, when they came to look into the matter, would agree with him that it would be better to go back to the ancient usage, and let the different Houses keep each other informed of their business. Mr. W. admitted that the bill before them was important, very important, and should not be delayed. Gentlemen might see, from the condition of things, how dangerous the present practice would be, if permitted to prevail. He, as an individual, might be the means of stopping a bill indispensable to the interests of the Government.

If, said Mr. W. we give up regulating, where shall we get to? He would not object now to the proceeding; but he gave notice, if he were present at the next session, under the same circumstances, he would feel it his duty to oppose all such proceedings.

Some further discussion took place, in which Messrs. BUCHANAN, WHITE, CLAY, of Alabama, and LINN took part, acknowledging the general justice of the remark of the Senator, but urging with much zeal the passage of the bill.

The bill was then read a second and third time, by unanimous consent, and finally passed.

The bill for adjusting the remaining claims of the Government on the late deposit banks was received from the House, with two amendments, extending the time of the first payment to the 1st day of July next; and the second to the 1st day of January, 1839; and the third to the 1st day of July, 1839.

Mr. WRIGHT said that the time granted was more than was contemplated by the committee, or, he believed, by the Senate; but under the circumstances, he moved that the amendment be concurred in.

Mr. SMITH of Indiana said he did not rise at that late hour of the night, and period of the session, to make a speech. He begged, however, to detain the Senate for a single moment, while he read a letter which he had received from the cashier of the State Bank of Indiana, subsequent to his (Mr. S's) addressing the Senate on this subject. It would be perceived (said Mr. S.) that the letter refers to the time allowed the banks by the bill as originally reported from the Committee on Finance in the Senate. The bill was amended, it was true, but still the time allowed was not, in his opinion, sufficient to enable the banks to close this matter, without producing too much distress among the people.

He very sincerely hoped that these amendments of the House giving longer time, would be concurred in by the Senate. He agreed fully with the writer of the letter, (who he knew to be well acquainted with the concerns of the banks,) that whatever might be the policy of the Government, so far as the banks were concerned, that the question was one of relief to the people. The corporations will not suffer, but the people would, and must if the banks were pressed. Mr. S. said he wished to be distinctly understood; he did not stand there as the advocate of any bank, not even of those of his own State, further than would benefit the people; and the moment he became satisfied that their interests required the suspension of the corporate power of these institutions, he would say unhesitatingly, "let them expire!" He was satisfied, however, that a course of policy requiring at this time the banks to oppress their debtors, would be productive of the most disastrous consequences to the people of his State.

Mr. S. here read a letter from the cashier of the State bank of Indiana, inclosing the letter of instruction from Mr. Woodbury to the bank.

The letter of the cashier states that if they lose the fourth instalment, and have to comply with the terms of settlement required by the bill, the destruction of the people would be inevitable. This letter was dated the 23d September, 1837.

Mr. S. said he would make only one further remark, that whatever justification the Senator from Missouri (Mr. Benton) might find for his remarks against the banks, he (Mr. S.) felt satisfied that the banks of Indiana were perfectly and entirely solvent; and that they, at least, should have been exempted from the indiscriminate denunciations of that gentleman.

The people of Indiana had the fullest confidence in their moneyed institutions; and he had no doubt but they would finally redeem every dollar of their paper. Time, however, was necessary to enable the debtors to the banks to pay up. The relief and time were for the benefit of the people, and not exclusively for the banks, as some Senators seemed disposed to think.

Mr. BUCHANAN did not know that he would support the amendments of the House. The banks had the money of the Government, and were to be ready, at all times when called on, to return it.

And now we were asked to extend the time still further for their indulgence. Mr. B. also found fault with the wording of the bill, as not being sufficiently comprehensive in relation to the time when the interest should commence to be paid by those banks.

Mr. WRIGHT thought the wording of the bill sufficiently clear, and read the first section to show the meaning and spirit of the act.

Mr. CLAY of Alabama thought it best to concur with the House in extending the time for the banks, and that the indulgence given in the bill would be the best relief to the people, and urged its immediate concurrence.

Some further discussion took place on the suggestions of Mr. BUCHANAN, as to the meaning of time of default, in which he was opposed by Messrs. WALKER, WRIGHT, CLAY of Alabama, and others.

Mr. WEBSTER then suggested an amendment, to be appended to the end of the bill, in this shape:

"And the default mentioned in this act, on which interest is to commence at the rate of six per cent. per annum, shall be understood to be the neglect or omission of said banks to answer drafts made on them, according to the provisions of the first section."

The question being taken on this amendment, it was found there was no quorum present, when absent members were called in; and, the question being further debated, the amendment was adopted, and the bill sent to the House of Representatives.

Mr. CLAY of Alabama, on learning that the other House had adjourned, moved the adjournment of the Senate at about ten minutes before two; when

The Senate adjourned until half past eight o'clock, a. m. on Monday.

#### HOUSE OF REPRESENTATIVES,

SATURDAY, October 14, 1837.

Petitions and memorials were presented, on leave, by

Mr. DAVIS of Pennsylvania.

Mr. LOOMIS of Ohio.

Mr. JOHNSON of Maryland, on leave, submitted the following resolution; which was considered and adopted:

*Resolved*, That the Committee on the Public Buildings inquire into the propriety of making such alterations in this Hall as will promote the comfort and convenience of its members, and report to this House.

Mr. BRIGGS, on leave, submitted the following resolution; which was considered and agreed to:

*Resolved*, That the Clerk of this House be directed to pay to the Chairman of the House the usual compensation for his services during the present session.

Mr. EVERETT, on leave, submitted the following resolution, which was considered and adopted:

*Resolved*, That the President of the United States be requested to lay before this House, at the next session of Congress, a plan of the Treasury buildings now being erected, showing its location in reference to the adjacent street and public square, on which it is located—its elevation—the number and size of the rooms it will afford suitable for office business; and the number and size of those suitable only for the deposit of records, with a statement of the sum then expended on said building, and an estimate of the further sum that will be required to complete the same; and to state whether it is contemplated in the completion of said building to take down the building of the Department of State, or so to repair it, as to render it fireproof, and to make its outside conform to the other parts of the Treasury building; and what will be the difference of expense between those two modes of completing said building; and whether the public interest requires any change in the location or plan of said building; and also to state whether it is contemplated to appropriate any part of said Treasury building to the use of any other Department; and further, that he be requested to cause to be prepared by the heads of each of the Departments statements of the number and size of the rooms that are necessary for their respective departments, for office business,

and for the deposit of records; and that the same be communicated to this House at the next session of Congress.

Mr. PATTON, on leave, submitted the following resolution, which was considered and adopted:

*Resolved*, That the Clerk be directed to cause a ninth volume of the laws to be compiled and printed, and distributed, after the manner of the eighth volume, printed and distributed under the order of the House of Representatives of the 30th of June, 1834, and 26th of June, 1836.

Mr. LEGARE, on leave, submitted the following resolution, which was considered and adopted:

*Resolved*, That the Secretary of the Navy be requested to report to the House, at its next session, his opinion as to the expediency of establishing a Navy Yard for sloops of war, and other ships of similar class, at Charleston, South Carolina, or some other port on the southern coast, together with any information he may possess on that subject.

Mr. CAMBRELENG, on leave, submitted the following resolution:

*Resolved*, That the Clerk of the House and his Assistants, the Sergeant-at-Arms, the Principal Door-keeper and Assistant Door-keeper, the Post Master, and the Messengers and other attendants on and about the House, be allowed, each, two months' pay, for services during the extra session: And that the Police and Lamplighter of the capitol and capitol square, be allowed one months' pay each.

Mr. WHITTLESEY moved to refer the resolution to the Committee of Accounts.

Mr. BRIGGS then moved to amend the resolution by embracing the Librarian, the Assistant Librarian, and Messenger of the Library.

After a few remarks by Mr. THOMPSON in favor of the resolution, Mr. WHITTLESEY withdrew the motion, but gave notice that he should introduce a resolution at the next session of Congress, requiring all these matters of extra services to go to committees, so that the House might know what these extra services would amount to before they were voted.

Mr. McKAY renewed the motion to refer the subject to the Committee of Accounts.

After some remarks by Mr. JOHNSON of Virginia, and Mr. THOMPSON,

Mr. EWING moved to lay the resolution on the table: lost.

The amendment was then agreed to; and after some remarks by Messrs. RENCHER and A. H. SHEPHERD in opposition to, and Messrs. BRIGGS, CAMBRELENG, and THOMPSON in favor of, the resolution was adopted.

#### INQUIRY IN RELATION TO THE FLORIDA WAR.

The House then proceeded to the unfinished business of the morning hour, which was the consideration of the following resolution, submitted by Mr. WISE on the 19th of September:

*Resolved*, That a select committee be appointed by ballot to inquire into the causes of the Florida war, and into the causes of the delays and failures, and the expenditures which have attended the prosecution of that war, and into the manner of its conduct, and the facts of its history generally; that the said committee have power to send for persons and papers, and that it have power to sit in the recess, and that it make report to the next session of Congress.

Mr. GLASCOCK had moved to amend the foregoing resolution, by striking out all after the word "*Resolved*," and insert the following:

"That a select committee be appointed to inquire into the cause of the Florida war, and the causes of the extraordinary delays and failures, and the expenditures which have attended the prosecution of the same, and all the facts connected with its history generally; and that said committee have power to send for persons and papers."

Mr. HOWARD had submitted a motion to strike out "a select committee," and insert "the Committee on Military Affairs."

The question pending was the motion of Mr. McKAY to postpone the further consideration of the resolution until the first Monday in December.

Mr. UNDERWOOD addressed the House briefly, and brought to its notice a letter which he had

received from General Jesup, in answer to a communication from himself on the subject, in which the General denied having entered into any treaty with the Indian chief Apothleoyohola, which was broken on his part.

Mr. WISE made a few remarks in explanation; when,

On motion of Mr. CAMBRELENG, the House proceeded to the orders of the day.

#### DIVORCE BANK BILL.

The first business in order was the "bill imposing additional duties as depositories, in certain cases, upon public officers."

The bill had been reported from the Committee of the Whole about half past 12 o'clock last night, without amendment, and the question was on concurring therein by the House.

Mr. WILLIAMS of Tennessee, moved to lay the bill on the table, but at the request of Mr. CLARK of New York, withdrew it, for the purpose of affording Mr. C. an opportunity of submitting some remarks.

Mr. CLARK then addressed the Chair as follows:

Mr. SPEAKER: I do not rise to discuss the merits of the bill, or to express any opinion in relation to it. I should have preferred that motion had been made to postpone its further consideration until the first day of the next session. The subject matter of the bill is one on which there is, among the friends of the administration, a difference of opinion, and, I have no doubt, an honest difference. The gentleman from South Carolina, a friend of the administration, in his remarks of yesterday, regretted that he should be called upon at this time for final action on the bill. He preferred to wait until an opportunity should be afforded to him to ascertain the wishes of his constituents. In these views I concur. In voting for the present motion, I shall do so for the same reasons which would influence me to vote for a postponement until the next session, considering the effects the same, neither of which determines the ultimate fate of the bill. The vote I am about to give will furnish no evidence of my opinion as to the merits of the bill, or of my action on the question of its final passage. The Sub-Treasury scheme, considered as an administration measure, is novel. In 1835, it was proposed by the whigs in Congress, and received the unanimous and vigorous opposition of the democratic members. Whether it is possible for the opposition to originate a good measure, I will not inquire. They, have, however, been unfortunate in presenting at this session any measure, good, bad, or indifferent, always saving and excepting their sovereign remedy, their universal panacea for all our fiscal maladies, the United States Bank.

I repeat that this measure, as a democratic one is new. Public opinion has not been sufficiently enlightened to draw any correct conclusion of its disposition. It has not been to any considerable extent, the subject of discussion, either in the social circle, or in the primary assemblies of the people. And the same remark is true as regards the newspaper press. I doubt whether five country papers in the State of New York, previous to the session of Congress, had canvassed this project, or given any opinions thereon. The Albany Argus, the leading democratic journal in that State, a journal which possesses great influence over the country press, had not, up to that period, taken ground on this subject. Under these circumstances, it can hardly be expected that resolutions emanating from county conventions could be considered as furnishing that evidence of the popular will as they otherwise would. All the republican conventions have expressed their approbation of the general principles set forth in the Message; few of them, however, have given any expression of opinion as regards this specific measure. No one is more ready, on all occasions, to bow with deference to the will of his constituents, when formed upon reflection and deliberation, and fairly and fully expressed, than myself; and it will ever be my pleasure to carry that will into execution. Were I opposed to this bill, (and I repeat that I give no opinion in regard to it,) I

would, with alacrity, surrender my own opinion at the feet of my constituents.

Sir, there is no pressing necessity for the immediate passage of this bill. The Government is now going on receiving and disbursing its revenue in the same manner as provided in the bill. Should it now pass, it will produce no change. Since the suspension of specie payments, the Government has met with no difficulty in the management of its fiscal operations, neither can it for six short weeks, at which time the bill can be acted on, under the influence of a well informed and plainly expressed public opinion. It has been my misfortune not to have enjoyed an interchange of sentiment with my constituents, as have most of the gentlemen of this House. Business of a private, but pressing nature, has entirely separated me from them since April last. I wish to obey their will, and for this purpose I should be glad, by a personal interview, to ascertain that will; and when ascertained, I shall not fail to execute it.

Mr. CLARK then, according to the pledge he had given, renewed the motion to lay the bill on the table.

Mr. CONNOR then moved a call of the House, and upon the motion asked for the yeas and nays, which were ordered, and were—yeas 186, nays 5.

The call being ordered, was proceeded in, through several stages, till 222 members had responded to their names, when, on motion of Mr. CHAMBERS of Kentucky, it was suspended—171 to 30.

The question then recurring to lay the bill on the table, thereupon,

Mr. GREENELL asked for the yeas and nays, which were ordered.

Mr. LEWIS asked the gentleman who made the motion, to withdraw it, so as to permit an amendment to be submitted, which would put the bill in a form less objectionable to a number of members.

Mr. WILLIAMS should like, he said, very much to accommodate the gentlemen, but there were a dozen others who would also wish to be accommodated in the same way; and he, therefore, could not assent to the request.

Several gentlemen wished to have the amendment read, but it was ruled to be out of order pending the motion to lay on the table.

The question was then taken, and decided in the affirmative—yeas 120, nays 107, as follows:

YEAS—Messrs. Adams, Alexander, Heman Allen, John W. Allen, Ayer, Bell, Bidd, Bond, Boyden, Briggs, William B. Calhoun, John Calhoun, William B. Campbell, John Campbell, William B. Carter, Casey, Chambers, Cuthbert, Childs, Clark, Clowney, Corwin, Cranston, Crockett, Curtis, Cushing, Darlington, Dawson, Davies, Deberry, Dennis, Dunn, Elmore, Everett, Ewing, Richard Fletcher, Filmore, James Garland, Rice, Garland, Cooze, James Graham, William Graham, Graves, Grennell, Griffin, Halstead, Harlan, Harper, Hastings, Hawes, Henry, Herod, Hoffman, Hopkins, Henry Johnson, William Cost Johnson, Kilgore, Lawler, Legare, Lincoln, Andrew W. Loomis, Lyon, Mallory, Marvin, James M. Mason, Samuel Mason, Maury, May, Maxwell, Menzies, Mercer, Milligan, Manbiss Morris, Calvary Morris, Naylor, Noyes, O'Leary, Patterson, Patton, Pearce, Peck, Phillips, Pope, Potts, Rariden, Randolph, Reed, Rencher, Richardson, Ridgway, Rumsey, Russell, Sawyer, Sergeant, Augustine H. Shepperd, Charles Shepard, Shields, Sibley, Slade, Smith, Snyder, Southgate, Stanley, Stewart, Stone, Stratton, Tallaferro, Thompson, Tillinghast, Toland, Underwood, Albert S. White, John White, Elisha Whittlesey, Lewis Williams, Sherrod Williams, Joseph Williams, Christopher H. Williams, Wise, and York—120.

NAYS—Messrs. Anderson, Andrews, Atherton, Beatty, Baird, Bicknell, Birrell, Boon, Bouldin, Brodhead, Bronson, Bruyn, Bynum, Cambreleng, Timothy J. Carter, Chaney, Chapman, Culley, Claiborne, Cleveland, Coles, Connor, Craig, Cushman, Davey, DeGraff, Duncan, Edwards, Farrington, Fairfield, Isaac Fletcher, Foster, Fry, Gallup, Gholson, Glascock, Grant, Gray, Haley, Hammond, Hamer, Harrison, Hawkins, Haynes, Halsey, Howard, Hubley, William H. Hunter, Robert M. T. Hunter, Ingham, Thomas B. Jackson, Jabez Jackson, Joseph Johnson, Nathaniel Jones, John W. Jones, Kemble, Klingensmith, Leadbetter, Lewis, Logan, Arphaxed Loomis, Mar in, McKay, Robert McClellan, Abraham McClellan, McClure, McKim, Miller, Montgomery, Moore, Morgan, Samuel W. Morris, Muhlenberg, Noble, O'Leary, Palmer, Parker, Parmenter, Paynter, Pennybacker, Pettkin, Pickens, Plumer, Potter, Pratt, Prentiss, Reilly, Rives, Robertson, Sheffer, Shiloh, Spencer, Taylor, Thomas, Tins, Toucey, Towns, Turney, Vail, Vanderveer, Wagener, Webster, Weeks, Thomas T. Whittlesey, Jared W. Williams, Worthington, and Yell—107.

So the bill was laid on the table.

Some conversation then arose as to whether a motion would be in order, and when, to take up the bill again—Mr. LEWIS wishing to make that motion, but it was ruled to be out of order, and that there was no other way of reaching the subject then but by a motion to reconsider; whereupon

Mr. RENCHER made that motion.

Mr. BORDEN moved to lay the motion to re-

consider on the table, and called for the yeas and nays, which were ordered, and were—yeas 119, nays 106.

So the motion to reconsider was laid on the table.

#### DEPOSITE BANKS.

On motion of Mr. CAMBRELENG, the House then resolved itself into a Committee of the Whole on the state of the Union, Mr. HOWARD in the Chair.

The subject was discussed at some length by Messrs. ELISHA WHITTLESEY, of Louisiana, CAMBRELENG, LYON, GARLAND of Louisiana, and LINCOLN; when the hour of half past 2 having arrived, the House took its usual recess till 4 o'clock.

#### [EVENING SESSION.]

The House went into Committee of the Whole on the Senate bill for adjusting the remaining claims against the late

#### DEPOSITE BANKS.

The question being on the amendment proposing the payment of six per cent. interest per annum to be required on all sums so deposited, and not paid over.

Mr. LINCOLN resumed his remarks. He said the House should judge the banks as they would in the case of individuals. If an individual deposited a thousand dollars at a bank, and on demanding it again were told that he could not be paid, as his money had been lent out, it would be but poor satisfaction. Yet so it was with the Government money. He considered that they were entitled to no indulgence, and that the proposed interest should be required.

Mr. MARTIN did not contend that the banks should be exempt from paying interest, but he objected to the amount required. He referred to the banks in the State of Alabama, and did not think it was necessary to call on the State for security for the payment of such interest as provided in the bill.

Mr. CHAMBERS said the banks stood in the same relation to Government as the Devil did to the human race; he first tempted them to disobedience, and then ruined them. So the Government had encouraged the banks to extend their circulation, and now was seeking their ruin.

Mr. ADAMS occupied considerable time in a critical examination of the first section of the bill, which he contended had no meaning whatever. He gave his views at some length against the bill, when

Mr. CAMBRELENG hoped the gentleman from Massachusetts would have some mercy on the House, and not speak all night, as it was very desirable that one or two appropriation bills should be sent to the Senate, which could not be done if so much time were consumed in useless debate.

Mr. ADAMS proceeded, until

On motion of Mr. CAMBRELENG, the present bill was laid aside, and the bill "making additional appropriations for the year 1837" taken up in its stead.

After some remarks from Mr. CAMBRELENG, in explanation of some additional items at the end of the bill,

Mr. WISE then took the floor. He said that had been the most important day of the session, for it had just been ascertained that the grand experiment had failed; the gold was all gone, and many of the members would be compelled to take their pay in shin-plasters, or the notes of the District. He wished it proclaimed to the country, that such had been the result of the great humbug gold currency, and that at eight o'clock on the last night of the session, the bubble had burst. As for himself, he had been so fortunate as to get gold and silver; and in order to commemorate the event, he intended to mark one of the half dollars, to be kept by his children, and his children's children, for generations to come. Yes, it had come to this at last. Besides, he would ask them if the man Levi, of what tribe he would not say, was fit to be a Secretary, when it was found that he could not even calculate how much gold he should require to carry his measure into execution? He hoped that some loco loco would now get up, and offer a resolution demanding equal rights, and that one man should

not have all gold, while another was paid in shin-plasters.

He then alluded to an item in the bill then before the committee, in which \$10,000 was appropriated for expenses attending the foreign agency at London in relation to the Smithsonian bequest. He contended that there was no necessity for Dr. Rush to remain at London at such an extravagant outlay, and moved to strike out that item from the bill. He adverted to the present distress of the country, and asked how the Committee of Ways and Means could think of smuggling in such an item at this time. He considered it a most prodigal expenditure.

Mr. CAMBRELENG said the gentleman had applied the word "humbuggery" to the administration, and had charged them with attempting to smuggle the item in question through the House. But he would tell the gentleman he was mistaken, and it was not the first time he had missed his mark. A paper had been lying on their tables for more than four weeks, in reference to this subject, which certainly showed any thing but a desire to smuggle it through the House. And as regarded the charge of extravagance, they were merely carrying into effect the act of 1836, which expressly provided for such appropriations to be made annually, for the object already stated.

Mr. WISE'S motion was disagreed to, taken by tellers—yeas 65, nays 74.

Mr. CAMBRELENG then moved an additional item of \$500 for the contingent expenses in the office of the Treasurer of the United States.

Mr. W. COST JOHNSON then addressed the House for an hour in a discursive speech, in which he complained, in very strong terms, of the breach of faith of the Secretary of the Treasury, in his public promise to pay the members in gold, if they desired it. Members had applied to the Sergeant-at-arms for gold, and had been told that there was no more of it, but that they could have silver, or notes of State banks, or of the District banks. He adverted to a number of other topics; but this was the principal theme of remark.

Mr. BYNUM said a very serious charge had been brought against the Secretary of the Treasury, for which, if guilty, he certainly deserved not only the censure of that House, but also of the whole people of the country. That gentleman had no seat upon that floor, and was thereby debarred from all opportunity of defending himself. Mr. B. did not rise at that time to defend the Secretary, but simply to ascertain the facts upon which this serious charge had been made against that distinguished individual. He would, then, premise that his honorable friend, who had just taken his seat, would find that the Secretary of the Treasury had not imposed upon him or other members, but that others had. He begged permission to have read the letter of that officer to the Clerk of the House, which was done.

The letter was as follows:

#### TREASURY DEPARTMENT,

August 16, 1837.

SIR: The near approach of the session of Congress makes it proper for me to apprise you, in order that the information may be used for the benefit and accommodation of the members of the House of Representatives, that this Department will be prepared to furnish funds for their payment in notes of the city banks or specie, or to give drafts upon several of the Collectors of the customs and Receivers of the public money, or the former deposit banks, in suitable sums, as may be most convenient to any of them.

I am, sir, very respectfully,

Your obedient servant,

LEVI WOODBURY,

Secretary of the Treasury.

W. S. FRANKLIN, Esq.

Clerk of the House of Reps. of the U. S.

Now, sir, (continued Mr. B.) the House would perceive that the honorable gentleman who had made this serious charge against the Secretary of the Treasury, had presumed too much upon that kind of information which often led to error, and involved him who relied upon it, likewise, in error. It had been stated there that the Secretary of the Treasury had proposed to pay the members of that body in "gold alone." The House had heard

the letter of that officer, and it contained so such promise whatever.

Mr. WISE. I would ask the gentleman if he referred to me.

Mr. BYNUM. I do not recollect who it was, but I heard it.

Mr. WISE. I never made such a statement that he promised to pay in "gold alone."

Mr. BYNUM. I care not who made the charge, but it must be in the recollection of the House that the assertion was made that he had given a promise to pay the members in gold; and I appeal to the House to say whether I do not state facts.

Mr. B. would now ask the reading of a letter from the Sergeant-at-Arms, in reply to one he had addressed to that officer, calling upon him to state the facts whether the specie was exhausted, and whether any members had been denied being paid therein, as set forth in that letter of the Secretary of the Treasury.

The following were the letter addressed by Mr. B. to the Sergeant-at-Arms, and his reply:

HO. OF REPRESENTATIVES, Oct. 13, 1837.

SIR: Will you be so good as to inform me if you have stopped paying the members of Congress in specie for their mileage and per diem for the present session, and whether you will not be able to pay the whole off in specie for the present session of Congress. Please answer this in writing.

Yours, respectfully,

J. A. BYNUM.

DEAR SIR: In reply to the above, I can only say that I have drawn from the bank coin (either gold or silver) for every member who has requested it, and have now about \$2,000 in specie drawn for the checks of members, that is now ready to be paid to them; and I have been assured by the cashier of the bank that they were prepared to pay in specie all our checks.

Respectfully, your ob't serv't.

ROD'K DORSEY.

Mr. W. C. JOHNSON said he was in the room of the Sergeant-at-Arms, about an hour or so ago, and he saw a member from Virginia being paid in notes; he did not then see that member in his seat. Mr. J. thereupon, asked Mr. Dorsey whether he was paying off members in gold and silver, and he replied that he was not. Mr. J. asked him if the specie was exhausted, and Mr. D. said that it was. This conversation took place in the presence of half a dozen members of the House. He repeated upon his own authority the Sergeant-at-Arms told him so, and he saw him with his own eyes dealing out notes.

Mr. RIVES said he was not the member from Virginia alluded to, but he thought if this matter were investigated, it would be found that that member preferred taking notes to specie; for Mr. R. had been otherwise informed, that that officer had a stock of specie on hand, and had not refused so to pay any member who desired it. Nay, more, that he had, on several occasions, when members have applied to him for their pay, inquired how they would wish to have it. Some of them replied that they would prefer Treasury notes, contemplating their issue, and, in that event, concluded to wait till they were issued. Some had preferred Virginia bank notes; others had preferred District paper, and others again gold and silver; perhaps none have preferred silver. There was no question that the promise contained in the Secretary's letter had been fully complied with, and every member, who desired it, had been paid in specie.

Mr. WISE again called for the "emphatic" reading of Mr. Woodbury's letter, (as given above) which he still insisted was an imposition.

The letter having been read, Mr. W. cited from it the following passage "as may be most convenient to any of them."

Now, said he, which was most convenient? Specie was the general term, embracing both gold and silver, but the letter was an imposition, for there was not a man there who would take forty or fifty pounds weight of silver, and that in fractions of a dollar, for they could not get it in whole dollars. Was it convenient then for members to take silver? No. Then they were reduced to Hobson's

choice—paper or silver, having no gold, and therefore they were compelled to take paper, and therefore too Levi could not redeem his promise. Mr. W. stated, in confirmation of this fact, that Mr. Halstead of New Jersey, made application to the Sergeant-at-Arms for gold, and could not get it. The Sergeant-at-Arms refused it.

Mr. JOHNSON interposed, and said that, in the remarks, he had made on this subject, he, in no way, intended to impeach that officer, for a more faithful, diligent, and honorable one they had never had.

Mr. WISE remarked that he did not design to impeach the conduct of the Sergeant-at-Arms, and that officer would not so understand him, but there were a dozen members who could confirm what he had stated. Mr. Dorsey had to pay out what funds were in his possession, or he was supplied with, and gold, at present, formed no part of them.

Let him also inform the House of another fact, that the very specie they were then paid with, even the silver, was the bank's specie, and not the Government's. The Bank of the Metropolis had loaned the Government some twenty or thirty thousand dollars in specie for this purpose, for the Government had neither gold nor silver of its own to pay out.

Mr. BRIGGS inquired of the Chair what was the question.

The CHAIR stated it was on the clause respecting the item for an agent in London to prosecute the Smithsonian bequest.

Mr. BRIGGS expressed an earnest hope that the committee would take the question. There they were at 10 o'clock of a Saturday night, on the last night too of the session, with much important business to act upon, wasting about two hours on the contemptible question, whether the Sergeant-at-Arms had gold or silver to pay the members! In the name of heaven, he called upon the members of that House to continue this discussion no further, a discussion, together with the question involved in it, of no consequence to any human being on earth.

While up, he must say, that the effort of his friend from Virginia, (Mr. Wise) to fix any thing wrong upon the Secretary of the Treasury, from the reading of his letter, did not meet Mr. B's approbation. The Secretary told the Clerk of the House, that the members would be paid either in notes of the city banks, or specie, or drafts upon collectors or receivers, or deposit banks, in one or the other, as should suit their convenience. Now he would ask the gentleman if it was a fair construction, to say that this was a promise to pay in "gold?"

Mr. WHITTLESEY, of Ohio, called the gentleman to order, for irrelevancy.

Mr. BRIGGS. I will come to order, sir; for I am too well aware of the utter irrelevancy of this whole discussion; and being so, I stand corrected.

Mr. HAWKINS begged leave to state what he witnessed in relation to this matter, in the room of the Sergeant-at-Arms.

Mr. CALHOUN of Massachusetts objected.

Mr. GLASCOCK hoped the gentleman from North Carolina would be allowed to go on, especially as he was a member who had never, in his life, delayed the business of the House. [Loud and general cries of "go on!" "go on!"]

Mr. HAWKINS then made a statement substantially as follows: That he had stepped in the room where the Sergeant-at-Arms was paying the members, when he heard the member from Virginia from the Richmond district, (Mr. Robertson,) apply to that officer to know in what kind of currency he intended to pay him. Mr. Dorsey observed that he could pay him in specie, and asked him what kind of money he wanted. Mr. Robertson stated that he wished Virginia paper. Mr. Dorsey said he had not got Virginia paper, but would try and get it for him. One of Mr. H's colleagues, standing by, said if Mr. Dorsey would give him specie for fifty dollars of United States Bank paper, perhaps these notes would suit Mr. R's convenience. Mr. Robertson said he would not take the notes of the United States Bank, but would much prefer Virginia bank paper to it.

The amendment was then disagreed to.

Mr. WISE then moved to amend the clause by reducing the item for the expenses of the agency to London, to attend to the Smithsonian bequest, from 10,000 to \$5,000.

Mr. CAMBRELENG said he had not the least objection, because, if the larger sum was found to be requisite, it could be provided for next session.

The amendment was accordingly agreed to.

On motion of Mr. CAMBRELENG, the committee then rose and reported, and the amendment having been concurred in, and then ordered to a third reading, it was then read a third time and passed.

The joint resolution of the Senate suspending the rules which prohibit the transmission of bills from one House to the other during the last three days of the session, and also the presenting of bills to the President within that time, was agreed to, after amending it so as to except the divorce banks bill from its operation, which was excepted, to on motion of Mr. THOMPSON of South Carolina.

On motion of Mr. F. O. J. SMITH, the Committee of the Whole on the state of the Union were discharged from the further consideration of the bill to settle with the deposit banks.

#### SEMINOLE WAR.

On motion of Mr. CAMBRELENG, the House then again went into Committee of the Whole on the state of the Union, (Mr. Briggs of Massachusetts, in the chair,) on the bill making appropriations for the Seminole war.

The bill having been read through,

Mr. CAMBRELENG submitted a variety of statements, showing the necessity of a further call of \$1,600,000, among which was the following letter from the Secretary of War:

WAR DEPARTMENT, Sept. 14, 1837.

SIR: The Seminole Indians having a second time failed to comply with their engagements, this department has been compelled to make extensive preparations for a vigorous prosecution of the war in Florida. The success of the measures adopted by the Government, in pursuance of a humane policy towards the Indians, and our duty to protect the persons and property of the citizens of that Territory from outrage and violence, leave us no alternative other than the enforcement of the treaty; and an effort is being made to enable the officer charged with its execution, effectually to accomplish this object. The nature of the country and of the climate, has enabled the enemy to prolong this contest to an unexpected length; but the experience of the officers who, with so much constancy and courage, have hitherto conducted the military operations there, the knowledge of the country they have acquired, and the means which will be placed at their disposal, all give reasonable hopes of bringing the war to a speedy and successful close.

The disastrous consequences of an unsuccessful summer campaign involved the country in great expenses, that were much increased during the protracted negotiations which terminated so unfortunately by the Indians again violating their treaty obligations. During this period, vessels were kept in readiness at great cost, and other means provided to facilitate the emigration of the Indians, while the ordinary expenses of the war establishment were necessarily continued. These unavoidable expenses, with those incurred by the preparations now making to collect a sufficient force and ample supplies for the ensuing campaign, have exhausted the means placed at the disposition of this department for the suppression of Indian hostilities, and will render further legislative provision necessary.

There will be required for the suppression of Indian hostilities, under the following heads, the sum of \$1,588,848 22, to wit:

For forage, means of transportation, and various other objects of supply, to be procured by the Quartermaster's Department, and to meet the contingent expenses of the service	\$800,000 00
For pay of volunteer force that will be employed in Florida	600,000 00
For clothing and equipage to be provided by the Purchasing Department	153,848 22

For supplies to be furnished by the	
Ordnance Department	25,000 00
For medical supplies	10,000,00
	<u>\$1,588,848 22</u>

With a view to an economical prosecution of the important work now in progress on the Red river—the removal of the raft—it is respectfully suggested that the sum of \$25,000 be appropriated at the present time. This amount, it is confidently believed, if applied now, will enable the department to complete that object; whereas, if the works be suspended for want of funds, until the usual period of making the annual appropriations, much precious time will be lost, and great additional expense incurred.

Very respectfully, your most obedient servant,  
J. R. POINSETT.

Hon. SILAS WRIGHT, Jr.

Chairman Committee of Finance, Senate.

The bill was then laid aside, to be reported to the House.

#### NEW YORK FIRE.

Mr. CAMBRELENG moved that the Committee take up the bill to remit the duties on certain goods destroyed by fire in the city of New York.

Mr. WHITTLESEY of Ohio wished to inquire of the gentleman if he thought to pass that bill the present session?

Mr. CAMBRELENG replied that he hoped so, and made an earnest appeal to the Committee to give its approbation to the measure.

The bill was then taken up, and having been read by the Clerk,

Mr. UNDERWOOD, to test the sense of the Committee, proposed that it be laid aside, and that the Committee refuse at present to act upon it.

Mr. CAMBRELENG hoped that motion would not prevail.

Mr. HOFFMAN also joined in that wish, and the motion was disagreed to, ayes 66, noes 67.

Mr. CAMBRELENG concurred with the gentleman from Kentucky, that they had not time to discuss this bill then, but he did not consider it necessary, after the very long debate upon it last year, which had been spread before the nation, and he therefore trusted the committee would act upon it at once, and report it to the House.

Mr. THOMPSON, of South Carolina, strongly opposed the bill, and expressed his determination to defeat it, and moved that it be laid aside.

Mr. PHILLIPS said a few words in its support.

Mr. OWENS moved that the committee rise, and report the Seminole war bill, which was agreed to; and that bill having been engrossed, was read the third time and passed.

#### DEPOSITE BANKS.

On motion of Mr. JOHNSON of Louisiana, the bill from the Senate, "for adjusting the remaining claims upon the late deposite banks" was taken up.

Mr. J. proposed to amend the bill by striking out the clause granting the deposite banks, four, six, and nine months, and by inserting the following: "The first instalment to be paid on the first day of July next, the second on the first day of January, 1839, and the remaining instalment on the first day of July, 1839." He explained the important services rendered to the Government by the two deposite banks in the city of New Orleans, and the strong claims they had for indulgence; and he exhibited a statement showing the millions which had been transferred, by order of the Secretary of the Treasury, from other points to the said banks in New Orleans, and paid there. He remarked, that those banks would probably sustain immense losses by remittances in exchange to points designated by the Secretary of the Treasury, in consequence of the proiest of the greater portion of them. Had the bills so purchased and remitted been paid, nearly the whole debt due to the Government would have been extinguished. They were drawn, he said, on houses believed to be perfectly good at the time, and would have been punctually paid, but for the recent pressure, which had created such a convulsion in the commercial affairs of the country. Notwithstanding those losses, however, the banks, he said, are now prepared, and always have been, to pay the whole amount due by them, in such

funds as they received in deposite. Mr. J. contended, that, independently of the claims of the deposite banks upon the Government for indulgence, it was due to the people that it should be granted. That by pressing the banks, a pressure would be created upon the people. He was decidedly opposed to the amendment presented by his colleague, (Mr. Garland) as well as to the one offered by the gentleman from New York. They were both calculated, if adopted, to operate injuriously.

Mr. POPE and Mr. ADAMS severally opposed the bill; when the amendment was agreed to—ayes 77, noes 54.

Mr. CAMBRELENG said, to put an end to this matter, he moved the previous question.

Mr. UNDERWOOD inquired, before he could vote for it, if the banks were required to pay interest?

Mr. CAMBRELENG replied in the affirmative. The previous question was then seconded, and the main question having been ordered, the amendment was concurred in; and the question being on the final passage of the bill,

Mr. WILLIAMS of North Carolina said he was totally opposed to this bill in every shape and form; and, therefore, he asked for the yeas and nays, but they were refused.

Mr. BELL opposed the bill, and demanded some explanations, as to its details, of the chairman of the Committee of Ways and Means, which were given. He then suggested, as the best mode of disposing of the subject at so late a period in the session, to authorize the Secretary of the Treasury to suspend all legal proceedings against the banks referred to in the bill, until the next session of Congress. He considered the bill to be loosely drawn, containing no provision for the case of those banks against which suits had been actually instituted.

After a few words from Mr. MARTIN of Alabama, the question was taken on the passage of the bill, as amended, and decided in the affirmative.  
GENERAL APPROPRIATION BILL—AMENDMENTS THERETO.

On motion of Mr. CAMBRELENG, the House then resolved itself into a Committee of the Whole on the state of the Union, (Mr. Briggs in the chair,) and took up the amendments proposed thereto by the Senate. There were three.

The first makes appropriation of \$25,000 for the printing and binding of certain documents ordered by the Senate.

The second provides for an additional appropriation of \$2,000, for extra clerk hire in the office of the Solicitor of the Treasury, under laws passed at the present session of Congress.

The third bill authorizes the Secretary of the Treasury to settle all outstanding Treasury drafts or transfers on the deposite banks, under the deposite act of 1836, such drafts or transfers to be received at par in the payment of debts, without allowance of interest or damages thereon.

Mr. GARLAND of Louisiana made objection to the second proposed amendment; and, by consent, the other two amendments were first taken up, and concurred in by the committee.

The second amendment being then exclusively under consideration, after some remarks from Messrs. JOHNSON of Louisiana, and THOMPSON of South Carolina, the proposition was rejected—ayes 67, noes 62.

On motion, the committee then rose, and reported the amendments to the House. And the question being on the concurrence of the House with the Senate in the proposed amendments, (the question being taken on them severally,)

Mr. WHITTLESEY of Ohio, demanded some explanation as to the second amendment calling for an additional appropriation of \$25,000 for certain printing and binding.

The CLERK read several resolutions of the Senate authorizing the printing of certain documents relating to the session of the District of Columbia to the United States, and other subjects; and,

After some remarks from Messrs. CARTER, MENFEE, CUSHING, and DUNCAN, the amendment was concurred in.

Mr. CUSHING then asked for some information in regard to the third proposed amendment; and

whether the provisions it contains were intended to reach, or apply to, any particular case?

Mr. CAMBRELENG made a brief reply.

The first and third amendments of the Senate were agreed to, the House non-concurring with the second.

#### THE NEW YORK FIRE BILL.

Mr. CAMBRELENG moved that the House go into Committee of the Whole on the bill to relieve the owners of goods destroyed at the great fire in New York from the payment of duties thereon.

Mr. RENCHER moved that the House adjourn: lost.

The motion to go into committee was also lost—ayes 66, noes 70.

#### HOOR OF MEETING ON MONDAY.

Mr. WHITTLESEY of Ohio asked the consent of the House to offer a motion, that when the House adjourn, it be to meet on Monday, at 7 o'clock, a. m. (Cries of No! no! from all sides.)

Mr. WHITTLESEY named 8 o'clock, a. m. (Cries of No! repeated.)

Mr. OWENS named 9 o'clock, a. m. (Same cries.)

Mr. WHITTLESEY demanded the suspension of the rule, to enable him to make the motion: this motion, requiring a vote of two-thirds, prevailed—ayes 119, noes not counted; and the motion to meet at 8 o'clock on Monday morning was carried.

Another unsuccessful motion was then made to adjourn.

Several enrolled bills were presented, and signed by the Speaker.

Mr. DUNCAN, on leave, had the record of his vote on the motion to lay the motion to reconsider the vote on the Sub-Treasury bill this day, changed from the affirmative to the negative.

#### THE DEPOSITE BANK ADJUSTMENT BILL, AS AMENDED.

The Senate, having concurred in the amendment proposed by the House to this bill, proposed a further amendment, declaring that the default referred to in the bill shall be understood to be a failure of any of the deposite banks to pay the drafts of the Treasury; and that such bank be charged six per centum per annum interest on such drafts for the time of default.

Messrs. McKAY, POPE, and GRAVES, made a few remarks upon the proposed amendment; and Mr. LOOMIS, of Ohio, moved to lay the whole bill on the table; which motion was lost.

Mr. GRAVES thought the amendment partial, and oppressive in its provisions, and was making some remarks to that effect, when he observed that he should suspend them until the Chair had finished his conversation with another member.

The SPEAKER said it was usual for the Chair to answer such questions, in regard to the pending business, as any member choose to come to the Speaker's table to propound; that he was doing this then, and could not be expected to look intently on every gentleman who addresses the House.

Mr. GRAVES thought the Chair could not attend to individual members of the House and to the business of the Chair at one and the same time.

The SPEAKER called the gentleman to order; and

Mr. GRAVES proceeded with his remarks. He wished the amendment proposed to be so modified as to be uniform in its application to all the deposite banks.

Mr. LOOMIS of New York, reviewed the course the debate had originally taken upon the proposed amendments, and upon the different propositions, as made by himself and others, and the action of the House upon the same. He thought the bill had better not pass in the form proposed by the Senate, but should rather, for the present, be postponed, and brought forward hereafter in a more digested form. Mr. L. closed his remarks by moving to postpone the further consideration of the bill until the first Monday in December next.

Mr. POPE of Kentucky, said he had conceived that there were two objects for the convention of Congress at this session: the first was, to relieve the mercantile distress of the country; and the second, to devise such means as would relieve the banks, and enable them to resume specie payments immediately. He was in favor of such action

on this bill as would accomplish the latter object most speedily.

Mr. CAMBRELENG reminded the House that it was then ten o'clock at night, and that the proposition before them was the only one impeding their progress.

Several gentlemen expressed opinions favorable to immediate action on the amendment, and Mr. GRAVES hoped that the gentleman from New York, (Mr. Loomis,) would withdraw his motion; which suggestion was complied with by the latter.

The question being on concurrence with the Senate in their amendments,

Mr. WISE called for a count, which was ordered, and it appeared that the House was without a quorum.

A motion being made to proceed with the consideration of the subject before the House,

Mr. WISE would not consent to act on a matter so important in that state of the House. Here were some 80 members doing the business, to transact which, 240 had been sent here! Nor was there a quorum in the Senate, either; and on a bill like this! at a distress session, too! He could not consent to it.

Mr. HOWARD moved that the House non-concur with the Senate in its proposed amendment, with a view to a conference between the two Houses.

Mr. LEWIS remarked that there was neither a quorum in the Senate nor in the House.

Mr. ADAMS said, the House can neither concur nor non-concur. It was then Sunday morning, he observed, and he would move that the House adjourn. But he withheld this motion until the question on concurring was put, when it appeared (by a count of tellers) that there was no quorum present, 61 voting in the affirmative, and 22 in the negative.

Mr. McKIM moved that the House do now adjourn.

Mr. WISE. Let us see who the members are who do not choose to adjourn under these circumstances. I call for the yeas and nays.

The yeas and nays were ordered, and the vote stood: Yeas 38, nays 50.

Mr. CAMBRELENG then said that it would be subjecting the members present to too much inconvenience to keep them here during the tedious process of a call of the House, so late at night. But, if the officers of the House do their duty, a quorum may be kept on Monday, when he hoped to see such an attendance as would result in the transaction of the public business.

Mr. THOMAS suggested that it was better to pass a vote of non-concurrence, which would leave this question just where it was, when many members went home, believing that no further action would be had upon the bill before the House.

Mr. HAYNES could not consent to do business with the knowledge that there was no quorum present. Before any question could be entertained, the presence of members must be compelled.

Mr. LEWIS. Let us have a call of the House, then, and compel the attendance of members.

Mr. ADAMS would not consent to act upon any question without a quorum. This bill he considered as the price of the deposit postponement bill, passed this session by Congress; and a measure of too much importance to be acted upon in that state of the House. He would sit there till Monday morning, if required, but he, for one, would not do business with only eighty members present.

Mr. HAYNES said he was convinced nothing could be done that night, and he therefore would move an adjournment.

This motion prevailed, without a division, and the House adjourned at half past one o'clock on Sunday morning.

#### IN SENATE,

MONDAY, OCTOBER 16, 1837.

Mr. NORVELL presented a memorial; which was ordered to lie on the table.

Mr. LINN offered a resolution which was agreed to, calling on the President to furnish (if not incompatible with the public interests) at an early

period of the next session, any correspondence that may have taken place between this Government and foreign powers, in relation to our territory west of the Rocky Mountains.

A message was received from the House of Representatives, stating its concurrence in the amendment of the Senate to the bill extending the indulgence to the late deposit banks.

Mr. NORVELL then moved that the Chair appoint a committee on the part of the Senate to meet on the part of the House to wait on the President, and ask if he had any further business.

Messrs. NORVELL and CLAY of Alabama were appointed to meet the committee on the part of the House; when, after a few moments,

Mr. NORVELL announced that the committee had waited on the President, and been informed that he had no further business for the Senate, but tendered his acknowledgments for their attention to the public business, and wishing them all happiness, and a safe return to their homes.

On motion of Mr. NILES,

The Senate then adjourned till the first Monday in December.

#### HOUSE OF REPRESENTATIVES,

MONDAY, OCTOBER 16, 1837.

The House, pursuant to the order adopted on Saturday night, assembled at 8 o'clock, a. m.

On motion of Mr. CAMBRELENG, the ordinary business of calling for petitions, and reports of committees, was dispensed with.

#### DEPOSIT BANKS.

The House then resumed the consideration of the amendment of the Senate to the bill granting indulgence to the deposit banks, declaring the time at which payment of interest on balances due shall commence, viz: from the date of any default or neglect to pay any draft or requisition of the Treasury.

Mr. HAYNES said a few words on the amendment, in relation to its application only to banks which had been delinquent. This excluded from the provisions of the bill entirely those which had not been drawn upon at all.

Mr. ADAMS spoke with warmth in opposition to the bill and amendment. Its provisions having reference to the first section of the bill, would, in effect, apply not to banks which were delinquent, but involved the absurdity of applying it only to banks which were not delinquent. Mr. A. said he had demonstrated this at a previous sitting to the conviction, he believed, of every one who had heard him. The chairman of the Committee of Ways and Means had not so much as attempted to answer the argument. And, Mr. A. now declared, in the presence of this House, that if this bill was to go forth to the nation with that section in it, it would be a disgrace to our legislation. The first section of the bill extended relief to those banks only which were not delinquent; and, as the amendment had reference to the same banks, it would, in fact, have no operation at all, unless from a constructive power in the Secretary of the Treasury, and a fraudulent application of it to such banks as were delinquent. If the obstinate perseverance of the chairman of the Committee of Ways and Means in forcing this bill through the House with this obvious absurdity on its face was to succeed, it should not be at least without opposition on the part of Mr. A. He would read the first section once more, and would demonstrate, a second time, that it had reference only to banks which were not delinquent. Let the chairman (cried Mr. A.) answer me, if he can. [Mr. A. here read the section referred to.] What a power (said he) is here given to the Secretary of the Treasury! The power of selecting and discriminating between bank and bank, at his pleasure; of refusing to apply the benefits of the act to any bank he chose; for he might reply to its application for relief: "You have not complied with the requisitions of the Department, and, therefore, you can not be relieved." While, when a similar application was made by another bank whom he wished to favor, he might pass over the matter in perfect silence and grant the request. It gave him the power of a double construction; and under that power he might select any bank he chose to ruin,

and any other he chose to save, and apply the one construction or the other as best suited his purpose. It carried either fraud or absurdity upon its face.

Mr. A. then went into a recapitulation of what had passed in the House on Saturday in relation to the bill, characterizing the amendment offered by Mr. Loomis, of New York, as proposing nothing but simple, rigorous, abstract justice to the States which had been injured by the postponement of the deposits, by requiring that the banks of those States which held large amounts of money which would, but for that postponement, have gone to other States, should pay legal interest for its use. The subsequent amendment offered by Mr. Johnson of Louisiana, he referred to a consummation of the bargain which, he said, had been with so much decency consummated in the face of the House between the chairman of the Committee of Ways and Means and certain gentlemen from Louisiana, whose votes he wanted to pass his postponement bill.

Mr. RICE GARLAND here interposed. Does the gentleman refer to me?

Mr. ADAMS. I refer to no individual whatever.

Mr. R. GARLAND. Am I the gentleman from Louisiana referred to?

Mr. ADAMS. I did not allude to him more than to other gentlemen coming from those States where this money lies. I had no particular reference to one of them more than to another.

Mr. CHAPMAN. I am the only other member who can be alluded to. I made no bargain of any sort about the matter. I have been no devoted friend to the measure from its inception to its consummation. The gentleman, therefore, can not refer to me. In truth, I do not believe this bill will be of any benefit to the deposit banks at all.

Mr. ADAMS. I did not allude to that gentleman—far from it; I am fully aware that he preferred that the bill should not pass: I would to God that all the gentleman coming from the States most interested could say the same. I repeat that the bargain was pointed out by the gentleman from Georgia, (Mr. Dawson) and a gentleman from Missouri, at the very time it took place; and I say further, that I take this amendment to be the consummation of that bargain. When it was proposed, in committee, that the bill to postpone the deposits should be laid aside until this bill for the relief of the banks should first be acted upon, the chairman of the committee did openly pledge himself, when resisting that arrangement, that those banks should be liberally dealt with: and here we have the fulfillment of that pledge.

Mr. CAMBRELENG. Is it in order to refer, in the House, to what passed in Committee of the Whole.

The SPEAKER was replying, when Mr. ADAMS said he hoped the Chairman of the Committee of Ways and Means would not be suffered to put him down. He should declare the disgraceful scene, whatever interest that gentleman might have in shutting his mouth.

Mr. CAMBRELENG. It is disgraceful to you, if to any one; and this is not the first time the gentleman has attempted to retard and defeat the public business by talking it down. I insist, Mr. Speaker, upon the point of order.

The CHAIR here pronounced it wholly out of order to refer, in the House, to what had been said or done in Committee of the Whole.

Mr. ADAMS then said he would put a case—and would suppose that certain facts had transpired, not here, but in another Legislature—in the moon, if gentlemen pleased. He then repeated what he had before stated as to the history of the amendments to the bill. When the amendments were still pending, the objections all urged, and none of them answered, the bill had been laid aside, other bills had been taken up, when the committee rose and reported progress on the whole. Immediately thereupon it had been moved by a member from Maine, that the Committee of the Whole be discharged from the further consideration of this bill; the effect of which was to cut off the amendment of the gentleman from New York, (Mr. Loomis.) The amendment of the gentleman from Louisiana (Mr. Johnson) was then offered,

# CONGRESSIONAL GLOBE.

25TH CONG.....1ST SESS.

THURSDAY, OCTOBER 19, 1837.

VOLUME 5.....No. 10.

BY BLAIR & RIVES.

—WEEKLY—

PRICE \$2, FIRST TWO SESSIONS.

[Continued from No. 9.]

and instantly on its adoption the chairman of the Committee of Ways and Means sprang to his feet and demanded the previous question, and the bill was thus passed almost by acclamation.

Now the bill came back from the Senate with an amendment, which would render the whole either a palpable absurdity or else an instrument of fraud. And this was the way in which the business of this whole session had been conducted; a session which had been called for the purpose of organizing an entirely new system of finance for the country. The House had sanctioned a series of measures all tending to this object; but the most pernicious and cruel of them all had, he thanked God, been laid upon the table. At least a respite had thus been afforded to the nation, a breathing spell, before it had imposed upon it that state of servitude which the system, if successful, would not have failed to fasten upon it. He now said, openly, in the face of the House, that whenever objections, however strong, had been urged against the system of measures which had originated in the Treasury, with the exception of a few petty paltry amendments proposed by the chairman of the Finance Committee, that gentleman had no other recourse against them but to call upon his party to "toe the mark;" that had been his answer, and his whole answer, to every argument. That had been the history of the session. The chairman of the Committee of Ways and Means, the minister of the Executive, the Chancellor of the Exchequer, who was here to carry into effect the receipts of the Treasury Department, had no other answer to any objections, either in gross or in detail, than this cry of "toe the mark." Mr. A. had asked of him what part of this bill applied to delinquent banks? What it was that by the bill the United States gave up? And he had been utterly unable to answer; yet, from his official situation, it was his place to answer inquiries put to him in relation to the public measures he brought forward. His only reply had been to get the bill laid aside, to consummate his bargain, and then to call the previous question. Such had been his course throughout; and Mr. A. could not suffer the session to come to a close, without exposing and denouncing it to the country. Had the system originated in Heaven, (which seemed to be the very contrary place to that in which it did originate,) questions, of a relevant nature, and properly presented, might be asked of him who brought it into the House; and it was his official duty to respond to them, and to give his reasons, if any he had. But nothing of this had been done at all. He had got the deposit bill passed, after attempting to force it through the House in its original form, by admitting the minimum amendments, and excluding every other.

The CHAIR here admonished Mr. A. that the deposit bill could not now be discussed; it was not before the House.

Mr. A. I consider each and all of these bills as part and parcel of one system, and therefore—

The SPEAKER. This is a question of concurrence with the amendment of the Senate to a different bill; it has no connection with the deposit law; and it is out of order to discuss that law at this time.

Mr. A. Does the Speaker deny that these measures constitute one system? Does he decide that this bill and amendment are not part of that system?

The SPEAKER. The Chair is not called to decide that question. This is not the deposit bill; and the deposit bill can not now be discussed.

Mr. A. I was not discussing the deposit bill. I was connecting the other measure with that now before the House: I was showing its connection with this bill and amendment. They are so connected that they can not be separated; and I was deriving an argument against concurring in this amendment from external objects, and the anti-deposit law among others.

The SPEAKER here said that if it was the object of the gentleman to connect it with the present subject, and there could be shown to exist such a connection, it would be in order to introduce it; but the Chair could perceive no connection. He would leave it to the judgment of the gentleman from Massachusetts.

Mr. CAMBRELENG said he did not hear the decision of the Chair; if the gentleman from Massachusetts was out of order, he hoped he would not be permitted to proceed.

Mr. A. Well: since what I was saying is so exceedingly disagreeable to the chairman of the Committee of Ways and Means, and apparently to the SPEAKER of this House, I will sit down.

The SPEAKER. It is not disagreeable to the SPEAKER: he has no desire to interrupt the gentleman from Massachusetts: but the CHAIR must discharge its official duty;

Mr. A. I have no doubt of the disposition of the SPEAKER to discharge his duty "as he understands it;" but, unfortunately for me, the SPEAKER understands it a different way from what I do.

Mr. CAMBRELENG rose to order. When a member was called to order by the CHAIR, and was manifestly out of order, and was ordered to take his seat, was it not his duty, under the rules of the House, to take his seat? and could he again proceed without the leave of the House?

The SPEAKER said that when a member was so repeatedly out of order as to be directed by the CHAIR to take his seat, the rule was as the gentleman from New York had stated. But, in the case of the gentleman from Massachusetts, the CHAIR had abstained from interposing by an absolute command, as he was empowered by the rules to do; and the gentleman was therefore at liberty to proceed, if he confined himself to the subject before the House.

Mr. A. Out of tenderness to the Chairman of the Committee of Ways and Means, I will say no more.

Mr. CAMBRELENG. All I shall say in reply is, that as the gentleman has referred, in his suppositious case, to a council in the moon, I should consider the gentleman himself as very fit to be a member of such a council.

I demand the previous question.

Mr. LINCOLN here moved to lay the bill and amendment on the table; and as, by the rules, this question takes precedence, the question was put upon laying on the table.

Mr. RICE GARLAND hoped the motion would be withdrawn, that he might have an opportunity of replying to the very unjustifiable attack made by the gentleman from Massachusetts upon the members from Louisiana.

Mr. LINCOLN declined, and asked for the yeas and nays, but they were refused; and the question was thereupon put to the House, and decided in the negative without a count.

The call for the previous question was seconded—ayes 87, noes 37.

The previous question was agreed to—ayes 92, noes 32.

The main question, on concurring with the Senate in their amendment to the bill, (as above stated,) was then put, and carried by yeas and nays, as follows:

YEAS—Messrs. Alexander, Heman Allen, John W. Allen, Anderson, Andrews, Atherton, Ayer, Beary, Birnie, Bell, Bicknell, Biddle, Birdsall, Boon, Boudin, Brodhead, Bronson, Bruyn, Cambreling, John Campbell, Casey, Chambers, Cilley, Claiborne, Clark, Cleveland, Coles, Connor, Corwin, Crockett, Cushing, Cushman, Davee, De Graff, Duncan, Dunn, Everett, Ewing, Foster, Gallup, James Garland, Gholson, Goode, William Graham, Grant, Graves, Griffin, Hamer, Harlan, Harrison, Harper, Hawkins, Herod, Hoffman, Hopkins, Howard, Hubley, Jabez Jackson, Jenifer, Kilgore, Lewis, A. W. Loomis, Maxwell, McKay, Robert McClellan, Abraham McClellan, McKim, Menefee, Miller, Montgomery, Morgan, Mathias Morris, S. W. Morris, C. Morris, Muhlenberg, Maury, Noble, Ogde, Palmer, Parker, Parmenter, Patton, Phillips, Plumer, Pope, Pratt, Prentiss, Reilly, Ridgway, Rives, Runsey, Shields, Shepler, Southgate, Spencer, Stewart, Taylor, Thomas, Titus, Toland, Towns, Turney, Vail, Webster, A. S. White, E. Whittlesey, C. H. Williams, and Yell—106.

NAYS—Messrs. Adams, Bond, William B. Calhoun, Wm. B. Campbell, W. B. Carter, Chapman, Cheatham, Curtis,

Davies, Dennis, Edwards, Richard Fletcher, Fillmore, Rice Garland, James Graham, Greenell, Hastings, Haynes, Henry, Holmes, Robert M. T. Hunter, Lawler, Lincoln, Arphaxed Loomis, Marvin, Mercer, Naylor, Patterson, Peck, Potts, Reed, Russell, C. Shepard, Sibley, Snyder, Stanly, Stratton, Taliaferro, Tillinghast, Underwood, Lewis Williams, Joseph L. Williams, Wise, and Yorke—49.

[This decision completed the passage of the bill through both Houses.]

Mr. CAMBRELENG then rose and drew the attention of the House to a very valuable work that had been published, containing all the Treasury reports on the subject of the finances, from the year 1789 to the present time, and remarked, that it would not only be very useful to be deposited in the library, but, as a statistical work, was absolutely indispensable as a book of reference. He, therefore, asked leave to submit a resolution for the purchase of three hundred copies of the said work, at a price not exceeding the usual rates paid for congressional documents ordered by the House.

The resolution having been received—  
Mr. WHITTLESEY of Ohio objected to it as incurring an expense without due consideration. A proposition of this kind ought to undergo the revision either of the Committee of Accounts or the Committee on the Library.

Mr. CAMBRELENG replied that it had met the approbation of the chairman of the Committee of the Library (Mr. Patton,) who would have submitted the resolution, if he had been in the House, and had also been approved of by another member of that committee then present (Mr. Lincoln,) and likewise by the absent member (Mr. Crary.)

Mr. WHITTLESEY wished to see the work first before he would consent to its purchase.

Mr. CAMBRELENG replied, that it was the only work he had seen confined exclusively to the Treasury reports. In fact, none of them had ever been published.

Mr. LINCOLN expressed his readiness to vote for the purchase of this work.

Mr. HARLAN moved to lay the resolution on the table; which was agreed to.

Mr. ROBERTSON submitted a plan for the receipt, custody, and disbursement of the public moneys, which he proposes hereafter to submit; and on his motion it was ordered to be printed.

[This is the same heretofore submitted by Mr. R. and printed in the Globe.]

Mr. WILLIAMS, of North Carolina, asked leave to introduce the following resolution:

Resolved, That the Clerk of the House be instructed, with the aid of the Commissioner of Public Buildings, to cause the chair of the Speaker, and the seats of the members, to be restored to their former position in the hall.

Several members objected to the introduction of the resolution, when

Mr. MERCER moved to suspend the rules so as to introduce the same.

The motion was disagreed to, two-thirds not rising in its favor.

The resolution which had been received from the Senate a few minutes before, for the appointment of a joint committee to wait on the President of the United States, and inform him that, unless he had other communications to make to Congress, the two Houses were about to close the present session by an adjournment, was now taken up and agreed to, and

Mr. THOMAS, of Maryland, Mr. POPE, of Kentucky, and Mr. TAYLOR, of New York, were appointed of the committee on the part of the House.

Mr. LEWIS, of Alabama, asked and obtained leave to lay on the table the following amendment, which he wished to have moved to the sub-Treasury bill. It was also ordered, on his motion, to be printed:

In the 3d section strike out all after the word "office," in the fifth line, to the words "ten thousand dollars," in the ninth line, and insert the following:

"All such excess shall be deposited, without delay, to the credit of the Treasurer of the United

States, in a bank or banks most conveniently situated, that may be selected by the Secretary of the Treasury, on condition that the said bank or banks are not to use or employ the said deposits as a fund for discount, nor mingle the same with the proper funds of the banks; and that they shall also give receipts or certificates for the sum thus specifically deposited, to return the same when required; and it shall be the duty of the Secretary of the Treasury, in making his selection, to give preference to such bank or banks as may at the time be the depository of the funds of the State, Territory, or District, in which they are situated; and, in case there be no bank willing to receive the public money on the terms aforesaid, the excess aforesaid shall be transferred to some other depository that may be designated by the Secretary of the Treasury: *Provided, always,* That the disbursing warrants of the Treasurer shall be drawn on the public depository, provided for in the first section of this act; and, in case of a deficit of funds to meet the same, he or they shall draw upon the funds specifically de-

posited by him or them in bank to meet the same, under such regulations as the Secretary of the Treasury may prescribe."

Mr. PALMER of New York, asked and obtained leave to lay on the table and have printed the following amendment to the Sub-Treasury bill, which he gave notice he would move when that subject should come before the House at the next session of Congress:

SEC. 11. *And be it further enacted,* That in places where the amounts ordinarily held in deposit at one time shall exceed the sum of fifty thousand dollars, it shall be lawful for the Secretary of the Treasury, whenever, in his opinion, the public interests will be promoted thereby, to employ, under the direction of the President of the United States, one or more of the State banks as public depositories, instead of the depositories provided by this act: *Provided,* That the public funds shall be placed therein in special deposite; and the duties of receiving, keeping, and disbursing the same, and all other duties required by this act, to be rendered by the officers

of said banks, for such compensation as may be agreed upon by and between the Secretary of the Treasury and said banks; and said banks, and the officers and clerks thereof, under whose charge the same may be, shall be under like restraints from loaning or using the same, and subject to like penalties for violations therefor as are provided for in the first and ninth sections of this act.

A number of petitions and memorials were, on leave, presented and laid on the table by Messrs. CUSHING, CLAIRBORNE, THOMAS, BICKNELL, MERCER, HOWARD, and TAYLOR.

Mr. THOMAS having reported that the committee appointed for the purpose had waited on the President, and received, for answer to their message to him, that he had no further communication to make, and expressed a hope that the members might return in health and prosperity,

The House then adjourned until the first Monday in December next.

# LAWS OF THE UNITED STATES

## PASSED AT THE FIRST SESSION OF THE TWENTY-FIFTH CONGRESS.

AN ACT to postpone the fourth instalment of deposit with the States.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the transfer of the fourth instalment of deposit directed to be made with the States, under the thirteenth section of the act of June twenty-third, eighteen hundred and thirty-six, be and the same is hereby postponed till the first day of January, one thousand eight hundred and thirty-nine: *Provided,* That the three first instalments under the said act shall remain on deposit with the States, until otherwise directed by Congress.

APPROVED, October 2, 1837.

AN ACT to authorize the issuing of Treasury notes.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President of the United States is hereby authorized to cause Treasury notes for such sum or sums as the exigencies of the Government may require, but not exceeding, in the whole amount of notes issued, the sum of ten millions of dollars, and of denominations not less than fifty dollars for any one note, to be prepared, signed, and issued in the manner hereinafter provided.

SEC. 2. *And be it further enacted,* That the said Treasury notes, authorized to be issued by the first section of this act, shall be reimbursed and redeemed by the United States, at the Treasury thereof, after the expiration of one year from the dates of the said notes respectively; from which said dates, for the term of one year, and no longer, they shall bear such interest as shall be expressed upon the face of the said notes; which rate of interest, upon each several issue of the said notes, shall be fixed by the Secretary of the Treasury, by and with the advice and approbation of the President; but shall in no case exceed the rate of interest of six per centum per annum. The reimbursement herein provided for shall be made at the Treasury of the United States to the holders of the said notes respectively, upon presentment, and shall include the principal of each note, and the interest which may be due thereon at the time of payment. For this reimbursement, at the time and times herein specified, the faith of the United States is hereby solemnly pledged.

SEC. 3. *And be it further enacted,* That the said Treasury notes shall be prepared under the direction of the Secretary of the Treasury, and shall be signed, on behalf of the United States, by the Treasurer thereof, and countersigned by the Register of the Treasury; and that those officers respectively shall, as checks, upon each other, and to secure the public safety, keep separate, full, and accurate accounts of the number, date, denomination, and amount of all the notes signed and countersigned by them respectively; which said accounts shall be carefully preserved and placed on file in the Treasury Department; and, also, similar accounts, kept and preserved in the same manner of all the said notes redeemed, as the same shall be returned and cancelled; and the Treasurer shall further account quarterly for all such notes delivered to him for signature or issue by the Register. The Treasurer and Register of the Treasury are hereby authorized, by and with the consent and approbation of the Secretary of the Treasury, to employ such additional temporary clerks as the duties enjoined upon them by this section may render necessary: *Provided,* Said number shall not exceed four, and with a salary of not more than at the rate of twelve hundred dollars to each per annum.

SECTION. 4. *And be it further enacted,* That the Secretary of the Treasury is hereby authorized, with the approbation of the President of the United States, to cause to be issued such portion of the said Treasury notes as the President may think expedient, in payment of debts due by the United States to such public creditors or other persons as

may choose to receive such notes in payment, as aforesaid, at par. And the Secretary of the Treasury is further authorized, with the approbation of the President of the United States, to borrow, from time to time, not under par, such sums as the President may think expedient, on the credit of such notes.

SECTION 5. *And be it further enacted,* That the said Treasury notes shall be transferable by delivery and assignment endorsed thereon, by the person to whose order the same shall, on the face thereof, have been made payable.

SEC. 6. *And be it further enacted,* That the said Treasury notes shall be received in payment of all duties and taxes laid by the authority of the United States, of all public lands sold by the said authority, and of all debts to the United States, of any character whatsoever, which may be due and payable at the time when said Treasury notes may be so offered in payment. And, on every such payment, credit shall be given for the amount of the principal and interest which, on the day of such payment, may be due on the note or notes thus given in payment.

SEC. 7. *And be it further enacted,* That any person making payment to the United States in such Treasury notes, into the hands of any collector, receiver of public moneys, or other public officer or agent, shall on books, kept according to such forms as shall be prescribed by the Secretary of the Treasury, give duplicate certificates of the number and respective amount of principal and interest of each and every Treasury note thus paid by such person; and every collector, receiver of public moneys, or other public officer or agent, who shall thus receive any of the said Treasury notes in payment, shall, on payment of the same, receive credit both for principal and interest computed as aforesaid, which on the day of such last mentioned payment shall appear due on the note or notes thus paid in, and he shall be charged for the interest accrued on such note or notes from the day on which the same shall have been received by him in payment as aforesaid to the day on which the same shall be paid by him as aforesaid.

SEC. 8. *And be it further enacted,* That the Secretary of the Treasury be, and he is hereby, authorized and directed to cause to be reimbursed and paid the principal and interest of the Treasury notes which may be issued by virtue of this act, at the several time and times when the same, according to the provisions of this act, should be thus reimbursed and paid. And the said Secretary is further authorized to make purchases of the said notes, at par, for the amount of the principal and interest due at the time of purchase on such notes. And so much of any unappropriated money in the Treasury as may be necessary for that purpose, is hereby appropriated, for paying the principal and interest of said notes.

SEC. 9. *And be it further enacted,* That a sum not exceeding twenty thousand dollars, to be paid out of any unappropriated money in the Treasury, be, and the same is hereby, appropriated, for defraying the expense of preparing, printing, engraving, signing, and otherwise incident to the issuing of the Treasury notes authorized by this act.

SEC. 10. *And be it further enacted* That if any person shall falsely make, forge, or counterfeit, or cause or procure to be falsely made, forged, or counterfeited, or willingly aid or assist in falsely making, forging, or counterfeiting, any note, in imitation of, or purporting to be, a Treasury note aforesaid; or shall falsely alter, or cause or procure to be falsely altered, or willingly aid or assist in falsely altering any Treasury note issued as aforesaid; or shall pass, utter, or publish, or attempt to pass, utter, or publish, as true, any false, forged, or counterfeited note, purporting to be a Treasury note as aforesaid, knowing the same to be falsely forged or counterfeited, or shall pass, utter, or publish, or attempt to pass, utter, or publish, as true, any falsely altered Treasury note, issued as

aforesaid, knowing the same to be falsely altered, every such person shall be deemed and adjudged guilty of felony, and being thereof convicted by due course of law, shall be sentenced to be imprisoned and kept to hard labor for a period not less than three years, nor more than ten years, and be fined in a sum not exceeding five thousand dollars.

SEC. 12. *And be it further enacted,* That if any person shall make or engrave, or cause or procure to be made or engraved, or shall have in his custody or possession any metallic plate, engraved after the similitude of any plate from which any notes issued as aforesaid shall have been printed, with intent to use such plate, or to cause or suffer the same to be used in forging or counterfeiting any of the notes issued as aforesaid; or shall have in his custody or possession any blank note or notes engraved and printed after the similitude of any notes issued as aforesaid, with intent to use such blanks, or cause or suffer the same to be used in forging or counterfeiting any of the notes issued as aforesaid; or shall have in his custody or possession any paper adapted to the making of notes, and similar to the paper upon which any such notes shall have been issued, with intent to use such paper, or cause or suffer the same to be used in forging or counterfeiting any of the notes issued as aforesaid; every such person, being thereof convicted by due course of law, shall be sentenced to be imprisoned, and kept to hard labor, for a term not less than three nor more than ten years, and fined in a sum not exceeding five thousand dollars.

SEC. 12. *And be it further enacted,* That the Secretary of the Treasury be, and he is hereby, authorized to make and issue, from time to time, such instructions, rules, and regulations to the several collectors, receivers of public money, depositaries, and all others who may be authorized to receive the said Treasury notes on behalf of and as agents in any capacity for the United States, as to the safe keeping, disposition, return, and cancelling of the said notes so paid to and received by them respectively, and as to their accounts and returns to the Department of all such receipts, as may seem to him best calculated to promote the public interests and convenience, and secure the United States and the holders of the said notes against frauds and losses: *Provided,* That nothing herein contained shall be so construed as to authorize the Secretary of the Treasury to reissue any of said notes; but upon the return of the said notes, or any any of them, to the Treasury, the same shall be cancelled.

SEC. 13. *And be it further enacted,* That it shall be, and hereby is, made the duty of the Secretary of the Treasury to cause a statement to be published monthly, of the amount of all Treasury notes issued or redeemed, in pursuance of the provisions of this act; and that the power to issue Treasury notes, conferred on the President of the United States by this act, shall cease and determine on the thirty-first day of December, eighteen hundred and thirty-eight.

AN ACT to regulate the fees of the district attorneys, in certain cases.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That, in all cases of extension of the time of payment of bonds given for duties on imports, it shall be according to such directions as may be given by the Secretary of the Treasury; and the extension of payment of the old bond, or the taking of a new bond, shall be by the respective collectors subject to no other charge than such as may be legally receivable on the taking of an original bond, upon the entry of merchandise.

SEC. 2. *And be it further enacted,* That no fee shall accrue to any district attorney on any bond left with him for collection, or in a suit commenced on any bond for the renewal of which provision is made by law, unless the party or parties shall not

glect to apply for such renewal for more than twenty days after the maturity of such bond.

APPROVED, October 12, 1837.

An ACT to continue in force certain laws to the close of the next session of Congress.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That all acts and parts of acts, or provisions contained within any act, which, by the terms thereof, are made to expire at the termination of the first session of the twenty-fifth Congress, be, and the same are hereby, declared to continue in force to the end of that session of Congress which shall commence, or shall be in session, on the first Monday of December, eighteen hundred and thirty-seven.

APPROVED, October 12th, 1837.

An ACT to amend an act, entitled "An act to provide for the payment of horses lost, or destroyed in the military service of the United States, approved January 19th, 1837."

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That any person who has turned over to the service of the United States, his horse, saddle, bridle, or equipments, by the order of the commanding general, or other commanding officer, shall be paid the value thereof; That the claims provided for under this act, shall be adjusted by the Third Auditor, under such rules as shall be prescribed by the Secretary of war, with the assent of the President. This act, and the act to which this is an amendment, shall extend to mules as well as to horses. Decisions under this act, shall be recorded as they are required to be recorded by the act aforesaid, and payment shall be made as is required by that act. This act shall extend to cases where any person mentioned in the act to which this is an amendment shall have died in the service, and his horse, saddle, bridle, or equipments, shall have been turned over to an officer, or other person for the benefit of the United States, by order of the proper officer commanding, and not restored to the representative of the deceased or paid for by the United States.

APPROVED, October 14th, 1837.

An ACT making farther appropriations for the year eighteen hundred and thirty-seven.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the following sums be, and the same are hereby, appropriated, to be paid out of any unappropriated money in the Treasury, viz: For pay and mileage of the members of Congress and delegates, two hundred and forty-eight thousand five hundred dollars.

For stationery, fuel, printing, and all other contingent expenses of the Senate, thirty thousand dollars.

For stationery, fuel, printing, and all other contingent expenses of the House of Representatives, fifty thousand dollars.

For the contingent expenses of the navy, as enumerated in the act of the third of March last, in addition to the amount appropriated by that act, one hundred and twenty thousand dollars.

For the relief and protection of American seamen in foreign countries, ten thousand dollars.

For defraying the expenses attending the prosecution of the claim of the United States to the legacy bequeathed by the late James Smithson, of London, five thousand dollars.

For the contingent expenses in the office of the Treasurer five hundred dollars.

For preparing printing and binding documents ordered by the resolutions of the Senate of the second July, eighteen hundred and thirty-six, twenty-fifth of February, eighteen hundred and thirty-seven, and the second of March, eighteen hundred and thirty-seven, to be disbursed under the direction of the committee to audit and control the contingent expenses of the Senate, twenty-five thousand dollars.

Sec. 2. *And be it further enacted,* That, if the revenue (from duties, or from the sales of public lands remaining in the hands of the receiving and collecting

officers, be not sufficient at any time to pay debentures and other charges which are by existing laws made payable out of the accruing revenue before it is transferred to the credit of the Treasurer, the Secretary of the Treasury is hereby authorized to pay the said debentures and other charges out of any money in the Treasury not otherwise appropriated.

Sec. 3. *And be it further enacted,* That the Secretary of the Treasury be, and he is hereby, authorized to arrange and settle any of the outstanding transfer drafts given to transfer moneys to the States under the act of twenty-third of June, eighteen hundred and thirty-six, and which have not been paid by the depositories upon which they were drawn or otherwise arranged and settled by the United States by receiving such drafts at par in payment of any debts due to the United States, without any allowance of interest for the time the drafts have been outstanding and unpaid, or any other allowance for interest or damages of any description.

APPROVED, October 16th, 1837.

An ACT making an additional appropriation for the suppression of Indian hostilities for the year one thousand eight hundred and thirty-seven.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the further sum of one million six hundred thousand dollars shall be, and the same is hereby, appropriated out of any money in the Treasury not otherwise appropriated, to defray any expenses which have been or may be incurred, in preventing or suppressing the hostilities of any Indians: to be expended under the direction of the Secretary of War, conformably to the acts of Congress of the nineteenth of March eighteen hundred and thirty-six, and of the second of July eighteen hundred and thirty-six, and of the acts therein referred to.

APPROVED, October 16th, 1837.

An ACT authorizing a further postponement of payment upon duty bonds.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Secretary of the Treasury be, and he is hereby is, authorized to grant such further extension of credit upon all bonds for duties now outstanding as shall make the whole extension of credit upon each bond nine months from the time when the original bond became due and payable; making the extension in each case to depend upon the same conditions as to additional security, the payment of interest, and other terms, which have been prescribed by the Treasury Department, to the extension of revenue bonds since May last: *Provided,* That nothing herein contained shall be construed to include any existing bonds where the parties to the same have not, since the bonds became payable, given additional security, or made part payment, and are by the proper officers of the Government, considered insolvent, or unsafe securities for the payment of their bonds.

SECTION 2. *And be it further enacted,* That a credit of three and six months shall be allowed on the duty on all merchandise which shall have been or may be imported on or before the first day of November next, upon which the duties are payable in cash, and that the bonds received for such duties shall be payable in equal instalments bearing interest at the rate of six per cent. per annum, and shall be in the form and upon the conditions prescribed by existing laws and by this act.

SECTION 3. *And be it further enacted,* That where the security in any bond which has been, or may hereafter be postponed, is entirely satisfactory, the principal or sureties in the same shall not be disabled from being in the mean time, till the period of postponement provided for by this act expires, received as principal or sureties in other bonds for duties, notwithstanding the bond first given may not have been actually paid, discharged, or extended before or on the day it fell due: *Provided,* That such principal and sureties shall be found, in all other respects, safe and satisfactory security for the funds to which they may be proposed as parties.

SECTION 4. *And be it further enacted,* That the

operation of all prior laws, and parts of laws, so far as inconsistent with this act, be suspended in the particulars in which they may conflict with, or differ from, its provisions, until this act shall cease by its own limitations.

APPROVED, October 16th, 1837.

An ACT for adjusting the remaining claims upon the late deposit banks.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Secretary of the Treasury be, and he is hereby, authorized to continue to withdraw the public moneys now remaining in any of the former deposit banks, in a manner as gradual and convenient to the institutions as shall be consistent with the pecuniary wants of the Government, and the safety of the funds thus to be drawn; and that no further interest than that required by the deposit act of the twenty-third of June, one thousand eight hundred and thirty-six, under which those deposits were made, shall be demanded of any bank which has met, and shall hereafter meet, the requisitions of the Department. This provision shall also extend to such public moneys as may remain in any of the said banks, whether standing to the credit of the Treasurer of the United States, or of any disbursing or other public officer of the Government.

SECTION 2. *And be it further enacted,* That in case of neglect or refusal by any of the said banks to comply with the requisitions of the Secretary of the Treasury, as he shall make them, in conformity with the first section of this act, suits shall be instituted, where that has not already been done, to recover the amounts due to the United States, unless the defaulting bank shall forthwith cause to be executed and delivered to the Secretary of the Treasury, a bond, with security to be approved by the Solicitor of the Treasury, to pay to the United States the whole moneys due from it in three instalments. The first to be paid on the first day of July next, the second on the first day of January, eighteen hundred and thirty-nine, and the remaining instalment on the first day of July, eighteen hundred and thirty-nine; and the default mentioned in this act on which interest is to commence at the rate of six per cent. shall be understood to be the neglect or omission of said banks, or any of them, to answer the drafts or requisitions of the Secretary of the Treasury, made on them according to the provisions of the first section of this act; and interest thereon at the rate of six per centum per annum, from the time of default, together with any damages which may have accrued to the United States from protest of drafts drawn upon it, or from any other consequence of its failure to fulfil its obligations to the public Treasury.

APPROVED, October 16th, 1837.

An ACT for the relief of D. P. Madison.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the President of the United States be, and he is hereby, authorized and requested to cause to be executed, a grant and reconveyance to Mrs. D. P. Madison, her executors, administrators and assigns, of the right to publish in foreign countries, for her own benefit, the manuscript debates of the convention which formed the Constitution of this Government, as well as the acts avails of any such publication which may have been ordered by her: *Provided, however,* That she shall not be allowed to withdraw from the possession of the Government either of the copies of said debates which accompanied her conveyance.

Approved, October 14th, 1837.

A RESOLUTION directing the postage on letters sent by the Express Mail to be paid in advance.

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the Postmaster General be, and he is hereby, directed to cause the postage on all letters sent by the Express Mail of the United States to be paid in advance at the time of depositing them for transportation by said mail.

# APPENDIX

## TO THE CONGRESSIONAL GLOBE.

25th Cong.... 1st Sess.

Report of the Secretary of the Treasury.

Sen. & H. of Reps.

### REPORT OF THE SECRETARY OF THE TREASURY.

TREASURY DEPARTMENT,  
September 5, 1837.

In pursuance of the duty of this department to submit to Congress, at each session, the state of the finances; and in conformity with the request of the President, that such other fiscal matters should, on this occasion, be presented, as appear to require early legislation, the undersigned has the honor to offer the following report:

#### I. CONDITION OF THE TREASURY.

It is not proposed to give all the particulars, relating to the receipts and expenditures, which usually accompany an annual statement. But an exposition of them, under the customary general heads, so far as they have been ascertained, for the first half of the year, is subjoined.

Brief estimates for the other half are made, and such explanations added, as seem necessary to show with clearness not only the condition of the Treasury at this time, but its probable state for the residue of the year.

According to the Treasurer's running account, the whole amount of available money in the Treasury on the 1st of January, 1837, applicable to public purposes, was \$42,468,859 97. From that sum, there were on that day reserved \$5,000,000; and the balance, being \$37,468,859 97, was, under the provisions of the act of June 23, 1836, to be placed in deposit with the States. It is ascertained that \$27,663,430 80 of it have since been actually received by them.

The amount of that portion of the first three instalments, the payment of which has not yet been acknowledged, though transfers were seasonably issued for it, is \$1,165,575 18. The remainder is \$9,367,214 98, and is the sum which was designed for the fourth instalment of deposits with the States on the 1st of October next. The amount reserved in the Treasury on the 1st of January has since been increased, by returns subsequently received from banks, to the sum of \$6,670,137 52; and which, of course, could not then be ascertained or taken into computation.

#### RECEIPTS.

The receipts in the first half of the year, deposited in the banks, and paid on drafts by collectors and receivers, so far as ascertained, have been:

From customs	\$7,234,451
From lands	5,303,731
And from miscellaneous sources	512,263

To these may be added about \$600,000 which remained in the hands of receivers, and \$50,000 in those of collectors, subject to draft. All these make the aggregate for that half of the year \$13,187,182. If no further postponement be granted on duty bonds, it is estimated that the whole receipts for the last half of the year, from all sources, will be about \$9,500,000; which would make them, as ascertained and estimated for the whole year, \$22,687,182. But if the brief extension of the present postponement, brought into view hereafter, and favorably regarded, be directed by Congress, the receipts will probably be about \$7,000,000; while, by a postponement of the whole to another year, they will not be likely to exceed \$4,500,000.

Looking at our whole revenue therefore, from all quarters, it appears that the balance of money reserved at the commencement of the year, as finally ascertained to be \$6,670,137, with the actual receipts for the first half at \$13,187,182, and those now anticipated for the last half of it at \$7,000,000, will constitute an aggregate of \$26,857,319.

#### EXPENDITURES.

The expenditures during the first half of the year were, for

Civil, miscellaneous, and foreign	
intercourse	\$2,812,540 40
Military, including pensions	10,603,361 49

Naval	3,297,149 69
Public debt	20,832 75

Making an aggregate of - \$16,733,884 33

The expenditures required to meet existing appropriations, during the last half of the year, will, as computed, equal the sum of \$16,000,000; making for the whole year \$32,733,884.

Whatever expenditures shall arise within the year, upon new appropriations which Congress may think proper to make, will require a corresponding addition to this amount. But, without them, it will constitute an excess of \$5,876,565 of expenditures over both the receipts and the balance at the commencement of the year; besides not leaving, at the close of it, any thing in the Mint or the Treasury for future uses, or to meet contingencies.

In order, therefore, to discharge that excess, and retain, of the money reserved on the 1st of January, one million, which is the smallest sum deemed proper, under the acts of Congress, for the efficient operations of the Mint, and at least three or four millions more, to answer sudden and contingent calls, there will probably be a necessity to resort to the deposits now with the States, and to the instalments destined for them in October, or to some other resource, for a sum equal to \$10,000,000. By a report of the Treasurer of the 30th ultimo, it appears that the balance in the Treasury, including what was in the custody of banks, the Mint, and collecting officers, was then \$14,596,311; that the amount of this, subject to immediate draft, was only \$8,928,072; but the whole balance in the Treasury, including all which had been deposited with the States, and ordered to be, though only a small part of the amount is subject to immediate draft, was \$41,532,381. Deduct all which has been, and was designed to be, deposited with the States, and there would be no balance left on hand subject to draft, though including every thing in the Mint, and in the possession of receivers and collectors, which is applicable to general purposes.

Hence it is probable, that, besides the deficiency for the expenditures of the year, no sufficient means of any kind will exist on the first of October next, after defraying the intervening expenses, to complete the instalment of deposits then payable, unless a large part of the bonds for duties postponed to that day, and amounting to near \$4,000,000, and the million and a half then due on the first bond from the United States Bank, shall be punctually paid, or, in the mean time, some provision on this subject made by Congress.

The money standing to the special credit of the Post Office Department and the Patent Office, as well as various trusts, is not included in the above exhibit, for reasons explained in the last annual report. Outstanding and unexpended appropriations at the end of the year will, in this view of our financial condition, be still left charged on the Treasury amounting to about \$16,000,000.

This does not differ much from their amount at the close of the last year. Whether the appropriations unexpended on the first of January, 1838, prove, therefore, to be one or two millions larger or smaller than is now anticipated, it must be manifest, from all the above data, that some new legislation is indispensable to complete satisfactorily the service of the year, and leave a suitable amount in the Mint and the Treasury.

Indeed, before submitting the last annual report, the indications of a decrease in the receipts, and of an approaching revulsion in our commercial prosperity, appeared so strong to the undersigned, that he felt compelled, with reluctance and regret, because differing so much from the views of many others, to estimate the accruing receipts for the year at only \$24,000,000.

As the appropriations asked for were about \$27,000,000, it was then suggested that the occurrence of a deficiency was probable. When those

appropriations became in fact enlarged by Congress to more than \$32,000,000, it rendered a deficiency inevitable, to the extent now anticipated, unless the receipts should happen greatly to exceed the estimates.

#### II ON THE POSTPONEMENT OF THE PAYMENT OF BONDS FOR DUTIES.

The first suggestions which will be submitted concerning such special legislation as appears proper in consequence of the recent embarrassments of the country, relate to the postponement of the payment of bonds for duties.

Early in May last, the collection of the revenue from customs became much obstructed through the severe pecuniary difficulties of the mercantile interest. The Treasury Department felt an anxiety not only to take steps which might increase the security of the Government for eventual payment, but, in an emergency so great, and to many so unexpected, to furnish all the relief from sacrifices which could judiciously be extended under its limited powers, and in anticipation of what would probably be its straitened condition in a few months.

A postponement of the payment of the bonds falling due was, therefore, and in accordance with the views of the Executive, authorized for periods of from thirty to ninety days, on interest and additional security, and in a manner more liberal than usual, by permitting it before as well as after suit, in all cases of embarrassment, great hardship, or insolvency.

The particular terms, and the reasons for such postponement, are more fully set forth in the documents annexed.

When the difficulties in discharging bonds in a legal currency became increased by the suspension of specie payments in some of the principal cities, and the President decided to call a special session of Congress, the postponement was allowed to be extended till after the commencement of the session, in order that an opportunity might be afforded to obtain further relief by new legislation. Urgent requests were made for an indiscriminate delay of payment on all bonds to the 1st of January next, and for the receipt, in discharge of them, of notes issued by banks not paying specie.

It was not deemed proper to comply with these requests. But as long a delay as our fiscal situation justified, and every relief as to the currency which seemed legal, by the receipt of debenture certificates and Treasury drafts, for duties, were permitted in mitigation of the existing embarrassments.

Having, in this, done all that a sound and liberal exercise of the discretion of the department appeared either to justify or require, no intention exists, nor would it be proper in the present state of the Treasury, to grant any indulgences beyond those already authorized, without the express direction of Congress.

Some further facts which may be useful to aid its members in coming to a correct conclusion on this subject, are, that the amount of bonds which have already been postponed to the 1st of October, is about \$3,500,000, and by that date will, it is presumed, be increased to \$4,000,000.

If Congress permit no longer postponement, the receipts for the year will probably be increased by the indulgences already granted, as they have been allowed, generally, on additional security, and a 1 ways on interest.

But as suits and delays in collection will still occur, though to a less extent than in the first stages of the pressure, it is expected that not over two-thirds of the amount postponed before the close of this month can be collected during the current year.

The bonds already put in suit since the middle of May amount to nearly \$1,000,000. But if Congress extend the postponement till next January, as was originally requested by some of the parties, or for one year, as recently requested by the Chamber of Commerce of New York, the receipts for the

present year will probably be thereby lessened from four to five millions.

Should Congress, however, adopt an intermediate course, as an act not of mere benevolence, but of additional relief, which appears reasonable, under the extraordinary mercantile distresses of the times, and more safe to the Government, in respect to eventual collections, it might sanction a delay not to exceed, altogether, six months beyond the original period of payment, in any particular case. It is computed that this would diminish the receipts, during the present year, about two and a half millions of dollars; but if granted on the usual terms, would increase the receipts, next year, in a greater proportion, by the interest accruing, as well by the fuller collections which would probably be made in a greater number of cases.

The opinion of the department on these various propositions is, that, considering merely our present financial necessities, no further postponement can be regarded as expedient, though in some other respects, as fully detailed in the recent letter from the Chamber of Commerce, the last delay mentioned might be found justifiable, and more beneficial. But if a law be passed extending credit on the bonds, it is supposed that, in any correct view of the subject, its provisions need not be continued in force beyond the period when the worst effects of the pressure will be likely to have ceased, and when all imports could, by a further extension of the ware-house system, be advantageously made payable in cash, at the time the goods are wanted for immediate consumption.

The extension of that system is, therefore, respectfully recommended to the consideration of Congress, in connection with the present subject, as it might introduce as great an improvement in the collection of imposts, as the substitution of cash for credit did in the collection of revenue from the sales of public lands. It would certainly increase the security, ease, and promptitude of the operation; would dispense entirely with the trouble and risk in the payment of debentures; work favorably to the manufacturing interests; and at the same time, facilitate our trade in foreign articles, as well as exonerate the merchant from many embarrassments in regard to sureties and guarantees.

### III. OBSTACLES IN THE WAY OF TRANSFERRING THE LAST INSTALLMENT OF DEPOSITES TO THE STATES.

Early legislation has likewise become necessary, either to withhold or postpone, for a reasonable period, the fourth instalment of deposits with the States, or to furnish such aid as may be necessary to complete them in a satisfactory manner.

By the general suspension of specie payments, and the consequent necessity, under the deposit act, to discontinue most of the public depositories, the transfers from the banks in the west and southwest to the seaboard, which were necessary to place much of the money in a position to be conveniently lodged with the States in October, have, in several instances, been defeated. They had, as in case of the former instalments, been ordered seasonably, though, as a general rule, only where rendered proper, in consequence of great accumulation of public funds in an unfavorable situation, on account of the course of trade and exchanges, to be paid directly to the respective States. But, in the troubled condition of the money market, they had not been injuriously hastened as to the time of payment, and, consequently, falling due in the course of the summer and early in autumn, near two-thirds of the whole amount of these funds still on hand have been detained in the west and southwest, where they had so unusually augmented from the large sales of public lands. Hence, if the last deposit with the States was, in this position of the money, to be attempted, the orders directing it must, in many cases, be made on places remote, and very inconvenient to some of the receiving States, on account of the unfavorable balance of trade, or the rates of exchange; and must be met, if at all, in a currency unacceptable and greatly depreciated. Transfers of portions of the July instalment could not, from the same cause, be effected in the precise mode intended, nor from the banks most desirable, though much of it had reached the appropriate points, to render the operation

easy, before the suspension of specie payments. In all cases in which they were not offered to be paid in a currency satisfactory to the States, their agents were requested to return the orders of transfer till Congress could make new and suitable provisions on the subject.

But this request has not always been complied with. About \$1,165,575 of that instalment has not yet been receipted for by the States to the Treasury, nor the orders returned. On the contrary, the United States Bank chartered by the State of Pennsylvania has lately become the purchaser of several of these orders, though not given for any debt, but merely directing a transfer from one public depository to another. This institution has demanded of the banks on which they are drawn that payment should be made to her in specie; and, on their failing to do so, has caused the orders to be protested. Under these circumstances, and, as the deposits with the States were to be made of what was in the Treasury, and consequently in the banks, on the 1st of January last, it is for Congress to decide whether payment shall be made of any of those orders in a mode and currency different from the rest of the third instalment of deposits with the States.

Another reason for withholding or postponing the October deposits, or for some legal provision to aid in completing them, is, that a sum equal to the revenue probably accruing, and a large portion of these deposits, had, before they were payable, been expressly appropriated by Congress to other objects. When looking to the rapid decrease in our receipts, to the expected deficiency in the course of the year, and the great amount of outstanding appropriations which, at the close of it, will be left unpaid, much of that whole instalment seems likely to be needed at an early day. By either of the first two measures, the money could, according to its original destination, be applied to the necessary wants of the General Government, as soon as it can be drawn from the banks in legal funds. In that way, so desirable an object would also be accomplished, without the expense and delay of the money being first paid over to the States, and then subjected to an early recall. On the other hand, several of the States might, in the present posture of their affairs, experience considerable inconvenience, either by not receiving it, or by soon refunding a large portion of its amount; and many of the banks which hold it might be able more satisfactorily to pay it to the States than to the Treasury. But, though the subject is one of much delicacy and difficulty, and peculiarly proper for the final action of Congress, it may be expected that this Department should express some opinion as to which course appears most eligible in the present condition of the finances. It is, therefore, with deference suggested, that when regarding their condition and the importance of meeting with efficiency and good faith all the obligations of the Government to the public creditors, it would be most judicious to apply the whole instalment, as fast as it is wanted and can be collected, to the prompt discharge of these obligations; and that the last deposit with the States, not being a debt, but a mere temporary disposal of a surplus, should be postponed until Congress, in some different state of the finances, when such an available surplus may exist, shall see a manifest propriety and ability in completing the deposit, and shall give directions to that effect. Consequently, no further steps will be taken as to the deposit of any part of that instalment till Congress has had an opportunity to act upon the subject in such manner as, in the present posture of affairs, its superior wisdom may consider preferable.

### IV. DIFFICULTY IN PAYING THE APPROPRIATIONS, AND ON THE ISSUE OF TREASURY NOTES.

Some further obstacles exist in the way of discharging satisfactorily all the appropriations which have been made by Congress.

The effects which may be produced upon the accruing revenue, by granting or withholding further delays on bonds for duties, have already been explained.

In addition to these, there is a likelihood, in the present pressure, that the payment of cash duties, to the extent of one million of dollars more than

usual, will be unavoidably deferred to another year, as the importers under the existing laws are entitled to certain delays, by keeping in store the woollen goods which pay such duties.

This circumstance, in connection with the difficulty of collecting the bonds, whether longer postponed or not, will sensibly increase the embarrassments which have been specially pointed out, and otherwise exist in paying with promptitude and in a legal manner, the large appropriations chargeable upon the residue of the current year.

Hence, after a considerable deficiency in the available means became highly probable, it was deemed expedient to adopt any judicious and lawful measure to remedy it, which was within the power of the department. Accordingly, though large quantities of public lands were still in market unsold, and though the receipts from this source during the year, would be higher than anticipated, in consequence, among other things, of a construction put on the pre-emption laws, admitting a large class of settlers to entries, it was supposed that some further tracts, in places much desired by the new States, might prudently be offered. A few such have been advertised; but sufficient time, after due notice, have not yet elapsed to realize any thing from them.

If the fourth instalment of the deposits with the States be deferred, and the difficulty in seasonably transferring it be thus removed, yet, being chiefly in the custody of banks not paying specie, it is manifest that it cannot be immediately realized in funds suitable to meet the existing appropriations. If it be not deferred, some further provision will be still more indispensable to enable the Treasury not only to place it with the States, but to pay all the public creditors and officers in a satisfactory manner, until the duties now due from the merchants, and the funds now in the discontinued deposit banks, can be collected. It is true, that a resort to the States for refunding portions of the large sums already deposited with them, would also remain by law; but under the limitations of the act of June, 1836, it would be very slow in its operation, and, if complied with, would prove entirely insufficient to answer such an urgent occasion as the present. During the ensuing quarter, the whole amount that could be legally recalled would not exceed six hundred and fifty thousand dollars. Hence it seems expedient, either in aid or exclusion of a requisition on the States, as may be deemed most suitable by Congress, to provide some temporary resource until enough of the fourth instalment, or other means in the Treasury, can be rendered available to discharge all the public engagements. It need not be a loan, or an increase of taxes of any kind; as the General Government, in respect to its finances, whatever temporary embarrassment the recent convulsions in commerce and banking may have created, is far from having any just cause of despondency. It is neither overwhelmed with a national debt, nor destitute of large pecuniary resources on hand; but, entirely free from the former, it is so amply supplied with the latter as to have in the Treasury over forty millions of dollars, and eight or ten millions more in bonds, which will soon become payable. But a large portion being in deposit with the States, and the residue chiefly in banks and the hands of merchants, under the difficulties before named, in procuring promptly, and in a legal currency, the amounts of money which are needed, some collateral aid for a short period, till a sufficiency can be collected, appears to be judicious, if not indispensable.

It is fortunate that the energies of the country generally are not paralyzed, nor its prospects clouded by any great physical calamities; and hence its immediate wants can, without doubt, be provided for in various ways.

One mode would be to authorize the issue of Treasury notes, receivable for all public dues, but without interest. These would differ from the draft, or checks now in use, only as the latter are given for immediate payment, and drawn on persons and banks having public money sufficient to meet them; and, consequently, the holders must be exposed to the trouble and expense of presenting them at the places where payable. Still they are nearly

on a par with specie. In the present deranged state of bank paper and exchanges, and in the favorable condition of the General Government, by its ample resources and exemption from pecuniary liabilities, to impart the greatest confidence in respect to the redemption of such notes, it is probable that they would readily be taken at par by most of the public creditors. Especially would this be likely to happen, provided they were issued in denominations as low as twenty, fifty, and one hundred dollars; and not in too large quantities, but used only in anticipation of the accruing revenue on occasional emergencies, and to a limited amount.

Contrary to expectation, should the department, during the present delinquency of many of the public debtors, be exposed to such very large calls, and collect so little revenue, as not to be able, by both the above notes and drafts, to meet all its engagements in a satisfactory manner, it would be desirable that the President should possess a contingent authority to cause Treasury notes to be issued, bearing an interest not to exceed six per cent.

Specie could always be raised on these for the public creditor, when he preferred it. But as notes bearing much interest would soon cease to be used in circulation, (and if they should not, would, as a currency, be troublesome in the computation of interest, and too strongly tend to exclude specie from the country,) it might be advisable not to make them receivable, at first, for any public dues, but only to resort to that measure afterwards, when it should be found convenient for redeeming them.

In connection with the issue of any Treasury notes, it is believed to be wise to make ample provision for their early and final redemption. This could be accomplished by enacting, that when the money on hand in the Treasury and the Mint, available for public purposes, may exceed a given amount of four or five millions, it shall be the duty of the Secretary of the Treasury to cause these notes (securing priority to any on interest) to be redeemed to such an extent as the surplus may exceed that sum, and what will probably be needed to defray current expenses. It being believed that a reduction of the tariff, and suitable regulations concerning the sales of public land, ought at a proper time to be put in force, so as to prevent any large and regular accumulation in the Treasury, the department would respectfully propose that, in case of any unexpected excess beyond the sums above specified, it should merely be invested, in a temporary manner, in safe State stocks, at their market rate, subject to be sold again whenever the proceeds shall be wanted to discharge existing appropriations.

An additional consideration in favor of these measures is, that since the payment of the public debt, which absorbed any occasional surplus of receipts, it is impossible, according to the views expressed in some previous reports from the undersigned, that, with sources of revenue so fluctuating as ours, and so dependent on commercial prosperity, any fiscal operations should be long continued with ease, vigor, and uniformity, without some such regulator as a power to issue and redeem Treasury notes, or to invest and sell the investment of surpluses. By any other course we shall constantly be exposed to great deficiencies, or excesses, with all their attendant embarrassments. If depositing the excesses with the States, subject to be recalled to supply deficiencies, the pecuniary profit to the whole Union will be no greater, while such a course may involve us in a series of vexatious demands on them, accompanied by various dangers, both to them and the General Government; and, in the mean time, it is feared will, in many instances, tend to excite excesses and evils similar to some of those under which the country is now suffering.

#### V. ON THE SAFE-KEEPING OF THE PUBLIC MONEY HEREAFTER.

The arrangements for keeping the public money, which had been in successful operation for a few years previous to the passage of the deposite act of 1836, became partially embarrassed by carrying into effect some of its provisions. But the enforcement of them all, where not entirely perfected, was in seasonable progress in May last, when the

Department was compelled by the act to give notice to such of the selected banks as had suspended specie payments that they could no longer be considered as general depositories of the public moneys.

A list is annexed of all before employed in that capacity, which have been discontinued.

After due inquiries to procure other depositories, in conformity to the act, the Department has completed the appointment of only one. This, and four more that have not suspended, with one that has resumed specie payments, (making six in all,) constitute the present bank depositories for general purposes.

During the inability to obtain specie-paying banks at other points, the Treasurer, being required by the closing part of the 8th section of the act, to keep and disburse the public money according to the laws before in force, has done it in conformity to the very wide discretion which existed when no rules were in force, that had been prescribed by Congress, except to "keep" and "disburse the same" under the general superintendence of the Secretary of the Treasury. A part of it has, therefore, been kept in special deposite in this city, a portion of it in the mint, and the residue with the officers collecting it, until it was wanted for public purposes, or until it accumulated in such sums at any point as not to be, probably, wanted there for such use. In the first case, it has, from time to time, been applied to the payment of creditors, by drafts on the receivers or collectors; and in the last, the excess has been directed to be temporarily placed with banks not remotely situated, and in special deposite for safety, until wanted for expenditure elsewhere, or until some new legislation shall take place in relation to it.

Under these circumstances, the department would respectfully suggest some provisions which may be more specific, and may be required for the safe-keeping and disbursing of the public moneys.

In the present condition of the Government and the country, two systems are proposed, either of which, it is believed, may be practicable and adequate to the exigencies of the crisis. One is, an enlargement and adaptation of the system partially employed since the suspension of specie payments, so as to make it answer all necessary purposes. This could be effected merely by assigning to our existing officers and establishments some additional duties.

The Treasurer, at the seat of Government; the Mint, with its branch at New Orleans, and another which has been contemplated, and is much needed, at New York, for other purposes; collectors of the customs, and receivers of money for the sales of land, as well as postmasters, might all be directed to keep in safety, not only the public money collected by them, but all actually placed in their possession, by transfer or otherwise. As fiscal agents, they might also be required to pay over and transfer it for such public purposes as may be authorized by Congress, and under such regulations as the Treasury Department from time to time may prescribe. Indeed, the third section of the post office law of 1825, with the bond taken under it as to the agency of the postmasters, is, perhaps, already sufficiently broad for that class of officers. At points like New York, and a few others, where a likelihood existed that the sums would permanently be large, but which, under a reduced revenue and expenditure, would seldom occur, authority might be given to appoint the clerks now acting as cashiers or tellers under the collectors and receivers, or other more suitable persons, to act as keepers and paymasters of the public money. But they should be made independent of the collectors and receivers, and placed under the like tenure of office, and under suitable bonds. Additional means of safety, and such additional but limited compensation to any of the above officers, might be provided, as the increased risk and labor might render just; but in only a few cases would these last be much augmented at any place.

Taking the year 1834 as furnishing a specimen sufficiently large of the probable business in future connected with the general operations of the Treasury Department, but, of course, not including the separate establishment of the post office, the whole

number of warrants issued in that year was a little under five thousand, and, though differing much in actual amount, averaging about \$5,000 each. This would be less than twenty warrants a day, and hence would require less than one per day to be paid in each of the twenty-six States. They differed, in fact, from four per day in this District, and two per day in New York, which were the highest numbers, to only one per week in several of the States. The business at each office daily, or even weekly, in making payments of the drafts, would, therefore, be very little. If more than one draft issued on a warrant, the business would be increased in that proportion, unless the whole payments were reduced, as is probable, hereafter, to sixteen or seventeen millions yearly.

In regard to the risk, five millions in the Treasury at any one time, if all placed in the hands of collectors and receivers, would not, on an average, exceed \$30,000 with each of the present number.

But if the amount, besides one million in the Mint, was chiefly in the hands of half the present number, which would approach nearer to the probable result, the sum with each would still be less than most of the existing bonds of receivers; and when exceeding theirs, or those of the principal collectors, the excess, in most cases, could be readily prevented, or reduced, by being drawn out to pay creditors, or be conveniently transferred to the Treasurer of the United States, at the seat of Government, or to the Mint and its branches. Until one of the latter is authorized at New York, the substitute before mentioned, of one of the present officers in the customs there as an independent keeper and paymaster of the public money, could be adopted, and, if deemed prudent, be extended to any other similar place.

In this mode, the present number of officers connected with the collection and disbursement of the revenue throughout the United States need not be at all increased. Nor will it become necessary, except in a few cases, to augment their compensation. Twenty or thirty thousand dollars a year would probably cover the whole additional expense of every kind.

The other system to which the attention and consideration of Congress are respectfully invited, is a new organization, by means of commissioners or receivers general, to gather the collections to more central points, and keep and disburse there a large portion of the public money, or such as could not be kept safely and expended conveniently in the hands of the collecting officers. Such an organization might be at only three or four of the most important points; or it might be made more extensive, and the number enlarged to eight or ten. This could be arranged, in all essential particulars, substantially in the manner which is now in very successful practice in some of the most enlightened and opulent Governments of Europe, and as was urgently recommended by this department as early as 1790. The only material difference need be, to pay out more of the money near the places where it is collected, rather than first to transmit most of it to the seat of Government. This organization of fiscal agents would be advantageous as a separate establishment for this business alone, and as an independent check on most of those collecting the revenue. But it would require some addition to the present number of officers, and in the first instance would more increase the public expenses.

But the whole addition of principal officers need not exceed ten. Nor would the increased annual expense to the Government probably amount to over fifty or sixty thousand dollars, as the system would enable both the War and Navy Departments to dispense with several of their agents for making local disbursements. The danger of any losses will be nearly the same under both plans. It is impossible to conduct the affairs of Government, or the ordinary transactions of society, without trust and risk of some kind. But one great object, wherever pecuniary confidence is reposed, should always be to require the best safeguards which appear reasonable; and in either of these systems, as hereafter explained, the amount trusted can be more easily kept from becoming excessive, and the hazard of losses, affecting the deposite agent by his lending or trading, be fully obviated, by the strict

prohibition of both the latter, under severe penalties.

Our direct losses from either collecting or deposit agents have always been comparatively small. Those by the former, it is believed, have not equaled those by the latter, though the latter, being banks, have usually in the end paid most of their deposits. The losses by the former are also supposed not to have exceeded one-fifth of those on the bonds of merchants for duties, and probably not one-eighth of those from the purchasers of public lands, under the credit system.

Occasional and strict examinations of the money on hand, where large in amount, would furnish a strong safeguard beyond the character of the officer, and the property of himself and sureties, and which it might be provided should be made by a committee of Congress, or in any other mode deemed most eligible to constitute an effectual check.

The plans which have been explained as to fiscal agents, are suggested for consideration, under a belief that either is appropriate in the present posture of affairs; that they require but slight changes in our existing laws or usages; and, whatever objections can be adduced against them, will, at the same time, be found to possess many signal advantages.

They will not, so much as some other modes of keeping the public money, expose the Treasury to disappointments and delays, through a dangerous partnership of interest, or the use of that money for private or corporate purposes. As the vicissitudes of trade or speculation affect the persons who borrow from the public banking depositories, the evil consequences must sometimes inevitably reach and embarrass the Treasury itself. Nor, on the other hand, will these modes, like our former one, cause frequent injury to those who, trading on the revenue of the Government, are subject to be most pressed to refund it, when least able. It is believed, likewise, that the funds of the Treasury can be always more readily commanded in a legal currency, and the hopes of its creditors not defeated, nor its faith violated so often, if the money is not loaned out, either in full or in part, but, as in other countries, is retained in specie or its equivalent, and in the actual custody of officers exclusively fiscal. In other countries, the public money is believed to be seldom; if ever, chargeable to the Treasurer, till it is either paid over on some draft, so that he can get credit for the payment, (and which mode is practised somewhat in England, as well as here, and extensively in France,) or lodged, not in deposit in any bank, but in his own possession at the seat of Government. In the former mode, the systems now proposed, and especially the first one, would operate so as to disburse at each point most of the public money collected near, and would thus enable the Treasury to command its resources with less delay; the money not being previously paid over at some distance, and to a separate set of agents, as has usually been the practice here in the use of banks; nor much of it transported inconveniently to the capital, as has usually been the practice elsewhere. This mode would thus possess one of the greatest excellences in any fiscal system; which is, to pay over quickest to the public creditor, and with the least official complexity, whatever is collected from the public debtor.

Besides these advantages, others would be, that the money in the Treasury, under both of the plans submitted, can always be more easily kept down to moderate dimensions by reductions in the revenue, and by temporary investments of an occasional surplus, as there will be no antagonist interest connected with it, wishing for loans and the use of surpluses, and thus co-operating to prevent a reduction.

The existing establishments and officers, whenever convenient, would be employed without a double machinery or the organization of a new system of agents. Executive control would be diminished rather than increased by them, because any additional officers will be selected, not by the President alone, nor the Treasury Department, as the banks now are, but virtually be designated by Congress, and the principal incumbents appointed by the consent of the Senate. They would also

remove all ground for the objection sometimes urged against the former system, that the Executive alone exercises an extensive patronage and great moneyed influence through a host of bank presidents, directors, and stockholders, scattered through every section of the country, and selected without the assent or check of either House of Congress in any particular case, and making loans of the public money from considerations merely political or official. A very wide discretion will be thus restricted, and a prolific source of suspicion and imputation of favoritism and partiality be entirely stopped.

The officers, under the plans proposed, will likewise be amenable exclusively to the General Government, and not be embarrassed, like the officers of the banks, by conflicting duties and interests in respect to the States; nor involved in those collisions, jealousies, and recriminations, often attendant on that position.

The independent and harmonious action of each Government in its appropriate sphere will thus be more fully secured. The local institutions, as a general principle, will be left to the care and uses of the several States which established them, without interference on the part of the General Government, and to be regulated or discontinued, as deemed most useful, under their own State policies, and most conducive to the original purposes of their creation. Nor would any general moneyed corporation, aside from the grave doubts which exist as to both its constitutionality and general expediency, have been likely in such a crisis as that of the war of 1812, or perhaps that of the last spring, to have proved a much safer public depository than those local institutions. Though more convenient in form for fiscal purposes than they, and free from some objections as to want of symmetry and accountability which obtain against them, yet, if chartered on usual principles, and judging from experience here as well as abroad, it must have failed, in a trial like those, to have sustained either our pecuniary operations, or its own, in strict good faith and in due vigor.

Without entering into details to illustrate this position, it is necessary to notice only the single circumstance, that the Bank of England, during a severe war, suspended specie payments near a quarter of a century, and that neither of the two United States Banks existed so as to be obliged to encounter such a peril. But since the last spring, the notes of the second one, to the amount of several millions, have been allowed to sink into the mass of irredeemable and depreciated paper, though issued under all the high securities and sanctions of a charter from the General Government, and with very large funds, still under the control of officers and trustees deemed by the stockholders exceedingly skilful, and bound by both law and contract to redeem those notes in specie, and on demand.

The systems which have been proposed in this report, if adopted, could not be expected to continue entirely exempt from losses by that unfaithfulness or casualty to which all trusts in human affairs are exposed. But they may be surrounded with strong safeguards, and would very probably soon be enabled to answer in a satisfactory manner every purpose of the Government, in its condition so different in many respects from that which formerly existed, and which was the paramount cause urged for the incorporation of our two former United States Banks. Its finances are not now burdened with a national debt of from seventy to one hundred and thirty millions, and, besides our ordinary expenses, with the annual payment, on account of principal and interest, of from ten to sixteen millions, to be first widely collected, and then transferred and disbursed at only a few points on the seaboard. It is now with a yearly revenue, reduced from thirty and forty millions to near twenty, and probably soon to be only sixteen or seventeen, and with a course of expenditure which can readily be diminished so as not much, if any, to exceed the revenue in a natural state of business. In large sections of our country, and in such a state of business, this expenditure happens nearly and very conveniently to correspond in amount with the receipts in the same sections.

We are, likewise, reposing in peace, with very superior means of communication, whether by mail or personal intercourse, and with a greatly increased and increasing portion of gold in the currency, to render distant transfers and payments more easy. It is manifest, therefore, that our fiscal concerns will be greatly lessened in amount as well as difficulty, unless we shall be visited by wars or other scourges, involving us in debts and embarrassments of an aggravated character, and which, fortunately, no sufficient reason appears for anticipating at an early day.

Under the proposed arrangements, the transfers from certain points could be often effected, when required by the department for public purposes, not only with ease, but so as greatly to facilitate the domestic exchanges, in the mode of employing drafts suggested in a subsequent portion of this report. In a more natural and ordinary state of receipts and expenditures, like that in 1834, the transfers required to a great distance would not exceed two or three millions during the year; and almost the whole of them were, at that time, in such a direction as to yield a profit, rather than be expensive to the banks which made them.

If the Treasurer were required to receive payment in advance, at certain convenient points, for all lands sold, as has once been the construction of the act of 1820, the probability is, that very soon all the unfavorable transfers rendered necessary would become quite unimportant in amount, and less expensive than the transportation of specie and paper has been heretofore, from the distant land offices to the nearest deposite banks, before much of it was paid to the public creditors. It will be seen that, by these modes of keeping the public money, it would not be indispensable to employ any banks as a prescribed part of the system, although it might sometimes be convenient to use them as individuals do, and as subordinate fiscal officers often do in other countries, for the deposite and transfer of large sums, and particularly for special depositories, when looking merely to safety and an early occasion to use the money.

No act of Congress, until the charter of the last bank of the United States in 1816, required the public money in the Treasury to be kept on deposite in any bank whatever. The whole subject was left to the discretion of this department. Even that charter permitted the Secretary of the Treasury to remove the depositories from the Bank of the United States, when he thought proper.

In the supplemental report from this department, in 1834, on the keeping and disbursing of the public money, a state of things like the present was adverted to and considered. It was observed, in regard to such an occurrence, that it will then "become necessary to devolve these duties on some receiver or collector already in office, or on some safe agent not now in office, as has been the practice for years in this country in paying pensions at convenient places, near which there was no State bank or branch of the United States Bank, and as has long been the usage in some countries of Europe, by having the revenue in certain districts chiefly received, kept, and transmitted through private agents and brokers."

But it was added, that "though the fiscal operations of the Government could, undoubtedly, still proceed through the personal agencies before mentioned," and without any banks, State or national; yet "it would be at some inconvenience and increase of expense, unless remedied in a manner that may hereafter be developed, and would not, in the opinion of this department, and in the present condition of things, be so eligible a system as the present one; because banks, though exposed to some dangers and evils, and though not believed to be necessary for the fiscal purposes of any Government, and much less of one in the present happy financial situation of ours, are frankly acknowledged to be, in many respects, a class of agents economical, convenient, and useful."

The use of State banks had then been adopted, and was proceeding satisfactorily. For more than two years after, it continued to be in successful operation, so far as regarded both convenience and safety. But now, most of the State banks have ceased to pay specie even for their own notes, and

many have paid out, if not issued, small bills, so as not to be in a situation either to be retained or to become fiscal agents, in conformity to the requisitions of the deposit act. A few others, who are in a legal situation to be selected, decline to receive the public money under some of the conditions prescribed by the act.

Nor is any national bank in existence, or, independent of its inexpediency in a political view, supposed to be capable of being established constitutionally. Hence it is respectfully submitted to Congress, under all the above considerations, whether the early adoption of one of the plans proposed is not proper, and would not be highly conducive to the public interests.

#### VI. SETTLEMENT WITH THE FORMER DEPOSITE BANKS.

Another subject that appears to require the early action of Congress is, the further indulgence which it may be proper to extend to such of the former deposite banks as are still indebted to the United States.

The facts which are supposed to be necessary to aid Congress in forming a correct decision on this subject will be fully submitted. The perils to which those banks were exposed had caused to the department much solicitude for several months before the suspension of specie payments, and led to some precautionary suggestions which it felt bound to make to them, so far as appeared consistent with the usual principles of banking in this country, and not calculated, by creating sudden alarm, to hasten the catastrophe that has since happened.

Besides the general cautions with respect to the excesses of bank issues, and the dangerous consequences likely to ensue, which were detailed in the last annual Treasury report, several instances occurred where the course of the business of some of the depositories appearing from their returns to be injudicious, special letters of advice were deemed proper, and were written. A rigid system in requiring additional specie was also pursued in all cases of unusual deficiency. In regard to the effect of these steps on the banks, it affords the undersigned pleasure to add, that, from the completion of their selection after the deposit act passed, to the last returns before their suspension, a great reduction in the circulation, as well as discounts of many of them, had taken place, and, in several cases, a much larger proportion of specie was kept on hand. Indeed, considering the extraordinary amount of public money paid out by them between last November and May, amounting to near twenty millions more than their receipts during the same period, it is a fact highly creditable to their prudence and ability, that the specie of all was reduced only from about fifteen to thirteen millions, and their circulation, instead of increasing, fell from near forty-one to thirty-seven millions.

As a whole, their specie, compared with their circulation, continued to be almost as large in May as in November. It averaged more than one to three, or much more than has been customary with the banks in this country, and was over double the relative quantity held by all the banks in England at the same period, and was in a proportion one-fourth larger than that in the Bank of England itself. Their immediate means, compared with their immediate liabilities, were somewhat stronger in November than in May, but were at both periods nearly 1 to 2½, or greater than the usual ratio, in the best times, of most banks which have a large amount of deposits in possession.

In this condition of things, the suspension of specie payment by the deposite banks was an event not generally anticipated.

The policy since pursued by most of them has been favorable to an early discharge of their engagements to the Treasury, and to a resumption of specie payments. Many have gradually reduced their discounts and circulation, as well as paid over much of the public deposits. This may be more fully seen in the tables annexed. Since the 1st of May, their discounts, as a whole, have been reduced about \$20,388,776, their circulation \$4,991,791, and their public deposits \$15,607,316; while their specie has diminished less than \$3,000,000. Of the number of eighty-six banks employed at the time of the suspension, ten or eleven are supposed

to have paid over all the public money which was then in their possession, to the credit of the Treasurer. In the custody of more than half the others, an aggregate of less than \$700,000 remains undistributed. Several of the rest still possess large sums; but many of them have continued promptly to furnish such payments from time to time, for meeting the public necessities, that, according to the last weekly statement, the whole balance to his credit remaining unpaid in all of them, was only \$12,418,041.

The course adopted in respect to the depositories of disbursing officers, after the suspension of specie payments, and with a view to safety, as well as to encourage the early resumption of such payments, may be seen more fully in the document annexed.

It was considered proper to proceed, and attempt to withdraw all the public money from the discontinued agents, as fast as it was wanted for public purposes, and as new and suitable depositories could be procured to receive any thing obtainable beyond such amount. But while the former agents appeared to be secure, and to be making proper efforts to meet such calls, it seemed more conducive to the eventual safety of the money, and more consistent with true wisdom, as well as the convenience of the Treasury, to refrain from unnecessary prosecutions and costs till the early session of Congress, which had been called, in part, for the consideration of this subject. On the contrary, when any of the banks persisted in neglecting to pursue the prudent course of curtailment, and in making no reasonable efforts to discharge the drafts on them in an acceptable manner, the department considered it a duty, however unpleasant, to deliver their agreements and bonds to the Solicitor of the Treasury for suit. This has already been done in nine cases; in some as a matter of precaution, to obtain additional security beyond what had been given; and in others, to take the preliminary steps for an action against the sureties as well as the principals.

Some of the additional banks, rendered necessary to carry into effect one of the provisions of the late deposit act, have, on this occasion, proved the least prompt and efficient in meeting their obligations. But though the losses of a few may be severe, and considerable delay may arise in discharging their engagements; and though it has been proper, and has evinced a commendable state of moral feeling in many of them, to strike at the root of the present excesses in paper, by curtailing largely both their issues and discounts, and thereby to make serious sacrifices; yet the condition of them all appears to be such as will, with the collateral security taken in most cases, render the United States probably safe against any ultimate loss. Considering the wide-spread pressure of the times, which had involved some of the banks, as well as their debtors, in extraordinary embarrassments; and that the public money, as a general rule, had previously been called from them only in moderate sums, as needed for expenditure and transfer, it was not to be expected that several of them would be able to pay over at once, and in specie, the whole of the large amount then in their possession.

More especially was this not to be expected, when, from the great accumulation of deposits, the specie of all of them at the time of the suspension, as well as for many months before, though larger than the proportion held by most other banks, did not equal, and could not, without making a sudden and great change in the practice under our whole banking system, equal one-half of their indebtedness to the Government alone. It is presumed that a considerable portion of the money since, as well as formerly, paid by the banks on transfers and drafts, has not been demanded nor paid in specie.

But no persons have been required to accept any thing else, nor, according to the views of the undersigned, could they be, without a violation of law and sound policy.

The drafts of the Treasurer for debts, when drawn on banks and not discharged on presentment, have, under instructions from this department, been often taken up in its behalf by the collectors and receivers, in order as much as possible

to relieve the public creditor from delay and loss. New drafts, when the first ones were not paid in an acceptable manner, have also in some cases been given on other depositories, and have helped to promote satisfactory adjustments.

Since the discontinuance of most of the banks as depositories, this department has also found the use of drafts made directly on receivers and collectors very acceptable to the public creditors; and by the specie fortunately then on hand, and since collected by the receivers, with a part of what was before in the mint, and some occasionally supplied by a few of the banks and collectors, a large amount of claims has been paid, and the Treasury is ready to pay others, so far as practicable, at points and in a manner convenient to many. But, till the indebted banks resume specie payments, or increased collections can be made in specie of what is due from them and from the merchants, it must be obvious that the department, however anxious to pay all the public creditors and officers in specie, when demanded, is unable to accomplish so desirable an object.

This is one of the evils incident to the existing state of the moneyed concerns of the country, and which cannot be remedied unless Congress furnish additional means, until specie payments are generally resumed. Some intermediate losses, by a depreciation of bank notes, must, therefore, fall on those, whether creditors or officers of the Government, who consent to take them rather than submit to delays in payment.

Hence it seems highly reasonable that the Government should hasten, as fast as possible, the restoration of specie payments, at least by its former fiscal agents who are still in its debt.

This would put an end to such losses. It also seems proper that those deposite banks which have not generally answered the demands on them, but have continued to receive full interest on the deposits they had loaned out, should be required to pay it on the sums still retained, and from the periods when they failed to fulfil their obligations to the Treasury. It is manifest that the members of Congress, coming from every section of the country, would be the best judges of what further lenity or severity might properly be exercised towards them; and knowing more intimately the causes and consequences of the suspension of specie payments by the banks in their respective neighborhoods, can decide with greater accuracy whether any indulgence could hereafter be extended to them appropriately, except on the condition of an early resumption of specie payments, and an allowance of interest during any delay in meeting their fiscal engagements. With the means of information possessed by the undersigned, he does not hesitate to express an opinion that it should not be done without a compliance with such conditions. As further evidence of the ability of most of them on this subject, it will be necessary only to advert to the abstract of their last returns, which has been previously annexed.

From the mode of doing business in the southwest, by making much of their circulation not redeemable at home, but at distant points, and providing for it there by bills of exchange, (so many of which, during the past season, have failed to be paid,) the situation of several of the banks there is least eligible, not only for an early resumption of specie payments, but for a speedy and satisfactory adjustment of their debts to the Government. But in the western, and probably in the eastern and middle States, if not elsewhere, the ability to sustain such payments appears, by their returns, much greater than has been customary in this country. Their specie, compared with their circulation, is as one to two, and one to three; and their immediate means, compared with their immediate liabilities, are over one to three. Hence it has been hoped that the efforts which the banks were bound to make would lead, in most places, to the desirable events above mentioned, without very long delay. The objection usually urged against an early resumption, that the unfavorable balance of trade against this country would, in that event, cause some of the specie in the banks to be drawn out and shipped, will, however true in point of fact, possess much less force when it is

considered that the delay hitherto has not prevented the export of specie. On the contrary, considerable sums, which were in ordinary circulation, have, since the suspension, been withdrawn, and a portion of them sent abroad, while their place is badly supplied with depreciated paper. So happily adjusted, however, are the laws of trade, even in their influence on the precious metals, that while our custom-house books show an export since the 15th of May last, chiefly to England and France, of \$3,708,320 of specie, they show during the same time imports, chiefly from other quarters, of \$3,140,030. Though the actual imports and exports have both doubtless exceeded those amounts since that period, and the ratio of difference has been somewhat greater, yet the total drain has been much less than many have imagined, and produced less effect on the general ability of the country and the banks to have specie payments resumed and successfully sustained. Congress having power to pass a bankrupt law, it would be worthy of consideration, if the power be ever exercised, whether all banks, and in any event, as recommended by Mr. Dallas and Mr. Crawford, all employed by the Treasury, should not be subjected to its provisions, and, on any important and deliberate failure in their pecuniary duties, be compelled at once to close their concerns.

In respect to the banks in the District of Columbia, as well as others connected with the General Government, it seems desirable that the measures adopted in relation to them, by Congress, should have a strong tendency to encourage the earliest resumption of specie payments which is practicable and safe. For this purpose, little doubt can exist, that while those measures will be the most salutary which shall evince a due liberality and forbearance to the extent really required by the crisis, they should, beyond that, be rigorous in exacting the adoption of such steps as are sanctioned by the sound principles of currency and the public faith. They will then help, at an early day, to relieve the community, as well as the Treasury, from a condition of the circulating medium, which, so far as it consists of bank paper irredeemable in specie, is one of the worst scourges which can be inflicted on society. It is no less hostile to the best maxims of political economy, than usually subversive of every just sense of both moral and legal obligation.

#### VII. ON THE MONEY RECEIVABLE FOR PUBLIC DUES.

The kind of money or currency receivable for public dues, is another embarrassment, concerning which legislation has been deemed proper by many. A change in the existing practice has been requested by others, without legislation. But, since the suspension of specie payments by the banks, no change, which would sanction the receipt of bank paper not redeemable in specie, has been thought either prudent or permissible by this Department. Nor will such an one be adopted without the express direction of Congress.

Believing that specie is the best standard, and the only one contemplated by the Constitution, for the public revenue and expenditures, as well as for the value of contracts and property, every departure from it for those purposes is deemed by the undersigned pernicious, if not unconstitutional. The question as to the expediency of using any other medium for a currency, is of a different character, and more complicated. But the ruinous consequences of a resort to continental money, bills of credit, or any species of paper not redeemable in specie, and which had been developed in our own experience, as well as in the soundest theories of political economy, were undoubtedly a principal cause for those rigid provisions in the Constitution connected with the currency. They restrict any State from issuing mere "bills of credit," from making any thing a tender "except gold and silver," or passing any law "impairing the obligation of contracts," as well as confine to Congress alone the power "to coin money" and "regulate the value thereof." The exercise of this last power, manifestly relating only to metallic money, appears to require merely the coinage of a sufficient supply at the mint, and in convenient denominations for all necessary purposes, and of such an intrinsic value, as, while preventing it from being depreciated on

the one hand, should, on the other, not be so underrated as to cause it to be too readily exported, or melted down for use in manufactures.

The whole amount necessary for public payments has been much misapprehended. Without a surplus in the Treasury, it would seldom exceed eight or ten millions of dollars, even if no evidences of debt, or any kind of paper money, were receivable. Like a running stream, the coin which flows in as constantly flows out, without much accumulation; one dollar helping to perform, in a single year, the service of payment and repayment numerous times. Indeed, the people of the whole United States do not, in a sound state of business and prices, need over one hundred and ten millions of an active circulating medium for all their currency. This would be a larger proportion of currency to our present population than the average has been from the adoption of the Constitution; and, if an exclusive metallic currency could be deemed desirable, would require only about thirty millions more than the specie which is supposed now to exist in the country. But the present quantity of specie being divided pretty equally between the banks and individuals, not half of it is in active circulation; and, unless it becomes increased, and much more equally diffused, some paper is, of course, necessary to prevent a sudden revulsion in prices and values, and to supply a sufficient circulating medium for the legitimate purposes of the States and the people. Some paper will, probably, always be found convenient for commercial operations. It would, therefore, be invidious, if not unauthorized, for the General Government to deprive the States of any supposed advantage in the use of it, so far and so long as they may deem proper, or otherwise to interfere with their course, in relation to it, except to enforce the present constitutional prohibition against issuing any bills of credit, or making any thing a tender except gold and silver. Care, however, must be employed, incidentally, to avert, as far as possible, any evil influences which might otherwise be exercised over our own fiscal operations by the different local policies pursued on a subject of so much delicacy, hazard, and difficulty.

The power which Congress may possess to legislate, with a view of furnishing a paper currency of any kind for the ordinary uses of the community, or of regulating, in any way, domestic exchanges, is not entirely clear, nor well defined. Whatever may be its just extent, it seems seldom, if ever, necessary to be used, while the States retain such a wide and undisputed authority over banking; and while the local institutions, as well as private bankers, here no less than abroad, are generally so competent to effect exchanges. Such a power is not expressly conferred in the Constitution, nor does it seem to be implied, unless, in the execution of some plain grants, it may become proper to be exerted on any emergency, and without using means otherwise forbidden, unwarrantable, or inexpedient.

In regard to exchanges, it is believed that seldom, if ever, has any Government, however unlimited its authority, considered it wise to prescribe special regulations for effecting them. Such a Government might well feel empowered "to regulate commerce with foreign nations," or between its own States, if it had any; but to regulate exchanges between individuals, would, in most cases, be justly deemed arbitrary. On the contrary, the sound principles of trade seem to require as little interference as possible with fixing the price of commodities, or the mode and medium through which they shall be interchanged. Those principles would only yield adequate protection or security, furnish facilities appropriate and authorized, and establish a good standard of value. Indeed, the balances of indebtedness between different sections of the country, if left to work out their natural consequences on the rate of exchanges, will usually, as they are now doing, correct excesses in business in any quarter, and be self-regulators, far superior to any officious and minute legislation. The rate merely for exchanges can seldom exceed the expense of transporting specie between any two places; and, if surpassing that, the excess must arise from what Government has

little power to cure—that is, from the difficulty in obtaining money where indebtedness is great, interest high, and credit impaired.

In regard to the currency which is most suitable for public purposes, whatever may be the authority of the General Government to make or adopt a paper one, in full or in part, it is difficult to perceive why, after having established specie as a standard, having forbidden any thing else to be made a tender, and having succeeded in encouraging the introduction of a supply of it into the country, very ample for all fiscal purposes, it should expressly dispense with its employment as the most usual medium for those purposes. The fundamental acts of Congress as to the payments for duties and lands have not made any exceptions in its use, or provided any substitutes, except the "evidences of the public debt." Any exceptions allowed ought certainly never to permit any thing, except specie, to be paid out as a rightful tender by the United States; and this principle has been always strictly observed. But by constructions adopted early in this department, and, subsequently, by the charters to the two United States Banks, as well as by an apparent sanction in the joint resolution of 1816, different substitutes of notes issued by those and State banks, have, at different times and under different modifications, been permitted to be received in payment. These, however, have been allowed only when regarded as a clear equivalent to specie, by being readily convertible into it, and by being recommended by some superior convenience or utility, as well as by great security. As specie likewise combines safety, uniformity, general use, sound theory, and almost universal experience in favor of its common employment, the framers of the Constitution doubtless believed, as has been the uniform practice since, that all substitutes of paper, as they have less intrinsic value, though they often, by smaller weight or bulk, possess some qualities of greater convenience for certain uses, should never be permitted to be forced on either the Government or the community without their express consent. As they depend also on credit for their worth, it must be bad policy to countenance them for either public or private use, where their credit does not rest on undoubted security, or to encourage such small denominations of them as would be employed by those classes in society whose business is of a kind which cannot be essentially promoted by the substitutes; whose profit is little or nothing derived from them; and whose losses, where depreciations occur, cannot be borne without distress.

Another general objection to every substitute not resting on an equal amount of specie in pledge to redeem it, which was the original idea of a bank of issue, is, that it tends to dispense with the necessity of specie, in connection with the currency, and thus, by converting more of it into an article of trade, expel it from the country; while a circulating medium is introduced instead of it, which is usually less safe, and often tempts to ruinous expansions in issues as well as business, so as to cause great fluctuations in prices, unsettle the value of property and contracts, and sometimes strip from honest industry, in a moment, the hard earnings of years.

Besides these, a special difficulty, in the use of any other substitute for public purposes, is the procrastination, disappointment, and embarrassment which, in case of its depreciation, are sometimes occasioned by it to great national measures, as well as the discredit thus cast upon the wisdom of the Government, for regulating its fiscal affairs in such a manner as to be unable to discharge punctually its engagements, and for the exhibition of an example so mischievous to both individuals and nations. Another difficulty in this country is the want of equal value, at different places, in any other, when compared with the standard of specie, and the virtual violation which its receipt for duties may thus cause of the spirit of that part of the Constitution requiring all imports to be "uniform." Nor can these two last difficulties be always entirely overcome by the use of such paper, or any other, though redeemed in specie, and on demand, if it be taken at a distance from the place

of its redemption. But, in the administration of our fiscal concerns, it has always been very desirable to avoid the want of uniformity, and the delay or expense, and sometimes the loss, incident to the receipt for lands or duties of such notes if redeemable at a distance, and which then would sometimes occur before they could be converted into specie, or such money as the public creditor was bound or willing to accept. In order, therefore, to prevent those injurious consequences, one mode has been to accept no State bank notes whatever for public dues, as is now, and sometimes heretofore was, the practice in respect to lands. Another has been, to permit none to be taken except such as, under permission of the Treasury Department, the collecting officers or the public depositories were willing at once to credit as specie.

In our early operations, for purposes of facilitating remittances to the Treasury, quite as much as for accommodation to others, collectors were instructed to receive certain State bank notes, payable near the seat of Government, and which were to be credited as cash when forwarded by mail, or otherwise, to the Treasurer. The justification offered for this course may be seen in a report from this department in April, 1790. The situation of the country, however, as to ease in communication, facility in exchanges, and the nearer location of many points of collection to those of expenditures, has since undergone such great improvements, as for a long time to have rendered the receipt of notes to aid in public transfers seldom necessary, and almost entirely disused. Another mode adopted by Congress has been, to render the receipts of the notes of State banks, for any purpose less material, by providing those of a bank chartered by the General Government, and making these last, by law, receivable for all public dues. But this mode has ceased; and the legality as well as sound policy of the practice to receive the notes of State banks for any public dues, whether done with a view to fiscal or general convenience, and though under all the strict limitations before mentioned, has been questioned by some. Others have considered any limitation whatever, by either the Executive or this department, as not justifiable since the joint resolution of 1816. It is, therefore, respectfully suggested, that a strong propriety exists for Congress to legislate more explicitly on the whole subject.

It may be proper and useful to add, that as most of the duties on imposts have been discharged in checks on the bank where the bonds were deposited for collection, or in its own notes, and seldom in those of banks at any distance, little embarrassment has ever arisen concerning the payments for duties in bank notes. But, in taking them for lands, the remote situation of the purchasers, the receivers, and the banks, has generally been such that frequent difficulties and changes in practice have occurred during the period while the United States Bank and its branches, as well as the State banks, were employed as depositories. In our mixed system of a currency, and one so long and so deeply interwoven with the business of the country, it was very inconvenient entirely to avoid, and at the same time occasionally dangerous to permit, taking the bills of any State bank for lands; and the receipt of such notes was obliged to be either so restricted as to prove of little convenience to the community, or a risk was incurred of many partial arrangements being made, and some ultimate injuries sustained by the Treasury.

Under all these circumstances, the course least liable to strong objections appears to be for Congress to prescribe some specific regulations on the whole subject.

This could be effected by directing what alone appears safe, and what is understood to be the practice in both England and France. It is, that the bills of no local banks be taken, which shall not, from the near location of the bank, be equivalent to specie; be able to be converted into specie at very short periods by the receivers and collectors, so as to pay the public creditors legally, if demanding specie; and be thus accounted for at par, and without expense to the Government. Another advantage from this course would be, its salutary check on over-issues by the neighboring banks.

The occasional convenience of a sound paper currency for various purposes, whether national or individual, such as large payments, distant remittances, exchanges, or travelling, is highly valued by some, and, where gold does not circulate, is often very considerable. But the difficulties in keeping it sound, the hazards and losses incident to its use, and which have already been explained, are troublesome. Should Congress determine that it is proper to furnish by its own authority, and for the purposes before mentioned, some paper medium, of higher character and other than what now exists, in private bills of exchange or notes of State banks, no doubt exists that any benefits which may occasionally be derived from its employment can be readily secured, without treading on the debatable ground of either the power or the policy of chartering a national bank.

Certificates, not on interest, but payable in specie to bearer or order, as well as being receivable for all public dues, could be authorized to be given in payment to the public creditor, whenever preferred by him, and sufficient specie existed in the Treasury. This kind of paper would be very convenient in form, and would differ little from the drafts now in use on banks, except being drawn on a known specie fund, and expressing on its face not only this, but its being receivable in the first instance for all public dues. It would possess the highest credit attainable in society.

As a practical illustration of their probable utility and convenience, even the drafts, though exposed to several disadvantages which would not exist with the certificates, are near the par of specie, and furnish such facilities for large payments and distant remittance: that the amount of them, on both banks and collecting officers, kept out unreturned, has increased within a few months from the usual aggregate of about two millions to nearly four and a half millions.

If the demand for such paper increased, public and private convenience might be promoted, and an equal quantity of specie at the same time preserved in the country, by reserving for this purpose, from any accumulation in the Treasury, a sufficient sum, and by placing it at a few important and convenient points, to render a greater number of certificates redeemable there with the very coin, whose representative they are intended, and honestly ought to be.

All the advantages of these certificates could thus be furnished, by merely paying them out to the public creditor, when more desirable to him than specie. But no loans of them appear advisable, nor any bank incorporation, bank officers, or bank machinery whatever, in connection with the subject. They would combine the most important requisites appertaining to any paper currency—such as the greatest security, an entire specie basis, and the unity of all issues in one body; while the control over these last, which it is so very desirable to preserve independent, would be placed and regulated by law, so as to prevent any interested or injurious excesses. The whole risk would be the loss by casualty or unfaithfulness of any of the specie that was held to redeem the paper, and which, as well as the expenses, would probably be in part remunerated by the loss of certificates before they are returned. If the residue of the expense should constitute any considerable objection to the system, it could be fully obviated by a moderate and fixed premium for the certificates, either when issued or redeemed.

The common drafts of this department, in their present convenient form, possess another advantage, which would sometimes be imparted to the certificates. When used at places against which the balance of trade exists, but drawn on places in whose favor it is, the former do now, and may hereafter, not only facilitate essentially the domestic exchanges, but, at the same time, supersede numerous bank transfers, and the more expensive transportation of specie itself.

The mint certificates, heretofore given on the deposit of bullion and specie, for coinage might easily be made running to bearer or order, and receivable for all public dues; and, in that way, would contribute to the same desirable ends.

The present branches of the mint, if not numer-

ous enough, nor situated at convenient places for the receipt of specie and bullion for this purpose might be aided by two or three agencies, instead of more expensive new branches, at points favorable to the interests of the mint and of the community.

It must be obvious that the paper of any bank will be less safe and useful in being received for public dues, in proportion as it may want such solid securities and foundations as the certificates before described. But if the notes of State banks are made receivable for such dues, under certain limitations like those which have been explained, the other most desirable guaranties for their safety, whether looking to any use of them by the General Government, or to the durable interests of the States themselves, seem to be for the latter, first, to impose on the existing banks, so far as lawful, the checks mentioned in a subsequent part of this communication. They could next authorize very few banks hereafter, except those of mere discount and deposit; and where the power of making paper issues to pass as money is added—a power so sovereign in its character, and so indispensable to be vigilantly guarded, could require a large proportion of specie to the circulation and deposits to be kept on hand, and, in addition, have the faith and security of the State pledged to indemnify the community, as, in the case of the above named certificates, would be pledged those of the General Government. This would greatly increase the caution and watchfulness of all concerned, and could be done by special laws for that purpose, or by allowing no new banks hereafter, except State banks so organized, or by requiring State stocks to be owned by all the banks, and lodged in trust to the extent necessary, with the specie on hand, to secure the immediate redemption of all the bills issued, and all the deposits payable on demand. Another kind of security beyond what now generally exists, would be, never to permit deposits to be received, payable on demand in specie, (a practice so very dangerous to the bill-holders,) except in the case of special deposits kept for a moderate compensation. The only other description of security which is likely to prove in any degree efficient, seems to be of a penal character, either by extending the provisions of a bankrupt law to all banks, as before suggested in respect to such as may be fiscal agents, or by allowing all depositors, public or private, and all bill-holders, not only a large interest, but severe prosecutions against the directors after any deliberate omission by banks to discharge their duties in the manner provided in their charters and contracts. The paramount object in all such provisions should, of course, be to guard against abuses, and reform existing evils, though, in some instances, the case may have become so desperate as to require even amputation to save life. Every thing else concerning bank paper is supposed to belong to the wisdom and sound discretion of the several States, as they may prefer, from time to time, to create and employ it. Within the constitutional limitations, and as soon as deemed expedient by any of them, specie alone, or paper, or a mixed medium of both, as considered preferable by each for its own purposes, can be, if it be not now, established. At the same time, it is hoped and believed that no wish exists in any quarter to prevent, but rather a deep and general anxiety, like that evinced by Congress, the Executive, and this department, for some years past, to encourage the same sound currency for the uses of the people and the States, as for the fiscal operations of the General Government.

#### VIII. SOME GENERAL CAUSES AND REMEDIES OF THE PRESENT EMBARRASMENTS.

In conclusion, it is the intention of the undersigned not to advert to the chief causes of the recent calamities, except so far as they are connected with our financial condition, and as appear necessary to indicate, briefly, a few remedies by means of general legislation.

Without doubt one of those causes was the over-production of cotton, coupled with the large and sudden depreciation in its price.

The whole product, though before so great, had, within three years, been increased probably more than one hundred millions of pounds, so as to ex-

ceed in a single year the enormous quantity of five hundred and forty millions of pounds. The fall of price was such, as on that quantity would make a difference in its value of near forty millions of dollars. The occurrence of this fall, however, was at such a period of the year as not much to affect over half the last crop; but the violence of the shock, though thus lessened, still occasioned a loss to an appalling amount. The fall was chiefly consequent upon the over-production, and the abrupt withdrawal of foreign credit, combined with some other circumstances which need not now be particularized. The over-production originated partly, like most other excesses here, from an extraordinary extension of credits and of bank issues, and partly from keeping open the sales of public lands to all persons, and at the former low prices, after other articles, including cotton and lands, had suddenly risen much in their nominal value. Under this tempting state of things, those sales were exorbitantly enlarged, till they amounted to over twenty millions of acres in a year, when not more than three or four millions were probably necessary; and not so much had before been requisite, annually, to meet the natural demands for new public lands for raising cotton, and for all other kinds of agricultural employment. But this excess in sales, so unexpected and ruinous, can, it is believed, be averted hereafter, whenever they are likely to go beyond a desirable amount, by passing laws which shall confine them to actual settlers, or increase the price to others. The same measures, with other remedies hereafter suggested for some other existing evils, will help to correct future excesses in the production of the great domestic staple of the Union.

Another of the causes of the present embarrassments was the unprecedented quantity of foreign goods imported. By stimulants to overtrading, such as very extended and often renewed credits abroad, as well as at home, so treacherous in appearances of prosperity, those importations were dangerously swollen to the amount of almost two hundred millions of dollars a year, and thus constituted an excess over our exports of about sixty millions, and involved the country in a foreign debt, merely commercial, whose balance against us, after all proper deductions for freights, profits, and similar considerations, probably exceeded the aggregate of thirty millions of dollars.

That excess, so little anticipated and so indiscreet, the system of credit formerly in use, and better regulated, would have seasonably prevented, by requiring an early adjustment of balances, and, thus turning the foreign exchanges against us, would have stopped many extravagances both in trade and bank issues.

But, stimulated and unrestrained, as before described, it increased the duties some millions beyond what a prudent though prosperous state of trade was likely to produce, and, combined with some other causes, has overwhelmed the mercantile interest with many of those disasters under which it has suffered so severely the past season. From many of these, no just legislation can now afford much relief. Nor could any legislation heretofore have prevented severe revulsions from this source, except by imposing checks on inordinate credit and banking, as well as on sudden and large expansions and contractions in bank issues, and by that further reduction of the tariff, which has been so strenuously urged for two years past to be adopted, whenever our fiscal condition evinced that the whole of the accruing duties were not needed for public purposes. Because the great surplus, forced into the Treasury by the excesses in the sales of and, and in duties on imports, not being seasonably withdrawn, either by equivalent appropriations, or further reductions in the current receipts through new laws or by investments, has undoubtedly contributed, through the loan of it while in deposit, to sustain, in some degree, if not produce, the spirit of overtrading. That surplus was offendepeared; and the only sound legal preventives still appear to this department to be, the measures before enumerated for preventing its accumulation. And after it had undesignedly happened, the wisest disposal of it was supposed to be, to expend it, as fast as useful, on proper objects of a public character;

and, in the mean time, not to leave it in the deposit banks, but to invest it in State stocks, as a provident fund; to remain both safely and profitably till wanted to aid in meeting current expenditures or extraordinary contingencies.

The undersigned regrets that he was not so fortunate in sustaining his opinions concerning the transient and fluctuating character of the excesses in our revenue, as to have received the concurrence of Congress in relation to those cautionary provisions formerly recommended by him for meeting the revulsions, deficiencies, and contingencies, which he supposed incident to them, as well as to our financial system generally. He is, at the same time, aware that the deposit act, so far as it placed a part of the public money with the States for safe keeping, and the Treasury circular issued by the direction of the Executive, as to the kind of money receivable for public lands, were intended, among other things, to obviate a portion of the evils connected with those excesses. Nor does he entertain any doubt that they both contributed, at first, to awaken caution among the more considerate, and to excite strong suspicions, if not convictions, in prudent minds, as to the great extravagancies of credit into which the community had rashly plunged. But after those measures had accomplished these and similar benefits with a portion of the community, though others still felt justified in anticipating a continuance of surpluses and distributions, the subsequent influence of either the act or the circular, in checking the threatened mischiefs, is believed, in most cases, to have been overrated. The operations of the deposit act, in supplying deficiencies of revenue, by a recall from the States, however well intended, will probably prove very deficient. In some other respects they have, by first requiring to be speedily collected and subdivided among more numerous banks from ten to fifteen millions of dollars, and then compelling, within the short period of nine months from the 1st of January last, another collection and transfer of nearly forty millions more, and much of it from the merchants, and to places not situated in the usual channels of trade or of large fiscal operations, unquestionably aggravated many of the distresses which had their principal origin in other causes. Those operations necessarily aided to produce the derangement that occurred in the domestic exchanges, and imposed a task on the banks, unprecedented for its amount and difficulty. By converting suddenly into demands for specie very large sums, most of which were before mere credits, they also hastened, if not increased, the loss of confidence in banks that has since so widely impaired their character and usefulness.

Another, and the last general cause of the present embarrassments which will be noticed, as having much connection with our financial affairs, has been an unnecessary and injudicious increase of bank capital, discounts, and issues. A similar increase, however this may have been influenced by the large temporary deposits of public money made with banks and States, and by the causes before alluded to, has happened in some foreign countries, as well as here, during the same period, from other great commercial and monetary impulses, that are permanently connected with all paper systems not founded entirely upon specie. These impulses have operated in some measure independently of several transient and local causes, whose effects have, by many, been much exaggerated. It is probable that they never can be properly controlled under such a system of expansive credit, while the individual directors of much of that credit have so little separate legislative restraint placed over their conduct, and have private interests at stake, which, in the pursuit of immediate and large profits, must usually possess a strength so superior to that of any sense of general duty to consult the public security.

The amount of circulation, which existed in the early part of the last year, had increased thirty millions or forty millions of dollars in only three years. It continued to expand for some months afterwards, and in the last annual report was considered likely to prove ruinous to steady prices; to surround with danger every species of sound trade; and not to be susceptible of that reduction to proper

dimensions, which was necessary, and soon inevitable, without probably producing some of the widespread sufferings which have since happened. The constitutional power of the General Government, to check such evils, except as before indicated, and except incidentally, through the kind of money it can and should permit to be employed in its revenues and expenditures, is apprehended to be limited. Through the latter, it may usefully discourage, as of late years has been attempted by Congress as well as the Executive, the dangerous issues of small bills, and, indeed, paper emissions of any kind, which are not "paid on demand in gold or silver coin at the place where issued, and shall not be equivalent to specie at the place where offered, and convertible into gold or silver upon the spot, at the will of the holder, and without delay or loss to him." For the like purpose, it may likewise continue inflexibly to countenance for smaller payments, and in the business of society not particularly commercial, a metallic currency; which is not liable like bank paper to sudden fluctuations and great losses. A further wise step would doubtless be, to refrain to make, by its own acts, any addition to the amount of bank capital, already too great; and to rely on bank paper as little as practicable, when authorized in the improvident manner which has often prevailed, and exhibited so much feebleness and insecurity, as well as produced so many inconveniences and losses.

It appears to the undersigned that, all beyond this, which can be beneficially accomplished, in connection with the last clause of the present embarrassments, and without an alteration in the Constitution conferring on the General Government indirect authority over every kind of banking, must be effected through the State Legislatures, and the commercial habits of the community. Much improvement can, doubtless, be introduced, if the Legislatures will impose those additional regulations, restraints, and securities, which have been before enumerated. Much more will also follow, and substantial relief be afforded to the people at large, if, in addition to the other measures recommended, individuals will exercise the wisdom to place a greater reliance on real capital, active industry, frugality, and well-grounded credit, than on that inflated system which of late has contemporaneously prevailed to such a ruinous extent, both in this and some other countries—a system, which has been encouraged by some persons, under the delusive idea that there was no overtrading of any kind, till a revulsion has occurred almost without a parallel, and has given to commerce and credit a blow, whose destructive effects it may require years fully to repair.

All which is respectfully submitted.

LEVI WOODBURY,  
Secretary of the Treasury.

## DEBATE IN THE SENATE.

*In Senate, Thursday, September 14, 1837.*—On the bill to postpone the payment of the Fourth Instalment of the Deposits with the States—

Mr. RIVES said he understood that this day the Committee on Finance expected to make a full report on the subjects which had been referred to them; but there was one subject most interesting to the country, on which they had not reported at all; they had reported no bill to designate the kinds of funds in which the public dues are to be received. As he had understood it to be the general sense of the Senate that no action should be had on any measure till all should be reported, he would now move that the Senate adjourn.

Mr. WRIGHT said the Committee on Finance had taken up, as it conceived, every subject recommended in the Message and report of the Secretary of the Treasury; and, after full and patient examination of the whole ground, and communing with the Secretary of the Treasury, the committee had reported all it considered necessary to report, and had determined to let the law in relation to the currency remain where it is.

Mr. RIVES said, that not having an opportunity to know the views of the committee, he had taken it for granted that they would report on every sub-

ject embraced in the Message and Treasury-report, both of which, he believed, had suggested that it ought to be determined in what kinds of funds the revenue should be collected. It was now announced by the chairman that no communication from the committee would be made on the subject. Mr. R. would therefore proceed on the assumption that the committee intended to leave the laws on that subject as they now are; and that being the case, and Mr. R. believing that all the measures proposed and to be proposed would have a mutual bearing and dependence on each other; and believing it to be infinitely more important to the country that what Congress should do should be well done, rather than done quickly, Mr. R. moved that when the Senate adjourned it should adjourn to meet on Monday next, that all the bills reported on the subject might be examined, compared, and carefully considered by members before the Senate came to act on them. Mr. R. said it was as inconvenient for him to remain here as it would be for any one; but whatever the inconvenience, he preferred that all measures should be duly and amply considered.

Mr. NILES said that he regretted the honorable Senator from Virginia (Mr. Rives) should have felt it his duty to ask for a further delay of the business before the Senate, by a motion for adjournment until next week. When the first bill was reported by the Committee of Finance, several days since, the Senator from South Carolina (Mr. Calhoun) suggested that it would be inexpedient to act on that or any single measure, until we had before us all the bills which were to be expected from that committee relating to important subjects, presented in the Message of the President. The necessity of this course, although he believed doubted by some, was generally acquiesced in. Since then, the committee have reported a number of bills for carrying out all the great measures recommended in the Message, which they deem it important to be acted upon during the present session; and the chairman has informed us that they do not intend to report any more bills. If his distinguished friend from Virginia, or any other Senator, thought that the bills reported did not cover the whole ground, they would of course have an opportunity to supply the deficiency.

But (said Mr. N.) the whole subjects are before us; if not in the bills reported, they are submitted in the Message. Our whole work is before us; we now see what is to be done, and he thought that it was our duty to enter upon it without further delay. We are now in the last half of the second week, and have done nothing; and it is proposed to adjourn over to the third week before we enter upon the business for which we have been convened. He did not complain of the delay so far, but, on the contrary, would say, for he thought it due to them, that the committee to whom the grave and important subjects contained in the Message had been submitted, had been remarkably faithful and industrious in the discharge of their duties. They had performed their service, and it now remained for us to enter upon ours, which he hoped would be done without further delay. Congress had been assembled at an extraordinary conjuncture to perform a special service, and he hoped, now we had the work before us, that we should enter upon it, and continue our labors with diligence and perseverance, so as to despatch the business, and close the session as soon as was consistent with the full deliberation and reasonable discussion due to the important subjects before us.

But we are told by the honorable Senator from Virginia, that the several subjects are so connected, that we can not, with propriety act upon one, without an opportunity to examine and compare them, and make up our minds upon the whole. He wishes time for examination, reflection, and consultation. But he (Mr. N.) thought there had already been sufficient time for these purposes, and he did not consider that there was much connection between the bill for postponing the fourth deposit to the States, which would be acted upon to-day, and the several bills that the honorable chairman of the Committee on Finance had just reported.

Sir, said Mr. N. we have been called here at an extraordinary emergency, when the business of

the country was deranged, and the public mind in an unsettled and feverish state; the expectations of the people are excited; the eyes of the whole country are upon us. At such a time, and under such circumstances, Congress cannot remain in session without a prodigious influence for good or for evil, and he greatly feared it would be the latter. A protracted session he was persuaded would tend to agitate and disturb the public mind, already sufficiently unsettled, that could hardly fail of increasing existing difficulties, which depended much, if not mainly, on a general want of confidence. Would gentlemen prolong the present, so as to run it into the regular annual session? He hoped no one was disposed to do this; nothing in his opinion could have a more injurious effect. He was sensible of the great and momentous importance of the subjects before Congress, and was as desirous as any one could be, that time should be allowed for their full consideration and reasonable discussion; but he believed it due to the country that we enter upon this at once, and continue our labors with diligence, so as to bring the session to a close as soon as possible. He therefore hoped that the Senate would now take up the bill for the postponement of the fourth instalment to the States, which was the order of the day.

Mr. WRIGHT said he had no disposition himself, nor did he presume the committee had, to press this subject prematurely on the Senate. The committee, after a full and free consultation with the head of the Treasury Department, had submitted all the measures which had been thought indispensable at this time to the public welfare. Mr. W. said the knowledge he had derived from that department, showed the necessity of speedy action on the first two bills reported, and with which the others had no immediate connection. Mr. W. thought it all important that this bill (postponing the payment of the fourth instalment) should be considered without delay, and he wished therefore to be absolved from any disposition to press this subject improperly on the Senate. It was the necessity of the adoption of this measure that made him so anxious for its speedy passage.

Mr. RIVES said nothing was further from him than to suspect his honorable friend of any such disposition; he knew too well his habits, and that gentlemanly courtesy that had always distinguished him to harbor such a thought for one moment; but the honorable gentleman must recollect that he has told us that he has had full communication with the Secretary of the Treasury, and derived information from a most enlightened officer on the subject, which no (Mr. R.) had not had. He was induced, therefore, to ask for a moment's consideration, that he might consult his own mind deliberately, and not as his friend from Connecticut had insinuated, for private consultation. He stood here alone, and had no consultation private or public. He stood here on the sole responsibility of a Senator of Virginia. Mr. R. could not, like the Senator from Connecticut, deem that his whole duty was finished when the Government was relieved. He came here for other and higher purposes as well as that; to wit: the relief of the people; and he regretted, that in all the measures set forth by the Committee on Finance, there was not one that looked towards that object. It was not his intention to cast any reproaches upon the committee, but he could not but express his regret that not a solitary measure had been proposed calculated to bring relief to the people. It might be very convenient to come here and register the edicts in favor of the Government, and then go home again; but it was his fixed determination, if possible, before he left the Senate, that something should be done at least to ameliorate, if not to relieve, the distress under which the whole nation groaned. If the committee would not propose some measure calculated to benefit the people, he would undertake it, all incompetent as he felt himself to such a task. The great desideratum, in his opinion, was, to restore public confidence; that once done, and he verily believed it could be done, the nation would rise at once to her wonted gladness and prosperity. The gentleman from Connecticut had said something about economy to the Government, and saving of time and expense; but he put it to that gentleman to say,

whether such matters were not a mere trifle, when compared with the great interests of the people. If economy were a matter of so much consideration, it would be better to save the mileage, and go at once to the current business of the country. No man was subject to more personal inconvenience than he was, from attention to his legislative duties at this inconvenient season—nevertheless, he was ready to sacrifice himself upon the altar of his country, if by so doing he could insure the anticipated relief. Now was the time, above all others, for the action of the Senate—when the elements of relief and national prosperity were dormant, and waited only the breath of Congress to wake them to life and activity. Mr. R. appealed to the Senate for such relief as the distresses of the people demanded; for his own part, he felt almost disposed to swear like the members of the National Assembly of France, that he would not go home until the people were relieved.

Mr. CALHOUN was deeply impressed with the magnitude and danger of the present emergency. It, however, had not taken him by surprise, nor was it unlooked for by him. In his humble opinion, of the many difficulties through which the country had passed within the last five and twenty years, this was by far the most distressing and overwhelming. Seeing and believing this, he had come here with a full and fixed determination to do his duty despite of all personal considerations and party feeling; for, when his country was in danger, he knew but one impulse, and that was to perform his duty. He had been looking forward with the most intense anxiety for the remedy which would be proposed. Fixing two great points in his mind, he had observed the most strict reserve until he saw the plan of the administration. Having now seen it, he felt that the only feature in the Message, and in the report of the Secretary of the Treasury, which gave character to the present bill, was to be abandoned. For himself, while he was ready to act on this understanding, he must say, that with regard to the other measures, he regarded them as nothing—as perfectly immaterial. And he would tell gentlemen that this was not a crisis for weak action. They had a difficult scene to go through, and if they did not meet it with promptness and boldness, they would find it no easy matter to overcome. He professed himself prepared to act immediately on the bill before the Senate.

Mr. WEBSTER said that he had already expressed his purpose, and that was, to throw no obstruction in the way of the adoption of such measures as the majority of the Senate might give their sanction to, and which they proposed as a remedy for the public distresses. In pursuance of that pledge, he felt himself bound to give as early an opportunity of considering them as was consistent with deliberative legislation. That which governed him in this case, to a considerable degree, was the apprehension (perhaps ill-founded, but still it was an apprehension,) that the measures proposed were not likely to obtain the assent of Congress; that it might be necessary to resort to other measures. In the mean time, he was as ready as the Senator from Virginia to remain here, if necessary, until May next; but, whatever procrastination or postponement was indulged in here, was a protraction of the evils oppressing the community. He hoped, then, that the Senator from Virginia would agree to consent that the measure first introduced should be brought before the Senate and acted upon, because the other measures were dependent upon it. The first step, in his opinion, which they had to decide, was whether the payment of the fourth instalment should be postponed, because the period was close at hand when that instalment was to be paid. It seemed to him that every consideration suggested the propriety of disposing of this measure in one way or the other. In short, he felt bound to those whom he represented, whom he knew to be in very great anxiety, and who were suffering much distress, to give a fair and prompt opportunity for a trial of these measures before Congress; and, if they should fail, let others be substituted for them which were calculated to give relief to the distress of the community.

Mr. RIVES believed, from the expression of

opinion in various quarters of the Senate, that there was a disposition to take up this bill as well as the others. And, especially, as he understood that the gentleman from Massachusetts (Mr. Webster) wished to deliver his views in regard to the bill, he would most cheerfully withdraw his motion. Whatever the inconvenience which might result to himself, he was perfectly willing to bear with it, and to give way to the general sentiment of the body. His decided opinion, however, was, that the action demanded of Congress, on all these measures was not simply and merely to put the Government in motion again, but to provide immediate and effectual relief for the people in preference to affording aid, in the first place, to Government. This object, he thought, was not very likely to be accelerated by taking up this or that bill; but he would accede, most cheerfully, to the general sense of the House, and withdraw his motion.

Mr. WEBSTER rose, and said that the importance of the present crisis, and the urgency of this occasion, was such as to lead him earnestly to desire that some measures of adequate relief might come from the quarter which alone had the power to effect any thing, by the majority it commanded. Much as I differ from them, (said Mr. W.) I would be glad to accept any measure of substantial relief which they might bring forward. I think, sir, I see such a necessity for relief as never before, within my recollection, has existed in this country, and I regret to be obliged to say that the measures proposed by the President, in his Message to Congress, and reiterated by the Secretary of the Treasury, in his report to the same body, only regard one object, and are, in their tendency, only directed to one branch of partial relief. The evils, however, under which the community now suffers, (said Mr. W.) though related, and of the same family, are yet capable of distinct consideration. In the first place, there are the wants of the Treasury, arising from the stoppage of payments and the falling off of the revenue. This is an exigency requiring the consideration of Congress; it is an evil threatening to suspend the functions of at least one Department of the Government, unless it be remedied. Another, and a greater evil is, the prostration of credit, the interruption brought upon all business transactions, arising from the suspension of all the local banks throughout the country, with some few and trifling exceptions. Hence has proceeded a prostration of the local currency, and a serious obstruction and difficulty thrown in the way of buying and selling. A third want is, the want of an accredited paper medium, equal to specie, having equal credit over all parts of the country, capable of serving for the payment of debts and carrying on the internal business of the country throughout and between the different and distant sections of this great Union. These three evils, though they are coexistent and cognate in their being, cannot be met by the same measures of relief; if relief is given to the one, it does not follow that you will relieve the others; if you replenish the Treasury, and thus bring a remedy to that evil, this brings no relief to the disordered currency. And again: if the local currency is relieved, it does not supply the other want, namely, that of a universally accredited medium.

It has, no doubt, struck the country generally, that the most important objection to the Message is, that it says nothing about relief to the country, directly and mainly; the whole amount of the proposition it contains relates to the Government itself; the interest of the community is treated as collateral, incidental, and contingent. So in the communication made by the Secretary of the Treasury, the state of the currency, the condition in which the commerce and trade of the country now are, is not looked at as a prominent and material object. The Secretary's report, as well as the Message itself, exclusively regards the interest of the Government, forgetting, or passing by the people. The outpourings of the Secretary, which are very considerable in quantity, are under seven heads, the exact number of the seven vials of which we read; but the contents of none of these is concocted or prepared in reference to the benefit of the community; all the medicine is intended for the Government Treasury, and there is none for the sickness and

disease of society, except collaterally, remotely, and by-the-by. It is, however, to the credit of the President that he has given, in an unequivocal and intelligible manner, his reasons for not recommending a plan for the relief of the country; and they are that, according to his view, it is not within the constitutional province of Government. I confess (said Mr. W.) this declaration is to me quite astounding, and I cannot but think that, when it comes to be considered, it will produce a shock upon the whole country. This avowed disregard of the public distress, upon the ground of alleged want of power; this exclusive concern for the interest of Government and revenue; this broad line of distinction now, for the first time, drawn between the interests of the Government and the interests of the people, must certainly present a new era in our politics. For one, (said Mr. W.) I consider the Government as but a mere agency; it acts not for itself, but for the country; and the whole end and design of its being is to promote the general interests of the community. Peculiar interests, selfish interests, exclusive regard for itself, are wholly incompatible with the objects of its institution, and convert it from its true character as an agency for the people, into a separate dominant power, with purposes and objects exclusively its own.

Holding, Mr. President, opinions on this subject, and being prepared to stand by and maintain them, I am certainly rejoiced at the clear shape which the question has at last assumed. Now, he that runs may read; there are none but can see what the question is: is there any duty incumbent on this Government to superintend the actual currency of the country? has it any thing to do beyond the regulation of the gold and silver coin? In that state of mixed currency which existed when the Constitution was formed, and which has existed ever since, is it or is it not a part of the duty of the Government to exercise a supervisory care and concern over that which constitutes by the greater part of that currency?

In other words, may this Government abandon to the States and to the local banks, without control or supervision, the unrestrained issue of paper for circulation, without any attempt on its own part to establish a paper medium which shall be equivalent to specie, and universally accredited all over the country? Or, Mr. President, to put the question in still other words, since this Government has the regulation of trade, not only between the United States and foreign States, but between the several States themselves, has it nevertheless no power over that which is the most important and essential agent or instrument of trade, the actual circulating medium? Now, Mr. President, on these questions, as already said, I entertain sentiments wholly different from those which the message expresses.

It is, (said Mr. W.) in my view, an imperative duty imposed upon this Government by the Constitution, to exercise a supervisory care and control over all that is in the country assuming the nature of a currency, whether it be metal or whether it be paper; all the coinage of the country is placed in the power of the Federal Government; no State, by its stamp, can give value to a brass farthing. The power to regulate trade and commerce between the United States and foreign or Indian nations, and also between the respective States themselves, is expressly conferred by the Constitution upon the General Government. Now, it is clear that the power to regulate commerce between the States carries with it, not impliedly, but necessarily and directly, a full power of regulating the essential element of commerce, viz: the currency of the country, the money, which constitutes the life and soul of commerce. We live in an age when paper money is an essential element in all trade between the States; its use is inseparably connected with all commercial transactions. That it is so, is now evident, since by the suspension of those institutions from which this kind of money emanates, all business is comparatively at a stand. Now, sir, (said Mr. W.) what I maintain is simply this, that it surely is the duty of some body to take care of the currency of the country; it is a duty imposed upon some power in this country, as is done in every other civilized nation in the world.

I repeat, sir, that is the duty of some Government or other to supervise the currency. Surely if we have a paper medium in the country, it ought only to exist under the sanction and supervision of the Government of the country. Now, sir, if the General Government does not exercise this supervision, who else, I should like to know, is to do it? Who supposes that it belongs to any of the State Governments, for example, to provide for or regulate the currency between New Orleans and New York?

The idea has been thrown out that it is not the duty of the Government to make provision for domestic exchanges, and the practice of other Governments has been referred to; but I think in this particular a great mistake has been committed. It is certainly far otherwise in England; she provides for them most admirably, though by means not perhaps altogether in our power. She and other nations, however, provide for them, and it is plain and obvious that if we are to have a paper medium of general credit in this country, it must be under the sanction and supervision of the Government. Such a currency is itself a proper provision for exchanges. If there be a paper medium always equivalent to coin, and of equal credit in every part of the country, this itself becomes a most important instrument of exchange. Currency and exchange thus become united: in providing for one, Government provides for the other. If the Government will do its duty on the great subject of the currency, the mercantile and industrious classes will feel the benefit through all the operations of exchange. No doubt some modes of establishing such a currency may be more favorable to exchange than others; but by whatever mode established, such a currency must be useful to a great extent. The question, therefore, comes to this: whether we are to have such a medium. I understand there are gentlemen who are opposed to all paper money; who would have no medium whatever in circulation but gold and silver. Now this, at all events, is an intelligible proposition; but as to those who say that there may be a paper medium, and yet that there shall be no such medium universally receivable, and of general credit, however honest the purposes of such gentlemen may be, I cannot perceive the sanity of such views; I cannot comprehend the utility of their intentions; I can have no faith, sir, in any such systems. Now I would ask this plain question: whether any one imagines that all the duty of Government, in respect to the currency, is comprised in merely taking care that the gold and silver coin be not debased? If this be all its duty, that duty is performed, for there is no debasement of them; they are good and sound. If this is all the duty of Government, it has done its duty; but if Government is bound to regulate commerce and trade, and consequently to exercise oversight and care over that which is the essential element of all the transactions of commerce, then Government has done nothing.

I shall not, however, (said Mr. W.) enter into this question to-day, nor, perhaps, on any early occasion: my opinions upon it are all well known, and I leave it with great confidence to the judgment of the country, only expressing my strong conviction that until the people do make up their minds, and cause the result of their conclusions to be carried into effect by their representatives, there will be nothing but agitation and uncertainty, confusion and distress, in the commerce and trade of the country.

I shall now (continued Mr. W.) confine myself to a few remarks on the bill before us, and not detain the Senate longer than will be strictly necessary to give a plain statement of my opinion.

This measure is proposed in order to provide for the wants of the Government. I agree that this is a necessary object; but the question is whether this bill is the proper mode of making such a provision. I do not think it is, though others may think differently: if this is indeed the best mode, I should wish to see it carried into execution, for relief is wanted, both by the Treasury and by the country—but first and chiefly by the country.

I do not say that by the law providing for this deposit, the States have any fixed right to it: I prefer to put the matter entirely on the footing of conve-

nience and expediency; and when it is considered what expectations have been raised—that this money has even been already disposed of in advance by the several States for different purposes, such as internal improvements, education, and other great objects, it becomes a question of expediency whether it would not be better to supply the wants of the Treasury by other means.

Another consideration of great importance in my view is this: There are already many disturbing causes in operation, agitating the transactions of society in all the various ramifications of business and commerce. Now I would ask, sir, is it advisable, is it wise, is it even politic, to introduce, at such a time as this, another great disturbing cause; producing a reversed action, altering the destiny of this money, overthrowing contracts now entered into, disappointing expectations raised; disturbing, unsettling, and deranging still more the already deranged business transactions of the whole country? I would ask, is it worth while to do this? I think not.

We are to consider that this money, according to the provisions of the existing law, is to go equally among all the States, and among all the people; and the wants of the Treasury must be supplied, if supplies be necessary, equally by all the people. It is not a question, therefore, whether some shall have money and others shall make good the deficiency. All partake in the distribution, and all will contribute to the supply. So that it is a mere question of convenience; and, in my opinion, it is decidedly most convenient on all accounts that this instalment should follow its present destination, and the necessities of the Treasury be provided for by other means.

Again, if you pass this bill, what is it? It is mere *brutum fulmen*; of itself it will not produce any good if you do pass it. All admit there is no money, therefore the bill will give no relief to the Treasury. This bill, Mr. President, will not produce to the Secretary one dollar; he acknowledges himself that at all events it will not produce him many, for he says he wants other aid, and he has applied to Congress for an issue of some millions in Treasury notes. He gets the money, therefore, just as well without this bill as with it; the bill itself, then, is unnecessary, depriving the States of a sum which the Secretary cannot avail himself of, and which sum, notwithstanding this bill, he proposes to supply by an issue of Government notes.

He calls this collateral aid to the measure of postponement; but this evidently reverses the order of things, for the Treasury notes are his main reliance; to them only he looks for immediate relief, and this instalment now to be withheld is (as a productive source of revenue) only subsequent and collateral to the issue of the notes.

But now, sir, what sort of notes does the Secretary propose to issue? He proposes, sir, to issue Treasury notes of small denominations, down even as low as twenty dollars, not bearing interest, and redeemable at no fixed period; they are to be received in debts due to Government, but are not otherwise to be paid until at some indefinite time shall there be a certain surplus in the Treasury beyond what the Secretary may think its wants require. Now, sir, this is plain, authentic, statutable paper money; it is exactly a new emission of old continental. If the genius of the old Confederation were now to rise up in the midst of us, he could not furnish us, from the abundant stores of his recollection, with a more perfect model of paper money. It carries no interest, it has no fixed time of payment, it is to circulate as currency, and it is to circulate on the credit of Government alone, with no fixed period of redemption! If this be not paper money, pray, sir, what is it? And, sir, who expected this? Who expected that in the fifth year of the **EXPERIMENT FOR REFORMING THE CURRENCY**, and bringing it to an absolute gold and silver circulation, the Treasury Department would be found recommending to us a regular emission of **PAPER MONEY**? This, sir, is quite new in the history of this Government; it belongs to that of the Confederation which has passed away.

Since 1789, although we had issued Treasury notes on sundry occasions, we had issued none like these; that is to say, we have issued none not bear-

ing interest, intended for circulation, and with no fixed mode of redemption. I am glad, however, Mr. President, that the committee have not adopted the Secretary's recommendation, and that they have recommended the issue of Treasury notes of a description more conformable to the practice of the Government.

I think (said Mr. W.) there are ways by which the deposits with the States might be paid by the funds in the banks; there are large sums on deposit in some of the States, and an arrangement might be made for the States to receive the notes of their own banks in payment of this instalment, while the Treasury is at the same time relieved by its own measure, and all the inconvenience, disappointment, and disturbance, which this bill will necessarily create, would be avoided. At any rate, the payment of this deposit could do no more than in some measure to increase the amount of Treasury notes necessary to be issued; it is a question of quantity merely. Much of the instalment, I believe, might be paid by judicious arrangements, out of those funds now in the banks, which the Secretary cannot use for other purposes, so that the whole might be provided for, by no great augmentation of the proposed amount of Treasury notes. I am, therefore, of opinion that this instalment should not be withheld: 1st. Because the withholding of it will produce great inconvenience to the States and to the people. 2d. Because provision may be made for paying it without any large addition to the sum which it is proposed to raise, and which, at all events, must be raised for the uses of the Treasury.

In relation to the general subjects of the Message, there is one thing which I intended to have said, but have omitted; it is this. We have seen the declaration of the President, in which he says that he refrains from suggesting any specific plan for the regulation of the exchanges of the country, and for relieving mercantile embarrassments, or for interfering with the ordinary operation of foreign or domestic commerce; and that he does this from a conviction that such measures are not within the constitutional province of the General Government; and yet he has made a recommendation to Congress which appears to me to be very remarkable, and it is of a measure which he thinks may prove a salutary remedy against a depreciated paper currency. This measure is neither more nor less than a bankrupt law against corporations and other bankers.

Now, Mr. President, it is certainly true that the Constitution authorizes Congress to establish uniform rules on the subject of bankruptcies; but it is equally true, and abundantly manifest, that this power was not granted with any reference to currency questions. It is a general power—a power to make uniform rules on the subject. How is it possible that such a power can be fairly exercised by seizing on corporations and bankers, but excluding all the other usual subjects of bankrupt laws? Besides, do such laws ordinarily extend to corporations at all? But suppose they might be so extended, by a bankrupt law enacted for the usual purposes contemplated by such laws, how can a law be defended which embraces them and bankers alone? I should like to hear what the learned gentleman at the head of the Judiciary Committee, to whom the subject is referred, has to say upon it.

How does the President's suggestion conform to his notions of the Constitution? The object of bankrupt laws, sir, has no relation to currency. It is simply to distribute the effects of insolvent debtors among their creditors; and I must say, it strikes me that it would be a great perversion of the power conferred on Congress, to exercise it upon corporations and bankers, with the leading and primary object of remedying a depreciated paper currency.

And this appears the more extraordinary, inasmuch as the President is of opinion that the general subject of the currency is not within our province. Bankruptcy, in its common and just meaning, is within our province. Currency, says the Message, is not. But we have a bankruptcy power in the Constitution, and we will use this power, not for bankruptcy, indeed, but for currency. This, I confess, sir, appears to me to be the short state-

ment of the matter. I would not do the Message, or its author, any intentional injustice, nor create any apparent where there was not a real inconsistency; but I declare, in all sincerity, that I cannot reconcile the proposed use of the bankrupt power with those opinions of the Message which respect the authority of Congress over the currency of the country.

Mr. WRIGHT said it might become him to say a few words in relation to the bill before the Senate. His position in reference to this and other bills, perhaps, required him to do so. He would, however, confine himself strictly to the present subject, and to the most brief justification of his own course, and that of a majority of the Committee on Finance, who had concurred with him in reporting the bill.

Immediately upon the appointment of the committee, and the reference to it of the important subjects treated of in the Message of the President, and the Report of the Secretary of the Treasury, the committee found that the Treasury of the United States was, very soon, to be in want of means to meet the current demands upon it, without regard to any further transfer to the States. They also found that this fourth instalment of the deposits with the States was to become payable on the first day of October, and amounted to about nine and one-third millions of dollars.

The state of the Treasury, as developed by the Report of the Secretary of the Treasury, was, as he now recollected, and he thought he could not be materially mistaken, that, at the time when the statement appended to that report was made up, about the first day of the present month, (he believed the exact date was the 28th of August,) there was in the Treasury, subject to draft, available and unavailable, but eight millions one hundred and some odd thousand dollars. The report was printed, and upon the table of every Senator, and would verify his correctness in this particular. This amount was exclusive of the sums already deposited with the States, being some twenty-eight millions.

To arrive at what would be the condition of the Treasury on the first of October, the expenses of the present month, which, from drafts already made and anticipated, were estimated at about two and a half millions, must be deducted from the eight millions, one hundred and odd thousands; thus leaving in the Treasury, subject to draft, on the first day of October, less than six millions, without the transfer of a dollar to the States towards the October instalment. This, too, included all the funds in the Treasury subject to draft for payments, or transfers to the States, whether available or not, upon the drafts of the Treasurer; the funds on deposit with the States not being taken into the computation.

If, then, the October instalment was to be transferred to the States, all the means in the Treasury of all descriptions, on the day when that instalment was, by the deposit law, made transferrable, would not be equal to two-thirds of the amount, and money must be borrowed upon the credit of the United States, to supply the deficiency.

Another and stronger view, however, was presented to the committee by the head of the Treasury Department. The largest portion of the funds in the Treasury at present, and which would remain there on the first of October, were wholly unavailable upon the drafts of the Treasurer. They were in the western and southwestern banks; and experience had already shown that the drafts of the Treasurer upon these banks would not be received in payment by the public creditors. It was equally proved that the States, other than those in which the banks were located, would not take those drafts and give their obligations for a repayment of the amount in money, in pursuance of the provisions of the deposit law. The transfer to the States, therefore, could not be made even to the amount of the funds in the Treasury subject to draft, by reason of the character of the funds to be drawn upon; and, if to be made, a loan, to a much greater amount than the deficiency of those funds upon paper, would be rendered indispensable, from the unavailable condition of these funds.

Still, it would be seen by the Senate, that this disposition of the funds in the Treasury, and of the public credit, would leave the Treasury without a dollar to answer the current demands upon it. The appropriations for the year were large, almost beyond example, and the current calls upon the public Treasury must be measured by them. Hence it had been an object of primary interest with the Secretary to devise the means for carrying on the Government, and fulfilling its obligations to the public creditors, and in reaching that object he had, as Mr. W. considered, wisely and properly, suspended his efforts to make this last transfer to the States. In pursuance of this necessity, he had told Congress, in his printed report, that he should make no movements towards the accomplishment of that object, until the action of Congress should signify its will that that transfer should still be made, and should provide the means for making it. These facts and conclusions were fully before the committee.

It then became necessary for them to see what would be the state of the public Treasury, upon the supposition that the October instalment of the deposit with the States should be withheld. In prosecuting that inquiry, they found that the funds in the Treasury, subject to draft, were, to so great an extent, unavailable, that it would be indispensably necessary to resort to the use of the credit of the Government, in some form, to anticipate the practical use of the unavailable portions of those funds for the purpose of current payments.

At this stage of the inquiry, two other important interests, both public and private in their character, pressed themselves upon the attention of the committee. In any settlement with the late deposit banks, which should have proper regard to the present deranged and depressed state of the business of the country, and to the security of the public moneys yet remaining in their possession, the committee were forced to the conclusion that indulgence to these institutions, beyond their legal liabilities, was indispensable. The conclusions of the committee upon this point had been embodied in the shape of a bill, and was now before the Senate in a printed form. The other great interest to which he referred was a similar indulgence upon the revenue bonds. There, also, the committee had reported a bill which was before the body. In both cases, the least indulgence had been proposed, which the committee believed to be consistent with the great private interests of the community, or the security of the public property involved. They had been induced to believe, that the time granted to the banks was the least which would enable them to meet the payments in the manner required by law, and that any dependence upon a more speedy collection of the merchants' bonds would result in disappointment to the public Treasury, and a consequent failure to pay the public creditors.

It being assumed that Congress would agree with the committee in these conclusions, and that these bills would meet with approbation, what then would be the state of the Treasury with reference to a transfer of the October instalment to the States?

Mr. W. said he understood the estimates of the Department to be, that without these indulgences to the banks and the merchants, and with the postponement of the October instalment of the transfer to the States, the whole means in the Treasury might be adequate to its wants, in case Congress should be willing to grant the use of the public credit temporarily, that that portion of the funds which were at present unavailable might be brought into practical use, until time should render them available for the redemption of that credit. If those indulgences should be granted, then the use of the public credit would be required beyond the current year, because material portions of the existing means, and of the otherwise accruing revenue, would be placed without the reach or control of the Treasury for more than that period.

Upon these calculations and hypotheses the bills of the committee had been framed, and it was now his duty to give these facts and conclusions practical application to the measure under discussion.

This was a bill to postpone the October instalment of the transfer to the States. If he had been correct in his statements, and had made himself in-

telligible to the Senate, it would be seen that nothing existed in the Treasury out of which this transfer could be made, and that nothing within its power could enable it to make it without the aid of Congress. It would also be seen that the whole means of the Treasury were inadequate to meet the current calls upon it without the temporary aid of the credit of the nation; and that, if a reasonable indulgence were granted to public debtors, (such as the condition of the country and the security of eventual collections seemed to demand,) the use of that credit must extend beyond the current year, and could, at best, be only eventually met and redeemed by the means of the Treasury, existing, or in prospect, without a further transfer to the States.

In view of these facts, Mr. W. said his own mind had been brought to this simple and plain conclusion: that the United States had no longer any moneys to be safely kept by the States; that if the October instalment of the transfer provided for by the deposit law of 1836 was made, the means to make it must be borrowed upon the credit of the United States; and that Congress must place itself in the singular position of using the public credit to borrow money, merely that it might be safely kept by the States when it was obtained. He understood these provisions of the deposit law, upon their face, to be mere provisions for the safe-keeping of the public money. He understood this to be the object of those who advocated and supported that law at the time of its passage. In that sense he was disposed to regard it now; and he did not, therefore, view it as creating any claim in favor of the States, or as imposing any debt upon the United States. If, therefore, we were called upon to borrow money to fulfil the provisions of that law, he could only view it in the light of a call upon us to borrow money, merely that it might be safely kept when so borrowed. He had not felt, and could not feel, himself authorized to recommend a loan upon the credit of the nation for such a purpose. He believed he spoke the sentiments of those of his colleagues upon the committee, when he said that these were the views which had actuated him and them in consenting to report this bill.

Mr. W. said he owed it to himself to say that he had felt most sensibly the remarks of the honorable Senator from Massachusetts (Mr. Webster) as to the inconveniences and disappointments which must grow out of withholding the transfer of this instalment to the States. With a much less knowledge of the varied business and pecuniary affairs of our extended country than that distinguished Senator, he had not been insensible to these considerations. The course pursued by his own State, in the disposition of this money, had compelled him to be awake to them. The law of his State for the investment of its portion of this money had placed the matter even beyond its control, and had compelled its chief fiscal officer, long since, to announce to its citizens that this instalment would be paid from the treasury of the State, whatever might be the action of Congress upon the subject. This would, beyond doubt, be done, and those who sent him here, and whom it was his duty and desire faithfully to represent, should this bill pass, would be compelled to indemnify, from their own public funds, the individuals interested as borrowers of these moneys, against disappointment, damage, or loss, from the action of Congress. Yet, under these delicate and difficult circumstances, he had not been able to convince himself that he could properly do otherwise than to support the bill. He owed a high duty to those constituents, but he owed, in his estimation, a higher to the nation and to the Constitution of his country. He could not think that the power granted to Congress to borrow money upon the credit of the United States could be properly exercised, for the mere purpose of raising money to be safely kept; and this he must consider the simple question presented. He might be mistaken in this view of the matter, but such was the deliberate conclusion of his mind, upon the most mature reflection, and that conclusion must govern his action upon the bill, as it had done his action as a member of the committee which reported it.

Having said thus much, Mr. W. said, he would only correct two or three errors of fact into which the honorable Senator who had just resumed his seat (Mr. Webster) seemed to him to have fallen, and he would detain the Senate no longer.

The honorable Senator seemed to suppose that the means to make this transfer to the States were in the Treasury, and that the only difficulty, separate from the other demands upon it, grew out of the present unavailable character of those means. The statements he had already made, had shown the error of this hypothesis. He had already shown that the whole means in the Treasury, even when the Secretary of the Treasury made his report, at the commencement of our present session, of whatever character, whether available or not, were less, by more than a million of dollars, than the instalment required to be transferred to the States under the deposit law. He had further shown that those means, such as they were, were, before the first of October, when that transfer was required to be made, to be still further diminished by the whole expenses of the Government for the present month, ascertained and estimated to amount to two and a half millions of dollars. Hence it would follow, that the whole means in the Treasury on the first day of October next, must be from three and a half to four millions less than the transfer required. It was in vain, therefore, Mr. W. said, to escape from the conclusion, that if Congress should insist upon this transfer, it must authorize a loan of money upon the public credit, to enable the Treasury to make it: in other words, that it must authorize a loan of money upon the credit of the United States, that that money, when loaned, may be deposited with the States for safe keeping.

Another error of the honorable senator (Mr. Webster) which he felt bound to correct, was in his strictures upon the recommendations of the Secretary of the Treasury, as to the manner of issuing treasury notes. The honorable senator had criticised this part of the report of the Secretary of the Treasury with some severity, and had held him up to the Senate and the country as striking out a new path for the supply of the Treasury; as recommending the issue of paper money; of a description of paper similar to that which we know by the denomination of "continental money;" and of doing this for the first time since the organization of the Government under the Constitution. The fault complained of consisted in a recommendation, merely discretionary and alternative, to issue Treasury notes bearing no interest, and payable to the bearer, in case the public creditors should be found willing to receive such notes in payment of their demands against the Government, at par; otherwise, to give the notes such an interest as would bring them to par.

Mr. W. said as the committee, in the bill they had reported, had not followed this recommendation of the Secretary, it would be seen that no question was depending before the Senate, either in the bill now under discussion, or in any other, which rendered this point material; but he was sure his object would be fully understood and appreciated in making this correction. It was simply to defend this public officer against a mistaken accusation. It was not necessary for him to defend, at this time, the soundness of the recommendation, but to protect the Secretary against the charge of being the author of a principle now supposed to be so new and so dangerous. To do this, it was only necessary for him to read the third section of the act of the 24th of February, 1815, authorizing an emission of Treasury notes, in which all these dangers would be found to be embraced, adopted, and made imperative, as a part of the laws of the land.

[Mr. W. here read the section of the act, as follows:

"SEC. 3. And be it further enacted, That the said Treasury notes shall be prepared of such denominations as the Secretary of the Treasury, with the approbation of the President of the United States, shall, from time to time, direct; and such of the said notes as shall be of a denomination less than one hundred dollars shall be payable to bearer, and be transferrable by delivery alone, and shall bear no interest; and such of the said notes as shall be of the denomination of one hundred dollars, or up-

wards, may be made payable to order, and transferable by delivery and assignment, endorsed on the same, and bearing an interest from the day on which they shall be issued, at the rate of five and two-fifths per centum per annum; or they may be made payable to bearer, and transferable by delivery alone, and bearing no interest, as the Secretary of the Treasury, with the approbation of the President of the United States, shall direct."

What now, Mr. W. asked, was the condition and the fault of the Secretary? He had found the public treasury in want of means to pay the public creditors. The exigency had grown out of a reverse in trade and business, sudden and universal, and the use of the credit of the Government, in some form, seemed to him indispensable. It became his duty to suggest to Congress the means and the mode of supplying the Treasury. He examined the legislative history of the Government in former cases of embarrassment at the Treasury, and found, among other expedients, that emissions of Treasury notes paying no interest, payable to bearer, transferable by delivery alone, and without any restriction as to the denomination of the notes to be so issued, had been authorized. Among a variety of plans to meet the present wants, he suggested this, recommending that no note should be issued for a less amount than \$20. Had he attempted to introduce any new principle? Certainly not. Was his conduct, in making this suggestion in conformity with the previous practice of Congress itself, deserving of the high censure which had been bestowed upon it? He, Mr. W. thought not.

A single other reply to the honorable Senator. That gentleman had supposed the President most inconsistent and contradictory with himself, in remarking, generally, in his message, that he did not recommend to Congress measures for the regulation of the general currency of the country, or of the foreign and domestic exchanges, because he could not find in the Constitution any power conferred upon Congress to regulate these matters; and then, in the same message, recommending a bankrupt law, as applicable to banks and bankers. Where was the inconsistency, or contradiction? The President had said he omitted to make further recommendations upon these subjects than those found in the Message, because he could not find, and did not believe, that Congress possessed further power over them; but he did recommend a bankrupt law, because the power to pass bankrupt laws is conferred upon Congress by the Constitution, in express terms. He did, therefore recommend a bankrupt law, which the Constitution authorizes, and he did not recommend any thing else, upon these points, because the Constitution authorizes Congress to do nothing else. Is this inconsistent?

Mr. WEBSTER said, in reply, if the act of 1815 authorized the issuing of Treasury notes, no circulation was ever made of such notes as the Secretary now recommends. All Treasury notes went on the ground of a temporary loan to the Government, to be paid or funded as soon as the Treasury would allow.

The member from New York (Mr. Wright) had said that the question before the Senate was a simple proposition, whether they should borrow money to be safely kept with the States? By him, and by others, it had also been represented as a question, whether they should borrow money to give away? Nobody, Mr. W. thought, would borrow money merely to give away, or deposit for safe-keeping. But he would put it to the honorable member, if any Government had made a contract, or excited an expectation, that a deposit would be made, and the other party had acted on the faith of this assurance, and had nearly completed their arrangements, whether it ought not to supply the means, even if it did not, at the time, possess them? And suppose it was the promise of a gift, instead of a deposit, might it not be found more just to borrow, than to defeat the expectation on which the other party had acted? What was the object of this bill? It was not to repeal, but to postpone what was hereafter to be fulfilled. Such being the case, it was doubtful whether it could ever be transferred to the

States with more convenience than it could now from the banks.

During the late war there was great want of money, and a great disposition to use Treasury notes, and pass them as a medium of payment to the public creditors. But in the difficulties and embarrassments of a foreign war, things were done, which, in a day of peace and abundance, we should be slow to do. And one thing which we should be slow to do was, to propose by law that we should pay the public creditors any thing less in value than gold and silver, on the condition that the creditors would voluntarily take it. The Secretary had said that the protested checks now in circulation were only a little depreciated below the value of specie, and argues that these notes will be as good at least as the protested checks. But suppose these notes should be depreciated only a little below the value of silver, was it proposed that they should be offered to the public creditors, if they would receive them? What was meant when it was said that the officers of the Government may pay its creditors in Treasury notes, if they will voluntarily receive them? What was the alternative? Were the gold and silver held in one hand, and the Treasury notes in the other? On the contrary, it was a sort of forced payment, not as good as was required by law. All knew there was no choice. The men who labored in the streets of this city, on the public works, or who furnished the bricks and stones, would come for their pay, and they would be offered Treasury notes, and asked if they were willing to take them. But would there be gold and silver in the other hand? No; nothing but the Treasury notes, and they would be asked if they were willing to take them; and then, if they should take them, that is called voluntary reception.

Now it is evident that in such a case the only choice is between Treasury notes, on the one hand, and something worse, or nothing at all, on the other. No man can be supposed to receive voluntarily any thing of less value than that which he is legally entitled to. The reception of such inferior medium is always the result of force or necessity, either greater or smaller. Neither the justice nor the dignity of the Government could ever allow of such a course. If Treasury notes were offered to the public creditor, there ought to be an actual choice afforded between them and the specie. And especially, with what an aspect could this Government offer such payment, at the very moment when with a stern countenance and iron hand it was demanding of its creditors metallic money for every dollar of its dues? Was it not now the law that no officer of the Government should offer the public creditor any thing less in value than specie? Mr. W. thought, therefore, that the notes proposed by the committee were better than those recommended by the Secretary. He was in favor of that system which would put the public creditor in no such selection as between paper and nothing.

Mr. BUCHANAN said he had often admired the dexterity with which the Senator from Massachusetts could extricate himself from a difficulty, in which, however, he was seldom involved. On such occasions he always made a skilful retreat. Feeling the respect which he (Mr. B.) did for his legal knowledge, he had received, as a matter of faith, his declaration that Treasury notes not bearing interest had never been issued under the present Constitution; and when he called up the ghost of the ancient Confederation to act as godfather of these Treasury notes, Mr. B. remained satisfied that he had made himself fully acquainted with the laws in relation to this subject. But scarcely had he taken his seat, when the act of 1815 laid the ghost which he had conjured up; and by that it appeared that Congress had done the very thing which he had declared had not been done since the days of the Confederation. Thus much was due to the Secretary of the Treasury. Mr. B. however, rejoiced that the Committee on Finance had proposed the issue of no notes not bearing interest.

In regard to this bill, a plain statement of facts would be the most conclusive argument which could be urged in its favor. He had voted for the deposit of June, 1836, and, upon a retrospect of all which had occurred since its passage, he had found no cause to repent of this vote. It was a

choice of evils; and between the alternatives presented, he thought he had made the best choice. On the one side, after reserving five millions, nearly forty millions of dollars had accumulated in the deposit banks. This vast amount of money was used by them to increase the dividends of their stockholders, to expand extravagantly the paper circulation of the country, and to excite speculation to the greatest excess. On the other hand, strong objections existed against making the Federal Government an instrument for the purpose of collecting money that it might be deposited with the States. The precedent might in many respects be dangerous. But the money was on hand. It had been collected under existing laws. Placed in this situation, he thought it was more just, more politic, more safe, to place it in deposit with the States, that it might be used for the benefit of the people, than to suffer it to remain with the banks for the benefit of their stockholders, and to the injury of the country.

But does the deposit law, from first to last, contain one sentence, nay, does it contain one word, which resembles a gift or a loan to the States? Is it not in terms a bare transfer of deposits from the banks to the States? Under its provisions the faith of all the States is pledged for the safe-keeping and re-payment of their respective proportions of this money, whenever they shall be required by the Secretary of the Treasury, for the purpose of defraying the wants of the Treasury. The mode and manner in which he shall call for it are expressly prescribed. Nay, more, the case has actually occurred. If the Secretary had pursued the line of strict duty under the law, he would, ere this, have called on the States for a portion of the three instalments which have already been paid. He has acted wisely in not making this demand until the pleasure of Congress could be known. The States are not now in a condition to return immediately any portion of what they have already received.

Under these circumstances, the question is, whether we are bound, upon any principle, to deposit with them the fourth instalment, when the Secretary of the Treasury, the very next day, might demand a return not only of it, but of the three other instalments, in the manner prescribed by the law.

The Senator from Massachusetts had not contended that we were bound by any contract to deposit this fourth instalment with the States. He has said, however, that if an individual, by his conduct, had induced a reasonable expectation that he would loan money to another, or give money to another, it might become his duty to borrow it, and pay interest for it, for either of those purposes. Mr. B. denied that the conduct of Congress was such as to afford any pretext for such an expectation. On the face of the act there was nothing but deposit written. Neither a loan nor a gift appeared upon it. It was a mere deposit, without interest, to be restored when demanded in the manner prescribed, and not a loan for a given period, much less an absolute gift. If the States, therefore, had entertained any such expectation, it was from other circumstances, and not from the solemn contract into which they had entered with the United States under this law.

Mr. B. knew that several of the States had made appropriations of this money which would render it extremely inconvenient for them to return, at the present time, any portion of the money which they had already received. He did not believe that it ought to be demanded from them by the Secretary of the Treasury without the special direction of Congress. Still this opinion was not founded upon any doubts which he entertained of their obligation to refund it.

Congress would not have been involved in its present difficulties in regard to this subject, but for the unfortunate amendment which had been made to the deposit bill by the House of Representatives, which was acquiesced in by the Senate. Had it not been for this amendment, we might now proceed, and suffer the fourth instalment to be deposited with the States. The Secretary of the Treasury would then have received from them transferable certificates of deposit, in such convenient sums as he might have directed, bearing no interest

until it became necessary for him to use them, but afterwards bearing an interest of five per cent. and redeemable at the pleasure of the States. At this very moment such certificates would command a premium in the market, and would be equal to gold and silver. The Treasury might have been replenished by their sale, and we might suffer the deposit law to take its course.
